We are forced to wonder how long they would engage in the practice were it not for the focus of the media. "Balanced" accounts of any presidential appearance these days seem always to include pictures and interviews with the demonstrators. They may number one or 20, when the president addresses a crowd of thousands. His carefully chosen words are countered with a slogan or two about how he makes the rich richer, the poor poorer or is casting the elderly adrift on an Arctic ice flow. To give anything close to equal billing to that sort of opposition is to propagandize voters. There is too much of that being done these days. Indeed, such tactics in a society which is supposed to form its opinions through scholarly and open debate, studiously considered ideas and thoughtful consideration are an insult even to the average intelligence.

To dissent is not only an American right, but a necessity. But it does matter how that is done.●

RIDE THE BUS ON US

HON. GEORGE C. WORTLEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. WORTLEY. Mr. Speaker, on the day after Thanksgiving, the Merchants National Bank of Syracuse, N.Y., provided free countywide bus service to residents of Onondaga County.

Over 100,000 local residents took advantage of this service, which helped make a traditional big shopping day even more successful.

Public reaction from bus riders and merchants was positive as area residents rode downtown and to the suburbs to begin their holiday shopping. Shopping center managers in the suburbs stated that business was signficantly ahead of last year's. Downtown merchants echoed those sentiments.

Merchants National Bank deserves special recognition for investing in the economy of Onondaga County in such a fruitful way. This innovative concept of a partnership between a lending institution and a public transportation system appears to be the very first of its kind.

I commend both Merchants National Bank and Central New York Centro for demonstrating how cooperation between the public and private sectors benefits us all.●

THE NEED TO POSTPONE VOTING ON H.R. 6514

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. GARCIA. Mr. Speaker, my colleague in the other Chamber, the senior Senator from Colorado, published an article in the August 24 edition of the New York Times on H.R. 6514, the Immigration Reform and Control Act of 1982. In that article he made a very strong case on the need to reevaluate the focus of this bill to include foreign policy questions.

Our relations with Latin America have become increasingly important over the past few years, and today is a particularly auspicious day in the development of those relations, and for all the people of this hemisphere. The new Mexican President, Mr. de la Madrid is being inaugurated, and the President of the United States is in Brazil, as part of his first Latin American tour.

Over the past few years Mexico and the United States have begun to build more cordial relations. This is beneficial to both nations. It would be a shame to see this growing friendship stagnate or reverse itself. We have many common interests and common problems, which, if we work on them together, can be resolved to our mutual satisfaction.

There are few, if any, issues more pressing to both of our governments than the question of immigration.

I am not intimating that the United States should tailor its immigration policy to meet the needs of Mexico. I do, however, think it is important that we take into account the concerns, not only of Mexico, but of all Latin American and Caribbean nations, as we decide on what our immigration policy should be.

That is why, I am deeply concerned about the efforts to bring the immigration bill to the floor of the House during this lameduck session. We must refocus H.R. 6514 to account for foreign policy considerations. We must examine our immigration policy further, before passing a new immigration bill.

I submit Senator HART'S article for the perusal of my colleagues.

[From the New York Times, Aug. 24, 1982]

IMMIGRANTS AND THE NEW BILL

(By Gary Hart)

WASHINGTON.—The legislation overhauling United States immigration law that the Senate has approved focuses almost entirely on domestic issues—stricter law-enforcement, lower quotas, regularizing the status of undocumented workers already in this country. But the Senate has not fully addressed the problem that brings thousands of immigrants to our shores each year.

Immigration is not merely a domestic issue. It is also a matter of foreign policy. So even the strictest enforcement of the various elements of the Senate bill, which has been sent to the House, would have little long-term effect. Quite simply, these provisions do nothing to address the root causes of migration and the flow of refugees: economic underdevelopment, social injustice, human rights violations, population growth. Until our immigration debate addresses these serious international issues, we will never develop an adequate immigration policy.

The Haitian refugees detained in United States camps vividly illustrate this point. Although they cannot possibly think they have entered the "golden door" of economic

and social opportunity, they continue to come. Life in the camps, with all its hardships, is obviously preferable to a life where social and economic opportunity are systematically denied.

There are enormous disparities between rich and poor in Haiti. Five percent of the population accumulates 50 percent of the national income. In 1980 (the last year for which data are available), Haiti's average per capita income was $275, the lowest in the Western Hemisphere. On the average, the Haitian Government spends $1 per person per year on education; it spends $18 per person per year on internal security.

According to the Organization of American States, corruption pervades all levels of Haitian government. As a result, domestic revenues and foreign aid are diverted for personal enrichment, rather than being spent on economic development.

Repression has been a fact of life in Haiti since 1957, when François "Papa Doc" Duvalier began his brutal regime. His successor and son, Jean-Claude "Baby Doc" Duvalier, has continued the tradition. The result has been a flood of poor, uneducated "boat people" to the United States.

Haiti is by no means alone in contributing immigrants. From March 1979 to March 1981, the number of Central Americans and South Americans in the United States increased from roughly 840,000 to 1.022 million. In the last 18 months alone, 200,000 Salvadorans have fled to the United States. And in Southeast Asia, intolerable conditions have brought hundreds of thousands of Indochinese to the United States.

It is unrealistic to think that these trends will not continue. Unprecedented population growth has contributed to tension not only in Mexico, the Caribbean basin and Central America, but also in the Middle East and the Far East.

Entrants into the labor force in the nonindustrialized world are expected to grow by at least 700 million in the next 20 years. Moreover, migration from rural areas to already overburdened cities will increase. Add continuing civil and regional wars, famine and repression, and migration flow will become a migration flood.

Limiting our changes in immigration policy to domestic measures will thus have little impact on migration pressures from troubled areas of the world. Ultimately, our immigration problems must be managed with the cooperation and participation of other governments. The immigration factor must become an integral part of the formulation of our foreign policy, particularly as it applies to certain areas of the globe. For example, we need to recognize that our tacit support of the repressive Duvalier regime will be paid for in an influx of "boat people" to this country.

Policies that favor confrontation and military solutions must be avoided in dealing with Central American countries since such policies add to emigration pressures.

Trade and investment incentives for Mexico and the Caribbean basin should take into account their impact on the creation of jobs and demographic movements. For example, Washington might consider providing incentives to United States and Mexican firms willing to locate in northern Mexico in return for Mexican Government assistance in blocking illegal immigration.

Both bilateral and multilateral assistance can, if properly directed, help create jobs and slow population growth in various countries around the world.

Regardless of good-faith legislative efforts to reform domestic immigration procedures, the problems presented by immigration in the 1980's and 1990's will not be solved without a more democratic, imaginative and farsighted foreign policy.●

SCHWEIKER AND HAYES CALL ATTENTION TO RULES ON DRUG PACKAGE TAMPERING

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. COUGHLIN. Mr. Speaker, the murder of seven persons in the Chicago area from poison-spiked Tylenol has produced ramifications far beyond the horrifying tragedy of the victims and their families.

In responding to the random and vicious nature of the drug tampering, both the Food and Drug Administration and the pharmaceutical manufacturing industry have acted quickly and responsibly. Despite their best efforts, there remains the elements of doubt among people who long have placed their faith and trust in the patent medicines supplied by retail stores throughout the Nation.

The Honorable Richard Schweiker, Secretary of Health and Human Services, has written letters to Members of Congress in which he asks for help in disseminating a message of reassurance from the Commissioner of FDA. I am pleased that the Secretary has taken this action.

I hope—wherever and whenever possible—my colleagues will assist in bringing this message to the American public. It is important to all segments of our population, especially our elderly citizens, that they know their Government in cooperation with private industry is taking the necessary precautions to insure as much as possible the safety and efficacy of over-the-counter drug products.

The letter from Secretary Schweiker and the public service announcement from Dr. Arthur Hull Hayes, Jr., are submitted for insertion in the CONGRESSIONAL RECORD:

DEAR MR. COUGHLIN: The recent Tylenol tragedy is still very much on the people's minds. For this reason, the enclosed public service announcement—from a tape recording prepared for radio broadcast—by Arthur Hayes, Commissioner of the Food and Drug Administration, should be of interest to you, your staff and your constitutents.

Sincerely,

(Signed) DICK SCHWEIKER.

THE HAYES ANNOUNCEMENT

In recent weeks we have all been shocked by criminal tampering with non-prescription medicines on store shelves. Innocent products like Tylenol—products that are intended to help—have been used to harm consumers.

Government and industry have been working together to provide packaging that will lessen the chance of this happening again—either to the people of Chicago or anywhere else. New government rules requiring tamper-resistant packaging for most non-prescription medicines will soon come into effect. We anticipate that such new packaging will begin to appear on store shelves over the next few months.

But, neither government rules nor tamper-resistant packaging can guarantee protection against everything that a criminal mind might think of. You, the consumer, must help. When you buy medicines—or any product—be sure packages are not opened or damaged. Look at seals or wrappings to make certain they are not torn. And when you get home, check the product inside the package for signs of tampering.

We don't have to do without any of the medicines that make our lives more comfortable. But we should use a litle extra care.●

"REAGAN'S DEFENSE FACTS DON'T FIGURE"

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. LaFALCE. Mr. Speaker, last Monday night, President Reagan told the American people that the United States is a second-rate military power when compared with the Soviet Union. In an attempt to convince the American people that we need the MX missile deployed in the Densepack basing mode, the President surrounded himself with graphs and charts depicting our humbled military posture. But what the President failed to tell us is that he left another series of charts and graphs depicting America's military superiority well out of view of the television camera.

As we prepare for the debate on the MX missile and the Densepack basing mode, it is crucial that our colleagues and the American people have all the facts. We must realize that although we trail the Soviets in selected categories of arms, we surpass them in others.

A rough parity exists, Mr. Speaker, one that we can maintain with prudent increases in our defense budget and without deploying weapons of dubious strategic merit that threaten a new escalation in the arms race.

I would like to bring to the attention of our colleagues an article that appeared in the New York Times which paints a more balanced, realistic picture of the Soviet-American strategic balance. It is appropriate for the Congress and the administration to debate the merits of particular weapon systems and the expanding might of the Soviet Union. But it is pure salesmanship to present half the picture when asking the American people for their support and guidance.

The article follows:

[From the New York Times, Nov. 23, 1982]

REAGAN AND MILITARY BALANCE: HIS NUMBERS ARE RIGHT BUT NEARLY IRRELEVANT

(By Leslie H. Gelb)

WASHINGTON, November 23.—In his speech Monday night, President Reagan, restated his belief that "in virtually every measure of military power the Soviet Union enjoys a decided advantage" over the United States.

Hardly any military experts in or out of the Administration deny that the enormous Soviet military buildup over the last two decades has confirmed the Soviet Union as the dominant power on the Eurasian land mass and the equal of the United States in strategic nuclear striking power. Beyond that, there is considerable disagreement among the experts about what that means and whether Moscow has gained military superiority.

William W. Kaufmann of the Massachusetts Institute of Technology, who has worked on estimating the military balance for all Republican and Democratic Secretaries of Defense in the 1960's and 70's, said in an interview: "Mr. Reagan's measuring of the balance by counting numbers of weapons on each side is generally regarded by experts as pure propaganda. Even the Reagan Administration has no plans to duplicate Soviet force levels because we don't need them for our purposes."

"It is the prevailing view of experts in and out of the Administration," he continued, "that the United States has a strong second-strike capability right now and can defend its traditional allies right now."

FACTORS OTHER THAN NUMBERS

He added, "Comparing numbers without looking at purposes, geography, allies and the like is a false comparison."

For example, Mr. Reagan cited the generally agreed estimate that Moscow spends 12 to 14 percent of its estimated gross national product on arms every year. The Office of Management and Budget says the American figure has been 5 to 6 percent for four years. The American gross national product, however, is almost double that of the Soviet Union.

Experts for the most part see such comparisons more as debating points than analytical tools. The Central Intelligence Agency was first asked to make these comparisons in the 1960's as a way of showing that the United States was ahead. In the mid-70's. Defense Secretary James R. Schlesinger used them to show that trends in military development were becoming adverse to the United States.

These comparisons are difficult at best, in part because the Soviet Union does not publish accurate budget figures, and it is particularly difficult to estimate expenditures in areas such as research and development. Also, while manpower consumes almost half of the American military budget, it accounts for less than one-fourth of the Soviet budget.

COMPARISONS SHOW TRENDS

To experts at London's International Institute for Strategic Studies, the Pentagon and the Central Intelligence Agency, the main and perhaps only value of thse overall budget comparisons is to point out trends. By all accounts, these trends show Moscow continuing to outdistance Washington in numbers of weapons produced and closing the gap in the quality of weapons.

Mr. Reagan pointed out that the United States has not increased its number of intercontinental ballistic missiles since 1965. But each Administration since then has elected to increase the number of nuclear warheads on each missile rather than the number of missiles themselves, a choice that American experts say was deliberately made for strategic reasons. There was an even greater addition of missile warheads in the American submarine force in this time.

In 1962, the balance of strategic nuclear warheads and bombs stood at 2,000 for the United States and 200 for the Soviet Union. Today, each side has over 9,000.

Mr. Reagan pointed to the fact that the Soviet Union has added 60 new ballistic-missile-firing submarines to its force in the last 15 years as against one new submarine last year for the United States. There is virtually unanimous expert judgment that American submarines, despite their age, remain decidedly superior in overall performance.

ANOTHER EXAMPLE: BOMBERS

He cited the fact that the Soviet Union has 200 of the new bombers known in the West as Backfires and is building 30 more each year, while much of the American long-range bomber force is 20 years old. But again, the prevailing judgment in the United States Air Force is that the old B-52's are far better long-range bombers than the Backfire or standard Soviet bombers, such as those known in the West as the Bear and the Bison.

With regard to Mr. Reagan's general analysis of the strategic situation and the MX decision in particular, former Defense Secretary Schlesinger said in an interview: "It does not logically scan. If we have become increasingly weak relative to the Soviets, it hardly follows that Mr. Reagan should have decided to cut the Carter Administration plan to deploy MX from 200 missiles to 100."

No one disputes Mr. Reagan's statement about Moscow adding to and modernizing its force of medium-range ballistic missiles targeted on Western Europe. But opinions vary in and out of the Administration on the significance of this. Some experts argue that unless this gap is closed, deterrence in Europe is jeopardized. Others maintain that this gap has existed essentially for 20 years without noticeable harm. But most experts are in favor of closing it.

ALLIES AND QUALITY

Nor does anyone challenge Mr. Reagan's statement that Soviet forces "far exceed us in the number of tanks, artillery pieces, aircraft and ships." But as experts have been quick to point out, this overlooks the abilities of American and Soviet allies and ignores the issue of the quality of weapons.

When allied totals are added, the numbers on each side are much closer. The total number of ships in the Atlantic alliance exceeds the Warsaw Pact total. American ships alone, although less numerous than the Soviet ships, are larger and better.

The general quality of American conventional forces remains superior to the Soviet Union's, although Moscow continues to close the gap. Recent encounters between Syrian forces using frontline Soviet aircraft and surface-to-air missiles and Israeli forces using American equipment were a case in point to experts. The Israelis destroyed some 30 missile batteries and 80 aircraft without a loss. The Israelis also destroyed some new Soviet T-72 tanks, previously considered virtually impenetrable.

Mr. Schlesinger, who like most experts in the field sees rising Soviet military abilities and favors increased American military spending, maintained that there were real penalties associated with Mr. Reagan's approach. "It is unwise for the President to declare that the United States is in an inferior position," he said. "Indeed, in regard to strategic forces particularly, the issue is much too ambiguous at any rate."●

MISTAKES IN EL SALVADOR

HON. GERRY E. STUDDS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. STUDDS. Mr. Speaker, while events in El Salvador have slipped from the front pages of our Nation's newspapers, the spiral of violence and terror in that country has continued unabated. Two recent examples of the inability of the Government to gain control over its security forces were brought to light in a recent editorial in the Cape Cod Times, and I would like to include a copy of this article in the RECORD at this time.

The article follows:

[From the Cape Cod Times, Oct. 22, 1982]

TWO MISTAKES

Officials in El Salvador have committed two important errors in judgment in two weeks, gaffes which could cost the government sympathy where it needs it most—in Washington.

One can be described as boorish and might not unduly affect relations with Congress. It occurred Wednesday when Salvadoran police and uniformed troops stomped into the offices of United Press International, CBS News, ABC News, NBC News and the television service of UPI and, with scarcely a word of explanation and none of apology, started rummaging through desks, reporters' files and photo cabinets, and poking around at radio equipment. The Salvadorans were armed with machine guns, pistols and truncheons—the weaponry one assumes is necessary to keep a pack of journalists at bay.

As his people rooted about as if for truffles, their commander announced that they were looking for "clandestine messages" destined for the rebels. He didn't say why the news organizations were being targeted. He didn't have to—the Salvadorans weren't looking for anything, they were delivering a message.

The more important error in judgment took place last week, compounding one of Oct. 1 and sending tremors through their government. It occurred when a Salvadoran federal judge upheld the earlier opinion of a colleague that there is "insufficient evidence" to proceed with the trial of a well-connected lieutenant accused of engineering the 1981 murder of two Americans, Mark D. Pearlman and Michael Hammer, and a local government agrarian-reform official. The Americans, members of the AFL-CIO's Institute for Free Labor Development, and their Salvadoran companion were gunned down in the restaurant of the Camino Real Hotel in San Salvador. Two noncommissioned officers who confessed to the shooting said the lietenant gave the order to kill.

By standards of American justice, the officer would have been tried. But in El Salvador, threats of violence can make a judge wary, and the extremists of the right have a record of turning their threats into reality.

What worries those in high places there is that the timorous ruling by the two judges might affect the courage of another judge who is to preside over the scheduled trial of those charged with the murders of three Roman Catholic nuns and a lay worker, all Americans.

In turn, this jeopardizes congressional approval of continued aid to the government of right-wing leader Roberto d'Aubisson—proof of significant progress in the cases of the seven murdered Americans is a precondition of further support from Capitol Hill.

The raid on the news offices was harrassment typical of a totalitarian government. It was not so much a raid as a warning to foreigners covering the tragedy of El Salvador. The flutterings among that nation's judiciary could portend something more serious—and news organizations can only complain, but Congress can act. And it should, if there is no resolution of the slaughter of seven U.S. citizens.●

THE PUBLIC WORKS EMPLOYMENT ACT OF 1982

HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. MITCHELL of Maryland. Mr. Speaker, I certainly share the deep concern of elected officials and constituents about the critical unemployment levels which continue to haunt us. The past acquiescence to the use of widespread unemployment to combat inflation has driven us to the point where we must reassert the Government's duty to confront these grave problems.

Today, I am introducing the Public Works Employment Act of 1982. This initiative provides that the Local Public Works Capital Development and Investment Act of 1976 be reauthorized at a level of $7 billion so that our major public works programs might be continued on behalf of job creation and national economic development. Like the 1977 major public works initiative, which became Public Law 95-28, the measure introduced today will provide that grants will be made available for local public works projects which will be of long-term benefit to out communities. Such projects as flood control, recreation, water management, and others which require construction and related jobs are included.

The elements of this bill are essential as we attempt to rebuild the infrastructures of urban areas which suffer gravely from economic blight and unprecedented unemployment levels. Additionally, such initiatives will lead us one step closer to insuring that these areas can move toward greater independence in addressing the unemployment problems of their immediate community residents. I urge my colleagues to join me in cosponsoring this effort and bringing it to the House floor for expeditious consideration during the current lameduck session.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, December 2, 1982, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

DECEMBER 3

9:30 a.m.
Commerce, Science, and Transportation
To hold joint hearings with the Committee on the Judiciary on H.R. 5949, proposed Cable Copyright Act.
235 Russell Building

Judiciary
To hold joint hearings with the Committee on Commerce, Science, and Transportation on H.R. 5949, proposed Cable Copyright Act.
235 Russell Building

Joint Economic
To hold hearings on the employment/unemployment situation for November.
2128 Rayburn Building

10:30 a.m.
Foreign Relations
To hold hearings on the nomination of John H. Holdridge, of Maryland, to be Ambassador to the Republic of Indonesia.
4221 Dirksen Building

1:30 p.m.
Commerce, Science, and Transportation
To hold hearings on provisions of title IV of S. 3044 (Surface Transportation Act), relating to truck size and funding for highway safety programs.
235 Russell Building

DECEMBER 6

10:00 a.m.
Foreign Relations
To hold hearings on the nomination of Edward L. Peck, of California, to be Ambassador to the Islamic Republic of Mauritania.
4221 Dirksen Building

11:00 a.m.
Foreign Relations
To hold hearings to review those programs administered by the Board for International Broadcasting, to be followed by hearings on the nomination of Kenneth Y. Tomlinson, of New York, to be an Associate Director of the U.S. Information Agency.
4221 Dirksen Building

2:00 p.m.
Foreign Relations
To hold hearings on the nominations of Lev E. Dobriansky, of Virginia, to be Ambassador to The Commonwealth of the Bahamas, Samuel F. Hart, of Virginia, to be Ambassador to Ecuador, and Victor Blanco, of California, to be a Member of the Board of Directors of the Inter-American Foundation.
4221 Dirksen Building

Judiciary
To hold hearings on pending nominations.
2228 Dirksen Building

DECEMBER 7

9:30 a.m.
Labor and Human Resources
To hold hearings on the nomination of Donald L. Dotson, of Pennsylvania, to be a Member of the National Labor Relations Board.
4232 Dirksen Building

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
3110 Dirksen Building

Environment and Public Works
Business meeting, to resume consideration of proposed amendments to S. 2432, authorizing funds for fiscal years 1983 and 1984 for programs of the Solid Waste Disposal Act and Resource Conservation and Recovery Act (pending on Senate calendar), and other pending business matters.
4200 Dirksen Building

Finance
Energy and Agricultural Taxation Subcommittee
To hold hearings on S. 1911 and S. 2642, bills providing for the establishment of reserves for surface mining land reclamation expenses and for the deduction of amounts added to such reserves.
2221 Dirksen Building

Foreign Relations
To hold hearings on the nominations of Richard T. Kennedy, of the District of Columbia, to be Ambassador at Large, and Jerome W. Van Gorkom, of Illinois, to be Under Secretary of State for Management.
4221 Dirksen Building

Judiciary
Business meeting, to consider pending calendar business.
2228 Dirksen Building

11:00 a.m.
Foreign Relations
Business meeting, to consider pending calendar business.
4221 Dirksen Building

2:00 p.m.
Select on Indian Affairs
To hold hearings on S. 2998, declaring that the United States holds in trust certain lands in Nevada for the Las Vegas Paiute Indian Tribe, S. 2893, providing for the approval of prior

transfers and extinguishment of claims and aboriginal title, involving the Miccosukee Indian Tribe of Florida, and S. 2931, providing for a claims judgment in favor of the Cowlitz Indian Tribe of Washington.
4232 Dirksen Building

DECEMBER 8

9:00 a.m.
Commerce, Science, and Transportation
Business meeting, to consider pending calendar business.
235 Russell Building

9:30 a.m.
Labor and Human Resources
To hold hearings on the nominations of Betty H. Brake, of Oklahoma, to be Deputy Director of the ACTION Agency, and David L. Slate, of California, to be General Counsel of the Equal Employment Opportunity Commission.
4232 Dirksen Building

10:00 a.m.
Armed Services
To hold open and closed hearings on the MX missile and associated Presidential basing decisions.
1318 Dirksen Building
Commerce, Science, and Transportation
To hold hearings on the nomination of George W. Douglas, of Texas, to be a Federal Trade Commissioner.
235 Russell Building
Rules and Administration
To hold hearings on computer and communication systems for the U.S. Senate.
301 Russell Building
Select on Intelligence
Closed briefing on intelligence matters.
S-407, Capitol

2:00 p.m.
Judiciary
To hold hearings on pending nominations.
2228 Dirksen Building

3:00 p.m.
Veterans' Affairs
To hold hearings on the nomination of Harry N. Walters, of Virginia, to be Administrator of Veterans' Affairs.
412 Russell Building

DECEMBER 9

9:00 a.m.
Agriculture, Nutrition, and Forestry
Agricultural Production, Marketing, and Stabilization of Prices Subcommittee
To hold hearings on proposed revisions to certain farm programs.
324 Russell Building

9:30 a.m.
Labor and Human Resources
To hold hearings on the nominations of Wendy H. Borcherdt, of California, to be Deputy Under Secretary for Intergovernmental and Interagency Affairs, Department of Education; Douglas A. Fenderson, of Minnesota, to be Director of the National Institute of Handicapped Research; Manuel J. Justiz, of New Mexico, to be Director of the National Institute of Education; Edward M. Elmendorf, of Vermont, to be Assistant Secretary for Postsecondary Education, Department of Education; pending nominations for the National Council on Educational Research; and pending nominations for the National Commission on Libraries and Information Science.
4232 Dirksen Building
Rules and Administration
Business meeting, to consider pending legislative and administrative business.
301 Russell Building

10:00 a.m.
Judiciary
Separation of Powers Subcommittee
To hold hearings on judicial leniency.
5110 Dirksen Building
Judiciary
Agency Administration Subcommittee
To hold oversight hearings on the implementation of the Equal Access to Justice Act (Public Law 96-481).
2228 Dirksen Building
Select on Intelligence
Closed briefing on intelligence matters.
S-407, Capitol

DECEMBER 10

10:00 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold oversight hearings on the implementation of the Household Goods Transportation Act (Public Law 95-454).
235 Russell Building
Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To hold hearings on S. 2503, S. 2680, S. 2681, and S. 2824, bills providing for the reinstatement of certain oil and gas leases.
3110 Dirksen Building
Foreign Relations
East Asian and Pacific Affairs Subcommittee
To hold a briefing on the status of the Micronesian negotiations.
4221 Dirksen Building
Judiciary
Juvenile Justice Subcommittee
To hold hearings on S. 2856, increasing the penalties for the sexual exploitation of children.
2228 Dirksen Building

2:00 p.m.
Judiciary
To hold hearings on pending nominations.
2228 Dirksen Building

10:00 a.m.

DECEMBER 13

Governmental Affairs
Energy, Nuclear Proliferation and Government Processes Subcommittee
To hold hearings on Government payments and the potential for fraud.
3302 Dirksen Building
Select on Intelligence
Closed briefing on intelligence matters.
S-407, Capitol

DECEMBER 14

9:30 a.m.
Banking, Housing, and Urban Affairs
To hold oversight hearings on the report of banking regulators regarding the Penn Square National Bank in Oklahoma.
5302 Dirksen Building

10:00 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold oversight hearings on the implemenatation of the Motor Carrier Act (Public Law 96-296).
235 Russell Building

DECEMBER 15

9:30 a.m.
Governmental Affairs
Energy, Nuclear Proliferation and Government Processes Subcommittee
To hold hearings on Government debt collection procedures.
5302 Dirksen Building
Governmental Affairs
Oversight of Government Management Subcommittee
To hold oversight hearings on computer matching programs to detect fraud and mismanagement in Government programs.
3302 Dirksen Building

DECEMBER 16

9:30 a.m.
Governmental Affairs
Oversight of Government Management Subcommittee
To continue oversight hearings on computer matching programs to detect fraud and mismanagement in Government programs.
3302 Dirksen Building
Small Business
To hold oversight hearings on the small business investment companies (SBIC) program of the Small Business Administration.
424 Russell Building

10:00 a.m.
Select on Intelligence
Budget Authorization Subcommittee
Closed meeting on budget matters relating to intelligence activities.
S-407, Capitol

JANUARY 12

9:30 a.m.
Labor and Human Resources
Employment and Productivity Subcommittee
To hold hearings to review Federal programs which create certain job opportunities.
4232 Dirksen Building

JANUARY 25

9:30 a.m.
Finance
To hold hearings on the administration's assessment of the meeting of ministers to the General Agreement of Tariffs and Trade (GATT).

SENATE—*Thursday, December 2, 1982*

(Legislative day of Tuesday, November 30, 1982)

The Senate met at 12 noon, on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

The PRESIDENT pro tempore. Our prayer this morning will be offered by the Reverend Hampton Joel Rector, Special Assistant to Senator ROBERT C. BYRD, the minority leader.

PRAYER

The Reverend Hampton Joel Rector, Ph. D., offered the following prayer:

Almighty God our Heavenly Father, in whom we live and move and have our being, we ask Your presence in this Chamber and in our hearts and minds today.

More than two centuries ago, You created our Nation. Again and again throughout our history, You have judged us, guided us, and inspired us. Yet, though You are the Lord of all that is seen and unseen, You have given us the liberty wisely to serve You, or foolishly to neglect Your counsel.

Therefore, incline each of us to heed Your spirit this day. Lend to every Senator and to every staff member a wisdom higher than our own. Give the leaders and Members of this Senate the foresight to see where next to put their feet, the patience to do their duty in even the smallest tasks, the shrewdness to make right decisions, and the satisfaction of doing Your will.

And share Your vision with all of the citizens of this land—especially our President and those who most closely carry out his commands—that we may nurture the justice and peace that You hope for all mankind, that we may fulfill the ideals to which You are always calling us, and that we may reflect Your glory and be a blessing to the world.

We pray these things in the name of Him in whom alone is perfect service, perfect wisdom, and perfect peace. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

REVEREND RECTOR CONGRATULATED ON INSPIRATIONAL PRAYER

Mr. BAKER. Mr. President, first I wish to express my congratulations to the distinguished acting Chaplain today for an inspirational prayer and extend to him all our welcome, I am sure, on behalf of every Senator.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER DESIGNATING PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, on yesterday it was announced that there would be a period for the transaction of routine morning business, I believe, during the course of this day. I ask unanimous consent that, following the recognition of the two leaders under the standing order and the recognition of three Senators on special orders as previously provided for, there be a period for the transaction of routine morning business to last no longer than 1 p.m., today in which Senators may speak for not more than 3 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, it should be remembered by Senators that, under the provisions of rule XXII, a vote will occur on cloture in response to a motion filed on the day before yesterday in respect to the committee amendment to S. 995 after first establishing the presence of a quorum under the provisions of that rule. That quorum call will occur, unless modified by unanimous consent, beginning at 1 p.m., also obedient to the provisions of the rule.

There is a second cloture motion, Mr. President, against the bill itself. If cloture is invoked on the committee amendment, then debate and disposition of the committee amendment will proceed until concluded. If it is not invoked on the amendment, then the vote will occur on the motion to invoke cloture against the bill itself thereafter.

Mr. President, the leadership on this side still hopes that we can finally get to an appropriations bill, but I do not see that prospect at this moment. I will confer with the chairman of the Appropriations Committee and have a further announcement to make in that respect, I hope, later today.

Mr. President, I have no further need for my time under the standing order. I see no Senator seeking recognition.

Mr. President, I address the distinguished acting minority leader and ask if he has any need for additional time beyond that under the standing order.

Mr. METZENBAUM. Mr. President, I do not. I would just like to, if I may, in my capacity as a Member of the Senate, send to the desk a number of amendments and ask that they be considered at the appropriate time.

The PRESIDENT pro tempore. The amendments will lie on the table.

Mr. BAKER. Mr. President, I ask of the acting minority leader if he wishes to reserve the time of the minority leader for use any time during the course of the day.

Mr. METZENBAUM. The answer is yes. I think the majority leader knows that the minority leader is engaged in a conference of Democrats at the moment. I am sure he would appreciate it if that time would be reserved for him.

Mr. BAKER. Mr. President, I ask unanimous consent that the time remaining to me and the time remaining to the minority leader under the standing order may be reserved for our use any time during the course of this day.

The PRESIDING OFFICER (Mr. EAST). Without objection, it is so ordered.

RECOGNITION OF SENATOR MATHIAS

Mr. BAKER. Mr. President, there are three special orders which will follow in sequence at this point for Senator HARRY F. BYRD, JR., Senator PRYOR, and Senator MATHIAS. I only see Senator MATHIAS in the Chamber at this time. Is the Senator from Maryland prepared to proceed?

Mr. MATHIAS. Will the majority leader yield?

Mr. BAKER. Yes.

Mr. MATHIAS. Mr. President, I had a communication from Senator HARRY F. BYRD, who indicated that it would be agreeable to him to postpone his special order and I am prepared to go forward.

Mr. BAKER. I thank the Senator.

Mr. President, I ask unanimous consent that the order for presentation of special orders may be reversed and

that the Senator from Maryland may be recognized first.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Maryland is recognized.

THE NUCLEAR ARMS RACE

Mr. MATHIAS. Mr. President, the American people have expressed the desire to limit the expansion of the nuclear arms race and put a cap on the danger of nuclear annihilation of the human race.

Considering the numbers of people who have expressed their determination that something be done to limit the nuclear arms race, even against the advice of the President and the Secretary of Defense that such a policy would damage the security of the United States, we should begin to reexamine the freeze proposal and define it in rational terms. It is important that we do so not only for the formulation of our own policy but also to clarify the perception that our allies and friends—and indeed, our potential adversaries—have of our intentions.

One interpretation of the freeze idea is a massive, comprehensive, bilateral cessation of all nuclear arms activity—production, testing, and deployment of nuclear weapons. It is unrealistic to suggest that a total freeze could be immediate.

A sudden change in our approach probably would only confuse the Soviets as to our ultimate goal in the arms control process—a freeze or reductions? It would not be the first time we or the U.S.S.R. have communicated a confusing message and it would not enhance either of our negotiating positions in Geneva. Negotiations for a mutually acceptable, verifiable freeze could take as long as achieving the reductions now under consideration or longer.

One of the difficulties in attaining a freeze is that there is no adequate way to verify parts of it—a cessation of production, for example.

Some proponents of the freeze concept have said that it should be only momentary, the kind of pause that an ascending elevator makes before it reverses direction. This surely is acceptable but, again, the difficulty of arranging for the complex, extended systems in both the Soviet Union and the United States simultaneously to rise to a peak, stop, and then reverse direction is unlikely, given the diverse power factors in both countries.

What we need to do, if we are talking about freezing in a serious and mature way, is to talk about the various elements that could be frozen. Many of those who speak in behalf of the freeze movement seem to think of it as freezing a huge chunk of icehouse ice, a 100-pound block that would test the strength of the strongest iceman. What we really need to freeze is not unmanageable and impractical hunks of ice, but ice cubes—usable, manageable and a practical size—that gradually will cool the nuclear arms race and bring it to the position where it can be controlled and its direction reversed.

At various times in the past, we have attempted to harness the dizzying spiral of nuclear weapons developments. A world still shaken by the Cuban missile crisis welcomed the Limited Test Ban Treaty of 1963. Reflecting these concerns are the strong position taken by the Catholic bishops in the United States and the positions taken by other influential religious and political groups in the United States and Europe. It seems clear that the time is ripe for a restoration of the national consensus for arms control that dissipated after 1963. The time has come to take the small steps that eventually will make large ones possible.

There were moments in the last decade when it appeared possible that Americans could develop a generally acceptable national security policy that combined the intelligent pursuit of arms control objectives with prudent augmentations of our military force structure. SALT I and the Antiballistic Missile (ABM) Treaty, the Threshold Test Ban (TTB) and Peaceful Nuclear Explosions (PNE) Treaties were accords containing the promise of still greater things to come. Some argued at the time of SALT II that ratification of the treaty, with amendments, together with certain additional defense expenditures, would facilitate the creation of such a national consensus, which would in turn give confidence to our allies that we were capable of sustaining a long-term national security policy spanning administrations. While none of these agreements made dramatic contributions to the control of nuclear weapons, they were important as confidence-building measures. Such small ice cubes were more acceptable to all concerned than one big block of icehouse ice.

The consensus, however, did not develop. Instead, we have allowed this country's strategic policy direction to be altered approximately every 4 years:

We are embarked on still another set of U.S. strategic arms control initiatives, shelving, if not repudiating, the efforts of previous administrations—as, indeed, the Carter administration attempted to do in March 1977;

We continue to allow two painstakingly negotiated documents—the Peaceful Nuclear Explosions and Threshold Test Ban Treaties—to languish unratified in the Senate;

We have discontinued comprehensive test ban (CTB) negotiations;

We are planning a large deployment of sea-launched cruise missiles (SLCM's) and are moving toward the militarization of outer space.

All of this brings into question the ability of this country to sustain an effective, coherent program for arms control and force deployment that retains strong public support. It is time to consider freezing a few more ice cubes.

How should we go about it? There is no simple answer. I do not have a forked peach twig with which to divine our way out of this predicament, but there are some steps that might provide the foundation for eventual progress.

Our first priority must be the development of a bipartisan strategy for defense planning and the conduct of foreign policy. Such a consensus would reduce the growing frustration of the Soviet Union at changes in American negotiating positions and deny the Soviets the excuse for not negotiating or for not concluding negotiations on the ground that Americans are too difficult to deal with.

An integral element of any defense and foreign policy consensus must be agreement on our approach to our relations with the Soviet Union. Following the Soviet intervention in Afghanistan, we were able to muster the resources with which to register our collective disapproval. We should be able equally to muster a collective positive response when the occasion demands it and when it will advance the best interests of the United States and the free world.

We have certain things in common with the Soviet Union. We clearly have the ability to destroy each other as functioning nations. There is, in both capitals, a substantial lack of confidence in the intentions of the other side and, I suspect, even a lack of confidence in being able to perceive what the intentions of the other side may be.

In approaching the relationship between the United States and the Soviet Union, we have to be clear in our definition of terms that often are loosely tossed about. For example, many claim that the Soviet Union promotes instability in the world because it sees in that the greatest opportunities for advancing its own interests and pressing its borders forward. This may be true in social, political, and economic terms. But few would be willing to say that either the United States or the Soviet Union can derive any advantage out of a situation of nuclear weapons instability. The only proven method of doing that, of which we are aware, is to maintain an effective strategic deterrent even in the face of an increasingly powerful and versatile Soviet Union. One of the difficulties in freezing all nuclear weapons systems at one time is that any instability in any part of a system would

be preserved in ice. A freeze on the deployment of all delivery systems would preclude the introduction into our force structure of the Stealth bomber and the deployment of additional Trident submarines, two systems that may be useful for the maintenance of our deterrent capability.

We need to work on those measures that will increase mutual confidence and promote nuclear stability. In this area, some ice trays already are filled with water and ready to pop into the freezer:

As a first step, we must resume comprehensive test ban negotiations. We are obligated, as are the Soviets, by the terms of the Limited Test Ban Treaty to pursue actively a complete halt to nuclear testing. The most recent talks, including the U.S.S.R., the United Kingdom and the United States, were discontinued in 1980 after the invasion of Afghanistan. In July of this year, I introduced a resolution, with Senator KENNEDY and others, that called on the President to resume trilateral negotiations toward conclusion of a verifiable CTB.

A sensible next step would be to ratify the Threshold Test Ban and Peaceful Nuclear Explosions Treaties. The TTBT, signed in 1974 by President Nixon, established a nuclear threshold by outlawing underground tests in excess of 150 kilotons, equal to 150,000 tons of TNT. It was sent to the Senate in 1976 and is still there gathering dust.

The protocol to the TTBT provides for the exchange of geological and geographical data, which is essential for verifying the magnitude of a blast. The protocol also designates specific areas as weapons test sites to assist verification. An agreement to exchange this and other more detailed data would provide as yet unknown levels of cooperation by the United States and the Soviet Union. Never before has there been an understanding whereby the two superpowers would exchange data relating to their nuclear weapons programs.

In preparing the Threshold Test Ban Treaty, the United States and the U.S.S.R. determined that some agreement was needed to regulate underground nuclear tests for peaceful purposes. The PNE Treaty was signed by President Ford in 1976. It, too, is awaiting Senate approval. As with the Threshold Test Ban, the PNE Treaty's verification provisions lift it from the realm of obscurity and make it a valuable confidence-building tool.

Articles IV and V of the PNE Treaty establish the exchange of information and access to sites of explosions. Let me repeat that: Access to sites of explosions. The protocol to the Treaty sets forth provisions for both detailed information and the rights and functions of observers at explosion sites, American observers within the Soviet Union. This is particularly significant because Soviet opposition to onsite inspection of their test sites has been one of the obstacles to effective arms control in the nuclear age. The PNE Treaty, combined with the TTBT, establishes a comprehensive system of regulations that would govern the underground nuclear explosions of the United States and the Soviet Union in a manner consistent with enhanced stability. The Reagan administration has said that it wants to negotiate some changes in verification procedures. However, almost halfway through its term, the administration has not yet developed or submitted those changes to the Soviets.

Other arms control initiatives of practical size, while not yet ready for the freezer, should be addressed before they become unmanageable. We ought to agree with the Soviet Union on limitations on the deployment of sea-launched cruise missiles (SLCM's), even though the United States has an apparent technological lead of several years in this area. Once major deployments of these missiles have occurred, any numerical limits that we are attempting to secure through START will become meaningless. The easily concealable nature of a cruise missile and the difficulty in ascertaining whether it is equipped with a nuclear or conventional device will make United States and Soviet SCLM activity virtually impossible to verify. The United States soon will begin placing nuclear-armed, long-range cruise missiles on our attack submarines. The Soviet Union, with its less accurate and for the most part primitive cruise missiles, is not yet capable of fielding a similar SLCM system against the United States. However, as with any other weapons system of merit ever introduced by the United States, the U.S.S.R., after a certain lag period, eventually will match or at least neutralize our SLCM capability.

But there is a difference with cruise missiles. Once both sides possess equally effective sea-launched cruise missile systems, we will have sacrificed our ability to verify in the race to exploit this technology. A time could come, in the not-too-distant future, when the United States might have to consider every Soviet merchantman or trawler as a potential strategic nuclear delivery vehicle.

An analogous but even more dangerous situation exists in outer space. We are close to making outer space truly accessible; it is our next frontier. This prospect must be something like what Christopher Columbus experienced almost 500 years ago. We are looking across the rim of the world at new oceans and we should resolve that they will be peaceful seas.

Certain outer space activity has contributed to arms control. Satellites have created new verification procedures. But this positive aspect is threatened by a space technology that is rapidly providing the ability to destroy national technical methods of verification. We must negotiate a treaty outlawing war and arms in space or prepare to defend our share of Earth from space warfare.

The official position of the U.S. Government is that there can be no arms race until both sides possess a similar weapon or system. That is like saying the Japanese attack on Pearl Harbor was not a part of World War II because the United States had no planes in the air. An outer space arms race, if not already upon us, is imminent. And the Soviet Union is ahead. The United States does not yet possess an operative antisatellite (ASAT) weapon, while the Soviet Union does.

There are six international treaties that govern the military uses of outer space, but apparently none is adequate for heading off the use of space for the next round of United States-Soviet brinksmanship. If we act now, the devastatingly expensive and lethal programs for the militarization of space could die a relatively clean, uncomplicated death. If we and the Soviets delay, we will be faced with an environment increasingly difficult to control and hostile to human beings a few hundred miles below.

A final ice cube would be to explore the possibility of a freeze on United States and Soviet ICBM flight testing. Much could be made of this component of the comprehensive freeze proposal. Such a ban might ameliorate American fears of a Soviet first strike, which almost certainly would be directed at our ICBM force. In addition to basing problems, our ICBM vulnerability depends on Soviet competence in delivering their ICBM warheads to their targets.

A complete ban on ICBM flight testing might, over time, erode their faith in the reliability of their most important delivery vehicles. A country unsure of the reliabilty of its missiles would be much less likely to employ them in a preemptive strike or hair trigger reaction.

Would the U.S.S.R. buy the idea? That is hard to say. It is conceivable that they would have the same objections to this plan as they have to the START proposals. START, like an ICBM flight test ban, is aimed primarily at United States and Soviet land-based systems. But such a ban, unlike START, also would suspend our MX program. This may not be incentive enough for the Soviets to embrace a flight-testing freeze, but since it would eliminate a major source of concern for the Soviet Union, it is worth proposing.

There is a critical moment in Shakespeare's play, "The Tempest," when Prospero, his strength and magic

power dissipating, is faced with an important and irreversible decision. He must choose to remain in the world he has created for himself and his daughter Miranda or set sail for the country from which he was banished.

Prospero's island world is a place of magical, supernatural constructions. Sprites and witches, once under his absolute command, now conspire against the old Duke. The spells and incantations that earlier served him so well now form an arrogant and incorrigible chorus, ready to renounce his control. His island is swept by foreign forces that Prospero discovers he is too weary to tame.

. . . I have bedimmed
The noontide sun, called forth the mutinous winds
And 'twixt the green sea and the azured vault
Set roaring war; to the dread rattling thunder
Have I given fire and rifted Jove's stout oak
With his own bolt; the strong-based promontory
Have I made shake and by the spurs plucked up
The pine and cedar; graves at my command
Have waked their sleepers, oped, and let'em forth
By my so potent art. . . . (V, I. 41-50)

The ultimate futility, and also the danger of these self-created powers, compel Prospero to leave the island, He must now make peace with his old world.

We too must make peace with our world and with the hostile forces generated by our most creative minds. It is time we recognized the illusory nature of the nuclear spirits we have contrived to protect us. We are literally out of control in the field of nuclear weapons; locked, as it were, together with the Soviet Union, in a kind of technological trance. Controlling these most dangerous demons requires a mutual, sensible, and timely response to our common predicament.

RECOGNITION OF SENATOR HARRY F. BYRD, JR.

Mr. STEVENS. Mr. President, is there another special order scheduled?

The PRESIDING OFFICER. The Senator from Virginia (Mr. HARRY F. BYRD, JR.) is under a special order for 15 minutes. The Senator is now recognized.

THE DEFICIT IS DANGEROUS

Mr. HARRY F. BYRD, JR. Mr. President, I wish to commend today Mr. Martin Feldstein, who is the chairman of the Council of Economic Advisers to the President of the United States. I commend Mr. Feldstein because he, more than most in Washington, recognizes our Nation's unsound financial basis. Mr. Feldstein, in testifying before the Congress this week, said—and I am not quoting him precisely, I am quoting the news account:

A deficit-swelling jobs program or forced cut in interest rates could send inflation spiraling upward again and wreck recovery of an economy still bottoming out.

The chairman of the Council of Economic Advisers went on to say that unemployment can be brought down from its present postdepression high of 10.4 percent, to 6 or 7 percent over the next few years with a steady economic growth of 4 percent. But, he told reporters, that growth will occur only if Congress and the President cut Federal budget deficits.

Mr. President, that is the key, as I see it, the need to cut these huge, gigantic, runaway deficits. The Chairman of the Council of Economic Advisers further states:

I can't see how we can have a healthy recovery unless we get these deficits coming down and coming down sharply. It is vital—

He adds—

To avoid overheating the economy. Interest rates are higher because inflation expectation fears have not yet been put to rest.

The Senator from Virginia feels that the President's Chairman of the Council of Economic Advisers is giving the Congress and the administration good advice. But, during the 4 days that Congress has been back in session after its long recess, I do not find any real evidence that either the Democratic House or the Republican Senate is prepared to take the necessary steps to put this country back on a sound financial basis. The general talk around the Senate and around the House of Representatives is that there is little or nothing we can do in regard to spending. I see no evidence of any real desire to get spending under control.

If we do not get spending under control in this country, my judgment—and that judgment has been confirmed by the Chairman of the President's Council of Economic Advisers—is that we shall be in for very serious consequences.

U.S. News & World Report is one of the best publications, I think, in our country. Its able editor is Marvin Stone. In an editorial this week, he says:

It is growing clearer and clearer, in other words, that big deficits breed bigger deficits. One year's billions in borrowing are added to the next year's debt on which interest must be paid. Giveaways that start small grow larger year by year. Federal borrowings eat up capital needed for business, keep interest rates high, delay recovery, destroy jobs and profits, and erode the sources of revenue. Each year that Congress and President evade the painful steps to reduce the deficit, the labor of balancing becomes harder and less likely of success.

I think Marvin Stone in that editorial in this week's U.S. News & World Report is completely correct. I know that the distinguished occupant of the chair, the distinguished Senator from North Carolina (Mr. EAST) feels the same way; his voice has been raised many times on the floor of the Senate of the need to get a balanced budget, the need to control spending, just as the able Senator from Utah (Mr. HATCH) has been doing through the years that he has been here.

The Washington Post, hardly a conservative publication, hardly one that the Senator from Virginia is in agreement with any frequency, has an excellent editorial yesterday. It discusses the very problem that the Senator from Virginia has been discussing. In a moment I will ask that it be inserted in the RECORD. I will not do it at this point.

It goes on to point out that the Federal deficit is soaring out of sight. So publications of all political persuasions recognize the unsoundness of the Government's financial situation. I think the American people as a whole recognize that. Where it does not seem to be recognized is in the place where something can be done about it, namely, in the Congress of the United States.

How are we going to get an economic recovery going with interest rates as devastatingly high as they are now? How can we get the housing industry going with these high interest rates, or the automobile industry for that matter? Small business is being devastated by these high interest rates. And what does the Congress suggest in order to get interest rates down?

The Democratic leaders in the House are preparing a huge new spending program. The Democratic Caucus in the Senate is preparing a huge new spending program, all of which will tend to increase interest rates. The leadership of the Senate says that the way to get interest rates down is to force the Federal Reserve Board to act. The Federal Reserve Board cannot by itself bring about a sustained lowering of the interest rates. The Congress must face the fiscal problem. The Federal Reserve Board can address the monetary problem, but only the Congress can address the fiscal problem. And that fiscal problem is to get spending under control. If we do not get spending under control, the already huge deficits will be increased.

I have to say that I am somewhat discouraged at the attitude that I find on the part of, I would guess, a majority of my colleagues in the Congress, the attitude being that we are not concerned about the deficits or, if we are concerned about the deficit, we have no plan to reduce those deficits.

Mr. President, I hope that the Chairman of the Council of Economic Advisers will continue to speak out. I hope he will continue to focus attention on the need for Congress to take strong action in order to control spending.

I am not one of those who condemns the Federal Reserve Board and its

Chairman Paul Volcker. I feel the Federal Reserve Board has done what it had to do in a monetary way in order to bring down inflation. Now it is up to the Congress to do its part by getting spending under control so that we can get back on a sound basis.

This country is ready to take off economically, take off like a skyrocket maybe, if—if—the people become convinced that the Congress is willing to tackle the difficult problems in regard to Federal financing. I realize it is not easy. I realize it is more politically palatable to say it is not our responsibility; that the Federal Reserve has to do something.

I have been a politician all my life. I recognize the political niceties of trying to put the burden on somebody else, but the fact is that that cannot be done. I believe the American people recognize that the Congress has a grave responsibility. The longer Congress delays acting, the worse off everyone is going to be.

Mr. President, I ask unanimous consent to have printed in the RECORD the editorial from the U.S. News & World Report by Marvin Stone and also an editorial from the Washington Post of yesterday captioned "The Unconscionable Interest Rates."

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the U.S. News & World Report, Dec. 6, 1982]

IF WE DO NOT HALT DEFICITS

(By Marvin Stone)

Debate on the massive 1984 budget is overheating already, and it reminds us of the recent football strike: All sides are certain to give up something, and the biggest losers will be the people.

More revenues will be found, despite President Reagan's stand against tax raises. Defense spending will be pruned, even over strong presidential objections. These changes are assured not only by the Democrats' new strength in the House but by the intention of Republican heavy hitters in the Senate such as Bob Dole, Pete Domenici and Howard Baker. And, finally, social services will be cut again, although slightly.

Except for the desire to speed up his mammoth tax-rate cut, Mr. Reagan has been drawing his budget strategy basically from an analysis by the new chairman of the President's Council of Economic Advisers, Martin Feldstein. The chairman has deduced that the horrendous federal deficits stem not from increases in defense costs or cuts in taxes, but from quantum jumps in "nondefense spending"—here you must read, mainly, programs of aid to people. (More detail on Feldstein's views in an interview, page 63.)

Feldstein's major service to the country is in his picture of ruinous and almost unstoppable deficits, a demonstration that we have to act quickly and heroically to bring them down: "We now see," Feldstein told a group of businessmen, "that unless there is dramatic action the United States will experience an unprecedented series of deficits during the years ahead. . . . The magnitude of the projected possible deficits is far greater than anything that we have known. The harm that such deficits could do is therefore also beyond our previous experience."

It is growing clearer and clearer, in other words, that big deficits breed bigger deficits. One year's billions in borrowing are added to the next year's debt on which interest must be paid. Giveaways that start small grow larger year by year. Federal borrowings eat up capital needed for business, keep interest rates high, delay recovery, destroy jobs and profits, and erode the sources of revenue. Each year that Congress and President evade the painful steps to reduce the deficit, the labor of balancing becomes harder and less likely of success.

Measures now being advocated fall frighteningly short of getting the deficit under control. President Reagan's willingness to consider an increase in the federal levy on gasoline sales might be read as a small chink in his opposition to revenue-raising moves—if called by the right name. He dubs this one a "user fee." Since its 5.5-billion-dollar annual proceeds would go for road and bridge repair, some contend that it would not alter the budget. But it surely would help the economy.

Those 5.5 billion dollars would be chicken feed, however, in the prospective 185-billion-dollar deficit reportedly foreseen by Budget Director David Stockman if deep new cuts are not made. He apparently is asking at least 25 billion out of domestic spending. Doubtful as this is, it would still leave the deficit 55 to 60 billion above a perilous 100 billion, or nearly 100 billion over the 57.9-billion deficit of 1981, which was shocking in itself.

Senator Domenici has talked of taking 10 billion dollars a year off defense plans. Misty amounts may also be saved if inflation stays down and the economy turns upward in time. Ditching the entire tax-rate cut scheduled for next July would gain 30 billion in 1984. Politically that's a fantasy, but it is hard to see how we can hope to contain the deficit without big increases in revenue and more-drastic surgery on defense. Nor can it be done without cooperation between the political parties, between the houses of Congress and between Congress and the President.

Despite appearances, we can't believe the President is headed for a collision with Congress. We believe that cooperation, in one guise or another, will follow these initial skirmishes. Otherwise, the country is in for another damaging period of uncertainty and stagnation.

[From the Washington Post, Dec. 1, 1982]

THE UNCONSCIONABLE INTEREST RATES

The Government has put Wall Street on notice that it has been selected as the fall guy for the economy's current predicament. Having painted the economy into a very tight corner, neither the administration nor Congress, it seems, can be counted on to help find a way out.

Senate Majority Leader Howard Baker, speaking last Sunday on "Face the Nation," said that he doubts that Congress will be willing to make substantial cuts in either defense or domestic programs. President Reagan, speaking the next day to the National League of Cities, pretty much conceded that was so. Since neither the administration nor Congress wants to raise taxes to pay for these programs—the president is even pushing for more tax cuts—the government will have to borrow money to finance yearly deficits that might exceed $200 billion.

The only way out of this bind that the president or Sen. Baker sees is a long-term economic growth. In other words, the government will continue to buy now and pay later in the hope that sometime in the future it will get a hefty boost in its allowance from its rich relative, the private economy. The trick is to get the rich relative—now pinched by high unemployment, failing companies and falling export markets—back on its feet. This is to be the job of the financial community, which must see to it that there is plenty of inexpensive money to finance business expansion and consumer debt. It would be "unconscionable," Mr. Baker said, "for interest rates to start back up."

Interest rates, however, are notoriously unmoved by this sort of appeal to their moral sense. They are, after all, simply the price of money. If the federal government is out borrowing large sums, there will be less money for private borrowers. Other things being equal, when demand for money goes up, so does its price—the interest rate.

Of course, the Federal Reserve could, as Sen. Baker suggests, try to keep interest rates down by increasing the supply of money to accommodate the federal borrowing. This, however, is the functional equivalent of running the printing presses. If it goes very far, it will rekindle inflation. If lenders—who haven't forgotten what the last inflationary spiral cost them—get the idea that inflation is heading back up, they will start demanding a higher rate of return on long-term loans to protect themselves. And that, in turn, will discourage the business expansion needed for economic growth.

This predicament is a replay, in modified form, of the Carter administration's 1980 dilemma. In the spring, faced with a deficit that now seems modest in retrospect, President Carter persuaded the Federal Reserve to crack down on private credit. That led to a rise in unemployment, also modest by current standards but enough to be worrisome in an election year. When the Fed eased up on money in the fall, however, interest rates shot up, not down.

Of course, inflation was considerably higher then, which made the financial markets very nervous. Now, inflation is down—though still high by historical standards—but the federal deficit is soaring out of sight. If Congress wants to pacify the interest rates, it will take more than pious exhortations.

Mr. HARRY F. BYRD, JR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. The distinguished Senator from Utah desires to speak.

The PRESIDING OFFICER. Without objection, the Senator is recognized.

ANTITRUST EQUAL ENFORCEMENT—S. 995

Mr. HATCH. Mr. President, the antitrust laws are an essential, practical expression of our concern for democracy. It is their function to prevent any firm or group of firms from so controlling a part of commerce that it is able to substitute that control for the independent, efficient allocation of resources achieved by competitive markets. The primary purpose of these laws is to foster competition; to benefit consumers.

In our national economic policy, we reject the equally offensive notions of giving control of business enterprise either to government or to private cartels. We must also reject the current judicially created rules that permit allocation of damages in the hundreds of millions or billions of dollars to be dictated by members of the private bar.

In massive, nationwide class actions, we are beginning to see cases in which the shape of an industry can be dictated by a small group of private lawyers. As they evolved in recent years several unrelated legal decisions have so distorted antitrust remedies that they can actually be used as a destructive weapon against competition, usually with greater harm to companies with small market shares.

Under existing law private antitrust remedies are ineffective and unfair. Every defendent faces damage exposure in the hundreds of millions of dollars based on industrywide sales. Each company faces huge claims that have nothing to do with their size or behavior. Not surprisingly, the largest and most culpable company is frequently the first to settle. Many who believe in their innocence are the last to settle, but because of the gargantuan exposure, many have no choice but to capitulate rather than exercise their fundamental right to go to trial or take an appeal. Those defendants therefore are denied their basic right of access to the courts.

S. 995 is a good start in correcting this problem. While most agree that contribution and claim reduction legislation is urgently needed, the single issue which has generated the greatest debate, and I submit, far more heat than light as to the underlying equities, is the applicability to pending cases. This issue is not properly resolved by arbitrarily excluding the very cases that precipitated the need for the legislation in the first place. Rather than merely tacking on a delayed effective date that we know would discriminate against hundreds who have been named in cases now before the courts, we have an obligation to legislate, to provide a way that as many as possible will receive the benefits of the legislation in a fair and appropriate manner. I believe that the approach adopted by the Judiciary Committee is the correct one.

I agree with what Deputy Attorney General and Judge Charles B. Renfrew said when he testified before the Judiciary Committee:

> No price fixer should escape liability. And no innocent defendant should be forced to pay tribute, merely because it is named in a broadside complaint that includes virtually every member of an industry. Nor should a defendant be required to pay 30, 40 or 50 times damages, in a case in which Congress intended to require payment of three times damages. Moreover, it is directly contrary to the basic purpose of the antitrust laws to permit early settling companies to cripple their competitors by transferring cumulative liability through privately negotiated settlement agreements. It is a distortion of the antitrust laws to permit them to be used for anti-competitive purposes and by methods which impair, not promote, competition.

The compelling need for this legislation has been dramatically demonstrated to this committee by the facts in a number of pending cases. In the Plywood antitrust cases, it is fundamentally unfair that the plaintiffs can settle with half of the industry for $8 million and then be permitted to seek hundreds of millions of dollars against the three nonsettling defendants. On September 7, 1982, a company involved in the Corrugated litigation announced that it had approved a settlement of the Corrugated case for $45 million plus $19 million in interest to be paid on the unpaid balance over a period of 6 years. This company had a 3-percent market share and had been acquitted after a full trial on the merits in the preceding criminal case. Its potential exposure, however, based on transferred liability from its competitors that had settled, was in the hundreds of millions. This transferred potential liability became too great a burden to carry through lengthy and costly litigations, even though that company maintains to this day that it injured no one.

Submitted with Judge Renfrew's written statement to the Judiciary Committee was a list of over 900 companies involved in over 100 pending antitrust price-fixing cases. The same potential for injustice exists in the health care, cement, steel, construction, aluminum, food, entertainment, petroleum products, liner board, corrugated containers, and dozens of other industries. Because private treble damage actions are so fundamental a part of our basic antitrust policy, I am very concerned that a deferred effective date for this legislation could lead to serious anticompetitive results.

The bill reported by the Judiciary Committee, which I cosponsored, makes a mechanism available to the courts to apply claim reduction on a case-by-case basis. Under S. 995, claim reduction would apply if it is inequitable not to do so. It will place the issue of fairness with the courts, which are knowledgeable of the facts in those cases. The burden of proof is on the defendants and it will be left to the courts to decide whether or not it is fair to apply claim reduction in a particular case. The more than 900 defendants in pending cases will be given an opportunity to prove their innocence without facing enormous damages based on actions of settling defendants.

S. 995 is a proposal that is long overdue and I applaud our distinguished chairman, Senator THURMOND, for his efforts in pushing this bill through the Judiciary Committee. I ask that all my colleagues join in support of this much needed legislation.

ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, what is the situation with regard to special orders? Is there still a special order remaining?

The PRESIDING OFFICER. The Chair advises that one special order remains, for the Senator from Arkansas (Mr. PRYOR).

Mr. STEVENS. Mr. President, in the interest of fairness, I ask unanimous consent that the order be vitiated now.

The PRESIDING OFFICER. Without objection, it is so ordered.

The next order is for morning business.

Mr. STEVENS. Mr. President, I intended to make a statement concerning troop strengths and take 5 or 6 minutes, but I see there is not that much time. I am aware that the distinguished Senator from Montana is on his feet, and I know he wants to make a comment prior to the mandatory quorum call and cloture vote.

If the Senator from Montana will permit me to take a minute or two for a comment, I will then yield so that he may be recognized to finish out the time period.

NATO TROOP STRENGTH

Mr. STEVENS. Mr. President, there is a statement on the United Press wire this morning that indicates that I am attempting to withdraw 20,000 troops from Europe. That is not true. I call the attention of the Senate to the fact that the same item indicates that the NATO Secretary, Joseph Luns, says that the presence of 320,000 American fighting men in Europe was an assurance that the United States would stand by its allies.

I want to be certain that the NATO Secretary understands that no one is attempting to reduce the level of troops down to 320,000. We now have 360,000 troops in Europe, although we funded only 346,000. The problem is whether or not the Department of Defense is going to stay within its budget. The Department requested from us appropriations for 346,000

troops in Europe. There is a new request for fiscal year 1983 for 350,000 troops in Europe, which we have not yet granted. The troop numbers presently exceed that. They have almost 360,000 troops in Europe, depending how you account for the troops.

I hope the State Department, the Defense Department, and the NATO organization start looking at their own records. Our commitment to NATO went up from $78 billion in 1981, in terms of actual spent dollars of the American taxpayer, to $133 billion estimated for 1983. Billions, Mr. President. It is a $55 billion increase in 2 years in the commitment to NATO.

Unless the Senate, unless Congress, unless the American people wake up, our whole modernization concept of our Armed Forces is going to be denied because of this massive commitment to NATO, which is running away because the Defense Department will not live within the constraints of the budget process.

I intend to have more to say about this in the future.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, it is now 4 minutes until 1 o'clock. I remind Senators that at 1 o'clock, under the provisions of rule XXII and pursuant to the cloture motion filed heretofore, there will be a live quorum.

I take this opportunity to urge Senators who hear me to come to the floor at this time, so that we can proceed as promptly as possible and perhaps avoid the necessity of having a rollcall on the motion to instruct the Sergeant at Arms. I hope Senators will come to the floor at this time and be present to answer to their names on the call of the quorum.

ANTITRUST EQUAL ENFORCEMENT

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Mr. President, before the Senate casts its votes on the pending cloture motion, I should like to describe for my colleagues our current parliamentary situation. Before I do that, I wish to, one more time, articulate my position on the legislation before us. I support S. 995 as introduced. I wish the bill before us was in a form I could support. I oppose the pending amendment because I believe retroactivity has turned a very good bill into a special interest bailout for convicted price fixers.

Given this position, Mr. President, I am unfortunately forced into the position of having to vote against cloture both on the committee amendment and on the bill itself.

The first cloture vote this afternoon will be on the committee amendment. That amendment contains the retroactivity provision. For the reasons I have outlined over the past several days, I urge my colleagues to vote against cloture on the committee amendment.

Assuming that the first cloture vote fails, we will immediately vote upon the cloture motion on the bill itself. It has been argued that Senators like myself who support S. 995 but oppose retroactivity should support cloture on the bill. This argument is based on the assumption that retroactivity will be nongermane if cloture is invoked on the bill. This is not the case.

While the committee amendment will be ruled nongermane, another amendment has been filed which impacts dramatically on our parliamentary situation. Last night, Senator THURMOND filed a retroactivity amendment which is germane and which will be in order after cloture is invoked on the bill.

This new amendment is even worse than the pending committee amendment.

This amendment would permit claim reduction and contribution to be applied retroactively. Furthermore, this amendment does not even attempt to protect settlements.

The point is that the amendment filed by the Senator from South Carolina is even more sweeping in its retroactive application than is the committee amendment.

The parliamentary bottom line is that if cloture is invoked on the bill, we will be facing a more onerous retroactivity provision than the current committee amendment.

The simple fact is that even if cloture is invoked on the bill, that the retroactivity issue will remain before this Senate.

I, therefore, adamantly urge my colleagues to vote against cloture on the bill as well as on the committee amendment.

Let me remind my colleagues that it is the proponents of retroactivity that are killing this bill. It is they who are preventing the large majority of the business community from having the benefits of the fairer rules that this bill would provide. That is an unfortunate result. But, it is due to those who are insisting that we can only enact this bill if it provides retroactive relief to a handful of companies.

If we permit a few companies to come into Congress now and get bailed out from liability imposed upon them by the Federal courts, we are extending an open invitation to every party who is subject to an adverse ruling in a Federal court to come to Congress and try to get bailed out. We must not let that happen.

No one in the Senate is more saddened by the current circumstances surrounding S. 995 than this Senator. I wish I could be supporting it today. But, because it has been converted into a private relief bailout, I must urge my colleagues to vote against cloture on both the committee amendment and the bill.

OPPOSITION TO S. 995 RETROACTIVITY PROVISION

Mr. DIXON. Mr. President, I strongly support S. 995 as it was first introduced by Senators THURMOND, BAUCUS, LAXALT, HATCH, DECONCINI, and HEFLIN, for I believe that the contribution and claim reduction principles embodied in S. 995 will make our antitrust laws more just and equitable. Nevertheless, I strongly oppose the Judiciary Committee amendment that would make S. 995 apply retroactively to pending cases. I believe that this retroactivity amendment is special interest legislation of the worst kind; that it would benefit a very small number of private parties while adversely affecting the position of those injured by violations of the antitrust laws; that it would diminish the effectiveness and demean the integrity of the antitrust enforcement system; in sum, that it is unsound public policy and may well be unconstitutional. I cannot, therefore, support the motions to invoke cloture today on either the committee amendment or the bill.

As introduced, S. 995 would change the antitrust laws in two respects. First, it would create a new right of "contribution" that would permit defendants in antitrust price-fixing cases to bring into the case other parties who were not sued by plaintiffs but may have been part of the price-fixing conspiracy. Second, S. 995 would create a new statutory right of claim reduction, under which any judgment obtained by plaintiffs in a price-fixing case against defendants would have to be reduced by the market represented by any defendants who had settled their cases, rather than, as now, by only the dollar amount paid by the settling defendants.

As originally introduced, Mr. President, S. 995 won the almost universal support of the business community and the bar, and for good reason. The contribution and claim reduction principles embodied in S. 995 represent sound policy. They will permit businesses who are convinced of their innocence to litigate without fear of a devastating and disproportionate judgment.

Despite the acknowledged benefits of contribution and claim reduction, I cannot support S. 995 as reported out by the Judiciary Committee because of the unconscionability of its retroactivity feature. Retroactivity raises a host of complex problems.

Retroactivity would be unworkable administratively, and would greatly disrupt our judicial system. The many legal issues raised by retroactivity would be litigated at length, substan-

tially prolonging cases that already are too complex and time consuming.

Further, the purpose of S. 995 is fundamentally unfair: To deny a select group of successful antitrust plaintiffs their longstanding statutory right of treble damages. Enactment of S. 995 in its present form would signal that lawbreakers may use Congress as a forum of last resort, which obviously would subvert the antitrust enforcement system, and indeed the entire judicial system.

S. 995's retroactivity provision also would endanger the many settlements that have been entered in pending cases. These settlements have been expressly premised on the rights of the parties under existing law, and would be challenged if not overturned should the law be changed retroactively.

Mr. President, while all of the foregoing problems associated with retroactivity are serious, I would like to draw the attention of the Senate to a concern of particular sensitivity and importance: The constitutionality of S. 995's retroactivity provision.

Our constitutional system of government places a premium on the value of fairness and consequently has a tradition of abhorring retroactive legislation. The Founding Fathers were sensitive to the evils of applying new rules to the past conduct of citizens. James Madison in the Federalist Number 44 saw the need to protect the American people from the "fluctuating policy which has directed the public councils." Legislative changes affecting personal rights, he wrote, are "contrary to the first principles of the social compact and to every principle of social legislation."

Madison's comments were derived from the harsh lesson of experience:

> The sober people of America are weary of the fluctuating policy which has directed the public councils. They have seen with regret and indignation that sudden-changed and legislative interferences, in cases affecting personal rights, become jobs in the hands of enterprising and influential spectators, and less informed part of the community.

The principle of prohibiting legislation which retrospectively defines the rights and obligations of citizens was selectively incorporated into the Constitution. Under the contract clause, States are prohibited from enacting legislation "impairing the Obligations of Contracts."

Although this prohibition upon retroactive civil legislation directly controls only State action, the underlying policy has a broader sweep, reflecting the basic principle that legislation should not interfere with vested rights and liabilities or with existing legal relationships.

The Constitution also specifically prohibits Congress from passing ex post facto laws. This prohibition was held to apply directly only to retroactive criminal statutes in Calder against Bull, but here too the underlying principle is surely broader. In fact, in a recent case, Chevron Oil against Huson, the Supreme Court noted that

> (t)he earliest instances of nonretroactivity in the decisions of this Court—more than a century ago—came in cases of nonconstitutional, noncriminal State Law. . . . And, in the last few decades, we have recognized the doctrine of nonretroactivity outside the criminal area many times, in both constitutional and nonconstitutional cases.

A direct restraint upon the Federal Government's power to enact retroactive civil legislation lies in the due process clause of the fifth amendment. Legislation that, considering its retroactivity, is arbitrary or unreasonable or harsh and oppressive, has been held to constitute a denial of due process.

The historical bias against retroactive legislation is manifested in a long line of court decisions involving statutes silent as to the time they are to take effect. Chief Justice John Marshall gave this policy its first judicial expressions. As early as 1801, in United States against Schooner Peggy, he warned courts adjudicating rights between private individuals to "struggle hard against a construction (of a statute) which will, by a retrospective operation, affect the rights of parties. . . ." As the Court later put it, the rule of prospectivity is "one of obvious justice" because it "prevents the assigning of a quality or effect to acts of conduct which they did not have or did not contemplate when they were performed."

Mr. President, this aversion toward legislation that applies retrospectively is well founded, for a person should be able to assess his conduct with reasonable knowledge of its legal consequences. In a lawful society each of us plans his future with the expectation that the legal status of arrangements entered into today will not be upset tomorrow by a change in the law that applies to past conduct. Indeed, it is no understatement to say that the ability to plan for the future depends upon respect for stability of past legislative arrangements.

The Supreme Court's decision in the Schooner Peggy case established a rule of statutory construction recognizing that while retrospective application of civil statutes was permissible if such application was otherwise constitutional, absent a clear expression of legislative intent to the contrary a statute should be presumed to have prospective effect only. Early in this century, the Supreme Court again reaffirmed the presumption of a statute's prospectivity, declaring:

> The rule is one of obvious justice and prevents the assigning of a quality or effect to acts or conduct which they did not have or did not contemplate when they were performed.

Recent Supreme Court pronouncements have abandoned a "presumption" of prospectivity where a statute is silent. In Bradley against School Board of City of Richmond, however, the Supreme Court has incorporated the historical policy against retroactivity in articulating the rule that an appellate court shall apply the law in effect at the time it renders a decision, unless such application would work a "manifest injustice." The Court in Bradley explained that the concerns "relative to the possible working of an injustice center upon (a) the nature of and identity of the parties, (b) the nature of their rights, and (c) the nature of the impact of the change in law upon those rights." Measured by this standard, the retroactive application of S. 995 would be fatally defective.

Mr. President, while there is no express prohibition in the Constitution against retroactive enactment of civil statutes, it is reasonably clear that retroactivity has a higher constitutional hurdle to jump. As the Court stated in Usery against Turner-Elkhorn Mining Co., "the retrospective aspects of legislation, as well as the prospective aspects must meet the test of due process, and the justification for the latter may not suffice for the former."

In spite of the many decisions the Supreme Court has rendered on the subject of retroactive legislation, no single or clear due process standard has emerged. The absence of a definitive standard makes the likelihood of litigation challenging retroactive statutes high and the outcome in those cases uncertain.

Professor Hochman, in an article in the Harvard Law Review that has been cited by the courts, has proposed a general approach which involves weighing three factors in any particular case:

First, the nature and the strength of the public interest served by the statute;

Second, the extent to which the statute modifies or abrogates the asserted preenactment right; and

Third, the nature of the right which the statute alters. The Supreme Court has not formally adopted this approach, but it has employed a somewhat similar standard for purposes of giving meaning to the term "manifest injustice" in the Bradley case referred to before. Because the "manifest injustice" standard is rooted in due process considerations, Professor Hochman's framework is an appropriate test for evaluating the due process question.

Our former colleague, Joseph D. Tydings, in a scholarly statement submitted to the Judiciary Committee, applied the Hochman analysis to S. 995's retroactivity provision. He concluded that S. 995 would be unconstitutional under the Hochman standard, reasoning as follows:

> Under the Hochman approach, the following considerations are significant:

1. The nature of the public interest served by S. 995. It is well settled that Congress is the best judge of whether a particular statute serves the public interest, especially if the statute seeks to adjust the burdens and benefits of economic life within a regulatory scheme such as the antitrust laws. *Usery* v. *Turner Elkhorn Mining Co.*, 428 U.S. 1, 15 (1976). While respectfully deferring to the ultimate judgment of Congress, I submit that retroactive application of S. 995 serves no discernible purpose.

The contribution legislation serves the public purpose of allocating damages in a fairer manner among the parties in a price-fixing scheme. However, retroactive application of S. 995 would clearly defeat such purpose. In the *Corrugated* and *Plywood* cases, settlement agreements—the fairness and adequacy of which were approved by the district courts—have been executed in reliance upon a pro tanto claim reduction formula and a no contribution rule. Retroactive application of proportional claim reduction to these cases will have the result of defeating the plaintiffs' right to claim the balance of full treble damages against non-settling defendants while providing a windfall benefit to the latter.

Regardless of the existence of a public interest attaching to S. 995, it is minimized by the fact that it affects the interests of private cases. The Supreme Court has upheld retroactive statutes affecting the interests of private parties. However, any attempt by the proponents of retroactivity to analogize this situation to the public interest involved in those cases would be embarrassing. A number of cases, for example, arose in the context of emergency legislation enacted during the Depression. See, e.g., *Home Building and Loan Association* v. *Blaisdell*, supra. In more recent cases, the Supreme Court has sustained retroactivity to uphold the claims of plaintiffs whom significant social legislation is designed to protect, e.g., The Black Lung Benefits Act of 1972 (*Usery, supra*). Certainly, the "public interest" in this case is dwarfed by comparison. Moreover, I am not aware of any case upholding retroactive application of parochial legislation such as this for the benefit of adjudicated wrongdoers and I believe that the due process clause would not permit it.

2. The extent of the abrogation of the asserted preenactment right. Ironically, the retroactive amendments would adversely affect only the rights of the class of plaintiffs which the Clayton Act is designed to protect: by retroactively substituting a proportional claim reduction formula for a pro tanto formula, it would reduce the total recovery of treble damages, while the adjudicated price-fixers would be partially relieved of a preenactment obligation.

More importantly, retroactive application of S. 995 would mean that the plaintiff's right of recovery for damages equal to the difference between pre-enactment and post-enactment recovery is permanently extinguished. This is not a situation where the right of recovery has been temporarily suspended. *Ochoa* v. *Hernandes Y. Morales*, 230 U.S. 139 (1913). The dimunition of value in the pre-existing right is substantial enough to warrant striking down the retroactive statute. See, *Pennsylvania Coal Company* v. *Mahon*, 260 U.S. 393 (1922).

When weighed in conjunction with the absense of a substantial public interest in making S. 995 retroactive, the curtailment of plaintiffs' damages in favor of the wrongdoers is substantial.

3. The nature of the right affected by a retroactive statute. The third pattern established by the cases is to strike retroactive statutes which affect the rights that have been "perfected" or vested. The degree to which the plaintiffs have asserted and enforced their rights in the *Corrugated* and *Plywood* cases is substantial and it cannot be said that their claims are speculative. In each case, these rights have been reduced to judgments and in some instances affirmed by the Court of Appeals.

Reduced to a "gut" level, it is difficult, if not impossible, to see how passage of a retroactive amendment in this situation comports with fundamental fairness and due process of law. The amendments would be special interest legislation of the worst kind. Their proponents are corporate antitrust violators who, after repeatedly rejecting reasonable settlement offers from the plaintiffs (particularly, in the light of damages adjudicated by the trial court), forced the plaintiffs into very costly and time-consuming litigation which ended in substantial judgments against them. Now, after having had their day in court, they unscrupulously seek to legislatively overturn those judgments and reduce the amount of plaintiff classes' judgment awards through retroactive application of the claim reduction provision. In other words, having played by the rules of the game and lost, they seek to use their economic power and influence to change the results.

Mr. President, I believe that this statement submitted by our distinguished former colleague succinctly summarizes many of the possible due process objections to S. 995's retroactivity provisions. S. 995 is also constitutionally questionable, however, because it confuses the judicial and legislative functions in violation of the separation of powers principle.

Most retroactivity cases have arisen in the relatively neutral context of deciding whether a new piece of legislation should have an effect on prior conduct or pending litigation in the absence of any expressed congressional intent. The bill now before the Senate, however, poses the issues in a constitutionally more vulnerable setting. It manifests an explicit intention to overturn the substantive rules of law applicable to numerous pending cases under long-established legal principles.

As Marbury against Madison settled, it is the judicial function to decide, finally and authoritatively, what the law has been and is in pending cases. Accordingly, if we enact this proposed legislation, Congress would be encroaching upon the essential function of the judiciary under the doctrine of separation of powers.

Over a century ago, the Supreme Court forcefully enunciated and applied the separation of powers doctrine to condemn an act of Congress that attempted to overrule a Supreme Court decision by prescribing a different rule of law to be followed in pending cases. In *United States* v. *Klein*, 80 U.S. (13 Wall.) 128 (1872), plaintiff's decedent had been the owner of property sold by agents of the Federal Government during the Civil War. Plaintiff sued for the proceeds of the sale in the Court of Claims and recovered under legislation according such a right of action to noncombatant owners upon proof of loyalty, which the Supreme Court previously held could be proved by a Presidential pardon. While the case was on appeal in the Supreme Court, Congress passed an act crucially altering the rights people in the rebellious States. The act provided that in all pending cases no pardon would be admissible to show loyalty and that, to the contrary, a recital in a pardon of participation in the Civil War would constitute conclusive proof of disloyalty.

The Supreme Court ruled that it could not properly give force to the legislative directive. The Court asked rhetorically: "Can we do so without allowing that the legislature may prescribe rules of decision to the Judicial Department of the Government in cases pending before it?" The Court's answer was an emphatic "No." It held the statute unconstitutional on the ground that, by prescribing a rule of decision for pending cases, "Congress has inadvertently passed the limit which separates the legislative from the judicial power."

The Court's denunciation of congressional intrusion on judicial power has particular force in relation to S. 995. Like the statute condemned in Klein, this bill would purposefully overrule existing law and prescribe different rules of substantive law to be followed in pending cases. Thus, like the statute in Klein, it would unconstitutionally encroach upon the exclusive authority of the Federal judiciary.

The authority of the Congress to enact contribution and claim reduction legislation is clear and was so recognized by the Supreme Court in Texas Industries, Inc., against Radcliffe Materials, Inc. There is, however, a fundamental difference between changing a rule of law which applies to future cases and changing a rule of law which applies to pending cases, when the effect is to repudiate a Supreme Court interpretation of the preenactment law. By giving retroactive effect to either the contribution or claim reduction measure in S. 995, the Congress would be restating the prior law in this area, a point to which the Supreme Court has already clearly spoken in Texas Industries.

Mr. President, in our system of government matters concerning the separation of powers of the coordinate branches of government have been among the most sensitive and delicate. As between the Congress and the Judiciary, we have a strong common law tradition that although a court's pronouncements may apply to passed conduct, the Congress' function is to declare law for the future. There have been in the past, and will be in the future, circumstances requiring the

Congress to enact legislation that runs the risk of ultimately being declared violative of the separation of powers doctrine. Special interest legislation such as this, directed solely for the benefit of a small number of private parties, certainly does not warrant upsetting the delicate constitutional relationship between the Congress and the judiciary.

In the final analysis, no one can predict whether or not retroactive application of the contribution bill would be upheld by a court. It is very clear, however, that retroactivity poses serious constitutional issues which could only be resolved through protracted and expensive litigation. As stated by distinguished constitutional scholar Charles Alan Wright, "The due process objection to retroactive application of S. 995 raise(s) a complex and uncertain issue that would certainly produce much litigation."

Mr. President, because of the important public policy and constitutional issues involved, Congress has resisted attempts to legislate retroactively, particularly in the antitrust area.

For example, the Hart-Scott-Rodino Antitrust Improvements Act of 1976, containing the parens patriae provisions, was made not to apply "to any injuries sustained prior to (the) date of enactment." An earlier draft which would have authorized application of the parens patriae provisions to pending actions was rejected. Similarly, by enacting section 4A of the Clayton Act, Congress gave the United States authority to sue, but only prospectively.

During the 96th Congress, attempts to make the so-called Illinois Brick bill retroactive were very controversial. The bill ultimately reported out by the Judiciary, S. 300, would have applied retroactively, but in their minority views published in the accompanying committee report Senators THURMOND, LAXALT, HATCH, COCHRAN, SIMPSON, and HEFLIN condemned this feature of the bill. In a compelling critique of the retroactivity provision of S. 300—which applies with equal force to S. 995—these distinguished Senators wrote as follows:

An especially objectionable feature of S. 300 is its attempt to create some new rights and liabilities arising out of conduct that occurred prior to the effective date of the statute and to abrogate others. As reported, and subject to one narrow exception discussed below, S. 300 would apply to cases which are "pending on the date of enactment of this act or * * * commenced on or after the date of passage of this act." Wholly apart from the merits of the new rules of antitrust liability which are promulgated by the bill, their retroactive application to preenactment conduct is unfair, unwise, and unconstitutional.

There can be no doubt that retroactive application of S. 300 will (1) create new liability for past conduct, (2) destroy the vested rights of most direct purchasers, and (3) complicate hundreds of antitrust cases pending in the federal courts. Each of these results is fundamentally unfair and is constitutionally prohibited * * *.

Retroactive application of S. 300 will also destroy vested rights of direct purchasers in most cases. The line drawn between those claims that would be affected retroactively and those that would not be is irrational * * *.

Proposals for retroactive application of new rules for liability are not strangers to the Congress. Special interests frequently urge the enactment of laws to enrich themselves instantaneously at the expense of others who are unable to turn back the clock and undo history. What is surprising, however, is that these proposals, which Congress consistently rejects as fundamentally unfair, continue to be promoted. For example, in the last major amendments to the antitrust laws, proponents of the parens patriae amendments urged that they be applied to conduct occurring before enactment. This committee's reported version of that legislation would have applied to suits in which "the cause of action occurred before the date of enactment * * *" S. 1284, section 405 94th Congress 2d session as reported May 6, 1976. The full Congress, however, rejected that proposal for ex post facto lawmaking, concluding that it would offend elementary constitutional requirements of fairness and due process of law. Thus, the Act did "not apply to any injury sustained prior to the date of enactment of this act." Public Law 94-435, section 304 (Sept. 30, 1976).

The triumph of expediency over principle is nowhere better reflected than in the Rube Goldberg approach that the Committee has used to carve out a narrow exception from retroactivity to save particularly lawsuits that are viewed with favor by a few supporters * * *.

In spite of continuing criticisms during the two years of deliberations on this legislation, its supporters have stuck tenaciously to its retroactivity features. An untrained observer might think that some great principle accounted for this tenacity. The explanation is a simple one. The most vocal and active support for the bill itself comes from some litigants—and their lawyers—who have pending cases that the Supreme Court has ruled lack a foundation in law. Without retroactivity, their support for the bill would surely evaporate. The Senate should emphatically reject this approach to antitrust legislation.

If Illinois Brick legislation is enacted, more than two years will have lapsed since the Supreme Court's decision. The passage of this much time since the law was declared renders retroactive application of new rules exceedingly ill-conceived. If Congress had chosen to act in the immediate aftermath of the Court's decision, some of the practical ill effects of retroactivity might have been contained. More than two years later, however, these effects are multiplied and magnified.

Few fields of law match the complexity of antitrust, and equally few legislative reforms are more conducive to well-intended mischief than simplistic tinkering with antitrust cases. The notorious complexity of antitrust litigation is manifest to the Congress in Justice Department and Federal Trade Commission budget requests for millions of dollars for individual cases. It is manifest to the courts, which politely complain of overloaded dockets. And it was so manifest that it recently triggered a mammoth Presidential study commission. National Commission for the Review of Antitrust Laws and Procedures, "Report to the President and the Attorney General" (Jan. 22, 1979).

Ignoring the existing crisis of complexity, S. 300's retroactivity provisions will sabotage countless pending lawsuits with a new reign of chaos. Under the bill, the pass-on issue—which has heretofore been excluded form litigation (in large part because of the intractable factual and conceptual complexities it presents)—will be thrust into the heart of pending cases. The consequences of this meddlesome interference with pending law-suits are unfathomable. Regardless of the stage of the litigation, discovery must begin anew with all of the attendant delays. New motions must be made and resolved. Even new trials are likely in cases that are not finally closed. The staggering costs of these prospects have united many plaintiffs and defendants in pending cases to oppose the bill vigorously. With the notable exception carved out for a few direct purchasers, the Committee has ignored the chaos it would inflict on the courts and litigants.

Not only is retroactivity unwise, it is unconstitutional. Even if there were an adequate justification for disregarding the sound objection to this bill on the merits, no justification could sustain its retroactive application. As the Supreme Court has stated: "The retrospective aspects of legislation, as well as the prospective aspects must meet the test of due process, and the justifications for the latter may not suffice for the former." Usery against Turner Elkhorn Mining Co., 428 U.S. 1, 16-17 (1976).

Retroactive legislation that is arbitrary or unreasonable or harsh and oppressive will not survive a due process challenge. Id. Unconstitutionality results if retroactivity inflicts a "manifest injustice" considering "(a) the nature of and identity of the parties, (b) the nature of their rights, and (c) the nature of the impact of the change in law upon those rights." Bradley against Richmond School Board, 416 U.S. 696, 711, 716-21 (1974). These principles condemn the retroactive features of S. 300 for numerous reasons: first, S. 300 is not designed to deal with any emergency; second, S. 300 would create new liability for past conduct and destroy vested rights; third, private parties have acted in reasonable reliance on the Illinois Brick and Hanover Shoe decisions in the periods since they were decided; and fourth, the justification for rearranging rights is weakest when private litigants are involved, far weaker than when relationships between a private citizen and the government are rearranged for a public purpose.

There is a dangerous temptation to which the committee has unfortunately succumbed to set aside principles of fairness when dealing with alleged perpetrators of economic atrocities. We are encouraged to abandon our qualms by the assurance that, after all, these companies are price fixers and deserve no sympathy. Even if this legislation applied only to clearly illegal conduct like price fixing, even if all those who are merely accused of wrongdoing were actually guilty of it, and even if direct purchasers who are stripped of their vested rights were somehow tainted by the overcharges that they passed-on, congressional indignation could not justify the harsh consequences of retroactive punishment. Yet none of these assumptions is true. The constitutional principles that condemn S. 300 cannot be swept aside. * * *

Mr. Philip Lacovara testified:

Congress is, of course, free to change what the law will be in actions based on future conduct. That is the nature of the lawmaking function—to say what the law will be. The effect of the proposed legislation, however, is to replace the Supreme Court's statement of what the law has been and is for pending actions under the 1914 Clayton Act and to substitute the views of a subsequent Congress as to what it feels the law should have been under that statute.

Accordingly, by enacting this proposed amendment, Congress would be encroaching upon the essential function of the judiciary under the doctrine of separation of powers.

Michael Bleckman also voiced the opinion that the retroactive provision of the bill violates the separation of powers.

"I think for the Congress to go and try to, not just change the rule in Illinois Brick but to change the result in that case and the result in pending cases, represents and intrusion into the judicial process which, in my view, distorts the constitutional scheme protected by separation of powers."

During the time period in which constitutional issues are first put before the courts, and finally resolved, it is quite likely that violators will be able to slip past unpunished until the law is once again consistent with the Constitution.

Prof. Milton Handler and Mr. Michael Bleckman stated:

Last year, in connection with the parens patriae statute, the Congress rejected a proposal to make the bill retroactive on the ground that such ex post facto applications would violate "elementary constitutional requirements of fairness and due process of law." We suggest the same considerations require that the present bill be similarly modified to apply solely to future conduct and future cases.

Mr. Philip Lacovara stated:

As it did with the Hart-Scott-Rodino parens patriae legislation, when Congress added section 4A to the Clayton Act authorizing the United States to sue for damages in its proprietary capacity, it gave the new law only prospective effect. Section 4 of the amending legislation ch. 282, 69 stat. 282 (1955), provided that it was to become effective "6 months after its enactment."

Congress' historic disinclination to amend antitrust legislation retroactively is rooted in considerations of fairness and a sound regard for the disruption that retroactivity causes. The historic course of prudent legislation ought not to be abandoned now.

Mr. President, it seems to me that the criticisms made by my distinguished colleagues with respect to the retroactivity provision of the Illinois Brick legislation are directly analogous to S. 995's retroactivity feature. Consequently, I am confused as to why some of those who most ardently support the retroactivity feature of S. 995 also were among those who most strenuously opposed the retroactivity provision of the Illinois Brick legislation.

I believe the arguments made at that time are as sound now as they were then.

I urge my colleagues, therefore, to consider the arguments raised in the minority views on the Illinois Brick legislation, along with the constitutional and policy arguments that I have outlined. I believe that the arguments that I raised, together with the compelling case made by Senator THURMOND and others in the Illinois Brick minority report, combine to make an overwhelming case for dropping the retroactivity features of S. 995. As stated in those minority views, "Wholly apart from the merits of the new rules of antitrust liability which are promulgated by the bill, their retroactive applications to preenactment conduct is unfair, unwise, and unconstitutional." The retroactivity features of S. 995 should be dropped. I hope that the Senate, upon careful consideration, will decide not to include retroactivity in what is otherwise a sound and sensible piece of legislation. I urge the defeat of the retroactivity provisions.

Mr. KENNEDY. Mr. President, today we continue consideration of very controversial legislation. The bill, S. 995, is technically known as the Antitrust Equal Enforcement Act. It is sometimes referred to as the contribution bill. But to those dismayed at this effort to bail out price fixers, the proposal is more correctly known as the Price-Fixers Relief Act of 1982.

Indeed it is ironic that we begin a lameduck session of this Congress—when millions of Americans seek rescue from the disastrous economic policies of the past 2 years by spending this much time, energy, and attention on rescuing price fixers from the claims of their victims.

Others have already discussed the many serious flaws in this legislation—flaws in both the basic concept of the bill, and in the most controversial aspect, which is its retroactive application. Those issues themselves deserve the most careful and full consideration by the Senate. I salute the Senator from Montana, for the steadfast leadership he has shown by insisting that such a full debate be held on this bill. As in many other areas, whether it be the defense or our Government's system of checks and balances, or the defense of consumers against illegal business practices, the Senator has shown a persistent dedication to our Constitution and devotion to the public interest.

But quite apart from the defects of the bill itself, it is important that we put in full perspective the reasons why it is particularly inappropriate to pass S. 995 at this time.

Today, our antitrust laws are under attack. The system of statutes erected on a bipartisan basis over the past century, in order to make the free enterprise system work, has been the target of increasing attempts to find loopholes, provide broad exemptions, or simply repeal the law.

The antiturst laws are an important bulwark for every small business and every family in America because they guarantee the benefits of competition. Yet many of those most often heard to praise the benefits of a truly competitive economy, are among the voices calling for steps to weaken the antitrust laws.

I believe in fair competition and a competitive economy. That is why I fought for deregulation of industries in which the hand of agency regulation had choked off competition instead of preserving it. That also is why I believe that we must keep our antitrust laws strong, and their enforcement vigorous. At a time when we are trying to stimulate economic recovery, without a resumption of price inflation, a competitive economy is more important than ever. Yet today, the prospect for continued strong laws and vigorous enforcement is in doubt.

There is a tendency for some to blame every problem in our economy on the antitrust laws. Proposals to roll back the antitrust laws seem the order of the day.

Of course, no area of legislation is sacrosanct. And we must reexamine any statute which might benefit from fine tuning, or whose impact on the public interest is ripe for reappraisal.

But the American consumers—the husband or wife, father or mother trying to stretch a tight budget to buy shoes, and milk and medicines for their family—have been well served by our antitrust laws.

So have countless honest businessmen trying to compete for business, to serve the public, and to survive in a rough and tumble world of commerce or industry.

Particularly in these times of economic difficulty for all Americans, we should not lightly abandon any of the safeguards upon which the consumer or the businessman depend.

The Price-Fixers Relief Act now before us would seriously undermine a antitrust safeguard: The private treble damage action against illegal price fixing.

Price fixing is a felony for which a violator may be sent to jail. That indicates how serious a crime it is. Even under the best of circumstances, however, criminal enforcement by the Justice Department—or even Government civil suits—can only target a small fraction of the situations where illegal price fixing may be costing the public millions of dollars in rigged high prices.

The other half of antitrust enforcement—and one which is at least as crucial—is private treble damage actions. A group of would be price fixers may be willing to run the risk that the Government will use its limited resources to go after their conspiracy. But when they must also run the risk of their customers finding out, and suing, the stakes are much higher. With respect to damages for those in-

jured, private enforcement is the only available avenue.

In the past 2 years, the role of private antitrust enforcement has become more and more crucial, as the Antitrust Division of the Department of Justice has become more and more unwilling to enforce the law and protect the public.

Instead of leading the charge to stop illegal practices and to preserve competition, Attorney General Smith and Assistant Attorney General Baxter have sounded the call to reaction and retreat in the field of antitrust. Members of Congress from both sides of the aisle, as well as countless State and local public officials, have challenged this abdication of their duty to enforce the law. Yet those calls are blithly ignored.

The press has carried repeated reports quoting businessmen and attorneys who state that signals of weak Government enforcement are a green light to undertake questionable mergers or other dubious practices. For example, the Wall Street Journal reported a warning by Robert Pitofsky, a distinguished private antitrust lawyer and former member of the Federal Trade Commission, as follows:

> Mr. Pitofsky contends that by raising doubts about whether many proscribed practices remain so, the Reagan administration may break down self-regulation by business, tempting it to try a variety of harmful practices.

Of course, every administration shapes its own priorities for enforcement. But when agencies indicate that they will virtually disregard laws with which they may not agree, we have passed beyond the realm of responsible policy discretion, into the land of lawlessness.

At first Mr. Baxter seemed to suggest that the legal precedents he refused to follow had been implicitly overruled by subsequent Supreme Court decisions.

When pressed on this point, however, he switched his emphasis to the argument that the Supreme Court simply misunderstood the law and had not followed the intent of Congress. When we reminded him that the Supreme Court was the final word on interpreting Federal law and that he was duty bound to enforce that law, Mr. Baxter again changed his tune. He claimed that it is simply a matter of allocating inadequate resources and that he would focus on those cases which he determined harmed the public interest—and not waste his resources on prohibitions that he thought were unnecessary.

But recently, even that line of argument has crumbled. While offering the excuse of inadequate resources, Mr. Baxter has now begun to intercede in a number of cases on behalf of defendants. We have the sad spectacle of the Department spending a good deal of its energy asking the courts of the land not to enforce the law, instead of seeking its enforcement.

I know that the theory of antitrust law often seems complex or academic to the average citizen. But the consumers and small businessmen of America clearly appreciate the basic principle of antitrust: When competition is foreclosed, or is unfair, they suffer.

People also understand that the job of the Assistant Attorney General of the United States is to enforce the antitrust laws, not to help defendants evade its safeguards.

The present Justice Department has particularly shown its hostility to the laws prohibiting so-called vertical price fixing, that is, price fixing agreements between a manufacturer and distributors or retail outlets. Mr. Baxter admits that has been outlawed by the present statute, as interpreted by the Supreme Court. He disagrees, so he has not enforced the law.

Now, in response to the outcry over his failure, he is reported to be drafting a blockbuster antitrust bill for the administration. It would make vertical price fixing legal, eliminate treble damages, and repeal a host of other antitrust provisions.

I am confident that when the time comes, a bipartisan coalition in the Congress and across the land will not let this administration gut the antitrust laws.

But in the meantime, it is more clear with each passing day that we cannot rely on this Justice Department to enforce the antitrust laws. Instead, we must make sure that private plaintiffs who have been the victims of illegal action have the tools necessary to defend themselves and to maintain deterrence through their actions.

One glaring loophole in private antitrust enforcement was opended by the Supreme Court's decision 5 years ago in Illinois Brick against Illinois since that decision, those of us in the Congress concerned about strong antitrust laws have worked to overcome that decision by statute, as the Supreme Court explicitly invited Congress to do.

If the Senate is going to act on any antitrust legislation, I believe it is important that we address the problems caused by the Illinois Brick decision. The basic issue involved is a simple one.

Suppose a group of cement manufacturers conspire to fix the price of materials they sell to highway construction contractors, who in turn pass on the higher cost of those illegal prices to State and local government agencies which must pay more for public roads. Under Illinois Brick, the highway construction contractors may sue the cement manufacturers for price fixing. But the State and cities, and the taxpayers who must ultimately foot the bill, are out of luck. Since they are "indirect purchasers," not directly dealing with the price fixing, Illinois Brick bars their suit to recover damages.

Opponents of legislation have argued that the direct purchasers—here the building contractors—will sue, and thereby provide adequate enforcement for deterrence of others. However, in many cases, where it is quite easy to pass on the increased prices to the next purchaser in the chain, direct purchasers will have more to lose by alienating a supplier, than they have to gain by an expensive lawsuit.

The Illinois Brick case is a good example. The builders simply passed on to local governments the overcharges they paid to cement block manufacturers who had fixed prices.

The end result is that price fixing in many cases will go unpunished and the consumers, or the taxpayers, in the case of Government purchases will not be compensated for their loss.

In short, the Illinois Brick decision stands the antitrust law on its head because it prevents recovery by the persons actually injured.

When Congress first passed the Sherman Act, almost 100 years ago, the sponsors made clear that they sought to protect the consumers, who were the real victims because they paid the increased prices passed on by middlemen.

When the Government makes proprietary purchases, it is the "consumer." But the ultimate victim is the taxpayer, who must pay higher taxes or accept fewer services when tight budgets are drained by illegal overcharges.

In the last Congress, these basic facts led the Senate Judiciary Committee to report S. 300, to remedy the Illinois Brick problem. The bill had broad support from consumers, working people, the elderly, Federal and State law enforcement authorities.

The 96th Congress did not act on S. 300 because of the threat of a filibuster and the press of other Senate business. The bill's opponents created a great deal of misinformed confusion about the potential impact of the measure upon the courts, and the specter of unwarranted or unmanageable lawsuits.

Each of those arguments was thoroughly explored and refuted in the committee report on S. 300. Nevertheless, proponents of Illinois Brick legislation realize that there is still ample opportunity for continued confusion and scare tactics with respect to class action suits brought by private parties. Therefore, we are prepared to concentrate on the clearest and most compelling aspect of the Illinois Brick problem—its impact on Government pro-

prietary suits and on the parens patriae provision of the Hart-Scott-Rodino Act.

Last summer the Senator from Washington (Mr. GORTON) introduced just such a limited version as an amendment to S. 995, on behalf of himself, the Senator from New Hampshire (Mr. RUDMAN), the Senator from Missouri (Mr. DANFORTH), and the Senator from Vermont (Mr. STAFFORD). As former State attorneys general, they know well the devastating effect that Illinois Brick has had on the ability of State and local governments to protect themselves and their taxpayers. The Senator from Missouri worked tirelessly and with great effectiveness on behalf of Illinois Brick legislation in the 96th Congress. The Senator from Washington and the Senator from New Hampshire have repeatedly demonstrated their strong commitment to antitrust enforcement in this Congress, even when it meant criticizing the current antitrust policy of the administration. They have continued the bipartisan tradition that has been the hallmark of antitrust policy since its inception.

I indicated to those Senators that I was fully prepared to join them in a fight to add an Illinois Brick amendment to any contributions legislation. So were many of our colleagues who worked for S. 300 years ago.

After a prolonged series of discussions, however, the Senator from Washington and the chairman of the Senate Judiciary Committee have reached an agreement that this limited Illinois Brick bill will be acted upon by the committee promptly next year. It is my understanding that the Senator from South Carolina has agreed to hold hearings and to hold a committee markup on the bill by June of 1983. In return, the Senator from Washington has agreed not to go forward with his amendment at this time.

I respect Senator GORTON's decision to advance the cause of Illinois Brick as he thinks best. I know it is a sincere and well-considered one.

However, I believe Congress should act on antitrust matters in a balanced way. The absence of any action on Illinois Brick at this time only underlines my concern about legislation such as S. 995 which is so one-sided in weakening private antitrust enforcement.

An extensive, persuasive record for the full Illinois Brick bill has been made. But it is important to understand that the proposal by the Senator from Washington substantially narrows the issue and renders irrelevant most of the arguments that we heard from the opposition in the last Congress. As a result of Illinois Brick, States and cities have had to drop or settle suits involving millions of dollars. Since then they have refrained from bringing many others. The issue is still a strong concern to them. This summer a number of Governors and attorneys general urged their Senators to support legislation overcoming Illinois Brick.

All Senators received a letter supporting action on a limited Illinois Brick amendment jointly signed by the National Governors' Association, the National Association of Attorneys General, the National League of Cities, the National Association of Counties, and the National Conference of State Legislatures. They wrote that:

> The amendment would allow States to combat antitrust violations that force taxpayers and government agencies to pay higher prices for goods and services, and would enable State and local governments to retrieve tax dollars taken by price fixers and bid riggers . . . at a time when all government budgets are badly stretched.

A brief review of the Illinois Brick case and its impact will make clear the reason for their deep concern, and the merits of a legislation remedy.

On June 9, 1977, the Supreme Court held in *Illinois Brick Co.* v. *Illinois,* 431 U.S. 720 (1977), that only persons who have dealt directly with an antitrust violator are entitled to sue that violator for antitrust damages. The Court held that "the overcharged direct purchaser, and not others in the chain of manufacture or distribution, is the party 'injured in his business or property' within the meaning of (section 4 of the Clayton Act)." Since most individuals and consumers purchase goods through retailers and other middlemen, that decision effectively precludes consumers (as well as many small businesses, farmers, State governments, and Federal agencies, who also are often indirect purchasers) from seeking redress for antitrust violations. In doing so it impairs significantly both the fair and effective enforcement of this Nation's antitrust laws and the principle of compensating those who are injured by antitrust violations.

In the 87 years prior to the Illinois Brick decision, Congress and the courts had consistently recognized that consumers where the intended beneficiaries of the antitrust laws, and that a private right of action for damages was provided with the express purpose of compensating consumers and others who pay the real costs of illegal conduct. As early as 1890, Senator George described the sense of Congress that:

> The right of action against the persons in the combination is giving to the party damnified. * * * the consumer, therefore paying all the increased price advanced by the middlemen and profits on the same, is the party necessarily damnified or injured.

That express intent of Congress was reaffirmed most recently in the Hart-Scott-Rodino Act adopted by the 94th Congress. That statute permits State attorneys general to commence actions on behalf of consumers under the theory of parens patriae. Such surrogate authority, however, was significantly constricted when the Supreme Court abolished the underlying substantive rights of most consumers by its decision in Illinois Brick.

There is no effective substitute for the vigorous enforcement efforts of consumers, and other indirect purchasers, of Government lawyers acting on their behalf, or of proprietary actions brought by Government agencies which are themselves indirect purchasers. Neither civil actions by direct purchasers, nor criminal enforcement by the Department of Justice, can duplicate the breadth and force of those actions now forbidden by Illinois Brick. As a consequence, millions of dollars illegally exacted because of price fixing and other antitrust violations will go unredeemed, and with them will be lost the single most effective legal deterrent to the commission of such violations.

In the period preceding the Illinois Brick decision, courts awarded indirect purchasers, including consumers, States and Federal Government agencies, millions of dollars in damages for price fixing on the sale of drugs, highway materials, hardware products and many other items purchased through middlemen.

Had Illinois Brick been in force at the time such actions were brought, all of those indirect purchasers would have been denied recovery. Yet in most cases, indirect purchasers are the parties who suffer most because of price fixing, bid rigging, and other antitrust violations. Most direct purchasers are middlemen, who pass on the cost of any overcharge to their own purchasers, who in turn pass it on to consumers or other ultimte purchasers. Illinois Brick denies compensation to those most often injured in fact, and it compounds that unfairness by permitting windfall recoveries by direct purchasers who may not have been injured at all. Thus direct purchasers the profit of overcharges by passing them on to consumers, yet recover civil damages by suing their suppliers for the violation.

The Supreme Court was willing to accept that inequity in order to prevent what it saw as another inequity. The Court had held in 1968, in Hanover Shoe, Inc. against United Shoe Machinery Corp. "That antitrust defendants cannot escape liability by proving that a plaintiff had passed on illegal overcharges to its customers, and thus had not been injured in his business or property under section 4 of the Clayton Act." In light of the assertedly inviolable force of that precedent, the Supreme Court reasoned in Illinois Brick that permitting suit by indirect purchasers would subject a defendant to duplicative liability for the same offense. Middlemen might collect the full amount of an overcharge

even if they had passed it on to consumers, and consumers might then collect again. The Court was willing to permit windfall recoveries by direct purchasers at the expense of consumers, in order to avoid duplicative liability at the expense of antitrust violators.

That result would be unacceptable even if there were no alternative to subjecting defendants to duplicative liability. It is especially unacceptable because there is an obvious alternative: Overruling Hanover Shoe in part, and allowing the apportionment of damages according to the actual injury suffered by the parties to an action. That alternative was rejected by the Supreme Court in Illinois Brick, on the ground that it required overruling of the Hanover Shoe precedent, which the Court thought should be left to Congress.

In the 9-year period between Hanover Shoe and Illinois Brick, Federal courts capably apportioned antitrust damages between direct and indirect purchasers, encountering no unusual problems.

The Illinois Brick legislation has already had 8 days of hearings, involving 55 witnesses, held by the Subcommittee on Antitrust and Monopoly in the 95th Congress, and an additional 4 days of hearings in the 96th Congress. It was supported by a wide range of interested organizations and individuals, including, the National Governors Association, all 50 State attorneys general, the National Association of Homebuilders, the United Mine Workers of America, the Consumer Federation of America, the United Steelworkers of America, and dozens of other groups.

We do not take lightly an effort to overturn a pronouncement by the Supreme Court of the United States. However, even as the Court prescribed its own view of the legislative history of antitrust laws and their underlying purposes, it invited Congress to provide "clear directions * * * to the contrary." The Court added: "Should Congress disagree with this result, it may, of course, amend the (statute) to change it."

The decision in Illinois Brick is a flat rejection of the view taken by all but one of the Federal courts of appeals to face the problem, and contradicts the Supreme Court's previously consistent philosophy in construing section 4 of the Clayton Act. It thus represents a direct departure from almost a century of antitrust enforcement consistent with the clear intent of Congress in passage of the Sherman Act, the Clayton Act, and the parens patriae section of the Hart-Scott-Rodino Act.

An Illinois Brick bill limited to proprietary Government suits and parens patriae actions is vital to effective antitrust enforcement. First, as we pointed out in the committee report on S. 300 in the 96th Congress:

Illinois Brick Substantially Undermines State and Federal Proprietary Actions. By definition, Illinois Brick denies compensation to those indirect dealers already injured by antitrust violations, while providing an opportunity for windfall profits to direct dealers who may have suffered no injury. To the extent that future antitrust violations are not deterred by those enforcement mechanisms surviving Illinois Brick, indirect dealers will continue to suffer the real costs. If the prior cases are any indication, their losses will not be insignificant.

For the Federal and State governments, which purchase most materials through middlemen, the potential losses are enormous. Andrew Buffmire, Utah's assistant attorney general for antitrust, testified that "in excess of 90 percent of our purchases . . . are done so indirectly." Arkansas attorney general, Steven Clark, estimated that Illinois Brick leaves his State with "standing to recover possible overcharges on less than ten percent of its purchases. Most governmental agencies engage in similar practices. In the Liquid Asphalt cases, Arizona alone collected $2.1 million. In Arizona's concrete and ready-mix cases, damage claims could run as high as $60 million. Arkansas stands to lose damages on all but 3 percent of overcharges on $2 million in paper products; Texas $30 million in damages on steel rebar purchases; and Florida $27 million in damages for the same product.

Still other pending cases are threatened by Illinois Brick. Of course the committee means to imply no judgment on the merits of such pending cases. However, the significant level of damages alleged, coupled with the extent of damages actually proved and won in cases already completed, offers a significant indication of the tax dollars currently at stake in passage of S. 300. The damages alleged in such pending cases, however, do not begin to approximate the total dollars at stake, since they cannot measure the actions which would have been undertaken by various States had Illinois Brick not intervened. Arkansas Attorney General Steven Clark described to the committee the effect of Illinois Brick upon Arkansas' antitrust enforcement policy:

"Let me speak briefly about how the implications of Illinois Brick have influenced our own enforcement practices. First, it has forced us to redirect investigations to only those areas where either the State or its consumers are direct purchasers of the products or services involved. In a few instances, this has meant investigations have not been pursued because neither the State nor consumers in general were direct purchasers.

"More generally, Illinois Brick has caused our attention to be focused on only a very narrow segment of the economic distribution chain. In the case of State purchases, it has been distributors and vendors which deal directly with the State. In terms of consumers, we now must concentrate on the retail industry or other final distribution outlets.

"This narrowing of our enforcement range not only restricts the ability of the State to recover damages it or the consumer may suffer. It removes the deterrent value of State governmental action from the most concentrated sectors of the economy."

Chauncey Browning, Attorney General of West Virginia and President of the National Association of Attorneys General, offered the following estimate of potential dollar losses:

"This problem which has been presented to us by the decision in Illinois Brick involves a loss of tax dollars to our State of pending cases, those cases pending prior to June 1977, some before, in the neighborhood of approximately $300 million. That does not take into account the number of cases which might have been brought since June 1977. And in trying to arrive at some approximate figure, I think it is fair to say that we have now lost and are continuing to lose a total somewhere in the neighborhood of $750 million of State tax dollars, taxpayers' money that has been lost as a result of this decision."

Similar analysis applies to Federal proprietary actions, Assistant Attorney General Shenefield testified that if you aggregated all the possible recovery in our cases in court today, the ball park figure was $100 to $200 million. That assessment, however, does not begin to measure the opportunity cost of cases which might have been brought had Illinois Brick not intervened. Nevertheless, even the most conservative estimate would place the loss in Federal and State proprietary recovery at $1 billion or more

I hope my colleagues will consider the need for Illinois Brick reform of the antitrust laws, and the growing importance of private enforcement in the face of the Justice Department's abdication which would only serve to weaken the law. They agree to pass a bill like S. 995.

● Mr. BRADY. Mr. President, I rise in support of S. 995, the Antitrust Equal Enforcement Act. In contrast to current law, S. 995 offers an effective and equitable means of assuring compliance with the antitrust laws. In the opinion of many legal scholars, it will deter price fixers to a greater extent than current law because it will make price fixers responsible for their own share of actual damages. At the same time, it will eliminate a twist in the current law which provides a means for the most culpable price fixers to reach inordinately low settlements.

An important feature of the bill is that it will provide a more equitable atmosphere for the litigation of price fixing cases. Current law forces small businesses to face liability for damages of the entire industry. In contrast, S. 995 assures all parties, particularly small businesses, a right to trial without facing a deck stacked against them in the form of the threat of excessive damages. Rather than partial settlements and piecemeal litigation which are the norm under current law, the bill encourages settlement of the entire antitrust price-fixing case.

I also support the committee amendment to permit the application of the principle of claim reduction to pending cases. It is important to note that the bill does not provide price fixers with an automatic right to claim reduction. Rather the amendment represents a compromise which will allow the judge, who is the most familiar with the facts of the case, and impartial in the matter, to decide whether the principle should apply. Equally important, the clear language of the bill pro-

vides that existing settlements are not to be overturned because of the application of the claim reduction principle, without the consent of all parties to the settlement. It is my belief that this provision will not complicate pending litigation or tax the court system, and is a most fair method of reconciling the competing interests.

For these reasons, I support S. 995 and the committee amendment.●

● Mr. NUNN. Mr. President, I would like to offer my voice in support of the efforts of the distinguished chairman of the Judiciary Committee in bringing to the Senate floor legislation of such timely importance to our Nation's antitrust law enforcement system.

In recent years, the development of massive class action litigation has combined with the absence of a right of contribution among antitrust defendants to produce a situation of intolerable inequities in antitrust enforcement. This situation has permitted culpable antitrust defendants with large market shares to escape from litigation by paying only a fraction of their fair share of the damages resulting from their unlawful conduct. Because of the lack of a right of contribution, the exodus of these defendants from a case has had the effect of shifting their liability to other defendants. As the damages pile up on the remaining nonsettling defendants, they become increasingly susceptible to outrageous settlement demands. Typically, the pressure continues to mount until, faced with the prospect of having to respond for the damages of practically the entire industry, the remaining defendants capitulate and agree to settle for an amount many times greater than the damages they themselves allegedly caused.

Mr. President, the public interest is not served by the situation I have just described, and we in the Senate now have the opportunity to bring to an abrupt halt such an unequitable situation by the passage of S. 995, the Antitrust Equal Enforcement Act. This legislation, which establishes a right of contribution and claim reduction among defendants subject to liability in price-fixing cases, does not come before us today ill considered. It has been the subject of 4 days of hearings before the Judiciary Committee which fully aired the arguments for and against its various provisions. After much deliberation, the committee reported the bill in March of this year, and since that time the debate has continued almost continuously. Simply put, Mr. President, all sides have had an adequate opportunity to present their views, and the issues are now right for resolution.

Previous speakers in support of this legislation have fully documented the historical precedents supporting contributions in price-fixing cases. Likewise, other speakers have dispelled the argument that the provisions of S. 995 would in any way discourage settlements in these antitrust cases or in any way decrease deterrents to price-fixing companies. In fact, Mr. President, I submit the proponents of this legislation have proved that the exact opposite will be true. Because companies which under present law can now shift the vast majority of their potential liability to other defendants will be unable to do so with the passage of S. 995, I am convinced that this legislation will strengthen price-fixing deterrants.

Mr. President, we are all aware that the most hotly contested provision of S. 995 is the one which allows the claim reduction principle to be applied to pending cases. The question of when S. 995 should be effective has become one of the most controversial issues to be debated during this Congress. Both proponents and opponents of applying this legislation to pending cases have advanced compelling and persuasive arguments. The final conclusion which the Judiciary Committee reached was that it would be unfair to arbitrarily either deny or apply the claim reduction provisions of S. 995 to pending cases.

This true compromise—which I strongly support—recognizes the impossibility of examining all the facts of every pending case to determine what would achieve the most fair and equitable result and leaves that decision to the trial judge, the one individual who has knowledge of all particular facts in each case.

The question of whether claim reduction should apply to pending cases cannot be settled justly by a broad approach which attempts to cover every situation. The application of claim reduction to these cases must be based upon a consideration of the equities involved in each and every case. Clearly, with hundreds of price-fixing cases pending before the Federal court system, Congress itself cannot undertake to access these equities. This compromise allows the Federal judges presiding over each case to make the decision as to whether the applicability of claim reduction is equitable and reasonable. The burden to prove the fairness of claim reduction is properly placed on those defendants who would seek its benefits, and the authority to make this decision is properly placed with the trial judge.

In conclusion, Mr. President, I urge my colleagues to join me in voting for passage of S. 995 as reported by the Judiciary Committee. This bill resolves some truly inequitable situations which present law not only permits to exist, but also encourages. This legislation assures that such antitrust price-fixing defendant pays his fair share of the damage he actually caused. This bill is fair and it marks a significant improvement in our current antitrust law enforcement.●

● Mrs. HAWKINS. Mr. President, for the past 3 days the Senate has debated S. 995, the Antitrust Equal Enforcement Act. S. 995, as introduced changes current law in two ways. First, it creates a new right for defendants to insure that other parties not sued by the plaintiff be joined as codefendants when appropriate. Second, and more importantly it creates a new right of claim reduction, under which any judgment obtained by plaintiffs in a price-fixing case would be reduced by the market shares represented by defendants who settled, rather than, as now, only by the dollar amount paid by the settling defendants. When S. 995 was introduced, both claim reduction and contribution applied only to future cases. These changes in antitrust law, applied prospectively, would have corrected certain inequities of existing law.

Unfortunately, the Senate Judiciary Committee amended S. 995 to allow the right of claim reduction to apply to pending cases. The bill as reported out of the Judiciary Committee contains a retroactive clause which could apply claim reduction to pending cases. I cannot support the retroactivity provision because it changes the rules in the middle of the game. This is unfair and unjust to the parties who based their decision about whether to settle or litigate on existing law.

While I strongly oppose the retroactivity provision in S. 995, I did vote for cloture because I believe the Senate should proceed to other important business. With only 3 weeks before the end of the 97th Congress and many critical measures to complete, including 10 appropriation bills, it is our duty to act as expeditiously as possible.●

Mr. THURMOND. Mr. President, will the Senator provide me the last few minutes?

CLOTURE MOTION

The PRESIDING OFFICER. The Chair wishes to assert his prerogative here that under rule XXII, it being 1 hour after the Senate has met, the clerk will report the motion to invoke cloture. Morning business is closed.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the committee amendment to S. 995, a bill to provide for contribution of damages attributable to an agreement by two or more persons to fix, maintain, or stabilize prices under section 4, 4A, or 4C of the Clayton Act.

Strom Thurmond, Paul Laxalt, Howell Heflin, Orrin Hatch, Mark Hatfield, Dennis DeConcini, John Glenn, Chuck Grassley, Jesse Helms, Don Nickles, Dan Quayle, Jennings Randolph,

Steve Symms, Ted Stevens, James A. McClure, and John Tower.

Mr. THURMOND. Mr. President, is the cloture vote in order now?

CALL OF THE ROLL

The PRESIDING OFFICER. Pursuant to rule XXII, the Chair now directs the clerk to call the roll to ascertain the presence of a quorum.

The legislative clerk proceeded to call the roll, and the following Senators entered the Chamber and answered to their names.

[Quorum No. 47]

Baker	East	Melcher
Baucus	Glenn	Pressler
Bentsen	Hatch	Symms
Burdick	Mathias	Thurmond
Dole	Mattingly	Warner

The PRESIDING OFFICER. The Chair wishes to announce that a quorum is not present. The clerk will call the roll of the absentees.

Mr. BAKER. Mr. President, I move that the Sergeant at Arms be instructed to require the attendance of the absent Senators and I ask for the yeas and nays on the motion.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee (Mr. BAKER). The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Colorado (Mr. ARMSTRONG), the Senator from New Mexico (Mr. DOMENICI), the Senator from Arizona (Mr. GOLDWATER), and the Senator from Texas (Mr. TOWER), are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Colorado (Mr. HART) and the Senator from South Carolina (Mr. HOLLINGS), are necessarily absent.

The PRESIDING OFFICER (Mr. SYMMS). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 91, nays 3, as follows:

[Rollcall Vote No. 389 Leg.]

YEAS—91

Abdnor	D'Amato	Heinz
Andrews	Danforth	Helms
Baker	DeConcini	Huddleston
Baucus	Denton	Humphrey
Bentsen	Dixon	Inouye
Biden	Dodd	Jackson
Boren	Dole	Jepsen
Boschwitz	Durenberger	Johnston
Bradley	Eagleton	Kassebaum
Brady	East	Kasten
Bumpers	Exon	Kennedy
Burdick	Ford	Laxalt
Byrd, Harry F., Jr.	Garn	Leahy
	Glenn	Levin
Byrd, Robert C.	Gorton	Long
Cannon	Grassley	Lugar
Chafee	Hatch	Mathias
Chiles	Hatfield	Matsunaga
Cochran	Hawkins	Mattingly
Cohen	Hayakawa	McClure
Cranston	Heflin	Melcher
Metzenbaum	Pryor	Stafford
Mitchell	Randolph	Stennis
Moynihan	Riegle	Stevens
Murkowski	Roth	Symms
Nickles	Rudman	Thurmond
Nunn	Sarbanes	Tsongas
Packwood	Sasser	Wallop
Pell	Schmitt	Warner
Percy	Simpson	Zorinsky
Pressler	Specter	

NAYS—3

Proxmire	Quayle	Weicker

NOT VOTING—6

Armstrong	Goldwater	Hollings
Domenici	Hart	Tower

So the motion was agreed to.

The PRESIDING OFFICER (Mr. SYMMS). With the addition of Senators voting who did not answer the quorum call, a quorum is now present.

VOTE

CLOTURE MOTION RELATING TO COMMITTEE AMENDMENT TO S. 995

The PRESIDING OFFICER. The question is, Is it the sense of the Senate that debate on the committee amendment to S. 995, a bill to provide for contribution of damages attributable to an agreement by two or more persons to fix, maintain, or stabilize prices under section 4, 4A, or 4C of the Clayton Act, be brought to a close? The yeas and nays are mandatory under the rule. The clerk will call the roll.

Mr. BAKER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAKER. Mr. President, is this the first cloture motion addressed against the committee amendment?

The PRESIDING OFFICER. It is.

Mr. BAKER. I thank the Chair.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI) and the Senator from Arizona (Mr. GOLDWATER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Colorado (Mr. HART) and the Senator from South Carolina (Mr. HOLLINGS) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The yeas and nays resulted—yeas 38, nays 58, as follows:

[Rollcall Vote No. 390 Leg.]

YEAS—38

Armstrong	Hatfield	Pressler
Baker	Hawkins	Quayle
Biden	Heflin	Randolph
Brady	Huddleston	Roth
Bumpers	Jepsen	Sarbanes
Byrd, Robert C.	Laxalt	Sasser
Cochran	Lugar	Schmitt
DeConcini	Mathias	Simpson
Ford	Mattingly	Stevens
Garn	Murkowski	Thurmond
Glenn	Nunn	Tower
Grassley	Packwood	Wallop
Hatch	Pell	

NAYS—58

Abdnor	Dole	McClure
Andrews	Durenberger	Melcher
Baucus	Eagleton	Metzenbaum
Bentsen	East	Mitchell
Boren	Exon	Moynihan
Boschwitz	Gorton	Nickles
Bradley	Hayakawa	Percy
Burdick	Heinz	Proxmire
Byrd, Harry F., Jr.	Helms	Pryor
	Humphrey	Riegle
Cannon	Inouye	Rudman

Cranston	Kasten	Symms
D'Amato	Kennedy	Tsongas
Danforth	Leahy	Warner
Denton	Levin	Weicker
Dixon	Long	Zorinsky
Dodd	Matsunaga	

NOT VOTING—4

Domenici	Hart
Goldwater	Hollings

The PRESIDING OFFICER. On this vote, the yeas are 38, the nays are 58. Three-fifths of the Senators duly chosen and sworn not having voted in the affirmative, the cloture motion is rejected.

CLOTURE MOTION

The PRESIDING OFFICER. Under rule XXII, two cloture motions having been filed on the same day and the first having failed of adoption, the clerk will report the second cloture motion.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close the debate upon the bill S. 995.

Strom Thurmond, Paul Laxalt, Howell Heflin, Orrin Hatch, Mark Hatfield, Dennis DeConcini, John Glenn, Chuck Grassley, Jesse Helms, Don Nickles, Dan Quayle, Jennings Randolph, Steve Symms, Ted Stevens, James A. McClure, and John Tower.

VOTE

CLOTURE MOTION RELATING TO S. 995

The PRESIDING OFFICER. The question is, Is it the sense of the Senate that debate on S. 995 shall be brought to a close? The yeas and nays are mandatory under the rule. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI) and the Senator from Arizona (Mr. GOLDWATER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Arkansas (Mr. BUMPERS), the Senator from Colorado (Mr. HART) and the Senator from South Carolina (Mr. HOLLINGS) are necessarily absent.

The PRESIDING OFFICER (Mr. WALLOP). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 44, nays 51, as follows:

[Rollcall Vote No. 391 Leg.]

YEAS—44

NOT VOTING—5

Bumpers	Goldwater	Hollings
Domenici	Hart	

The PRESIDING OFFICER. On this vote, the yeas are 44, the nays are 51. Three-fifths of the Senators duly chosen and sworn not having voted in the affirmative, the cloture motion is rejected.

Mr. STEVENS addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

AUTHORIZATION OF FUNDS FOR DRUG PROGRAMS

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 3963.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House disagree to the amendment of the Senate to the bill (H.R. 3963) entitled "An Act to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to extend the periods for which funds are authorized to be appropriated."

Mr. STEVENS. Mr. President, I move that the Senate further insist on its amendment and request a conference with the House on the disagreeing votes of the two Houses and that the Chair appoint the conferees on the part of the Senate.

Mr. MATHIAS. Mr. President, is that motion debatable?

The PRESIDING OFFICER. The motion is debatable.

Mr. MATHIAS. Mr. President, I have to oppose this motion. I oppose it because of my great concern for the fate of the drug aftercare program, which is the vehicle that has been chosen to carry the so-called crime package.

I have no objection to trying to get the crime package in motion. I understand the procedure by which the leadership is trying to move it by the time-tested method of tacking it onto a bill that they think will go. But the problem is that this is the second time at bat. The House has already considered the drug aftercare bill amended with the crime package and has rejected it. And if that happens again, I am very much concerned that it will have the result of killing the drug aftercare program.

Now, drugs are a problem in America. Drugs are a serious problem in this country.

Mr. President, may we have order?

The PRESIDING OFFICER. The Senator's point is well taken. Senators who are conversing, and staff who are conversing, the staff will be seated and Senators conversing, it would be appreciated if they would take their conversations to the cloakroom.

Mr. MATHIAS. I think we ought to understand exactly what we are doing here. We are taking the program which authorizes—not appropriates but authorizes—the drug aftercare program renewal. We are jeopardizing the passage of that measure which is virtually certain, because it is a program that has support in both Houses of the Congress, a program that is thought very highly of by judges, by law enforcement officials, and by drug enforcement officials. We are taking that bill, which would certainly pass, and we are jeopardizing it by adding onto it the very controversial crime package—the budget buster crime package. Then we are probably going to see the defeat of both these measures and the end of the drug aftercare program, a part of the whole drug enforcement package in which the administration has been interested.

Now, I do not want to get into debating the merits of the crime package, but the fact is that the crime package simply cannot be sustained without budget expenditures far beyond anything that we have contemplated in the budget that have been adopted by the Congress. So that is a complicated, controversial bill.

Let us not follow this procedure of killing a valuable drug program by loading it down with a controversial measure that cannot be passed.

I think that is exactly what we are doing. I would like to ask the distinguished chairman of the Judiciary Committee if he does not agree with me in that respect.

Mr. THURMOND. Mr. President, I cannot agree at all.

First, I want to say that we passed this bill 95 to 1. The distinguished Senator from Maryland was the only Senator in the Senate who voted against it.

I would like to alleviate his fears because this drug aftercare program is permanent law under title 18, United States Code, section 4255. It is an ongoing program administered by the Administrative Office of the U.S. Courts. Funds for it are in the continuing resolution, and funds are included in appropriate pending appropriation bills. Mr. RODINO, the chairman of the Judiciary Committee in the House, and Mr. HUGHES, chairman of the House Judiciary Subcommittee on Crime, have sent a letter to the Director of the Administrative Office of the U.S. Courts stating that this drug aftercare program is an ongoing program under current title 18 that continues without interruption so long as funds for it are included in the Administrative Office budget and appropriation. This is such a well-settled matter under the circumstances here, that there is no question about the continuation of this program with adequate funds regardless of action or inaction on H.R. 3963.

All we want is to pass the crime package, as well as the drug aftercare bill. If we send this to conference, I think we can get both passed. I urge the Senate act favorably on this.

I am willing to have a rollcall if there is any question about it. The crime package passed before 95 to 1. The administration strongly favors this bill to strengthen the criminal laws. We need the reforms that are in this crime package, including important drug penalties, bail, and sentencing reform. It does many other good things that I will not go into unless I am requested to do so.

I hope the Senate will see fit to act on the motion made by the distinguished Republican whip to send this matter back to the House, insist on our amendments, and let it go to conference.

Mr. MATHIAS. Let me ask the distinguished chairman of the Judiciary Committee this further question. The bill being amended, the drug aftercare authorization bill, is the authorization; is it not?

Mr. THURMOND. It is true that this is an authorization for appropriation bill for a drug aftercare program. But such a bill is not always necessary to continue a program. In this instance, the statutory authority to conduct this program was enacted by Public Law 95-537 as a part of permanent law—18 U.S.C. 4255. While an authorization bill may be helpful guidance in the budget and appropriation process it is clear that the Congress may appropriate in excess of authorization limits previously passed by the Congress or may appropriate in the absence of an authorization. That is

precisely the situation here. So long as this program is established in permanent law and funded by appropriate acts, it will continue uninterrupted.

Mr. President, I ask that the letter from Congressmen RODINO and HUGHES to the Director of the Administrative Office of the U.S. courts concerning H.R. 3963, a letter from the Comptroller General relevant to the discussion, and a copy of Public Law 95-537 establishing in permanent law the drug aftercare program be inserted in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMMITTEE ON THE JUDICIARY,
HOUSE OF REPRESENTATIVES,
Washington, D.C., October 8, 1982.

Mr. WILLIAM E. FOLEY,
Director, Administrative Office of the U.S. Courts, Washington, D.C.

DEAR MR. FOLEY: We have been informed that, effective October 1, 1982, the Contract Services for Drug Dependent Offenders program has been suspended. It is our understanding that you determined that such action was required because H.R. 3963, a bill authored by Mr. Hughes to extend the period for which funds are authorized to be appropriated for this program, has not been enacted.

You are to be commended for your dedication to the rule of law and for your determination that governmental functions, however meritorious, cannot be continued if they are not authorized by law. However, our own analysis of the facts and law concerning the Drug Dependent Offenders Act leads us to a different conclusion than that which you have reached. We offer our review and conclusions for what ever consideration you see fit to give them.

Congress has, in a number of ways, expressed its intent that contract services continue to be made available for supervisory aftercare of drug addicts and drug dependent offenders. Statutory authority for the program is permanent legislation (18 U.S.C. 4255), as is the authority (18 U.S.C. 3651) for courts to require addicts and drug dependent persons to participate in such programs.

Under such circumstances and in the absence of an expression of Congressional intent that the program not be continued, it seems appropriate to continue the activity, so long as funds are available, even after the expiration of authority for new appropriations.

In fact, Congress has not only failed to express an intent that the program be terminated or suspended, but has taken steps to reaffirm its mandate that the aftercare program be carried out.

First, both Houses have passed identical legislation to extend the authorization for appropriations for the aftercare program. But for the fact that the two Houses are in disagreement concerning an unrelated amendment offered by the Senate, H.R. 3963 would have been by now submitted to the President.

Second, and perhaps most importantly, Congress has provided new funding authority for the aftercare program. H.J. Res. 599 (P.L. 97-276), the Continuing Resolution adopted on October 1, appropriates amounts "necessary for continuing projects or activities . . . which were conducted in the fiscal year 1982 and for which appropriations, funds or other authority would be available in the following appropriations Acts" (citation includes the Commerce, Justice, and State, the Juduciary, and Related Agencies, Appropriation Act of 1983, and that Appropriation Act contains, in both the House and the Senate bills, money for the after care program.)

As indicated above, we do not believe that authority to perform the drug aftercare functions has expired; only the authority for new appropriations. However, even if authority for the program itself had expired, decisions of the Comptroller General hold that appropriation of funds, such as took place in H.J. Res. 599, "confer the necessary authority to continue the program during that period of availability, in the absence of contrary intent. A Continuing Resolution has the same 'force and effect' as an appropriation act." 55 Comp. Gen. 289, at 292.

In summary, Congress has established the aftercare program as a part of permanent legislation in title 18, United States Code. Both Houses have approved legislation to provide authority for three more years of appropriations, and money has been appropriated to provide temporary additional funding for the program on the same basis as other programs covered in the Continuing Resolution approved by the Congress and signed by the President last week.

Sincerely,

WILLIAM J. HUGHES,
Chairman,
Subcommittee on Crime.
PETER W. RODINO, JR.,
Chairman,
House Judiciary Committee.

COMPTROLLER GENERAL
OF THE UNITED STATES,
Washington, D.C., June 23, 1976.

Hon. JOHN L. MCCLELLAN,
Chairman, Subcommittee on Criminal Laws and Procedures, Committee on the Judiciary, U.S. Senate.

DEAR MR. CHAIRMAN: We have been informally requested by the Chief Counsel of your Subcommittee to furnish you our views as to whether the Law Enforcement Assistance Administration (LEAA) may continue to carry out the programs provided for by chapter 46 of title 42 of the United States Code after June 30, 1976, in view of the provisions of 42 U.S.C. § 3760. The last cited code provision reads as follows:

"Unless otherwise specified in this chapter, the Administration (LEAA) shall carry out the programs provided for in this chapter during the fiscal year ending June 30, 1974, and the two succeeding fiscal years." Pub, L. 90-351, title I, § 512, June 19, 1968, 82 Stat. 207; Pub. L. 93-83, § 2, August 6, 1973, 87 Stat. 213.

Without more, it would be our view that LEAA would not be authorized to carry out programs provided for in chapter 46 of title 42, after June 30, 1976. However, it is fundamental that one Congress cannot bind a future Congress and that the latest expression of congressional intent generally must control. The Departments of State, Justice, and Commerce, the Judiciary, and Related Agencies Appropriation Act, 1976, approved October 21, 1975, Pub. L. 94-121, 89 Stat. 611, 621, under the heading "Law Enforcement Assistance Administration," subheading "Salaries and Expenses," after providing funds for LEAA's operations for fiscal year 1976, provides as follows:

"For 'Salaries and Expenses' for the period July 1, 1976, through September 30, 1976, $204,960,000 to remain available until expended."

We have held that Congress may appropriate funds in excess of a cost limitation contained in an authorization act and that the agency is authorized to continue the programs at the higher level 36 Comp. Gen. 240 (1956).

We have also held that the appropriation of funds for a program whose authorization is due to expire during the period of availability of the funds, confers the necessary authority to continue the program during the period of availability, in the absence of a contrary intent. 55 Comp. Gen. 289 (1975).

The specific inclusion of funds for the transition period (i.e. the period from July 1, 1976 through September 30, 1976) in LEAA's fiscal year 1976 appropriation act is a clear indication of the intent of Congress that the programs involved continue under the transition period appropriation, notwithstanding the provisions of 42 U.S.C. § 3760. Hence, it is our view that LEAA may continue its programs during the transition period, i.e. from July 1, 1976, through September 30, 1976, under the authority of the appropriation made for such period.

Sincerely yours,

R. F. KELLER,
Deputy Comptroller General
of the United States.

PUBLIC LAW 95-537—95TH CONGRESS

An Act to enable the Department of Justice and the Administrative Office of the United States Courts to provide services and special supervision to drug dependent Federal offenders in an efficient and effective manner

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Contract Services for Drug Dependent Federal Offenders Act of 1978".

SEC. 2. Section 3651 of title 18, United States Code, relating to suspension of sentence and probation, is amended by deleting from the second to the last paragraph the colon and everything thereafter, and inserting in lieu thereof a period.

SEC. 3. Section 4255 of title 18, United States Code, relating to supervision in the community of certain convicted offenders, is amended to read as follows:

"An offender who has been conditionally released shall be under the jurisdiction of the United States Parole Commission as if on parole, pursuant to chapter 311 of this title.

"The Director of the Administrative Office of the United States Courts may contract with any appropriate public or private agency or any person for supervisory aftercare of an offender. The Director may negotiate and award such contracts without regard to section 3709 of the Revised Statutes (41 U.S.C. 5).".

SEC. 4. (a) To carry out the purposes of this Act, there are authorized to be appropriated sums not to exceed $3,500,000 for the fiscal year ending September 30, 1980; $3,645,000 for the fiscal year ending September 30, 1981; and $3,750,000 for the fiscal year ending September 30, 1982.

(b) The amendments made by this Act shall take effect on October 1, 1979.

Approved October 27, 1978.

Mr. THURMOND. Mr. President, I would not want to hurt a drug bill. What we want to do is to get both the drug bill and get the broader crime bill. By sending it to conference, I un-

derstand from some House Members that perhaps we can enact some major improvements. I want the distinguished Senator from Maryland on the conference committee. I believe his name has been read out as being on the conference committee.

Mr. MATHIAS. I appreciate the chairman's confidence.

Mr. THURMOND. I am very glad to give that assurance to the Senator.

Mr. MATHIAS. And his making me a member of the conference committee.

But, Mr. President, what puzzles me is this: If the drug aftercare program is a permanent program, why was it necessary to pass the House bill which authorizes its renewal in the first place? Everybody seems to agree that that was necessary. If that is the case, then a continuing resolution for appropriations will not be sufficient to carry the program forward if, in fact, there has been a lapse in the authorization. There seems to be at least some open question on that subject.

Mr. THURMOND. I can understand the Senator's confusion. I have stated the situation as clearly as I can. I might simply recall that the whole Department of Justice has been operating in the absence of an authorization bill for 2 years. Hopefully, this drug aftercare program will also continue without challenge. If you have an appropriation, it has been held that you would not have to have an authorization.

Mr. MATHIAS. I was a member of the Appropriations Committee, and we sometimes in moments of glory had the feeling that once the Appropriations Committee had acted, no other authorization was necessary and that the word of the Appropriations Committee would be final. But I am not sure that that is in fact the law. I think that is the question that I want to raise before the Senate. That is the question that I think we have to consider. If the answer turns out to be that the authorization has lapsed and the renewal will fail because of the procedure that is now before the Senate, then this country is going to lose a valuable tool in the war against drugs.

I can only quote from H.R. 3963, itself. It is an act "To amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to extend the periods for which funds are authorized to be appropriated."

Without this authorization and extension, I fear that the program will fail. I urge the Senate to vote against pending motion.

Mr. THURMOND. I just want to say if this program had failed, it would have failed at the beginning of the fiscal year. I repeat again, I am informed that this is an ongoing program. It is important for us to pass this crime package now.

We will have to start all over again next year with an important crime package. With all the crime there is in the country today, we ought not to delay. The administration has recommended this. The ranking member of the Judiciary Committee, Senator BIDEN, is strongly for it, Senator DECONCINI, and others.

It is important that we pass this.

Mr. MATHIAS. Mr. President, I ask unanimous consent that a copy of H.R. 3963, which is a very short bill, be printed in the RECORD at this point so that this issue may be clear.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

H.R. 3963

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Contract Services for Drug Dependent Federal Offenders Act Amendment of 1981".

SEC. 2. Section 4(a) of the Contract Services for Drug Dependent Federal Offenders Act of 1978 (18 U.S.C. 4255 note) is amended—

(1) by striking out "1981; and" and inserting in lieu thereof "1981;", and

(2) by inserting before the period at the end thereof the following: "; $4,500,000 for the fiscal year ending September 30, 1983; $5,500,000 for the fiscal year ending September 30, 1984; and $6,500,000 for the fiscal year ending September 30, 1985".

Mr. BAKER. Mr. President, what is the motion before the Senate?

The PRESIDING OFFICER. The motion before the Senate is to further insist on the Senate amendment and request a conference with the House.

Mr. BAKER. I wonder if Senators are ready to vote.

Mr. THURMOND. I am ready to vote.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. BAKER. I move to reconsider the vote by which the motion was agreed to.

Mr. THURMOND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Chair appoints the following Senators as members of the conference committee: Mr. THURMOND, Mr. MATHIAS, Mr. LAXALT, Mr. HATCH, Mr. DOLE, Mr. BIDEN, Mr. KENNEDY, and Mr. LEAHY.

ANTITRUST EQUAL ENFORCEMENT—S. 995

Mr. BAKER. Mr. President, I cannot help but observe that the two cloture votes were not very close. Indeed, there were almost 60 votes against cloture. I wonder if the distinguished Senator from South Carolina, who has been such an ardent advocate of S. 995, will join me in saying that it appears highly unlikely that cloture is going to be invoked either against the committee amendment or against the bill itself. If indeed that is the case, and that is my view of the situation, I think that no good purpose would be served with the continued effort to invoke cloture and to proceed further with that measure at this time. I am reluctant to suggest that. I wonder what the position of the distinguished Senator from South Carolina might be.

Mr. THURMOND. Mr. President, I wish to thank the able majority leader for his remarks on this subject.

I want to say that this antitrust bill is an extremely important bill. Many small companies have been subjected to tremendous liabilities because bigger companies go in and settle damage claims cheaply. Then the small companies, if they have not settled, if they felt they should not even have been charged, could be vulnerable to not only their own liability but also for the remaining liability of the big companies that settled. Overall, S. 995 is a very just bill and should pass.

There is a question there as to whether it should be applied to pending cases. That was the subject of the amendment that the Judiciary Committee added.

The committee thinks its amendment is just because a judge would make the decision whether to apply claim reduction to pending cases. It would not automatically apply. I do not think the Senate caught this distinction. Our amendment would allow the trial judge to determine whether or not it would be inequitable not to apply claim reduction to the pending cases. If it is good for the future, why should it not apply to pending cases, if the trial judge says that you do not render justice unless you do apply it.

I can understand the Senate in this short session wanting to get through, to move on to other things. I can understand the way they voted today. In view of that, I would have to agree that the chances are not good for getting cloture in this session. In view of the votes today, it appears that we will not be able to get cloture. In view of that, at the request of the majority leader to move on to other important things, I would not resist his request or motion if he desires to do that.

Mr. BAKER. I thank the Senator from South Carolina for his unfailing courtesy and cooperation in this matter at this time.

I point out, Mr. President, that it was my privilege in our caucus today to call to the attention of my colleagues that the Senator from South Carolina will once again be President pro tempore when Congress convenes in January. In those remarks, I pointed out that he has brought dignity and stature to the office of the President pro tempore, and that he has

been unfailingly cooperative and realistic. Indeed, I have said on many occasions that there is no more dedicated and conscientious Member of this body in which we serve than the Senator from South Carolina. So often I have seen him face realistically developments that did not please him and which were contrary to the result he wished to obtain. This, I believe, is one of those cases.

I wonder, then, if the Senator would agree that this would be an appropriate time to vitiate the motions which have been filed on both the bill and the amendment to be voted on tomorrow. I am prepared to make such a motion.

Mr. THURMOND. In view of the votes on the two cloture motions today, Mr. President, I do not perceive it is at all possible to get cloture in this short session and to pursue this bill further. Acknowledging that, I would not be in a position to object to the request of the distinguished majority leader.

I thank him for his kind words about me. I could not object sincerely and conscientiously, as I feel that nothing could be gained by continuing in this short session.

Mr. BAKER. Mr. President, once again, I thank the Senator.

ORDER TO VITIATE VOTE ON CLOTURE MOTION

Mr. BAKER. At this time, Mr. President, I ask unanimous consent that the vote which would occur on tomorrow in response to the cloture motion filed against the committee amendment be vitiated.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I shall shortly move to the consideration of another measure or, in the alternative, seek unanimous consent to proceed to consideration of another measure. The effect of that will be to return S. 995 to the calendar. Before I do so, however, I wish to confer with the minority leader and other Senators who are particularly concerned. It will be my intention to ask the Senate to turn next to one of two appropriation bills, either the Transportation appropriations bill which is here and eligible, or the D.C. appropriations bill. Both must be done, in my opinion. I am prepared to proceed to either one. I have some preliminary indication that it may be desirable to go to the Transportation bill first.

Mr. CANNON. Will the majority leader yield?

Mr. BAKER. Yes; I yield.

Mr. CANNON. Mr. President, if we are going to the Transportation appropriations bill, I have some problems with that unless I can be given assurances that there will not be an amendment offered to attempt to reregulate the air transportation industry.

Mr. BAKER. Mr. President, I do not know quite how to approach that. I can assure the Senator that I have no such intention. I bridle, as a matter of fact, now that the subject has been brought up, upon discovering from newspaper and television ads that I can fly from Washington to Los Angeles for half the price for which I can fly from Washington to Knoxville, Tenn. That bothers me a whole lot, but this is not the time to bring up that issue and I shall not do so.

Obviously, I cannot speak for other Senators except to say that I know of no such intention.

Mr. CANNON. If the Senator will yield further, there is a rumor to the effect that one of the Senators on the majority side of the aisle may have such an intention. Unless I get assurance that that intention is not to be carried out, I shall certainly want to consider long and fully any request on the part of the majority leader for unanimous consent that we move to that appropriation bill.

Mr. BAKER. All right.

Mr. President, I shall certainly consult on this side and see what I can find out. My friend from Nevada knows that, at some point, we simply have to do the appropriation bills. This is Thursday and we are now 4 days into the 15 working days that we have in this lameduck session, so it is necessary for us to go on into these appropriation bills as and when we can.

I hope I never fail to consult with Members on both sides to try to accommodate their convenience in scheduling and to try to take care of their particular concerns. I also hope that the Senator would not object to proceeding to the consideration of that matter, even though I cannot give him ironclad assurance that no such amendment will be offered. At some point, of course, I shall have to move to consideration of that measure. I fully understand such a motion would be debatable. But I hope we can work out something.

Since hope springs eternal, Mr. President, in a moment, I intend to suggest the absence of a quorum in order to create a little time so I may consult with the Senator from Nevada and with the minority leader.

Mr. BAUCUS. Will the Senator yield?

Mr. BAKER. May I yield first to the Senator from Nevada? Then I shall yield to the Senator from Montana.

Mr. CANNON. Mr. President, may I say I have no intention of delaying or attempting to delay the consideration of the appropriations bill, provided it is the consideration of the appropriations bill. I have every intention of attempting to delay and will, so far as I can possibly do so, any consideration of an amendment that might be offered to that, or proposed, to reregulate the air transportation industry. I would think that perhaps a telephone call from the distinguished majority leader might put him in a position to give me the assurances I seek on that point. If I am given those assurances, I have no problem at all, because I certainly do not want to delay the consideration of the appropriation bills.

Mr. BAKER. Will the Senator tell me whom I should call? As I say, I know of no such intention, but maybe I can call somebody on this side if the Senator thinks I should.

Mr. CANNON. What I read in the press as late as today indicates that Senator ANDREWS has such an intention or that he might have such an intention.

Mr. BAKER. I see. Mr. President, I assure the Senator I shall include him in the list of those I consult.

Now I yield to the Senator from Montana.

Mr. BAUCUS. Mr. President, I wonder, as a way of clearing up after the setting aside of 995, if the majority leader will ask unanimous consent to place S. 995 back on the calendar at this point while he is waiting to see whatever other bills might come up.

Mr. BAKER. Mr. President, if the Senator will permit me, I think it would be better if we try to get the other matter out of the way first. I assure him I do not intend to ask the Senate to proceed further on S. 995 until we arrange the sequence of matters. He can depend on that.

Mr. BAUCUS. I appreciate that, Mr. President.

While we have the time, I wish to compliment the Senator from South Carolina on his great and forthright advocacy of S. 995. I think he has done an exceedingly good job in that regard. I regret that we have reached an impasse. I hope we can, at some time, pass S. 995 without the retroactive portions.

During this lameduck session, I shall be working with the senior Senator from South Carolina to see if that is possible. I would appreciate his help.

Mr. THURMOND. Mr. President, will the distinguished Senator yield?

Mr. BAKER. Mr. President, I yield to the Senator from South Carolina.

Mr. THURMOND. Mr. President, I want to say it has been a pleasure to work with Senator METZENBAUM and Senator BAUCUS on this bill. They did an enormous amount of work on it and they have been successful in stopping cloture here. I have to commend them on being successful, although I do not agree with them.

I am confident that this bill, with the committee amendment, is best for the country. If we do not get the bill

with the committee amendment, of course, the bill itself is a good bill. I am hoping that, in the new year, we can take this matter up again and try to work it out, because I think it is for the good of the country that we do it.

I understand about 900 different companies are now being sued in antitrust cases. Just think what this involves. Every day that passes, there are more and more suits being brought and great injustices may be worked in some cases. Something has to be done to relieve that situation.

I am very pleased to hear the distinguished Senator from Montana say that he will at least support the original bill. I am wondering if the Senator from Ohio feels that way.

Mr. BAUCUS. Before the Senator from Ohio answers, Mr. President, I would like to answer the Senator from South Carolina. Not only shall I support it, but I shall support it enthusiastically, because, as the Senator knows, I am the next sponsor on the bill behind the distinguished chairman.

Mr. THURMOND. I recall the distinguished Senator is an original sponsor of the bill.

Mr. METZENBAUM. Mr. President, first let me doff my cap to the distinguished Senator from South Carolina, who, in my opinion, is as able and dedicated an advocate for his position as any Senator I know. At the same time, I doff my hat to the Senator from Montana, who has led the battle against S. 995 with the committee amendment. Certainly, he came in well prepared. He has worked zealously and vigorously to bring about this result. I must say I am particularly pleased that the matter is going to be set aside.

I also want to say to the majority leader, if I could have his attention for a moment, that I am pleased to see that this matter has been set aside. The majority leader, I know, has the responsibility with respect to a number of appropriations matters that are pending and that are, really, the main purpose of our being here today in this special session. I hope that in this time, this body will not be further encumbered by other further diversions which might be somewhat similar to S. 995 or any special-interest bills. I hope we have heard the last of S. 995 for this session.

In specific response to the Senator from South Carolina as to my position in connection with the bill itself, I remain opposed to the bill. I would much prefer to oppose the bill in cooperation with my friend from Montana, but I understand we started off with a different point of view on that subject.

I know the Senator from New Hampshire on the majority side continues to oppose the overall bill. I hope that, whatever further action we have on S. 995, there will be no developments which will occur until after January and we have heard the last of this subject for this year.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, I think now I should consult with the minority leader before we proceed further. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I see that the distinguished Senators principally involved in the airline matter are here, Senators ANDREWS and CANNON. Since Senator ANDREWS may speak on that subject as he wishes, let me yield the floor so that he may respond to the question by the distinguished Senator from Nevada.

Mr. ANDREWS. I thank the majority leader.

Let me assure the distinguished Senator from Nevada that I have no intention of offering any amendment for airfare re-regulation or change in airfare regulation to this bill. There is no amendment at this particular time in the bill. I want to assure the Senator from Nevada of that.

Mr. CANNON. I thank the Senator, and with that assurance I have no objection to the majority leader proceeding to the consideration of that appropriation bill.

Mr. ANDREWS. I appreciate the consideration of the Senator from Nevada.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I see that the distinguished Senators from North Dakota and Florida are here. I believe they are the ones principally involved in this matter. I am advised that the minority leader has indicated his assent to the request that we proceed to the consideration of the transportation appropriation bill.

I inquire of the Senator from North Dakota if he is prepared to proceed?

Mr. ANDREWS. We are prepared to proceed.

Mr. BAKER. Is the Senator from Florida in a position to proceed?

Mr. CHILES. Yes.

DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS, 1983

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H.R. 7019, Calendar Order No. 835, making appropriations for the Department of Transportation and related agencies.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered. The clerk will report.

The Secretary of the Senate read as follows:

A bill (H.R. 7019) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes.

The Senate proceeded to consider the bill, which had been reported from the Committee on Appropriations with amendments.

S. 995 RETURNED TO CALENDAR

(Later the following occurred.)

Mr. BAKER. Mr. President, I had thought it would perhaps be necessary to move to the consideration of this measure in which case S. 995 would have been automatically displaced and returned to the calendar. But since unanimous consent was generously given to do so, that result was not obtained.

I ask unanimous consent that S. 995 be returned to the calendar as if displaced on a motion to proceed to this item.

The PRESIDING OFFICER. Without objection, it is so ordered.

(Conclusion of later proceedings.)

Mr. ANDREWS. Mr. President, before I provide a description of what is in the committee's recommended fiscal year 1983 transportation and related agencies appropriation bill, I would first like to thank all members of the subcommittee for their hard work in producing what I think is a very fine bill. I would especially like to thank the distinguished Senator from Florida, the ranking minority member of the subcommittee, for his contribution to this effort. His personal attention and that of this staff have been invaluable to the subcommittee.

Mr. President, the professional staff of the Transportation Subcommittee has again done a fine job in this legislation, but especially, Mr. President, I would like to take this opportunity to note that Kitty Ray will soon be retiring from the staff in order to spend more time with her family. Kitty has worked long and diligently on the details of this bill and other transportation matters. We will all sincerely miss her skills, her cooperative, professional attitude, and wish her all of the best in the new path she has chosen.

Mr. President, I recommend this bill for passage as a responsible and comprehensive approach to maintaining and improving the transportation

system we have come to depend upon in this country.

Highlights of the committee's recommended bill include the following: $1.5 billion for Coast Guard operations and $425 million for AC&I of Coast Guard ships and facilities; $2.5 billion for FAA operations; $858 million for facilities, equipment, and research; and $600 million obligation limitation for grants to airports.

Also included is an $8.1 billion highway obligation limitation and a $92.5 million ceiling on highway safety grants to the States.

Mass transit total funding is for $3.4 billion, a reduction of about $90 million over fiscal year 1982 levels.

Funds for Amtrak are included at the fiscal year 1982 level of $735 million.

Other rail activities of the Federal Railroad Administration and related rail activities total $289 million.

Mr. President, we have several general provisions included in the bill which should be highlighted.

We have included a provision to relieve the St. Lawrence Seaway from repayment of its capital construction cost debt, a very important provision for those of us who are interested in the shipment of our grain overseas.

A provision is included which provides that under the 1956 Highway Act funds may not be apportioned to a State with a vehicle width limitation other than 102 inches on certain highways.

Another provision focuses on prompt and fair settlement of disputes over claims for compensation under sections 406 and 419 providing essential air service to small communities. Also included is the termination of the 406 program while we continue to provide payments to air carriers.

Mr. President, this bill is one of compromise. We have tremendous transportation infrastructure needs on the one hand and must be mindful of the need for budgetary restraints on the other. We are $244 million below—I point that out to our colleagues and the press—our 302(b) subcommittee allocation for new budget authority as set forth in the budget resolution.

My colleague and good friend and ranking minority member on this subcommittee, and who in the next Congress will be the ranking minority member overall on the Budget Committee, has cooperated diligently in the way of bringing out an effective bill for the needs of our Nation and still keep within the needed budgetary limitations of our Nation.

If we in the Senate are to maintain control of, and live up to, our responsibilities in the budget process, then the ruling principle must be the budget of our own design and we must follow the subcommittee allocation. Since we are within the budget authority allocation by $244 million and $315 million below the subcommittee's outlay allocation, I am proud to recommend the work of the committee to you today for your approval.

Mr. President, I am glad to yield to the Senator from Florida.

Mr. CHILES. I thank the distinguished chairman.

Mr. President, I rise in support of the statement just made by Senator ANDREWS, chairman of the Appropriations Subcommittee on Transportation. Senator ANDREWS and his staff have worked long and hard on this bill, and their very skillful work is evident throughout the legislation and the accompanying report.

For too long in this country, we have deferred making the necessary investments in our transportation system. The current state of disrepair of our Nation's system of highways and bridges is a fact well known and widely reported by the press. The cost to us as a Nation of deferring these needed investments is beginning to appear in a number of ways, including increased wear and tear on vehicles and an increasing number of accidents. An inadequate transportation system and the ever-increasing downward spiral of deterioration undermines the very commercial fabric of the Nation.

The bill before us attempts to address these problems, and it does so within the limitations imposed by the 1983 Budget Resolution. We have restored funding to the Federal Highway Administration; we have increased funding for mass transit; we have provided increases for the Coast Guard to permit that agency to begin to rebuild its antiquated asset systems; and we have provided the administration with its full request for the Federal Aviation Administration to permit the several airport safety and capacity projects to proceed around the Nation. And we have provided for these essential needs well within our 302(b) spending limitation. In fact, the bill before the members is $243.6 million below our 302(b) allocation.

While I will not attempt to touch on every single item in the bill before us, particularly because Senator ANDREWS, our chairman, has already done that, I would like to mention one particular concern of mine. I know it is a concern of many of our colleagues, not just in the Senate but also in the House. The Coast Guard, which is the fifth branch of the Armed Forces, has been neglected by this and past administrations. It has been plagued by budgetary gamemanship at the departmental level and within OMB. For example, last year when this committee led the effort to provide an adequate level of funding for the Coast Guard to permit it to rebuild its aging fleet of cutters and aircraft, the administration's response was to attempt to force an impoundment of the money. In order to correct this situation, this committee had to lead efforts to seek a GAO investigation and to apply other pressures on the administration to release the money and spend it as was intended by the Congress. It is my hope that we can work together in the future to correct the problems of obsolescence and deterioration that have occurred in the Coast Guard because of years of underinvestment in the agency's asset system. It is also my hope that in that spirit of cooperation the administration will permit Admiral Gracey and other Coast Guard leaders to be forthcoming with Congress in representing and advancing the true needs of the agency.

Mr. President, I urge the Members to support this bill, and I thank the distinguished Chairman for all his courtesies in regard to me and the minority with respect to marking up this bill.

Mr. GORTON. Mr. President, as the distinguished Chairman of the Transportation Appropriations Subcommittee knows, my colleague, the distinguished senior Senator from the State of Washington (Mr. JACKSON), and I are concerned about the $100 million loan guarantee authority under the section 511 Federal Railroad Administration loan guarantee program provided for in the bill. We are concerned that this authority should be equally available to important feeder rail services as well as to larger rail lines. We are especially concerned that small feeder rail services such as, for example, the Seattle and North Coast Railroad, which provides the only rail srvice on the Olympic Peninsula, be able to participate fully in the loan guarantee program. These short-line feeder rail services provide an important contribution to the overall national rail system and to the economy. I am sure the Chairman is fully aware of the need for and contribution of rail services in isolated communities such as those on the Olympic Peninsula. The disruption of this critically needed rail service can have a devastating effect on the people and economy of the communities. Because of the smaller size and large financial needs and requirements, smaller rail carriers may not have access to normal sources of commercial financing. Therefore, they may have a greater need for recourse to the loan guarantee program than many larger carriers. The senior Senator and I want to insure that the loan guarantee appropriations under this bill are intended to aid these essential short-line railroads.

Mr. JACKSON. Mr. President, if the Senator will yield, I should like to concur in the remarks of the distinguished Senator from the State of Washington (Mr. GORTON), about the critical importance of the FRA loan guarantee program for the develop-

ment and rehabilitation of essential small feeder railroads such as the one operating on the Olympic Peninsula in the State of Washington. These services provide significant public benefits by, among other things, decreasing the costs of transportation of consumer products, increasing employment opportunities, attracting new industries, facilitating the development of our Nation's resources, enhancing competition, and providing a vital link for isolated communities to the national rail transportation system.

Mr. ANDREWS. I certainly appreciate and concur in the comments of the distinguished Senators from the State of Washington. I am very aware of the affects of the loss of rail service to local communities and share their concern that such short-line rail services should have full access to the loan guarantee funds that are appropriated under this bill and that are available under section 511.

Mr. FORD. Mr. President, last year, as a result of the air traffic controllers' strike, the Federal Aviation Administration closed 80 control towers at airports across the country. Since that time, approximately 27 towers have been reopened and, last August, Congress passed legislation clarifying the FAA's authority to reopen additional towers. It is my understanding that decisions are expected soon on which additional towers will be opened.

The Owensboro-Daviess County Airport control tower in my State was one of those marked for closure, but the airport managed to remain open after raising funds to lease the tower and hire its own controllers. However, the $100,000 that the Owensboro-Daviess County Airport board raised to operate the tower over the past year is now exhausted.

Federal funding of this airport is vital if it is to remain open. Total operations at the airport are 52,000 flights annually and the closure of the airport would create a major hardship for this community, which is not only the third largest in Kentucky, but a major industrial center as well.

I want to make the distinguished floor manager of this measure aware of this situation. I know that he has both an understanding and an appreciation for the role these medium-size airports play in the Nation's air transportation network, and I hope he shares my sentiments that the FAA will assign a high priority to the reopening of the Owensboro tower, whether it be under a contract or FAA-operated basis.

Mr. ANDREWS. Mr. President, I appreciate the distinquished Senator and his colleague from Kentucky, Mr. HUDDLESTON, bringing this to our attention, and I join him in his assessment that the Owensboro tower should be a high priority.

Mr. HAYAKAWA. Mr. Chairman, I wish to clarify the situation with regard to the acquisition of rights-of-way and relocation for a fixed guideway project in the Guadalup corridor in Santa Clara County, Calif. The preferred alternative has been chosen, the corridor clearly defined, and there is no reason to incure further costly delays of the purchase of the remaining rights-of-way—75 percent of the rights-of-way has already been acquired. Delay in the remaining acquisition would mean escalation of land prices and inflation in the cost of project materials.

There is a further concern regarding a letter of no prejudice for the purchase of rolling stock. Since Santa Clara County has received a preliminary engineering grant, and cleared the draft EIS stage, it is attempting to go ahead with railcare purchase using local money. They have had problems with UMTA but a letter of prejudice would allow them to go ahead and would not necessarily obligate UMTA to make a grant in the future. I wonder if the Senator is aware of these concerns.

Mr. ANDREWS. The Senator from California is correct. I am aware of these concerns and will be working with the Department of Transportation and my colleagues in Congress to address them.

Mr. DOMENICI. Mr. President, H.R. 7019 as reported by the Appropriations Committee on September 16, 1982, provides $11 billion in new budget authority and $7.4 billion in outlays for fiscal year 1983. These amounts exclude highway and transit interstate transfer grants for which full year refunding has already been provided in the continuing resolution, Public Law 97-276.

Mr. President, I support this bill. The reported bill, together with outlays from prior year authority and other action already completed, puts the Transportation Subcommittee over its crosswalk allocation for spending by less than $0.1 billion in budget authority, but is under by $0.3 billion in outlays.

The subcommittee is above the House bill by $0.03 billion in budget authority and $0.1 billion in outlays.

H.R. 7019, as reported, together with other actions already completed, exceed the President's budget request for programs within the sucommittee's jurisdiction by $1.1 billion in budget authority and $0.6 billion in outlays. Part of this overage is due to the fact that the subcommittee recommendation for urban mass transportation programs is $0.3 billion over the President's request. H.R. 7019 provides higher funding levels for mass transit primarily to continue transit operating subsidies, rather than phasing out this program, as the President proposes.

Taking into account the full year appropriation for highway interstate transfer grant program included in the continuing resolution, Public Law 97-276, the subcommittee recommendation for this program exceeds the President's request by $0.4 billion.

The remaining amount by which the subcommittee exceeds the President's request is due to the committee's recommendations of $0.1 billion for Amtrak subsidies and $0.1 billion for Coast Guard's acquisition, construction and improvement (AC&I) programs, above the levels proposed by the President.

With respect to the credit budget, the new direct loan obligations in H.R. 7019 are consistent with the Transportation Subcommittee's crosswalk allocation for credit under the budget resolution. H.R. 7019 brings the Transportation Subcommittee under its crosswalk allocation by $0.2 billion in new primary loan guarantee commitments. The subcommittee will be under the House bill by $0.2 billion in new primary loan guarantee commitments and at the same level for new direct loan obligations. The subcommittee will exceed the President's request for new direct loan obligations by $0.4 billion, and will be under the President's request for new primary loan guarantee commitments by $0.1 billion.

Mr. President, I ask unanimous consent that the two tables showing the relationship of the reported bill to the congressional spending and credit budgets and the President's budget requests be printed in the RECORD at the conclusion of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TRANSPORTATION SUBCOMMITTEE SPENDING TOTALS

[In billions of dollars]

	Fiscal year 1983	
	Budget authority	Outlays
Outlays from prior-year budget authority and other actions completed[1]	0.9	12.5
H.R. 7019 as reported in the Senate[2]	11.0	7.4
Possible later requirements CAB air carrier payments	[3]	[3]
Total for Transportation Subcommittee	11.9	19.8
First budget resolution 302(b) allocation	11.8	20.1
House-passed level[4]	11.6	19.7
President's request	10.7	19.3
Total compared to:		
First budget resolution 302(b) allocation level	+.1	−.3
House-passed level[4]	+.3	+.1
President's request	+1.1	+.6

[1]Adjusted to include $0.9 billion in budget authority and $0.1 billion in outlays to account for full year appropriation of the highway and transit interstate transfer grant programs that are funded for the full year in the continuing resolution, Public Law 97-276.

[2]$0.6 billion in budget authority and $0.1 billion in outlays deducted for highway and transit interstate transfer grant programs that are funded for the full year in the continuing resolution, Public Law 97-276.

[3]Less than $50 million.

[4]Adjusted to include $0.3 billion in budget authority and $0.1 billion in outlays for Federal Aviation Administration (FAA) facilities and equipment; and research, engineering and development as possible later requirements.

Note.—Details may not add to totals due to rounding.

[1] Less than $50 million.

Mr. ANDREWS. Mr. President, I have several amendments at the desk which I ask unanimous consent be considered en bloc.

The PRESIDING OFFICER. The committee amendments will have to be disposed of first.

Mr. ANDREWS. Mr. President, I ask unanimous consent that the committee amendments be agreed to en bloc and that the bill as thus amended be considered as original text for the purpose of further amendment, and that no points of order be considered as waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee amendments agreed to en bloc are as follows:

On page 2, line 7, strike "$27,000", and insert "$35,000".

On page 2, line 10, strike "$37,532,000", and insert "$41,700,000".

On page 2, line 11, strike "$2,220,000", and insert "$4,220,000".

On page 2, line 14, strike "unobligated", and insert "unexpended".

On page 3, line 6, strike "$2,000,000", and insert "$7,800,000".

On page 3, after line 15, insert the following:

"HEADQUARTERS ADMINISTRATION

"For necessary expenses, not otherwise provided for, of providing administrative services at the headquarters location of the Coast Guard, including, but not limited to, executive direction; budget, planning and policy; command, control, communication, and operations; financial management; legal; engineering; civil rights; and personnel and health services for the Coast Guard, $72,440,000.".

On page 4, line 6, strike "$1,587,908,000", and insert "$1,518,963,000".

On page 4, line 7, strike ", together", through and including "pay:".

On page 5, line 3, strike "$287,000,000", and insert "$425,000,000".

On page 5, line 8, strike "$12,700,000", and insert "$12,000,000".

On page 5, line 21, after "services", strike through and including line 23, and insert "$54,000,000".

On page 7, after line 6, insert the following:

"NATIONAL RECREATIONAL BOATING SAFETY AND FACILITIES IMPROVEMENT FUND

"For financial assistance for State recreational boating safety programs to be derived from the National Recreational Boating Safety and Facilities Improvement Fund, in accordance with the provisions of the Recreational Boating Safety and Facilities Improvement Act of 1980 (Public Law 96-451), $10,000,000, to remain available until expended.".

On page 7, after line 15, insert the following:

"HEADQUARTERS ADMINISTRATION

"For necessary expenses, not otherwise provided for, of providing administrative services at the headquarters location of the Federal Aviation Administration, including but not limited to accounting, budgeting, personnel, legal, public affairs, and executive direction for the Federal Aviation Administration, $55,574,000.".

On page 8, line 10, strike "$2,456,783,000", and insert "$2,463,220,000".

On page 8, line 11, strike "$1,000,000,000" and insert "$1,464,150,000".

On page 8, line 12, after "Fund", insert the following: "*Provided*, That, in addition, not to exceed $5,000,000 shall remain available until expended to be derived from the Airport and Airway Trust Fund for reimbursement of expenses incurred by certificated air carriers in the security screening of passengers moving in foreign air transportation: *Provided further*,".

On page 8, line 23, after "program", insert the following: "*Provided further*, That the Federal Aviation Administration shall not undertake any reorganization of its regional office structure or begin any studies dealing with such a reorganization without the prior approval of both House and Senate Appropriations Committees.".

On page 9, line 10, after "and", insert "lease or";

On page 9, line 10, strike "$16,200,000", and insert "$20,310,000";

On page 10, line 3, after "the", insert "lease or";

On page 10, line 4, strike "20", and insert "21";

On page 10, line 6, after "1987" strike through and including line 7, and insert $725,000,000: *Provided*,";

On page 10, line 19, strike "$93,000,000", and insert "$113,000,000";

On page 13, line 8, strike "$188,500,000", and insert "$191,562,000";

On page 13, line 13, strike "$33,000,000", and insert "$38,000,000";

On page 13, line 19, strike "$11,600,000", and insert "$11,705,000";

On page 14, after line 7, insert following:

"HIGHWAY BEAUTIFICATION

"For necessary expenses in carrying out section 131 of title 23, U.S.C. and section 104(a)(11) of the Surface Transportation Assistance Act of 1978, $500,000 to remain available until expended.".

On page 15, strike lines 1 through and including line 6.

On page 15, line 23, strike "$500,000,000", and insert "$375,000,000".

On page 16, line 7, strike "$70,000,000", and insert "$78,133,000".

On page 16, line 8, strike "$19,949,000", and insert "$22,794,000".

On page 16, line 10, strike "$25,000,000", and insert "$29,724,000".

On page 16, line 11, strike "$8,374,000", and insert "$9,869,000".

On page 16, line 12, "Fund", strike through and including line 15.

On page 17, line 4, strike "$12,322,000", and insert "$15,241,000".

On page 17, line 8, strike "$23,232,000", and insert "$28,000,000".

On page 17, line 9, strike "$1,000,000", and insert "$4,800,000".

On page 17, line 13, strike "$17,000,000", and insert "$20,000,000".

On page 17, line 21, strike "$30,840,000", and insert "$31,675,000".

On page 18, line 8, strike "PROTECTION", and insert "ASSISTANCE",

On page 18, strike line 9.

On page 18, line 13, after "expended", strike through and including "States", page 19, line 1.

On page 19, line 1, strike strike *"further"*.

On page 19, line 22, strike "$788,000,000", and insert "$735,000,000".

On page 20, line 12, after "665", strike through and including line 18.

On page 20, strike line 21, through and including page 21, line 4, and insert the following:

"For necessary expenses to carry out the commuter rail activities authorized by the Northeast Rail Service Act of 1981, $75,000,000 to remain available until expended, to be derived from the unobligated balances of "Payments for purchase of Conrail securities"."

On page 22, after line 2, insert the following:

"PAYMENTS TO THE ALASKA RAILROAD

"REVOLVING FUND

"For payment to the Alaska Railroad Revolving Fund for capital replacements, improvements, operations and maintenance, $49,575,000, to remain available until expended.".

On page 22, line 22, strike "$770,000,000", and insert "$600,000,000".

On page 22, line 24, strike "$275,000,000", and insert "$100,000,000".

On page 22, after line 25, insert the following:

"REDEEMABLE PREFERENCE SHARES

"The Secretary of Transportation is hereby authorized to expend proceeds from the sale of fund anticipation notes to the Secretary of the Treasury and any other moneys deposited in the Railroad Rehabilitation and Improvement Fund pursuant to sections 502, 505-507, and 509 of the Railroad Revitalization and Regulatory Reform Act of 1976 (Public Law 94-210), as amended, and section 803 of Public Law 95-620, for uses authorized for the Fund, in amounts not to exceed $10,000,000.".

On page 23, line 23, strike "$28,250,000", and insert "$28,081,000".

On page 24, line 16, strike "$1,630,000,000", and insert "$1,621,700,000".

On page 25, line 5, strike "$32,000,000", and insert "$68,500,000".

On page 25, line 7, after "apportioned", and insert "and allocated".

On page 25, line 8, after "using", strike through and including line 9, and insert "data from the 1980 decennial census".

On page 25, line 15, strike "$1,300,000,000", and insert "$1,200,000,000".

On page 25, line 18, after "the", strike through and including "the" line 20.

On page 26, line 4, after "evaluation", strike through and including line 9.

On page 27, line 3, strike "$365,000,000", and insert "$225,000,000".

On page 27, line 7, strike "$230,000,000", and insert "$250,000,000".

On page 28, line 15, strike "$20,022,000", and insert "$21,300,000".

On page 29, line 8, strike "$1,900,000", and insert "$2,020,000".

On page 30, line 1, strike "$5,000", and insert "$4,000".

On page 30, line 2, strike "$24,350,000", and insert "$21,000,000".

On page 30, line 6, strike "section 406 and".

On page 30, line 7, strike "1376 and".

On page 30, line 9, after "expended", strike through and including line 24, "payments", and insert the following: "and such amounts as may be necessary to liquidate obligations incurred prior to September 30, 1982, under 49 U.S.C. 1376 and 1389: *Provided,* That notwithstanding any other provision of law, none of the funds hereafter appropriated by this or any other Act shall be expended under section 406 (49 U.S.C. 1376) for services provided after September 30, 1982: *Provided further,* That, notwithstanding any other provision of law or of the previous provision of this paragraph, payments shall be made from funds appropriated herein and in accordance with the provisions of this paragraph to carriers providing, as of September 30, 1982, services covered by rates fixed under section 406 of the Federal Aviation Act (excluding services covered by payments under section 419(a)(7) and services in the State of Alaska): *Provided further,* That, notwithstanding any other provision of law, such payments shall be based upon rate orders applicable to such carriers as of July 1, 1982, but shall not exceed $13,500,000 in the aggregate: *Provided further,* That, notwithstanding any other provision of law, to the extent necessary to meet this limitation, such payments shall be reduced by a percentage which is the same for all carriers eligible for such payments: *Provided further,* That nothing in this Act shall be deemed to prevent the Board from granting an application under section 419(a)(11)(A) (49 U.S.C. 1389) pertaining to a carrier receiving compensation under this Act, in which event the standards and procedures set forth in section 419(a)(11)(A) shall apply.".

On page 32, line 6, strike "$66,300,000", and insert "$65,600,000".

On page 32, strike line 7, through and including line 12, *"further".*

On page 33, line 2, after "5902", insert the following: "official reception and representation expenses of the Board".

On page 33, line 4, after "administrator", insert the following: "exclusive of wages which shall be an operating expense of the Commission".

On page 33, line 7, after "expenses", insert "of the Administrator".

On page 33, line 16, strike "$392,084,000", and insert "$410,402,000".

On page 33, line 17, after *"Provided",* strike through and including *"further",* page 34, line 18.

On page 35, line 1, after "agencies", insert the following: *"Provided further,* That, to the extent that the resources of the Fund are not adequate to provide the amount of budget authority provided above, the Commission may incur obligations in advance of adequate receipts in the Fund.".

On page 35, line 12, strike "$24,666,000", and insert the following: "for payment of liabilities of the Panama Canal Company and Canal Zone Government that were pending on September 30, 1979, or that have accrued thereafter; to improve facilities of other United States Government agencies in the Republic of Panama and facilities of the Government of the Republic of Panama for Panama Canal Commission use, $29,024,000: Provided,".

On page 35, strike line 19 through and including *"further",* page 36, line 1.

On page 36, strike line 4, through and including line 10.

On page 36, after line 10, insert the following:

"DEPARTMENT OF THE TREASURY

"OFFICE OF THE SECRETARY

"INVESTMENT IN FUND ANTICIPATION NOTES

"For the acquisition, in accordance with section 509 of the Railroad Revitalization and Regulatory Reform Act of 1976, as amended, and section 803 of Publc Law 95-620, of fund anticipation notes, $10,000,000.".

On page 36, line 23, strike "$2,000,000", and insert "$2,950,000".

On page 38, line 3, strike "$100,000,000", and insert "$92,500,000".

On page 40, line 19, strike "Law", and insert "Laws 97-125 and ".

On page 40, line 22, strike "$8,000,000,000", and insert "$8,100,000,000".

On page 41, line 10, strike "or allocated".

On page 41, line 13, strike "or allocated".

On page 42, line 1, strike "or allocated".

On page 42, line 10, strike "year", through and including "Code", line 13, and insert "year;".

On page 42, strike line 16, through and including line 19, and insert the following:

SEC. 311. Notwithstanding any other provision of law, any bond issued under section 5 of the Act of May 13, 1954 (68 Stat. 94; 33 U.S.C. 985), is hereby canceled together with the obligation to pay such bond and section 12(b)(5) of such Act is hereby repealed: *Provided,* That paragraphs (10), (11), and (12) of section 4 of the Act of May 13, 1954, are hereby redesignated as paragraphs (11), (12), and (13) respectively and a new paragraph (10) is enacted to read as follows:

" '(10) may retain toll revenues for purposes of eventual reinvestment in the Seaway.'.".

On page 45, after line 17, insert the following:

"SEC. 321. Notwithstanding any other provision of law, no funds authorized to be appropriated for any fiscal year under provisions of the Federal-Aid Highway Act of 1956 shall hereafter be apportioned to any State which imposes a vehicle width limitation of more or less than 102 inches on any segment of the National System of Interstate and Defense Highways, or any other qualifying Federal-aid highways as designated by the Secretary of Transportation, with traffic lanes designed to be a width of twelve feet or more: *Provided,* That notwithstanding any other provision of law, certain safety devices which the Secretary of Transportation determines as necessary for safe and efficient operation of motor vehicles shall not be included in the calculation of width: *Provided further,* That, notwithstanding any other provision of law or of this paragraph, a State may grant special use permits to motor vehicles that exceed 102 inches: *Provided further,* That, notwithstanding any other provision of law, no withholding of apportionment shall be imposed upon a State by virtue of the provisions of this paragraph prior to October 1, 1983.

"SEC. 322. (a) Any air carrier having a claim for compensation under section 406 or 419(a)(7)(B) of the Federal Aviation Act of 1958, may appeal from a decision of the Civil Aeronautics Board (hereinafter referred to as the "Board") to the United States Court of Claims as provided in section 8(g)(1) of the Contract Disputes Act of 1978 with respect to claims which have been decided by an agency board of contract appeals. Failure by the Board to issue a final decision on a final claim within one year after it was filed with the Board, or by the date of enactment of this section, whichever is later, shall be deemed to be a decision by the Board denying the claim, and will authorize an appeal on the claim as provided in this section. This section shall apply to any claim decided, or deemed to have been decided, by the Board after January 1, 1981, including any claim remanded to the Board by a United States court of appeals, irrespective of when the claim was filed with the Board. Any appeal under this section shall be filed within one hundred and twenty days after the claim has been decided or is deemed to have been decided by the Board, or within one hundred and twenty days after the date of enactment of this section, whichever is later. Any petition for review of a decision of the Board with respect to any such claim pending in a United States court of appeals on the date of enactment of this section shall be dismissed without prejudice upon motion of the petitioner.

"(b) Except as provided herein, the following provisions of the Contract Disputes Act of 1978 shall apply with respect to any claim to which this section applies as if such claim were a claim with respect to a contract appealed by a contractor under section 8(g)(1) of such Act and as if the Board were an agency board of contract appeals:

"(1) Section 10(b), relating to scope of review by the Court of Claims.

"(2) Section 10(c), relating to disposition of the case by the Court of Claims.

"(3) Section 12, relating to interest, which shall be payable by decision of the Board or the Court of Claims at the rates provided in such section from the date of the claim was filed with the Board.

"(4) Section 13, relating to the payment of claims and judgments.

"(5) Section 14(i), relating to the jurisdiction of the Court of Claims.

"(c) If an administrative law judge has issued an initial decision in the case before the Board, the court may, in its discretion, give such initial decision the same weight it would give to a decision by a trial judge of the Court of Claims.

"SEC. 323. None of the funds provided in this Act to any department or agency may be expended for the transportation of any officer or employee of such department or agency between his domicile and his place of employment, with the exception of the Secretary of the Department of Transportation, who, under title 5, United States Code, section 101, is exempted from such limitations.

"SEC. 324. No part of any appropriation contained in, or funds made available by this Act, shall be available for any agency to pay to the Administrator of the General Services Administration a higher rate per square foot for rental of space and services (established pursuant to section 210(j) of the Federal Property and Administrative Services Act of 1949, as amended) than the rate per square foot established for the space and services by the General Services Administration for the current fiscal year and for which appropriations were granted: *Provided,* That no part of any appropriation contained in, or funds made available by

this Act, shall be available for any agency to pay to the Administrator of the General Services Administration a higher rate per square foot for rental of space and services (established pursuant to section 210(j) of the Federal Property and Administrative Services Act of 1949, as amended) than the rate per square foot established for the space and services by the General Services Administration for the fiscal year 1982.

"SEC. 325. None of the funds provided by this Act shall be used by the Civil Aeronautics Board to substitute aircraft of lesser seating capacity or lesser than necessary pressurized altitude capability, for the type of aircraft now prescribed for essential air transportation to any point in Alaska as set forth in Civil Aeronautics Board Order 80-1-167 without the prior concurrence of the applicable State agency of the State of Alaska.".

On page 49, strike line 19, through and including page 50, line 13.

UP AMENDMENT NO. 1406

(Purpose: Technical amendments to conform to continuing resolution (P.L. 97-276))

Mr. ANDREWS. Mr. President, I have several amendments at the desk which I ask unanimous consent to be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendments will be stated.

The assistant legislative clerk read as follows:

The Senator from North Dakota (Mr. ANDREWS) proposes an unprinted amendment numbered 1406.

Mr. ANDREWS. Mr. President, I ask unanimous consent that reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments are as follows:

On page 15, delete lines 21 through 24.
On page 27, delete lines 1 through 4.
On page 25, strike line 12.

Mr. ANDREWS. Mr. President, these amendments are technical in nature and are necessary to bring this bill into conformance with actions taken on the continuing resolution before the recess.

Specifically, Mr. President, the two amendments delete funding for interstate transfer grants from this bill, because full-year funding for these grants was included in the continuing resolution. Thus the amendments would keep us from funding the same program twice in the same year.

Finally, the third amendment merely corrects a typographical omission.

Mr. President, these are technical amendments necessary to avoid waste and confusion in the aftermath of the continuing resolution, and I ask for their favorable consideration.

The PRESIDING OFFICER. Without objection, the amendments are agreed to en bloc.

Mr. ANDREWS. Mr. President, I am glad to yield to the Senator from New York.

UP AMENDMENT NO. 1407

Mr. D'AMATO. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New York (Mr. D'AMATO) proposes an unprinted amendment numered 1407.

Mr. D'AMATO. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place insert the following:

SEC. . No funds appropriated under this Act shall be expended to pay for any travel by the Administrator of the Federal Aviation Administration or his immediate staff as passengers or crew members aboard any Department of Transportation aircraft to any destination served by a regularly scheduled air carrier: *Provided,* That this limitation shall not apply if no regularly scheduled carriers' flight arrives at the destination of the Administrator or member of his immediate staff within six hours local time of the desired time of arrival: *Provided further,* That this limitation shall not apply to costs incurred by any flight certified in writing by the Administrator to be solely for the purpose of inspecting, investigating, or testing the in-flight operation of any aspect of the Federal Aviation Administration system designed to aid and control air traffic: *Provided further,* That such written certifications shall be made readily available to Congress and the general public.

Mr. D'AMATO. Mr. President, on Thursday, September 23, Mr. Donald Horan of the GAO testified before the House Subcommittee on Legislation and National Security of the full Committee on Government Operations. Mr. Horan's testimony dealt with the management of aircraft by Federal civilian agencies, or, I should say, the mismanagement of aircraft by Government agencies.

The amendment I have sent to the desk is designed to address a key abuse of aircraft operations by the Federal Aviation Administration, an agency which figured prominently in the GAO testimony.

Mr. President, the day following the testimony by Mr. Horan, several newspapers carried stories citing some of the abuses which surfaced during the hearing. After reading these accounts, I requested and received an in-depth briefing by the GAO on this matter. I am sorry to report that the newspaper accounts only scratched the surface. Thousands upon thousands of dollars are being wasted by the FAA on passenger flights with absolutely no regard for cost control and prudent management. Most of the trips which were taken by the administrator of the FAA were to locations served by more economical commercial airlines. according to GAO, from October to December of 1981, 181 or 82 percent of the 222 FAA headquarter passenger flights were to destinations readily served by commercial airlines.

The FAA Administrator did not take a single commercial flight within the United States for his official business during his first 8 months in office. Travel records at the FAA indicate that the agency's Lockheed Jetstar and the seven passenger Cessna 550 Citation aircraft were used at a cost of $417,000. Commercial transportation was available for most of these trips and would have cost less than $13,000. Use of these planes alone therefore placed an unnecessary additional $404,000 burden on the American taxpayer.

The GAO, has cited some classic examples of gross mismanagement on the part of the FAA and its Administrator. For example, during 1981, the administrator made two trips to Alaska on the Lockheed Jetstar. On both occasions, the plane was parked in Anchorage and the FAA then used a rented Lear Jet and Cessna to transport the Administrator, his wife, and party within the State. Use of the Jetstar alone on these trips cost $100,000 when the Administrator could have made these trips on commercial airlines for $1,900 or a difference of $98,000.

On November 6, 1981, the FAA Administrator, his wife, and several other individuals flew the Lockheed Jetstar, which costs $3,070 an hour to operate, on a trip from Phoenix, Ariz. to Scottsdale, Ariz., a trip which is approximately 20 miles. The cost to the taxpayers for this short trip which could easily have been made by car was an astounding $2,149. Mr. President, especially in this time of fiscal restraint, the Congress simply cannot condone this type of wasteful extravagance on the part of high governmental officials.

Unfortunately, the litany of abuses does not stop here. On October 20, 1981, the Administrator and his wife flew the Jetstar to Las Vegas with the wife of an Associate Administrator, The Associate Administrator was already in Las Vegas attending an air traffic control conference. The Associate administrator's wife and another official got off the jet in Las Vegas. Within a half-hour, the Jetstar left for Washington, D.C. stopping on the way to Kansas and Missouri. On October 28, the Jetstar left for San Diego with the Administrator and his wife. The next morning, the aircraft left at 7:45 A.M. with the Administrator and his wife who had traveled to San Diego from Las Vegas. The Jetstar returned to Washington, D.C. after a 7-hour stopover in Reno, Nev.

The total cost of the trip was $70,000. Commercial air transporta-

tion would have cost about $2,300 or a difference of $67,700.

Mr. President, the purpose of my amendment is simple. It is to put an end to the wasteful behavior which has been going on at the Federal Aviation Administration. The amendment compels the FAA Administrator and his immediate staff to use commercial transportation when available. When, however, a regularly scheduled commercial carrier cannot get the Administrator and his staff to their destination within 6 hours of the desired time of arrival, this amendment does not apply.

In response to the GAO testimony, an FAA spokesman stated that the Administrator must fly FAA aircraft to "evaluate the safety and integrity of the national airspace system." However, an examination of the travel log of the Jetstar belies the claim made by the FAA. In fiscal year 1981, the Jetstar flew 375 hours at a cost of $1.151 million. FAA records show that 0 hours were devoted to evaluation.

The FAA also uses its aircraft to maintain FAA pilot's flying proficiency. On numerous occasions, the three headquarters Jetstar pilots were precluded from achieving the necessary flight time to remain "current" because the Administrator piloted the Jetstar while they were aboard. In fact, the Administrator piloted the aircraft 127.4 hours of the 141.1 hours he was on board the aircraft. The other three pilots who were on board piloted the aircraft only 13.7 hours. It is no small wonder therefore that 70 percent of the FAA headquarters pilots had not achieved the annual currency requirement.

After evaluating this horrendous situation, I seriously question whether the Administrator needs an aircraft which cost the taxpayers over $1.15 million to operate. As I stated, the aircraft was only in operation some 375 hours during fiscal year 1981. After subtracting that time which would have been spent on commercial flights, the time becomes much less. The Congress should evaluate whether there is even a need for the Jetstar and other FAA aircraft.

I have spoken with the chairman of the Transportation Appropriations Subcommittee, my good friend from North Dakota, who shares my concern with this severe problem. He believes, as do I, that in this time where Americans are being asked to tighten their belts we can expect no less from those entrusted to operate the Government. Likewise, I have cleared this amendment with the senior Senator from Florida, ranking minority on the subcommittee.

Mr. President, these abuses must be stopped.

Mr. ANDREWS. Mr. President, we will not object to this amendment at this time. I share the concern of the Senator from New York over matters of this nature, and I think it is a worthwhile concern which we should take to conference.

The PRESIDING OFFICER. the question is on agreeing to the amendment.

The amendment (UP No. 1407) was agreed to.

Mr. D'AMATO. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ANDREWS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Who seeks recognition?

Mr. ANDREWS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ANDREWS. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ANDREWS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. EAGLETON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, I rise in opposition to section 321 of the bill which would mandate an increase in truck width. I shall be very brief on this point before I make my point of order.

Mr. President, as the Members of this body will recall we voted on precisely this issue of wider trucks on October 1 of this year as part of the highway authorization bill. The Senate turned down the amendment to impose a mandatory 102-inch-wide truck standard on all the States. Instead, it agreed to my substitute which made the 102-inch standard permissive but not mandatory or obligatory.

Yet, here we stand again today debating the very same issue when other pressing matters affecting the well-being of this country such as creation of jobs, control of natural gas prices and various appropriations bills stand waiting. Beyond that question of priorities I would note two other circumstances which make this a most inappropriate issue to come before the Senate at this time.

The first is that the matter of truck widths together with truck weights and truck lengths is part of the administration's comprehensive highway jobs bill on which the Finance Committee is holding hearings presumably this very moment. Truck widths will be considered in this lameduck session but only in conjunction with higher user charges to correct what the Department of Transportation says is an unfair sharing of highway maintenance costs. Heavy trucks do not now pay their fair share. Under the administration's highway bill they would be required to pay higher user fees and we should not now be considering dealing with that issue in a piecemeal fashion.

The second circumstance that makes this section inappropriate is that it is clearly legislation in an appropriations bill and contrary to the rules of the Senate. Under normal circumstances, I would be hesitant to make this point of order. I would be willing to allow my colleague from North Dakota to have an up or down vote on the merits. But the fact is we already had an up or down vote on October 1 and the proposed width standard was defeated. The fact is we will have another up or down vote as part of the overall highway package, and my guess is in that context it will be approved. That is the way we should deal with this issue, not separate and apart from everything else as a little section of an appropriations bill, but as one part of a much larger highway issue.

For that reason, Mr. President, I wish to raise a point of order against section 321 of the committee reported bill on grounds that it constitutes legislation in an appropriations bill contrary to Senate rule XVI and ask for the ruling of the Chair.

The PRESIDING OFFICER (Mr. HAYAKAWA). The Senator from North Dakota.

Mr. ANDREWS. Mr. President, this particular provision is not without precedent in the Senate. We have done this any number of times on appropriation bills.

Mr. President, the discussion that was held before was held on another bill, and this is the bill that it was integral to originally.

Mr. President, under the rule I raise the question of germaneness.

The PRESIDING OFFICER. Under rule XVI the Chair submits the question of germaneness to the Senate.

Mr. ANDREWS. Mr. President, I ask for the yeas and nays on the question of germaneness.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is not debatable.

The question is, Is section 321 germane? On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Alabama (Mr. DENTON), the Senator from New Mexico (Mr.

DOMENICI), and the Senator from Arizona (Mr. GOLDWATER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Arkansas (Mr. BUMPERS), the Senator from Colorado (Mr. HART), and the Senator from South Carolina (Mr. HOLLINGS) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 67, nays 27, as follows:

[Rollcall Vote No. 392 Leg.]

YEAS—67

Abdnor	Gorton	Mitchell

NOT VOTING—6

Bumpers	Domenici	Hart
Denton	Goldwater	Hollings

The PRESIDING OFFICER. On this vote, there are 67 yeas, 27 nays. Section 321 is germane and the point of order falls.

UP AMENDMENT NO. 1408

Mr. EAGLETON. Mr. President, I have an amendment which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Missouri (Mr. EAGLETON) proposes an unprinted amendment numbered 1408.

"On page 45, beginning with line 18, strike all through line 12 on page 46."

Mr. SCHMITT. Mr. President, I ask unanimous consent that I be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. I thank my colleague.

Mr. President, we have just had a vote on a procedural matter, a parliamentary matter. Senator ANDREWS' side carried the day, so we are now on the merits. I shall speak for just a few minutes and perhaps my colleague from New Mexico will, as well, of course, Senator ANDREWS. So I expect another vote on the substance of this issue in the not too distant future.

Let us go directly to the merits. What section 321 of this bill purports to do and will, in fact, do is mandate immediately wider trucks on America's highways. Think of that, Mr. President. It has just been within recent days that the President of the United States and the Secretary of Transportation of the United States, Mr. Drew Lewis, and Governors from practically all the 50 States—people who have spent their lives dealing with roads and highways—all these people from the President on down have been on nationwide television saying the infrastructure of America is crumbling. Our roads and our bridges are in abominable shape. In some areas of the country, they are so dangerous as to threaten life and limb. In some areas of the country, cars and trucks have to slow down to 12 miles per hour because the roads are in such decadent shape.

Everyone around Congress, although they may disagree with a 5-cent gasoline tax or an oil import fee or with some other funding methodology, agree that Drew Lewis is right on his factfinding that America's highways are a shambles.

One of the alternatives being suggested is a 5-cent gas tax to help alleviate, rectify, or ameliorate the problem. Another suggestion is that if we are going to make colossal trucks super duper colossal, they are going to have to pay some user fees for doing that, because they are going to be further ripping up the highways that we are spending these billion of dollars to repair.

So, Mr. Lewis has properly said, if you are going to continue to louse up our highways, you are going to have to pay something for the privilege of so doing. That is what user charges are.

That is not a very happy choice, even on those terms. But what my distinguished colleague from North Dakota proposes to do is get bigger trucks now and they do not pay a dime. Good old USA, Inc. Let those monsters roll down the highways tomorrow. Let them chew them up and do not ask them for a penny, those poor little old boys that just chew up our highways.

Why, what made America great? Big, bigger, and biggest trucks. Poppycock.

If we are going to go along with the Andrews proposal and say, let those "Big Berthas" roll, I think we are just silly not to extract some payment for the abuse that these behemoths are going to inflict on America's highways.

So the vote on the merits on this issue, Mr. President, is on whether you want to hand it to bigger trucks on a silver platter, free of charge, or do you want to wait for another day coming in this lameduck session, when we can at least get something for the misery they are going to inflict?

We used to have a bunch of highway bandits back in the old days. Under these circumstances, I think this proposal gets close to highway robbery. So when we cast our yea or nay vote in a few moments. We should decide whether we want to be a witting or unwitting participant in this form of highway banditry.

I yield the floor.

Mr. DOLE. Will the Senator yield before he relinquishes the floor?

Mr. EAGLETON. Yes.

Mr. DOLE. Mr. President, I commend the distinguished Senator from Missouri because we are right now about ready to go into markup on the gas tax. If you give the truckers all they want today, they will not even want to pay the tax, I assume, by the time we get to the markup.

Mr. EAGLETON. Absolutely. I would not either if I could get it free of charge from Senator ANDREWS.

Mr. DOLE. A free ride.

Mr. EAGLETON. A free ride.

Mr. DOLE. Right, So I just hope, when we vote on this, we understand that there are negotiations going on right now with the truckers and the members of the tax-writing committees and Secretary Lewis and others who have an interest in this. We are not trying to be unduly harsh on the trucking industry. We understand, perhaps, the necessity of the legislation but not unless there is some adjustment in the tax.

I think we have the cart before the horse. If we had the tax bill passed, then this might be appropriate. But it seems to me that if I were in the trucking business, this is perfect; you can have it both ways.

If in fact the highways are in shambles—and they are in shambles; there is total agreement on that—and if in fact the truckers have at least some impact on the destruction of the highway system and the infrastructure, then we ought to be fair and objective in how we approach the so-called user fee. We have not yet made that judgment, so I do not think we should make this judgment.

I appreciate the Senator from Missouri yielding.

Mr. JOHNSTON. Mr. President, will the Senator yield to me 60 seconds and let me set the matter aside to get to an agreed-upon amendment?

Mr. EAGLETON. Surely.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside in order to take up an agreed-upon amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1409

(Purpose: To allocate funds for a study by the National Academy of Sciences for the purpose of studying wind shear and for increasing the number of windshear sensors at Moisant Airport, Kenner, La.)

Mr. JOHNSTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Louisiana (Mr. JOHNSTON) proposes an unprinted amendment numbered 1409.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 9, line 2, insert the following before the period: ": *Provided further,* That not to exceed $500,000 of the total amount available for operation shall be obligated for a contract with the National Academy of Sciences and the FAA Administrator shall enter into an agreement with the National Academy of Sciences to study the state of knowledge, alternative approaches and the consequences of wind shear alert and severe weather condition standards relating to take-off and landing clearances for commercial and general aviation aircraft: *Provided further,* That the Academy shall complete the study within six months after funding arrangements have been made: *Provided further,* That the FAA Administrator shall report to Congress within 30 days regarding the status of the contractural arrangements and the conditions necessary to implement the agreement with the National Academy of Sciences: *Provided further,* That the Department of Transportation shall furnish to the National Academy of Sciences any information which the Academy determines to be necessary for the purpose of conducting the study: *Provided further,* That not to exceed $150,000 of the funds provided to the Federal Aviation Administration in this Act shall be available for doubling the number of windshear sensors at Moisant Airport in Kenner, Louisiana".

Mr. JOHNSTON. Mr. President, what this amendment does is to provide $500,000 for a windshear study to be done by the National Academy of Sciences and the FAA Administrator. It requires the study to be completed within 6 months. It also requires that the FAA Administrator report to the Congress within 30 days regarding the status of the contractual arrangements and conditions necessary to implement the agreement with the National Academy of Sciences.

It further provides $150,000 of the funds provided to the FAA in the act be available for doubling the number of windshear sensors at Moisant Airport in New Orleans.

Of course, what we have, Mr. President, is some attempt to get on with the business of determining the causes of windshear, to determine what should be the best reaction of the Federal Government, particularly the FAA, to windshear which, of course, caused that serious accident in New Orleans, and $150,000 to double the number of windshear sensors at New Orleans.

I thank the distinguished Senator from North Dakota.

Mr. ANDREWS. Mr. President, our colleague from Louisiana has brought up an excellent amendment. The need is certainly there. It is an amendment that we are glad to accept and take to conference to try to work out. I appreciate his bringing it before the Senate.

The amendment (UP No. 1409) was agreed to.

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from Missouri.

UP AMENDMENT NO. 1408

Mr. SCHMITT addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. SCHMITT. Mr. President, just very briefly, the Senator from Missouri and I have joined on this issue before. He has expressed the correct position. The Senate took that position in a vote just a few weeks ago. The situation has changed to the extent it was expressed by the Senator from Kansas (Mr. DOLE). This is not an action that should be taken in a vacuum, not an action that should be taken in the absence of Senate consideration of the so-called gas tax.

The fundamental technological fact is that unless the vast majority of the trucks in a particular location or State are at their maximum weight limits, the increase in truck width will increase the average axle loading of trucks now on the highways because more of them will be able to fill with more goods and the rate of deterioration of the highways will increase by power functions, that is, exponentially. It is not a geometric increase, it is an exponential increase.

Until we have in place the mechanism for the rejuvenation of our highway system, we will be going downhill faster rather than actually repairing that system.

I compliment the Senator from Missouri on his initiative. I hope the Senate will once again reaffirm its position as it did just a few weeks ago in opposition to the position taken in the bill sponsored by the Senator from North Dakota.

Mr. STAFFORD. Will the distinguished Senator yield to me very briefly?

Mr. SCHMITT. I will be happy to yield to the distinguished Senator from Vermont.

Mr. STAFFORD. Mr. President, I feel constrained to join with the distinguished Senator from New Mexico and the Senator from Missouri in opposition to the language proposed which would, as I understand it, increase truck widths up to 102 inches on interstate highway systems.

As has been said earlier, this is a subject which should be addressed in connection with the administration's proposal of an increase in the gas tax and consideration at that time of the possibility of increasing the dimensions for trucks traveling upon our highways.

This matter was disposed of on October 1 of this year by the Senate. As I said in the debate at that time and point out again today, in the view of this Senator clearly this action at this time is an invasion of the jurisdiction of the Committee on Environment and Public Works, which I have the privilege of chairing. Therefore, I feel, not only for the jurisdictional grounds of my committee but also because of the pending legislation with respect to a rise in the fuel tax and the consideration of truck dimensions at that time, this is not the time to either invade my committee's jurisidiction or to prematurely address the question of truck widths. I therefore support the amendment of the Senator from Missouri.

I thank the Senator for yielding.

Mr. ANDREWS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Dakota.

Mr. ANDREWS. Mr. President, I rise in opposition to the amendment. I should like to set the record straight. This is a "lameduck" session. It does not mean we have to have a "dumbduck" session. With some of the statements that have been made, one would think we were going to increase the weight limit on these trucks. We are not.

This is not a trucker amendment. This is a consumer amendment. There is a whale of a lot of difference between a trucker amendment and a consumer amendment. I suggest to my colleague from Kansas, who travels from one corner of this country to the other since he is a national legislator, that he should spend a little time stopping in at some of the truckstops and visiting with some of the farmers and some of the food processing companies and find out what problems they have.

The truckers want heavier trucks, sure. The consumers and the grocery manufacturers and the forest products producers and the rest need trucks that are a little wider so they work and function better. They can save $3.5 billion per year to the consumers of food products in this country by this simple expedient of updating the present mandatory language that has been around for more than 20 years that says truck trailers shall be mandated at 96 inches on 22-foot highways.

Mr. President, all we do is update an out-of-date, mandated law by bringing it into this decade, the decade of the

eighties, and saying it is long past due that on our present 24-foot highways we have 102-inch trailers. We now have 102-inch buses. 102-inch trailers are necessary, Mr. President, because of a unique situation.

Truckers got flimflammed by the railroads a long time ago when they set truck widths at 96 inches. Somebody must have been asleep, because 96 inches in exactly the double-pallet size of standard pallets that have been effective in this country since the turn of the century. That is exactly the width of the inside of a railroad boxcar. By mandating it for the outside width of a trailer, pallets cannot be loaded side by side. Truckers do not care: They get paid even if it takes more trucks to haul a given volume.

The people who ship, the farmers who want to get the products of their fields to the consumers of this country, pay through the nose by getting less for their crops because they cannot get two 4-foot-wide pallets into the present-day trailer trucks. That is why this amendment was brought up.

Those of us on the Appropriations Committee continually appropriate dollar after dollar after dollar, and too often I think the people back home think we have our heads in the sand and do not think much about what can be done to update, to make savings, and to make better use of what we have in this country.

This action by the Appropriations Committee, approved by an overwhelming vote—by 17 to 4 in committee—does just that. We take a look at present conditions. We find a saving of $3.5 billion in the food industry and the forest products homebuilding industry, two of the most depressed industries in this country, and we bring it to the floor of the Senate in order for it to be acted on, to give some relief to the general public, the consumers of this country. I think it is necessary and long overdue.

There is not one pound increase in trucking weight in this amendment. That should be left up to the appropriate legislative committees to decide when they want to do that, when they get an addtional fee from the truckers. This is a consumer-type amendment.

Mr. SCHMITT. Mr. President, will the Senator yield?

Mr. ANDREWS. I yield.

Mr. SCHMITT. The Senator has talked about great savings for the consumer, and I agree that at the proper time we should do this, when the roads of the country are ready. But how are you going to achieve those savings without having more goods in each truck? That is where the weight increase comes in.

Mr. ANDREWS. My distinguished friend is one of our noted engineer-astronauts. I am a country guy, but we have to be practical in the country, too.

When we load a truck at a more proper weight, that truck flows over the highway with much less damage to the highway, if the load limits and the weight restrictions are proper, than does an empty truck. Anybody who has driven behind an empty truck on a highway has seen that thing bounce up and down like a triphammer, banging up the concrete or the asphalt.

These trucks cube out before they gross out. If you can get more satisfactory loads on the trucks, there are fewer trucks on the highway, and that saves deterioration of the highways and saves the additional accumulation of more vehicles per given highway mile at one time.

Mr. SCHMITT. If the Senator will yield—and I appreciate his yielding—the engineering facts are that it is the average axle load, not the total weight of the truck, that causes the increased wear and tear; and you are going to increase average axle load by what the Senator has described.

If the Senator can tell me that it is going to take four times less trucks, then he has a case. But I do not think the Senator can tell me it is going to take four times less trucks to move the same amount of goods. That is what exponential increase in road deterioration means.

Mr. ANDREWS. I assure the Senator from New Mexico that they might get 15 to 20 percent more in each truck if you are talking about noodle products, which we produce in North Dakota, or plywood products, which they produce in Montana. They can get additional weight, but that additional weight is going to be under the gross weight limit for that truck, and it means there will be fewer trucks going down the road.

If the Senator is attacking the total gross weight figures as being destructive, that is a different subject, which we are not addressing. We are saying there is no sense having these trucks going back and forth across the highways not properly loaded because we do not have the proper widths in the trailers.

Mr. SCHMITT. The issue is not gross weight. If I recall correctly, 60 percent—anyway, the vast majority of trucks on the highway are not at their gross weight. But if you fill them up, the total weight is going to increase.

The Senator and I obviously have a different perspective on this problem, and I appreciate the discussion.

Mr. ANDREWS. The Senator is correct—we do have a different opinion of this problem.

I point out that there are a lot more industries affected by this measure than just the few that might be readily apparent. When Pan Am lands a 747 cargo plane in New York, that load is in 96-inch-wide pods and has to be transshipped in a truck 150 or 200 miles down the road.

Pan Am, Northwest, Flying Tigers—we have letters from all of them. It costs these airlines—and that is an industry in trouble today—untold millions of dollars because they have to unload these particular pod carriers that fit into their 747's instead of being able to move those pods from the 747 into the truck.

This amendment is long overdue. This language in the bill is for the benefit of consumers. It gives relief now to the food industry, to the building industry, the paper products industry, and the airlines, all of which need all the help they can get. It gives $3.5 billion in savings at no cost to the taxpayer. It mandates a truck width that gives more passing room on the 22-foot highways than the mandated width on the highways when they were mandated 20 years ago.

I hope we agree to this, realizing that down the line they may change the length and weight or down the line even include a truck width amendment.

However, from what I read as to what is happening in the committee of the Senator from Kansas, there is a great deal of doubt about whether that bill will come.

If I heard anything when I went back home in October, it was that the people back home are getting tired of us sitting here talking to each other, beating our breasts, and doing nothing about the problems.

Mr. President, this bill gives us the opportunity to do something about it. It gives us the opportunity to save the consumers $3.5 billion. I hope the amendment to strike it will be turned down.

Mr. EAGLETON. Mr. President, I will sum up in 1 minute.

I wish to underscore what the distinguished chairman of the Senate Finance Committee, Mr. DOLE, said here about 10 minutes ago. At this moment, he is working within his committee, in conjunction with the committee which the distinguished Senator from Vermont (Mr. STAFFORD) chairs, on this very matter of truck width, length, weight, and user fees to accompany any changes therein.

Senator DOLE has strongly implored that we defer this matter until we have adequate time to present his package. I underscore that by repetition.

Finally, Senator ANDREWS, one of the more skillful debaters in the Senate, says this is not really a truck amendment, that this is a consumer amendment.

There is an old story: If it looks like a duck, quacks like a duck, and walks like a duck, maybe it is a duck.

The Senator can call this "consumer." He can say these trucks are going to be lighter not heavier and that there is going to be just as much

passing room on the highways as before. He can use all this mesmerizing language, and it ends up that it looks like a truck, it honks like a truck, it destroys the highways like a truck, and it fills the road like a truck. If the Senator wants to call this "consumer," he can call it anything he wishes. Call it utopia. But it is a truck, and it will be wider and heavier and bigger and more destructive. That is what the vote is all about.

I yield back my time, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment. On this question the yeas and nays have been ordered and the clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Alabama (Mr. DENTON), the Senator from New Mexico (Mr. DOMENICI), and the Senator from Arizona (Mr. GOLDWATER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Arkansas (Mr. BUMPERS), the Senator from Colorado (Mr. HART), and the Senator from South Carolina (Mr. HOLLINGS) are necessarily absent.

The PRESIDING OFFICER (Mrs. KASSEBAUM). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 31, nays 62, as follows:

[Rollcall Vote No. 393 Leg.]

YEAS—31

Denton	Hart	

So Mr. EAGLETON's amendment (UP No. 1408) was rejected.

UP AMENDMENT NO. 1410

(Purpose: To change the designation for reasonable needs of navigation on the Columbia Slough)

Mr. ANDREWS. Madam President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from North Dakota (Mr. ANDREWS), on behalf of Mr. HATFIELD, proposes an unprinted amendment numbered 1410.

Mr. ANDREWS. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Insert the following general provision at the end of the bill:

SEC. . (a) Neither the Secretary of the department in which the Coast Guard is operating nor any other officers or employee of the United States shall approve any project or take any action which would interfere with the reasonable needs of navigation on the Columbia Slough, Oregon.

(b) For purposes of subsection (a) of this section, any bridge which is to be constructed across the Columbia Slough, Oregon, after the date of enactment of this section shall be deemed to provide for the reasonable needs of navigation on the Columbia Slouth, Oregon, if such bridge provides at least 30 feet of vertical clearance Columbia River datum and at least 80 feet of horizontal clearance, as determined by the Secretary of the department in which the Coast Guard is operating.

Mr. ANDREWS. Madam President, the amendment that I am offering today is a very simple one to address a problem that has developed in the State of Oregon. It is intended to clarify a decision made on a local level by the Coast Guard on the proper amount of clearance necessary for bridges over the Columbia Slough.

This action is part of a larger project on the North Portland Peninsula to provide flood control and recreation to that area. It has been under discussion since 1966 and promises to be extremely beneficial to that portion of the State. Federal authorization for a multipurpose flood control project has not been forthcoming within the time frame necessary to develop the Rivergate Industrial District. However, an alternative has been suggested to provide flood protection and accomplish the recreation and fish and wildlife benefits of the original plan.

The original plan called for closure of the Columbia Slough and construction of a railroad crossing of the Columbia Slough. This crossing was to be placed on a structure that would close the slough. The new plan keeps the slough open, but requires that both the railroad and roadway bridges must be built as structures spanning the slough. The Coast Guard standards require that all bridges must provide for the "reasonable needs of navigation." In the past the Coast Guard has based standards for vertical clearance equal to the bridge upstream from the proposed bridge site, which in this case is 39.5 feet.

Extensive research has been conducted by the Port of Portland to determine the appropriate amount of clearance necessary for usual boat traffic. The study by the port determined that all boat traffic, whether it be tugs, barges, or recreation boats would be able to clear a 30-foot bridge on all occasions, except in extreme flood conditions. This study demonstrates that the determination by the Coast Guard was not based on any factfinding, but solely on the recognition that historically log raft tugboats and small pleasue craft had transited the slough.

The importance of this change in the designation of "reasonable needs of navigation" lies in the cost of the construction of the bridges. It has been determined that it would cost approximately $1.1 million to build a 30-foot roadway bridge with that cost increasing by $400,000 for a 39-foot bridge. To construct a 39-foot clearance for a rail bridge, an opening span would be necessary. Cost estimates are $1.7 million for a nonopening 30-foot clearance span as compared to $8.8 million for an opening bridge. Clearly it can be seen that the difference in vertical clearance results in significant cost increases and for no apparent justification.

In closing, I urge my colleagues to adopt this amendment. It insures that the Columbia Slough will remain open to all boat traffic while reducing the cost of construction for both a railroad and roadway bridge over the slough. In addition, this action also protects recreation and fish and wildlife interests.

Madam President, it is obvious I am offering this amendment for a friend and colleague, the senior Senator from the State of Oregon (Mr. HATFIELD), the chairman of our committee, who is over in the Appropriations Committee at this present time. There is no objection to the amendment on either side and I hope that it will be adopted so we can take it to conference.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from North Dakota (Mr. ANDREWS) on behalf of the Senator from Oregon (Mr. HATFIELD).

The amendment (UP No. 1410) was agreed to.

SECTION 16 PROGRAM

Mr. CHILES. Madam President, I rise for the purpose of making a point of clarification with Chairman ANDREWS on the life cycle costing require-

ments as they relate to the section 16 program.

The appropriation for urban formula grants of the Urban Mass Transportation Administration includes language mandating that an evaluation of performance, standardization, and life cycle costs be performed before awarding contracts for the acquisition of transit rolling stock. My concern relates to a very small program which derives its funding from the overall appropriation for urban discretionary grants, namely the section 16 program which provides transportation services for the elderly and handicapped. The type of vehicle typically purchased with these funds is a converted van which has been specifically equipped to transport elderly and handicapped individuals. The private, nonprofit agencies offering these services may purchase only one or two vehicles and generally do not have the expertise to perform a life cycle costing analysis. I would like to ask the chairman of the subcommittee if it was intended that this provision apply to the section 16 program.

Mr. ANDREWS. No, it was never intended that this provision apply to the section 16 program. I thank the gentleman from Florida for raising this matter for clarification. I think the Senator from Florida agrees with me that this exception only relates to transport for elderly and handicapped individuals.

Mr. CHILES. The chairman makes a good point. The life cycle cost requirement for other programs continues, and we expect the letter of the law to be followed.

Mr. BAUCUS. Will the gentleman from North Dakota yield for a point of clarification?

Mr. ANDREWS. I yield.

Mr. BAUCUS. I thank the distinguished subcommittee chairman. The Senator will recall that, pursuant to the supplemental appropriation of last fiscal year, the Interstate Commerce Commission was directed by the Senate to increase the frequency and depth of its audits covering rail holding companies to insure that holding company financial transactions are not detrimental to the continued provision of rail service. This is a matter of considerable concern, particularly to those of us in the West who depend on rail transportation for the stability of our agriculture-based economy. I am wondering if it is the intention of the chairman to continue the effect of this provision into the next fiscal year?

Mr. ANDREWS. The Senator from Montana raises an issue of considerable importance. It is indeed the case that we intend to continue the requirement that ICC press its auditing function so as to insure that the pressures of holding company diversification do not undermine rail service. We will be looking forward to ICC testimony on any findings from these audits as well.

Mr. BAUCUS. I appreciate the response of the Senator from North Dakota and his consistent interest in maintaining essential, high quality rail service. I thank him for that assurance.

Mr. BOREN. Madam President, as you know, the FAA operates its Aircrafts Registry Administration System in Oklahoma City. Recently, the FAA began converting the aircraft title information it has to microfiche. In the past, the FAA operated this title search service manually. The information was made available to the public that day, and sometimes as fast as 4 hours. During the conversion to microfiche, firms are now experiencing delays of several weeks and sometimes longer. The FAA has admitted that this problem exists and it stems from the fact the records are out for being converted to microfiche and that process causes delays. A more substantial portion of the delay is caused by the fact that the FAA does not have enough personnel committed to operate this facility. That fact, combined with the enormous growth of volume of title records, has resulted in the substantial delays now being experienced. The FAA essentially acknowledges this problem, reporting that their new goal for providing title information is to accommodate 75 percent of the requests within 25 days; a giant step backwards. Senator ANDREWS, this is to me a sad situation and one which is costing those who buy and sell aircraft in this country substantial delays, inconveniences, and money lost. Senator ANDREWS, do you believe it would be appropriate for the FAA to provide additional resources to the record system in order to reduce the response time once again to the level previously enjoyed when the system was operated manually?

Mr. ANDREWS. I certainly appreciate the senior Senator from Oklahoma bringing this to our attention. I agree with you completely that the FAA should, within the resource levels made available by this bill, provide additional staff to the records system in Oklahoma City so that it can provide a more timely service to the public. Early next year when we hold our appropriations hearing, I intend to ask Administrator Helms about the progress he has made on this matter and the committee will expect that the situation will be substantially resolved by that time.

UP AMENDMENT NO. 1411

Mr. CHILES. Madam President, on behalf of Senator JOHNSTON, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Florida (Mr. CHILES) on behalf of Senator JOHNSTON proposes an unprinted amendment numbered 1411.

Mr. CHILES. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill insert: "None of the funds appropriated in this Act may be used to enforce a prohibition against commercial air service between New Orleans and London."

Mr. CHILES. Madam President, the amendment I have sent to the desk on behalf of Senator JOHNSTON would restore commercial air service between New Orleans and London.

British Airways withdrew from the New Orleans to London route, at which point CAB canceled New Orleans to London service entirely. There are other airlines which wish to serve this route. This amendment would prohibit the CAB from canceling the New Orleans to London service.

Mr. ANDREWS. Madam President, it is difficult to ascertain the legal ramifications of this amendment at this point, but it is certainly one that we should accept and take to conference. By the time we get to conference, we will know what the ramifications are. I have no objection to the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Florida (Mr. CHILES) on behalf of the Senator from Louisiana (Mr. JOHNSTON).

The amendment (No. 1411) was agreed to.

Mr. DIXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

UP AMENDMENT NO. 1412

Mr. DIXON. Madam President, I send an amendment to the desk cosponsored by my colleague, Senator PERCY, and myself, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The Senator from Illinois (Mr. DIXON), for himself and Mr. PERCY proposes an unprinted amendment numbered 1412.

Mr. DIXON. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Add the following general provision at the end of the bill:

"Sec. . Notwithstanding any other provision of law, or of this Act, there is appropriated and authorized $3,000,000 to remain available until expended for the acquisition

and rehabilitation of the Bloomer Railroad Line between Normal Junction, Illinois, and Herscher, Illinois, for 90% of the costs of such acquisition and 80% of the costs of such rehabilitation by an entity controlled by a preponderance of the rail users on such line or portion thereof."

Mr. DIXON. Madam President, on behalf of my colleague, Senator PERCY, and myself, I offer this amendment on behalf of a critical agricultural transportation project in central Illinois, the redevelopment of the Bloomer Railroad Line. Although the Interstate Commerce Commission has authorized the abandonment of the line, and rail service has been discontinued for some time, the track structure and right-of-way are still in place, and the shippers have organized to acquire the line with Federal financial assistance.

The rehabilitation of the Bloomer Railroad Line should afford a very substantial increase in employment for track rehabilitation in a major portion of rural McLean, Livingston, Ford, and Kankakee Counties, Ill., and will reestablish this important link in interstate commerce so that the farmers along the line will once again have direct rail access to the international and interstate grain markets.

The communities served by this line include Bloomington/Normal, Barnes, Colfax, Anchor, Cropsey, Chatsworth, Charlotte, Cullom, Kempton, Cabery, Buckingham, and Herscher, all in the Corn Belt of central Illinois.

The amendment provides $3 million for this project, and does not include any operating assistance payments. The rail users on the line have organized into the Bloomer Shippers Railway Redevelopment League, and hope to assure the permanent operation of this line once redeveloped with Federal financial assistance.

Mr. ANDREWS. Madam President, the precise argument that our good friend, the junior Senator from Illinois, has raised is very important. This particular project is one of a number of worthy projects for the State of Illinois that will be subjects of the conference.

Let me assure my colleague that we will do everything we can to accommodate his view and the view of his colleague, Senator PERCY, in the conference.

Mr. DIXON. Madam President, I appreciate that very much.

Madam President, on the basis of the representations made by my good friend from North Dakota, on behalf of my colleague, the senior Senator from Illinois, Senator PERCY, Congressman MADIGAN, Congressman SID YATES, and other interested Members in the House, I am privileged at this time to withdraw the amendment with the assurance of my colleague that this matter will be given every consideration in the conference committee.

Mr. ANDREWS. Let me assure my colleague that if I should, by any reason, happen to forget the most eloquent argument that my colleague made today, a Congressman from the great State of Illinois, SID YATES, a long-time friend of mine and colleague in the House Appropriations Committee, will be sure to remind us as conferees in the most forceful manner. So the Senator from Illinois and his colleague, Senator PERCY, are adequately protected.

Mr. DIXON. I thank my colleague.

BLOOMER RAILROAD LINE

Mr. PERCY. Madam President, I wish to join with my distinquished Illinois colleague, Senator DIXON, in offering this amendment. The amendment would authorize $3 million for the acquisition and rehabilitation of the Bloomer Railroad Line between Normal Junction and Hershel, Ill., and would require that 10 percent of the acquisition costs and 20 percent of the rehabilitation costs be borne by users of the rail line for the funding to be provided. The Bloomer Shippers Railway Rehabilitation League has been formed by the users to acquire, rehabilitate, and operate the line.

This amendment is necessary because the Interstate Commerce Commission has authorized the abandonment of the Bloomer Line, and the $3 million assistance will help assure continued rail service—service which is vital to the central Illinois farm economy.

I am pleased that the Senator (Mr. ANDREWS) has agreed to consider this matter in conference with the House and appreciate his accommodating us. On behalf of Senator DIXON and our House colleague, Mr. MADIGAN, we thank you.

Mr. DIXON. Now, Madam President, I withdraw the amendment.

The PRESIDING OFFICER. The amendment (UP No. 1412) is withdrawn.

Mr. ANDREWS. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ANDREWS. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Madam President, a great deal of discussion has been generated in recent weeks about the state of our country's roads and bridges.

In the States of Texas, where we enjoy a strong interstate highway network and an extensive primary and secondary road system, our needs are particularly critical. It has been many years since the original funds were authorized and expended to produce the highway system upon which we have all come to depend. In Texas, given the size of the State and the dependence upon travel by passenger automobile, the highways have been much used, and, naturally, have deterioriated over time.

Although the Federal Highway Administration and the Texas State Department of Highways and Public Transportation have done a superb job of attempting to keep up with the rehabilitation needs of this system, we are nonetheless faced with the critical need for additional attention to this problem.

While highway rehabilitation must demand our attention, I am also concerned about the state of some of the bridges in Texas. The bridge crossing the Neches River, which connects the cities of Ports Arthur and Orange, demands, I believe, our immediate action. This bridge, which is too narrow to be safe, is the major traffic artery between these two major industrial centers of east Texas. The bridge has only a 49.6 sufficiency rating from the Department of Transportation, out of a possible sufficiency scale of 100. In short, this bridge is inadequate under current conditions, and with any expanded traffic flow would create a potentially dangerous situation. Without rehabilitation, and expansion, this inadequacy will seriously hamper the prospects of these two cities to expand their industrial base and will contribute to the continuation of a depressed labor market in this area of the State.

It is for these reasons, Madam President, that I today submit the text of this amendment to H.R. 7019, regarding expansion and rehabilitation of the Neches River Bridge.

The text of the amendment follows:

At the bottom of page 15 add the following:

NECHES RIVER BRIDGE

For the renovation of the existing Neches River Bridge and the construction of a twin span bridge on Texas State Highway 87 across the Neches River, to be derived from the Highway Trust Fund, $46,400,000, to remain available until expended.

Mr. TOWER. Madam President, following consultation with my colleague, Mr. ANDREWS, the chairman of the Subcommittee on Transportation of the Appropriations Committee, I have decided not to seek consideration of my amendment relating to the rehabilitation and expansion of the Neches River Bridge at this time. I will, however, actively pursue this matter with my colleagues on the Environmental and Public Works Committee, and on the Appropriations Committee as funding for the next fiscal year is considered during the 98th Congress.

SECTION 311

Mr. GLENN. Madam President, section 311, dealing with the debt of the St. Lawrence Seaway Development Corporation, is a commendable provi-

sion and I applaud the Committee on Appropriations, but especially the distinguished chairman of the Transportation Subcommittee, the Senator from North Dakota (Mr. ANDREWS), for its inclusion in this legislation. It would achieve a long-sought purpose, provide a measure of equity for America's north coast, foster competition, and facilitate access of the industrial and agricultural output of America's heartland to the channels of world trade.

The purpose of this section is the same as that sought by the bill S. 422, which I introduced early in this Congress and on which hearings were held on March 17, 1982, by the Committee on Foreign Relations. At those hearings, attended by Federal officials, labor, port interests, seaway users, shipping operators, and railway representatives, by far the greatest amount of testimony was in favor of just what the committee proposes in section 311; that is, forgiveness of the remaining portion of the construction debt of the St. Lawrence Seaway Development Corporation.

This provision goes beyond the terms of S. 422—which would level off annual repayments at today's $2 million level, avoiding a burdensome ballooning beginning in 1986—but I fully endorse the committee version. It would remove an inequity which has been imposed on users of the St. Lawrence Seaway system for nearly a quarter century. The seaway is the only waterway in our history which has had to generate revenues to cover both its initial construction costs and its annual operation and maintenance costs.

Through the end of the 1981 shipping season, the Seaway Development Corporation had paid a total of $64.4 million to the Treasury. This included interest payments of $37.6 million through the 1960's, as well as $26.8 million on the principal of the construction debt. And, as I have indicated, the Corporation also has borne all operation and maintenance costs without appropriations from the Congress.

Already, toll increases have had a deleterious effect on seaway traffic. It is estimated, for instance, that toll increases already negotiated and scheduled will increase the delivered price of coal shipped through the seaway by 32 cents a ton. That is, the cost will be jumped 32 cents a ton in but 2 years, 1982 and 1983. With the expected increase in competition between U.S. ports, this increase obviously will have a deleterious effect on the capability of the Great Lakes to serve the people, the industry, and the shippers of mid-America. The provision pertaining to the seaway debt will alleviate this problem somewhat.

Toll will undoubtedly increase as operations and needed maintenance demand. But equity will be served by lifting the debt burden. Under the present schedule of capital payments, the Corporation pays back $2 million per year. That will pertain through 1985, but in 1986 the repayment requirement will jump to $9.5 million. Then it will decrease in gradual steps to $5 million by 1996 and $1 million by the year 2001.

Testimony at our March hearings indicated that the very significant increase of $7.5 million in the repayment schedule in 1986 will cause a toll increase of about 70 percent over the 1983 level, increasing the percentage of overall tolls dedicated to repayment of this unique debt to about 54 percent.

Madam President, the report of the Committee on Appropriations on the transportation and related agencies appropriations bill states the case for this provision very well, pointing out that the Governors of the six Midwestern States with Great Lakes shoreline are in support of this proposal because they, like I, are concerned that the outstanding indebtedness of the Seaway Development Corporation poses a threat to the economic health of the region which is now feeling the effects of the worst economic recession since the Great Depression.

ST. LAWRENCE SEAWAY

Mr. PERCY. Madam President, I chaired a Foreign Relations Committee hearing earlier this year concerning the St. Lawrence Seaway's debt and wish to commend Transportation Appropriations Subcommittee Chairman ANDREWS for the inclusion of section 311 of the bill. This section relieves the seaway of its obligation to repay the outstanding construction debt.

More than a year ago at a Great Lakes Maritime Conference I sponsored in Chicago, Great Lakes port officials, steamship operators, labor representatives, shippers, and carriers unanimously recommended that Congress act to relieve the region of the burden of the St. Lawrence Seaway debt. The seaway is the only Federal waterway with substantial user charges and, for this reason, it casts an unfair burden on Great Lakes ports. The seaway charges tolls to pay for operating and maintenance costs and also to pay back interest on the debt extended to construct it in the 1950's. The debt now stands at approximately $110 million and annual interest charges amount to about $2 million.

The Senators of the Great Lakes region have worked arm in arm in seeking the retirement of the seaway debt and we deeply appreciate the achievement of the Senator from North Dakota in forgiving the debt in this bill. Ms. Grace Crunican of his staff deserves mention for her work on this provision.

Madam President, without this action, seaway tolls could be raised thereby increasing costs to shippers and increasing cargo rates. The future of my State's economy is directly linked to our success in exporting, and this provision will help assure that grain grown near Decatur and that machinery manufactured in Peoria pass through the Port of Chicago, rather than through the Ports of Baltimore and New Orleans.

Mr. ANDREWS. Madam President, I ask for third reading of the bill.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (H.R. 7019), as amended, was passed.

Mr. JACKSON. Madam President, I move to reconsider the vote by which the bill was passed.

Mr. ANDREWS. Madam President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ANDREWS. Madam President, I move that the Senate insist upon its amendments and request a conference with the House of Representatives on the disagreeing votes thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to and the Presiding Officer appointed Mr. ANDREWS, Mr. COCHRAN, Mr. ABDNOR, Mr. KASTEN, Mr. D'AMATO, Mr. HATFIELD, Mr. CHILES, Mr. STENNIS, Mr. HARRY F. BYRD, JR., Mr. EAGLETON, and Mr. PROXMIRE conferees on the part of the Senate.

Mr. ANDREWS. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. KASTEN). Without objection, it is so ordered.

CONTROLLING THE BUDGET

Mr. SYMMS. Mr. President, much attention has and will continue to be directed at the vast array of budget items for which funds are appropriated every year. These include farm-price supports, jobs programs, and a variety of subsidies and pork-barrel

programs too numerous to mention. As with all Federal programs, there is plenty of waste and fraud to be found in them. However, these compose only about 20 percent of the fiscal year 1983 budget. They do not pose the real problem for out-of-control Federal spending, but should be curtailed. A few million here and there add up.

Likewise, the defense budget is not responsible for our budget dilemma. Military spending will be higher in coming fiscal years. The Reagan administration initially requested budgetary authority for fiscal year 1983 at $263 billion, up from $218.9 billion in fiscal year 1982. The initial Reagan budget for 1983 projected real growth in defense outlays of 10.5 percent, and average real increases of about 8 percent for the years 1981–87. In contrast, real defense spending from 1975–81 grew at only 1.8 percent, while the Soviet Union built up a vast war machine. This is not to say that we should not step up efforts to control costs, but I believe the Congress is the largest impediment toward saving defense dollars, not the administration. The Congress prohibits the Defense Department from procuring military equipment efficiently because it does not allow DOD to "buy off the shelf." Congress is the biggest obstacle in shutting down obsolete bases because Members representing congressional districts where those bases are located consistently stop any efforts to close facilities that are no longer needed. The Congress prohibits the Defense Department from planning efficiently because it forces the Defense Department to operate on continuing resolutions—leaving budget planners at DOD totally unable to plan a budget. I would like to know one individual or corporation that could operate efficiently without a budget. Efficiency cannot be attained without a budget, and there is no reason to assume that DOD is any different than any other organization. Furthermore, if the Congress were truly interested in obtaining efficiencies of scale, they would authorize and appropriate on a multiyear basis for DOD. Instead, Congress continually holds programs hostage to the yearly budget cycle, canceling previously authorized programs on a whim or delaying funding for those programs for some politically expedient reason. It is no wonder that the cost of military equipment is expensive since military equipment manufacturers cannot be assured that their contract will not be canceled after having made tremendous capital expenditures to manufacture an initial piece of military equipment. The Congress has also, thus far, refused to address the problem of adequately controlling personnel costs at DOD, which by the way, represent 55 percent of the DOD budget. Congress, if it were serious about controlling DOD expenditures, would reinstate the draft and reform the military retirement system. But despite all of this, defense is not the real culprit in examining just where the budget is out of control.

The real crisis in Federal spending lies in the remainder of the budget, the so-called entitlements area, which includes social welfare and other transfer payment programs that grow annually of their own inner dynamism, since Congress does not appropriate funds for them: Social security, medicare, medicaid, Government pensions, and the like. The rate of growth in spending for these programs, including military pensions, has been nothing less than explosive. From 1965 through 1970, the entitlements portion of total budget outlays grew from 28.4 percent to 33.7 percent. By 1975, entitlements consumed 48.3 percent of Federal outlays. The Reagan budget estimated these programs to devour 50.5 percent of total spending in 1983, and remain above 49 percent through 1987. Social security alone will cost an estimated $173.5 billion in 1983, up 12 percent from 1982.

Interest on the Federal debt for 1983 is projected to be a staggering $115 billion. Off-budget items, which contribute to Federal deficits, could add as much as $20 billion to the deficit next year.

The momentum behind Federal spending is greater than the sum of the costs of every Congressman's pet programs. It is a mindless engine unto itself, that has proved impervious to an endless variety of control mechanisms, including the 1974 Budget Act. Changes in the assignment of budget functions by congressional committees has not worked. Statutory limits have been introduced, but they could easily be subverted or ignored. A constitutional amendment to balance the budget and limit spending to a percent of GNP is being debated but has been stalled by the Democrats in the House of Representatives.

What we need is a vigorous excercise in political will in order to control the uncontrollable growth of Federal spending. The problem still remains to be challenged, and is more serious today than some time ago. The solution to the problem is the same—it just has not been tried yet.

THE UNDERCOVER INVESTIGATION OF ROBERT L. VESCO

Mr. HATCH. Mr. President, the Department of Justice seriously bungled the investigation of fugitive financier Robert L. Vesco's attempts to subvert American foreign policy. The Department has now admitted that it gave false information to a U.S. district judge in connection with that same investigation; it has taken the extraordinary step—given that it occurred after trial and conviction—of moving to dismiss the indictment pending before that Judge. The Judge found "willful prosecutorial misconduct" and unsurprisingly threw out the case.

As a member of the Senate Judiciary Committee, for more than 2 years I carefully examined the Department of Justice's undercover investigation of Vesco's alleged attempts to reverse a State Department ban preventing the export of planes to a terrorist nation, Libya.

The investigation by the Federal Bureau of Investigation began when an FBI informant agreed to arrange a meeting for a target to the investigation with Vesco. The FBI informant did not know Vesco at the outset of the investigation but he spent a great deal of time, 4 months, trying to locate him. If it had not been for the FBI informant, the target would never have met Vesco.

The FBI's target was also under investigation in the southern district of New York, After meeting Vesco, the target told the southern district that he would lure Vesco where the Department could get him and would spend his own money doing this. He asked the southern district to consider conferring immunity if he succeeded. Thus, the FBI helped its target become an informant. for a time, both the FBI and southern district informants investigated each other.

Vesco purportedly sought through various individuals to have John White, then the Democratic national chairman, arrange for Carter administration officials to lift the ban against exporting planes to Libya. Mr. White did contact the Under Secretary of State who negotiated the release of some planes to Libya, did meet with the Libyan Ambassador, and did give the Libyan Ambassador some assurances (according to another target of the investigation).

Although the FBI and the southern district of New York should have been cooperating or coordinating their investigative efforts, instead they were competing. Even after the FBI learned that their target had become a southern district informant, they investigated.

In the midst of this competition, the Department received "specific information" that the White House Chief of Staff and President Carter intended to share the Libyan's bribe with Mr. White. That information triggered the 90-day "preliminary investigation" to determine whether a special prosecutor should be appointed. The FBI informant was excluded from undercover meetings during that 90-day period. The southern district informant was included but he needed funding to attend. The FBI however refused him funding, among other reasons, because he was not an "FBI informant." The

Department thereafter recommended not to appoint a special prosecutor. The press learned, and no one knows how, that Feeney was an informant; that leak ended any hope of continuing the undercover investigation.

Having erected a wall between the case in which the southern district informant cooperated and the one in which he was investigated, the southern district tore down the wall. The informant was prosecuted in New York and in Denver, Colo.

Without funding, the Department lost access to the targets of the investigation. With published stories, secrecy took flight. With the repeated indictment of its informant, the southern district lost the last critical element to prosecute a case, a witness.

On September 15, 1982, I requested that the Judiciary Committee print the staff report of findings and recommendations. The committee printed that report, entitled "The Undercover Investigation of Robert L. Vesco's Alleged Attempts to Reverse a State Department Ban Preventing the Export of Planes to Libya" and a copy was requested by U.S. District Judge Fred Winner in Denver, Colo.; Judge Winner was considering posttrial motions in the prosecution of the southern district informant before sentencing him.

On September 23, 1982, Judge Winner said that the report made it clear to him that he required the testimony of high level Department officials. He said:

> My analysis of this report gives cause for great concern as to whether perjury has or has not been committed in this Court. I think there is grave concern as to whether representations made on behalf of the Department of Justice have been false.

He continued:

> I am very, very troubled as to whether I may not have to dismiss the indictment.

This past Monday, a representative of the Department of Justice beat him to the punch; he admitted that the Department gave "factually erroneous" information to Judge Winner. More than 2 years after the Department sought to indict its own informant and after it had tried and convicted him, the Department belatedly made this confession of error and asked the court to dismiss the case.

U.S. District Judge Winner said that "willful prosecutorial misconduct" had been established in his courtroom and "freely admitted" by the Department. He castigated the Department's undercover investigation of its own informant stating that "competition" between the FBI and southern district was "so bad" that one investigative agency both concealed and "actively" mislead other investigative agencies as to what was happening. "As long as that goes on," he said, "there are going to be injustices."

Judge Winner said that the Department had "openly conceded" that it had deprived the informant of his constitutional rights during the trial although it had "taken a long, long, long time" for the informant to get that concession. Judge Winner said that he was "chagrined that there is not going to be full disclosure of all that took place behind the scenes in this case," that the Department had "successfully stonewalled * * * all the way to the end," and from "that standpoint alone there has been a miscarriage of justice." Judge Winner dismissed the case.

Judge Winner's ruling reaffirmed our report that from beginning to end this undercover investigation was "a shame and a disgrace." I commend Judge Winner for persevering and I commend the staff report's findings and recommendations and Judge Winner's remarks and ruling to the select committee established by Senate Resolution 350 "to conduct and investigation of the activities of components of the Department of Justice in connection with their law enforcement undercover operations."

There is no question that undercover activities are beneficial and necessary to effective law enforcement but they are not to be used without constraint. Sir Thomas More once asked another lawyer, "What would you do? Cut a great road through the law to get after the Devil? Roper, the lawyer, answered, "I'd cut down every law in England to do that."

"Oh?" said More, "And when the last law was down, and the Devil turned around on you—where would you hide, Roper, the laws all being flat?" More continued, "This country's planted thick with laws from coast to coast—man's laws, not God's—and if you cut them down—and you're just the man to do it—do you really think you could stand upright in the winds that would blow then?" More concluded, "Yes, I'd give the Devil benefit of law, for my own safety's sake."

THE DEATH OF FRANK HAMPTON

Mr. THURMOND. Mr. President, it is with great sadness that I rise today to note the death of an outstanding South Carolinian and a good friend, Frank Hampton.

Mr. Hampton, who was chairman of the board of the State-Record Co. in Columbia, S.C., and a former member of the State House of Representatives, died Tuesday at the age of 86.

Mr. President, Frank Hampton was a man of unimpeachable integrity and outstanding character. He was an excellent member of the South Carolina General Assembly, where I had the distinct privilege of serving with him some years ago.

The State of South Carolina has lost an able and dedicated citizen, and I have lost a true friend.

During his life, Mr. Hampton excelled in many fields. To name but a few, he was a former president of the State Fair Association, a skilled athlete and newspaper executive, a member of the South Carolina Agricultural and Mechanical Society, an outstanding breeder of fine race horses, and, of course, an able State legislator.

Above all, Mr. President, Frank Hampton was a true humanitarian. During the Depression, his compassion for his fellowman was especially evident, although he never made a point of mentioning it himself.

It was during that tragic period in our history, when many people lived from hand-to-mouth, that Frank Hampton delivered milk to families even though they had no money to pay him.

Mr. Hampton operated a working dairy at that time, and many families later recalled that he never mentioned past-due bills to them, and kept delivering milk even if months went by without payment.

That is the kind of man Frank Hampton was, and in order to share more about his remarkable life with my colleagues, I ask unanimous consent that an article in the December 1, 1982, edition of the Columbia State newspaper, which details the many accomplishments of Frank Hampton, and an editorial from the December 2 edition of the newspaper be included in the RECORD at the conclusion of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the (Columbia, S.C.) State, Dec. 1, 1982]

FRANK HAMPTON INSTRUMENTAL IN STATE FAIR DEVELOPMENT

Frank Hampton, chairman of the Board of Directors of the State-Record Co., died Tuesday. He was 86.

Mr. Hampton, who represented Richland County in the South Carolina House of Representatives in the 1930's, also was a former president of the State Fair Association and was founding president of the S.C. Thoroughbred Owners and Breeders Association.

Funeral services will be held at 4 p.m. today in Trinity Episocpal Cathedral, conducted by the Very Rev. John E. Banks Jr. Burial will be in the churchyard.

Pallbearers will be Burwell Manning, George McCoy, Theodore DuBose, Gayle O. Averyt, David C. Ellison Sr., Phil Chappell, Ben Morris, Paul Barringer, Henry W. Moore Jr. and W. Hampton Oliver.

The family suggests that those who wish may make memorials to Still Hopes Episcopal Home or to charities of their choice.

Dunbar Funeral Home, Gervais Street Chapel, is in charge.

Born April 20, 1896, Frank Hampton was the last surviving member of his generation of Hamptons, a pioneering family of the

area that became Richland County. He lived all his life on lands owned by his family since shortly after the American Revolution.

The oldest of five children of the late Frank Hampton and Gertrude Ruffini Elliott Gonzales Hampton, Mr. Hampton was born and reared at "Woodlands," a home built by his father. He was educated at Porter Military Academy in Charleston and Randolph-Macon Academy in Virginia before entering the University of South Carolina, where he graduated in 1917 with a degree in civil engineering. At the university, he was an outstanding fullback on the football team and also received a letter in track.

During World War I, Mr. Hampton was in the U.S. Army and served on active duty in France.

Shortly after his marriage in 1920 to the former Mary Fleming Irvine of Evington, Va., Mr. Hampton built a home at "Millwood," behind the front portico columns that still remain from the boyhood home of Wade Hampton III. The original house, burned during the Civil War, had been the home of Col. Wade Hampton II, father of Gen. Wade Hampton—the Confederate war leader, governor and United States Senator. Millwood remained Frank Hampton's beloved home until his death.

Mr. Hampton's mother was a sister of the Gonzales brothers—Ambrose, N. G. and William—who founded *The State* newspaper in 1891. The major responsibility for the newspaper eventually passed to Frank Hampton, his brothers and sisters.

He took an active and supportive interest in the newspaper, serving on its board of directors since 1926. He served as vice president and secretary of the board of the State-Record Co. before becoming its chairman in 1966—a position he held until his death.

The State-Record Co. is the parent corporation for subsidiaries that operate *The State* and *The Columbia Record* as well as newspapers in Myrtle Beach, Conway and Newberry and in Gulfport-Biloxi, Miss.; television stations in Charleston, S.C., Lubbock, Texas, and Roswell, N.M.; and the State Printing Co. of Columbia and Band and White Printing Co., Spartanburg.

For approximately 40 years, Mr. Hampton operated a working dairy farm at Millwood, where he bred registered Guernsey cattle. Until the 1940s, he sold milk under the Millwood name throughout the Columbia area.

During the Depression, Mr. Hampton delivered milk to local families, even when they could not pay. Many of his customers later recalled that he never mentioned due bills and continued bringing the same amount of milk, even if months went by without payment. After World War II, he became associated with Coble Dairies and was active in breeding associations.

Mr. Hampton was a strong supporter of the 4-H program, to which he donated cows and calves. He received a citation from 4-H for his interest and contributions.

Years of active farming led to Mr. Hampton's involvement in the South Carolina Agricultural and Mechanical Society—the official name of the State Fair Association. He was deeply interested in the State Fair and in its services to the people and the economy of the state. In 1953, he was elected vice president of the fair association and from 1965 to 1969 served as its president.

In April of 1966, a fire destroyed the State Fair's main exhibit facility, a massive structure known as the Steel Building. Mr. Hampton spearheaded a drive to rebuild an even better facility, to erect new buildings and generally to improve the arrangement of the fairgrounds. He assumed leadership in the endeavor to raise funds.

Largely through his efforts, five new buildings were erected, including two for general exhibits, a new main exhibit building and a large year-round facility housing a cafeteria and reception rooms. At the 1967 annual meeting of the State Fair Association, members voted to re-name the main exhibit building the Hampton Building, in honor of Frank Hampton and in appreciation of his work in rebuilding the fairgrounds.

After his retirement from its presidency, Mr. Hampton remained as an ex-officio member of the State Fair Association's executive committee.

In a special ceremony in 1980, the State Agricultural and Mechanical Society honored Frank Hampton for his life-long contributions to its work. At that time, the society presented him with an engraved silver plaque.

One of Mr. Hampton's greatest loves was horses, in keeping with a tradition established by preceding generations of his family. Although he said recently that he "never had anything good to ride" when he was a boy, as an adult he kept many horses on his farm and bred thoroughbreds for racing.

The late Max Hirsch, one of the nation's most famous horse trainers and a close friend, trained many of Mr. Hampton's thoroughbreds for the track. Hirsch trained winners of the Kentucky Derby and other great races.

Spanish Cream, bred by Mr. Hampton at Millwood in 1950, was the "highest money winner yet bred by a South Carolinian," according to an article about the horse which appeared in The State Magazine April 26, 1953. Spanish Cream won three major stakes victories at Santa Anita, and her lifetime winning—including races won after Mr. Hampton sold her—exceeded $125,000. Mr. Hampton raced two other horses from the same dam at Belmont Park and bred many others who were winners at major tracks such as Belmont, Aqueduct and Saratoga.

Mr. Hampton revived the Hampton racing colors, which had been retired during the Civil War, and they now are among the oldest racing colors active in the country. The original colors were royal blue and crimson sleeves, and Mr. Hampton put two white hoops on each sleeve. The cap is royal blue and red.

Through his association with racing, Mr. Hampton made friends with the owners of many famous stables, including Robert Kleberg of King Ranch, where he was invited as a houseguest to participate in hunting; Elizabeth Arden, Capt. Harry Guggenheim and many others.

In recent years, Mr. Hampton had been associated with O.H. Weinges and son and their trainer, Red Holman.

While he was serving in the state Legislature, Mr. Hampton advocated the legalization of pari-mutuel betting in the state. He believed this would provide public revenue as well as good sport.

In the state House of Representatives, Mr. Hampton also played an active part in legislation supporting a state forestry program.

Mr. Hampton was an avid hunter, frequently participating in hunting parties which went out for birds or ducks. But, he was most fascinated by the quest for the elusive wild turkey. Many of his all-day and overnight hunting expeditions were to the Congaree Swamp, where he and his brother, the late Harry Hampton, often hunted together.

Since he inherited Oak Lawn Plantation near Adams Run, S.C., from his aunt, Harriott Gonzales, in the 1950s, Mr. Hampton had hunted frequently on the plantation property. He liked to invite groups of friends and relatives to join in trips to Oak Lawn, which, for the past several years, was a favorite destination for expeditions with his great-grandson.

A true animal lover, Mr. Hampton usually kept many dogs at Millwood, in addition to goats, guinea hens, mules and other farm animals. He raised English setters, in particular, and competed in local field trials. A favorite setter was Dagwood, who won many field trial outings.

Like his brothers and sisters, Mr. Hampton was a life-long supporter of historic preservation projects. He applied for a grant to preserve the ruins of the original Millwood and in 1980, the state Legislature approved a $12,615 grant to stabilize and restore the massive columns. There was a matching grant from the state Department of Archives and History. Outbuildings remaining from the plantation also were restored recently at Mr. Hampton's expense. In recognition of Mr. Hampton's endeavors, the Historic Columbia Foundation awarded him a certificate of meritorious achievement at its annual meeting in May.

Mr. Hampton loved to entertain at Millwood, and he was well-known as a genial host and raconteur of colorful and humorous stories. Even after his health failed in recent years, many visitors still dropped by to listen to his jokes and his vivid reminiscences.

In earlier years, his 6-foot-2-inch height and large frame, his jovial manner, hearty laughter and readiness to tease and play games, had made Mr. Hampton an extremely popular personality with the children of family and friends. More than one youngster described him as "better than Santa Claus."

As recently as Oct. 14 of this year, Mr. Hampton was once again honored, when the S.C. State Fair presented a $1,000 art purchase award in his honor. The award-winning artwork was presented to Benedict College, with Mr. Hampton on hand for the presentation.

Mr. Hampton was a member of Trinity Episcopal Cathedral. In addition to the organizations previously named, he also was a member of the Cotillion, the Summit Club, the Palmetto Club, the Pine Tree Hunt Club and had been affiliated with the Quadrille Club, the Columbia Drama Club and others. For many years, Mr. Hampton served on the Board of Trustees of Hammond Academy.

One of Mr. Hampton's sisters, Gertrude Hampton Barringer of Richmond, Va., died in September of this year. Her twin, Lucy Hampton Bostick of Columbia, died in 1968. Both his brothers, Ambrose Gonzales Hampton and Harry Rutledge Elliott Hampton, died in 1980.

Mr. Hampton is survived by his wife, Mary Fleming. Their only daughter, Eva Hampton Willis, died in 1979. He also is survived by his granddaughter, Mary Fleming Willis Finlay of Columbia, wife of Mayor Kirkman Finlay Jr.; and two great-grandchildren, Gwathmey and Kirkman Finlay.

[From the (Columbia, S.C.) State, Dec. 2, 1982]

FRANK HAMPTON BUILT ON FAMILY HERITAGE

Those of us who worked for and with the three Hampton brothers for many years viewed them as true Southern aristocrats in the best sense of the word.

They were propertied people with a long and colorful family tradition that is an important part of the history of South Carolina.

Many of their older employees always addressed them in an old Southern manner. Now all are gone—first, "Mr. Ambrose," the youngest; then "Mr. Harry", and finally, just this week, "Mr, Frank," the elder brother.

With the passing of Frank Hampton, *The State* loses the last direct link with its roots. The Hampton brothers and their two sister, both also deceased, were the children of a sister of the three Gonzales brothers, who founded *The State* in 1891 as a fiesty newspaper opposing Tillmanism, the S.C. political movement of the day. Only grandchildren of the Hampton-Gonzales family now remain.

N.G. Ambrose and William E. Gonzales came by their fighting spirits honestly. Their father, Gen. Ambrose Jose Gonzales, who fought for his native Cuba's freedom in the middle of the 19th Century, later came to this country and served as a Confederate officer in the Civil War.

The Hampton brothers' heritage on their paternal side was equally rich in history. Their grandfather, Frank Hampton, was the brother of Gen. Wade Hampton, the Civil War leader who later served South Carolina as governor and U.S. senator.

The death of Frank Hampton at 86 Tuesday deprived Columbia and South Carolina of a man who built on the family heritage.

He had a policy-making role with *The State,* its parent company and other subsidiaries for more than 55 years. He was chairman of the board at the State-Record Co. at the time of his death.

But he had other passions. One was the S.C. State Fair, which he helped nurture as president and in other roles for many years.

A large man who once played fullback for Carolina, Mr. Hampton loved the great out-of-doors and was an avid hunter. He also continued a family tradition by breeding and racing thoroughbred horses, including stakes winners. This interest brought him into contact with the late trainer Max Hirsch, now a member of racing's Hall of Fame. Mr. Hirsch, who wintered his horses for years on the old track at the State Fairgrounds, loved to hunt and swap stories with Mr. Hampton. He also trained the Hampton horses.

One cause Mr. Hampton fought for during his two terms as a state legislator (1931-34) was the legalization of pari-mutuel gambling on horse races to raise revenue and encourage the development of the thoroughbred industry in the state. That effort failed, but later he was a founder of the S.C. Thoroughbred Owners and Breeders Association.

The ravages of old age did not dim the wit that sprang easily from his tongue nor the sparkle that came to his eyes when he encountered a pretty woman.

Despite his background and accomplishments, Mr. Hampton was an unpretentious man who often drove around town in a battered, old red pickup truck. He was the kind of man who elicited affection as well as respect from his friends and associates.

During the week before his final hospital confinement, "Mr. Frank" touched base with three of his loves. Although in a wheel chair, he presided over a meeting of the State-Record Co. Board of Directors and attended the annual stockholders' luncheon, where he had his usual quip for the ladies. He visited the State-Record Recreation Center as head of the committee that oversees its operation. And he presented an award at the State Fair. It was a fitting wrapup to a long and robust life.

HELPING PRESIDENT REAGAN—COOPERATION IF HE WANTS IT

Mr. MELCHER. Mr. President, President Reagan, as other Presidents before him, needs the cooperation of the Senate as well as the constructive recommendations of Senators and our support on the vital issues affecting the country when he is right. It appears to me that he has had good cooperation from the Senate although his decisions since he became President have not always been right. I believe that he and his Cabinet have avoided from time to time taking adequate consideration of good, sincere advice from individual Senators or groups of Senators.

As one of the Senators reelected on November 2 on the Democratic side, I want to make it clear that I have no ill will toward President Reagan for his support of my Republican opponent and for the two campaign forays of the President and his entourage into Montana during the recent campaign. Indeed, if I could have arranged it I would have encouraged even a third or fourth Montana visit by the President.

The country's economy is in desperate straits and the variety of the country's domestic problems can be easily and quickly observed in Montana, ranging through the crushing conditions of agriculture, the forest products industry, the metals, mining, and production industry, and small business to the problems of the elderly, unemployed workers, and educational opportunities of our youth.

I do not believe that the constraints of the President's campaigning for Republican candidates prior to the election allowed for adequate comprehension of these problems affecting our people.

I, for one, believe the President's call for this "lameduck" session was wise. But why is the President now visiting South and Central American countries at this particular time when the problems here in the United States should be addressed? Surely the President should be advised by all of us that the stark, bleak domestic economy does not warrant more giveaways to our hemispheric neighbors to the south until the U.S. economy recovers.

Surely the President should be advised by all of us that his requests for defense appropriations are unrealistically high and must be cut. Surely the President should be advised by all of us that we can no longer avoid nor delay to implement prompt steps for economic recovery, with our attention focused on problems here in the United States.

There can be no better cooperation with the President than to let him know, in a firm way, that these are the important matters that can no longer await our combined attention.

RECOGNITION OF THE VIETNAM MEMORIAL DEDICATION AND THE NATIONAL SALUTE TO VIETNAM VETERANS

Mr. WARNER. Mr. President, during the week of November 8 of this year, a series of events took place here in Washington which marked the beginning of a long healing process for our Nation and the men and women who fought in a recent, unpopular war.

Those events were a series of recognitions marking the National Salute to Vietnam Veterans. They culminated in the dedication of the Vietnam Veterans Memorial in Constitution Gardens on November 13.

So that all Americans may have an opportunity to reflect on the statements of those who participated in the salute and the dedication, I ask unanimous consent that the Veterans Day message of Defense Secretary Caspar Weinberger, the speeches of all who were a part of the Vietnam Veterans Memorial dedication, and the Sunday, November 14, sermon of the Reverend Theodore H. Evans at the National Cathedral be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

REMARKS BY HON. CASPAR W. WEINBERGER, SECRETARY OF DEFENSE, AT VETERANS' DAY CEREMONY, ARLINGTON NATIONAL CEMETERY

We come together today in this sacred place to pay tribute to the brave Americans—soldiers, sailors, airmen, and marines—who have served their nation in her time of need. In placing a wreath upon the tomb of our unknown soldiers, we honor all our veterans, both living and dead, who purchased for us the peace and freedom that we enjoy today.

It is fitting that we have chosen this day to honor the sacrifices of our veterans. For 64 years ago today an armistice was signed ending the Great War—the war that was to end all wars. People on both sides of the Atlantic set aside that day to pay special tribute to those who fought in battle and to rejoice that the world would never again experience the suffering and destruction of war.

Now, over six decades later, we Americans must face the sober lessons of history. We have many more names to add to our list of veterans, and too many battles to add to the list of wars fought since the Great War. Sadly, many Americans living today have seen far too much of war itself in their lifetimes.

The citizens of the United States reject war, not because we are Democrats or Republicans, but because we are Americans

and a civilized people. We reject war as a deliberate instrument of foreign policy because it is repugnant to our national morality. War prevents people from leading the kinds of lives which this country was fashioned to protect and to enhance. As civilized people, we reject war because it kills and maims soldiers and civilians alike and undermines the very fabric of life.

But citizens of the United States also reject tyranny and the repression of freedom, for they too prevent people from leading the kinds of lives they choose. Tyranny breathes fear into the lives of those who live under it, and smothers their individuality. Perhaps we value our freedom even more because we know that today not all peoples in the world enjoy it as we do.

The veterans we remember today know the cost of our liberty. They mustered when America's freedom was threatened; and to restore peace they endured valiantly the hardships of war and the pain of battle.

Speaking of the sacrifice of the warrior, Rudyard Kipling wrote in his poem "Recessional:"

"The tumult and the shouting dies;
The captains and the kings depart;
Still stands their ancient sacrifice."

As a nation, today we recognize the sacrifice of our American heroes who served their country unselfishly. Some gave their most precious possession—their lives. They have found their eternal repose in this hallowed ground. Some are still listed among the missing and will never be forgotten by their countrymen. Others survived, but lived ever after marked with scars of war. With our prayers today we hope to bring them and all our living veterans the comfort that they have earned and deserve.

Today we are at peace—the tumult and the shouting is stilled. But times of peace also have their dangers. Worst of those is that we forget the costs of peace and freedom. For nothing so valuable comes cheaply. Those who we honor today paid dearly for the freedoms that we enjoy today.

Some say that the cost is too great, the sacrifice too painful. But our ceremony today is living testament that America still cherishes the sacrifices of its heroes. To those who would devalue their deeds, we echo the words of King Lear: "Upon such sacrifices, the gods themselves throw incense."

A nation that forgets the sacrifices of its heroes risks its very existence. At this year's Veteran's Day, our nation recalls in a special way the veterans of a painful war that we tried to forget. The veterans returning from Vietnam were not welcomed with speeches and flowers and parades as we rejoiced at the homecoming of the heroes of earlier conflicts. The Vietnam veterans returned to find demonstrations and a nation divided by an unpopular war.

This week in Washington thousands of people from all over the United States have gathered to pay tribute to Vietnam veterans. Their presence serves as a quiet reminder to all Americans that we must not forget the Vietnam veteran. There are few memories more painful than those associated with the Vietnam War; yet there can be nothing more important to the heart of America than that we always remember those who sacrificed so much for our country in that conflict.

But we also learned a terrible lesson from the Vietnam War—a lesson which we must never forget. We learned that we should never again ask our men and women to serve in a war which we do not intend to win. We learned that we should not enter a war unless it is necessary for our national survival. We learned that, if we do enter such a war, we must support our men and women to the fullest extent of our powers.

The national trauma we experienced in the aftermath of that war led us to neglect our defense and ignore the needs of our servicemen and women—just as we had ignored our homecoming veterans. But in 1980 America began to awaken from a decade of pain. We recognized that wars could not be prevented by weakness and we began to rebuild our defenses. We realized the men and women who volunteered to serve their country deserved adequate compensation and the honor and respect of their countrymen. And slowly, we began to remember the Vietnam veteran.

And now, in two days, we will dedicate a Memorial that will ensure that all posterity recalls the sacrifice of all the American veterans who served their country in that faraway land. Built in a quiet place near the shores of the Potomac, it is a beautiful Memorial that conveys an eloquent message of peace and reconciliation. And on its black granite walls are inscribed the names of all who have fallen in Vietnam.

Like the rows of white markers on the hills surrounding us here at Arlington Cemetery, those lists of names will form a silent litany of America's heroes that will reverberate through the ages.

Now it is our duty to do everything in our power to see that the freedom those heroes defended and the peace that they sought were not pursued in vain. We must continue to rebuild the national defenses necessary to protect the peace and to encourage the Soviet Union to join us in seeking genuine arms reductions.

In pausing today to honor our veterans and to remember the debt we owe to them, we must never forget the duty of every American citizen. We must never forget, as Abraham Lincoln said more that 100 years ago, that our duty is "to care for him who shall have borne the battle and for his widow and his orphan, to do all which may achieve and cherish a just and lasting peace among ourselves and with all nations."

We must repay the debt to our veterans by doing these things and by taking the steps necessary to ensure that those who celebrate Veterans' Day in the future can do so in the same spirit as those who originally celebrated this day—that they can honor those men and women who served, and rejoice that mankind has indeed put an end to war. To our veterans, to the American people, and to men and women throughout the free world, we pledge ourselves to work for that sacred goal.

WELCOME BY JOHN P. WHEELER, III, CHAIRMAN, VIETNAM VETERANS MEMORIAL FUND

I am John Wheeler, Chairman of the Board of the Vietnam Veterans Memorial Fund. The Americans who served in the Vietnam War risked all that mortality can give. They offered themselves in allegiance to the freedoms and government of America, and to the freedoms and government of others. Many gave their lives or parts of their bodies. Thank God, America has sons and daughters who answer her call.

There were bonds born on our military service that are never broken. I think that they are not even broken by death. They are bonds of creativity and friendship. It is the tug of these bonds that bands Vietnam veterans together to create this Memorial. And no bond is stronger than our love for the fallen friends.

So, in many ways, this Memorial is another gift from the Americans named on the walls and reflected in the statue. I think the gift says these things: that America affirms the integrity of her fighting forces, without apology or stain; that the veterans who returned from Vietnam have much to offer our country in all walks of life and are already giving much; and that the generation of 60 million Americans who came of age during the Vietnam War can now begin, with wisdom and maturity, to look to all the concerns of our country's future with rekindled understanding.

This is a hopeful day. As you take part, please see if your thoughts are also hopeful. Welcome.

May I pause to salute Americans who worked brilliantly to prepare this gift: our directors, Robert Frank, treasurer of the Memorial Fund; Ronald Gibbs, Sandy Mayo, John Morrison, Richard Radez, John Woods; and our staff, Robert Doubek, head of legislation, head of design, head of construction; Robert Carter, executive vice president; Sandie Fauriol, fund raiser and director of the five day national salute.

And now may I introduce Jan C. Scruggs, President of the Vietnam Veterans Memorial Fund.

JAN C. SCRUGGS, PRESIDENT, VIETNAM VETERANS MEMORIAL FUND

Thank you, Jack, for the kind introduction, and the applause. We are now ready to begin the ceremony, present the State and Territorial flags of the United States.

(The Joint Services Color Guard presents the colors. The Marine Band is playing. The Color Guard, with flags of all 50 states is marching above the V-shaped black granite Memorial, past the reviewing stand. The Color Guard moving on both sides of the Memorial, down into the apex of the Memorial where the nearly 58,000 names of Americans who lost their lives or are missing in Vietnam are engraved on the walls.)

We are now prepared to advance the colors.

Chaplain Hendry will lead us in the invocation.

CHAPLAIN OWEN J. HENDRY, U.S. AIR FORCE

Let us pray. Our Father in Heaven, we praise You and we thank You for who and what you are in our lives.

As we gather today to honor those men and women who served in the Vietnam War, we are so conscious of Your words, oh Lord, that there is an appointed time for everything under the Heavens, a time to be born and a time to die, a time for tears and a time to laugh, a time for war and a time for peace.

Today is a time to remember and a time to pay final tribute to our fallen comrades who have made the ultimate sacrifice and whose names are forever inscribed on these marble walls around us. Your presence is felt in this place as a mighty wind, oh God, echoing again the words once spoken by your prophet, Isaiah. "I have called you by name, you are mine." Keep them all close to you, oh God, in your eternal peace.

Today is a time to remember and to recognize the heroic service and sacrifice of all Vietnam veterans. Heal, oh God, the wounds and ease the pain of those who still suffer in body and mind, in heart and spirit. Pick up the dashed dreams of many and reshape the pieces into new hopes—hopes that give meaning to our lives as we journey towards You.

You have blessed America, this land that we cherish, and its people, in so many ways.

May we have the wisdom to be keenly sensitive to all the unresolved unjustice still in our midst.

And finally, as we stand here today on this hallowed ground, in the shadow of all of these imposing monuments, may we truly listen to Abraham Lincoln, as his words challenge this generation of Americans to bind up the nation's wounds and do all which may achieve and cherish a just and lasting peace among ourselves and with all nations.

Let this truly be, oh Lord, a time of mutual healing and reconciliation. Hear, oh God of our fathers, not only this prayer but every unspoken prayer offered up to you today in the silence of all our hearts.

We pray this in Your Holy Name. Amen.

JAN C. SCRUGGS. Thank you, Chaplain, and we will now post the colors.

(Posting of colors.)

Thank you, and thank you Chaplain Hendry, for the very moving invocation. And our thanks, also, to the United States Marine Band, under the direction of Major Charles P. Irwin. The Marine Band is popular.

Chaplain Hendry served in Vietnam in 1970 and 1971 and was awarded the Bronze Star and the Meritorious Service Medal.

And I extend our thanks to all of you for attending this very historic and significant ceremony dedicating the National Vietnam Veterans Memorial.

Our success is owed to many who are seated here on the stage, or seated nearby, and others such as Bob Hope, First Lady Nancy Reagan, Gerald Ford, George McGovern and many others who have helped us but who are unable to attend.

We owe thanks to many people too numerous to mention. Nonetheless, we of the Vietnam Memorial Fund extend our deepest thanks to all of you.

After graduating from high school, I was among the thousands who volunteered for combat in Vietnam. By the end of my tour, half of the men I served with had been killed or wounded, some while performing incredible acts of heroism. And many are now in wheelchairs or have other disabilities that they would not have had, had they not served their country.

Upon returning home, I, like many others, found that being known as a Vietnam veteran was a vey dubious distinction. But today this situation has changed.

All of us can now say that we are proud to be Vietnam veterans and that we are proud to have helped our country during time of crisis, and I know that our country appreciates our service.

The American people were divided by the Vietnam War and certainly that divisiveness was deep and very bitter. But that bitterness seemed to be directed towards us, the warriors, too often. But now all Americans can agree that Vietnam veterans deserve recognition and appreciation for their sacrifices, and that is why the Vietnam Veterans Memorial stands here today.

This Memorial is a reality because, during the past three years, tens of thousands of Americans have volunteered their time and effort to raise the public awareness and the funds for this impressive tribute. The money to build this Memorial was raised by Vietnam veterans throughout the country, in their local communities. Funds came from school children, from unions, from parents, from patients in VA hospitals, students on college campuses, people across our great country came together. And I speak for all Vietnam veterans when I say, Thank you, America. Thank you finally, for remembering us.

Most of us here have just taken part in one of the largest and certainly one of the finest parades that our Capital has ever seen. We have waited a long time for this kind of a welcome home and we've worked long and hard for this Memorial. And today we see this dream is a reality.

So let this Memorial recognize Vietnam veterans and their service and let it begin the healing process. And forever stand as a symbol of our national unity.

Thank you very much.

Our first speaker today represents America's largest veterans organization, the American Legion. The 2½ million men and women he leads, including 700,000 Vietnam era veterans, contributed over a million dollars to build the Vietnam Memorial. Theirs is the largest single contribution we have received, and they raised it by an unprecedented outpouring of individual concern and generosity.

It is significant to note, I believe, that the Legion's contribution came from individuals who voluntarily and willingly responded to the Legion's call for support, with donations of $5.00, $10.00, even an envelope full of loose change. Wherever they could give, they gave. And the American Legion does take that as proof that the American people's genuine support for the Vietnam Veterans Memorial has taken place, and I agree with that.

Ladies and gentlemen, please welcome the National Commander of the American Legion, a World War II veteran, a former prisoner of war and a true friend of the Vietnam veteran, Mr. Al Keller, Jr.

REMARKS BY AL KELLER, JR., NATIONAL COMMANDER, THE AMERICAN LEGION

Thank you, Jan. Today we dedicate a Memorial to a generation of Americans who fought a lonely battle. We dedicate the Vietnam Veterans Memorial to those who died in that war, yes. But, more than that, we dedicate it to those countless thousands who survived that war, only to face a battle that honor bound them to.

In the jungles and the dusty deltas of Vietnam, our young soldiers stood together and cared for their wounded and their dead. If no other characteristic distinguished the Vietnam veteran, it was his unfaltering devotion to his comrades. They left no wound go untended. They left no dead behind. And they came home expecting the nation to care about their comrades as they did.

But instead, they encountered indifference and a deep desire to have Vietnam, and those who fought there, left behind.

But this generation of veterans would not have it so. For years the wounded spirit festered. And for years the Vietnam veteran tended to himself and did what he could alone. And for years the wounded memory of his comrades cried out to be healed, waiting, hoping, crying out in a hundred tortured ways.

The Vietnam veterans yearned for a way to tend to this last wound of the war. And, finally, they decided, as they had learned in the war itself, that they would have to tend to one another alone.

But today, we know they were wrong. The American people, inspired by the undaunted determination of those men and women, responded in a historic conversion of compassion, caring and generosity. Standing at last before them was the opportunity to express the gratitude and the honor that they longed to give, but knew not how to grant.

There are those who say that the war in Vietnam brought shame on America. There are those who say this Memorial would bring shame on those who fought the war. But there are those, like the men and women that I represent, who say, "Not so." There is no shame in answering the nation's call. There is no shame in serving with honor and courage in difficult times. And there is no shame in enshrining the names of fallen comrades in immutable stone for generations to recall.

There is a legacy left for us from the Vietnam experience, and it was left to the young who fought there to show it to us. And that is the rediscovery of our capacity to care, to give, and to honor. That is no small legacy for a nation to receive.

This Memorial symbolizes, not only the supreme gift of nearly 58,000 young Americans, but also the priceless gift of renewed awareness in our capacity as a people.

With this dedication, we come not to the end of America's commitment to Vietnam veterans, but the beginning of a new awareness of their unparalleled contributions to the nation.

Generations to come will walk before these gleaming walls and, like them, will reflect. They will consider the memories of those who died. They will consider the legacy of the living veterans left. And they will take from this Memorial a promise to be ever true to their American heritage.

My fellow veterans, families and friends, we are here today to honor, to remember and to consecrate forever this piece of America, to insure that coming generations understand how dearly we hold those who served our nation in Vietnam. How painfully we recognize that the debt we owe those listed here can never be paid. And how hopefully we stand together as a nation of peace.

There are some very special people here with us today. They symbolize America's future. They are the children of our nation's Vietnam veterans.

Let us salute this nation's Vietnam veterans this afternoon by joining hands in a silent pledge that together we will care for their children, as we pray that Vietnam was America's war to end all wars.

Thank you.

JAN SCRUGGS. Thank you, Commander Keller, for those very moving words.

Our next speaker today is Mr. Billy Ray Cameron. He's the National Junior Vice Commander-in-Chief of the Veterans of Foreign Wars. Mr. Cameron is the first Vietnam veteran to be selected for a top national leadership office in the organization.

He served with the United States Marine Corps from August 1967 to March 1968, near Da Nang, Vietnam, where he earned the Purple Heart two times for wounds suffered in combat.

The Veterans of Foreign Wars has contributed $2500 to our organization very early on, in November 1979, when this entire project was still a dream. And their support has been key to our efforts.

The Veterans of Foreign Wars, in a nationwide appeal, raised over a quarter of a million dollars for the National Memorial.

The VFW has almost two million members of whom 500,000 served in Southeast Asia.

Mr. Cameron.

REMARKS BY BILLY RAY CAMERON, NATIONAL JUNIOR VICE COMMANDER-IN-CHIEF, VETERANS OF FOREIGN WARS OF THE U.S.A.

Thank you, Jan. My fellow veterans of the Vietnam War, veterans of all wars, and friends.

We are today in a divine presence of 57,939 honored guests. Their names glisten, as did their deeds. As with the brave everywhere, our honored guests have no need of ancestors.

Like many of you, I have friends and comrades here memorialized. My service in Vietnam was in the Marine Corps. I member of my squad, a winner of the Medal of Honor, is remembered here, as are 57,938 of his comrades from all our military services.

To me, this Memorial has served its highest purpose—to reunite this beloved America with the bravest and best from the Vietnam era, the living as well as the dead, and those unreturned from Southeast Asia.

Those that did our Nation's bidding, during our long and bitter struggle in Vietnam, should never be merely pitied. They were so brave that mere pity seems almost an insult.

Speaking for the Veterans of Foreign Wars of the United States and our Ladies Auxiliary, we have always held to the ancient wisdom that says, "Hate the war, yet honor the warrior."

Finally, both honor and remembrance have been accorded to nearly 2.5 million Vietnam veterans, from whom both honor and decent remembrance have been, until today, cruelly withheld.

Jan, you have performed a healing miracle here today. We, the living, may now turn to our honored dead and recall, for them and for us, the lines inscribed on the tomb of the Unknown Soldier in Edinburgh, Scotland. "They shall not grow old, as we that are left grow old. Age shall not worry them, nor years condemn. At the going down of the sun and in the morning we shall remember them."

Thank you fellow Americans.

JAN SCRUGGS. Thank you, Mr. Cameron. Our next speaker today is Mrs. Helen J. Stuber. She's the National President of the American Gold Star Mothers.

On October 11, 1967, her only son, a Marine Lance Corporal, was 23 years old and was killed in action in Quang Tre.

The American Gold Star Mothers has supported us from the very beginning, and the supreme sacrifice made by their sons had gone unrecognized until the Vietnam Veterans Memorial was built. But now Mrs. Stuber's son is honored.

Mrs. Stuber.

REMARKS BY HELEN J. STUBER, NATIONAL PRESIDENT, AMERICAN GOLD STAR MOTHERS

Distinguished guests, Vietnam veterans, Gold Star parents, ladies and gentlemen. It is indeed an honor for me, as the National President of the Gold Star Mothers, to speak to you today in this beautiful setting of the Vietnam Memorial.

I had the privilege of attending the dedication of these grounds for the Memorial to be built in May of 1980. To see the Memorial completed today goes to prove to the world that the Vietnam veterans both served and died with honor.

As a Gold Star Mother, I have faith in our country's leaders. I know that they would not have used the Vietnam conflict at the expense of the lives of some 58,000 young men and women to better a political stand. The only apprehension that I have is, I do not think that our country should ever enter into a conflict, a war or otherwise, without our whole country being behind our servicemen.

I also feel that, should we enter into a war, we should win, endure until we win, and win honorably.

My son, Dan, joined the United States Marines in August of '66. He felt it was his duty as an American citizen to serve his country in the armed forces. I have no feeling of bitterness, for it was his decision and his alone to join the United States Marine Corps.

As his mother, if my son had to be taken, I thank the Good Lord that he stood for our great country and not against it.

I am so grateful, after all of these years, that our country is pausing today, and all these last few days, to honor the Vietnam veterans in our nation's Capital for their welcome home they never received.

I would like to pay a sincere tribute to Jan Scruggs who is a determined Vietnam veteran, determined enough to make his dream of this Memorial become a reality. And Jan Scruggs, we love you.

On September 28, 1982, I had the privilege of coming to the Vietnam Memorial, so beautifully built. I saw then my son's name engraved here. I had a very deep feeling of sadness. At the same time, I had a very deep feeling of gratitude that the Vietnam Memorial had been allowed to be built in memory of the young men and women who have paid the supreme sacrifice. It will always be a constant reminder to our nation, and other nations of this world, that they have not died in vain.

In the hearts of mothers, the hurt will never go away. However, we would rather forget the sad tears and remember the happy memories of our children.

My theme for the year is "friends in harmony." The theme of today's parade was "Marching Together Again." If we, as Americans, comply with both themes, we can become a stronger nation dedicated to peace throughout the world.

In closing, and on behalf of the American Gold Star Mothers, I sincerely salute all Vietnam veterans.

Thank you.

JAN SCRUGGS. Thank you very much, Mrs. Stuber.

I've just received a letter, let me read it. It says: "Two days ago the nation paused to honor all those who served their country. Today the nation again pauses and this time to pay special honor to those who served their country in Vietnam. We honor all our veterans because their effort involves hardship and peril. It requires long time away from their families, and because of some it demands the ultimate sacrifice. But we honor the Vietnam veteran because, even more, your effort was the sum of all these things. The Vietnam veteran served his country in a time when his nation was divided. When your country called, you came. When your country refused you honor, you remained silent. With time our nation's wounds have healed and we have finally come to appreciate your sacrifices and pay you the tributes we so richly reserve. Over a hundred years ago, on the battlefield of Gettysburg, Lincoln said, 'The world wil little note nor long remember what we say here, but it can never forget what they did here.' Today we stand on the shores of the Potomac, honoring those who served on the faraway battlefields in Vietnam. The Memorial is living proof that the world will note and will long remember what you have done. With great respect and gratitude, Caspar Weinberger, Secretary of Defense."

One group of people most affected by the war are the children of those whose names are on these walls. Fortunately, a wonderful organization called "No Greater Love" has cared for their special needs. Today we have five children of men who died or remain missing, to recite the No Greater Love creed. And if we could have the children stand up now. The names of these children are: Heather Schott, a 19 year old daughter of Lieutenant Colonel Richard Schott, United States Army, missing in action since June 30, 1971. She's a graduate of JFK High School in Silver Spring, Maryland. Jeff Smith, 16 year old son of Lieutenant Commander James A. Smith, United States Navy, killed in action October 26, 1966. He's in the 11th grade at Woodson High School in Fairfax. Third, we have Christine Hess, 14 year old daughter of Major Frederick Hess, United States Air Force, a pilot missing in action over Laos, March 29, 1969, and still unaccounted for. She is in the 10th grade at Arlington, Virginia. Also, Alvin Hagerich, 13 year old son of William Hagerich, United States Army, killed in action on patrol February 20, 1970. He's an 8th grader at Eisenhower Junior High School in Laurel, Maryland. And the fifth is Mr. Alton Gibson, Jr., the 18 year old son of Sergeant Alton Gibson, United States Army, killed in action, Vietnam, January 21, 1969, and he's a high school senior.

And now if we could have you read the No Greater Love Creed.

Children from the "no greater love" organization

This Creed is very special for us and we are happy to be able to be here today to share it with you.

For the past nine years, the Creed has been recited at the "No Greater Love" Memorial Day Ceremony at Arlington National Cemetery. This ceremony was the first to honor our fathers and all American servicemen killed or missing in action in Southeast Asia.

"No Greater Love" is a living memorial to our fathers. In 1971, it began providing programs for children of servicemen missing or killed in action. From personal experience, I have always felt that "No Greater Love" has kept the memory of my father alive.

I like to think of the Creed as having been written specifically for those servicemen and their families. I ask you to think of us as we each recite a verse of the Creed.

"We believe that no greater love can be shown that when men and women so live and die that their friends may be free.

"We believe that these dead still live for us, and bid us think of life but not fear of death.

"We believe that they and the flames that burn in their memory call us to nobler deeds to help make gentle the life of this world.

"We believe that the life of freedom is a precious gift to each other and that it must always be kept burning.

"We believe that the flame of freedom reflects the face of God and points toward the sunlight of our destiny, to love and serve all people."

JAN SCRUGGS. I'd like to thank all of the children from "No Greater Love."

Our next speaker today is Brigadier General George Price, retired. General Price was commissioned through R.O.T.C. at South Carolina State College. He has served in both Korea and the Vietnam War.

He was wounded seriously in Korea and evacuated. His decorations include the Legion of Merit, the Bronze Star, Meritorious Service Medal, Air Medal, Army Commendation Medal, Purple Heart, and the Combat Infantryman's Badge with a Star for service in two wars.

General Price is currently special assistant to the President of Unified Industries in Springfield, Virginia. He has tirelessly given

of his time and effort to make this Memorial a reality. And here he is, Brigadier General George Price.

REMARKS BY BRIGADIER GENERAL GEORGE B. PRICE, USA (RET.)

Thank you very much, Jan, and distinguished guests, fellow Vietnam veterans, ladies and gentlemen.

Words can hardly explain the deep emotion that I feel today, sharing with you your coming home party. And certainly I've been deeply honored and privileged to work with some of the most distinguished citizens and legislators that we have in making it a reality.

This has not been an easy task and, as we proceeded through the process, it's identified some areas that we need to keep working with. It showed how easily we can become divided again over a simple issue. It shows that sometimes we don't know how to deal with compromise for the good of the whole and, at other times, we would either do things my way or take my ball and go home.

We, as a nation, cannot survive that attitude at all. Jan Scruggs and his colleagues had a beautiful dream. That dream has become a reality through tireless work, persistence, resiliency and the help of the people. It was served to demonstrate that we, as Americans, collectively and together, can achieve anything that we put our minds to.

This Memorial, this two acre plot, belongs to all Americans. Those of us who were privileged to serve our country deserve special recognition because it is our country. And, as we stand here today and celebrate, there are many of our comrades who will never see this Memorial. They will never be able to afford the trip to Washington. They are serving on the far shores of the world right now, and they will never know about this Memorial except as you describe it to them. And I beg you to please be positive and let then know that their country recognizes their great sevice, that they, at long last, are being rewarded for having served their nation honorably.

And I believe it's important that we single out for special recognition those ladies who served so diligently and so professionally in new ventures in Vietnam, unlike other wars in which our country had been engaged. These ladies saw the devastation of battlefields, they pieced bodies back together, they served in technical specialties that heretofore they had not been privileged to serve in. And they served their country honorably. Their blood bled red on the battlefield. And some of them, too, gave their lives. And I think it's time that our country looked at them dead in the eye and said, "Thank you, we thank you very much."

As Jan Scrugg's dream becomes a reality, I think it challenges us to create in our country an attitude free from all the vestiges of discrimination based on race, color, creed or national origin, where all Americans can aspire to achieve their goals consistent with their ability to work, their willingness to work and their talents. And we must develop special programs to be sure that those veterans who have served their country so honorably can get into the main stream and join those who sat by and watched them march off to war.

As I look at this total Vietnam experience, I have to be moved by the words of James Weldon Johnson, in his poem, "Lift Every Voice and Sing," and I will share it with you, please.

"Stony the road we trod,
Bitter the chastening rod,
Felt in the days when hope unborn had died;
Yet with a steady beat,
Have not our weary feet
Come to the place for which our fathers sighed?
We have come over a way that with tears has been watered,
We have come, treading our path through the blood of the slaughtered,
Out from the gloomy past,
Till now we stand at last
Where the white gleam of our bright star is cast.
God of our weary years,
God of our silent tears,
Thous who has brought us thus far on the way;
Thou who has by Thy might
Led us into the light,
Keep us forever in the path, we pray.
Lest our feet stray from the places, our God, where we met Thee,
Lest, our hearts drunk with the wine of the world, we forget Thee;
Shadowed beneath Thy hand,
May we forever stand.
True to our God,
True to our native land."

Thank you.

JAN SCRUGGS. Now the Deputy Administrator of the Veterans Administration. Prior to his present appointment, he was the Deputy Administrator for the Peace Corps, and he was a naval officer for 20 years, 8½ of them spent as a prisoner of war in North Vietnam. He is a recipient of the Silver Star, two Legion of Merits, two Bronze Stars, the Distinguished Flying Cross, two Purple Hearts, and numerous other awards.

We are indeed honored to present you the new Deputy Administrator of the Veterans Administration, the Honorable Everett Alvarez, Jr.

THE HONORABLE EVERETT ALVAREZ, JR. DEPUTY ADMINISTRATOR, VETERANS ADMINISTRATION

Thank you, ladies and gentleman.

I would like to congratulate Jan Scruggs and the other members of the Memorial Committee for their work in insuring that there would be a Memorial and that this Memorial would be appropriate to the memory of the Vietnam veteran.

The years that have passed since this country ended its involvement in Southeast Asia have been marked by tremendous variations in the mood of the nation. Many Americans today still have a difficult time in dealing with that war, with its effect on our society and with the legacy of those of us sent to fight it.

But no one can debate the service and the sacrifice of those who fell while serving.

It is unfortunate that the circumstance under which the more than two million veterans who returned from Vietnam did not lend itself to the type of welcome given to the veterans of other wars, or even to those of us who were prisoners in Vietnam. But, with this long overdue week of activities, with this parade today, and especially with this dedication, America is saying, "Welcome home."

Here is this great city, where the nation's affairs are conducted in these buildings new and old, that give us both a sense of our history and of our destiny, Washington, also a city of monuments, landmarks of stone and statue, testified to the deeds and acts of those who have shaped the nation that we have become.

But the Vietnam Veterans Memorial is unique. Vastly different from the monuments of independence and emancipation that flank it, it will be a Memorial visible for all time to come to those who make and implement our nation's laws and to those who come to this city to see the symbols of our national strength. No one can doubt that the Vietnam Veterans Memorial will be an eternal touchstone for the conscience of this nation. It will tell us, as no words can, of the awesome responsibility that we have as members of a free and a dedicated society.

This Memorial is a tribute to all who served in Southeast Asia. It vividly enshrines the memory of those who did not return, and it symbolizes the heroic, unselfish acceptance of duty by the millions of Americans who went there.

The words that we speak today are in vivid contrast to the eternal silence of this Memorial. That silence, inspired by the reverence and the respect for those who died and those who served, is in and of itself a tribute.

There was a time, long ago, when words would have mattered more. But at this place, for all time, it is our heart that speaks.

I am proud to have served and I am proud to be with you today, and proud to say, "Welcome home." Thank you.

JAN SCRUGGS. Thank you so much, Mr. Alvarez.

Our next speaker today has been a very special friend of the Vietnam Veterans Memorial Fund. Senator John Warner of Virginia. You know he volunteered to fight in World War II and Korea, and he was Secretary of the Navy during the Vietnam War.

And three years ago, we asked him to volunteer once again, to help us build a national Vietnam Veterans Memorial. And he helped us get the initial funds we needed to begin the Memorial Fund and has continued his active involvement.

All Vietnam veterans owe Senator John Warner some very special thanks, and here he is.

HON. JOHN WARNER, U.S. SENATOR

Thank you very much, Jan Scruggs, Chairman Wheeler, the veterans of Vietnam and their families who have traveled so far, distinguished leaders of veterans organizations, ladies and gentlemen.

I stand here with you today not as a United States Senator, but as a buck private in the rear ranks of the volunteers of Jan Scruggs.

I express, in those two most important words in our language, my heartfelt thanks to each of you. Thank you for coming. You cared enough to be here today. And the pictures of you now being taken will be recorded in posterity, for you, indeed, are a living memorial to this testament that will be here forever after to these brave men and women.

In the history of our nation, never has there gathered in the nation's capital a group of veterans on a more important occasion than this.

We are here today to dedicate a monument—a monument which will stand as a symbol of everlasting hope—hope that the human sacrifice of the service men and women and their families will serve as a check and a balance, far greater than any laws passed by Congress, be it the War Powers Act or others, and impress on future and present leaders of America to pursue every possible solution to resolve international conflict before committing Americans to battle.

The hope that, if this nation ever again must respond to the call to defend freedom, that those at home will realize that victory can only be achieved if we support and follow those we send to fight.

This monument also will serve as a symbol of hope to the Congress of the United States and to the leaders of America, that we indeed have a debt to the men and women who served in Vietnam, a debt as yet to be repaid, particularly for those who need special help.

Ladies and gentlemen, stand as I am, and as you are today, and look, for these names shall forever be embraced, to our right by our first President, George Washington, and to our left by Abraham Lincoln. Indeed, this will always be one of the most hallowed pieces of ground in America.

Some may realize that, just beyond that hill, there is nearing completion a monument to the 56 signers of the Declaration of Independence. They, too, made sacrifices, but let us also remember that the Vietnam veteran made sacrifices no less in the cause of freedom.

I want to share with you a letter that I wrote and posted to the President of the United States just before coming here today.

"November 13, 1982. Dear Mr. President. Today the veterans of Vietnam and their families from all across America are honoring their fellow comrades. This historic moment, this monument, was the dream of many. But one man had the courage, the determination, to lead all in making it come true. On behalf of millions of Americans, Mr. President, it is my privilege to nominate Jan Scruggs, President of the Vietnam Veterans Memorial Foundation for the highest civilian honor this nation can bestow, the Medal of Freedom."

JAN SCRUGGS. Thank you very much, Senator.

I will now ask Chaplain Sullivan to lead us in prayer. Chaplain Max Sullivan was ordained in the Lutheran Church in 1965 and entered the Army as a Chaplain in 1968. He served with the Eleventh Brigade of the Americal Division in 1969 and '70 and received the Silver Star for gallantry, and the Purple Heart.

He is presently the Chaplain of the United States Army Field Station in Augsburg, Germany.

Captain Sullivan.

CHAPLAIN MAX D. SULLIVAN, U.S. ARMY

Let us pray.

Standing before this monument, we see reflected in a dark mirror dimly a time that was. And we remember ourselves, our lovers, our friends, our nation. We remember our enemies, our leaders, our buddies, our families. We remember the dreams we shared, the fear and the terror we endured, the love making, the frivolity, the hate and the anger, the desire for survival and its uncertainty, the desperate need to understand.

Oh Lord, our God, let the outstretched arms of this monument embrace us with tranquility and your compassion.

Standing before this monument, we see reflected in a dark mirror dimly a chance now to let go of the pain, the grief, the resentment, the bitterness, the guilt. To let go of impossible dreams, old realities, lost innocence, the loss of unity, the loss of wholeness.

Oh Lord, God, let the outstretched arms of this monument be your instrument of forgiveness and your peace.

Standing before this monument, we see now a time for honor, a time for tribute, for yet another generation of warriors who answered the call, for yet another generation of patriots who served at home, for yet another generation of families and lovers who endured and sacrificed.

Oh Lord, God, we dedicate this monument yet to another generation who rendered unto Caesar that which is Caesar's. Let it be so, oh Lord God. Amen.

JAN SCRUGGS. Thank you, Chaplain. It's time to present arms.

(The Band plays "The Star Spangled Banner. The flags of the 50 States are being marched out of the Monument area, while the United States Marine Band is playing.)

FINAL REMARKS BY JAN C. SCRUGGS

Now is the time that we've been waiting for. Vietnam veterans have come to Washington, D.C. from all over the United States to take part in this ceremony, to dedicate the Memorial to all who served.

But, as we prepare for the dedication, let us take a moment to remember those who were taken from us. I would like to read a quote written by an Arthur named Phillip Caputo, "is a true story of the death of his best friend in Vietnam." He writes:

"We never left our wounded on the battlefield. We brought them off, out of danger and into safety, even if we had to risk our lives to do it. That was a standard we were expected to uphold. But I know I could not have done what Levy had done. He pulled himself up onto his wounded legs and he tried to save the wounded medic. He did it the way he had done everything, naturally and because he thought it was the right thing to do. There was so much lost with you, Levy, so much talent, so much intelligence and so much decency. You were the first from our class to, there were others, but you were the first, and more, you embodied the best that was in us. You were a part of us and a part of us died with you, a small part that was still young and that had not yet grown cynical and bitter and old with death. Your courage was an example to us and, whatever the rights or wrongs of the Vietnam War, nothing can diminish the rightness of what you tried to do, because you died for the man you tried to save. You were faithful, Levy, but your country was not. Because, as I write these words eleven years after your death, the country for which you died wishes to forget the war in which you died. Its very name, Vietnam, is a course. There are no monuments to its heroes. There are no statues in small town squares. There are no plaques. There are no public wreaths and there are no memorials. For plaques and wreaths and memorials are reminders, and they would make it harder for your country to sink into the amnesia for which it longs."

We will now, all of us together, dedicate the Vietnam Veterans Memorial, after we sing "God Bless America." The band, please.

(Band plays and the audience sings "God Bless America.")

Let us all observe together a moment of silence.

Ladies and gentlemen, the Vietnam Veterans Memorial is now dedicated. How about a hand?

One second now, one second. The ceremony is not finished at this time. Let's hold the crowds back. We'll all have a chance to do what we need to do.

But we'd now like to have a closing prayer and one other thing. This closing prayer will be led by Chaplain Resnicoff who graduated from Dartmouth and entered the Navy as an Ensign. His first assignment was in the Mekong Delta in Vietnam, as part of an operation called "Game Warden." And his ship was the first into Cambodia. He received the Navy Commendation Medal and numerous other awards.

He left the Navy in 1972 to attend the Jewish Theological Seminary of America in New York City and he came back on active duty as a Chaplain.

Ladies and gentlemen, here's the Rabbi.

CHAPLAIN ARNOLD E. RESNICOFF, U.S. NAVY

Some 2,500 years ago, the prophet Jeremiah cried out with words filled with pain and anguish, words of despair, words which might have come out of the mouths of our Vietnam veterans until today.

"Why have we been smitten?" he asked, "and then for us there was no healing. We looked for peace but could find no good. We looked for a time of healing and, behold, we found terror."

Oh Lord, our God and God of generations past, help us, we pray, make this the beginning of the time of healing that we all seek. Help us ease the terror and the pain of all who suffered because of war. And help them and help us find the way to peace.

God, let this monument and this dedication forever remind us that we will come together to mourn our dead. We will come together to reach out to our wounded. We will come together to remember and to honor our brave. Only then may we have the vision to dream our dreams again. May we have the faith to pray our prayers again. May we have the courage to march along together again and, together, help make this the kind of country and the kind of world for which we all pray.

May we all join together and say, Amen.

JAN SCRUGGS. Thank you, Chaplain.

Before we actually retire the colors, I just want to note that the National Park Service volunteer guides are here to assist everyone in finding the names that they want to find on the Vietnam Veterans Memorial. They are wearing yellow hats and we will not open the fence until the ceremony is over and the colors are retired. Let us now retire the colors.

(The band plays as the colors are retired.)

THE REVEREND THEODORE H. EVANS

"They shall not grow old, as we that are left grow old. Age shall not weary them, nor the years condemn. At the going down of the sun, and in the morning, we will remember them."—"For the Fallen," st. 4 by L. Binyon

I take it that our task here this morning is to remember and I want to count on you to help me to do that by adding your remembrances to mine; your thoughts to my thoughts; your prayers to my prayers. I want this to be our remembrance, not only of those who have died, our family members, our friends, but also of those who are left, ourselves, those who were involved in as many ways as there were to be involved in the conflict, the struggle, the pain and sorrow of the war in Vietnam. This is a service of remembrance. Jesus said, "Take, eat, drink in remembrance of me."

About twenty years ago on this Sunday I participated in a similar service in a little church used by the Anglican-Episcopal Congregation of Saigon. We called it St. Christopher's then. I know there are a few people here today who worshipped in that church. It was also a Remembrance Sunday, on the Sunday closest to November 11th.

In this country (because of the difference in time between here and Europe) we are not so keenly aware of the significance of the time for this annual remembrance until

we recall that the announcement of the signing of the Armistice at the end of World War I came in Europe on a Sunday morning, at the eleventh hour of the eleventh day of the eleventh month, 1918. Churches about to begin their worship that day paused to remember their dead. They have done so ever since. We did it that Sunday which seems so long ago. We are doing it here today.

I remember feeling in that service a sense of terrible ambivalence: the ambivalence of remembering the dead (especially on the anniversary of war that was supposed to be the war to end war) at a time and in a place where another war was beginning. I remember the feeling of ambivalence in honoring people who had made sacrifices for their countries, their convictions and their friends while wondering how it could have happened that such terrible sacrifices became necessary. And I remember wondering who it was we were supposed to be remembering. Was it only soldiers? Was it only those on "our side?" Was it everyone whose life was lost or broken or disrupted by a century of wars?

Now it is 20 years later and those questions and feelings of ambivalence remain for me and they are harder to bear because there are so many thousands more to remember. All those thousands named and thousands more un-named and the families of names that go with each one.

I want to talk with you about remembering for a few minutes, to say what I think it means for us to remember, and where our remembering may lead us.

The Bible gives us some clues. Remembering in a Biblical context means something more than we sometimes mean, more than a casual backward glance to something or someone long ago. Remembering for our religious predecessors meant something more like bringing the past into the present. To remember even the name of a person who had died was to remember his very being, and to bring that person into the present with reality, substance and power. To remember means what the word itself suggests; it is to re-member, to put together again, to reconstruct. It is that kind of remembering that we have been doing in this city in the past few days, not passing thoughts but a bringing of the past into the present with power and emotion and caring and love. We have been overcome by our memories, of a time and a place, but mostly memories of people. That is what comes through in so many conversations, not the memories of hardships and battles but of all those people, the ones we knew and with whom we shared and made deep relationships if only briefly.

Remembering is hard work. It means reliving the pain, the alienation, the debate. It means recalling the dehumanizing that is always, tragically, a part of war, when enemies turn each other into something less than human so that they can treat them as less than human.

Remembering Vietnam means something similar to what it may mean for a person who has had some terrible childhood experience that restricts his or her growth. It has to be remembered if she or he is to be whole. For us at this time in our history it means that we have to pull a painful memory from the recesses of our collective memories, to look at it, to understand it, to begin to reconcile it as an important and tragic part of our national life but one with power to heal and make us whole again.

That kind of remembering has always been a part of our religious life too. That is why we read the Bible, to remember the old stories, to relive them in our own way, to recognize ourselves in them, and to discover in ourselves that mixture of good and evil, that we know ourselves to be, people with moments of glory and heroism, and people with moments of horrendous cruelty and stupidity. But in all the stories there is an affirmation that while we remember, there is a God who remembers us, who loves us, who takes and judges our worst and brings it to life. Part of that strange Gospel you heard this morning when Jesus is talking about a terrible time to come when all hell would break loose is saying just that, that even in the darkness of that time God is already there, involved, picking up the pieces, remembering, putting us and our lives and our shattered communities back together. The consistent testimony of Scripture and our own experience is that God is always found where the wounds are, where the agonies are, even where the defeats are. Surely the Vietnam experience no matter what our opinion or part in it, was a kind of apocalyptic, shaking moment, but also one that had and still has the potential to be for us that place where God re-members us; where we can find that God has already joined us with the living and the dead and the wounded and made us whole.

Of course, to discover God in the middle of chaos is no guarantee that we will live happily ever after. The author of the Epistle to the Hebrews reminds us, "It is a fearful thing to fall into the hands of the living God." It seems to mean often that we are called to take extraordinary risks, risks that make us terribly vulnerable. I want to hold up for you on this occasion the incredible risks that the organizers of this memorial time and of the events of these last days have themselves taken: the risk of doing something that everyone else had shied away from. The risk of criticism and humiliation in daring to expose old wounds and old memories, the risk of just being able to say, "This is what we must do to reconcile our people, our nation, our veterans."

Perhaps their risk-taking that has had such a wonderful result can move us to take the next steps: to make certain that the real needs of veterans are met; that their families and survivors, the injured and the wounded are cared for as they should be cared for. It is inconceivable that a nation that is willing to spend nearly a quarter of a trillion dollars on its defense cannot also care for its people and especially those who gave themselves in such tremendous ways.

And perhaps we can also take the steps needed to heal the wounds of racial tensions and injustices and finish the unfinished business from which war and preparation for war have diverted us to ensure that all people enjoy the benefits as well as the responsibilities of our society.

Isn't it also possible that in our remembering of so many sacrifices and so many losses of our most precious resource, the youth of our nation, we will find other ways of solving problems and resolving differences instead of war? As we discover the power of God's reconciling love in Christ's sacrifice, can we take the first steps toward making sure there will never need to be another war? Can we reach out first in acts of reconciliation in a divided nation and a divided world? Can we discover again out of darkness and tragedy a new vision, a new perspective that sees the world as one: one people, one fellowship, joined in God's love for us?

Somewhere over our heads there are some men in a tiny spacecraft. They can see the earth as a lovely, glowing jewel in the vastness and darkness of space; life in all its infinite variety as we have been privileged to know it. They see it whole, its national boundaries erased, its conflicts forgotten. They see with a new perspective. Our remembering can help us to have that kind of perspective. We can be renewed by the sacrifices of those who have given their lives in wars, and we can be renewed by Christ's sacrifice which once looked like defeat. We can become instruments of God's peace. Pray that by our remembering we may become a living memorial, bound in love with the living and the dead as ministers of peace.

A Prayer Attributed to St. Francis

Lord, make us instruments of your peace. Where there is hatred, let us sow love; where there is injury, pardon; where there is discord, union; where there is doubt, faith; where there is despair, hope; where there is darkness, light; where there is sadness, joy. Grant that we may not so much seek to be consoled as to console; to be understood as to understand; to be loved as to love. For it is in giving that we receive; it is in pardoning that we are pardoned; and it is in dying that we are born to eternal life. Amen.

Mr. WARNER. Mr. President, literally hundreds of thousands of our fellow citizens made the Vietnam Veterans Memorial possible. Through their commitment to and support of the dream of one man, Jan Scruggs, America's Vietnam veterans now have a memorial which stands as a lasting tribute to their service and dedication.

Neither space nor time permits me to thank each and every person who contributed time, money and effort to build the memorial, but special recognition is due the members of the Vietnam Veterans Memorial Foundation board of directors and staff: John P. Wheeler III, chairman, and Robert F. Frank, Ronald F. Gibbs, George W. Mayo, Jr., John C. Morrison, Richard E. Radez, and John O. Woods, Jr., and Executive Staff—Jan Scruggs, president; Robert Doubek, project director; Col. Robert A. Carter, USAF, retired, executive vice president; Sandie Fauriol, campaign director and director of the National Salute to Vietnam Veterans; Karen Bigelow, assistant campaign director and deputy director of the National Salute; and Col. Kelvin Hunter, USA, retired, parade coordinator.

And two outstanding volunteers: Gen. Michael S. Davison, USA, retired, and Brig. Gen. George B. Price, USA, retired.

Finally, Mr. President, as I have said so many times before, I close my remarks with one final thought—one final prayer.

Let us pray that if this Nation must ever again send forth its men and women to make sacrifices for the cause of freedom, we at home support and follow those we send to fight.

COL. JOHN G. CAMPBELL RETIRES

Mr. JEPSEN. Mr. President, I feel sure that all my colleagues are aware of the assistance and support provided by the military liaison offices of the Senate.

The Chief of the Army's Senate Liaison Office, Col. John G. Campbell, is retiring from the Army after 22 years of dedicated, outstanding service.

For the last 3 years, Colonel Campbell has assisted us in the U.S. Senate, resolving our soldier constituents' most difficult personal problems; assisting our legislative aides who work on military legislation; and escorting many of us on inspection and factfinding visits within the United States and abroad.

Colonel Campbell is an intellectual with many excellent publications and acadmemic awards to his credit. He has had a distinguished military career and has been highly decorated for meritorious service in peacetime and for conspicuous gallantry and heroic actions in wartime.

We in the Senate and the Nation owe much to Colonel Campbell. It is a privilege to have this opportunity to honor this soldier, so well known to all of us, and to wish him success in his future endeavors.

A VISIT TO CYPRUS

Mr. PERCY. Mr. President, sharing with many a deep and abiding concern for a just and peaceful resolution of the Cyprus problem, I visited Cyprus this past summer to see conditions for myself. I would like to share a few brief observations with my colleagues.

One feels very much at home very quickly in the lovely country of Cyprus, because of the great personal warmth and hospitality for which Cypriots are noted around the world. I was fortunate to be able to visit many major towns and districts of Cyprus and found then intensely interesting, each in its own way. Particularly memorable for us were the open-hearted welcomes accorded us in the villages of Stroumbi and Kouklia, and in the cities of Nicosia and Paphos. We were also greatly impressed by the sense of history one finds everywhere in Cyprus and by the unique archeological sites and artifacts we had the pleasure of studying.

During our visit, we spent a great deal of time discussing various aspects of the Cyprus problem with the leadership of both communities, as well as with representatives of refugee organizations and the Greek Cypriot Missing Persons Committee. These discussions brought home once again the difficulties and complexities of the problem, as well as the depth of human tragedy still being experienced. In these talks, I could sense the deep frustration at the slow pace of progress toward resolution of the Cyprus problem. Nevertheless, it is encouraging that both communities realize that the only path to a lasting settlement lies through direct negotiations between them. I have continued to pursue the problem of the missing persons since my return.

The United States strongly supports the efforts of the United Nations Secretary General, through his special representative, Ambassador Gobbi, to resolve the Cyprus problem in a manner that is equitable and permanent. Shortly after he took office last year, President Reagan informed Congress that a just resolution of the problems of Cyprus will be a priority for his administration. I strongly support a high priority being assigned to resolving the problems of Cyprus.

Congressional interest in the Cyprus problem remains high. Since 1974, congress has appropriated approximately $145 million in relief assistance for Cyprus. We have recently begun earmarking a significant portion of this assistance for scholarships for the children of refugees and other needy persons to study in the United States. I understand that 60 Greek and Turkish Cypriot students are beginning their studies under this program at American universities this month. We enjoy having these wonderful young people here. But I have always wondered what happens to so many young people who leave Cyprus to attend universities in the United States, England, and other countries. I wonder how many stay abroad. How many marry and raise families abroad, rather than returning to Cyprus to marry and help build their own country? These are the best and the brightest of young Cypriots.

In our country, we call it a brain drain. Developing countries, such as Cyprus, cannot afford to lose their most promising young people. Yet there is no university in Cyprus, so college-age young people must be sent abroad to study at increasingly great expense every year; too many, as I have noted, never return to help build the future for Cyprus. Also, Greek and Turkish Cypriots are thereby denied the opportunity of getting to know each other at an early age in an academic environment.

I understand the political difficulties which would complicate any new bicommunal project in Cyprus, but I believe that these difficulties can be solved because I found a commonality of purpose regarding the need for higher education in Cyprus. If the two communities could agree in principle on the establishment of a university in Cyprus fully accessible to all Cypriots, I have pledged to devote my best efforts to help insure that it would have the necessary international academic recognition and financial support. I believe that successful establishment of a university could open channels of communication between the two Cypriot communities and help encourage cooperation in other fields.

I left Cyprus for a brief visit to Lebanon. I note with appreciation the crucial assistance provided by Cyprus to facilitate the successful withdrawal of PLO forces from Beirut. The cooperation of Cyprus may have saved many lives, and it clearly helped to resolve a dangerous crisis.

U.S. TROOPS IN EUROPE

Mr. PERCY. Mr. President, last month, a strong delegation of Senators attended the 28th annual session of the North Atlantic Assembly in London. During the committee and plenary meetings, the question of the unilateral troop reduction proposed by the Appropriations Committee was a central point of discussion and concern among the parliamentarians from NATO's 16 States. As John Nott, the British Defense Secretary, warned in a speech during the plenary session:

> It is well to remember that it is not only numbers, but the perception of change, that is important. Any reduction which was perceived to cast doubt on the strength of the American commitment to Europe would serve only to weaken deterrence. It would be greatly welcomed by the Soviet Union, and that outcome could scarcely be in American interests.

On the final day of the session, the North Atlantic Assembly unanimously adopted a resolution presented by its Military Committee which urges all NATO governments to refrain from unilateral troop reductions. As one who spoke in opposition to the Appropriations Committee proposal during the meetings of the Military Committee, I welcome this forceful statement on the part of NATO's parliamentary organization and commend it to the attention of my colleagues.

On Tuesday, November 30, the Foreign Relations Committee held a hearing with administration witnesses to address the foreign policy, arms control, and security implications of the various NATO-related provisions of S. 2951, the fiscal year 1983 defense appropriations bill. These provisions include the proposal for a 20,000-man troop reduction, matters related to burdensharing and host nation support, and reciprocity in trans-Atlantic defense trade.

During the hearing, Under Secretary of State Lawrence Eagleburger advised the committee that the administration is particularly concerned that the current Appropriations Committee bill, if passed, would "signal a broad U.S. retreat from its responsibilities and its leadership." The Under Secretary concluded his tightly reasoned presentation by reminding the committee that the Atlantic Alliance has provided the West with more than 30 years of peace

and security. In Secretary Eagleburger's words, "The world will be dangerous enough in this decade. It is not in our interest to tamper with North Atlantic security."

At the start of the hearing, I read into the record a statement on these issues sent to me by General Bernard Rogers, Supreme Allied Commander Europe, who could not attend the hearing due to previously scheduled NATO meetings in Europe. He did attend the North Atlantic Assembly and address it, however. Like Under Secretary Eagleburger, General Rogers makes a compelling argument against adoption of the damaging NATO provisions proposed by the Appropriations Committee.

Mr. President, I ask unanimous consent that the text of Under Secretary Eagleburger and General Rogers' statements be printed in the RECORD, followed by the text of the Resolution on Alliance Security adopted by the North Atlantic Assembly.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

UNDER SECRETARY EAGLEBURGER'S STATEMENT TO THE SENATE FOREIGN RELATIONS COMMITTEE

I welcome the opportunity to testify today on the American role in NATO. Too often in foreign policy, as elsewhere, we take the most important things for granted. Too rarely do we examine the foundations of our security and our role in the world.

This is an important time for the U.S. to examine and state clearly our policies toward European security:

We are now almost two years into the Reagan Administration.

In the Soviet Union, a new leadership has just taken up the reins of power. While it is unlikely that Mr. Andropov and his associates will veer far from existing Soviet policies, they are undoubtedly now studying the opportunities and constraints they face. They are sizing up our resolve and steadiness, and in particular our ability to maintain a unified Western Alliance.

In Europe, we and our allies are succeeding in putting behind us contentious questions regarding the Siberian gas pipeline and are about to start an effort to shape a coordinated western approach to East-West economic relations for the rest of this decade.

Against this backdrop we are now hearing voices in this country calling for a scaling down of the American role in NATO. Most disturbingly, we are facing specific proposals in the Senate and the House which would, among other things, reduce the level of US forces in Europe and interfere with our ability to meet our commitment to modernize NATO's nuclear forces.

When such views surfaced in the past, the national commitment to a strong Atlantic Alliance prevailed. Having fought two wars to defeat aggression in Europe, the American people know that our interests cannot be insulated from events acros the Atlantic. We decided after the second of those wars—as we should decide again now—that alliance with the other Western democracies is vital to our nation's security and prosperity. If we have learned anything from the history of this century it is that we cannot retreat to a fortress America, nor safely disengage from European affairs.

Europe has become more, not less, important for us over the three decades since the Alliance was formed. The European and North American economies are now so tightly knit together that neither can grow without the other. The allied countries are our main export market. American direct investment in Europe is an important positive factor in our balance of payments and contributes heavily to the profitability of American business.

The U.S. and Western Europe are more than simply trading and political partners, however. Our security is unalterably linked with theirs. Western Europe is quite literally our first line of defense. It is a center of our global competition with the Soviet Union and by far the most alluring object of Soviet ambitions.

NATO's strength and cohesion have protected Western freedom and democracy and kept Europe peaceful for over three decades, despite a menacing Soviet military presence. If we sometimes forget that our European allies stand face to face with Soviet tanks and with Eastern totalitarianism, if the Soviet challenge sometimes seems distant to us, it is because NATO has been effective.

In recent years, Soviet military might has grown more rapidly than ever. Soviet foreign policy has become more assertive and aggressive. The invasion and occupation of Afghanistan is Moscow's first attempt since the end of the second world war to expand by force the area under its direct control. The assault on the people of Poland shows that the Soviet leaders will not permit free institutions in countries where it has military dominion.

The new leadership in Moscow faces basic choices about the Soviet role in the world. If they see an America drawing inward, a demoralized Western Alliance, and our European partners in doubt about the U.S. commitment, their incentive to act with greater restraint will be diminished.

The need for a strong Atlantic Alliance based on unity of purpose and steady American leadership has never been more critical.

The Reagan Administration is particularly concerned, therefore, by the prospect of legislation that would cast doubt on the steadiness of the U.S. commitment to NATO. The current Senate defense appropriations bill, which contains provisions to cut back American participation in NATO defense programs, would, if passed, signal a broad U.S. retreat from its responsibilities and its leadership.

Passage of this legislation would be a fundamental departure from the historical bipartisan post-war U.S. approach to national security. Never has the American role in the defense of Western Europe been reduced through legislation. Never has the U.S. backed away from its NATO commitments. And never have the elected representatives of the American people voted not to stand by our Allies and back up our defense commitments. Are we really ready now to take such a fateful step? Do we really want to greet the new Soviet leadership with a sharp deviation from the policies that have so successfully preserved Western security and American leadership in Europe?

The provisions that have been inserted in the Senate version of the proposed appropriations act that would be most damaging are:

The reduction of 18,900 troops of the American force planned for the end of Fiscal Year 1983;

The elimination of funds to procure heavy equipment for prestocking at two sites provided by Belgium and the Netherlands;

The elimination of the American portion of the funding for 93,000 German reservists who will support our units in wartime under the Host Nation Support program.

Cuts in funding for the Ground Launched Cruise Missile, which would force us to stretch our deployment schedules.

And restrictions on transatlantic defense cooperation and trade.

Let me emphasize one point right away. This Administration, like the Congress, is seriously concerned about the budget. We recognize that a sound economy is the necessary foundation for a successful foreign policy. But the provisions I have just outlined have almost nothing to do with budgetary austerity. The total saving contemplated by these anti-NATO proposals before the Senate is about 150 million dollars, which is less than one tenth of one percent of the total defense budget.

If the political consequences of these measures were as insignificant as the budgetary savings, I would not be here today. But the impact of these measures on our security would be out of all proportion to their budgetary significance.

I am aware that this legislation reflects a concern about the fairness of the distribution of defense burdens within the Alliance. Like you, we want the allies to do more for the common defense. And it is true that U.S. defense spending is now growing faster than that of the allies. But let me remind you that we in the U.S. neglected military programs for nearly a generation and that only today are we repairing the resulting gaps in our forces. We must sprint now because we went so slowly for so many years.

In contrast, the allies have kept up a strikingly steady pace. During the 1970s, their defense spending rose at a rate of 2 percent per year in real terms. Our defense spending declined in real terms by 1 percent per year during the same period. If we had matched the allied growth rate during the 1970s we would not need to accelerate now. Conversely, had the allies failed to maintain their steady effort in those years—had their defense spending decisions been dominated by considerations of what some here in the U.S. now call "equity" rather than need—the Alliance would not be as secure as it is today.

In any case, it would be a tragic mistake to allow concerns about burden-sharing to prevent us from doing what is necessary for our own security. Following that policy would allow those whose defense performance is weakest to set the standard. We are fortunate that the allies did not adopt such an attitude during a time of less-than-adequate U.S. performance.

After all the arguments and counterarguments about burden-sharing have been heard, we must, at the end of the day, ask ourselves one basic question: Will the United States be more or less secure if these provisions are enacted? I believe the answer is clearly "less secure." Let me outline the effects I foresee.

First, the American commitment to NATO would be placed in doubt. I do not see how the advocates of this legislation could dispute this or argue that causing doubts about our commitment would advance our interests. Nothing could weaken the Alliance more than the perception in Europe that the U.S. is not determined to preserve European security. Our allies would take little comfort in the fact that the amount of

money involved is small. They would see passage of these cuts as a statement of U.S. intentions; they would interpret it as the beginning of a more general American retreat from Europe.

The Soviets would undoubtedly try to exploit the inevitable doubts and fears of the Europeans. Dividing us from our allies and pushing us out of Europe are, of course, central goals of Soviet foreign policy. The Administration has, as you know, recently made progress in healing divisions and rebuilding consensus and confidence in the Alliance. This legislation could undo what has been achieved.

Second, reductions, especially reductions in the number of American troops in Europe, would send the worst possible signal to European publics about the importance of a strong defense. NATO and U.S. leaders have been warning Europeans that the Soviet threat is growing. Reducing American forces or abandoning planned improvements would make those warnings sound hollow and undermine European public and Parliamentary support for defense expenditures.

Proponents of this legislation may claim that our doing less would jolt our Allies into doing more. I see no basis for such wishful thinking. U.S. cuts would have the opposite effect. If we do less, the Europeans will do less, and we will all be less secure.

Third, these cuts, while small in dollar amounts, would hit priority, cost-effective programs especially hard. The proposed troop cuts could leave our combat forces undermanned, or force the withdrawal of other essential units. Reductions in funding for prepositioning combat equipment and our share of the host nation support agreement would compound the difficulties and costs of wartime deployment.

We are constantly striving to make our dollars buy more fighting strength. These programs enhance our combat capacity by improving what is sometimes called our "teeth-to-tail" ratio. The proposed cuts would therefore reverse a major effort to improve our forces' effectiveness, while saving very little money. Moreover, they would not simply penalize our Allies but our own forces, by denying them the means to carry out their rapid reinforcement mission.

Fourth, these cuts would damage the very programs in which allied performance has been especially good. The Europeans have joined the host nation support and prepositioning programs with the clear and correct understanding that we would match or supplement them. If we now back down on our side of the bargain, we will not only lose the benefits of these programs but will undermine our credibility for the development of any future cooperative efforts.

In 1978, at a summit meeting in Washington, Alliance leaders agreed to a long term program providing, among other things, for rapid U.S. wartime reinforcement of Europe. Since then, our allies have fulfilled their commitment. For example, Belgium and the Netherlands, both small and densely populated countries, have gone to considerable effort and expense to obtain the land required to store prepositioned U.S. equipment. The Federal Republic of Germany has allocated half the funds for 93,000 additional German reservists to support U.S. deployments. The proposed appropriations bill would threaten both of these programs. Is this a sensible way to respond when the Allies have done just what we proposed they do?

If restrictions on our contributions to the long term defense program stand, the entire program will atrophy. We will turn a notable success into failure. We will cancel out much of what we and the allies have already achieved—and paid for.

Last June in Bonn, President Reagan and his allied counterparts committed themselves in a special summit charter to specific plans for improving NATO's conventional capabilities. This charter called for the achievement of demanding force goals, and identified priority programs. I cannot now guarantee that this charter will be implemented in every detail, though we will work to that end. But I can say with absolute confidence that if these cuts are legislated that charter will not be translated into concrete improvements.

Let me restate unequivocally our agreement that the allies need to do more. This Administration has made that clear at every opportunity, here and abroad, and is working to produce a greater allied contribution to our common defense effort.

Our attempts to foster better coordination of U.S. and European defense spending and to have our allies take greater responsibility for our common defense are bearing fruit. But only if we ourselves keep the commitments that we have made can we count on the Allies to improve their performance.

Finally, a legislated, unilateral U.S. pullback from our military commitments to NATO would damage prospects for arms control. Unilateral U.S. troop withdrawals would remove any incentive for the Soviets to agree to mutual reductions that would lower the threat and ease the military confrontation in the heart of Europe. At the MBFR talks in Vienna we are seeking to negotiate the new Western draft treaty put forward by the President last spring. That treaty would correct the present imbalance between Soviet and Western forces in Central Europe through significant, verifiable reductions to equal levels.

A cut in funding for the Ground Launched Cruise Missile, and the deletion of funds for the deployment of the Pershing II missile, which has been voted in the House, would dash our hopes for a negotiated solution to the problem posed by the Soviet SS-20 intermediate range nuclear missiles. In the INF talks in Geneva, we have proposed a treaty that would ban this whole class of Soviet and U.S. intermediate range nuclear missiles. But only if we and our allies show that we are resolved to deploy U.S. missiles in Europe can we get the Soviets to negotiate seriously.

The advocates of this legislation owe it to us all to explain how it would help arms control and thus contribute to reduction of the threat. Is there any evidence that unilateral limits and cuts can have anything other than a destructive effect on negotiated arms control? Should we not be more concerned about reducing the threat than about reducing our ability to counter it?

Let me conclude with a few basic points. The Atlantic Alliance has provided well for Western security for thirty years. That Alliance is built upon the forces that we and our Allies have deployed in Europe and the conviction that the United States is fully committed to the defense of Europe. When those forces and that conviction are strong, deterrence in Europe is sturdy and we are secure. We weaken them at our peril.

The world will be dangerous enough in this decade. It is not in our interest to tamper with North Atlantic security.

STATEMENT BY GEN. BERNARD W. ROGERS, U.S. ARMY COMMANDER IN CHIEF, U.S. EUROPEAN COMMAND

Mr. Chairman, I appreciate the committee's invitation to testify regarding possible reductions in US troop levels in Europe and other actions proposed by other committees of the Congress. I regret that prior commitments prevent my testifying in person.

I am aware of the budgetary constraints which have played a key role in the reductions that are proposed. However, irrespective of the reasons for these reductions, I wish to highlight their impact from the viewpoint of my international role as SACEUR. In my view, proposals to reduce US troop commitments to Europe are faulty for a number of reasons. First, these proposals would seem not to recognize sufficiently that a free and independent Western Europe is the most important American vital interest outside our borders. Europe is the first line of defense for our nation and the values we treasure. Our defense expenditures for NATO are resources directly applied to our own well-being and security. Second, advocates of troop withdrawal generally underestimate the substantial contributions which Europeans are making to their own defense, such as the human and social costs of relying on conscription to man their forces and the "hidden" economic costs of the use of "free" European real estate for stationing and training allied forces. Third, these proposals seem to ignore that the manpower commitments of several allies and the non-U.S. NATO as a whole have actually increased in recent years. Fourth, the unilateral withdrawal of U.S. troops would have a major adverse impact on our MBFR negotiations; we would withdraw more than currently being negotiated with no quid pro quo from the Warsaw Pact. Such unilateral action, without consultation with Allies, would be viewed by them as ignoring the collective decision-making process which is so much a part of common defense procedures. Finally, US troop withdrawals would undoubtedly provoke a decrease in European defense spending. To be sure, I do argue that the European members of the Alliance can and must support greater defense expenditures. However, the realities of today are such that larger increases would certainly not be supported if these nations perceived that the United States was reducing its commitments to them. Such a move would be counterproductive.

In many respects, American commitments provide the cement holding the Alliance together. Many persons, not fully understanding European attitudes, underestimate the fragility of the Alliance in this regard, despite recent evidence showing the ease with which NATO is suspectible to divisive influences. What they do not seem to realize is that, in Europe today, one of the greatest dangers to deterrence is the potential loss of political will to maintain the sacrifices required for security.

With the U.S. taking the lead, NATO continues to improve its military forces. However, although NATO gets stronger every year, the gap between force capabilities of NATO and the Warsaw Pact gets wider each year, decreasing the credibility of our deterrent. Although the military situation is not yet unmanageable—we are a defensive Alliance and need not match the Pact one for one in any area of force comparison—we must resolve now to improve our conventional capacity before the situation does

grow beyond restoration. The achievement of this objective would be impacted adversely by a reduction in US force commitments to Europe.

Looking at specific proposals, a bill now before the Senate includes four measures which will be perceived by our Allies as reducing US commitments to Europe:

1. To hold US troop strength in Europe to 1980 levels.

2. To delete all funds for POMCUS (Prepositioned Organizational Materiel Configured to Unit Sets) division sets 5 and 6.

3. To cut $63 million from the Ground Launched Cruise Missile (GLCM) program.

4. To eliminate funds for the Host Nation Support agreement with the Federal Republic of Germany.

I will address each of these issues separately.

The bill directs that the European troop ceiling be held to the actual FY 80 level of 331,700 as opposed to the Administration's request of 350,600 for FY 83. The additional personnel requested result from increasing Naval personnel by 13,000 and Air Force personnel by 9,800. The Army and Marine forces were planned to be reduced slightly under the Administration proposal. The large increase in Naval personnel results from added anti-submarine warfare capability in the Atlantic and a greater U.S. presence in the Mediterranean, which at present is more aligned towards Southwest Asia than NATO.

With regard to the Air Force increases, some are for the modernization of our Intermediate-Range Nuclear Forces (INF): about 1,200 personnel are required to introduce Ground Launched Cruise Missiles (GLCM) into the theater. Without these personnel we will be unable to continue the deployments by which NATO plans to remedy the current gap in our spectrum of deterrence and to encourage the Soviets into serious negotiations.

Other Air Force personnel increases are required for us to do better with our currently deployed forces. At present, the programmed combat sortie rate of F15's and F16's is well below optimum due to maintenance procedures and personnel shortages. Just assigning the proper number of people to this current requirement accounts for 4,000 of the increase. Recent and planned deployments of NATO AWACS and TR-1 also account for more than 1,100 other personel increases.

My second concern is the deletion of POMCUS funds for division sets 5 and 6. This item is critical for two reasons. Without those sets, the U.S. cannot hope to achieve its commitment to the goal of having 10 divisions and associated air squadrons in Europe by D-day. That requirement is minimal and is based upon the needs for reinforcement to counter the increasing threat. Without this minimal force the relative capability of the Warsaw Pact in the North German plain would be so overwhelming that we could not defend successfully without early use of nuclear weapons. We simply do not have the sealift or airlift to accomplish that reinforcement mission in the foreseeable future without six division sets in POMCUS. At present, we have aircraft to move the personnel for these units plus individual replacements and fillers. But without additional POMCUS there will be no equipment for these reinforcement to use.

A second reason for retaining these funds is the US national commitment to POMCUS sets 5 and 6. In 1978 President Carter made such a commitment as a part of our Long Term Defense Program. As a direct result, NATO infrastucture funds were committed and the two host nations, Belgium and The Netherlands, purchased the land required and began construction. At present, three of the sites are nearing completion while construction will be initiated at the other three in the next few months.

To go back on our word at this point would undermine our efforts to get these nations to play their proper role. The two governments have committed large sums of money for the land and initial construction. For them to acquire the land in such populous countries was an unpopular issue, only begrudgingly offset by promises of permanent employment for those living near the sites. These sites cannot be simply diverted to other use. They are designed specifically to store and maintain combat equipment for extended periods. The US should not now back away from this important agreement.

I have already briefly mentioned GLCM, the third element of the suggested bill. By cutting $63 million from procurement we can achieve some budget savings, yet still meet our Initial Operational Capability (IOC) date. While that goal and the method are not unique, the outcome of such action in this case would have farreaching consequences. Most seriously, such a cut would appear to undermine the resolve of the US and NATO to close the INF gap in our nuclear spectrum.

The Soviets do not want Pershing II and GLCM's deployed. They have launched a massive campaign using misinformation and tough rhetoric both here and in Europe in an attempt to lessen our will to implement the vital NATO decision of December 1979. Any sign that our resolve is weakening would damage our INF negotiating position and certainly would undermine the resolve of other NATO nations to continue their support for INF modernization.

On the budgetary side this cut will actually cost the U.S. additional procurement dollars in the long run. The current contract calls for 120 missiles, 22 erector/launchers, and 12 launch control vans. A $63 million cut would reduce these buys by nearly 20%. The difficulty is that in order to get the system at the agreed price, the Department of Defense signed a Memorandum of Agreement with General Dynamics for a minimum buy. Should we buy fewer systems each year, added unit costs will be incurred. DOD's estimates are that this $63 million "savings" will ultimately cost the taxpayer $130 million, an increase of over 100%.

My final concern centers on the elimination of the funds for our Host Nation Support (HNS) agreements with the Federal Republic of Germany. In the last ten years we have changed the "tooth to tail" ratio in our European forces. Initially, this was helpful, but we have gone too far. While attempting to increase our combat power within strength ceilings we have reached a point where there is insufficient combat support and combat service support (CS/CSS) in theater to support deployed and deploying forces. Even our National Guard and Reserve units, heavily weighted with CS/CSS, will not be sufficient in the early weeks of a conflict to allow our combat units to sustain themselves. HNS agreements are a step toward correcting this deficiency. The Federal Republic of Germany has agreed to provide 93,000 Reservists (not now included in NATO assigned forces) to handle significant portions of our ammunition, equipment, transportation and security during mobilization and after hostilities commence. This support includes the personnel, trucks, handling equipment, railcars and facilities to offset our shortages. The U.S. part of this bargain is to provide that equipment not currently available in Germany to accomplish this mission for us. The price to fund the units themselves, their people, equipment, and the lift to get them into theater would be far greater than the amount being shared with the FRG.

The provisions of the bill will not cause our allies to increase their defense spending. They will cause the U.S. to lose credibility with other NATO nations at a critical time in their own decision processes for defense. They will reduce our own capability to deter Soviet aggression and risk taking, and they will impact unfavorably upon my ability as SACEUR to accomplish my mission. I am hopeful that some means can be found to provide the end-strength requested and to restore the funds deleted for Division Sets 5 and 6, for the GLCM program and for the U.S. share of the German HNS Agreement.

Mr. Chairman, thank you for allowing me the opportunity to lay this statement before you.

Draft Resolution on Alliance Security Presented by the Military Committee

The Assembly,

Aware that a credible and viable Alliance defence policy must be based upon the support and consensus of Alliance publics;

Concerned over the continuing modernization of Warsaw Pact armed forces, both conventional and nuclear, and the implications of this for the requirements of flexible response, especially in the area of conventional forces;

Noting that the issue of conventional defence has gained widespread attention recently, due largely to the public debate on the role of nuclear weapons in Alliance strategy;

Noting that advances in conventional weapons technology, especially in the areas of guidance and target acquisition, offer the Alliance the potential to perform with conventional weapons many of the tasks previously assigned to nuclear weapons;

Convinced that rationalization of short-range nuclear weapons deployed in Europe is both militarily and politically desirable, and must be accompanied by a corresponding strengthening on conventional defence capabilities;

Recognising, nonetheless, the vitally important deterrent role of nuclear weapons in Alliance strategy, including the option of 'first use' of nuclear weapons;

Convinced that continued modernization and maintenance of non-nuclear defence capability is of the highest priority in Alliance defence planning;

Concerned that at a time of severe budgetary limitations, strong pressures may exist in certain Alliance countries to emphasize particular national requirements at the expense of commitments to a credible conventional defence posture in the Alliance;

urges all member governments:

(1) To examine thoroughly the opportunities afforded the Alliance by new conventional weapons technologies;

(2) To devote the resources necessary to achieve a significant improvement in the conventional capability of the Alliance, while simultaneously attempting to constrain through arms control the threat facing the Alliance;

(3) To refrain from unilateral troop reductions or other actions which would weaken the conventional strength and political cohesion of the Alliance and lessen the prospects for success in current arms control negotiations.

THE PROBLEMS, PROSPECTS, AND OPPORTUNITIES FOR ARMS CONTROL

Mr. PERCY. Mr. President, yesterday, at the Arms Control Association's annual meeting, Senator LARRY PRESSLER delivered a major address on the problems, prospects, and opportunities for arms control. As chairman of the Subcommittee on Arms Control, Oceans, International Operations and Environment, Senator PRESSLER has taken a leading role in highlighting arms control issues over the past 2 years.

I am pleased that he has joined with me in drawing attention to the benefits to be derived from the nuclear testing limitations contained in the threshold test ban and peaceful nuclear explosion treaties. These accords set important arms control precedents in the areas of data exchange and onsite inspection.

Senator PRESSLER has used his first 2 years as subcommittee chairman to explore the dangers inherent in arms control agreements that lack sufficiently strong and clearly defined verification provisions. This problem was given attention through the subcommittee's hearings on "yellow rain," held in November, 1981. He has also used the subcommittee to identify current opportunities for negotiations that are not now being exploited, such as in arms control aimed at preventing the weaponization of outer space.

Senator PRESSLER's speech to the Arms Control Association reviews these and other aspects of the arms control agenda. In the process, he provides a balanced and lucid assessment of this central element of American security. I ask unanimous consent that the speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

ADDRESS BY SENATOR LARRY PRESSLER TO THE ARMS CONTROL ASSOCIATION ANNUAL MEETING

Ladies and gentlemen, it is a distinct privilege and a unique opportunity to address the annual meeting of the Arms Control Association. This Association, including President Herbert ("Pete") Scoville, Chairman of the Board Gerard Smith, and Executive Director William Kincade, has played a leading role in generating public discussion on Arms Control well before it was fashionable to do so. Your journal, Arms Control Today, is widely read on Capitol Hill. I am grateful for this opportunity to join you in your discussions.

Today, I would like to share with you my experience as Chairman of the Arms Control Subcommittee of the Senate Foreign Relations Committee, and the insights that it has offered me about the process of and prospects for arms control. For me, it has been a very full and exciting initiation into the Subcommittee's Chairmanship. When the process began two years ago, arms control negotiations were on the back burner—some would say in deep freeze, which should not be confused wth the nuclear weapons freeze. Since then, attention to arms control issues has returned to the foreground where it rightfully belongs. The growth of the nuclear freeze movement is evidence of this as is the new role being played by the nation's religious leaders in promoting negotiations.

We should not belittle the efforts of officials within the Administration in seeking to advance the arms control process and in finding new approaches to U.S.-Soviet relations. President Reagan's addresses on arms control—particularly those delivered over the past year—are, in my view, a serious effort to come to grips with the difficult problem of dealing with potentially hostile neighbors in a nuclearized world. I hope that the work of the subcommittee has also contributed to sparking the current debate.

Well before the press gave attention to public concerns about the nuclear arms race last spring, the subcommittee traveled beyond the confines of Washington to hold field hearings on the future of arms control. In Sioux Falls, South Dakota, and in Los Angeles and San Francisco, California, public witnesses spoke of their concerns for the risks and high financial costs of the U.S.-Soviet military competition, and of the need to develop negotiated alternatives. These were the first Senate arms control field hearings in over 26 years, and they helped the Foreign Relations Committee judge the nation's mood before the nation's pollsters began to gauge it. I hope to conduct similar hearings in other parts of the country in the next two years to remain in close touch with American taxpayers who will bear the weight of decisions made in Washington.

I believe that the pace and scope of U.S.-Soviet arms competition has gotten out of control. But I also feel that we must be sober in regard to our expectations in arms control negotiations. We must realize that the U.S. cannot produce meaningful accords alone.

Before speaking of the opportunities that do exist for significant agreements, it is important to be aware of the dangers. Agreements that are carefully conceived and executed can increase stability and could reduce the world's defense burden, but accords that are produced in haste or are reached only for agreement's sake can lead to decreased security and may poison the atmosphere for reaching serious agreements. This is particularly true for treaties that lack sufficiently strong verification provisions.

Last year, the subcommittee looked into the alleged use and/or provision of chemical weapons by the Soviet Union in Afghanistan and in Southeast Asia. The use of such agents is outlawed in treaties to which the Soviet Union is a signatory. Unfortunately, verification of these bans is based on trust and the Soviet government has refused to cooperate in efforts to investigate these allegations. In the year since our "Yellow Rain" hearings, the Administration has published a compilation of evidence that has swayed previous skeptics and reports of attacks continue. My information indicates that a yellow rain attack occurred little more than a month ago on October 17 in Cambodia.

If we are to have rapid progress in negotiations, the Soviet Union has an obligation to clear up this situation. In the absence of greater openness and responsiveness on the part of the Soviet leadership with regard to improved verification and other measures that build confidence, there is little hope for meaningful arms control. I have informed the Soviets of their responsibilities for the arms control process in meetings at the Kremlin last June. While I was in Moscow in June of this year, I personally informed Victor Karpov, the Soviets' chief START negotiator, that his government needed to be more cooperative in pursuing arms control goals. I hope that the rise if Yuri V. Andropov to the Soviet Communist Party's chairmanship will bring about improved Soviet attitudes.

This is not to relieve the U.S. of its responsibilities in the process. There are important opportunities for agreement here and now that are not being exploited. Part of the problem lies with a few so-called experts who believe that the U.S. can outspend the Soviets into cooperation or outwit them with fancy and not-so-fancy strategic concepts. In the not-so-fancy category are the ideas of T. K. Jones who believes that given enough dirt and shovels and . . . doors—let's not forget the need for doors—Americans can learn to live with the bomb and survive the holocaust. After hearing this nonsense, the subcommittee called T. K. Jones to explain his theories. After several attempts at evasion and finally the threat of sanctions, Jones appeared before the subcommittee to say that he had been misquoted. We looked into the issue and, to the best of our knowledge, Mr. Jones was quoted accurately.

This hearing served an important function and we will continue to perform that function in the future: letting officials know that the Senate and the public expects a responsible approach to defense and arms control.

There are several areas where opportunities exist for immediate gains in international stability and in U.S.-Soviet cooperation. The ongoing START and INF negotiations, and the Vienna talks on Mutual and Balanced Force Reductions, do represent serious efforts to grapple with the nuclear and conventional inventories of the U.S. and the Soviet Union and of their allies. While the importance of these deliberations must not be understated, I also believe that significant and verifiable reductions are a long-term proposition. A mutual and verifiable nuclear weapons freeze and actual reductions in nuclear arsenals are ideas which deservedly have attracted widespread popular interest. However, because of the problems of verification and of existing imbalances, negotiating a freeze could require the same energies, efforts and time as would be required to reduce nuclear forces. For these reasons, during the first two years of my chairmanship, particularly after the START and INF talks began, I have concentrated my efforts on problems that have so far failed to receive the public and governmental attention they deserve and on modest but valuable opportunities for enhancing security at reduced cost.

The Threshold Ban (TTB) and the Peaceful Nuclear Explosions (PNE) treaties, negotiated and signed by two Republican presidents between 1974 and 1976, fall into this category. These accords which limit underground nuclear explosions have an importance beyond their immediate impact. By setting precedents in the areas of military data exchange and on-site inspection, these accords could provide our negotiators in

Europe with leverage on the kind of cooperative measures that could make deep weapons cuts possible.

The Administration has made progress on data exchange and on intrusive measures of verification a litmus test of Soviet sincerity in arms control. For this reason, I hope that the Administration will begin to endorse ratification of two treaties that meet these conditions.

Many in this audience support the conclusion of a Comprehensive Test Ban (CTB). In my view, those who support a CTB should also endorse ratifying the signed but unratified TTB and PNE treaties. They would provide Washington and Moscow with experience in monitoring a weapons testing agreement and, thereby, the TTB and the PNE would increase our understanding of the requirements for CTB.

My subcommittee has been very active in this area. There have been numerous meetings with senior officials and several closed door consultations. My view has been expressed in both open and closed sessions. In summary, it is this: Let's ratify these accords and get on to new business. Unfortunately, proponents of the resumption of high yield weapons tests appear to be engaged in a rearguard effort to prevent ratification from happening. This has occurred despite the fact that Administration officials—including General David Jones, the former Chairman of the Joint Chiefs of Staff—have assured the committee that all U.S. defense requirements can be met within the constraints of these treaties. Arms Control Agency Director Rostow was right when he publicly identified this situation as a "profound stonewall."

As we move towards clearing up old business on the one hand, and work towards long-term solutions of current military problems on the other, we must not lose sight of current developments that could become problems if ignored. The imminent prospect of weaponizing space is a problem that has not received the attention it deserves. Over the past two years, I have written two resolutions on the danger posed by antisatellite weapons, chaired a hearing on this subject, and have successfully amended the Arms Control and Disarmament Agency's authorization bill to direct ACDA to intensify its research efforts in the space arms control area.

A space arms race is not in the interest of the United States. We, more than the Soviets, are dependent upon satellites and currently deloyed and planned space systems are playing an increasingly vital role in keeping the peace. This includes many important military functions, among which are communications with U.S. forces, early warning of strategic attack, and verification of arms control agreements. In these and other roles, the military has legitimate missions in space. It must be remembered that the so-called "missile gap" of the late 1950s evaporated only after the first reconnaissance satellites gave the U.S. a true picture of the Soviet force structure. Therefore, I am not in accord with those who oppose a military role in space. What I do oppose is "weaponizing" outer space. Killer satellites would undermine our ability to carry out peacekeeping missions and they could discourage commercial uses of space, at a time when they are beginning to make economic sense. In my home state of South Dakota with its agricultural economy, weather satellites play an increasingly vital role in maximizing production. Killer satellites should not be allowed to compromise this development.

It is also important to note that an arms race is perhaps easiest to stop before it is seriously under way. Unless this government acts quickly to start negotiations, American taxpayers will face an enormous space weapons budget and perhaps insurmountable verification problems. It is therefore surprising that since the Soviet invasion of Afghanistan both Democratic and Republican Administrations have given so little attention to the resumption of killer satellite talks. Often verification has been cited as a reason for not proceeding. As I see it, the verification problems will increase in the absence of an early agreement.

In the 98th Congress, I can assure this audience that I will pursue these issues with equal, if not greater, effort. On the TTB and PNE treaties, the subcommittee will make its continued concerns known in a closed door consultation on December 16. With regard to my anti-satellite resolutions, I am currently gaining cosponsors in the Senate and will reintroduce my resolution and hold a hearing this winter.

To conclude, let me suggest that there are other areas that are worthy of attention and they will receive it from me in the 98th Congress. President Reagan's address of last week draws attention to a new area of arms control that deserves greater consideration: Confidence Building Measures (CBMs). President Reagan's proposal marks only a start in developing and exploiting CBMs. Let me suggest several ways of improving the President's offer. Prior notification of weapons tests is a useful step, but so are exchanges of observers at such tests and other military activities. The exchange of military data could be complemented by extensive exchanges of information on weapons production rates. These CBMs would create openness and would, therefore, improve the atmosphere for arms control negotiations. Increased knowledge of military plans and activities would reduce the surprises that make for international tensions and propel the arms race. Finally, these CBMs are quite similar to the arrangements required for verifying deep weapons reductions. They should be welcomed for this reason alone.

For my part, I will continue to highlight these opportunities for building security at reduced risks and costs. By supporting arms control initiatives and by indentifying useful arms control concepts, the Arms Control Association can play an important role in this process.

Thank you.

A RABBI'S VIEW OF THE LEBANON SITUATION

Mr. PERCY. Mr. President, Rabbi Israel Zoberman, the new spiritual leader of the Temple B'rith Sholom in Springfield, Ill., recently wrote a letter to the editor of the Springfield State Journal that deserves wider coverage. His views on the situation in Lebanon are heartfelt, and he makes a commendable call for urgency in "responding creatively to the Palestinian question * * * in a context that does not violate Israel's essential rights and promotes the cause of peace in a turbulent region." In order to share his sentiments with my colleagues, I ask unanimous consent that his letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEAR EDITOR: The yet unresolved, eventful Lebanese crisis has impacted on our core indelibly and painfully. We are stunned and grieved by the murder of President-elect Bashir Gemayel and the shocking massacre of Palestinians by Christian militiamen.

The unprecedented specter of Israeli troops besieging an Arab capital took us by surprise. Whatever one's view is on the total scope of the Israeli Peace for Galilee Operation, acting beyond the declared 25-mile mopping zone, let us ponder the following perspectives: The roots of the magnitude of Israel's response touch the heart of the Israeli-Arab conflict, manifested since the 1967 Six-Day War by the defiantly uncompromising stance of the PLO to seek to eradicate the state of Israel

Was the PLO leadership naive to assume that its countless barbaric acts of terrorism against innocent Israeli civilians, and its turning of Lebanon into a base of its own, a state within a state, acting with callous impunity, not bound to incur Israel's justified wrath?

The tragic loss of civilian life in West Beirut and other spots along with physical devastation is a deeply disturbing aspect of war. While precautions were taken to the point of sacrificing lives of Israeli soldiers, our memory is etched with the massive bombardment of West Beirut. We know well though that the PLO chose to place its positions in the midst of a civil population, recklessly risking the well-being of non-combatants.

Israel paid a high price in irreplaceable human life and valuable economic resources with yet to be fully assessed political consequences. Once again, far too often in the brief history of the young state, has death spread its menacing wings touching the entire people.

I visited Israel at the time and sensed first-hand the trauma of loss and the inevitable cruel interplay of fear and reality. Israel's military might is the outcome of its people's will to live forged in the crucible of history's harshest testing; its warriors are not ordinary professional soldiers as the one who was killed while carrying with him a guide to the flowers of the land.

The searing events in Lebanon indicate beyond doubt the urgency of responding creatively to the Palestinian question. Let the Palestinians fulfill their distinct destiny in a context that does not violate Israel's essential rights and promotes the cause of peace in a turbulent region.

Now is the time to hail the historical peace treaty between Israel and Egypt, signifying a revolutionary breakthrough in the tragic cycle of violence between Arab and Jew, to be fully realized in the matrix of Mideast life. drawing closer also Arab and Arab, Moslem and Christian.

ISRAEL ZOBERMAN,
Rabbi, Temple B'rith Sholom.

HARDIN COUNTY VOTERS TAKE ELECTIONS SERIOUSLY

Mr. PERCY. Mr. President, during the congressional recess, the Chicago Tribune ran a story reporting that Hardin County, Ill., has the highest percentage of voter turnout in the State, 87 percent of registered voters in the 1980 election. At a time when

we are constantly lamenting the fact that fewer and fewer Americans are exercising their constitutional right and responsibility to vote, this is a tremendous tribute to the people who live in Hardin County.

Of course, I am not particularly surprised to see this report. On July 8, of this year, I had the privilege of visiting with many of the citizens and civic leaders during a "community coffee" in Elizabethtown, the county seat. It was quite apparent to me that the citizens of the country are very well informed about the various public issues. They take their citizenship seriously.

Mr. President, I ask unanimous consent that the November 3, Chicago Tribune article entitled "Hardin County Voters Take Elections Seriously" be printed in the RECORD. Hardin County's proud record should serve as an inspiration to all citizens who share our concern about maintaining our representative form of government.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HARDIN COUNTY VOTERS TAKE ELECTIONS SERIOUSLY

(By William Reckienwald)

ELIZABETHTOWN, ILL.—In rural Hardin County in southwestern Illinois, nearly every lawn had a campaign sign.

In the 1980 general election, 87 percent of the registered voters went to the polls, and that makes this the most politically active county in Illinois. Statewide the average was less than 78 percent.

In an era in which voting appears to be on the decline nationally—only 84 percent of eligible voters cast ballots in the last presidential election—they take their politics seriously here.

The candidates take the voters seriously, too.

State Rep. Robert Winchester, 30, the first Hardin County resident elected to the legislature in more than a half-century, said; "Not only are we serious, but it is a form of recreation. We all enjoy it."

Politics is literally the only show around for the 6,400 county residents who live here on the banks of the Ohio River. The closest movie theater is more than 40 miles away.

Hardin County, which boasts that it is the largest fluorspar-producing area in the United States, also has the state's highest unemployment rate, 33.5 percent. Fluorspar, the Illinois state mineral, is used in floridation of water and in steel and aluminum production.

County residents follow local government closely in the Hardin County Independent, a weekly newspaper published by Noel K. Hurford, 55, a lifelong county resident.

"Everybody reads the paper," Hurford said. "We give politics a lot of coverage. We get people all stirred up, they get mad, they write letters. People really get involved here."

Darwyn Daymon had a poem published about his problems, including the fact that the county doesn't take very good care of the road he uses regularly:

Have our gravel roads kept up with our rate of taxes?
On this point, I won't dote,
But would you please get out and vote?

Coverage of the county board meeting includes the smallest details of government.

"I spent some money on car wax and white wall tire cleaner for the squad car. The board asked me about it, and bang, it was on the front page of the paper," said Sheriff Wendell Brownfield, 34, the county's sole law enforcement officer.

And when they vote here, they vote for individuals, not for party labels.

"Voting straight party tickets is something of the past," said Clyde Kaylor, 76, who has served for 40 years as a Republican precinct committeeman in the town of Cave in Rock, population 603.

"Most people split now, they vote for the person, not the party."

In 1980, the 3,295 county voters gave a plurality of 407 to Republican Ronald Reagan in the presidential race and 315 to Democrat Alan Dixon in this race for U.S. senator.

"We are not a big county and people want to be aware of what is happening. They read that paper from cover to cover, they look forward to it coming every week. Folks like to go to political rallies here; it gives them a chance to get out," Brownfield said. "Lots of people are kin to each other here, too."

Recent political rallies received Page 1 attention in the local newspaper.

"We had a free barbecue and 500 people attended," Winchester said.

"C. L. McCormick (Republican state Senate candidate) is an old-time preacher politician. He gives that rip-roaring, Baptist, down-home, hard-core political speech. Then I come and hit them with the facts and figures about the jobs we have brought to the county.

"We just get them all fired up, and we keep them fired up, and they get out and work. They go door to door and, on election day, we have cars in each precinct to drive the people to the polls."

"Everybody knows everybody around here," said Harold Dutton, Democratic candidate for the county board.

"Politics is just a matter of conversation, like talking about your job. It is friends talking about something in common."

"If a person loses an election here with the kind of turnout we have, he don't have cause to complain. If we get out 90 percent of the vote and they beat me, then I'm beat I won't complain."

GOOD WORK BY THE OFFICE EDUCATION ASSOCIATION

Mr. PERCY. Mr. President, during the recess, I had the honor of addressing the Peoria Area Conference of the Office Education Association. The Office Education Association is dedicated to raising interest in our free enterprise system by developing leadership capabilities and competency in office occupations among the Nation's youth.

The focal point of the Office Education Association is an occupational educational activity available at the secondary and post secondary education levels. This cooperative work program requires students to work within the local business community in office positions while receiving formal training in the classroom. In addition, a national conference is held each spring, highlighted by a schedule of competitive events in which members attempt to achieve national recognition through demonstration of superior skills.

The Office Education Association also promotes extracurricular activity by encouraging its membership to participate in community service projects. At the local level, each school chapter pursues it own goals, in addition to contributing to a nationwide campaign for the benefit of the Special Olympics. Last year, the OEA raised $25,000 for the Special Olympics through a variety of fundraising activities. This dedication to community service is applauded by all and is deserving of the highest praise.

The OEA is comprised of 76,000 members nationwide, 5,000 of whom are from Illinois. I was pleased to be able to meet and speak with a number of these ambitious capable young people and I was happy to learn that Illinois has been duly represented at the national, competitive level. I am also very pleased that next year's OEA National Convention will be held in Chicago.

Many of our Nation's largest corporations have shown their appreciation of the OEA's achievements by generously supporting OEA activities. This special relationship between the public and private sector has helped American business retain its high standards of exellence. The OEA helps business help itself by offering advanced training to those young men and women who will one day make up the ranks of the business community.

I strongly support the objectives and methods of the Office Education Association to prepare and educate our youth to take their places in the business world.

ELIMINATION OF FTC JURISDICTION OVER MEDICAL, LEGAL, AND OTHER STATE REGULATED PROFESSIONS

Mr. METZENBAUM. Mr. President, I rise to voice my dismay over the action taken by the House yesterday to eliminate FTC jurisdiction over medical, legal, and other State regulated professions. I state unequivocally that this dreadful proposal should never see the light of day in this session. Just today we finished one special interest bill that tied up the Senate for 3½ days. Let us not repeat that exercise in futility.

There is absolutely no justification for exempting doctors, dentists, and lawyers from FTC scrutiny. There is absolutely no reason why these professions should be above the Nation's antitrust laws.

I am saddened but not terribly surprised by the House action. Doctors and other interested groups spend lots of time and money on Capitol Hill.

Indeed, according to Congress Watch, the political action committees of the AMA and ADA gave Members of the House of Representatives almost $2.5 million in campaign contributions during the past 2 years. More than 70 percent of this money went to the 200-plus supporters of the FTC exemption.

Well, Mr. President, the AMA may have succeeded in the House, but I do not expect their success to be that easy in the Senate.

This issue is far too important to the American people. The Senate must not bow down to the special interests of doctors and dentists. Too much is at stake.

Between 1970 and 1980, the cost of health care in this Nation more than tripled to nearly $250 billion. During the next decade, these costs are expected to triple again.

Over the years, the Federal Trade Commission has found that the lack of competition has contributed to these skyrocketing health-care costs. It is the FTC whose efforts helped to eliminate monopolistic practices in the health care field.

If we strip the FTC's power in this area, we will kill such beneficial activities as:

A proposed rule to curb deceptive claims and high-pressure sales tactics in the hearing aid industry.

Investigations into professional restrictions that keep dentists from working for business firms and prevent nondentists trained to make dentures from offering their services directly to the public.

Investigations into medical associations and groups of doctors for boycotting hospitals that recruited competing physicians or health-insurers that tried to institute cost-containment programs.

These are but a few of the activities we stand to lose if we in the Senate follow the House's lead and roll over for the well-oiled medical lobbying machine.

I say we stand firm. I and several of my colleagues are ready to fight any attempt to grant a special interest exemption to the professions.

I would like at this time to submit a list of some of the groups who support a continued FTC presence in this area. I believe its diverse makeup and length lend credence to the argument that this is far from a one-sided battle.

I ask unanimous consent that the list be printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

American Association of Retired Persons.
American Nurses' Association.
American Society for Medical Technology.
Association for the Advancement of Psychology.
American Psychological Association.
American Speech-Language-Hearing Association.
American College of Nurse-Midwives.
American Public Health Association.
National Association of Optometrists and Opticians.
National Association of Chain Drug Stores.
Opticians Association of America.
American Medical Technologists.
International Society for Clinical Laboratory Technology.
American Association for Clincial Chemistry.
American Society of Allied Health Professions.
National Rehabilitation Counseling Association.
National Women's Health Network.
Women and Health Roundtable.
American Retail Federation.
Public Citizen's Congresswatch.
Consumer Federation of America.
American Association of Nurse Anesthetists.
United Automboile, Aerospace, and Agricultural Implement Workers of America.
Retired Officers Association.
Small Business Legislative Council.
American Dental Hygienists' Association.
International Chiropractors Association.
American Chiropractic Association.
Women's Equity Action League.
U.S. Women's Health Coalition.
National Consumers League.
National Association of Community Health Centers.
American Podiatry Association.
American Association of Bio-Analysts.
United Steelworkers of America.
National Association of Social Workers.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. COCHRAN:

S. 3062. A bill for the relief of Thomas Hulmut Hofmann; to the Committee on the Judiciary.

By Mr. RIEGLE (for himself, Mr. LEVIN and Mr. METZENBAUM):

S. 3063. A bill to provide for continuation of health insurance for workers who lose such insurance by reason of unemployment; to the Committee on Finance.

By Mr. ROTH:

S. 3064. A bill to amend the Tax Reform Act of 1976 to extend, for an additional 4 years, the exclusion from gross income of the cancellation of certain student loans; to the Committee on Finance.

By Mr. PRYOR:

S. 3065. A bill to establish in the Department of State the position of Under Secretary of State for Agricultural Affairs; to the Committee on Foreign Relations.

By Mr. GLENN (for himself, Mr. KENNEDY, Mr. ZORINSKY, Mr. LEAHY, Mr. MOYNIHAN, Mr. SARBANES, Mr. TSONGAS, Mr. DODD, Mr. PELL and Mr. BRADLEY):

S. 3066. A bill with regard to Presidential certifications on conditions in El Salvador; to the Committee on Foreign Relations.

By Mr. ABDNOR:

S. 3067. A bill to limit the use of appropriated funds to increase the pay of Members of Congress, and for other purposes; to the Committee on Governmental Affairs.

By Mr. BOSCHWITZ:

S. 3068. A bill to establish a cap on the pay of certain Federal officers and employees for the fiscal year 1983; to the Committee on Governmental Affairs.

By Mr. EAGLETON (for himself and Mr. DANFORTH):

S. 3069. A bill to amend the Natural Gas Policy Act of 1978 to prohibit increases in the wellhead prices of natural gas, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. DANFORTH (for himself and Mr. EAGLETON):

S. 3070. A bill to prohibit certain anticompetitive clauses in natural gas contracts, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. DANFORTH (for himself and Mr. EAGLETON):

S. 3071. A bill to increase the funding authorization for low-income home energy assistance; to the Committee on Labor and Human Resources.

By Mr. LUGAR (for himself, Mr. GARN, Mr. D'AMATO, Mr. HEINZ, and Mr. TOWER):

S. 3072. A bill to amend the Urban Mass Transportation Act of 1964 to authorize additional appropriations, to establish a formula grant program, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MELCHER:

S. Res. 499. Resolution authorizing supplemental expenditures by the Select Committee on Indian Affairs; to the Select Committee on Indian Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. RIEGLE (for himself, Mr. LEVIN, and Mr. METZENBAUM):

S. 3063. A bill to provide for continuation of health insurance for workers who lose such insurance by reason of unemployment; to the Committee on Finance.

HEALTH INSURANCE FOR UNEMPLOYED WORKERS ACT OF 1982

● Mr. RIEGLE. Mr. President, today I am introducing legislation (for myself and Senators LEVIN and METZENBAUM) which is designed to correct a serious, although often ignored, side effect resulting from the massive unemployment of millions of our Nation's workers. That side effect is the loss of health insurance coverage.

Approximately 80 percent of the nonelderly population in our country is at least partially protected against the possible financially ruinous consequences of ill health. As we all know, all but the most wealthy members of our society would soon be reduced to poverty if they were forced to totally finance adequate health care for themselves and members of their families. To protect themselves against such a possibility, most individuals are insured against such financial disaster

by either earning—as a benefit of employment—or by directly purchasing health insurance protection. The vast majority of individuals who are protected under a health insurance plan become eligible for such protection through their place of employment. Therefore, when the economy is in a slump, which is now the case, and millions of Americans lose their jobs, they also often lose health insurance protection, for themselves and for their families.

Mr. President, millions of hard working Americans have lost their jobs, through no fault of their own, simply due to poor performance of the economy. It's hard enough for these workers to go home and explain to the members of their family that they just received their last paycheck. It's not long thereafter that they soon realize that their health insurance benefits, which provided needed protection for themselves and their family has also been lost along with their job.

In my State of Michigan, and in every State throughout the country, millions of Americans are neglecting professional health care, and are allowing otherwise easily treated and minor conditions to turn into serious and chronic conditions, simply because they can no longer afford the cost of uninsured medical care. Dr. Bailus Walker, the director of the Michigan Department of Public Health, estimates that almost 400,000 workers in Michigan alone have lost health insurance benefits as a consequence of the current recession. That number represents nearly 60 percent of all of the unemployed workers in my State and does not include the thousands of dependents of these workers. Clearly this indicates that we have a serious problem in my State and I am sure this situation is not altogether unique for my State alone.

Mr. President, for these reasons and others I am introducing S. 3063 which is designed to provide protection for individuals who have lost health insurance coverage as a result of being involuntarily severed from the work force. This proposal would insure that most individuals who are currently protected by health insurance secured through their place of employment would continue to receive this protection for at least 1 year after they were laid off or had their job terminated. In addition, S. 3063 contains provisions that would make available, at an affordable cost, health insurance protection to most currently unemployed persons.

Members of my staff over the past few months have been working with representatives of labor and business in crafting this proposal which goes a long way toward providing affordable health care protection to millions of Americans currently without protection and at risk through no fault of their own. With the exception of the temporary emergency program, the major portion of this proposal requires little or no outlays from the Federal Government and creates a permanent mechanism preventing this situation from arising in the future.

UNEMPLOYMENT—THE PROBLEM

Mr. President, we all know that the unemployment rate reached record levels in October and stood at 10.4 percent, the highest percentage of unemployed persons in over 40 years.

Mr. President, I ask unanimous consent that a table comparing the October 1981 and October 1982 unemployment rate be printed in the RECORD at this point.

UNEMPLOYMENT RATE

	Seasonal adjustment	
	October 1981	October 1982
Civilian labor force	109,012,000	110,644,000
Employed	100,343,000	99,093,000
Unemployed	8,669,000	11,551,000
Unemployment rate (percent)	8.0	10.4

What is often not considered when examining the unemployment rate is the extent to which the burden of unemployment falls disproportionately on certain groups in our society. The blue collar unemployment rate is currently 15.9 percent, up a full 5 percent from just 1 year ago. The unemployment rate for black workers is twice as high as for white workers, and as many as 21.7 percent of white teenagers and 46.7 percent of black teenagers are looking for work. In addition, unemployment affects lesser skilled and lower income individuals at a greater rate than the general population. All of this is important when considering that many of these unemployed workers also lose their health insurance along with their jobs.

Mr. President, another critical unemployment statistic that must be considered is the duration of unemployment. For the longer a worker remains unemployed, the more likely it is that the worker will lose his or her health insurance.

Mr. President, I ask unanimous consent that a table showing the duration of unemployment be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

DURATION OF UNEMPLOYMENT

	Seasonal adjustment (October)			
	Number		Percent	
	1981	1982	1981	1982
Total unemployed [1]	8,685,000	11,590,000	100.0	100.0
Less than 5 weeks	3,707,000	3,920,000	42.7	33.8
5 to 14 weeks	2,686,000	3,517,000	30.9	30.3
15 weeks and over	2,292,000	4,153,000	26.4	35.8
Average duration, in weeks	13.6	17.2		
Median duration, in weeks	6.8	9.6		

[1] The number of unemployed differs from the figure reported in Table I–1 due to sampling variability and seasonal adjustment.

Mr. President, as this table indicates, more than one-third of those unemployed in October 1982 were jobless for 15 weeks or more. This is important because some workers health insurance coverage is terminated immediately with employment, while for others it is extended for 30 days. However, a significant number of workers lose their insurance 1 month after termination. Therefore the duration of unemployment is directly related to the number of individuals at risk and without protection.

Of course, all of the figures I have cited above exclude the so-called discouraged workers. As we know, discouraged workers are individuals who report that they want to work but because they are not actively looking for employment they are excluded from our unemployment statistics. However, these individuals are in need of health insurance protection as much, if not more, than all unemployed persons.

Mr. President, I ask unanimous consent that a table indicating the number of discouraged workers be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

DISCOURAGED WORKERS (SEASONALLY ADJUSTED)

	3d quarter	
	1981	1982
Total	1,094,000	1,619,000
Job-market factors [1]	801,000	1,211,000
Personal factors [2]	293,000	408,000
Men	383,000	584,000
Women	711,000	1,035,000
White	744,000	1,067,000
Black and other	351,000	545,000

[1] Job market factors include "could not find job" and "thinks no job available."

[2] Personal factors include "employers think too young or old," "lacks education or training," and "other personal handicaps."

Mr. President, therefore, to the 11.6 million Americans who are unemployed according to the official unemployment rate we must add an additional 1.6 million discouraged workers. As the number of jobless continues to climb, the number of individuals who, out of sheer frustration, stop looking for work also climbs. These millions of additional unemployed workers also need protection against the potentially devastating consequences of unexpected medical bills.

Mr. President, while unemployment is at the highest level in over four decades, all of the economic forecasts I have seen predict the continuation of record levels of unemployment for the next few years. Unfortunately, in all likelihood significant numbers of unemployed workers will be needing essential health care over the next few years, without the means to secure that care. The proposal I am introducing today will permamently solve this problem for unemployed workers

during both good and bad economic times.

HEALTH INSURANCE AND UNEMPLOYMENT

Mr. President, as I have already mentioned, about 80 percent of individuals gain access to health insurance coverage through their place of employment. By being part of a group of employees and by integrating the payment of insurance premiums with an overall package of employment benefits, most workers are able to afford health insurance protection. This situation ceases to exist upon the termination of employment. In a sense, S. 3063 continues the integration of active earnings and health insurance protection during times of inactivity. By setting aside a slightly higher amount of insurance premiums—in dollars or earned benefits—during active employment, workers are able to secure protection during periods of inactivity.

In addition to losing health insurance protection during job layoff or termination, studies have indicated that waiting periods at the onset of employment also result in significant periods of nonprotection. What is sometimes referred to as "entry lag" is the result of waiting periods where new employees are ineligible for health insurance coverage for varying periods of time. One study found waiting periods of 3 months or longer for one-quarter of all new workers. In another study, waiting periods ranged from 4, to as much as 28 weeks depending on the industry and the region. S. 3063 would deal with this problem in part by providing coverage for 2 months for unemployed workers who return to and are ineligible for work-related health insurance protection.

Mr. President, it is true that there is a need to learn more about the impact of unemployment on health insurance protection. It is my hope S. 3063 will serve as the occasion for further inquiry into this matter. We need to know more about the number of unemployed individuals who lack access to affordable coverage. We need to know more about the utilization rate and health care needs of our unemployed citizens. I believe the proposal I am introducing today will assist us in learning more about the health care needs of unemployed persons while simultaneously providing protection for millions of Americans.

PROVISIONS OF S. 3063

Mr. President, under the proposal I am introducing today all individuals who lost health insurance coverage as a result of being involuntarily severed from the work force without cause would be covered for up to a year following job termination. Only individuals who are not eligible for other work related or federally funded insurance coverage would be protected under the new policies made available as a result of this legislation.

S. 3063 has two major parts. The first part, and long-term solution, is aimed at active workers who might lose their jobs in the future. The second part, a temporary and emergency program, is aimed at unemployed workers who have lost their jobs within the 12 months prior to the enactment of the bill.

The long-term proposal is implemented by amending the Internal Revenue Code to alter the conditions under which an employer could deduct the cost of health insurance premiums. The conditions for an employer to continue to utilize the deduction would be to provide for the continuation of health insurance coverage for at least 1 year following an employee's involuntary severance by either directly providing coverage or by participating in a State insurance pool.

Both means for providing coverage would be subject to a specified minimum protection. In no instance could an unemployed person be required to pay more than 20 percent of the health insurance premium. All benefit packages would provide benefits comparable to those offered under medicare including comprehensive medical and hospital protection. The proposal requires the options of annual deductibles of no less than $100 and no more than $500. Each insurance policy would provide coverage for the unemployed worker and his or her family. Coverage would be available for up to 12 months or for 60 days after the unemployed individual becomes gainfully employed. An employed worker would be eligible to participate in this program only if the individual was not eligible for other health insurance protection. Other such policies would include spousal or parental insurance protection as well as Federal health insurance programs such as medicare and medicaid.

The legislation encourages and anticipates that States will establish State insurance pools which would be regulated by the States and not by the Federal Government. There are provisions for the establishment of pools in each State if State governments choose not to endorse this approach. In addition, State and municipal governments would have the option of participating in the insurance pools.

The emergency program would be for individuals who are not eligible for a full year of severance protection under the permanent program and who were involuntarily severed from the work force within the 12 months prior to enactment. All individuals eligible for participation in this program would receive benefits equal to the Federal minimum benefits and would be subject to the same limitation of 20 percent of the insurance premium.

The emergency program would be administered by the Secretary of Health and Human Services who would establish an expedited enrollment procedure for all eligible individuals. Initially this emergency program would be administered in a fashion similar to the medicare program—subject to different premiums and deductibles. As soon as an insurance pool is established within the unemployed person's State, the administration for the emergency program would be shifted to the State pool. As mentioned, the unemployed worker would pay 20 percent of the insurance premium and once the individual is switched to the State pool—unlike the long-term program—the Federal Government would contribute the remaining 80 percent.

Mr. President, under this emergency program, which is temporary and will be phased out as soon as the long-term program is in place, all eligible individuals will be protected for a full year even if they have been unemployed for up to 1 year. Neither the long-term or emergency portions of this proposal would affect current contractual agreements.

Mr. President, it is my hope that S. 3063 will focus attention on the serious problem of the loss of health insurance coverage due to unemployment. In 1975, during an earlier recessionary period, Congress looked at this problem although no legislation was enacted. I believe part of the difficulty encountered during this period related to the proposals under consideration at that time, many of which established vast new Federal programs. S. 3063 utilizes the existing private-sector mechanisms for dealing with this critical problem. Since the long-term program is financed by active employers and employees for a limited population and spread over a large number of companies and workers, I believe the cost to active participants in the work force will be limited and manageable.

As our unemployment rate continues to rise, and people stay unemployed for longer periods of time, we are learning that jobless workers and their families have special health care needs. They suffer more emotional and physical illness and more malnutrition than people who are working. Because these people are unemployed, they are often too worried about mere survival to meet critical health needs. They should not have to be in this situation. I think we are obligated to help them through these tough times by assuring them that adequate health care will be there when they need it. S. 3063 provides that assurance.

Mr. President, I urge all of my colleagues to support this needed legislation.

Mr. President, I ask unanimous consent that an article on health insurance and unemployment from the Sunday, October 31, 1982, New York Times and the text of S. 3063 be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, Oct. 31, 1982]

JOB CUTS CAUSE OVER 16 MILLION TO LOSE THEIR HEALTH COVERAGE

(By Robert Pear)

WASHINGTON, October 30.—More than 16 million Americans have lost health insurance coverage as a result of unemployment, and many appear to be deferring necessary medical care, according to health officials.

The principal source of coverage for most workers is the group health plans offered by employers. For that reason, workers generally lose health insurance when they lose their jobs.

Unemployed workers have special health care needs because they seem to suffer more emotional and physical illness and more malnutrition than people who are employed.

DEPENDENTS ALSO AFFECTED

Federal officials and labor leaders said eight million of the 11.3 million unemployed Americans had lost their coverage, exposing them to the risk of high medical costs. On the average, they said, for each jobless worker who has lost coverage, at least one child or spouse covered under the same policy has also lost protection. Thus, the total is more than 16 million.

At the end of 1979, more than 183 million Americans, representing 85 percent of the civilian population, were protected by one or more forms of private health insurance, according to the latest figures available from the insurance industry.

Unemployed people find it difficult to qualify for Medicaid and Medicare, particularly since the Federal Government restricted eligibility last year as part of President Reagan's overall effort to control Government spending.

A recent study by the Blue Cross and Blue Shield Association concluded, "Exposure to the risk of heavy health care expenses is a serious threat to workers who lose their health care coverage because of unemployment."

In Michigan, Dr. Bailus Walker Jr., Director of Public Health, said 400,000 workers had lost insurance benefits as a result of the current recession. He also said there had been a "disturbing" rise in the state's infant mortality rate, which is often considered to be a reflection of the overall quality of health care, as well as social and economic factors.

Dr. Walker and other health specialists linked the rise to the fact that some jobless workers and members of their families cancel doctors' appointments and fail to enter hospitals when they need medical care.

Dr. Walker said the increase in the state's infant mortality rate was "the first significant increase we've had since World War II." The rate, 12.8 deaths per 1,000 live births in 1980, rose to 13.2 last year, he said.

JOINT STATEMENT OF CONCERN

Spokesmen for the American Medical Association, the American Hospital Association, the A.F.L.-C.I.O., Blue Cross and Blue Shield, the Business Roundtable, representing 200 large corporations, and the Health Insurance Association of America have issued a joint statement expressing concern about the lack of insurance coverage for the unemployed. But they have only begun to improvise solutions.

Prof. John T. Dunlop of Harvard University, a former Secretary of Labor who has studied the problem, said in an interview, "You see a lot of people struggling with this. They are trying to innovate, to experiment. The social costs are really very high."

Under most health insurance plans, benefits end within a month after a person is laid off. Blue Cross and many commercial insurance companies give laid-off workers an opportunity to continue coverage by switching from a group health plan to a policy covering an individual or family.

But the premiums charged are invariably higher, and the benefits are usually more limited. Employers usually pay a substantial part of the cost of their employee's health insurance. For nearly half of all workers with such coverage, the employer pays the entire cost, according to statistics collected by the Federal Government.

Douglas A. Fraser, president of the United Automobile Workers, said the cost of continuing health insurance for a laid-off worker was usually prohibitive because it equaled approximately one-fourth of the worker's unemployment insurance benefits. Nationwide, the average benefit payment is $118 a week, with average weekly payments ranging from $153 in Michigan to $77 in Mississippi. State insurance officials said short-term coverage for a family often costs more than $100 a month.

Unemployed workers need health care at least as much as those who are employed, and perhaps more, according to public health experts.

Prof. M. Harvey Brenner, a sociologist at Johns Hopkins University, said Friday: "A shortening of life span typically follows recessions. With economic loss, unemployment and business failure, you get an increase in mortality from a wide spectum of illnesses, as well as from homicide and suicide. A one percentage point increase in the unemployment rate tends to be associated with an increase of at least 1.9 percent in the mortality rate over a six-year period."

The mortality rate last year was 866 deaths for every 100,000 people in the country.

STRESS CALLED A FACTOR

Mr. Brenner said the increase in mortality apparently resulted from stress related to the loss of income and jobs; from chronic anxiety among workers who felt their jobs threatened, and from the decision of many jobless workers to postpone health care.

Dr. James H. Sammons, executive vice president of the American Medical Association, has urged all state and county medical societies to tend to the needs of people who have lost health benefits because of unemployment or changes in Medicaid eligibility. Doctors in Portland, Ore., Detroit and Aliquippa, Pa., near Pittsburgh, said they were providing services at reduced prices or for no charge. Those places have experienced high unemployment related to the problems of the timber, auto and steel industries, respectively.

In Portland, Brad Davis, executive director of the Multnomah County Medical Society, said 800 needy families had requested care under the society's program.

Dr. M. Harry Jennison, executive director of the American Academy of Pediatrics, and Dr. Monte Malach of Brooklyn, president of the American Society of Internal Medicine, said their members were eager to continue care for people who had lost health insurance because of unemployment. They have held discussions with the A.F.L.-C.I.O. to make formal arrangements for such care.

PREPARING GOVERNMENT PLAN

But some members of Congress contend that Government action is needed. Senator Donald W. Riegle, Jr., Democrat of Michigan, is drafting a proposal that would create a Federal health insurance program like Medicare to pay doctor and hospital bills for people who lost their jobs in the last year. The program would be temporary. The measure would create tax incentives for employers to continue coverage of employees who lose their jobs in the future.

Reagan Administration officials oppose any program that would require additional Federal spending. They say economic recovery will solve the health insurance problems of the unemployed. "If you put people back to work, then the problem goes away," said Dr. Robert J. Rubin, an Assistant Secretary of Health and Human Services.

S. 3063

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Health Insurance for Unemployed Workers Act of 1982".

DEFINITIONS

SEC. 2. (a)(1) The term "employer" means, for any calendar year, any person who employs at least one full-time employee during any week in such calendar year. Such term does not include—

(A) a self-employed individual;

(B) the United States or any instrumentality thereof; or

(C) any State or local government or instrumentality thereof.

(2) Any State or local government or instrumentality thereof may at its option participate in the reinsurance pools established under this Act on the same basis as an employer, and shall be considered to be an employer for purposes of this Act.

(b) The term "full-time employee" means an individual who is employed by an employer for at least 25 hours in a week.

(c) The term "unemployment" or "unemployed" means, with respect to an individual, that such individual—

(1) is not a full-time employee of any employer or other entity, or has been such a full-time employee for less than 60 consecutive days and is not eligible to participate in a group health plan of such employer or entity;

(2) was a full-time employee of an employer within the preceding 12-month period and was a participant in a group health plan of such employer at the time such individual's full-time employment by such employer ceased (as described in paragraph (3)); and

(3) was involuntarily terminated or laid off as an employee of such employer (other than for cause), and as a result of such termination or layoff is no longer eligible to participate in the group health plan at the same rate of contribution as when he was a participant at the time of such termination or layoff.

(d) The term "qualified unemployed individual" means an unemployed individual who—

(1) was a participant in a group health plan at the time his employment ceased (as described in subsection (c) (3)) which was provided by a group health plan provider which is participating in the qualified reinsurance pool in operation in the State in which such individual was so employed;

(2) if eligible for any coverage under a group health plan as a family member, or would be so eligible if his spouse or parent were enrolled in a group health plan in which such spouse or parent is eligible to enroll and is eligible for family coverage, is enrolled in such plan;

(3) if eligible for benefits under part A, or eligible to enroll under part B, of title XVIII of the Social Security Act, has applied for such benefits under part A and has enrolled under part B; and

(4) if eligible for any medical assistance under a State plan approved under title XIX of the Social Security Act, has applied for such aid.

(e) The term "group health plan" means any plan of, or contributed to by, an employer to provide medical care (as defined in section 213 (e) of the Internal Revenue Code of 1954) to his employees or the families of such employees, directly or through insurance, reimbursement, or otherwise.

(f) The term "group health plan provider" means any insurance company, hospital and medical service corporation, health maintenance organization, self-insured employer, multiemployer trust, labor organization multilabor organization trust or any other entity which provides or takes payment for medical care under a group health plan.

(g) The term "family member" with respect to an individual means—

(1) such individual's spouse; and

(2) such individual's natural or adopted child who is—

(A) 18 years of age or under; or

(B) 22 years of age or under and a full-time student at an elementary or secondary school or college or university.

(h) The term "qualified reinsurance pool" means a qualified State reinsurance pool (as determined under section 3), a qualified private reinsurance pool (as determined under section 4 (a)), or a Federal reinsurance pool (described in section 4 (b)).

(i) The term "qualified pool health plan" means a health plan offered by a qualified reinsurance pool which—

(1) provides, directly or through insurance, reimbursement, or otherwise, at least those services and items for which payment may be made under title XVIII of the Social Security Act; and

(2) requires an annual deductible of no less than $100 and nor more than $500.

(j) The term "State" means the 50 States and the District of Columbia.

STATE POOLS

SEC. 3. (a) A qualified State reinsurance pool is an entity established under State law for the purpose of offering three or more qualified pool health plan options in accordance with the provisions of this Act to qualified unemployed individuals previously employed in such State.

(b)(1) The State law establishing a qualified State reinsurance pool must provide that all group health plan providers conducting business in the State shall participate in the pool (except to the extent that participation is waived under section 5 or is not required for purposes of deductibility of premiums under section 162(i)(3) of the Internal Revenue Code of 1954 by reason of section 6(b)(2) of this Act), and that the expenses incurred by the pool and the qualified pool health plans offered by the pool, to the extent such expenses exceed the amount of premium payments collected from unemployed individuals and the amount of Federal payments under section 7(e)(2), shall be borne by each group health plan provider participating in the pool in an amount which bears the same ratio to the total of such expenses as the amount of premimums collected by such provider (other than premiums collected on plans which qualify for a waiver under section 5 or on plans which are exempt from the requirements of section 162(i)(3) of the Internal Revenue Code of 1954 by reason of section 6(b)(2) of this Act) with respect to employees employed in such State bears to the total amount of premiums collected by all group health plans (other than premiums collected on plans which qualify for a waiver under section 5 or on plans which are exempt from the requirements of section 162(i)(3) of the Internal Revenue Code of 1954 by reason of section 6(b)(2) of this Act) doing business in such State with respect to employees employed in such State.

(2) In the case of a self-insured employer or other type of group health plan which does not entail the collection of premiums, the board of directors of the pool shall apportion expenses based upon an estimate of the amount of the premiums which would be collected if such plan were not self-funded.

(3) Any amounts collected as premiums in excess of the expenses incurred by the pool shall be maintained by the pool, and shall be taken into account in determining future premium amounts.

(c)(1) Each qualified State reinsurance pool shall offer three or more qualified pool health plan options to any qualified unemployed individual in such State, or to such individual and his family members if he so chooses, at a premium amount, to be paid on a monthly basis, of not more than 20 percent of the amount equal to 125 percent of the average premium rate in such State for group health plans for groups of less than 25 employees for benefits actuarially equivalent to the benefits provided under the qualified pool health plan.

(2) For purposes of this subsection, an unemployed individual shall be considered to be unemployed in the State in which he was previously employed at the time of his termination or layoff which qualified him for eligibility under this Act under section 2(c)(2).

(3) Subject to the maximum premium amount established under paragraph (1), premium rates may be adjusted to reflect expected claims, administrative expenses, and differences in costs of medical care in various geographic areas.

(d)(1) A qualified State reinsurance pool shall be established as a nonprofit corporation, and shall be governed by a board of directors of not more than nine members. Members of the board shall be elected by the group health plans participating in the pool, with votes weighted in the same proportion as the assessments of pool expenses are made under subsection (b)(1).

(2) The board of directors of each pool shall establish in actuarial committee which shall establish and periodically review the premium rates. Such rates shall be subject to approval by the State insurance commissioner or similar official designated under paragraph (3).

(3) The State insurance commissioner or other official having jurisdiction over group health plans in such State shall be responsible for establishing and overseeing the operation of the pool. Oversight responsibilities shall include approval of qualified health plans and premiums and review of information issued by the pool.

(e)(1) The board of directors of the pool shall establish procedures for advertising the availability of qualified pool health plans and for enrolling unemployed individuals seeking coverage under such plans, managing such plans, and paying claims under such plans.

(2)(A) Coverage under qualified pool health plans shall be marketed under the name of the pool, and may be marketed directly by the pool or on behalf of the pool by the group health plan providers participating in the pool.

(B) In the case of pool coverage marketed by participating providers—

(i) the pool shall pay a reasonable expense allowance to such provider;

(ii) policies or contracts issued for coverage under a pool plan shall clearly indicate that coverage is issued on behalf of the pool;

(iii) full disclosure shall be made to the unemployed individual with respect to coverage under the pool plan; and

(iv) advertising and sale of pool plans shall be subject to rules established by the board of directors to preclude "bait and switch" tactics or similar misuse of pool plans by providers, and such other requirements as the board of directors deems appropriate.

(3) The board of directors shall notify the State and the Secretary of Health and Human Services and the Secretary of the Treasury with respect to the identity of the group health plan providers participating in the pool.

(f) No more than one qualified pool may operate in any State, but States may by mutual agreement establish regional pools for coverage in more than one State by a single pool. Any such regional pool shall be subject to the State laws of the States in which it operates.

(g) The Secretary of Health and Human Services shall certify whether a State pool meets the requirements of a qualified State reinsurance pool, and may decertify such a pool at such time as he determines that the pool fails to meet such requirements.

QUALIFIED PRIVATE POOLS; FEDERAL POOLS

SEC. 4. (a)(1) In the case of any State which does not establish a qualified State reinsurance pool within 180 days after the date of the enactment of this Act, or in the case of a State in which the State pool has been decertified, those group health plan providers which conduct business in such State and would be required to participate in a qualified State reinsurance pool in such State if such a pool was established in accordance with section 3, may petition the Secretary of Health and Human Services to permit such providers to voluntarily organize and operate a qualified private reinsurance pool in such State. Any such private pool must meet all the requirements of section 3, except that the responsibilities of the State insurance commissioner shall be carried out by the Secretary of Health and Human Services.

(2) The Secretary of Health and Human Services shall certify whether a private pool meets the requirements of a qualified private reinsurance pool, and may decertify such a pool at such time as he determines that the pool fails to meet such requirements.

(b) In the case of any State in which no qualified State reinsurance pool has been established within 180 days after the date of the enactment of this Act, and no qualified private reinsurance pool has been established under subsection (a) within 270 days after such date of enactment, or in which no qualified pool exists by reason of the decertification of a qualified State or private pool, the Secretary of Health and Human Services shall establish a Federal pool for such State. Such pool shall meet the same requirements as a qualified private pool under subsection (a).

(c) In any case in which a qualified State reinsurance pool is certified or recertified, any private reinsurance pool or Federal reinsurance pool operating in such State shall cease to be a qualified reinsurance pool.

WAIVER OF PARTICIPATION IN POOLS

SEC. 5. Any group health plan provider who, on and after October 1, 1982, provides extended coverage under a group health plan for employees covered by the plan after involuntary termination or layoff, which extended coverage equals or surpasses the minimum extended coverage required to be provided by a qualified pool health plan (as determined and certified by the Secretary of Health and Human Services based upon duration of coverage and actuarial equivalence of benefits), shall not be required by reason of this Act to participate in or contribute to the expenses of a qualified reinsurance pool with respect to premiums collected for such plan for so long as such plan continues to meet the requirements of this section.

DEDUCTION FOR EMPLOYER CONTRIBUTIONS TO GROUP HEALTH PLANS

SEC. 6. (a) Section 162(i) of the Internal Revenue Code of 1954 (relating to group health plans) is amended by adding at the end thereof the following new paragraph:

"(3) Participation in qualified reinsurance pool.—The expenses paid or incurred by an employer for a group health plan shall not be allowed as a deduction under this section unless—

"(A) the provider of such group health plan (as defined in section 2(e) of the Health Insurance for Unemployed Workers Act of 1982) participates in and contributes to the expenses of qualified reinsurance pools in accordance with the provisions of that Act (except to the extent that such participation is waived in accordance with section 5 of that Act);

"(B) such plan provides that coverage under the plan for any employee and members of his family covered under the plan at the time his employment is terminated or he is laid off shall be continued for a period of at least 30 days after such termination or layoff; and

"(C) such plan provides for a period of open enrollment of at least 30 days immediately after the loss of family member coverage (described in Clause (iii)) for any individual who (i) is eligible to enroll in such plan, (ii) was covered under a group health plan of such individual's spouse or parent, and (iii) loses such coverage as a family member (at the same rate of contribution as employees and their family members) on account of the unemployment of such individual's spouse or parent.".

(b)(1) Except as provided in paragraph (2), the amendment made by subsection (a) shall be effective for taxable years beginning on or after January 1, 1983.

(2) The amendment made by subsection (a) shall not apply to any group health plan, the terms and conditions of which are determined under a contract in effect on the date of the enactment of this Act, until the first taxable year beginning on or after the expiration or renewal date of such contract.

TEMPORARY COVERAGE FOR UNEMPLOYED WORKERS

SEC. 7. (a) Any—

(1) qualified unemployed individual who was unemployed on the date of the enactment of this Act or who became unemployed after such date but is not eligible to purchase a qualified pool health plan because no qualified reinsurance pool has been established in the State in which he was employed,

(2) unemployed individual who would be a qualified unemployed individual but for the fact that the provider of his former group health plan is not a participant in such pool, and

(3) member of the family of an individual described in paragraph (1) or (2) who was covered under such individual's group health plan at the time of such individual's termination of employment or layoff,

shall be eligible to enroll in the hospital insurance program established by part A of title XVIII of the Social Security Act and the supplementary medical insurance program established by part B of such title. Any such individual or family member who wishes to enroll under this section must enroll in both such programs and must pay a monthly premium (in lieu of the premium under section 1839 of the Social Security Act) equal to 20 percent of an amount equal to 125 percent of the average premium rate in the State in which such individual was employed for group health plans for groups of less than 25 individuals for benefits actuarially equivalent to the benefits provided under title XVIII of the Social Security Act (as determined by the Secretary of Health and Human Services).

(b) The Secretary of Health and Human Services shall establish expedited enrollment procedures for individuals eligible to enroll under this section, and enrollment for such individuals shall be open during the 180-day period beginning on the date of the enactment of this Act, and during the 120-day period following the termination of employment or layoff which began such individual's period of unemployment. Coverage shall begin with the month in which the individual and his family members (if any) enroll, and shall end with the earlier of—

(1) the last day of the twelfth month following the termination of employment or layoff which began such individual's period of unemployment, or, if later, the last day of the twelfth month following the date of the enactment of this Act;

(2) the last day of the first month during all of which such individual is no longer unemployed;

(3) the last day of the first month for which such individual does not pay the premium (or in the case of a family member, the last day of the first month for which such family member does not pay such premium); or

(4) the last day of the first month for which a qualified reinsurance pool is established in the State in which such individual was employed.

(c) Payments under title XVIII of the Social Security Act on behalf of individuals enrolled under this section shall be secondary to any coverage of such individual under a group health plan, or under a State plan approved under title XIX of the Social Security Act, in the same manner and subject to the same conditions (other than age and employment) as payments under such title are secondary in the case of older workers under section 1862(b)(3).

(d) There are authorized to be appropriated to the Federal Hospital Insurance Trust Fund and the Federal Supplementary Medical Insurance Trust Fund from time to time such sums as the Secretary of Health and Human Services deems necessary for any fiscal year, on account of—

(1) payments made or to be made during such fiscal year from such Trust Fund with respect to individuals who are entitled to benefits under title XVIII of the Social Security Act solely by reason of this section,

(2) the additional administrative expenses resulting or expected to result therefrom, and

(3) any loss in interest to such Trust Fund resulting from the payment of those amounts,

in order to place such Trust Fund in the same position at the end of such fiscal year as it would have been in if this section had not been enacted.

(e)(1) Any individual (and his family members) eligible to enroll under title XVIII of the Social Security Act by reason of this section who—

(A) was employed on the date of the enactment of this Act,

(B) became unemployed within 180 days after such date of enactment, or

(C) would be a qualified unemployed individual but for the fact that the provider of his former group health plan is not a participant in the qualified reinsurance pool established in the State in which he was employed,

shall, if he ceases to be eligible to enroll under such title XVIII by reason of the establishment of a qualified reinsurance pool in the State in which such individual was employed, be eligible to purchase a qualified pool health plan from such pool, notwithstanding the provisions of section 2(d)(1).

(2) Any individual described in paragraph (1) who purchases a qualified pool health plan, shall pay to the pool the premium amount established for such plan under section 3(c), and the United States shall pay to such pool for each such individual, on a monthly basis, an amount equal to 80 percent of the amount equal to 125 percent of the average premium rate in such State for group health plans for groups of less than 25 employees for benefits actuarially equivalent to the benefits provided under the qualified pool health plan. Such payments shall be made from the general fund in the Treasury.●

By Mr. ROTH:

S. 3064. A bill to amend the Tax Reform Act of 1976 to extend, for an additional 4 years, the exclusion from gross income of the cancellation of certain student loans; to the Committee on Finance.

EXCLUSION FROM GROSS INCOME OF THE FORGIVENESS OF CERTAIN LOANS

● Mr. ROTH. Mr. President, today I am introducing a bill which would amend the Tax Reform Act of 1976 to extend, for an additional 4 years, the exclusion from gross income the cancellation or forgiveness of certain student loans.

This measure, which simply extends a provision of existing law has assisted primarily public hospitals in the establishment of programs to train nurses. For example, nursing students are provided with loan forgiveness or scholarships in exchange for which they agree to return to a particular hospital and work for a period of time. By virtue of this provision, the amount of the loan forgiven or scholarship granted is not includable in the student's taxable income. If this provision is not extended beyond January 1, 1983, the opposite result will occur with the consequent adverse impact on the ability of hospitals to train nurses and help alleviate the nursing shortage which currently exists nationwide.

Mr. President, the importance of nurses and nursing resources to our health care system is central to the provision of quality health care services in our Nation's hospitals. Over many years, the Federal Government has provided millions of dollars to other worthy nurse training programs designed to address the nursing shortage and other problems. However, the approach taken by this bill allows a cost-effective and cost-efficient nurse training mechanism to remain in place and be available to hospitals experiencing acute nursing shortages.●

By Mr. PRYOR:

S. 3065. A bill to establish in the Department of State the position of Under Secretary of State for Agricultural Affairs.

CREATION OF THE POSITION OF UNDER SECRETARY OF STATE FOR AGRICULTURAL AFFAIRS

Mr. PRYOR. Mr. President, today I am introducing legislation that would create within the Department of State the position of Under Secretary for Agricultural Affairs.

I propose this new senior position because it has become clear that agriculture policy is being made today by those officials who make foreign policy. Time and again, foreign policy decisions are made with little consideration of the effect of the decisions on American farmers.

Because the State Department has assumed a major role in agriculture matters, we need to make certain that the State Department has experts on hand who understand the effects on agriculture of U.S. foreign policy. The foreign service must be made more aware of the domestic consequences of its actions.

The most obvious example of a foreign policy decision's backfiring on our own people is the recent grain embargo directed against the Soviet Union. There are times, such as the 1979 invasion of Afghanistan, when it is necessary to take dramatic steps to counter Soviet aggression, and the U.S. farmer will be the first one to step forward to support appropriate efforts. But the results of the embargo were not what the policymakers had in mind.

The only countries to benefit from the action were Argentina, Australia, and Canada, whose grain exports to the U.S.S.R. soared. The Soviet Union apparently suffered no ill effects at all. So who was hurt by the embargo? Only the American farmer, who saw his grain market sharply reduced, his prices lowered, and his future buyers made suspicious of his reliability as a supplier.

In the past decade, there have been four embargoes of agricultural goods. We must make it convincingly clear to our customers around the world that they should not expect embargoes from the United States. They should expect us to be reliable suppliers. Any uncertainty about the reliability of U.S. food exports will cause our trading partners to make arrangements with other suppliers.

An agriculture specialist understands this. The average diplomat may not. A high-level State Department official attuned to the special consideration of American agricultural policy might have advised against the embargo or at least made sure its effects on farmers were fully considered.

Agricultural products account for 20 percent of all U.S. exports and contribute $26 billion to the balance of trade. Agricultural exports account for $95 billion of our domestic economic activity and provide 1.2 million jobs. Each extra $1 billion in exports creates as many as 35,000 new jobs.

Today, however, depressed farm prices and high production costs are creating an enormous hardship for our farmers. Increased agricultural trade would provide a welcome outlet for farm products and create jobs in food processing industries. The European Community is already seeking to expand its exports to the Third World, and an aggressive role by State Department officials here and abroad will be necessary if we are to maintain our preeminence as a supplier of the world's food.

Aggressive U.S. export policies will expand trading partnerships, especially in the developing nations, and where trade increases, so does U.S. influence.

We must remember that it is not just the Commerce Department and the Agriculture Department that have a responsibility to encourage U.S. exports. The State Department has recognized its role in the promotion of agricultural exports. As former Secretary of State Alexander Haig stressed in a cable to all U.S. ambassadors:

> The effort to promote agricultural exports is one of major importance for the United States. I consider it a major objective of our overseas missions. I know that I can count on you to take a strong personal interest in the achievement of this objective in your country.

The State Department has also been working with the Farm Bureau and labor unions to increase exports of processed foods. Many of the farmers I have spoken with, however, believe that State needs to give a higher priority to, and be much more aggressive with, agricultural exports. This is especially true of the Public Law 480 Food for Peace program.

Before we can see an expansion of U.S. food sales abroad, however, we need to get rid of some of the barriers that stand in the way of fair competition for food customers, particularly the rigid protectionist policies of Japan and the European Community. Not surprisingly, serious trade disputes increase tensions and damage overall relations with the countries involved.

U.S. Foreign Service personnel are in an ideal position to monitor the slightest changes in trade policy around the world, and under the guidance of an Under Secretary for Agricultural Affairs their efforts could help to head off the creation of the sort of trade barriers which the Special Trade Representative is now trying to eliminate.

In the area of trade promotion the Secretary of Agriculture and Special Trade Representative have made commendable efforts but there is a need for an agricultural expert at a high level within the State Department. Moreover, there are many issues which fall under the day-to-day purview of the State Department that require the input of an official who is aware of the domestic importance of U.S. agriculture and be sensitive to its needs.

An extremely sensitive issue has been the matter of Commodity Credit Corporation guarantees of loans to Poland and Romania for the purchase of U.S. farm goods. The foreign policy ramifications of this controversy are varied and difficult to predict, but before this issue is resolved, the American farmer must be considered and consulted.

The Caribbean Basin Initiative is directed not only at the Caribbean region but also at our own producers of certain agricultural products.

As the administrator of the food-for-peace program, promoter of agricultural exchange programs, and monitor of economic trends abroad, the State Department is closely involved with the activities of the U.S. farmers and is in a position to affect the farmer in numerous bilateral and multilateral negotiations.

In testimony before the Senate Agriculture Committee, Assistant Secretary of State for Economic and Business Affairs Robert D. Hormats acknowledged "the State Department's special role in meshing our trade, economic, and foreign policy interests." The creation of an Under Secretary of

State for Agricultural Affairs is a logical step toward improved management of our trade policy, our foreign policy, and our agricultural policy.

More often than not, agriculture and foreign policy objectives coincide, and our farmers will enthusiastically support U.S. foreign policy if only they feel that their own interests are being represented. Today, however, the American farmer has little or no access to the makers of our foreign policy. We need to provide a permanent, specialized conduit for the concerns of the farmer. We need a link between the striped pants in Foggy Bottom and the overalls in our fields that produce so much of the world's food.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3065

SEC. . (a) The Act entitled "An Act to strengthen and improve the organization and administration of the Department of State, and for other purposes", approved May 26, 1949 (22 U.S.C. 2652), is amended—

(1) by inserting in the first section "an Under Secretary of State for Agricultural Affairs," after "Management,"; and

(2) by adding at the end thereof the following:

"SEC. 6. (a) The Under Secretary of State for Agricultural Affairs, referred to in the first section and appointed pursuant to section 2, shall be appointed from among individuals having experience in the international commerce of agricultural commodities.

"(b) The Under Secretary of State for Agricultural Affairs shall be responsible to the Secretary of State for matters pertaining to agricultural affairs, including United States policy toward the export of agricultural commodities.".

(b) The seventh undesignated paragraph of section 5314 of title 5, United States Code, is amended by inserting "and an Under Secretary of State for Agricultural Affairs" after "Management".

By Mr. GLENN (for himself, Mr. KENNEDY, Mr. ZORINSKY, Mr. LEAHY, Mr. MOYNIHAN, Mr. SARBANES, Mr. TSONGAS, Mr. DODD, Mr. PELL, and Mr. BRADLEY):

S. 3066. A bill with regard to Presidential certifications on conditions in El Salvador; to the Committee on Foreign Relations.

PRESIDENTIAL CERTIFICATION OF CONDITIONS IN ·L SALVADOR

Mr. GLENN. Mr. President, today is the second anniversary of the brutal murder of four American churchwomen in El Salvador. Soon we will mark the similar somber anniversary of the murder of two American agricultural experts. Not only are the murders personal tragedies for the family and friends of those killed but also they remain a major issue in U.S. relations with El Salvador.

One year ago today the Senate agreed to a resolution, sponsored by Senator KENNEDY, expressing the deep concern of the Senate over the failure of El Salvador to bring to justice those responsible for the murders of six Americans. Last year Congress conditioned the continuation of U.S. aid to El Salvador on that Government's progress in a number of important areas including progress in the murder investigations. At that time Congress did not include this provision permanently in the certification because we fully expected that justice would have been done long ago.

In July of this year the Senate overwhelmingly approved a resolution which required that the second presidential certification on El Salvador include a determination that good faith efforts are being made by the Government of El Salvador to investigate the murders of the six Americans and bring to justice those responsible. Now 6 months later I again stand before the Senate to seek the inclusion of that same determination in the third Presidential certification due at the end of January 1983 and each succeeding certification for as long as these cases remain unresolved.

I am firmly convinced that U.S. pressure is responsible for any and all progress, albeit frustatingly slow and incomplete, in these cases. I believe we must maintain that pressure and the certification process is the appropriate vehicle for doing so. I trust that the Senate will again send a message to the administration and the Government of El Salvador that progress in the investigations and justice for the memory of six Americans remains a critical concern.

Mr. President, I submit this bill on behalf of myself, Mr. KENNEDY, Mr. ZORINSKY, Mr. LEAHY, Mr. MOYNIHAN, Mr. SARBANES, Mr. TSONGAS, Mr. DODD, Mr. PELL, and Mr. BRADLEY. I send the bill to the desk for appropriate referral.

PRESIDENTIAL CERTIFICATIONS ON CONDITIONS IN EL SALVADOR

Mr. KENNEDY. Mr. President, I am proud to cosponsor today with my friend and colleague from Ohio, Senator GLENN, legislation which requires that any future Presidential certification for aid to El Salvador must include a determination that the Government of El Salvador has made good faith efforts to investigate the murders of six U.S. citizens, to bring to justice all those responsible, and has also taken all reasonable steps to investigate the disappearance of journalist John Sullivan.

Today marks the second anniversary of the murders in El Salvador of Sisters Ita Ford, Maura Clark, Dorothy Kazel, and lay missionary Jean Donovan. It is important that we in the Senate join with the families and friends of these four women to honor their memories, to demonstrate our undiminished concern, and to renew our appeal for justice.

It has now been 2 full years since these murders took place. During these years, the Congress had enacted legislation to press both the administration and the Government of El Salvador to bring to justice those responsible for these brutal acts, and to insure that El Salvador has made significant progress in areas such as human rights and land reform before further U.S. military aid is granted.

One year ago, the Congress passed a resolution which I introduced urging the administration and the Government of El Salvador to proceed with investigations in these four murder cases and the killings of two American labor advisers, Michael Hammer and Mark Pearlman. Last July, I also joined with Senator GLENN in introducing an amendment which required the President to include in his second certification report assurances that the El Salvador Government is pursuing these investigations in good faith. That resolution passed in the Senate with an overwhelming majority of 95 to 2.

Despite strong and continuing public and congressional concern, and despite extensive evidence to the contrary from numerous sources, the administration saw fit to grant certification to El Salvador both last February and last July. In my opinion, these certifications are a travesty. Throughout this period, murders, torture, and kidnapings have continued—and despite recent judicial proceedings, it appears that those responsible for the murders of U.S. citizens may yet escape justice. Out of respect for the memories of Ita Ford, Maura Clark, Dorothy Kazel, and Jean Donovan—as well as Michael Hammer and Mark Pearlman, and the countless others who have been brutally tortured and murdered—we must renew our efforts to demand the restoration of human rights and justice in El Salvador.

Ita Ford, Maura Clark, Dorothy Kazel, and Jean Donovan went to El Salvador to help the poor, lost, and hungry. They were women of God; they were women of peace. Their deaths were brutal, and without cause or reason. It is the duty of the Government of El Salvador to try and punish the murderers and their accomplices, regardless of their rank, position, or power. It is the duty of the U.S. Government to pressure the authorities in El Salvador to so act and to cooperate in full in these investigations. We cannot shirk our responsibility to these women to discover the truth and demand justice. We must not acquiesce in the expanding violence in El Salvador today, nor can we ignore the failure of the Salvadoran courts to

insure that justice is done in their country.

The accounts of gross human rights violations in El Salvador are numerous and detailed. Because of this evident truth, U.S. Ambassador to El Salvador Deane Hinton felt compelled to address the issue publically in San Salvador last October 29. Speaking before the American Chamber of Commerce, Ambassador Hinton plainly described the politically inspired murders and disappearances which mark everyday life in El Salvador, and the judiciary system which has neither the will nor the means to investigate and convict those responsible. Although the rate of killings may have slowed in the last year, recent reports from the U.S. Embassy in El Salvador estimate that political killings of noncombatants in November averaged 30 a week. The Salvadoran Human Rights Commission's records indicate that the number is closer to 100 political murders a week. Based on these findings, I wholeheartedly agree with Ambassador Hinton that "by no stretch of the imagination can current levels be considered acceptable by any civilized person."

On October 1, a Salvadoran magistrate dismissed on the grounds of insufficient evidence the case of an official accused of ordering the murders of Michael Hammer and Mark Pearlman. The comment of our own Embassy, that "we are dismayed and incredulous," describes the surprise and indignation which all Americans felt when this case was dismissed.

Today, the families and friends of the four murdered churchwomen await the proceedings of another court in El Salvador. In November, after 2 years' delay and intense international pressure, five men were indicted for the murders of Ita Ford, Maura Clark, Dorothy Kazel, and Jean Donovan. While I welcome this recent action, far too many questions remain unanswered concerning this case—questions that may never be answered without strong, clear, and consistent expressions of deep concern from our Government and the American people. The executive director of the Lawyers Committee for International Human Rights, Michael Posner, has described how Salvadoran law and the political climate in El Salvador are impeding investigation of high ranking individuals implcated in this case:

We have been told that an anticipated defense of the five guardsmen will be that they were only acting under orders from their superiors. Lawyers have warned us that the only way to guarantee a conviction of the five guardsmen is to refute their claims that others were involved. • • • There is currently no serious investigation of the possible involvement of Salvadoran officers in ordering the killings or covering them up.

In a statement released yesterday, the Washington Office on Latin America explained the families' decision not to hire a Salvadoran lawyer to represent them at the trial:

After long weeks of deliberation, the families of the women have decided not to hire a Salvadoran lawyer to represent them in the upcoming trial. According to a letter sent to the State Department, the families, after weeks of careful study and conversation were "unable to discover any lawyer in El Salvador willing to pursue a vigorous investigation of all leads in this case." They went on to say that this was "in part because lawyers there do not believe that the U.S. Embassy is willing to support such an investigation."

If the five accused are found guilty, then it is fitting that they be punished. But this case cannot be definitively resolved unless evidence against their superiors also is pursued. These murders cannot be lightly dismissed either in San Salvador or here in Washington. Half a trial, half the truth is simply not good enough.

For those who knew them, and for those of us who continue to care, the memories of Ita Ford, Maura Clark, Dorothy Kazel, and Jean Donovan are too precious, their loss too great, and their deaths too painful for us to forget. Let there be no doubt that we will pursue their cause—which is the cause of human rights and decency—until all are satisfied that justice has not been cheated.

Mr. President, I ask that statements made by the Maryknoll Sisters and the Washington Office on Latin America on the occasion of the second anniversary of the churchwomen's tragic deaths be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT FROM THE WASHINGTON OFFICE ON LATIN AMERICA

It is now two years since four North American women were assassinated in El Salvador. The four women, Maryknoll Sisters Maura Clark and Ita Ford, and Ursuline Sister Dorothy Kazel and lay missioner Jean Donovan, both serving with the Cleveland diocesan mission, were shot by members of the Salvadoran armed forces. These women gave their lives in service to the people of El Salvador, and we are concerned today that their deaths not become part of a cover-up masking a policy and continuing practice of human rights abuses against the people they served.

After long weeks of deliberation, the families of the women have decided not to hire a Salvadoran lawyer to represent them in the upcoming trial. According to a letter sent to the State Department, the families, after weeks of careful study and conversation were "unable to discover any lawyer in El Salvador willing to pursue a vigorous investigation of all leads in this case." They went on to say that this was "in part because lawyers there do not believe that the U.S. Embassy is willing to support such an investigation."

Clearly, an incomplete legal proceeding cannot fully serve the cause of justice for these four women, or the other Americans killed or disappeared, not to speak of the thousands of Salvadorans who have died or vanished.

STATEMENT OF THE MARYKNOLL SISTERS

During the two years since the deaths of Maryknoll Sisters Maura Clarke, Ita Ford, Ursuline Sister Dorothy Kazel and Lay Missioner Ms. Jean Donovan, the Maryknoll Sisters have taken every opportunity to pursue the full truth about their murders.

This included meetings with State Department officials, meeting with then Salvadoran President Duarte and Ambassador Hinton, meeting with former U.S. Ambassador White, meetings with numerous Members of Congress as well as taking legal steps to obtain documents related to the case under the Freedom of Information Act. The official investigation conducted by the El Salvadoran Government has focused on five low-ranking National Guardsmen. The probable involvement of higher-ups in ordering the killings or covering them up has never been seriously investigated. The families of these four women and the Maryknoll Sisters have all sought a thorough investigation no matter where that investigation might lead.

To that end we have made a concerted effort to gather as much information as possible about the Salvadoran judicial process and the prospects for effectively using the services of a Salvadoran lawyer to represent the families. We have sent a representative to El Salvador and Mexico, and invited Salvadoran lawyer(s) to the United States—all at the expense of the Lawyers Committee for International Human Rights, the families of the women and the Maryknoll Sisters. Without exception, these lawyers have imposed stringent conditions of confidentiality on us because of the considerable risks to them in even discussing the case. It is our intention to respect these conditions.

On the basis of our findings, we do not believe it is possible to obtain counsel in El Salvador which would independently pursue evidentiary leads—critical to the successful prosecution of all those involved in the murder of these four women.

For Maryknoll, the trial has always been seen as the culmination of a long legal process during which a genuine investigation would be conducted. With the recent announcement of the trial of the five National Guardsmen alone all investigation ceases. We believe that the trial as it is designed to be carried out cannot lead to justice. Prosecuting and perhaps executing five more people does nothing to stop the officers and government officials who are tolerating and fostering the climate of terror and violence in El Salvador that has claimed 35,000 lives in the last three years.

By Mr. BOSCHWITZ:

S. 3068. A bill to establish a cap on the pay of certain Federal officers and employees for the fiscal year 1983; to the Committee on Governmental Affairs.

CONGRESSIONAL PAY RAISE

Mr. BOSCHWITZ. Mr. President, today I am introducing a bill that seeks to stop the congressional pay raise scheduled for us in December and that would automatically give us an approximate 27-percent increase.

It is not easy to give up a pay raise. However, the action is similar to what many workers, corporations, and small businesses have forgone in recent months. Like them, I am doing it, but that does not mean I enjoy it.

Many of the reasons favoring a congressional pay increase are quite valid. One of my colleagues in the Senate said that it may be a mark of our civilization that we pay professional football and basketball players far more than $100,000 and then pay our Nation's leaders little more than half of that. Frankly, I do not disagree with that conclusion that we do not pay some of the Nation's leaders enough.

It is true that many senior level Government officials are lured away by far more lucrative opportunities with higher pay in the private sector. There are reasons that hit even closer to home to Senators and Congressmen. For example, the lifestyle in Congress often requires residences both in Washington and in our home States and a great deal of family travel, as well as other additional expenses.

There many other reasonable and thoughtful arguments that in other times our constituents would have little trouble endorsing and understanding. But, unfortunately, these are not other times. Today's economy simply will not tolerate such action by Congress. Clearly, a pay raise is the wrong signal to send our constituents and the wrong signal to send the country. Our constituents are not receiving pay raises at this time. To ask somebody to cut back for the good of the economy while simultaneously rewarding ourselves with a substantial pay raise is just not right.

In January and February, those of us on the Senate Budget Committee are going to be looking for ways to balance the bugdet. I am afraid this may sound like a broken record, but this year's budget should be viewed in a context of heightened urgency.

Last year at this time the outlook for our economy looked bleak. Inflation was still ravaging our paychecks at a double-digit level. Interest rates were still hovering in the high teens—indeed, at this time last year they were in the very high teens—and threatening to go even higher.

I recall in August of 1981 that interest rates were 21½ percent. Now they are almost half that. Unemployment is finally, I believe, going to top out and begin a downward swing.

So today things look better. Interest rates are dropping, inflation is on the way down, and, if we intend to keep them on their downward trend, it is imperative that we keep the Government out of the financing and borrowing markets.

This year it is more important than ever because we are plagued by the worsening problems of unemployment. If we intend to put our neighbors back to work, we need to give business some hope of survival. This year, too, the Government is going to be in the financing market and financing very large amounts. And, because business has not been good throughout our country, the receipts of Government are low. So it is not a time when we in Congress can reasonably go before the people and say that we are entitled to more.

For all this, balancing the budget, therefore, is still the single most useful economic tool at our disposal. To balance the budget, however, we are going to have to revise the way we look at the whole process. Areas that have been unjustifiably sacrosanct are going to have to undergo strict budget scrutiny.

Of course, this will all require that people pull their belts a little tighter. We are not exempt. If the belts have to be tightened, they have to start being tightened in Washington, as well.

Mr. President, I therefore submit this bill and ask that it be appropriately referred and promptly considered.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3068

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) no part of the funds appropriated for the fiscal year ending September 30, 1983, by any Act may be used to pay the salary or pay of any individual in an office or position in the legislative, executive, or judicial branch, or in the government of the District of Columbia, at a rate which exceeds the rate (or maximum rate, if higher) of salary or basic pay payable for such office or position for September 30, 1982, if the rate of salary or basic pay for that office or position is—

(1) fixed at a rate which is equal to or greater than the rate of basic pay for level V of the Executive Schedule under section 5316 of title 5, United States Code, or

(2) limited to a maximum rate which is equal to or greater than the rate of basic pay for such level V (or to a percentage of such a maximum rate) by reason of section 5308 of title 5, United States Code, or any other provision of law or congressional resolution.

(b) For purposes of subsection (a), the rate or maximum rate (as the case may be) of salary or basic pay payable for September 30, 1982, for any office or position which was not in existence on such date shall be deemed to be the rate or maximum rate (as the case may be) of salary or basic pay payable to individuals in comparable offices or positions for such date, as determined under regulations prescribed—

(1) by the President, in the case of any office or position within the executive branch or in the government of the District of Columbia;

(2) jointly by the Speaker of the House of Representatives and the President pro tempore of the Senate, in the case of any office or position within the legislative branch; or

(3) by the Chief Justice of the United States, in the case of any office or position within the judicial branch.

(c) None of the funds appropriated by any Act shall be used by any agency to pay performance awards in fiscal year 1983 under section 5384 of title 5, United States Code, or any comparable personnel system established on or after October 13, 1978, to a number of employees that is more than 20 per centum of the number of Senior Executive Service or comparable personnel system positions in such agency, except that, an agency with less than five such positions may pay a performance award to one employee in such a position.

(d) For purposes of administering any provision of law, rule, or regulation which provides retirement, life insurance, or other employee benefit, which requires any deduction or contribution, or which imposes any requirement or limitation, on the basis of a rate of salary or basic pay, the rate of salary or basic pay payable after the application of this Act shall be treated as the rate of salary or basic pay.

By Mr. EAGLETON (for himself and Mr. DANFORTH):

S. 3069. A bill to amend the Natural Gas Policy Act of 1978 to prohibit increases in the wellhead prices of natural gas, and for other purposes; to the Committee on Energy and Natural Resources.

NATURAL GAS PRICE FREEZE

Mr. EAGLETON. Mr. President, large parts of our country today are experiencing the steepest natural gas price increases in history. Those runaway prices come at a time when demand for the product is down and there is more supply than anyone knows what to do with.

Mr. President, one does not have to be an economist to know that when prices skyrocket during the period of oversupply something is scandalously wrong. If anyone is in doubt of that I invite them to come to my office to read the thousands of letters I have received from shocked and outraged consumers. If anyone doubts that there is something wrong within that industry, I invite them to spend a few minutes talking with small gas producers who have been driven out of business because the gas they have to sell is too cheap.

Mr. President, this Congress cannot wait for the balmy months of June and July to address this problem. We cannot go home from this lameduck session to settle comfortably before our fireplaces savoring the wonderful job we did. We have a crisis in the country which is growing everyday. We cannot wait another week before taking action.

Mr. President, I am today introducing for myself and Senator DANFORTH a simple bill to freeze gas prices where they are for a period of 2 years or until Congress acts substantively to deal with the problem. It is the absolute minimum response we can make to the pleas of millions of Americans who today are forced to literally choose between heating or eating. I think we should do more and I will be

joining my colleague in sponsoring other bills which give the promise of immediate price relief. But, as I said, a 2-year freeze to keep things from getting worse and assure that Congress, in fact, does take up this matter next year is the minimum action we can take and I intend to push for a vote on the matter before we go home.

One cannot question the need for this type of legislation. Even though there is a glut in the gas market on the order of 2 trillion cubic feet—10 percent of U.S. annual production—residential gas prices will rise well over 40 percent in some areas and 20-25 percent nationally. In fact, prices are increasing so rapidly that an estimated 300,000 households face gas heat shutoff this winter due to an inability to meet payments.

Under my bill, the maximum prices that producers will be able to demand from pipeline companies for most natural gas during the next 2 years will be frozen at the maximum levels existing under the Natural Gas Act [NGPA] on August 31, 1982, price levels mandated by contracts covering such gas. In the case of deregulated natural gas not covered by contract on August 31, 1982, the maximum lawful prices for the next 2 years will be frozen at the average price for gas sold from the three closest, deregulated wells on August 31, 1982.

I must emphasize at this point that my bill does nothing to impair existing contracts setting prices lower than those prices permitted by the NGPA. Nor does it prevent future contracts between producers and pipelines setting prices below the maximum levels set by my bill. I firmly believe that pipelines are under an obligation to bargain for the best prices possible for natural gas.

As you know, the purpose of my bill is to provide some immediate relief to our Nation's gas consumers. The 98th Congress can then take the careful, thorough look at the NGPA which I believe is urgently needed.

We all know that the pricing provisions of the NGPA have devastated poor- and middle-income people and small businesses. We do not know, however, whether all this suffering has simply served to further bloat the corporate coffers of the Nation's natural gas producers. That is why my bill directs the Comptroller General to conduct a study of the profitability of natural gas production. The Comptroller General is to report to Congress by June 1, 1983. This report will provide us with information essential to our reconsideration of the NGPA in the next Congress.

I will also join my colleague, Senator DANFORTH, in sponsoring separate legislation which will eliminate the pernicious take-or-pay contract clauses that is one of the major causes of recent steep price increases and that have forced many small producers out of business.

In addition to these bills, I will also seek to increase funding for the Federal low-income energy assistance program. I feel this is important to further help the poor and needy meet this winter's heating bills.

American consumers are not going to accept the argument that the gas market is too complex to deal with until spring or summer next year. They demand and they must receive action now.

I urge my colleagues to study my proposal and weigh its passage during the lameduck session against the alternative of more scandalous gas price increases and even greater human suffering as a result.

By Mr. DANFORTH (for himself and Mr. EAGLETON):

S. 3070. A bill to prohibit certain anticompetitive clauses in nutural gas contracts, and for other purposes; to the Committee on Energy and Natural Resources.

S. 3071. A bill to increase the funding authorization for low-income home energy assistance; to the Committee on Labor and Human Resources.

NATURAL GAS PRICES

Mr. DANFORTH. Mr. President, I want to bring to my colleagues a message that the people of Missouri gave me in my recent campaign—a message that I continue to receive in the mail every day. The message is simply this: Something must be done about the price of natural gas. Not next year, not in 1985, but now.

Increases in gas prices are hammering away at the people of my State. As winter approaches, they need our help. Gas prices are 20, 30, 50 percent higher than they were a year ago—and even that alarming fact understates the severity of the situation, for last year's increases by themselves caused gas bills to grow beyond people's ability to pay. As a result, literally thousands of households in Kansas City alone have had their gas supplies cut off as the heating season begins.

In the first 3 days of this week, I have received more than 1,000 letters from Missourians who are worried about this problem. These are not form letters or preprinted postcards: They are individual, handwritten letters—some of them angry, some of them sad, some of them heartrendering.

This one comes from a woman in Kansas City:

I am writing you, hoping you can do something about the gas situation soon. I am 78 and on Social Security, a widow, and this gas situation is going to drive me out of my home. People here in Kansas City are cold and hungry because they can't pay these big gas bills. I would rather be hungry as to bed cold. Us old people must stay warm if we survive. I have lived here 30 years and hope to dies here. Please help to bring these utilities down.

Another come from a couple in a smaller community:

We have worked hard all our lives. We are 68 and 73 years old and sit and watch our life savings going out for electric bills and high heat bills, and we are not the only ones.

We have to watch every penny to live half way decent. Born and raised in Missouri and never on welfare, just worked all our lives, I think we deserve more.

These bills are no longer reasonable when you must have heat on about 2 hours a day. Please try and do something for the poor working people of Missouri.

Another woman writes:

We hope you will try, and countless of my friends in the same position are looking to you for help. I paid into Social Security and my husband worked till 67, we both paid.

They predict old people will freeze to death this winter. I've been saving all my life and use coupons and don't buy things when high, but want to live my life out in my home if possible. Please do whatever you can.

And finally, this come from a woman in former President Truman's hometown:

Please do something about the high cost of gas. I am seventy years old on a fixed income. I am cutting down on my driving, groceries, and clothes, I don't see how we older ones are going to make it. Work hard all our lives for this—heat bill to take every thing.

Mr. President, I do not believe that the Congress of the United States should stand by in the face of this kind of adversity. I believe that action is needed, and needed now.

The Natural Gas Policy Act of 1978 has received much of the blame for this situation. The NGPA started us down the road to decontrol of natural gas prices—a course I supported then and continue to support now. But the NGPA was intended to do so gradually. and in that it has failed. To cite but one example, the price of gas to consumers in Kansas City has risen from $1.60 per thousand cubic feet at the time the NGPA was passed to an estimated $5.46 next month—an increase of 241 percent in slightly more than 4 years.

The doubling of oil prices in 1979-80 is one major cause of the failure of the NGPA. This sudden increase in the price of oil made gas seem like a bargain at any price and set off a wave of inflation that caused the price ceilings in the NGPA to skyrocket.

At the same time, natural gas pipeline companies—mindful of recent supply shortages and unaware of the effect that rising prices would have on their markets—entered into foolhardy and exessive long-term contracts for high-priced natural gas.

That is the problem. What is the solution?

I am proposing today a three-part answer. First, I am joining with my

colleague from Missouri, Senator EAGLETON, in calling for 2-year freezing in natural gas prices at the August 31 wellhead level and a 2-year extension of the NGPA. This will provide us with some breathing room—with a pause in the dramatic upward climb of prices.

Second, I am introducing legislation to increase the authorized level of low-income energy assistance from $1.875 billion to $2.5 billion. The existing level was barely adequate—if it was adequate at all—last winter. Clearly, with the price of gas increasing as it is, that amount will not be enough this year. I believe that $2.5 billion—a one-third increase—would be a more appropriate figure.

Lastly, I am proposing legislation to deal with the failure of the natural gas market to respond properly to current conditions of oversupply.

Following the supply shortages of the 1970's, many natural gas pipeline companies entered into take-or-pay contracts for high-cost gas—contracts that would be unthinkable today. The contracts require the pipelines to pay for a large percentage of the gas under contract whether the pipelines have a market for it or not.

When the demand for natural gas shrank—because of the recession and rising prices—pipelines found themselves in the position of having to accept this high-priced gas under their take-or-pay contracts, while shutting off available low-cost gas.

Mr. President, this is an outrageous situation that cannot be permitted to continue. It is bad enough that gas prices have risen as much as they have, but to make consumers pay for bad business decisions made by pipeline companies is intolerable.

If gas prices continue to rise—as they already have in some areas—past the comparable cost of competitive fuels, large industrial customers will switch their fuel source. This in turn will reduce the volume of gas sold, placing fixed costs on a smaller number of consumers and driving the price up yet again.

The basis for the Natural Gas Policy Act of 1978 was a desire to get the free market working again in gas. But the market is not working. There is more gas out there than can be sold. But prices are going up, not coming down. The reason is not that the law of supply and demand has been repealed; the reason is that it is being circumvented.

My legislation attacks this problem by declaring take-or-pay clauses to be contrary to public policy and unenforceable. Such clauses would be allowed to stand only in contracts for section 104 old gas or in certain extremely limited circumstances to be reviewed by the Federal Energy Regulatory Commission. In addition, pipeline companies would have to report quarterly to the Commission on what steps they had taken to obtain the lowest cost mix of natural gas.

Take-or-pay clauses for old gas are excluded because their clauses will work in the public interest and not against it. They will help to insure that the cheapest gas is used first and not last, as is now too often the case.

Producers and pipelines with take-or-pay clauses in existing contracts could ask the Commission to preserve or modify the clauses if the clauses are needed to avoid a loan default. A full evidentiary hearing would be required. This review procedure should put to rest any constitutional concerns about the bill.

This legislation also strikes down indefinite price escalator clauses that tie the price of gas at a particular location to the price of oil or the price of gas at other locations. This sort of artificial pricing mechanism should be avoided and, indeed, was thought likely to cause a widely feared price spike in 1985.

The irony, Mr. President, is that the price spike already has occurred. In a free market with the current glut of natural gas, prices would not be going up; they would at worst be stable and might in fact be falling.

We have no need for cumbersome new regulatory solutions. The answer is simply to get out of the way and let the market take its course—clear away artificial price props like take-or-pay clauses and let the price of gas find its natural level.

When $5 gas is flowing and 85-cent gas is shut in, as is the case in the Kansas natural gas fields right now, something is wrong—dramatically wrong. Some people argue against Band-Aid or quick-fix legislation of this sort, but sometimes a Band-Aid is needed. Sometimes a quick fix is needed. The people of my State are hurting, and it is just not good enough to say, wait until next year.

Mr. President, this legislation does not purport to solve all the problems of the natural gas industry. It may be that further legislation will be needed at a later date. But the people of my State cannot wait. We must act and act now.

Mr. President, I ask unanimous consent that the texts of my legislation appear in the RECORD at the conclusion of my remarks.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 3070

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Natural Gas Competition Act of 1982".

SEC. 2. The purpose of this Act is to enable natural gas pipeline companies to achieve the lowest possible weighted average acquisition cost of natural gas by declaring certain contract clauses unenforceable.

SEC. 3. Subtitle B of title III of the Natural Gas Policy Act of 1978 (15 U.S.C. 3371-3375) is amended by inserting after section 315 the following new section:

"SEC. 316. CLAUSES INVOLVING TAKE-OR-PAY AND INDEFINITE PRICE ESCALATORS.

"(a) UNENFORCEABLE CLAUSES.—any provision of any contract for the first sale of natural gas, including any contracts in existence on the day before the date of enactment of this section, is hereby declared against public policy and unenforceable if such provision includes:

"(1) a take-or-pay clause which commits the purchaser to take delivery of a minimum volume of natural gas; or

"(2) an indefinite price escalator clause as defined in section 105(b)(3)(B) of this Act.

"(b) EXCLUSION.—Paragraph (a)(1) shall not apply to any contract for the first sale of natural gas committed or dedicated to interstate commerce on November 8, 1978, and for which a just and reasonable rate under the Natural Gas Act was in effect on such date.

"(c) COMMISSION REVIEW.—Upon application made by buyer or seller, the Commission may, after notice and evidentiary hearing, by order permit to become and remain effective any contract provision in effect on or before December 1, 1982, to which paragraph (a)(1) applies, or any modification thereof, if the Commission finds—

"(1) that permitting such provision or modification to become or remain effective is necessary to prevent a default by seller under a loan agreement on debt instrument in effect on December 1, 1982; or

"(2) that permitting such provision or modification to become or remain effective is necessary to prevent a taking without fair compensation of seller's property.

"(d) MODIFICATION OF COSTS.—Within 60 days after the date of enactment of this section, and quarterly thereafter, each natural gas pipeline company shall file with the Commission a statement of actions taken to achieve the lowest possible weighted average acquisition cost of natural gas. Such statement shall include actions taken pursuant to the provisions of subsection (a).".

SEC. 4. The table of contents for subtitle B of title III of the Natural Gas Policy Act of 1978 is amended by adding at the end thereof the following new item:

"SEC. 316. Clauses involving take-or pay and indefinite price escalators.".

S. 3071

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2602 (b) of the Omnibus Budget Reconciliation Act of 1981 (42 U.S.C. 8621 (b)) is amended by striking out "$1,875,000,000 for each of the fiscal years 1983 and 1984".

Mr. BOSCHWITZ. Mr. President, I just happened to be on the floor here as I heard my colleagues from Missouri introduce their bills. I will look at them with great interest. I certainly have a similar state of mind regarding their objectives. My constituents in our cold-weather State are most upset about the rising natural gas prices, rising, I point out, at a time of surplus in natural gas. One reason they are rising is that the utility companies are getting a very good return on their net worth and now they approach the

Federal Energy Regulatory Commission wanting to be locked into rather extraordinary returns, 18 percent in one instance I noted recently.

No business today is able to lock itself into those kinds of returns.

I expect to be supporting the kind of legislation that I hear Senator EAGLETON and Senator DANFORTH speak about.

Through conservation people are backing themselves into higher gas prices. The gas pipeline companies tell me it is because less natural gas is being used causing the cost of throughput, the cost of transporting a cubic foot of natural gas through the pipelines, goes up because less gas goes through that pipeline. So through conservation people of our country, who feel they are doing something in the national interest, may indeed be conserving themselves into higher gas prices. We cannot allow that to happen.

I look with great interest on the bills that have been introduced by Senator KASSEBAUM and others, and I will look with renewed interest at the bills introduced by my colleagues from Missouri.

By Mr. LUGAR (for himself, Mr. GARN, Mr. D'AMATO, Mr. HEINZ, and Mr. TOWER):

S. 3072. A bill to amend the Urban Mass Transportation Act of 1964 to authorize additional appropriations, to establish a formula grant program, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

FEDERAL PUBLIC TRANSPORTATION ACT OF 1982

● Mr. LUGAR. Mr. President, today I join with Senators GARN, D'AMATO, HEINZ, and TOWER to introduce a mass transit authorization bill which includes a spending program for the mass transit portion of the gas tax proposal and reauthorization of the basic mass transit authorization legislation.

The bill is the result of 2 years of work with the administration, outside groups, Members of Congress, cities and transit operators. It is not entirely satisfactory to each member of the Banking Committee, but I think each member feels that the bill is as close as we can come to a middle ground.

The legislation provides for a 3-year authorization at a funding level of $3.69 billion for 1983 and $4.3 billion for 1984 and 1985. It expands the current formula program into a full-fledged block grant and creates a new discretionary infrastructure program funded with 1 cent of the gas tax.

Although we are introducing this legislation as a separate bill, we intend to offer it as an amendment to the overall gas tax proposal when it is considered by the Senate as a substitute for the administration's mass transit title.

Mr. President, I ask unanimous consent that the bill and a section-by-section analysis be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Public Transportation Act of 1982".

AMENDMENTS OF SECTION 3 CAPITAL GRANT PROGRAM

SEC. 2. (a) Section 3(a)(2)(A) of the Urban Mass Transportation Act of 1964 (hereinafter referred to as the "Act") is amended—

(1) by striking out "and" at the end of clause (i);

(2) by striking out the period at the end of clause (ii) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following:

"(iii) sufficient capability to maintain the facilities and equipment.".

(b) Section 3(a) of the Act is amended by adding at the end thereof the following:

"(5) The Secretary shall take into account the adverse effect of decreased commuter rail service in considering applications for assistance under this section for the acquisition of rail lines and all related facilities used in providing commuter rail service which are owned by a railroad subject to reorganization under title 11, United States Code."

DIRECT TRANSIT ASSISTANCE FUND

SEC. 3. (a) The section heading of section 4 of the Act is amended to read as follows:

"DIRECT TRANSIT ASSISTANCE FUND"

(b) Section 4(b) of the Act is repealed.

(c) Section 4 of the Act is amended—

(1) by striking the second sentence in subsection (a) and inserting in lieu thereof the following: "The Federal grant for any project to be assisted under section 3 which involves the construction of a new fixed-guideway system or an extension to an existing system (other than an exclusive facility for buses) shall be in an amount equal to 60 per centum of the net project cost. The Federal grant for any other project to be assisted under section 3 shall be in amount equal to 70 per centum of the net project cost. Notwithstanding the preceding two sentences, the Federal share of the total project cost of any project covered by a full funding contract, letter of intent, or letter of commitment in effect on the date of enactment of the Federal Public Transportation Act of 1982, or those projects within the federally agreed upon scope for the Washington, District of Columbia, metropolitan area transit system (as of such date), shall not be altered.";

(2) by redesignating subsection (a) as subsection (b); and

(3) by inserting after "Sec. 4." the following:

"(a)(1) To finance assistance under sections 3, 8, 9, 16(b), and 18 of this Act, and to finance assistance under subsection (e) of this section, there are authorized to be appropriated not to exceed $3,130,000,000 for the fiscal year ending September 30, 1983; $3,130,000,000 for the fiscal year ending September 30, 1984; and $3,130,000,000 for the fiscal year ending September 30, 1985. Amounts appropriated for the purposes of sections 3, 8, 9, 16(b) and 18 of this Act and subsection (e) of this subsection shall remain available until expended.

"(2) Of the amount appropriated pursuant to this subsection, the Secretary shall make available for the purposes of sections 6, 10, and 11 of this Act, and for administrative costs, including salaries and necessary expenses, not to exceed $75,000,000 for the fiscal year ending September 30, 1983, $75,000,000 for the fiscal year ending September 30, 1984, and $75,000,000 for the fiscal year ending September 30, 1985. Amounts appropriated for the purposes of sections 6, 10, and 11 shall remain available until expended.

"(3) Of the remaining amount appropriated pursuant to this subsection, the Secretary shall make available—

"(A) 24 per centum (10 per centum beginning with the fiscal year ending September 30, 1985) for grants and loans under section 3(a) of this Act;

"(B) 67.25 per centum (79.63 per centum beginning with the fiscal year ending September 30, 1985) for grants under section 9(a)(2) of this Act for urbanized areas with populations of two hundred thousand or more;

"(C) 6.5 per centum (7 per centum beginning with the fiscal year ending September 30, 1985) for grants under section 9(a)(3) of this Act for urbanized areas with populations under two hundred thousand; and

"(D) 2.25 per centum (2.67 per centum beginning with the fiscal year ending September 30, 1985) for grants under section 18 of this Act.

"(4) Of the funds available for obligation under section 3 $50,000,000 shall be used for the purposes of section 8 of this Act. Nothing herein shall prevent urbanized areas from using addition funds available under this subsection for planning purposes.".

(d) Subsections (c), (d), (e), and (f) of such section are repealed.

(e) Subsection (g) is redesignated as subsection (c) and is amended by adding at the end thereof the following: "Nothwithstanding the preceding sentence or any other provision of this Act, the total amount authorized to be appropriated under this Act and under Public Law 96-148 may not exceed $3,495,000,000 for the fiscal year ending September 30, 1983; and $3,495,000,000 for the fiscal year ending September 30, 1984.".

(f) Subsection (h) of such section is redesignated as subsection (d).

(g) Subsection (i) of such section is redesignated as subsection (e) and is amended by striking out "available pursuant to section 4(c)(3)(A)" and inserting in lieu thereof "appropriated for the purpose of section 3".

FORMULA CAPITAL AND OPERATING ASSISTANCE PROGRAM

SEC. 4. (a) The Urban Mass Transportation Act of 1964 is amended by inserting immediately after section 8 the following new section:

FORMULA CAPITAL AND OPERATING ASSISTANCE PROGRAM

SEC. 9. (a)(1) Grants under this section shall be available to finance the planning, acquisition, construction, improvement, and operating costs of facilities, equipment, and associated capital maintenance items for use, by operation or lease or otherwise, in mass transportation service. As used in this section, the term 'associated capital maintenance items' means any equipment and materials each of which costs no less than 1 per centum of the current fair market value of rolling stock comparable to the rolling stock for which the equipment and materials are to be used.

"(2) To provide grants to urbanized areas with populations of two hundred thousand or more, the Secretary shall apportion for expenditure for each fiscal year the sums authorized and appropriated pursuant to section 4(a)(3)(B) as follows:

"(A) 68 per centum of such sums shall be apportioned among urbanized areas as follows:

"(i) 75 per centum shall be made available for expenditure in only those urbanized areas or parts thereof with a population of one million or more, and on the basis of a formula under which such urbanized area or parts thereof will be entitled to receive an amount equal to the sum of—

"(I) 50 per centum of the amount available under this paragraph multiplied by the ratio which the total bus revenue vehicle miles operated in or directly serving such urbanized areas or part thereof bears to the total bus revenue vehicle miles in all urbanized areas;

"(II) 25 per centum of such amount multiplied by the ratio which the population of such urbanized area or part thereof, as designated by the Bureau of the Census, bears to the total population of all such urbanized areas as shown by the latest available Federal census; and

"(III) 25 per centum of such amount multiplied by a ratio for that urbanized area determined on the basis of population weighted by a factor of density, as determined by the Secretary; and

"(ii) 25 per centum shall be made available for expenditure in only those urbanized areas or parts thereof with a population of less than one million and on the basis of a formula under which such urbanized areas or parts thereof will be entitled to receive an amount equal to the sum of—

"(I) 50 per centum of the amount available under this paragraph multiplied by the ratio which the total bus revenue vehicle miles operated in or directly serving such urbanized area or part thereof bears to the total bus revenue vehicle miles in all urbanized areas;

"(II) 25 per centum of such amount multiplied by the ratio which the population of such urbanized area or part thereof, as designated by the Bureau of the Census, bears to the total population of all such urbanized areas as shown by the latest available Federal census; and

"(III) 25 per centum of such amount multiplied by a ratio for that urbanized area determined on the basis of population weighted by a factor of density, as determined by the Secretary; and

"(B) 32 per centum of such sums shall be made available for expenditure on the basis of a formula under which such urbanized areas or parts thereof will be entitled to receive an amount equal to the sum of—

"(i) 60 per centum of the total amount so apportioned multiplied by a ratio for that urbanized area determined on the basis of fixed guideway revenue vehicle miles, as determined by the Secretary; and

"(ii) 40 per centum of the total amount so apportioned multiplied by a ratio for that urbanized area determined on the basis of fixed guideway route miles, as determined by the Secretary.

No urbanized area providing commuter rail service and having a population of seven hundred and fifty thousand or more shall receive less than 0.75 per centum of the sums made available under this subparagraph (B). Under this subparagraph, any such fixed guideway revenue vehicle or route miles provided in a State adjacent to the State or States in which such urbanized area is located, and passengers served thereby, shall be attributed to the public body in the adjacent State which contracts, directly or indirectly, for such service as if the public body were an urbanized area with a population of two hundred thousand or more. For the purpose of this subparagraph, the terms 'fixed guideway revenue vehicle miles' and 'fixed guideway route miles' shall include ferry boat operations directly or under contract by the designated recipient.

"(3) To make grants to urbanized areas with populations of less than two hundred thousand, the Secretary shall apportion for expenditure for each fiscal year the sums authorized and appropriated pursuant to section 4(a)(3)(C) as follows:

"(A) 50 per centum of the amount available under this paragraph multiplied by the ratio which the population of such urbanized areas in the State bears to the total population of all such urbanized areas in all States as shown in the latest available Federal census; and

"(B) 50 per centum of such funds multiplied by a ratio for such urbanized areas determined on the basis of population weighted by a factor for the average density for urbanized areas in such State as determined by the Secretary.

"(4)(A) The Federal grant for any construction project under this subsection shall not exceed 80 per centum of the net project cost of such project. The Federal grant for any project for operating expenses shall not exceed 50 per centum of the net project cost of such project. The remainder shall be provided in cash from sources other than Federal funds or revenues from the operation of public mass transportation systems. Any public or private transit system funds so provided shall be solely from undistributed cash surpluses, replacement or depreciation funds or reserves available in cash, or new capital.

"(B) The amount of funds apportioned under this section which may be used for operating assistance shall not exceed 80 per centum of the amount of funds apportioned in fiscal year 1982 under paragraphs (1)(B), (2)(B), and (3)(B) of section 5(a) of this Act to an urbanized area with a population of one million or more, 90 per centum of funds so apportioned to an urbanized area with a population of two hundred thousand or more and less than one million population; and 95 per centum of funds so apportioned to an urbanized area of less than two hundred thousand population. Notwithstanding the preceding sentence, an urbanized area that became an urbanized area for the first time under the 1980 census may use not to exceed 40 per centum of its apportionment under this section for operating assistance.

"(5)(A) Notwithstanding the provisions of paragraph (4)(B), any recipient may, in fiscal years 1983 and 1984, transfer the use for operating assistance a portion of its apportionment under this section that otherwise is available only for capital assistance, except that the recipient's total operating assistance under this section (including any amounts transferred from its capital apportionment) for the fiscal year in which the transfer occurs shall not exceed the amount of Federal funds such recipient was apportioned under sections 5(a)(1)(A), 5(a)(2)(A), and 5(a)(3)(A) of this Act for the fiscal year ending September 30, 1982. The total operating assistance under this section (including any amounts transferred from its capital apportionment) for a recipient in an urbanized area that became an urbanized area for the first time under the 1980 census may not exceed 50 per centum of its apportionment under this section.

"(B) Any recipient that intends to carry out a transfer under this subsection shall, at the time it submits a statement of activities to the Secretary under subsection (b)(1)(B)—

"(i) certify that it has provided public notice of its intent to transfer its capital apportionment (including notice of the funding reductions resulting from utilization of this subsection and other requirements of this subsection) and provided an opportunity for public comment; and

"(ii) certify that it has developed a three-year plan to assure that in the fiscal year ending September 30, 1985, it will not need to use and will not use its capital apportionment for operating assistance.

"(C) Whenever any recipient transfers its capital apportionment for operating assistance in accordance with the requirements of this subsection, two-thirds of the amount transferred shall be available to the recipient for operating assistance and the remaining one-third amount shall be available to the Secretary to make discretionary grants under this section. In making such discretionary grants, first priority shall be given to any urbanized area that is apportioned an amount under this section in fiscal year 1983 which is less than the amount such urbanized area was apportioned under section 5 of this Act for the fiscal year ending September 30, 1982. Any amounts remaining shall be available for discretionary construction grants under this section subject to the second and third sentences of section 4(b).

"(D) The authority of recipients to use the provisions of this paragraph shall terminate on September 30, 1984.

"(6)(A) The Governor, responsible local officials, and publicly owned operators of mass transportation services in accordance with the planning process required under section 8 of this Act shall designate a recipient or recipients to receive and dispense the funds appropriated under this section that are attributable to urbanized areas of two hundred thousand or more population. In any case in which a statewide or regional agency or instrumentality is responsible under State laws for the financing, construction and operation, directly, by lease, contract or otherwise, of public transportation services, such agency or instrumentality shall be the recipient to receive and dispense such funds. As used in this section, the term 'designated recipient' shall refer to the recipient selected according to the procedures required by this section.

"(B) Sums apportioned under this subsection not made available for expenditure by designated recipients in accordance with the terms of subparagraph (A) shall be made available to the Governor for expenditure in urbanized areas or parts thereof with populations of less than two hundred thousand.

"(7) The Governor may transfer an amount of the State's apportionment under paragraph (3) to supplement funds apportioned to the State under section 18(a) of this Act, or to supplement funds apportioned to urbanized areas with populations of 300,000 or less under this subsection. The Governor may make such transfers only after consultation with responsible local officials and publicly owned operators of mass transportation services in each area to which the funding was originally apportioned pursuant to paragraph (3). The Governor may transfer an amount of the State's apportionment under section 18(a) to sup-

plement funds apportioned to the State under paragraph (3). Amounts transferred shall be subject to the capital and operating assistance limitations applicable to the original apportionments of such amounts.

"(8) Sums apportioned under this section shall be available for obligation by the Governor or designated recipient for a period of three years following the close of the fiscal year for which such sums are apportioned. Any amounts so apportioned remaining unobligated at the end of such period shall be added to the amount available for apportionment under this section for the succeeding fiscal year.

"(9) As used in this subsection, the term 'density' means the number of inhabitants per square mile, and the term 'population' means population as designated by the Bureau of the Census as shown by the latest available Federal census.

"(b)(1) To receive a grant under this section for any fiscal year, a recipient—

"(A) shall comply with title VI of the Civil Rights Act of 1964 in the use of funds under this Act, and subsections (e), (f), and (g) of section 3 of this Act, and section 13 of this Act;

"(B) shall, within the time specified by the Secretary, submit a statement of activities to be funded under this section prepared pursuant to subsection (d), a description of its proposed use of funds, and the certifications required by this subsection; and

"(C) shall provide satisfactory assurances, in such manner and form as may be required by the Secretary and in accordance with such terms and conditions as the Secretary may prescribe, that the rates charged elderly and handicapped persons during nonpeak hours for transportation utilizing or involving the facilities and equipment of the project financed with assistance under this subsection will not exceed one-half of the rates generally applicable to other persons at peak hours, whether the operation of such facilities and equipment is by the applicant or is by another entity under lease or otherwise.

"(2) Upon receipt of the statement, description, and certifications required by this section, after finding that a recipient is in compliance with paragraph (1), and after compliance with the National Environmental Policy Act of 1969 using the provisions of subsection (e) or otherwise, the Secretary shall make the amounts determined pursuant to this section available to the recipient.

"(c) To receive a grant under this section, the recipient must certify that the recipient—

"(1) has or will have the legal, financial, and technical capacity to carry out the proposed project;

"(2) has the authority to apply for the grant under this subsection;

"(3) will carry out the project in compliance with the Uniform Relocation Assistance and Land Acquisition Policies Act of 1970 and section 7 of this Act;

"(4) will have satisfactory continuing control, through operation, lease, or otherwise, over the use of the facilities or equipment assisted under this Act and will maintain such facilities and equipment;

"(5) in carrying out procurements under this subsection, will use competitive procurements (as defined or approved by the Secretary), will not use procurements utilizing exclusionary or discriminatory specifications, and will carry out procurements in compliance with section 401 of Public Law 95-599;

"(6) will comply with the National Flood Insurance Act of 1968;

"(7) has complied with the requirements of subsections (d) and (e);

"(8) has available and will provide funds from other than Federal sources as required by section 4 of this Act and has complied with the requirements of sections 8, 16, and 19 of this Act; and

"(9) has a locally developed process to solicit and consider public comment prior to raising fares or implementing a major reduction of transit service.

"(d) Each recipient shall—

"(1) make available to the public information concerning the amount of funds available under this subsection and the range of activities that the recipient proposes to undertake with such funds;

"(2) develop a proposed statement concerning activities to be funded in consultation with interested parties, including private transportation providers;

"(3) publish a proposed statement in such a manner to afford affected citizens, private transportation providers, or as appropriate, local elected officials an opportunity to examine its content and to submit comments on the proposed statement and on the performance of the recipient; and

"(4) hold one or more public hearings to obtain the views of citizens on activities to be funded under this subsection.

In preparing the final statement to be submitted to the Secretary, the recipient shall consider any such comments and views, particularly those of private transportation providers, and shall, if deemed appropriate by the recipient, modify the proposed statement. The final statement shall be made available to the public. Compliance with this paragraph will satisfy the requirements of subsection (d) of section 3.

"(e)(1) In order to assure that the National Environmental Policy Act of 1969, and other provisions of law which further the purposes of such Act (as specified in regulations issued by the Secretary), are effectively implemented in connection with the expenditure of funds under this subsection, and to assure to the public undiminished protection of the environment, the Secretary, in lieu of the environmental protection procedures otherwise applicable, may, under regulations issued by him, provide for the release of funds to recipients who assume all of the responsibilities for environmental review, decisionmaking, and acting pursuant to such Act, and such other provisions of law as the regulations of the Secretary specify, that would apply to the Secretary were he to undertake such projects as Federal projects. The Secretary shall issue regulations to carry out this section only after consultation with the Council on Environmental Quality.

"(2) The Secretary shall approve the release of funds in accordance with the procedures authorized by this subsection only if, at least fifteen days prior to such approval and prior to any commitment of funds, the applicant has submitted to the Secretary a request for such release accompanied by a certification which meets the requirements of paragraph (3). The Secretary's approval of any such certification shall be deemed to satisfy his responsibilities under the National Environmental Policy Act of 1969 and such other provisions of law as the regulations of the Secretary specify insofar as those responsibilities relate to the application and release of funds for projects to be carried out pursuant thereto which are covered by such certification.

"(3) A certification under the procedures authorized by this subsection shall—

"(A) be in a form acceptable to the Secretary;

"(B) be executed by the chief executive officer or other officers of the applicant qualified under regulations of the Secretary;

"(C) specify that the applicant has fully carried out its responsibilities as described under paragraph (1); and

"(D) specify that the certifying officer—

"(i) consents to assume the status of a responsible Federal official under the National Environmental Policy Act of 1969 and each provision of law specified in regulations issued by the Secretary to the extent that as the provisions of such Act or other such provisions of law apply pursuant to paragraph (1); and

"(ii) authorizes and consents on behalf of the applicant and himself to accept the jurisdiction of the Federal courts for the purposes of enforcement of his responsibilities as such an official.

"(f) The Secretary shall not approve a grant for a project under this section unless he finds that such project is part of the approved program of projects required by section 8 of this Act.

"(g) As soon as practicable after receiving the submissions required in this section, the Secretary shall enter into an annual projects agreement with the Governor, his designee, or the designated recipient of each urbanized area.

"(h)(1) Each recipient of assistance under this section shall submit to the Secretary annually, at a time determined by the Secretary, a statement concerning the use of funds made available under this section together with an assessment of how such use compares to the statement of activities identified under subsection (d). The Secretary shall, at least on an annual basis, conduct, or require the recipient to have independently conducted, reviews and audits as may be deemed necessary or appropriate by the Secretary to determine whether—

"(A) the recipient has carried out its activities submitted in accordance with subsection (b)(1)(B) in a timely and effective manner and has a continuing capacity to carry out those activities in a timely and effective manner; and

"(B) the recipient has carried out those activities and its certifications and has used its Federal funds in a manner which is consistent with the requirements of this Act and other applicable laws. Audits of the use of Federal funds shall be conducted in accordance with the accounting standards of the General Accounting Office.

"(2) In addition to the reviews and audits described in paragraph (1), the Secretary shall, not less than once every three years, perform a full review and evaluation of the performance of a recipient in carrying out the recipient's program, with specific reference to compliance with statutory and administrative requirements, and consistency of actual program activities with the statement of proposed activities required under subsection (b) of this section and the planning process required under section 8.

"(3) The Secretary may make appropriate adjustments in the amount of annual grants in accordance with the Secretary's findings under this subsection, and may reduce or withdraw such assistance or take other action as appropriate in accordance with the Secretary's review, evaluation, and audits under this subsection.

"(i) The provisions of secton 1001 of title 18, United States Code, apply to any certifi-

cation or submission under this section. In addition, if any false or fraudulent statement or related act within the meaning of section 1001 of title 18, United States Code, is made in connection with a certification or submission under this subsection, the Secretary may terminate and seek appropriate reimbursement of the affected grant or grants directly or by offsetting funds available under this subsection.

"(j) A recipient may request the Secretary to approve its procurement system. If, after consultation with the Office of Federal Procurement Policy, the Secretary finds that such system provides for competitive procurement, the Secretary shall approve such systems for use for all procurements financed under this subsection. Such approval shall be binding until withdrawn. A certification from the recipient under subsection (c)(5) is still required.".

LETTERS OF INTENT

SEC. 5. Section 3(a)(4) of the Act is amended—

(1) by inserting after the first sentence thereof the following: "At least thirty days prior to the issuance of a letter of intent under this paragraph, the Secretary shall notify, in writing, the Committee on Public Works and Transportation of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs of the Senate, of the proposed issuance of such letter of intent.";

(2) by striking out "in section 4(c)" and inserting in lieu thereof the following: "to carry out section 3"; and

(3) by adding at the end thereof the following: "Funding for projects covered by letters of intent or letters of commitment issued, and full funding contracts executed, prior to the date of enactment of the Federal Public Transportation Act of 1982 shall be given priority in making grants under this section after the date of enactment of such Act. None of the terms and conditions of any such letter of intent and full funding contract may be altered unless agreed to by all parties to the contract. The Secretary may not, directly or indirectly, take any action with respect to future available budget authority except as provided by this paragraph.".

AMENDMENTS TO SECTION 5 URBAN MASS TRANSIT PROGRAM

SEC. 6. Section 5 of the Act is amended—

(1) by adding immediately after subsection (c)(4) the following:

"(5) Apportionments for fiscal year 1975 shall be deemed to have lapsed on September 30, 1977, and apportionments for fiscal year 1976 shall be deemed to have lapsed on September 30, 1978."; and

(2) by adding at the end thereof the following new subsection:

"(o) Notwithstanding any other provision of this section, sums authorized, appropriated, and apportioned pursuant to this section shall remain available as initially apportioned to the urbanized areas or parts thereof for expenditure in accordance with the provisions of this section until September 30, 1985.".

AMENDMENTS TO SECTION 12

SEC. 7. (a) Section 12(c)(1) of the Act is amended by inserting before the semicolon the following: ", and such term also means any bus rehabilitation project which extends the economic life of a bus five years or more".

"(b) Section 12(c)(2) of the Act is amended by inserting before the semicolon the following: "and any public transportation facility which utilizes a right-of-way rail usable by other forms of transportation and also means a public transit facility which utilizes a fixed catenary system."

AMENDMENTS TO THE REPORTING SYSTEM

SEC. 8. Section 15(b) of the Act is amended by striking out "section 5" and inserting in lieu thereof "section 5 or 9".

AMENDMENTS TO FORMULA GRANTS FOR NONURBANIZED AREAS

SEC. 9. (a) Section 18(a) of the Act is amended by striking out "section 4(e)" and inserting in lieu thereof "section 4(a)(3)(D)".

(b) Subsection (c) of such section is amended by striking out "three years" in the first sentence and inserting in lieu thereof "two years".

(c) Subsection (c) of such section is amended by inserting after the first sentence thereof the following: "After September 30, 1982, any amounts remaining unobligated at the end of such period or which are deobligated at the end of such period shall be added to the amount available for apportionment under section 4(a)(3)(D).".

AMENDMENTS TO SECTION 16

SEC. 10. Section 16(b) of the Act is amended by striking out "section 4(c)(3) of this Act, 2 per centum" and inserting in lieu thereof "section 4(a)(3)(A) of this Act. 3.5 per centum".

INTERCITY BUS SERVICE TERMINAL DEVELOPMENT PROGRAM

SEC. 11. Section 21 and 22 of the Act are repealed.

WATERBORNE TRANSPORTATION DEMONSTRATION PROJECT

SEC. 12. Section 320(b) of the Surface Transportation Assistance Act of 1978 (Public Law 95-599) is amended by adding at the end thereof the following: "No funds are authorized to be appropriated to carry out the provisions of subsection (a) after September 30, 1982."

REPEAL OF SAFETY AUTHORITY

SEC. 13. Section 107 of the National Mass Transportation Assistance Act of 1974 (Public Law 93-503) is repealed.

TRANSIT CAPITAL INFRASTRUCTURE PROGRAM

SEC. 14. (a) In addition to amounts authorized under section 3(a) of the Urban Mass Transportation Act of 1964, there are authorized to be appropriated from the Transit Account of the Highway Trust Fund not to exceed $550,000,000 for the fiscal year ending September 30, 1983, and $1,100,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, and September 30, 1985. Notwithstanding the preceding sentence, the amount authorized to be appropriated for any fiscal year shall not exceed the amount as estimated annually by the Secretary of the Treasury to be received in the Transit Account of the Highway Trust Fund including interest thereon in such fiscal year from subsections (a) and (b) of section 4041 of the Internal Revenue Code of 1954 and section 4081 of the Internal Revenue Code of 1954.

(b) Using sums available pursuant to subsection (a) the Secretary is authorized to make grants under this section to finance urban transit capital infrastructure projects for fiscal years 1983 and 1984. The Secretary shall award grants under this section to applicants with projects which can begin construction or manufacturing within the shortest possible time. The Secretary may not limit grants under this section for bus purchases if the Secretary finds that qualified bus manufacturers do not have the capacity to meet the requirements of the preceding sentence. To the extent practicable the Secretary shall emphasize projects which are labor intensive.

(c) The Secretary shall, to the extent practicable, assure a fair and equitable distribution of grants to all States so that each receives no less than ½ of 1 per centum of the funds available under this section. In the event that the Secretary determines that a State would not receive a fair and equitable share of funds under this section for transit capital infrastructure projects, the Secretary is authorized ot make grants under this section to such State on behalf of urbanized areas of less than 200,000 in population and directly to designated recipients for area of more than 200,000 population for highway projects authorized under title 23, United States Code. The Secretary shall not approve highway projects without receiving assurances that a sufficient number of qualified transit relateed projects will not be available within that fiscal year within such State. The aggregate amount of such nontransit grants shall not exceed 15 per centum of the total funds available under this section in any fiscal year.

(d) As used in this section, the term "transit capital infrastructure development project" means any project in an urbanized area or portion thereof involving the acquisition, rehabilitation and replacement of rolling stock, the construction, rehabilitation and modernization of commuter rail and fixed guideway systems, the construction, rehabiltation, modernization, and replacement of bus facilities and related equipment, the renovation and improvement of historic transportation facility with related private investment, and intermodal terminals.

(e) The Federal share for projects approved under this section shall be 80 per centum.

(f) The limitations contained in subsections (b), (c), (d), and (e) shall expire on September 30, 1984. After that date funds authorized under subsection (a) shall be available under the requirements of section 3(a) of the Urban Mass Transportation Act of 1964.

(g) Except as otherwise provided by this section, a grant under this section shall be subject to the same terms and conditions as are applicable to grants under section 3 of the Urban Mass Transportation Act of 1964.

SECTION-BY-SECTION ANALYSIS

CHANGES TO SECTION 3 CAPITAL GRANT PROGRAM

Section 4(a) is amended to require a 40 percent local match for new fixed guideway projects or for extensions to an existing system funded with discretionary grant. Other discretionary projects funded by Section 3 will require a 30 percent local match. These higher local matching requirements will allow the more limited Federal discretionary funds to support those projects which have high local priority. However, these changes will not affect previous commitments made prior to this Act including those to the Washington, D.C. system.

In making discretionary grants, the Secretary is required to take into account the adverse effects of decreased commuter rail service resulting from railroad bankruptcy.

AUTHORIZATIONS

A three year comprehensive authorization for the mass transit program is established at $3.13 billion per year for fiscal year 1983, 1984, 1985 which includes funding for all

programs except interstate transfer. From the funds appropriated under this authorization up to seventy-five million dollars is authorized for appropriations for research, development, and administrative expenses. From the remainder of the total amount appropriated:

(a) 24 percent of the funds must be made available for discretionary grants under Section 3 (until 1985 when it shall be 10 percent).

(b) 67.25 percent of the funds must be made available for formula grants for urbanized areas with populations greater than 200,000 (until 1985 when it shall be 79.63 percent).

(c) 6.5 percent of the funds must be made available for formula grants for urbanized areas with populations of less than 200,000 but greater than 50,000 (until 1985 when it shall be 7.7 percent).

(d) 2.25 percent of the funds must be made available for grants to urbanized areas of less than 50,000 in population (until 1985 when it shall be 2.67 percent).

Fifty million dollars will be available for planning grants made under the authority of Section 8. These grants will be funded from the funds available for Section 3. Furthermore, urbanized areas are allowed to decide to use block grant funds for additional planning activities.

An overall authorization of $3.495 billion will cap total appropriations for all transit programs including all titles of this Act, the Interstate Transfer program, and the so-called Stark-Harris funding for the Washington, D.C. Metro System. This amount is the level allowed by the Budget Resolution.

NEW BLOCK GRANT PROGRAM

The legislation authorizes a new block grant program to replace the formula grants now made under Section 5. The new Section 9 provides funds to urbanized areas to finance the planning acquisition, construction, improvement, and operating costs of facilities, equipment, and associated maintenance activities in mass transportation services. The inclusion of associated maintenance activities is the only change in eligible expenses from the current Section 5 program. For purposes of this section, associated maintenance activities means equipment and materials each of which costs at least one percent of the fair market value of the bus or rail car for which the equipment is to be used.

FUND DISTRIBUTION

Grants made to urbanized areas of greater than 200,000 population under Section 9 will be made on the basis of a formula that divides 68 percent of the available funds on the basis of each area's total bus revenue miles, each area's population, and each area's population weighted by a factor of density. The bus revenue mile factor will be used to distribute 50 percent of the funds. The population factor and the density factor will each be used to distribute 25 percent of the funds. Of this 68 percent distributed by bus related factors, three fourths of the funds are for urbanized areas over 1 million population and one fourth is reserved for areas of less than 1 million population.

The remaining 32 percent of the available funds will be distributed to areas that operate fixed guideway rail service. The funds will be distributed on the basis of 60 percent of an area's fixed guideway vehicle miles and 40 percent of an area's fixed guideway route miles. Each urbanized area with at least 750,000 population which provides commuter rail service is guaranteed at least 0.75 percent of the rail funds. Service and route miles provided in a state adjacent to the state or state in which the urbanized area is located and passengers served shall be attributed to the public body which contracts for the service as if the public body was an urbanized area of 200,000 or more. In addition ferry boat operations are included in fixed guideway vehicle miles and route miles.

For urbanized areas of less than 200,000 population that receive a Section 9 grant, the formula will distribute funds on the basis of population and population weighted by density. Each factor will count equally.

The federal share of the cost of any project funded under Section 9 is limited to 80% of the cost of the project for capital projects. The federal share of operating costs is limited to 50% of the cost.

OPERATING SUBSIDIES

With regard to operating subsidies, an area may in general not spend more than 80% of its 1982 operating apportionment if it has a population of more than 1 million, 90% of its 1982 operating apportionment if it has a population of more than 200,000 but less than 1 million, 95% of its 1982 operating apportionment if it has a population of less than 200,000. Where an area first became eligible for an apportionment in 1980, that area cannot use more than 40% of its apportionment for operating costs.

An area may however, transfer funds for operating expenses up to its 1982 operating apportionment if the area:

(a) certifies that it has provided public notice of its intent to use additional operating funds and that it will lose some funds as described in (c) below.

(b) certifies that it has a three year plan which demonstrates how the area will operate its transit system without transferring capital funds in fiscal year 1986.

(c) agrees to forfeit one dollar for every two dollars transferred to operating expense use. (These forfeited amounts are used for discretionary grants made by the Secretary)

The Secretary of Transportation is prohibited from permitting an area to use the transfer option after September 30, 1984.

Funds available for discretionary grants due to a forfeiture under the transfer option shall be made available on a priority basis to areas that did not receive as large a block grant under Section 9 as was received under Section 5 in 1982. Discretionary grants will be available to recipients under the same local matching share requirements for Section 3 grants.

BLOCK GRANT PROCEDURES AND REQUIREMENTS

Sums apportioned under Section 9 for areas of less than 200,000 in population are made available to the Governor for expenditure in accordance with the planning process required under Section 8.

Funds made available to the Governor may be transferred to areas eligible under Section 18 of the Act or to areas with populations of less than 300,000 in population. The Governor may make such transfers only after consulting with local officials.

Funds apportioned under this section shall remain available for three years. Funds which remain unobligated at the end of that period will be reapportioned the following year.

To receive a grant under Section 9 a recipient must comply with Title VI of the Civil Rights Act, subsections (e), (f) and (g) of Section 3 of this Act, as well as Sections 8, 13, 16, and 19 of this Act. The recipient must also submit a statement of activities to be funded and the certifications required by the Act.

The recipient must certify that it has the legal, financial and technical capacity to carry out the proposed projects; has the authority to apply for the grant; will conform to the Uniform Relocation Assistance and Land Acquisition Policies Act of 1970 and Section 7 of this Act; will have continuing control over the equipment purchased and will maintain the facilities and equipment; will use competitive procurement procedures complying with Section 401 of PL 95-599; will comply with National Flood Insurance Act of 1968; has complied with Section 12; will meet the local match requirements of Section 4; and that it has a locally developed process for soliciting and considering public comment prior to raising fares for reducing services.

Each recipient must solicit public comment by making public the amount of funds available, the activities the recipient proposes to undertake with such funds, and publish a proposed statement in a manner which will provide citizens and elelcted officials an opportunity to comment on the proposed program. The program must be developed in consultation with all interested parties including private transportation providers. Recipients will also hold at least one public hearing to receive comment on the proposed program.

The Secretary may issue regulations which permit recipients to assume the responsibilities of compliance with the National Environmental Policy Act. However, these regulations must be developed in consultation with the Council on Environmental Quality. To release funds under this section, the recipient must submit the environmental certification 15 days in advance and the Secretary must accept the certification. The environmental certification by the recipient must be in a form acceptable to the Secretary, be executed by the chief executive officer, specify that the recipient has carried out its responsibilities, and that the certifying officer consents to assume the status of a responsible federal official under NEPA and he consents to accept the jurisdiction of federal courts for the purposes of enforcement of his responsibilities as such an official.

The Secretary shall not approve a grant unless he finds that the project is part of an approved program of projects required by the Section 8 planning process.

The Secretary shall enter into an annual projects agreement with the Governor or the designated recipient of each urbanized area as soon as practicable after the application is submitted.

Each recipient shall submit to the Secretary an annual report concerning the use of the funds and how such use compares to the statement submitted in the original application. The Secretary shall require annual independent reviews and audits as deemed appropriate by the Secretary.

The Secretary shall determine whether the recipient's activities have been carried out in a timely and effective manner and that the recipient has a continuing capacity to carry out those activities. The Secretary shall also determine whether the recipient has carried out its activities and certifications in accordance with this Act and applicable laws.

Not less than every three years the Secretary shall perform a full review and evaluation of the performance of the recipient in carrying out its program. The Secretary shall determine if the local recipient's pro-

gram has been in compliance with statutory and administrative requirements and the extent to which the actual program was consistent with the proposed statement and the Section 8 planning process.

The Secretary may make adjustments in annual grants on the basis of his findings and may reduce or withdraw such assistance or take other appropriate action in accordance with the required reviews and audits.

Section 1001 of Title 18 of the United States Code applies to any submission under this section. If any false or fraudulent statements are made in connection with a submission, the Secretary may terminate and seek reimbursement of the affected grant or grants.

A recipient may request the Secretary to approve its procurement system. If the Secretary approves the local procurement system as consistent with the Act, the Secretary shall approve the use of that system for all procurements financed under this Act.

LETTERS OF INTENT

A requirement is added that the Secretary must inform the Committee on Public Works and Transportation of the House of Representatives and the Committee on Banking, Housing and Urban Affairs of the Senate 30 days prior to the issuance of a letter of intent.

The Secretary shall give priority to grant requests to fund programs included in letters of intent or full funding contracts issued prior to the enactment of this Act. Terms and conditions of such letters of intent and full funding contracts may not be altered unless agreed to by all parties. The Secretary is also prohibited from taking any direct or indirect action regarding future available budget authority except by the letter of intent procedure in the statute. This prevents for example any further use of so-called letters of commitment.

The bill clarifies that apportionments made pursuant to Section 5 for fiscal year 1975 shall be deemed to have lapsed on September 30, 1977 and apportionments for fiscal year 1976 shall be deemed to have lapsed on September 30, 1978. This clarification will avoid any confusion created by the transition quarter. Moveover, sums apportioned pursuant to Section 5 shall remain available as initially apportioned to the urbanized areas for expenditure in accordance with the provisions of this section until September 30, 1985.

The definition of fixed guideway systems is amended to include public transportation facilities which utilize a right-of-way rail usable by other forms of transportation.

The current Section 15 reporting requirements are amended to also include grants under the new Section 9.

Section 18 is amended to conform with the balance of the bill with lapsed funds remaining unobligated after September 30, 1982 reallocated under the requirements of this Act.

The authorization for planning and designing of mass transportation facilities to meet the special needs of the elderly and the handicapped is increased from 2 percent to 3.5 percent of the funds available for discretionary grants under Section 3.

Sections 21 and 22 of the Act are repealed.

The authorization for the Waterborne Transportation Demonstration Act is de-authorized as of September 30, 1982.

The authority for Section 107 is repealed.

TRANSIT CAPITAL INFRASTRUCTURE PROGRAM

A new capital infrastructure program is authorized to be financed by revenues allocated to transit by an additional tax on gasoline. Authorized at a level of $550 million for 1983 and $1.1 billion for 1984 and 1985, the program is a discretionary fund administered by the Secretary of Transportation within the requirements of the Section 3 program.

In addition to the requirements of Section 3, grants under this program will be limited to: The acquisition, rehabilitation, and replacement of rolling stock, the construction, rehabilitation, and modernization of commuter rail and fixed guideway systems, the construction, rehabilitation, modernization, and replacement of bus facilities and related equipment, and other projects.

Although this program is primarily a transit program, if a state will not receive at least .5 percent of the funds available under this title, The Secretary is authorized to make grants for highway projects eligible under Title 23 of the United States Code in that state. However, the Secretary is limited under this provision to 15 percent of the funds available.

The new infrastructure program will expire on September 30, 1984. After that date the proceeds of the gas tax will be used to fund Section 3 of the UMTA Act.●

● Mr. D'AMATO. Mr. President, I am pleased to join my good friend and colleague from Indiana, Senator LUGAR, in introducing today the Federal Public Transportation Act of 1982.

Today this Nation is at a crossroads with regard to Federal policy on the role of mass transportation in our urban and rural areas, on the need to maintain and restore our transportation infrastructure to good operating order, and to address the serious problem of unemployment. The Federal Government to date has provided strong support for funding mass transit programs to meet the mobility needs and economic well being of our urban and rural communities, as well as promote a broad range of national, social, and economic objectives.

The goals of this bill are to protect transit's historic public sector role as well its ability to contribute to local, regional and national infrastructure needs. Without a firm commitment to this Federal role, our urban and rural areas will be facing serious financial and operational strains. The transit industry will again be pushed toward a cycle of fare increases, service, and maintenance cutbacks, ridership declines and rising deficits that led to the demise of private transportation services in the 1950's and 1960's, and to the inability to maintain infrastructure and rolling stock in good operating order.

A major withdrawal of Federal support for operating costs of our Nation's transit systems, will have dire consequences. Such major reductions in Federal support come at a time when the ability of State and local governments to assume a substantially larger share of transit financing is increasingly in doubt. While a formula or block grant program offers many advantages to the transit industry, eliminating the ability to use funds for operating assistance does not provide the flexibility that operators and State and local governments need most in managing today's systems and services.

The formula structure embodied in this bill provides equitable funding to all urbanized areas, large and small, while recognizing the fact that some areas have greater funding needs due to ridership levels and physical facilities that need to be maintained or upgraded. The bill that we are introducing today focuses on how the Federal transit program can be structured to best support the delivery of transit services while fostering infrastructure improvements and employment opportunities.

In summary, it would appear that local governments will not be in a position to greatly increase their funding support to public transit. If the Federal Government truly wishes to maintain a basic service and physical infrastructure that can support the mobility so necessary to economic and social vitality, we must be willing to commit Federal resources to finance a strong mass transit program.●

ADDITIONAL COSPONSORS

S. 2150

At the request of Mr. LEVIN, the name of the Senator from Oklahoma (Mr. BOREN) was added as a cosponsor of S. 2150, a bill to amend the Social Security Act to provide that the amount of any unnegotiated social security check shall be returned to the trust fund from which the check was issued.

S. 2948

At the request of Mr. DOLE, the name of the Senator from Wisconsin (Mr. PROXMIRE) was added as a cosponsor of S. 2948, a bill to promote the development of nonanimal methods of research experimentation, and testing, and to insure humane care of animals used in scientific research, experimentation, and testing.

S. 2987

At the request of Mr. ROTH, the names of the Senator from Florida (Mrs. HAWKINS), the Senator from Nevada (Mr. CANNON), the Senator from Kentucky (Mr. FORD), and the Senator from Tennessee (Mr. SASSER) were added as cosponsors of S. 2987, a bill entitled "The Bloodmobile Act of 1982."

S. 3040

At the request of Mr. ARMSTRONG, the name of the Senator from Rhode Island (Mr. PELL) was added as a cosponsor of S. 3040, a bill establishing a new G.I. Education Program.

S. 3048

At the request of Mr. THURMOND, the name of the Senator from Alabama (Mr. DENTON) was added as a cospon-

sor of S. 3048, a bill to amend title 18, United States Code, to combat, deter, and punish individuals who adulterate or otherwise tamper with food, drug, cosmetic, and other products with intent to cause personal injury, death, or other harm.

S. 3054

At the request of Mrs. KASSEBAUM, the name of the Senator from North Dakota (Mr. ANDREWS) was added as a cosponsor of S. 3054, a bill to amend the Natural Gas Policy Act of 1978, and for other purposes.

SENATE JOINT RESOLUTION 222

At the request of Mr. WEICKER, the name of the Senator from New York (Mr. D'AMATO) was added as a cosponsor of Senate Joint Resolution 222, a joint resolution to designate the week of February 13 through February 19, 1983, as "National Police Athletic League Week."

SENATE JOINT RESOLUTION 240

At the request of Mr. BOREN, the names of the Senator from Montana (Mr. BAUCUS), the Senator from Alabama (Mr. HEFLIN), the Senator from Kentucky (Mr. FORD), the Senator from Oklahoma (Mr. NICKLES), the Senator from Montana (Mr. MELCHER), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Florida (Mr. CHILES), and the Senator from West Virginia (Mr. RANDOLPH) were added as cosponsors of Senate Joint Resolution 240, a joint resolution to authorize and request the President to designate the week of January 16, 1983, through January 22, 1983, as "National Jaycee Week."

SENATE JOINT RESOLUTION 244

At the request of Mr. WARNER, the names of the Senator from New Jersey (Mr. BRADLEY), the Senator from South Carolina (Mr. THURMOND), and the Senator from Rhode Island (Mr. PELL) were added as cosponsors of Senate Joint Resolution 244, a joint resolution designating January 17, 1983, as "Public Employees' Appreciation Day."

SENATE CONCURRENT RESOLUTION 121

At the request of Mr. DOLE, the names of the Senator from Michigan (Mr. LEVIN), and the Senator from West Virginia (Mr. RANDOLPH) were added as cosponsors of Senate Concurrent Resolution 121, a concurrent resolution expressing the sense of the Congress that the United States should maintain Federal involvement in, and support for, the child nutrition programs, and for other purposes.

SENATE RESOLUTION 478

At the request of Mr. DODD, the names of the Senator from Illinois (Mr. PERCY), and the Senator from Hawaii (Mr. MATSUNAGA) were added as cosponsors of Senate Resolution 478, a resolution expressing the sense of the Senate with respect to the need to maintain guidelines which insure equal rights with regard to education opportunity.

SENATE RESOLUTION 499—RESOLUTION AUTHORIZING SUPPLEMENTAL EXPENDITURES BY THE SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. MELCHER submitted the following resolution; which was referred to the Select Committee on Indian Affairs:

S. RES. 499

Resolved, That section 21(b) of Senate Resolution 333, 97th Congress, second session, agreed to March 11, 1982, is amended by striking out "$597,710" and inserting in lieu thereof $627,710".

AMENDMENTS SUBMITTED FOR PRINTING

ANTITRUST EQUAL ENFORCEMENT

AMENDMENT NO. 4601

(Ordered to be printed and to lie on the table.)

Mr. ZORINSKY submitted an amendment intended to be proposed by him to the bill (S. 995) to provide for contribution of damages attributable to an agreement by two or more persons to fix, maintain, or stabilize prices under section 4, 4A, or 4C of the Clayton Act.

AMENDMENT NOS. 4602 THROUGH 4609

(Ordered to be printed and to lie on the table.)

Mr. LEVIN submitted eight amendments intended to be proposed by him to the bill S. 995, supra.

AMENDMENT NOS. 4610 THROUGH 4944

(Ordered to be printed and to lie on the table.)

Mr. METZENBAUM submitted 335 amendments intended to be proposed by him to the bill S. 995, supra.

TELEVISION AND RADIO COVERAGE OF THE SENATE

AMENDMENT NO. 4945

(Ordered to be printed and to lie on the table.)

Mr. RANDOLPH submitted an amendment intended to be proposed by him to the resolution (S. Res. 436) to establish regulations to implement television and radio coverage of proceedings of the Senate.

Mr. RANDOLPH. Mr. President, I submit the following notice in writing:

In accordance with Rule V of the Standing Rules of the Senate, I hereby give notice in writing that it is my intention to move to amend Rule XII of the Standing Rules of the Senate for the purpose of proposing to the resolution (S. Res. 436), providing for the television and radio coverage of proceedings of the Senate, the following amendment:

Viz: At the end of the resolution add the following:

"SEC. 9. Rule XII of the Standing Rules of the Senate is amended by adding at the end thereof the following new paragraph:

"'(5) When yeas and nays are ordered on the floor, each Senator shall vote from the assigned desk of the Senator.'."

SURFACE TRANSPORTATION ACT

AMENDMENT NO. 4946

(Ordered to be printed and referred to the Committee on Finance.)

Mr. METZENBAUM submitted an amendment intended to be proposed by him to the bill (S. 3044) entitled the "Surface Transportation Act of 1982."

● Mr. METZENBAUM. Mr. President, I rise to submit a "buy American steel" amendment to S. 3044, the Surface Transportation Act of 1982. This legislation will require that the steel in all projects funded under this program be made exclusively in the United States. This amendment will guarantee that American workers receive the indirect as well as the direct job-creating benefits of the proposed tax on motor fuels.

The steel industry is in serious trouble.

Nearly 50 percent of the Nation's 450,000 steelworkers are unemployed or on shortened workweeks.

The industry is currently operating at little more than 30 percent capacity.

In the third quarter of this year alone, the steel industry lost more than a billion dollars. For the year, these losses could exceed $3 billion.

And in the first 9 months of this year steel imports accounted for 23 percent of all steel purchased by domestic users. For the comparable period in 1981, the figure was 17 percent.

This strong "buy American" provision which I am today introducing will give our sagging steel industry the shot in the arm it so desperately needs.

I ask unanimous consent that the amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

At the appropriate place in the bill insert the following:

BUY AMERICAN STEEL

SEC. (A) Title 23, United States Code, is amended by adding after section 324 the following new section:

"§ 325. Buy American steel.

"Notwithstanding any other provision of this title or any other law, none of the funds authorized to be appropriated for highway construction may be obligated or expended on any project in which steel manufactured outside the United States is used.".

(B) the analysis of chapter 3 of title 23, United States Code, is amended by adding at the end thereof the following:

"325. Buy American steel.".●

NOTICES OF HEARINGS

SUBCOMMITTEE ON AGRICULTURAL PRODUCTION, MARKETING, AND STABILIZATION OF PRICES

Mr. COCHRAN. Mr. President, I wish to announce that hearings on possible revisions in the farm program have been scheduled before the Senate Agriculture Subcommittee on Agricultural Production, Marketing, and Stabilization of Prices.

As chairman of the subcommittee, I have invited witnesses to testify on the payment-in-kind proposals suggested by Secretary Block and on other proposals which have been suggested by Members of Congress and farm organizations.

The hearing will be held on Thursday, December 9, at 9 a.m. in room 324, Russell Building.

Anyone wishing further information should contact Denise Alexander of the Agriculture Committee staff at 224-0014.

COMMITTEE AUTHORITY TO MEET

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on Friday, December 3, at 1:30 p.m., to hold a hearing on title IV of S. 3044, the Surface Transportation Act of 1982.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Thursday, December 2, at 2 p.m., to review the results of the GATT conference.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

BIPARTISAN CRIME BILL

● Mr. BIDEN. Mr. President, it is with great pleasure that I rise to support the chairman's motion to seek Senate passage of the bipartisan crime package. As my colleagues recall this measure passed the Senate on a 95 to 1 vote 2 months ago. It is now necessary to add it to this bill in order to seek House consideration of our bipartisan package.

Although I concede that we have some problems in the House, I think that we will eventually get the House to focus on this most urgent matter.

Crime rates continue to rise. There is clear consensus that organized crime and drugs is at the heart of the current street crime wave. That is why the President is in the midst of a major reorganization of our organized crime effort and why the Attorney General and the President have gone abroad to emphasize narcotics problems to the world's leaders. I firmly believe that much more needs to be done in this area and indeed the whole matter of coordination of all these efforts still remains unresolved if a Cabinet-level drug office is not created.

If in passing this legislation the Senate will not only be doing its duty in terms of strengthening Federal law with respect to organized crime and narcotics, but will be addressing the coordination issue as well through the creation of a Cabinet-level office.

I urge all my colleagues to vote for this again and hope that we will get some favorable signal from the House leadership that some, if not all, elements of this package will receive swift consideration.●

POOR, DISABLED SUFFER BUDGET-CUT HARDSHIPS

● Mr. LEVIN. Mr. President, I submit for the RECORD an article describing the experience of a severely disabled woman in Santa Barbara, Calif., who was terminated as a result of a continuing disability review, from the title II social security disability program.

[From the Santa Barbara News-Press, Oct. 26, 1982]

POOR, DISABLED SUFFER BUDGET-CUT HARDSHIPS

Mary Gorgita limped up to the microphone, tears in her eyes.

"My pain is severe." she said. "Not only in my legs and hips, but on my pride."

Mrs. Gorgita managed to overcome pride Monday to speak at a forum on the impact of budget cuts and the recession on the community because she wanted to make her point: The Reagan administration's toughened stance on social service programs is hurting people.

"I can't begin to tell you the stress I've been going through, the nights I can't sleep," she said, her voice breaking. "Forgive me, but I am damn disgusted and mad."

Mrs. Gorgita, 60, worked most of her life until she succumbed to a degenerative spinal disease and a series of operations left permanent nerve damage.

In January, she received a Social Security notice that she had been determined fit to work, and that her disability payments would end in February, explained Frank Ochoa, who, as executive director of the Legal Aid Foundation represented Mrs. Gorgita in appeal bids. Ochoa was one of several representatives of local agencies to speak at the forum.

Although the disability checks, designed to supplement the amount she received from Social Security's retirement fund, stopped in February, she continued to receive retirement benefits, Ochoa said.

In July, she was informed that she shouldn't have gotten even those checks, and that she owed Social Security more than $1,000.

"If I could work, I wouldn't be here today," she told the sympathetic audience of about 75.

"I've always been able to make my own way. I've always helped when I could. At the beginning of this year, they began cutting me off from everything."

Ochoa said Mrs. Gorgita's plight had more to do with Social Security's efforts to pare down its program than with any wrongdoing on her part.

"Within the last (one-and-a-half) years, there has been a massive purge of the disabled from government rolls," he said, "People who are still disabled are being cut off."

Those receiving disability payments are subject to periodic reviews to determine if they are still unable to work. Ochoa said. He said there were 100,000 such reviews each year nationally, there are now 50,000 every month.

The federal government's goal is to place 800,000 cases under review by 1984, he said, maintaining the review process is time-consuming, expensive and detrimental to seriously disabled individuals who don't know how they'll make ends meet if their funds are cut off.

If recipients don't appeal their cases within two weeks of receiving notice that their cases are under review, their payments are automatically suspended, Ochoa said.

He told of other cases he has handled in recent months: A Vietnam veteran, diagnosed as "schizophrenic with a severe personality disorder" who suffers constant hallucinations, was cut off and forced to live on the beach, where he was beaten and robbed; a man who had four discs removed from his back and suffers "acute and constant pain" was told he could go back to work; a woman who suffers daily seizures was also told to work.

The Legal Aid Foundation's office is filled with requests for assistance, Ochoa said. "It's really a distressing time for me."

Shelley Rouillard, advocacy director for the Community Action Commission, said one of her clients, an elderly man receiving Social Security checks, was forced to move out of his apartment when his landlord decided not to renew his lease. The man's rent was being supplemented under the Section 8 program administered by the housing authority. He couldn't find another apartment that was inexpensive enough to meet the Section 8 requirements, so he gave up his participation in the program and moved into a "regular" apartment.

After paying rent and utilities, he was left with only $10 a month for food and other expenses, but by eating only one meal a day at a senior nutrition site, he managed to get by.

The problem, Ms. Rouillard said, is that her client became ill and needed to be hospitalized. She eventually helped him find a shared-housing situation, but he "worries daily how he will make it if he gets sick again."

Jim Rydingsword, director of county Social Services, said even harder times are in store for the needy, especially in California, because of a national shift in social philosophy that has nothing to do with a fiscal crisis.

"Reagan is firmly committed to removing social services entirely from the federal budget," he said, noting state and local governments will assume administration of many social service programs.

This will be particularly harmful to the needy in California, where public programs have already been cut considerably by "the taxpayer revolution." What it all boils down

to, he said, is that a number of services simply "will not be provided."

Ochoa summed things up in harsher terms: "Clearly, this country has abandoned its commitment to care for those unable to care for themselves."

As opposed to the War on Poverty, launched in the 1960s, the nation has embarked on a "war on the poor," he said.●

PROJECTED DEFICITS

● Mr. BOREN. Mr. President, more figures are beginning to emerge on projected deficits for fiscal 1983 and the outyears. Last year's deficit came in at $110.7 billion, the largest deficit in U.S. history. And projections are that next year's fiscal deficit will be between $170 and $200 billion. The addition of more tax cuts in the next couple of years will raise the fiscal 1984 deficit even further. And administration officials are predicting a "leveling off" of the deficit in fiscal 1985 at approximately $200 billion, with little reduction seen even beyond that.

These kinds of figures are unacceptable. The scenario I have outlined before of large borrowings by the Federal Government, reducing the available supply of credit and thereby driving up the interest rates, cannot be allowed to continue without end. We must pay attention to deficits and their effect on the economic ills of the country.

I applaud the actions of the House of Representatives yesterday in reducing the appropriations bill for the Treasury, Postal Service, and White House. It is a welcome signal that the election results may not presage an increase in spending as some have predicted. There are other moves underway which carry great potential, such as those discussed on the floor yesterday by the distinguished Democratic leader. We must not flag in our efforts in all of these areas.

Mr. President, I ask that an article containing budget deficit figures be placed in the RECORD at the conclusion of these remarks.

The article follows:

[From the Washington Post]

ECONOMIC RECOVERY WON'T BRIDGE WIDENING DEFICIT, OMB SAYS

(By John M. Berry)

Federal budget deficits will continue to grow, even after the long-promised economic recovery is complete, and will top $200 billion a year in the late 1980s unless there are further spending cuts or tax increases, according to estimates from the Office of Management and Budget.

Administration sources yesterday confirmed the estimates, which, they said, assume the economy will grow at more than a 3.5 percent rate during 1983, adjusted for inflation, and at a 4 percent rate for the next five years.

The estimates directly conflict with President Reagan's assertion Monday in a speech at the National League of Cities that the only way to eliminate "the monstrous proportions of our deficit . . . lies in stimulating the economy and increasing productivity." However, the new figures also help explain Reagan's unexpected emphasis on the size of the deficits and the apparent attempt to lay the political groundwork for publicly acknowledging them.

Reagan, to the consternation of some administration officials, also said, in a passage a White House aide said he wrote himself, ". . . there is no way we can eliminate, by budget cuts alone, the structural deficit built into the budget, nor can it be eliminated by raising taxes."

Since a full economic recovery will not close the ever-widening gap between revenues and outlays, the only way the deficit could possibly be reduced would be by trimming spending or raising taxes, the officials said.

Reagan's chief economic adviser, Martin Feldstein, has made a series of speeches in the last three weeks in which he has blamed rising deficits for a range of economic ills and declared that if they are not reduced the tide of red ink will abort the recovery.

Some administration officials are hoping the president will be willing to consider a substantial package of spending cuts and revenue raising measures, including some new energy taxes, to reduce the prospective deficits. But after the president's Monday speech they are more doubtful than ever that he will move very far in that direction.

On the spending side, the new OMB estimates assume continuation of present domestic programs and Reagan's original high track for defense outlays for 1984 and beyond. Congress lowered the defense spending figures when it passed its 1983 budget resolution earlier this year. Shortly after its adoption, however, the president said he did not feel bound by the lower defense numbers except for 1983 even though they were part of an overall budget compromise to which he had agreed.

Similarly, on the revenue side, the estimates assume no changes in taxes except those called for by present law, such as next year's 10 percent cut in most current personal income tax rates.

In the last official budget estimates, released July 30, OMB put the 1983 deficit at $115 billion, up only slightly from the 1982 figure, which later turned out to be $110.7 billion, by far the largest deficit in U.S. history.

With the delay in the long-awaited economic recovery, the fiscal 1983 deficit estimate has now risen to about $170 billion. Deficits in off budget agencies that are financed by direct federal borrowing come to an additional $18 billion.

The deficit for fiscal 1984 is expected to be several billion dollars larger, primarily as a result of additional personal and business tax cuts in 1983 and 1984 and steadily rising military outlays. Together those elements offset the revenue gains and somewhat lower spending, such as for unemployment benefits, flowing from the assumed ecomomic recovery.

By 1985 the deficit jumps to about $195 billion, the administration sources said. After 1985 the deficit figures begin to level off, after topping $200 billion. "They just don't come down," one official said.

Congressional Budget Office officials, who had not been briefed by OMB on any of the new estimates, said the large projected deficits "clearly are possible," especially with the higher defense spending figures.●

SENATOR FORD BELIEVES SYNFUELS PROGRAM SHOULD PROCEED

● Mr. RANDOLPH. Mr. President, last week another major synthetic fuels project was suspended—this time the H-coal plant in Breckinridge County, Ky. I recall when the solvent refined coal facility was shutdown in Morgantown, W. Va., in mid-1981. This action represents another step backward in our attempts to regain energy independence. As we witnessed in 1944, a growing flood of cheap oil from the Mideast and other Third World nations is now, once again, drowning the emphasis on producing alternative fuels from coal.

Senator WENDELL FORD, chairman of the Senate Coal Caucus until 1981, reaffirmed his support for synfuels development in a November 28, article in the Courier-Journal. Our colleague is a member of the Energy and Natural Resources Committee. He has helped redirect the efforts of the current administration to curtail research and development funds. Senator FORD believes in a viable synthetic fuels industry and a vigorous domestic policy for coal utilization.

I commend this thoughtful analysis as another example of why we must not abandon our commitment to synfuels or other elements of the domestic coal strategy we have enacted during the last two sessions of Congress. I ask that the well-reasoned opinion of the able Senator from Kentucky, be placed in the RECORD.

The article follows:

[From the Courier-Journal, Nov. 28, 1982]

SHOULDN'T WE STILL ENCOURAGE A SYNTHETIC FUEL INDUSTRY?

(By Senator Wendell H. Ford)

Has the death knell been sounded for any hope this country ever had of putting a national synthetic-fuels industry in place?

A lot of people are wondering as much after Ashland Oil's decision last week to suspend plans for construction of a commercial H-Coal plant in Breckinridge County, Kentucky. The plant was designed to produce 25,000 barrels a day of synthetic oil from coal and was on the list of projects under active consideration for financial assistance from the Synthetic Fuels Corporation.

By putting this project on the back burner, Ashland became the latest in a growing number of companies to shelve plans for major commercial alternative fuels facilities. Five projects have either been canceled or indefinitely postponed this year. Only 12 applications for assistance are still pending before the Synthetic Fuels Corporation.

I'm not ready yet to throw in the towel as far as a national synthetic-fuels industry is concerned. But I will be the first to admit that the hopes we had with passage of the 1980 Energy Security Act for the production of at least 500,000 barrels of crude-oil equivalent a day in synthetic fuels by 1987 have been dashed.

I cannot fault the logic behind Ashland's decision. Even though the project has proven its potential, it represents a major

investment and financial commitment into an area for which at the present time there is no guaranteed return.

A corporation must first and foremost be motivated by accountability to its board and shareholders. In this context, Ashland's decision is more than understandable. Frankly, Ashland, which has been experimenting with the "H-Coal process" for 10 plus years, has done well to carry the financial load for as long as it has without additional private participation.

Yet, the fact remains that a serious void will exist in terms of the nation's long-term energy strategy because of the reluctance of Ashland and other private corporations to move forward with synthetic fuels.

Government indifference to this trend is a cause for great concern.

In the 2½ years since the Energy Security Act was signed into law, there has been a major shift in government energy policy. There has been a shift from emphasis on government leadership and assistance to a philosophy that says free market forces will work on their own.

That philosophy is just as wrong as it can be.

The marketplace is motivated by profit, not by the need to protect the national interest. Protecting the national interest was, is and always will be the responsibility of government. Nowhere is the national interest more critical than in energy and that is why government must re-establish its leadership in promoting the development of alternative fuels, pending a day when the marketplace is in a position to act on its own.

Without federal involvement, no corporation can afford or will be willing to undertake projects of this magnitude and risk on their own.

It is premature to say that the Energy Security Act of 1980 has failed. It is not premature to say that the act needs a re-examination in light of the changes that have occurred in the country's economic condition since it was enacted.

Congress must right now take another look at the charter of the Synthetic Fuels Corporation to see if its standards are too rigid and if the formula for providing financial assistance for the commercial development of synthetic fuels is inadequate.

In 1980, the formula, which provides for loans, purchase agreements, price guarantees and loan guarantees, might have been sufficient. But now corporate America is reeling from a prolonged recession. It is retreating instead of expanding. Investment capital is scarce. One wrong move and a company could be on the verge of bankruptcy. Caution is the operational watchword.

In such an environment, decisions involving any degree of risk are put aside. The bylaws of the Synthetic Fuels Corporation allow for no flexibility to adapt to these circumstances. The financial-assistance formula might have succeeded under ideal market conditions, but it will attract few takers under today's economic climate.

So, we are at a crossroads. We are either serious about a national synthetic-fuels industry—or we aren't. If we are serious, we must try to find a way to once again attract the interest of the private sector, which is critical to putting such an industry in place.

Frankly, I do not know how important the whole idea of energy security is any more to either the Congress or the country. The crisis has passed for the moment. There is a temporary glut. Interest in energy matters has been overshadowed for the time being by unemployment, cutting federal spending and strengthening the nation's defense.

One member of Congress reacted to Ashland's announcement by boldly proclaiming that "conservation has finally beaten synfuels." What a sad and mistaken conclusion. Conservation and synfuels are not competing strategies. They are both essential elements of a national energy policy.

Conservation savings are a near-term solution; once in place, incremental conservation savings will become ever-increasingly more expensive.

Our energy crisis is far from over. Energy-policy institutions are still operating on the assumption that the world has embarked on a period of permanent shortages and that *all* energy from *all* sources is needed. They still see the day in the not-so-distant future when oil will cost $72 a barrel in constant 1982 dollars. The theory of the nature and cause of the shortages we experienced in the 1970's has not changed—only the realities of today's marketplace.

Somehow government must once again recognize that its obligation to its citizens is not just short-term, but long-term as well. We are looking ahead. We are once again backing ourselves into a position from which we will be forced to react—not act—in the event of another crisis.

Every time we take another step back, something that Sheik Yamani, the Saudi oil minister, was quoted as saying last year comes to mind:

"If we force the West to invest heavily in finding alternative sources of energy, they will. This could reduce the nations' dependence on oil to a point that will jeopardize Saudia Arabia's interest."

Others recognize what a viable synthetic-fuels industry would mean to the security of this country. Do we?●

THE VETO MESSAGE ON S. 2577, THE ENVIRONMENTAL RESEARCH, DEVELOPMENT AND DEMONSTRATION ACT OF 1982

● Mr. BAUCUS. Mr. President, on October 22, 1982, the President vetoed S. 2577, the Environmental Research, Development and Demonstration Act of 1982. This measure provides a 2-year authorization for the environmental research program administered by the Environmental Protection Agency.

I was disturbed by several points contained in the veto message, particularly the suggestion that, in this case, the authorizing process is superfluous and unnecessary.

I would like to address my remarks in turn to several issues raised by the President in returning the bill without his signature.

First, the President states that the veto of S. 2577, "* * * will in no way interfere with the conduct of any one of the research programs of the Environmental Protection Agency," pursuant to the enactment of the appropriations measure which contains the funding for this program. While an expiring authorization does not connote a "program shutdown" unlike a delinquent appropriation, I disagree that the conduct of the research programs will not be affected. S. 2577 contains some very explicit directives with regard to the kinds and quality of research the authorizing committees believe should be carried out. It is not expected nor desirable that the Appropriations Committee assume full legislative responsibility for the various programs, or that an appropriation measure supersede or preempt an authorization.

The second issue I would like to call attention to is the President's reference to a 10-percent increase in funding for EPA research and development contained in the fiscal year 1983 HUD-independent agencies appropriations bill over the fiscal year 1982 measure. This statement is highly misleading. This percentage refers to the difference between the administration's fiscal year 1983 request for this program contrasted to the figure that is actually contained in the fiscal year 1983 appropriations measure. While the appropriation includes $5 million above the administration's request for research and development, the program funding is actually reduced 21 percent compared to fiscal year 1982: $277.9 million is the estimated funding level for research and development in fiscal year 1982 compared to $220.8 million in fiscal year 1983.

The veto message further expresses objections to the Science Advisory Board amendment. The provision contained in S. 2577 is described as a "* * * modern-day version of Lysenkoism."

The criticism of the Science Advisory Board amendment and reference to Lysenkoism would indicate that the provision is interpreted as an effort to undermine scientific credibility and influence the advice and recommendations of the Science Advisory Board. Section 8(b)(2) of S. 2577 requires that, "Each member of the Board and nominee to the Board shall be qualified by education, training, and experience to evaluate scientific and technical information on matters referred to the Board * * *" An affiliation with "States, industry, labor, academia, consumers, and the general public" does not preclude a sound scientific background. Membership from this cross section is intended to foster, not prejudice the objectivity of the Board.

The veto message concludes with a reference to other unacceptable provisions of S. 2577 including a "duplicative" environmental monitoring proposal. To my knowledge, the monitoring provision is a novel one, and prescribes a systematic and useful activity that is not currently being performed.

The provision in S. 2577 requiring a dedication of 20 percent of program funds to long-term research reflects concern that this area is being neglected as resources for the program have been drastically reduced in the past 2 years.

This administration purports to use the research program within the Environmental Protection Agency to effectuate "regulatory reform." Furthermore, it has failed to nominate an Assistant Administrator who can act as a spokesman and provide leadership to the program. Combined, these two factors reflect a lack of regard for the program and fuel the fire of speculation as to its future role or even continue existence under this administration.

I regret that the President has chosen to reject the recommendations of Congress with respect to the direction of EPA's research program. I believe a clear mandate is required to assure that necessary research is being performed to advance our understanding of environmental issues. This effort is essential to guide us in making educated decisions now in the future.●

SECOND ANNIVERSARY OF THE MURDERS OF THE AMERICAN CHURCHWOMEN IN EL SALVADOR

● Mr. PELL. Mr. President, today we mark the second anniversary of the heinous murders of the four American churchwomen in El Salvador. The lives of Ita Ford, Maura Clark, Jean Donovan, and Dorothy Kazel, four bright lights who devoted their lives to work for peace and justice for the Salvadoran people, were snuffed out in a barbaric act perpetrated by members of the security forces of El Salvador. Next month we will be remembering Mike Hammer and Mark Pearlman, the two American land reform specialists who were brutally gunned down in the coffee shop of the Sheraton Hotel in San Salvador. To this date we know nothing of the fate of American journalist John Sullivan who very likely met with foul play. The list is getting longer. Now there is the case of Michael Kline, an American traveler who was killed by Salvadoran soldiers.

As we lament and mourn the deaths of the churchwomen we can take solace in the fact that these dedicated women have not died in vain. Their deaths so incensed and aroused the American people that the administration was forced to modify its earlier policy toward El Salvador and to become more responsive to the concerns raised by the policy.

With the murder of the churchwomen as a major factor, the Congress imposed the requirement that the President must certify that the Government of El Salvador is making progress in human rights, in the areas of land reform and the political reform, and in bringing to justice those responsible for the crimes against the Americans.

As we near the third certification which is due at the end of January, we see that five national guardsmen are due to stand trial in the case of the churchwomen. The families of the women are concerned that the trial will not go far enough in determining the true responsibility for this wanton destruction of human life. I, and many of my colleagues, support the families in that belief. We will be taking a close look at this when the Foreign Relations Committee holds its hearing on the certification.

The memory of these four brave women will stand forever as a symbol of hope that someday their work in El Salvador will be vindicated as peace and justice comes finally to that troubled land and its people.●

JEWS AND POLES

● Mr. LEVIN. Mr. President, I bring to my colleagues' attention an article that appeared in the January 2–9, 1982, issue of America titled, "Jews and Poles: A Relationship Reconsidered."

The article describes the past and present relationship between the Jewish and Polish communities. It also takes a look at what those communities in several American cities, including Detroit, Baltimore, Chicago, Milwaukee, and New York, are doing to improve the relationships.

I submit for the RECORD the text of this article.

JEWS AND POLES: A RELATIONSHIP RECONSIDERED

(By Ronald Modras)

In the spring of 1977, before newscasters learned to pronounce "Wojtyla" or "Walesa," when lampooning anything Polish was still socially acceptable, I was invited to serve on the Sentinel Committee, a defense arm of the Polish American Congress organized in Detroit to combat Polish defamation. Educational advancement and upward mobility had rendered Polish-Americans in Detroit particularly sensitive to derisive stereotyping, and a national effort was mobilized to combat it. But almost from the outset, it became clear to me that another problem besides defamation had to be addressed as well.

A book of anti-Polish jokes—the publisher happened to be Jewish. A line of derogatory gag items in novelty stores—the distributor, Jewish. An offensive story last week on a late night talk show—once again, the comedian, Jewish. Exasperated, someone on the committee finally shouted out: "It's a conspiracy. There is a Jewish conspiracy to defame us," "Not at all," I hastened to explain. "There are all kinds of people from a variety of groups engaging in this sort of thing. It's just that there are more Jews in fields like comedy and gag items."

But fears of anti-Polish plots were not so easily dispelled. My colleagues on the committee began naming titles of novels by Jewish authors in which Poles are depicted as altogether unfeeling of Jewish suffering during the German occupation of Poland. NBC's television novel, "Holocaust," was also indicted for comparing Poles to Nazis and showing Polish soldiers executing Jews in the Warsaw ghetto, a complete distortion of history, since no Poles were allowed to wear army uniforms or carry weapons.

It was painfully apparent that words would not be enough to convince them. These Polish-Americans had had little or no contact with Jews and from a distance easily misjudged the Jewish community as monolithic. The two groups had been in virtual noncommunication since coming to this country. There was no doubt but that bridge-building was sorely needed, if misconceptions were to be corrected.

For some 15 years I had been involved in Catholic-Jewish dialogue, was serving on the National Advisory Board for Catholic-Jewish Relations and enjoyed cordial personal and professional relations with several prominent civic and religious leaders in the Detroit Jewish community. Approaching the Jewish Community Council, an umbrella organization of local Jewish agencies and institutions, I suggested that some meetings between representatives of the Jewish and Polish American communities might be mutually beneficial. Surprised at first by the suggestion, the leadership at the council was open to the idea, and a series of meetings was planned for the following autumn, 1977. So began what has developed into a national effort by Polish-American and Jewish-American activists to come to terms with a relationship that goes back almost a thousand years.

A THOUSAND YEARS

Few peoples have histories as intertwined as Jews and Poles. Jewish travelers and merchants were in Poland even before Christian missionaries arrived in the 10th century. When Western Europe expelled Jews as competition for its rising merchant class or sought scapegoats for recurrent plagues, Poland opened its borders to waves of Jewish immigration, welcoming the commercial skills and crafts of Jewish artisans and tradesmen.

In return, Jews enjoyed autonomy, protection and guarantees of civil and religious freedom unequaled in medieval Europe. It is estimated that by 1772, before Poland's frontiers began to recede, four-fifths of the world's Jewish population lived within them. Aside from their original homeland in Israel, Jews trace a longer continuous history in Poland than in any other country.

Selective portrayals of that history have developed, however. Polish authors tend to highlight the golden age when Poland and its Jewish communities flourished. In the late Middle Ages relations were so amicable that Jewish leaders and Polish bishops alike resorted to drastic measures to counteract the high incidence of intermarriage. With no restrictions as to employment or the amount of property they could acquire, Jewish communities built a network of schools and institutions that made Poland the intellectual and cultural nerve center of world Jewry.

On the other hand, Jewish authors tend to reflect popular Jewish consciousness and concentrate on more recent history, on widely perceived anti-Jewish attitudes and behavior of Poles before and during the Nazi occupation of Poland. Jewish hostility toward Poland and its people obviously cannot be generalized, but neither can it be dismissed as occasional. More than anecdotal evidence points to widespread animosity among Jewish-Americans, covering a spectrum from mild distrust to seething anger. "Never turn your back on a Pole," a Jewish child is warned by his grandfather in a work of children's fiction. In some Jewish circles,

anti-Polish attitudes are almost part of the folklore.

A TIME FOR CANDOR

An honest expression of the problems surfaced early on the agenda of the fledgling dialogue. The first encounters were marked by politeness, tact and friendly jokes about chicken soup. As acquaintance turned to trust and the number of interested participants began to grow, the time seemed right to exchange courtesy for candor. A meeting was arranged at Saint Mary's College, Orchard Lake, in suburban Detroit: officers of Jewish and Polish agencies, academicians, priests and professionals, invited to express their true feelings based on whatever might be their subjective perceptions.

Facts can be ignored and conclusions argued, but feelings claim attention. The Jewish participants spoke first:

There is widespread belief in the American Jewish community that Poles were the leading anti-Semites of Europe.

When Jews think of Poland, they think of anti-Semitism. Hitler put the death-camps in Poland because he knew there would be the least opposition to them there.

The next speaker disagreed with the first two statements. Jews do not regard Poles as more anti-Semitic but simply like all the rest of Eastern Europeans in their hostility. Because so many Jews came from Poland, feelings about Polish anti-Semitism are stronger in terms of sheer numbers.

The Poles did little to aid Jews during the Nazi occupation in Poland. Stories circulate of how, instead of helping the Jews during the uprising of the Warsaw ghetto, Poles came to watch and gloat.

After the Jewish participants had expressed their perceptions, it was the Polish Catholics' turn:

Jewish authors often fill their writings with anti-Polish distortions and detraction. They refer, for example, to "Polish concentration camps" instead of "Nazi concentration camps in Poland."

Yes, there were outbursts, of anti-Jewish feeling in Poland, especially between the two world wars. But, after having been wiped off the map for over a century, Poland was struggling for survival, faced with the challenge of consolidating huge numbers of minorities into a single nation. Poland's situation then was not altogether unlike that of Israel today with respect to its Arab population.

Large numbers of Polish Jews did not assimilate, did not learn the Polish language, and even though they had been in Poland for centuries, Jews were perceived as looking down on Polish culture.

Then Maria spoke, softly, somberly. She was the only one in the group who had actually been born in Poland and lived through the German occupation. She told of how she was not quite 6 years old when on the morning after Good Friday her aunt took her to visit the shrines in several Warsaw churches, a Polish custom. In the distance a red glow in the sky reflected a fire several blocks away. "The ghetto is burning," the woman told the girl. "They have started an uprising. We must go and pray for them." A church-like silence hung over the room as Maria explained how the Nazis did not permit the Poles to congregate anywhere, how no one was allowed near the ghetto. No Poles went to watch the Warsaw ghetto burn. They could not gape any more than they could help. But there were those who prayed.

The accuracy of the attitudes and feelings expressed in this early exchange is borne out by a recent article in The New Yorker (11/9/81) by Lawrence Weschler, "A Reporter in Poland." Mr. Weschler relates how time and again he encountered "sheer hatred" of Poland and its people among Jewish-Americans, "cold fury in reminiscences of the anti-Semitism that, it was claimed, prevaded Polish society in the years before and during the war." He quotes a Jewish émigré from Poland: "I hear stories about the lines and the shortages and the hard times in Warsaw, and I wish I could say I feel compassion, but you know what? It couldn't be happening to a more deserving people."

Mr. Weschler's article brings to its readers a salutary corrective to the conventional stereotype of Poles hostile to Jews. He recounts a conversation with a group of young Polish Jews and the insights he received from them regarding the "incredibly complicated" history of the Jews in Poland, one that "certainly can't be reduced to a statement that Poles are anti-Semitic." The story is the familiar one of victims turning on victims.

A BROKEN ALLIANCE

The size alone of the Jewish population in pre-war Poland belies an accusation of indigenous anti-Jewish attitudes. After centures of relative harmony, Jewish and Polish relations deteriorated as their respective fortunes declined. The onset of that decline was 1648, when Cossacks in the Ukraine rose up against colonial domination with a war cry of "Death to Jews, Jesuits and Polish lords." First against invasion and then against the partitions, Poles and Jews struggled together as allies. On returning to Poland from the United States to fight against Russians for Polish independence, Thaddeus Kosciusko wrote: "There is no better evidence that our ideal is holy and just than the fact that the Jews . . . come to us of their own free will, sacrificing their lives . . . if it comes to human rights, they (the Warsaw Jews) do not spare their blood."

The Polish-Jewish alliance featured prominently in a series of heroic but futile uprisings, until the partitioning powers saw it in their own best interests to begin playing off Catholics against Jews. They had Jewish autonomy on their side. It is estimated that only about 10 percent of Poland's three million Jews were committed to some degree of assimilation into Polish culture. At a time when Polish nationalism held on to dream of a resurrected, independent homeland, most Polish Jews were living in self-contained communities, speaking Yiddish instead of Polish. Despite their long tenure, Poland's Jews came to be seen as aliens, especially by those nationalists who identified Polish with Catholic.

When industrial development early in this century brought increasing numbers of Poles from the land into the cities, they found themselves competing with Jews for jobs in traditionally Jewish commercial and professional occupations. Competition arose as well at universities as Jewish and Catholic students vied for the limited number of seats. When Poland achieved independence after World War I, Marshal Jozef Pilsudski envisioned a pluralist federation like the Poland of old. An opposition party of National Democrats, however stood for a national state in which all minorities were either to acculturate and become Polish or forced to emigrate.

In the midst of a world depression, Pilsudski's death in 1935 became the occasion for an outbreak of anti-Jewish rancor in Poland. Jews came under attack by right-wing students, unemployed workers, hungry peasants and common criminals, provoked by the diatribes of nationalist factions. Ghetto benches were set up to segregate Jewish students at universities. Businesses that had been traditionally Jewish were nationalized. Boycotts were incited against Jewish merchants. At the same time it can be noted that there were also Poles who joined with Jews in sympathy demonstrations. Leading Polish professors refused to honor the ghetto benches, and the Polish mayor of Warsaw made a national plea in defense of Jewish rights.

Anti-Jewish outbursts in Poland, especially in this century, can be properly assessed only if viewed within the context of a political-economic upheaval. Under any circumstances and anywhere, anti-Semitism is ugly; in contrast to the situation in Germany, however, the anti-Jewish nationalist movement in Poland never became a majority party and never came to power. Never were Jewish citizens excluded from elected office or Jewish institutions repressed. Never was anti-Jewish violence legal or the Jewish community reduced to a helpless, intimated minority.

Extremist elements suffered a stunning defeat in the elections of 1938, as Jews and Poles banded together again in coalition against the looming threat of German invasion. When it did come, Jews and Poles shared a nightmare that exceeds numerical calculation as much as it defies the descriptive imagination. Poles likewise speak of six million victims of the Nazi terror: three million Jewish and three million non-Jewish citizens of Poland.

No other groups suffered as much at the hands of the Nazis as the Jews and Poles. The holocaust was the culmination of a series of shared tragedies, the foremost but not the only aspect of a strikingly similar fate. There is an almost uncanny quality about the way the two groups have reflected each other. Poles and Jews were each a people without a state until this century, bound together by their respective religion, language and messianic dreams. Polish nationalism and Zionism grew up side by side on the same soil, each imbued with the same reckless romanticism. The coalescence of religion with national identity and aspiration is distinctive of both groups. It is no coincidence that Menachem Begin comes from Poland nor an insignificant factor for understanding the man.

RECONSIDERATIONS

The story of Jews and Poland seemed to have come to a tragic and abrupt end at Auschwitz. The conventional count has been that only 5,000 to 7,000 Jews were left in Poland and these mostly elderly. But the recent change in political climate has raised the claim that there are still tens of thousands of Jews in Poland, young people born after the war who have yet to come to terms with their Jewish identity. In the United States Jewish and Polish Americans generally gravitated to different parts of the country or to different neighborhoods. Contact between the two groups was minimal, though deep-seated feelings remained. But even at this distance, a thousand-year relationship is difficult to dismiss out of hand.

Detroit is only one locale where Jewish and Polish Americans have begun to confront each other. Meetings have taken place in Baltimore, Chicago, Milwaukee and New York as well. Exchanges have led to a varie-

ty of events with modest but promising results.

At the North American Study Center for Polish Affairs in Baltimore, Stanislaw Bask-Mostwin writes and publishes a variety of materials on the history of Polish-Jewish relations. In Chicago, presentations have been jointly sponsored both on the history of Jews in Poland and on the present political-economic situation there. In Milwaukee, Jewish and Polish organizations have cooperated in opposing neo-Nazi activity. The 40th anniversary of the death of Polish Franciscan Maximillian Kolbe in Auschwitz was marked this past August by the Jewish sponsored Center for Holocaust Studies in St. Louis. In Philadelphia, Polish-American businessman and philanthropist Edward Piszek was singularly instrumental in obtaining a valuable collection of Jewish books and manuscripts from the Polish Government and presented them to the Hasidic Lubavitcher community in this country.

On the national level an on-going liaison has existed since 1979 between the Polish American Congress, under its president, Aloysius Mazewski, the Kosciuszko Foundation, under Albert Juszcak and the American Jewish Committee, represented by George Szabad and Harold Gales. The working relationship led this past autumn to a joint tribute to Polish Nobel laureate Czeslaw Milosz, but, more substantially, to joint efforts that the proposed Holocaust Memorial in Washington, D.C., recognize the Polish and other non-Jewish victims of Nazi atrocities as well as Jewish victims.

Besides cooperating in efforts to counteract anti-Polish defamation, the Anti-Defamation League of B'nai B'rith has joined with several Polish-American organizations in co-sponsoring the Janusz Korczak Literary Competition for books for and about children. The award honors the Jewish and Polish patriot, physician, author and educator, Janusz Korczak, who, together with his Polish assistant, Stefania Wilczynska, went to his death in the concentration camp at Treblinka rather than abandon the children to whom he had dedicated his life.

In Poland efforts are being made by a number of artists and students to preserve Jewish cemeteries and synagogues. Cultural ties are being established with Israel, and an agreement has been struck for archival exchange between the University of Warsaw and the Union of American Hebrew Congregations. More pertinent to the future than to the past, Jews have been conspicuously supportive and active in Solidarity and the current political renewal in Poland.

One of the most critical aspects of this reconsidered relationship is the widespread belief among Jewish-Americans that Poles did little or nothing to save Jewish lives during the Nazi occupation of Poland. That perception runs contrary to the fact that an estimated 50,000 to 100,000 Jews survived the genocide perpetrated by the Nazis in Poland, something hardly possible without a creditable record of assistance to Jews by Poles. Several books have been translated into English chronicling Polish efforts to save Jewish lives: *The Samaritans: Heroes of the Holocaust* and *The Blood Shed United Us* by W. Bartoszewski, and *He Who Saves One Life* by K. Iranek-Osmecki. Without detracting from the courage of people like the Danes, the literature points out that, whereas in other Nazi occupied countries to assist a Jew could mean imprisonment, in Poland alone did the Nazis impose an automatic death penalty on anyone who so much as offered a Jew a piece of bread. In Jerusalem, at the memorial to the victims of the Holocaust, Yad Vashem, the State of Israel honors the memory of Gentiles who helped save Jewish lives. No nation has more names honored among the "righteous Gentiles" than Poland. If these facts are not generally known in the United States, Polish-American educators, as much as anyone else, share in the responsibility.

AGENDA

It would be premature to describe these initial encounters and activities as indicative of a new era in Polish-Jewish relations. Serious problems may yet turn promise into illusion. Sensitive and proud, Poles and Polish-Americans understandably prefer to highlight traditional Polish hospitality and minimize anti-Jewish hostility. They will have to acknowledge the occurrence of anti-Semitism in Poland in this century and examine whatever manifestations of it remain in the Polish-American community. Jews likewise will need to acknowledge the anti-Polish animosity that exists in their communities. Though they have been victims of stereotyping more than most other groups, Jewish and Polish Americans may well examine the extent to which they indulge in that exercise themselves. Leaders in both communities will need to confront their own on behalf of the other.

For Polish-Americans that means recognizing that there were Jewish Poles who made significant contributions to Polish history, life and culture. It means taking into account the Jewish authors who are positive about Poland. It means taking cognizance of the fact that popular opinion in Poland today, contrary to the position of the Communist Party, is genuinely sympathetic to Israel.

Pope John Paul II has been appraised of the efforts being made at Polish-Jewish rapprochement and has given them his encouragement. But Polish-American bishops and priests as a whole have yet to become fully aware of the problems or involved in the solutions. Polish church leaders can take a lead from the Pope in working to dispel whatever anti-Jewish sentiment exists in their parishes. Ecumenists and activists in interreligious affairs can encourage dialogue between the Polish and Jewish communities in their area. Given the large numbers and emergence of Polish-Americans in the American Catholic Church, such a dialogue cannot help but have an impact on broader Catholic-Jewish relations.

At a time of tracing genealogies and rediscovering roots, Jewish-Americans of Polish background may well consider whether concern for Israel means forgetting centuries of Jewish life and history in Poland as an unimportant interlude. How much significance should be attributed to the fact that Poland was a haven for the largest, most unrestricted Jewish community in the world? How much moral weight should be given to the efforts of thousands of Polish Christians, many still living, who risked their lives to save Jews from certain death at the hands of the Nazis?

A dialogue seems appropriate not only between community leaders and activists but also scholars and educators. A conference of scholars from both communities could well undertake a study of the history of Polish-Jewish relations. Within a dialogic format, such a cooperative venture could maintain scholarly objectivity while taking into account the differing perceptions and sensitivities of each group.

The Solidarity Movement has awakened a keener awareness in this country of Poland's historic struggle for social justice and individual liberty. The close cooperation between Catholics and Jews in Solidarity may seem notable to us but is in no way remarkable in Poland. "If it comes to human rights, they do not spare their blood," Kosciuszko said of Warsaw's Jews. Catholics and Jews have shared a longer history and collaboration for human rights in Poland than anywhere else in the world. It is a history and an alliance most Jewish and Polish Americans have yet to learn.●

ANTITRUST EXEMPTIONS FOR EXPORT COMMERCE

● Mr. LUGAR. Mr. President, as the recent passage of foreign trade legislation and the GATT Conference reveals, America's businesses and industries, as well as those of her trade partner, are at a crucial stage. Problems of finance, subsidies, and protectionism are not only relevant to large multinational corporations, but also to the small businesses located in all of our communities.

With our increasing need to find common ground with our trade allies and to expand trade opportunities for goods and services, it is important to recall that we have long struggled with finding an equitable and competitive approach to foreign trade. With that struggle now integral to Western cooperation in this era of frequently frustrated expectations and hopes, a historical perspective is in order.

I wish to share with my colleagues a timely examination of the subject authored by Mr. William Dwyer, founder and president of International Export Trading Co. I ask that his article be printed in the RECORD.

The article follows:

ANTITRUST EXEMPTIONS FOR EXPORT COMMERCE

(By William F. Dwyer II)

(The author is completing his law studies at Southwestern University School of Law in Los Angeles. He is president of International Export Trading Co., Inc., a firm he founded on the strength of the statute this article addresses. He also attended the ceremony held at the Port of Long Beach, Cal. on October 8, 1982 when President Reagan signed the bill into law.)

FOREWORD

Congressional authority to regulate "commercial intercourse between nations . . . in all its branches" was constitutionally certified in the early years of the American Republic. It was so held in 1824 in *Gibbons* v. *Ogden* [1] the Supreme Court's landmark "commerce clause" decision.

Once the existence of that power was established, subsequent legislative and judicial attention turned to its proper exercise.

INTRODUCTION

A set of congressional findings which includes that:

(1) although "tens of thousands of small- and medium-sized United States businesses produce exportable goods or services," few actually exports;

Footnotes at end of article.

(2) intermediaries, such as trading companies, "can achieve economies of scale and acquire expertise" enabling these should-be exporters to profit from foreign sales; and

(3) export trading company development in the United States "has been hampered by business attitudes and by government regulations;"

helped secure enactment of a new federal law, the Export Trading Company Act of 1982 (ETCA).[2]

Among its principal provisions is the increased immunity from antitrust suit that the legislation creates for export trade activities. It prohibits the bringing of either a criminal or civil antitrust action (federal or state) "against a person to whom a certificate of review is issued." [3] Essentially, certification provides a "safe harbor" once the Secretary of Commerce declares that an exporter's plans to fix prices, allocate markets, or commit otherwise actionable antitrust violations will not restrain domestic trade.[4]

The legislative intent behind the certification process is to expand the usage and extend the utility of antitrust exemptions for foreign trade that first were made available 65 years ago in the Webb-Pomerene Export Trade Associations Act.[5] Although that Act's attraction for the business community has produced a "poor showing" [6] through the years, it has been the subject of several court opinions. Thus, the propositions for which it stands form some of the strands in the decisional development of American antitrust law.

With that in mind, this article will focus on the judicial history future courts are likely to consult in interpreting ETCA. At its conclusion, the article also will highlight significant sections of ETCA as they affect and amend the body of statutory antitrust law.

BACKGROUND: THE "SHERMAN" SETTING

In 1916, the Federal Trade Commission (FTC) reported that "American manufacturers and producers were disadvantaged in attempting to enter foreign markets." [7] The causes, according to the report, were strong combinations of foreign sales competitors and organized buyers. The report's recommended response was to allow a "more equal footing" with the foreign combinations by permitting American export effort cooperation free from the fear of antitrust prosecution.

Two years later, Congress enacted the recommendation, and the Webb-Pomerene Act became law when President Woodrow Wilson signed it on April 18, 1918. His approval had been virtually assured 20 months earlier in a message to Congress from the White House, asking for "greater freedom of combination to those engaged in promoting the foreign commerce of the country that is now thought by some to be illegal under the terms of the law against monopoly." [8]

At its heart, the law sets forth an exemption from the Sherman Act [9] for "an association entered into for the sole purpose of engaging in export trade and actually engaged solely in such export trade, or an agreement made or act done in the course of export trade by such association. . . ." [10] It requires, however, that a so-called "Webb" association must not: (1) restrain trade within the United States, (2) restrain the export trade of any domestic competitor of the association, or (3) artificially affect domestic prices of the goods it exports.[11]

To gain a fuller feel of what "Webb-Pomerene" fosters calls for at least a cursory review of what "Sherman" forbids. Typically, those business practices which invite federal antitrust prosecution or given rise to civil suits by either the government or private parties involve agreements in restraint of trade or monopolization of commerce.

However, mere monopoly status is not what the Sherman Act condemns. "The offense of monopoly . . . has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power. . . ." [12]

Competitor collaboration, a so-called "horizontal" restraint, presents a potential for "Sherman" scrutiny since excluded competition produces the power to fix prices. "Price and competition are so intimately entwined that any discussion of theory must treat them as one." [13]

SUBSTANTIVE STANDARDS: THE "PHOSPHATE" CASE

It was a charge of price-fixing, as well as business allocation activity, that triggered one of the Supreme Court's reviews of the Webb-Pomerene Act. *United States* v. *Concentrated Phosphate Export Assn. (CPEA)* [14] concerned five chemical fertilizer producers and their sales to the federal government's foreign aid program for shipment to the Republic of Korea. CPEA was a "Webb" association organized and operated by the domestic manufacturers. At trial, the defendant association members stipulated to their having agreed among themselves on selling prices and sales allocation. But, to allegations of combining to restrain trade, the companies answered that the transactions were exports entitled to statutory immunity from the Sherman Act. The district court accepted the answer and dismissed the government's complaint.[15]

A direct appeal to the Supreme Court brought a reversal. The holding drew a clear boundary across the legal landscape to distinguish "domestic" from "export" commerce. The Court decided that Congress did not intend "its exemption to insulate transactions initiated, controlled, and financed by the American Government, just because a foreign government is the nominal 'purchaser'." [16] Examining the "economic reality of the relevant transactions," Justice Marshall's majority opinion found that "American participation was the overwhelming dominant feature . . . [so that] . . . [t]he burden of non-competitive pricing fell, not on any foreign purchaser, but on the American taxpayer." [17] Treating as dispositive the question of whose nationals would bear the brunt of a trade restraint, *CPEA* recalled the Webb-Pomerene Act's legislative history. The opinion quotes both of the Act's authors during congressional debate. Senator Atlee Pomerene (D-Ohio) and Representative Edwin Webb (D-N.C.) had differentiated between privileges each was eager to extend American consumers and doing all that might be necessary to capture world trade for America.[18] Justice Marshall called congressional intent "clear." His opinion said the statute was passed to "increase American exports by depriving foreigners of the benefits of competition among American firms, without in any significant way injuring American consumers." [19]

Since CPEA was decided, it neither has been advanced nor argued that "Webb-Pomerene" stands for any antagonistic propositions. What has been raised, however, is whether if an "association's actions do not restrain trade or affect the price of exported products within the United States and do not restrain the export trade of any domestic competitor of the association," would there be any violation of antitrust laws absent the "Webb" exemption. This question was posed in a footnote to dissenting opinion by Chief Justice Burger (joined by Justices Powell and Rehnquist) in *Pfizer, Inc. v. Government of India.*[20] *(Pfizer* held that foreign governments are "persons" and, if otherwise entitled to sue in U.S. courts, could maintain antitrust actions for treble damages as any other plaintiff might.) The dissenting Justices cited the Webb-Pomerene Act in contending "congressional concern with the foreign commerce of the United States does not entail . . . a desire to protect foreign nations. . . ." [21] One surmises *Pfizer* embodies a bit of footnote fencing inasmuch as the majority opinion included its own which characterized the Webb-Pomerene Act as a "narrow and carefully limited exception for export activity that would otherwise violate the antitrust laws." [22] It invited inspection of the Act to assess "the precisely-limited exception Congress has established to the general applicability of the antitrust laws to foreign commerce." [23]

An earlier Court of Appeals decision recognized such a limitation. It held that the Sherman Act covered conduct beyond American borders when the parties to an agreement intended to affect commerce with the United States and "performance is shown actually to have had some effect" on imports or exports.[24] Still, the broad reach of "foreign" in construing antitrust law applications falls short of embracing commerce between two points both of which are outside the United States if its American aspects do not show "a definite nexus with significant interests of the United States." [25]

PROCEDURAL STANDARDS: THE "ALKALI" CASE

As much as CPEA gives guidance on the substance of the Webb-Pomerene Act, another Supreme Court decision, *United States Alkali Export Assn. v. United States,*[26] provides procedural instruction. The central issue there was whether the Act conferred primary jurisdiction on the FTC to pass on alleged Sherman Act violations by export associations, thereby excluding U.S. District Court jurisdiction in the first instance. Defendants were alkali producers alleged to have conspired to fix prices, prevent competition by independent domestic producers, and restrict domestic production. There was no assertion of any immunized status; the defendants arguing only that the district court was without jurisdiction.

The trial court's denial of the defendant's dismissal motion was upheld by the Court in an opinion that added judicial definition to the role of the FTC vis-a-vis a "Webb" association. *Alkali* noted the statutory requirement that such an association file an information statement with the Commission as a condition to being qualified for antitrust exemption (administration is transferred to the Department of Commerce under the new law).[27] "But while . . . [Congress] . . . empowered the Commission to investigate, recommend and report [on potential antitrust violations], it gave the Commission no authority to make any order or impose any prohibition or restraint, or make any binding adjudication with respect to these violations." [28] The Court put this position in "marked contrast to the Commission's power to issue cease and desist orders" for violations of the Federal Trade Commission Act [29] and the Clayton Act.[30] Holding that the government could institute suit for alleged violations by an export association in

the absence of FTC action, Chief Justice Stone's opinion stated, "the Commission's authority is to investigate and recommend, not to restrain violations of the antitrust laws . . . [and it] . . . may render a useful service in bringing violations to the attention of the Department of Justice. . . ." [31]

IN THE COURTS BELOW

The foreign trade promotion policy that is the essence of the Webb-Pomerene Act was found not to be served in the case of several American firms which formed an export association to jointly manufacture abroad. Their activity prompted the government to seek an injunction against the manufacturers for an alleged combination in restraint of such trade.

In *United States v. Minnesota Mining & Mfg. Co.*,[32] the court held "[i]t is no excuse for the violations of the Sherman Act that supplying foreign customers from foreign factories is . . ., as defendants argue, 'in the interest of American enterprise'." Judge Wyzanski rejected regard for "fatten[ed] profits of certain stockholders. Congress has preferred to protect American competitors, consumers and workmen." The court's conclusion was that had the defendants not joined in foreign factory operation, their "export trade would have been considerably greater. Congress has not said you may choke commerce here if you nourish it there." Replying to the defendants' attempted exculpation under the terms of the Act, the Wyzanski opinion said that using American capital to extend internal trade of a foreign country "is unlikely to extend our foreign trade . . . [e]xport of capital is not export trade." [33] The holding insisted that nothing in the statute, history, or policy "penumbra" had any bearing on the conduct at issue.

A "Webb" association has been ordered dissolved by a district court. Two defendant manufacturers of electrical equipment had formed an export association to carry out cartel agreements to allocate orders, fix prices, and eliminate sales competition. A Sherman Act prosecution was resolved with the entering of a consent decree. Thereafter, the court in *United States v. Electrical Apparatus Export Assn.*[34] enjoined the defendants from further unlawful conduct and required dissolution of their association.

The Act also has been judicially construed as empowering the FTC to exercise its jurisdiction with respect to deceptive trade practices involving foreign commerce. The case stemmed from a cease and desist order directed at the operations of a Chicago "diploma mill." The business owner contested the FTC's jurisdiction, arguing the study materials he furnished students in Latin America were not "objects of commerce." But, the court ruled otherwise. It cited the Act as authority for permitting the FTC to enforce the "prohibition[s] against 'unfair methods of competition' . . . even though . . . done without the territorial jurisdiction of the United States." [35]

AN "UNDERWHELMING" RESPONSE

One might imagine that an instrument as powerful as freedom from federal antitrust actions would have brought the FTC a stampede of exemption applicants. But, that has not been part of American history arising from the Webb-Pomerene Act.

The FTC published a Golden Anniversary review of "Webb" association activity which said "expectations of the . . . act's proponents have not been realized in the past half century." [36] A decade later, on the Act's 60th anniversary, the Commission's staff updated the earlier report.[37] Comparing results of its 1978 survey to the one used as the basis for the earlier report, the FTC staff concluded that the differences between them did "not appear significant." [38] It reported the existence of 27 active "Webb" associations with membership ranging as high as 67 firms in a single association; however, the most frequently-reported membership size was two.[39]

In an earlier era, 1930–35, these export associations "accounted for approximately 19 percent of total U.S. exports," according to a Senate committee report.[40] But, it said that the share "had dipped to less than two percent" by 1979.[41]

The same report attributed "reasons for this poor showing" to:

(1) insufficient "product-market domination to exert foreign market price control and membership discipline;"

(2) traditional American business "top priority on tapping the vast domestic market . . . much slower to focus on the prospects overseas;"

(3) "ever-expanding U.S. service industries . . . excluded from qualifying" (a situation ETCA remedies); and

(4) business community perception of the Justice Department's "exhibiting a thinly-veiled hostility" to the Act.[42]

The Senate committee labeled the fourth and final point as "perhaps most important." [43] Referring to committee hearings on legislative proposals to create export trading companies, the report stated, "[t]his theme arose frequently . . . as several business witnesses and attorneys commented on the difficulty of obtaining definitive antitrust guidance from the Justice Department and on the uncertainty Justice's ambiguity created. . . ." [44]

This timidity of business soul, however, seems to have been prompted more by prospect than performance; a 1981 treatise reported "Justice has prosecuted only six 'Webb' associations." [45]

Still, the prosecution specter cited by those who had testified for the business and legal community gave rise to congressional concern sufficient to cause statutory changes intended to "provid[e] business with a greater degree of certainty." [46]

THE ETCA APPROACH

The new law deals both with the substance and form of antitrust law (a separate section of the legislation permits banks to take part directly in export trading companies). It does so both through the certification procedure and by amending the Sherman Act and the Federal Trade Commission Act.

The recipient of a certificate issued by the Commerce Department, with the concurrence of the Attorney General, [47] receives a limited form of immunity from "the antitrust laws." [48] ETCA gives that description a broad compass by including what is statutorily defined in the Clayton Act and the Federal Trade Commission Act as well as "any State antitrust or unfair competition law."[49]

An applicant for a certificate is required to establish that proposed export conduct will not:

(1) lessen competition nor restrain trade in the U.S. nor substantially restrain the export trade of a competitor;

(2) unreasonably affect prices in the U.S.;

(3) constitute unfair methods of competition against export competitors; and

(4) reasonably result in domestic consumption or resale of goods or services exported from the U.S. [50]

With one exception, the certificate holder who confines conduct to the scope of an approved application is immunized from antitrust actions. The exception allows civil suit for injunctive relief and single (actual) damages by persons "injured as a result of conduct engaged in under a certificate. . . for failure to comply" with the four standards which condition a certificate.[51] However, this proviso is not so menancing as it might appear on its face, since ETCA also contains a presumption of legality for those certified.[52] Furthermore, a prevailing certificate holder can recover the cost of defending such a suit.[53] Of course, if a certificate holder's conduct exceeds the certificate's scope, it is *ultra vires* and subject to the full panoply of criminal and civil sanctions in existing antitrust law. Moreover, a certificate procured by fraud "shall be void *ab initio*." [54]

The certificate-of-review title of ETCA also sets forth procedures for expedited approval (when an export opportunity might be lost by delay), decision notification, reconsideration requests, certificate amendments, and document return.[55] The applicant and other involved parties also are entitled to judicial review of administrative actions.[56]

The second title of ETCA affecting antitrust area directly amends both the Sherman and Federal Trade Commission Acts by confining their scope. Application of these Acts now requires challenged conduct that has a "direct, substantial, and reasonably foreseeable effect" on commerce in the U.S. or the commerce of a U.S. exporter.[57] This new jurisdictional threshold for antitrust enforcement actions, in large measure, codifies the court interpretations previously recited.

SUPPORTER SENTIMENTS

Benefits for a troubled national economy is the motivating theme voiced by many of those who championed this new legislation. Its sponsors also point out the "wide bipartisan support"[58] it enjoyed on its journey through Congress to the White House.

During the bill's final consideration by the U.S. Senate, Senator John Heinz (R-Pa.), who chaired one of the subcommittees responsible for the measure, noted that a Chase Econometrics study had estimated "this bill will create somewhere between 340,000 and 640,000 jobs over the next 3 to 4 years."[59] He also expressed his belief that the antitrust exemption would allow businesses "to join together and compete internationally as trading companies the way the Germans and Japanese have done so successfully."[60]

At Long Beach, Cal. on October 8, 1982, ETCA became effective when President Reagan signed the bill at an outdoor ceremony alongside a giant container ship. The chief executive said his Administration feels "the bill could increase our exports by up to $11 billion in the next 1 to 3 years."[61] The President also referred to the antitrust provisions. He said they reflect a "determination to ensure our business community a fair shake with their [overseas] competitors."[62]

Similar sentiments have been heard from the U.S. Justice Department. Attorney General William French Smith told a lawyers' group of "serious problems caused by the extraterritorial reach of our antitrust laws." He said when their application is "too mechanical. . . [it] . . . fails adequately to take account of our own commercial interests."[63]

CONCLUSION

A disposition to cabin antitrust sanctions so that anticompetitive behavior is legally cognizable only when it affects domestic commerce is not new in America. It is older, in fact, than the Webb-Pomerene Act. Justice Holmes wrote of it in 1909 in a majority opinion for the Court's erection of a "water's edge" boundary for antitrust law:

[T]he general and almost universal rule is that the character of an act as lawful or unlawful must be determined wholly by the law of the country where the act is done. . . . For another jurisdiction, if it should happen to lay hold of the actor, to treat him according to its notions rather than those of the place where he did the acts, not only would be unjust, but would be an interference with the authority of another sovereign, contrary to the comity of nations which the other state concerned justly might resent.[64]

KORCZAK ZIOLKOWSKI

● Mr. LEVIN. Mr. President, on October 20, 1982, a monumental American, Korczak Ziolkowski, died in his beloved South Dakota. He was one of those rare people who changed the face of the planet and touched the souls of its inhabitants.

For over 35 years, he blasted away at a mountain to turn it into a monument to Chief Crazy Horse, based on his belief that native American heroes should be memorialized with the same grandeur and in the same spirit as later arriving heroes, such as those chiseled in the stone of Mount Rushmore.

Korczak worked on Mount Rushmore and was already a famous and accomplished sculptor when he decided, upon his return from World War II, to devote his life to transforming Thunderhead Mountain in South Dakota into a monument to Chief Crazy Horse. For 3½ decades, he blasted away millions of tons on the mountain, much of that time working alone. Supporting him below and later on the mountain itself were his extraordinary wife, Ruth, and 10 children, Marinka, Monique, Joel, Mark, Anne, Casimir, Jadwiga, Adam, Dawn, and John. They are determined to complete his work as planned.

A number of years ago, I became fascinated with this wonderful man and came to know him, Ruth, and the children. I urged the U.S. Postal Service to issue a stamp in Crazy Horse's memory so that we could honor both the subject and the sculptor of the Crazy Horse Monument. The Postal Service and the country came through and, on September 6, 1981, we unveiled the design of the permanent 13-cent Crazy Horse stamp at Korczak's Crazy Horse Museum next to his home and looking out on his life's work.

My remarks at that time reflect my feelings about Korczak as well as Crazy Horse and I repeat them now as part of this farewell to Korczak.

America is proud of a native son today. The legacy of Crazy Horse and the Native American heroes he symbolizes will be shared by millions as a result of the stamp and the design we unveil today.

As important as is the Crazy Horse legacy, a dual purpose prompted me to suggest that the Postal Service print this stamp.

The second purpose is the legacy of Korczak Ziolkowski. Oh, I know the rules of the Postal Service and they are right. And I know Korczak's rule—it is Crazy Horse that should be honored, not Korczak's monument to Crazy Horse.

But I know my own feelings, too, and I hope Korczak will understand.

Perhaps never before (and perhaps never again) has there been such a physical and spiritual commitment of artist to subject. So while this stamp will memorialize Crazy Horse, it was inspired by Korczak's monument to Crazy Horse and by the spirituality of Korczak's mountain.

Imbued in that mountain is love and respect and redemption and celebration and proportion and wisdom.

We are ennobled by Crazy Horse's life and Korczak's transcendent vision of it.

We are better people because we remember Crazy Horse today and because Korczak remembered him all these years.

And to Ruth and the family, who have made so much possible, and to Korczak's and Ruth's extraordinary circle of friends: your devotion to Korczak and his ideals is one of the noblest chapters in the story of how a God-like mountain has emerged to watch over this place.

The stamp itself was issued at Crazy Horse in the Black Hills on January 15, 1982. I wrote a poem for the occasion with which I would like to close this tribute.

POEM

The transcendent promise of America both
to her native people and to newcomers,
That we can be one with each other and
with the land
Is being redeemed on Crazy Horse Mountain.
That mountain's sculptor, Korczak, has received two gifts from God,
Creative power and an enduring devotion to
the ideal of brotherhood.
Korczak's gift in return is to we mortals and
to immortality.
The mountain on whose crest a great chief
slowly wakes.
Was lonely witness to the marriage of the
Spirits of Crazy Horse and Korczak,
While Korczak's wife and children brought
succor and in late epochs
Shared in the dynamite's blast.
With each blast's roar we are redeemed.
With each blast's song we are uplifted.
With each blast's hymn the Godlike mountain emerges and our spirits soar.
With each blast, Crazy Horse Mountain,
Korczak's mountain, looks more like it
was envisioned to be,
When, a lifetime ago, Korczak said yes.
Now, a lifetime hence his unstilled yes
Transforms his mountain and our souls.●

SENATOR ERVIN ARGUES RESTORING OF LIMITED GOVERNMENT

● Mr. EAST. Mr. President, the December issue of the American Bar Association Journal features an important article by one of our former colleagues, the Honorable Sam J. Ervin, Jr., that I want to call to the attention of Senators. A principled and informed critic of our "Imperial Judiciary," Senator Ervin argues persuasively that it is incumbent upon the Members of Congress to exercise their constitutional responsibilities under our check and balance system and restore limited government. As Senator Ervin correctly observes, "The constitutional power

of Congress to define, limit, or curtail the jurisdiction of these courts is in reality the only means in the Constitution whereby activist Supreme Court justices can be denied the autocratic power to make themselves America's supreme dictators."

Mr. President, I urge my colleagues to read this cogent article by Senator Ervin and ask that it be printed in the RECORD.

THE CONSTITUTIONAL POWER OF CONGRESS OVER FEDERAL COURTS

The provisions of Articles I and III of the United States Constitution clearly reveal that Congress has the legislative power to define, limit, or curtail the appellate jurisdiction of the Supreme Court and the jurisdiction of the federal courts inferior to it.

The Constitution is the most precious instrument of government ever devised by the experience and wisdom of man. The Founding Fathers drafted and ratified it to secure to Americans the power of self-rule and freedom from governmental tyranny, whether legislative, executive, or judicial.

They realized, however, that men are fallible beings and that none of them can be safely trusted with unlimited power. To this end, they vested in the Supreme Court the power to interpret the Constitution and thereby gave it the power to confine Congress, the president, and the states to their allotted constitutional spheres.

They undertook to make Supreme Court justices faithful to the Constitution by making it the supreme law of the land and by requiring them as well as all other federal and state officers to be "bound by oath or affirmation to support it." They also undertook to make Supreme Court justices independent of all things on earth except the Constitution itself by decreeing in Article III, Section 1, that "the judges, both of the supreme and inferior courts, shall hold their offices during good behavior, and shall, at stated times, receive for their services a compensation which shall not be diminished during their continuance in office."

Notwithstanding these provisions, two members of the Constitutional Convention of 1787, Elbridge Gerry of Massachusetts and George Mason of Virginia, opposed ratification of the Constitution by the states because it contained no provision sufficient to compel activist Supreme Court justices to obey their oaths or affirmations to support the Constitution or to prevent them from substituting their personal notions for constitutional precepts, while pretending to interpret it.

I do not favor Congress's limiting the jurisdiction of federal courts to adjudicate cases in which they have manifested their devotion to the Constitution. I nevertheless rejoice because the Founding Fathers reposed in Congress the power to define, limit, or curtail the appellate jurisdiction of the Supreme Court and the jurisdiction of the federal courts inferior to it. The reason for my rejoicing is simple. I abhor judicial usurpation and deem tyranny on the bench as reprehensible as tyranny on the throne. The constitutional power of Congress to define, limit, or curtail the jurisdiction of these courts is in reality the only means in the Constitution whereby activist Supreme Court justices can be denied the autocratic power to make themselves America's supreme dictators.

Judicial activists are judges who interpret the Constitution to mean what it would have said if they, instead of the Founding Fathers, had written it. The moral inhibition of their oaths or affirmations to support the Constitution has not sufficed to restrain them. Life tenure and undiminishable compensation do not render them immune to the temptation to make themselves independent of the Constitution.

Alexander Hamilton asserts in the Federalist No.79 that Supreme Court justices "are liable to be impeached for mal-conduct" by Congress and declares in the Federalist No. 81 that "this is alone a complete security" against judicial activism. I express no opinion respecting the validity of Hamilton's view that judicial activism constitutes an impeachable offense. It is to be noted, however, that this possibility, if it exists, has had no deterrent effect on judicial activism. Moreover, impeachment is a cumbersome process and cannot be made effective without the concurrence of two thirds of the members of the Senate.

The constitutional power of Congress to define, limit, or curtail the appellate jurisdiction of the Supreme Court and the jurisdiction of the federal courts inferior to it is exercisable, however, by a bare majority of the houses of Congress. Members of Congress who revere the Constitution are likely to demand that this power be exercised with frequency in the future if activist Supreme Court justices do not stop substituting their personal notions for constitutional precepts, while pretending to interpret the Constitution.

The tragic truth is that judicial activism has run riot among Supreme Court justices during recent years. They have belittled the role of the states in the federal system of government ordained by the Constitution. They have ignored the fact that society and the victims of crime are as much entitled to justice as the accused, and in consequence have impaired the capacity of federal and state courts to protect the people from criminals. They have nullified basic principles of the Constitution and substituted their personal notions for them in cases having racial overtones. And they have arrogated to themselves the autocratic power to prescribe qualifications for voting in elections and to supervise these elections in defiance of provisions of the Constitution that expressly deny them and the federal government this power.

It is high time for activist Supreme Court justices to realize that the Constitution of the United States belongs to the people of America and not to them, and that their supreme obligations to our country is to obey their oaths or affirmations to support the most precious instrument of government ever devised by human experience and wisdom.

—Sam J. Ervin, Jr.●

FAST REACTORS ON SLOW TRACK

● Mr. HUMPHREY. Mr. President, one of the key arguments now being used by the backers of the Clinch River breeder reactor project is that we must build this plant if we are to stay in the international breeder reactor sweepstakes. What this presumes, of course, it that there truly is a major race effort to produce a commercially viable breeder and that it is moving so fast that building Clinch River is our best chance to stay in contention.

The following detailed article by David Dickson of Science suggests that this line of reasoning is in fundamental error, that the race abroad has slowed to a crawl, and that, indeed, in the case of the French program, it may well be the military that will have to pull their effort's financial coals out of the fire.

This article is the most recent and detailed description of European efforts in the breeder field and puts our own breeder effort into perspective. I ask that the entire text be printed into the RECORD.

The article follows:

[From Science, Dec. 10, 1982]

EUROPE'S FAST BREEDERS MOVE TO A SLOW TRACK

(By David Dickson)

PARIS.—Europe's enthusiasm for fast breeder nuclear reactors is rapidly running out of steam, faced with increased costs, decreased projections of electricity needs, and across-the-board delays in the construction of conventional light water reactors on which a commercially viable fast breeder program would depend.

In both Britain and West Germany there is now serious talk, if not of abandoning fast breeder development completely, at least of putting a freeze on expansion plans until future needs can be perceived more clearly. Nigel Lawson, Britain's minister of energy, told Parliament on 29 November that the British government remains committed to the long-term development of fast breeder reactors, but that commercial orders for fast reactors are not expected until after the year 2000.

In France, President François Mitterrand has not so far invoked his preelection call for a temporary halt in the construction of France's technological jewel, the Super-Phénix fast breeder reactor at Creys-Malville in the Rhône valley. This has stimulated concern that pressure to retain the breeder may be coming from the French military, attracted by the high-grade plutonium that will become available from the reactor blanket (see box). However, the government announced earlier this year that it was reducing its future commitment from five to one more fast reactor after Super-Phénix, and there are doubts about whether it will decide to go even this far, at least without considerably more international support.

It is all very different from the heady enthusiasm that existed up to the end of the 1970's. Even 2 years ago, at the time of the International Nuclear Fuel Cycle Evaluation (INFCE) studies, the talk was of having 50 gigawatts of breeder reactor capacity worldwide by the year 2000. Today, many economists claim breeders will not be competitive with light water reactors for the next 50 years. Even the more optimistic, such as Georges Vendreyes, head of industrial applications of nuclear energy at France's Commissariat à l'Energie Atomique (CEA), admit that breeders are not likely to become commercially attractive until the beginning of the next century.

Confidence in the technical potential of fast breeders as an eventual important energy source remains high, particularly in countries that lack access to domestic energy resources and are reluctant to accept the implications of heavy dependence on foreign supplies of uranium.

Political enthusiasm, however, has cooled, for the OPEC-inspired oil price rises have

provoked a steady decline in the rate of growth of electricity demand. This, combined with licensing restrictions imposed by public concern about safety, has caused delays in conventional nuclear programs to such an extent that the date at which they would be able to sustain a viable fast breeder program, based on reprocessed light water reactor spent fuel, is receding further and further into the distance.

Furthermore, the resultant decreased demand for natural uranium is making it increasingly difficult to argue that fast breeders are urgently needed to compensate for an imminent evaporation of uranium supplies. "There now seems to be enough uranium at least until the first decade of the next century, so that the need for the breeder from the supply side is rapidly diminishing," says one analyst with the nuclear energy agency in Paris. "The long-term need for the breeder is still there; but compared to the thinking at the time of INFCE, the prospects have been put back by 20 to 30 years."

The changed economic and political climate has affected European countries in different ways, depending on the stage of their breeder programs. France, still out at the head of the pack with the world's first commercial fast breeder, the 1200-megawatt sodium-cooled Super-Phénix, is in an easier position than some. Completion of Super-Phénix is currently scheduled for 1984, and no decisions about the next step (currently thought of as Super-Phénix II) need be made until at least 1 or 2 years later.

When it comes, however, the decision will not be easy. Until recently, the future of fast breeders in France seemed well assured. The prototype Phénix, a 250-megawatt reactor, has been providing power for the French utility Electricité de France (EDF) since 1973, and most of the technical questions about fast breeder operations seem to have been solved. Furthermore, French politicians have proudly displayed fast breeders as one technology in which the country is well ahead of its international competitors.

Various factors, however, have dampened some of the enthusiasm. After 8 years of "working like clockwork," in the words of Vendreyes, Phénix sprang a leak in April of this year in its cooling system, leading to a fire when the sodium came in contact with the air. The accident put the reactor out of operation for several weeks and stimulated a debate about fast breeder safety.

Furthermore, the cost of Super-Phénix, jointly financed with German and Italian partners, has been rising alarmingly. Estimated 5 years ago to cost 4 billion francs ($550 million at current exchange rates), the latest estimate is that it will cost about 12 billion francs ($1.7 billion). Even allowing for the first-time costs of a new enginering enterprise, this means that a commercial fast breeder based on the Super-Phénix design would cost about twice as much as a conventional light water reactor of the same size.

A third factor, perhaps even less predictable, is politics. During his election campaign in 1980, Mitterand's apparently skeptical stance toward fast breeders helped him secure support not merely from the environmental movement—to whom the whole idea of a plutonium economy remains a can of worms—but also from members of the powerful union the Confédération Française Démocratique de Travailleurs, which has been waging various well-publicized campaigns around nuclear safety issues, such as the safety of working conditions for its members at the La Hague reprocessing plant.

Since his election, Mitterrand has backpedaled on his previous criticisms of the nuclear industry, well aware that for other sectors of the labor movement, it represents an important source of jobs. Work on Super-Phénix has continued virtually uninterrupted; last year, for example, Prime Minister Pierre Mauroy underlined the government commitment to fast breeders by announcing plans to expand La Hague with a facility to produce plutonium for Super-Phénix.

By announcing that no political decision will be made about the future of the French fast breeder program until operating experience has been gained with the Super-Phénix, Mitterrand has been able to keep the lid on what could become a damaging political conflict between different groups of his supporters. But, fueled on the one hand by unfavorable economic conditions and on the other by concerns that breeders could become a principal source of plutonium for France's force de frappe, the tensions are not far beneath the surface.

The situation is more delicate in Germany, which is still struggling to complete construction of its own prototype reactor, the 300-megawatt sodium-cooled test reactor SNR-300 at Kalkar, which started in 1973. This is being built by the consortium Schnell-Brüter-Kernkraftwerksgesellschaft (SBK), headed by Germany's largest utility Rheinisch - Westfalisches - Elektrivitätswerk (RWE). Belgium and the Netherlands are each contributing 15 percent of the cost and Britain's Central Electricity Generating Board 2 percent. Of the German share, electric utilities agreed to absorb 8 percent of the construction costs, the rest being covered by the federal government.

When originally planned, Kalkar was expected to be ready by 1978. It now looks as if completion will not be until at least 1986; and if the German government is unable or unwilling to raise the necessary finance, either from its own resources or from utility and nuclear construction companies, final completion could still be postponed indefinitely.

Various factors have contributed to the delay. For example, the reactor has had to go through a lengthy and detailed series of licensing procedures, which themselves have become increasingly more strict in response to growing public concerns about the safety of nuclear power. In addition, there have been various design changes, some the result of new licensing requirements, others of miscalculations in the original plans.

Each of these factors has helped increase the costs. At the beginning of the 1970's, it was estimated that Kalkar would cost 1.355 billion marks ($550 million at current exchange rates), but this projection rose steadily during the decade. In February 1981 new estimates were made public that the completion of Kalkar would cost 5 billion marks. A lengthy series of negotiations followed, during which the utilities and the nuclear industry agreed to share the extra costs with the government—but only provided that the federal parliament give the full project its approval.

This goal was almost reached earlier this fall. After 3 years of discussions, a special parliamentary commission of inquiry agreed by a narrow majority to recommend to the parliament that the construction of Kalkar should be completed and the reactor be allowed to start operation. A parliamentary debate now scheduled for 3 December had been expected to endorse the commission's recommendations with little difficulty.

Since then, two separate events have raised new doubts. With the change of government in September, the Social Democrats have closed ranks with the critics. On 24 November, the party agreed to endorse the resolution being put before parliament stating that a number of important economic and safety questions still need to be answered before Kalkar is given final approval. To some observers in Bonn, the most significant aspect of this move is that it represents the breakup of the previous all-party coalition on which support for the fast breeder has depended.

Given the extent of both public and private investments, as well as the number of construction jobs at stake, parliamentary criticism in itself is unlikely to be sufficient to halt SNR-300. However, in September, it was announced that the costs had once again been recalculated and that they were now expected to be at least 6.5 billion marks ($2.6 billion). Germany's research and technology minister, Heinz Riesenhüber, was reported last week to have written to the federation of German industrialists saying that the Bonn government does not intend to increase its contributions either to Kalkar or to another controversial nuclear project, the high temperature reactor, which has also encountered major financial problems.

Industrial sponsors of the project remain, at least in public, optimistic that the money will be found somewhere. Critics of the fast breeder, however, suggest that the new cost increases may prove to be the final death blow.

All this casts even more doubt on what was to have been the next stage in Germany's fast breeder program, the construction of a demonstration commercial reactor known as SNR-2. Roughly comparable in size to Super-Phénix, this is officially planned to be jointly financed with French and Italian participants, and the final design has been virtually completed. Even the most optimistic supporters of fast breeders in Germany, however, accept that construction is unlikely to start before the end of the 1980's—"This time, we plan to get the construction license granted before we start building," says one official—and many will not be surprised if, even if Kalkar is completed, SNR-2 is put on the shelf for many years.

In Italy, doubts about current plans for fast breeder development have not taken such a public form. Italy has recently made a substantial increase in its support for all forms of energy research—including fast breeders, which now consume 39 percent of the nation's energy R & D budget—as part of its response to the energy crises of the late 1970's. However, most of Italy's support for fast breeders is going into Super-Phénix. It has agreed with France to shoulder 33 percent of the construction costs (and as a result has received orders for about one-third of the components, and will receive the same proportion of the electricity when it is produced).

Domestically, the delays in Italy's conventional nuclear program—only one full size nuclear reactor has so far been built with one more under construction—means that discussion about the need for commercial fast breeders is not even expected to begin until the mid-1990's. The most Italy is aiming for at present is to keep up with the state of the art through its contribution to Super-Phénix and the construction of its own 120-megawatt experimental fast reactor PEC (Prova Elementi Combustibili), designed to develop Italy's domestic nuclear

capabilities and to study various aspects of fast reactor functioning.

Even this, however, is running into economic problems. Earlier this year, faced with the calculations that, rather than the 650 billion lire ($450 million at current exchange rates) estimated in 1980, PEC was now likely to cost 1400 billion lire ($950 million), the Italian government asked its Comission on Economic Planning to carry out an investigation of the project to determine whether it should still be supported. The commission appointed an advisory panel from the Comitato Nazionale per l'Energia Nucleare e Energie Alternativa (CNENEA), which gave the project a green light on technical grounds, and at the beginning of last week the commission itself approved the project. Officials from the CNENEA estimate that, once allowance is made for inflation, the real cost increase is only about 15 percent. Given a more stable political and economic environment, construction would probably proceed without interruption; but with the current political crisis in Italy, together with growing demands from the international banking community for broad cuts in public spending, the future of the project it still highly uncertain.

Similar uncertainty, though based on different reasons, exists in Britain. Up to now, the United Kingdom has been at the forefront of fast breeder research, with its 250-megawatt reactor in commercial operation at Dounreay in the north of Scotland since 1975, and a current research and development program costing about 110 million pounds ($136 million) a year. Britain is also working on a design for a 1300-megawatt commercial demonstration fast reactor.

In practical terms, the British government is now faced with the question of what to do next. Some observers feel that, faced with the recent weakening of economic arguments in favor of fast breeders, the answer is likely to be "wait and see." The British Conservative government faces the political challenge of bringing to fruition a program to construct ten light water reactors announced by Prime Minister Margaret Thatcher, the first of which, at Sizewell in Suffolk, is due to become the subject of a public inquiry in January. In the circumstances, an earlier government promise of an inquiry into the commercial development of fast breeders now seems a distant prospect.

Certainly, the fast breeder does not lack enthusiastic supporters in Britain (or elsewhere in Europe, for that matter), such as Walter Marshall, until recently head of the United Kingdom Atomic Energy Authority. The main British utility, the Central Electricity Generating Board (which Marshall now heads), however, basing its assessment on economic rather than technical arguments, has always been less enthusiastic. For example, it turned down an invitation to contribute toward the cost of the UKAE-A financed fast breeder at Dounreay, which according to estimates by Colin Sweet of the South Bank Polytechnic in London, has a spotty operating record, reaching only 6.8 percent capacity over its first 8 years of operation.

Britain's medium-term plans for the fast breeder are currently being thrashed out in the U.K. Department of Energy. As noted earlier, substantial investment is likely to be delayed for the next 20 years.

Given the cost escalation, almost all countries agree that there is a strong case—again in principle—for the next step toward a commercial demonstration fast reactor to be taken internationally. The French, for example, have long said that they would welcome more foreign partners in the development of Super-Phenix II, a topic which is said to have been the subject of recent negotiations both the American (a possible substitute for the Clinch River liquid metal fast breeder?) and with Japan.

Again, however, the hurdles to international collaboration are high, ranging from security and legal concern about the control of plutonium, to the equitable distribution of construction contracts. Furthermore, any effort to mount an international project is seen by some critics as an attempt by nuclear supporters to evade domestic criticism. "It looks as if the breeder people are going for another Concorde syndrome, so that if they get an international treaty, it will be impossible to cancel it," says Walter Patterson of Britain's Friends of the Earth.

At the time of the INFCE studies, any decision not to proceed with a commercial program of fast breeder reactors was portrayed as a major political gamble. Today the technology has lost its imperative. As a result, proceeding with the rapid development of fast breeders, given demand uncertainties and the apparent medium-term adequacy of uranium supplies, is coming to be seen in Europe as an economic and political gamble whose outcome is unpredictable—and perhaps equally risky.

BREEDERS AND BOMBS

Questions were raised in the West German Federal Parliament, the Bundestag, last week about whether German funds are being used to help produce plutonium for French nuclear weapons. The questions were prompted by an article in the weekly magazine *Der Spiegel*, which claimed that the Super-Phénix sodium-cooled fast breeder reactor is intended to produce plutonium for the French military, and that customers of the German utility that is providing 16 percent of the funding for Super-Phénix were therefore unwittingly helping to finance the planned buildup of France's nuclear forces.

The questions were quickly dismissed by both the German and the French governments, which pointed out that the whole Super-Phénix project is being overseen by Euratom, and that this should be sufficient to ensure safeguards against the diversion of civilian plutonium to military purposes. But the incident reflects the type of political difficulty that could arise over multilateral cooperation in fast breeder research and development—difficulties that the United States has already encountered in its own nuclear cooperation agreements, most recently in its effort, though the Nuclear Nonproliferation Act, to keep a handle on the plutonium contained in the light water reactor fuel sold to other nations.

The attraction of the fast breeder, from the military point of view, is the high purity of the plutonium that can be extracted from the uranium oxide blanket after it has been bombarded with fast neutrons from the reactor core. One visitor to the United Kingdom's Atomic Energy Authority's fast breeder at Dounreay was told that the purity was as high as 98 percent. There are several cheaper and more convenient ways of producing weapons-grade plutonium; but if fast breeders are built, the temptation to the military to make use of the plutonium in the blanket will be strong.

France has never admitted that it intends to do this. Indeed, at present it has plenty of plutonium from its own military reactors. However, a veil of secrecy is generally drawn over where the country will get the plutonium it needs to fulfill future commitments to building new weapons. Nuclear critics claim they can discern from a few public statements made by those close to the military program a logic that points toward the fast breeder.

In 1973, for example, a report on the military applications of nuclear energy prepared by the Commissariat à l'Energie Atomique (CEA) recommended that the production of military nuclear material should take "advantage . . . of civilian programs . . . in order to limit the costs." In 1978 General Jean Thiry, previously director of France's military centers for nuclear testing, and subsequently an adviser to the head of the CEA, wrote that France was able to make large quantities of nuclear bombs "since fast breeders will provide ample supplies of the necessary plutonium." Most recently, an article in a weekly newsletter L'Energie stated boldly that the future supply of weapons-grade plutonium, currently produced by the aging reactor G-3 in Marcoule, was "assured" by Super-Phénix which would produce enough high quality plutonium to fuel 60 atomic bombs a year. "Super-Phénix is obviously becoming the technical base of the French force de frappe," the author, L. Lammers, an economist with Electricité de France, declared. To some critics, the message is clear. Given the declining economic interest in fast breeders as a source of electric power, they ask, what is the explanation for continued political enthusiasm? "The answer is succinct: the military needs breeders," wrote Yves Lenoire and Michel Genestout in the October issue of the popular French magazine Science et Vie, the source of Der Spiegel's broadside against West German involvement in Super-Phénix. So far, the French authorities have kept a discrete silence on the issue, other than pointing out that although it is not a signatory of the nonproliferation treaty, France is voluntarily obeying International Atomic Energy Authority safeguards on its civilian nuclear installations.

Whether the complaints are, in themselves, sufficient to deter the French, who take strong nationalistic pride in their ability to determine their own nuclear future, from moving in this direction is open to speculation.●

TAIWAN'S AIR DEFENSE NEEDS

(By request of Mr. BAKER, the following statement was ordered to be printed in the RECORD:)

● Mr. GOLDWATER. Mr. President, the debate over United States arms sales to the Republic of China on Taiwan has too often ignored the basic issue: What kinds of arms will give the greatest assurance of the survival of Taiwan as an independent, sovereign political entity? Instead the debate is misdirected to discussions of Communist China's supposed peaceful intentions toward reunification.

The fact is that a real threat to Taiwan's security exists. Communist China possesses massive military force relative to Taiwan. It may use this force to resolve the Taiwan issue, if it is able to do so at an acceptable cost.

Our task, and our commitment, set forth in the Taiwan Relations Act, is

to help Taiwan preserve an adequate defense system, one that will make the use of force by Peking too expensive to employ.

The question of how to achieve this goal is discussed by Col. Angus M. Fraser in the fall 1982 issue of Strategic Review. Colonel Fraser is a recognized authority on Asian affairs, having served 30 years in the U.S. Marine Corps with assignments in the Pacific.

His article argues that the United States must make a realistic assessment of Communist China's capabilities-in-being. He points out that the critical element in any hostilities in the Taiwan Strait is control of the vital airspace over the area.

The numbers are heavily on the Communist side. Peking's inventory of high performance aircraft exceeds 4,000 to 5,000. Taiwan has fewer than 400 fighters.

Because of this numerical imbalance, Colonel Fraser contends that what Taiwan needs "is an air defense package of aircraft, anti-aircraft weapons and electronic gear that will render a major surprise attack from the mainland too risky and too difficult." In contrast, the recently signed joint communique between the United States and Red China is premised on the weak assumption of benign Communist intentions.

In order to focus debate where it should be placed, on Communist capabilities, I ask that Colonel Fraser's paper appear in the RECORD.

The article follows:

WHAT KINDS OF ARMS FOR TAIWAN?

(Col. Angus M. Fraser, USMC (Ret.))

A purposeful ambiguity informs much of the record of U.S. policy and behavior in the relationship with the People's Republic of China since the Shanghai Communique of February 28, 1972. This contrasts with the clear intent stated in the Taiwan Relations Act of January 1, 1979, which asserts that "The U.S. decision to establish diplomatic relations with the People's Republic of China rests on the expectation that the future of Taiwan will be determined by peaceful means." The Act also affirms the U.S. policy "to maintain the capacity to resist any resort to force or other forms of coercion that would jeopardize the security of the social or economic system of the people of Taiwan." This statement follows the simple avowal that it is American policy "to provide Taiwan with arms of a defensive character."

Under the law, the determination of what is to be furnished to the Republic of China is made by the President under certain legislative constraints and then sent to the Congress for concurrence or rejection. The White House has recently forwarded a proposal for selling the ROC some $60 million in parts and supplies. Earlier, a request for new high-performance aircraft had been refused on the grounds that they were not necessary for the defense of Taiwan.

THE CURRENT IMPASSE

Beijing does not accept what it sees as an affront to its sovereignty in U.S. efforts to have the PRC abjure the use of force in resolving the Taiwan question. It has not disavowed the possibility of the use of forceful means, nor could it be expected to. At the same time, Beijing insists that American arms for Taipei must be reduced now and eventually halted. This situation clouds all other aspects of the Sino-American relationship.

Both Chinese sides agree that there is one China, of which Taiwan is a part. Beijing no longer talks of "liberating" the people of Taiwan; rather, the two sides are to be reunited. But let us try to be vicarious with the PRC leadership: what sort of Taiwan would they like to absorb? One can easily imagine some quick answers to this question. For one thing, damage to the people on Taiwan should be as minimal as possible: they are, after all, brothers, and in addition possess knowledge and skills of great value to China's ambitions of modernization. For similar reasons, the advanced industrial infrastructure of the island should be preserved to the extent possible in order to be harnessed to the greater good of Greater China. Old grievances should be forgone—or at least not heightened—to allow as harmonious an integration as practicable. If these are the ideal objectives, but if unification by force were still to be necessary, what sort of military action would best serve those goals?

There are those who contend that the Chinese Communist leaders no longer look at Taiwan through such military binoculars—for one thing because the sheer physical-military problems entailed in an invasion are seen as too prohibitive. It is also held in some quarters that Beijing will stay its hand in deference to world opinion and/or the reactions of other powers. Indeed, the prospects for calm in the Taiwan Strait can be adjudged as reasonably good at the moment. Nevertheless, it would be dangerous for the United States to turn its back to the problem of Taiwan's security completely on such wistful assumptions and expectations.

The underlying purpose of both Chinese sides is the final resolution of a civil war that has persisted in some form since 1927. We must constantly bear in mind the historical record—the fact that the Chinese Communist Party has resorted to arms for much less compelling reasons. A roll call of some of Beijing's military ventures since 1949 is instructive: Kinmen, Hainan, Korea, Taiwan Strait (twice), India, Paracels and Vietnam—not to speak of the subjugation of Tibet and the clashes along the borders with the USSR. In all these cases Beijing opted for military force to maintain territorial principles, moving into territory held by its opponent as deemed necessary to support its basic claims.

The ability of the Republic of China to defend herself militarily, and the role of the United States in maintaining that ability, have become major hubs of controversy in Washington. The political and ideological strains in that controversy are not the subject of this discussion, except to note that these strains are both substantial and time-honored and that decisions to provide the materials of war are seldom taken in consideration of military factors alone.

In any event, the Chinese Communist input into that debate is rising. Beijing is consistent, vocal and adamant in its determination to stop the flow of U.S. military equipment to Taiwan. The vigor of this attack on U.S policy and actions is paying off in ever wider U.S. press coverage of the Chinese position. Thus, for example, in August 1982 the Washington Post reported a story in Beijing's official newspaper that derided American foreign policy in several cases outside the Sino-American context, but saved its strongest language for the issue of arms to Taiwan.

On August 17 the United States and China released a communique in which Washington denied any intention of infringing on Chinese sovereignty or territorial integrity, or interfering in China's internal affairs. The Chinese policy of striving for a peaceful solution of the "Taiwan problem" was cited approvingly. The United States, it declared, does not seek to carry out a long-term policy of arms sales to Taiwan. Sales to Taiwan will not, it said, exceed, either in qualitative or in quantitative terms, the level of those supplied in recent years since the establishment of diplomatic relations between Washington and Beijing. Presumably the F5E aircraft now being produced under license in Taiwan would fall under those ceilings: Taiwan is to produce 248 F5Es by 1983.

In essence, the communique ties the ultimate solution to peaceful negotiations toward that end. Gradual reduction in arms supplied to Taiwan will accompany progress toward a peaceful reunion. The numerous and bitter attacks on the American attempt to link reduction in arms sales to peaceful settlement of the issue suggest that the Chinese leadership is far from content with the American vision of the future.

Vice President Bush, during a visit to Beijing in May 1982, told the Chinese leadership that the United States was actively interested in a peaceful settlement of the "Taiwan question." He carried a letter from President Reagan to Premier Zhao Ziyang, which contained the frank statement: "The differences between us are rooted in the long-standing friendship between the American people and the Chinese people who live on Taiwan." Assuming that this friendship will endure and that the Taiwan Relations Act will not be altered, what should be the approach by the United States to the ROC's security?

MILITARY REALITIES

A comparison of the weapons inventories of the Chinese antagonists can lead to the impression that the position of the Republic of China is hopeless. This could be true if only numbers mattered, but other significant factors affect the balance. There is the eternal problem of getting men and equipment to the point of use: the limits imposed by shortages in combat transport hold down the size of any potential mainland assault force, whether committed by air or sea. The 129 armored and infantry divisions of the People's Liberation Army (PLA) cannot get at the 20-plus divisions on Taiwan except in relatively small packets.

In naval and air forces, however, Beijing commands a massive superiority in numbers and types. Taiwan has no nuclear weapons, tactical or strategic. It is to these conditions that Taiwan must look in its effort to mount a defense posture that is commensurate with the actual threat against it.

It must be assumed that the PRC will enter into any sizable conflict with the ROC only if the former has some assurance that the Soviet Union, Vietnam and/or the United States will not move or intervene. Freed of such constraints, however, the question becomes one of the actual means to be used.

A military planner on the mainland would have to contemplate the fact that the ground defenses of Taiwan offer an impos-

ing barrier to an attack launched from the west of the island. The military geography of Taiwan is characterized by an essentially linear quality, with a high mountain system in which one peak reaches over 13,000 feet. The heights run north and south, separating the east and west coasts except for a small number of passes. The western coastal plain comprises only one fourth of the island, which is about 240 miles long and 60 to 80 miles wide overall. Extensive development work has improved communications and increased industrial activity, but the west side of the island is by far the most important.

The western coast of Taiwan features a series of spurs, which in turn establish a number of terrain compartments. These provide locations for a strong prepared defense and for large numbers of weapons positions. Over time stocks of defense materiel have been built up in these positions to sustain extended periods of combat. The ground permits cross-support between power points. The narrowness of the coastal plain and the necessarily linear lines of communication would limit movement and resupply over the super-highway and railroad that run in front of the position in many places. Reinforcement over the mountains is planned in some contingencies.

PRC OPTIONS OF AMPHIBIOUS OR AIRBORNE INVASION

An amphibious assault by the PRC against the defenses of Taiwan would face imposing problems. There is first of all the factor of the terrain itself. The shore-to-shore distances between the mainland and Taiwan vary between 90 and 120 nautical miles, but the geographical requirements of staging a force on the mainland and of finding suitable landing sites on Taiwan would render the actual distances of movement somewhat longer. The selection of landing points would be constrained by the fact of very flat beach-gradients in many places. At the same time, any thought of an amphibious assault on Taiwan's eastern coast would be dampened by the PRC Navy's lack of training and experience in convoy-type operations.

For any amphibious landing, the PRC would have to muster all available naval ships and craft, and additionally draft into service a large number of non-military vessels. In his FY 1980 posture statement the Chairman of the U.S. Joint Chiefs of Staff offered the following assessment of the PRC's amphibious capabilities:

"The PRC Navy has a sufficient number of conventional amphibious vessels to lift a force of over 30,000 men and equipment in a regional (less than 30 hours transit) amphibious assault. There are no indications that the Navy maintains a force specifically trained and equipped for projecting and supporting ground forces in combat operations on hostile shores."

In the following year the Chairman noted: "Since 1978 several Chinese-designed landing ships have been built. . . ." The FY 1983 report simply attributes to the PRC "poor logistic capabilities for large-scale out-of-country operations."

Indeed, anyone in Beijing charged with planning an amphibious invasion of Taiwan faces a difficult assignment. The operation would require large numbers of miscellaneous vessels. The passage to Taiwan over the rough and shallow strait would be at speeds of no better than 8 knots (an optimistic estimate) and, after at least 12 hours underway, the force would land in the face of powerful defensive positions. Finally, no sizable landing could be undertaken without air superiority, a factor to be discussed below.

A word of caution is in order nonetheless. When a Western analyst considers large-scale amphibious or airborne invasions, his mind tends to turn to Crete, Normandy or Okinawa. The Communist Chinese planner, on the other hand, would remember Hainan, where a sequestered island was reduced by means and techniques of the most primitive sort. While that memory might be sobered by the fact of modern weapons and equipment, nevertheless the tradition of past victory dies hard.

The planner on the mainland of an airborne attack on Taiwan faces similarly serious problems. The PLA is credited with three airborne divisions, but probably no more than one could be moved and sustained by the air transport force available. Drop zones of any size are not plentiful on Taiwan, and those that do exist are heavily defended. Again, control of the air would be the primary variable.

THE OPTION OF A NAVAL BLOCKADE

The physical problems entailed in imposing a naval blockage on Taiwan in order to disrupt its economy might not seem great to Beijing. The 100-plus submarines in the PRC Navy should be more than enough to block traffic attempting to transit the Taiwan Strait and to patrol the access routes to the small number of east coast ports on the island. Beijing's submarines are mainly Romeo and Whiskey types of Soviet parentage, with a few more advanced boats apparently in development and testing. The Chinese diesel-powered, snorkeling vessels may be primitive by U.S. or Soviet standards. Against the ASW capabilities of Taiwan, however, they would be formidable. Taiwan has two U.S. ex-Guppy types for training use, and two operating types are on order from the Netherlands.

There are massive drawbacks, however, to any blockade scheme. First, the interruption of trade and movement would offend other nations. Second, it is difficult to conceive that the United States would not challenge a blockade, and the course of such a response augurs a range and depth that would give Beijing pause. The total political-military dimensions of a blockade scenario would tend to make it undesirable.

Islands in the strait—Kinmen, Matsu and, to a lesser degree, the Pescadores—have figured large in the Chinese conflict in the past. These sites have some limited use for logistics and air warning and control, but their roles in the scenarios suggested here would be modest. Beijing would probably be satisfied to maintain an exchange of artillery fire aimed at suppression of observation, liaison flights and air-warning activities. The forces on the islands would be limited to the same level of activity.

NUCLEAR WEAPONS—A SEPARATE CASE

The PRC has accumulated a significant nuclear weapons arsenal and can deliver them by aircraft or missile to any target on Taiwan. The size of the island, the concentration of targets and the short warning times involved would make the nuclear attack option tempting for the PRC.

But there are substantial obstacles to that temptation. The PRC has unilaterally declared a "no-first-use" policy with respect to nuclear weapons. With or without such a pledge, Beijing, in contemplating a nuclear attack on Taiwan, would have to reckon with incalculable penalties of world opinion and the reactions of other powers. And in this respect some special factors would come into play. The Chinese civil war is often seen as a "brother against brother" conflict. How would the world react to nuclear fratricide?

Moreover, a nuclear devastation of Taiwan, or even parts thereof, would be contrary to all of the PRC's objectives, noted earlier, or acquiring the island's industrial infrastructure and its human resources in as intact a condition as possible. The same applies to the objective of the harmonious integration of its populace into a Greater China: the scars of conventional conflict might heal in time, but could the memories of a nuclear onslaught ever be obliterated?

The PRC has lesser nuclear options: for example, the kind of "nuclear demonstration shot" that, some suggest, the United States should have staged in World War II for the education of the Japanese high command before attacking an actual target. Could such demonstration bring Taipei to the conference table? The level of scientific sophistication makes it certain that nuclear weapons effects are well known. The enterprise would lack credibility, while alarming the world. On balance it seems that Beijing, contemplating the unknown cluster of results that could grow out of any introduction of nuclear weapons, would eschew this tactic in the service of the campaign to secure the return of Taiwan by force.

A LIKELY SCENARIO OF CONFLICT

The critical element in any hostilities in the Taiwan Strait (except for the unlikely introduction of nuclear weapons) is control of the vital air space over the area. Without it, no major undertaking is possible. With it, many of the problems attending airborne or amphibious operations or naval actions become irrelevant: there will be little need for such operations.

The air defenses of Taiwan are based on U.S.-provided aircraft, surface-to-air and air-to-air missiles, conventional A/A guns and radar and communications. A few of these items have been purchased from other suppliers, but that share is not significant in the ROC's inventory.

There are on the mainland on the order of 40 jet-capable airfields from which Taiwan can be reached. On Taiwan there may be five with reciprocal capability. Beijing's inventory of high-performance aircraft comes to something over 5,000; Taiwan's force numbers approximately 400. Taiwan's pilots are better trained and man better aircraft; nevertheless, sheer numbers weigh heavily on the Communist side. This condition clearly suggests a scenario in which the numerical imbalance would be exploited.

A PRC operation could begin with the random circulation of aircraft from field to field on the mainland, accompanied by false starts and feints. This process could go on for as long as needed in order to take the sharp edge off the ROC defense system. Then, perhaps early one morning, Taiwan's air defense system would be flooded with aircraft from the mainland. The primary mission would be to strike airfields and missile sites and to maintain continuous patrols over the small number of fighter airfields on Taiwan. Once established, Chinese Communist air superiority would support a program of incremental damage to selected targets, the pausing of attack and offers to negotiate after each strike, along with the message that attackers and defenders are all Chinese whose fates are interwoven. Under those postulated circumstances, it would be very difficult for Taipei to refuse to enter into serious discussions about reunion.

IMPLICATIONS FOR THE ROC POSTURE

It may be argued that the scenario that has been sketched above is highly improbable—politically, in light of the international risks Beijing would face, and militarily, because of the heavy casualties it would have to contemplate. Nevertheless, such risks have been endemic to the decision to go to war through the ages. It is true that China's tense relations with the Soviet Union and Vietnam would argue for caution with respect to any new military adventures that would leave the PRC vulnerable to her Asian neighbors, but to rely on the permanence of such constraints is to deny history. Indeed, history is littered with the gravemarkers of those who focused on the assumed intentions of, and constraints upon, their opponents at the expense of a realistic assessment of the latter's capabilities-in-being.

The United States bears moral and political commitments to the Republic of China. Its commitment to a peaceful settlement of the China problem is unequivocal. It is further pledged in law to help Taiwan maintain the physical strength to protect against attack. What the ROC needs—and can get only from the United States—is an air-defense package of aircraft, anti-aircraft weapons and electronic gear that will render a major surprise attack from the mainland too risky and too difficult. The determination of Taiwan's military needs should not become entangled in debate over specific items; rather, the components of the system should be geared to the state of the air threat from the mainland—and more generally to a hard definition of PRC capabilities rather than to fragile assumptions about Beijing's intentions and constraints.●

THE OTHER SIDE OF THE STORY

● Mr. KASTEN. Mr. President, some of you no doubt have read recent newspaper reports of Canadian suits filed against Amway Corp. and four of its top executives. This morning's Washington Post carries a statement by Amway Corp. regarding these suits. Canadian authorities allege that Amway has underpaid customs duties, and have filed a criminal information suit against Jay Van Andel and Rich DeVos, the owners of the corporation, in an attempt to expedite collection of duties and penalties. Civil action is pending in Canadian courts in this regard.

The wave of publicity generated by Canadian authorities and the media has made it necessary for Amway and its two owners to present their side of the story. It is my hope that today's Washington Post statement will explain the dispute more clearly and fairly, and that Amway and the Canadian Government will ultimately be able to reach a more satisfactory resolution of the issue.

ORDER TO INDEFINITELY POSTPONE CERTAIN BILLS

Mr. STEVENS. Mr. President, I ask unanimous consent that the following calendar items be indefinitely postponed: Calendar No. 140, S. 1206; Calendar No. 398, S. 1249; Calendar No. 553, S. 2260; Calendar No. 598, S. 1992; Calendar No. 635, S. 2601; Calendar No. 712, S.J. Res. 208; Calendar No. 798, S. 2911; Calendar No. 801, S. 2914; Calendar No. 851, S. 505; and Calendar No. 872, S. 2965.

The PRESIDING OFFICER. Without objection, it is so ordered.

JOINT REFERRAL OF S. 3044

Mr. STEVENS. Mr. President, I ask unanimous consent that S. 3044, the Surface Transportation Act of 1982, be jointly referred to the Committee on Finance to consider title I, to Environment and Public Works to consider title II, to Banking, Housing and Urban Affairs to consider title III, and to Commerce, Science, and Transportation to consider title IV.

I ask further that it be agreed that title IV will not be reported with reference to chapter I of title XXIII, United States Code, relating to the jurisdiction of the Committee on Environment and Public Works.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENDING TO THE GRADUATE SCHOOL, U.S. DEPARTMENT OF AGRICULTURE, THE APPRECIATION OF THE CONGRESS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate turn to the consideration of House Concurrent Resolution 412, a concurrent resolution dealing with the graduate school of the Department of Agriculture.

The PRESIDING OFFICER. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the concurrent resolution (H. Con. Res. 412) was considered and agreed to.

The preamble was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RECOGNIZING THE OUTSTANDING SERVICE AND PATRIOTISM EXHIBITED BY THE VOLUNTEERS OF THE AMERICAN NATIONAL RED CROSS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of House Concurrent Resolution 376, a resolution honoring American Red Cross volunteers who served our Nation during times of war, and I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the concurrent resolution (H. Con. Res. 376) was considered and agreed to.

The preamble was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DIPLOMATIC IMMUNITY INVOKED IN SHOOTING INCIDENT IN WASHINGTON, D.C.

Mr. ROBERT C. BYRD. Mr. President, I would expect that my colleagues are familiar with the report which appeared in this morning's press concerning the involvement of the Brazilian Ambassador's adopted son in a shooting in a Washington, D.C. bar, or in the area of a bar, this past Monday night.

According to the District of Columbia police, Antonio Francisco da Silveira, Jr., the adopted son of Brazil's Ambassador to the United States, was asked to leave the bar for disorderly conduct, at which point he reportedly shot an employee of the bar. The victim of the shooting is in the hospital, recovering from at least three gunshot wounds. The assailant was arrested by the District of Columbia police, but he was soon released, and charges against him were dismissed because, under the provisions of international law, he "enjoys" absolute diplomatic immunity from being prosecuted for any crimes he commits while he is in this country.

No Senator can do this, Mr. President. A Senator can be arrested for speeding if he is not on his way to a session or leaving a session to go back home. He can certainly be arrested for a felony.

I think the provisions of the Vienna Convention notwithstanding, this is a tough position to defend or explain to the people of this country. At a time when our citizens are concerned about the intolerable level of violent crime in our society, it seems inconceivable that a violent act of this nature—suppose the person who was shot should die. What then? Can the person be arrested? Can he be put in jail? Can he be sent to the penitentiary through due process? Can he be deported? What can be done?

Mr. STEVENS. What is the age of the Ambassador's son?

Mr. ROBERT C. BYRD. I do not recall the age of the son, Mr. President, but he certainly had no business

carrying a gun, no matter what the age.

Mr. STEVENS. I think it is a strained interpretation of the Convention as I understand it, I say to my good friend. I find it regrettable that such an incident would occur right after the President has gone to such great lengths to help assure the great country of Brazil of the friendship and admiration of the people of this country for the people of that country. It is regrettable.

Mr. ROBERT C. BYRD. I thank the distinguished acting Republican leader.

As I said, in a time when our citizens are concerned about the intolerable level of violent crime in our society, it seems inconceivable that a violent act of this nature will go unpunished merely because the offender is the relative of a foreign dignitary.

If this can happen, they can come in, they can burn down our houses if they want to, they can shoot us on our streets, they can mug us, they can rob us, they can rape, they can murder, and they cannot be arrested.

We have to make clear to the Brazilian Government in the strongest possible terms that this kind of conduct certainly cannot be tolerated in this country.

What about our own citizens in foreign countries? I am sure we have Americans languishing in foreign jails right now, having been charged with crimes; in some jails, perhaps, without being charged with crimes. I do not know.

At a minimum, Brazil should either waive their diplomatic immunity in this case, or require the immediate return to Brazil of young da Silveira. To do any less would be an affront to the people of this country. It should also be in the best interests of Brazil to offer reparations for any and all damages which were caused.

Finally, Mr. President, I believe it is incumbent upon our own Government to aggressively seek these results.

I know nothing about the argument that ensued. I know nothing about who was in the right or who in the wrong. But it seems inconceivable to me that the relative of a diplomat can carry a gun in this country and shoot an American citizen and cannot be arrested, cannot be brought to trial, can just be turned loose on the streets.

Mr. President, I intend to pursue this further. I hope I shall have the support of the majority leader and others on that side of the aisle. This is an intolerable situation.

Mr. STEVENS. I can assure the Senator from West Virginia that for my part, I shall be more than happy to associate myself with his remarks. It so happens that my good friend, Langhorne Motley—Tony Motley—who is an Alaskan, is the Ambassador to Brazil. I shall see to it that he has a copy of the remarks of the distinguished minority leader and advise him of the concern that has been expressed. I assure him I share those feelings.

I really do not believe that the relatives and dependents of those who enjoy diplomatic immunity should have diplomatic immunity to the extent of being permitted to be released following the commission of a violent felony, or at least the allegation of the commission of a violent felony. I believe the matter should be looked into thoroughly.

Mr. ROBERT C. BYRD. Mr. President, if something is not done to redress this kind of incident, is it not possible for relatives of foreign diplomats to come to this country and commit acts of violence against the leaders of our Government? Suppose they commit terrorist activities. Do they have immunity from arrest?

I think we have to have a clarification of this. I for one intend to pursue it, and I hope that we would, as I say, have the assistance of our own Government in aggressively seeking these results.

Article 37 of the excerpts from the Vienna Convention on Diplomatic Immunity states as follows:

> The members of the family of a diplomatic agent forming part of his household shall, if they are not nationals of the receiving State, enjoy the privileges and immunities specified in Articles 29 to 36.

All articles 29 to 36 are not before me, but article 29 reads as follows:

> The person of a diplomatic agent is inviolable. He shall not be liable to any form of arrest or detention.

Article 31 states:

> A diplomatic agent shall enjoy immunity from the criminal jurisdiction of the receiving State.

Article 32 states:

> The immunity from jurisdiction of diplomatic agents and of persons enjoying immunity under Article 37 may be waived by the sending State.

It seems to me that when we entered into that Vienna Convention on Diplomatic Immunity, articles of which said that "members of the family of a diplomatic agent forming part of his household shall, if they are not nationals of the receiving State, enjoy the privileges and immunity specified in articles 29 and 36," one of which is "the person of a diplomatic agent is inviolable. He shall not be liable to any form of arrest or detention," we should have had our heads examined right then and there.

Mr. ROBERT C. BYRD. Mr. President, I have nothing further. I thank my friend.

Mr. STEVENS. Mr. President, I think that the distinguished Senator from West Virginia has performed a service to the Senate and the country by pointing out the defects in this existing international agreement.

I certainly cannot condone the concepts. I assure the Senate that the Ambassador from the United States to Brazil shall be duly notified of the exchange that has taken place on the floor of the Senate this evening.

ORDER FOR STAR PRINT—S. 2925

Mr. ROBERT C. BYRD. Mr. President, on behalf of Mr. RANDOLPH, I ask unanimous consent that S. 2925, the performing arts labor relations amendments, be star printed showing the corrected language of the bill inasmuch as, unfortunately, it appears that portions of the text were inadvertently omitted.

Mr. STEVENS. There is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR FRIDAY

ORDER FOR RECESS UNTIL TOMORROW AT 10:30 A.M.

Mr. STEVENS. Mr. President, I ask unanimous consent that when the Senate stands in recess, it stand in recess until the hour of 10:30 a.m. on tomorrow, Friday.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF CERTAIN SENATORS ON TOMORROW

Mr. STEVENS. Mr. President, I ask unanimous consent that there be a special order entered for tomorrow, Friday, December 3, for not to exceed 15 minutes, for the Senator from Wisconsin (Mr. PROXMIRE) and the Senator from Michigan (Mr. LEVIN).

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER DESIGNATING PERIOD FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS ON TOMORROW

Mr. STEVENS. Mr. President, I ask unanimous consent that after the two leaders have been recognized under the standing order and the two special orders have been disposed of, there be a period for the transaction of routine morning business not to exceed the hour of 11:15 a.m., with statements therein limited to 5 minutes each by any Senator seeking recognition.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. STEVENS. Mr. President, I would like to say on behalf of the leadership that we will do everything we possibly can to continue to try and

clear the appropriation bills that are on the calendar and other legislative items. We do anticipate the possibility of votes tomorrow. It will be our intention to try to finish tomorrow at an early hour in the afternoon.

As I indicated yesterday, it is not our intention to ask the Senate to be in session on Saturday.

May I inquire if there is any further business to come before the Senate?

Mr. ROBERT C. BYRD. Yes, if the distinguished acting leader will allow me.

RECESS UNTIL 10:30 A.M. TOMORROW

Mr. STEVENS. Mr. President, is there any further business to come before the Senate? If there is not, I ask unanimous consent that the Senate stand in recess in accordance with the previous order.

There being no objection, the Senate, at 5:59 p.m., recessed until Friday, December 3, 1982, at 10:30 a.m.

HOUSE OF REPRESENTATIVES—*Thursday, December 2, 1982*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We pray, O God, that Your spirit of understanding and love will be with us at all the moments of life. In times of apprehension, grant us serenity, in times of disappointment, guide us with perspective and in times of accomplishment give us appreciation. May the spirit of Thanksgiving ever touch our lives that in all the difficulties and joys of living we may be conscious of the gift of Your spirit that sustains us and gives meaning and purpose to each day. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 322. Concurrent resolution regarding membership in the United Nations General Assembly.

The message also announced that the Senate insists upon its amendment to the bill (H.R. 5447) entitled "An act to extend the Commodity Exchange Act, and for other purposes," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. HELMS, Mr. DOLE, Mr. HAYAKAWA, Mr. LUGAR, Mr. COCHRAN, Mr. HUDDLESTON, Mr. PRYOR, Mr. BOREN, and Mr. HEFLIN to be the conferees on the part of the Senate.

NUCLEAR WASTE POLICY ACT OF 1982

Mr. UDALL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 3809) to provide for repositories for the disposal of high-level radioactive waste, transuranic waste, and spent nuclear fuel, to amend provisions of the Atomic Energy Act of 1954 relating to low- level waste, to modify the Price-Anderson provisions of the Atomic Energy Act of 1954 and certain other provisions pertaining to facility licensing and safety, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from Arizona (Mr. UDALL).

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. McCLORY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 345, nays 6, not voting 82, as follows:

[Roll No. 406]

So the motion was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 3809, with Mr. PANETTA in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Tuesday, November 30, 1982, the text of H.R. 7817 was considered as an original bill for the purpose of amendment.

Are there any further amendments which are made in order pursuant to the rule?

Mr. SEIBERLING. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise to ask the manager of the bill if he will engage in a colloquy with me?

Mr. Chairman, am I correct that the purpose of the site characterization guidelines in section 112 is to protect the public health and safety and the environment in the siting and development of a permanent repository for the disposal of high-level radioactive waste and spent nuclear fuel?

Mr. UDALL. If the gentleman will yield, the answer is yes. The gentleman has the correct understanding.

Mr. SEIBERLING. Further, as a member of the House Interior Committee, I helped in the drafting of the provisions of this legislation which would essentially designate certain sensitive areas as the last possible choice for development of a nuclear waste repository. The committee also drafted the provisions in this legislation which include an environmental assessment process and a site selection process to identify the conflicts that would arise. Although the bill stresses that our first priority must be public health and safety considerations, is it not also intended that other factors be considered if health and safety criteria can be met by more than one candidate site?

Mr. UDALL. The gentleman is entirely correct.

Mr. SEIBERLING. And further, let me give an example—if one of the identified alternate sites were adjacent to an area legislatively protected because of its high natural values, such as a national park, is it not the intent that it should be designated as a site only as a last resort if none of the other alternative sites satisfy the essential criteria for a permanent repository?

Mr. UDALL. Yes. I would agree with the gentleman.

Mr. SEIBERLING. I have one other question which I believe I should address to the gentleman from Florida (Mr. FUQUA).

Mr. Chairman, I note that the population criteria in section 112 which would apply to title I repositories for disposal of high-level radioactive waste and spent nuclear fuel differs from the population criteria contained in section 213 which guides the development of research, development and demonstration regarding disposal of high-level radioactive waste and spent nuclear fuel. I want to clarify that the bill would require that any research and development facility to be colocated at a selected repository site or a candidate repository site would have to comply with the appropriate siting guidelines provided under section 112. Is that correct?

Mr. FUQUA. Mr. Chairman, if the gentleman will yield, that is my understanding. That is correct and that is the intent.

The CHAIRMAN. Are there any further amendments made in order pursuant to the rule?

AMENDMENT OFFERED BY MR. MARKEY

Mr. MARKEY. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Chair will inquire of the gentleman, is the amendment made in order under the rule?

Mr. MARKEY. Yes, it is, Mr. Chairman.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. MARKEY: In section 219(a), strike out "75 percent of the expenses incurred by such State or Indian tribe" in the second sentence and insert in lieu thereof the following: "90 percent of the expenses incurred by such State or 100 percent of the expenses incurred by such Indian tribe, as the case may be,".

Mr. MARKEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

Mr. STRATTON. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

The Clerk will read.

The Clerk concluded the reading of the amendment.

□ 1030

Mr. MARKEY. I thank the chairman very much.

This is a relatively simple amendment and it is one that tries to make sure that there is a uniform treatment of the States and Indian tribes as they are being affected by Federal action in either placing a permanent repository or a test and evaluation facility in a particular location.

Under H.R. 7187, in the event of a decision to place a permanent repository in a State, reimbursement for monitoring or testing of the site, independent of the Department of Energy, would be reimbursed 100 percent to the Indian tribes and 90 percent to the States. However, for a test and evaluation facility which would have very much the same kind of effect upon a State or Indian tribe in terms of the costs that would have to be incurred to insure that there were no adverse health effects, the reimbursement to the State or Indian tribe is only 75 percent. In terms of the overall commitment that has to be made to the resolution of any problems that might arise because of the siting of these facilities, it seems to me that there ought to be some consistency.

So all that I am asking for is for the States and the Indian tribes, whether it be a permanent repository or a test and evaluation facility, to be treated equally in terms of the Federal reimbursement for costs incurred.

In trying to arrive at what I believe would be fair, I have established the same reimbursement figure for the T&E section as that which will be made to a State or Indian tribe in the event of a siting of a permanent repository. That level is 100 percent to the Indian tribes and 90 percent to the States.

That is the import of the amendment, very simply. It just tries to treat the States and the Indian tribes with some equity.

Mr. Chairman, I yield back the balance of my time.

Mr. FUQUA. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment.

Mr. Chairman, this provision was added in the bill in the Committee on Science and Technology by an amendment offered by the gentleman from New York (Mr. OTTINGER) to reduce the reimbursement levels.

I might point out that this does not involve a permanent repository, but only a test and evaluation facility; that spent fuel will only be there during the time of this test and evaluation, and then it would be moved on to a permanent repository, wherever that might be located.

So I think that, based upon the clear indication of the committee's sentiment, and also the participation by the States and Indian tribes at the level in the bill, funding is sufficient to do that.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I will be happy to yield to the gentleman from New York, the author of the amendment in committee.

Mr. OTTINGER. I thank the gentleman for yielding.

Mr. Chairman, I think the figure, whichever it is, is an arbitrary figure. There is no scientific basis for choosing 90 or 75 percent, but the consequences to the State or Indian tribe from a test and evaluation facility with just temporary use of radioactive materials clearly is not going to be as great as a permanent repository that is going to be there forever.

I felt in the committee that the payment of 90 percent of those costs, or 100 percent in the case of Indian tribes, was excessive. I still feel that way. I do not feel strongly about it, but I think we would be better off leaving things as they are in the bill.

Therefore, I join my chairman in opposition to the amendment.

Mr. MARKEY. Mr. Chairman, will the gentleman yield to me?

Mr. FUQUA. I yield to the gentleman from Massachusetts.

Mr. MARKEY. I thank the gentleman for yielding.

Mr. Chairman, here is the problem that I have with the formulations as they presently exist: We say to the State of Nevada or we say to the State of Louisiana, "We are designating your State for a Federal repository test and evaluation facility, but yet we are going to ask you not only to accept all of the nuclear waste that will now be brought to your State, but we are also going to ask you to pick up 25 percent of the costs of making sure that there have been proper evaluations."

To me, it just seems like taking a guy to an execution in a taxicab and having him pick up 25 percent of the cab fare. The least that we should have the decency to do here is to say to a State, "Look, we are selecting you as the slot, but at least in terms of the reevaluation of the program, we are going to help reimburse you for any costs which have been incurred in the due process of the evaluation of this project."

Otherwise, we have not only made this State or Indian tribe the winner of the queen of spades, but we have also made it pay a premium on top of that. I just do not think that is a fair way to operate.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield to me?

Mr. FUQUA. I yield to the gentleman from New York.

Mr. OTTINGER. I thank the gentleman for yielding.

Mr. Chairman, at the present we have all kinds of defense nuclear facilities located in the States. In fact, we have bomb testing going on in some of the States. We do not provide reimbursement for that.

This being a test and evaluation facility, we are doing something extraordinary by picking up 75 percent of the costs as it is.

Mr. MARKEY. If the gentleman will yield further, I would agree with the gentleman if there was not implicit in his reimbursement for the permanent facility an understanding that some exceptions should be made for this whole concept of taking nuclear waste and putting it in a State because the risk which is run by the environment in a test and evaluation facility really is very little different than what it will be at a permanent repository in the testing stages of that. And we are going to put upward of 100 metric tons of nuclear waste in this test and evaluation facility. I really, genuinely, believe that once we have established the precedent, once we have intellectually decided that there ought to be an exception to whatever past history we have in giving reimbursement to the States, we ought to be consistent in doing it for all the test and evaluation facilities.

Mr. FUQUA. The 100 metric tons is not going to stay there. It will go to the permanent repository site. So it is not a permanent repository of the nuclear wastes at the test and evaluation facility. That is the reason for this language that was suggested by the gentleman from New York in committee.

Mr. MARKEY. Mr. Chairman, will the gentleman yield further to me?

Mr. FUQUA. I will be happy to yield to the gentleman from Massachusetts.

Mr. MARKEY. I thank the gentleman for yielding.

Mr. Chairman, the problem is that we might not be giving back 100 metric tons to the Department of Energy. What we are worried about is that if there is an accident, if there is a leak, if there is some kind of geologic fault that has not been properly anticipated by the Department of Energy.

The CHAIRMAN pro tempore (Mr. PEYSER). The time of the gentleman from Florida (Mr. FUQUA) has expired.

(On request of Mr. OTTINGER and by unanimous consent, Mr. FUQUA was allowed to proceed for 2 additional minutes.)

Mr. FUQUA. Mr. Chairman, let me reclaim my time. This is the very reason for the test and evaluation facility so that we will prevent accidents, leaks, and other types of things. That is its purpose. We are hopeful that these types of things will not happen. That is the reason we feel the reimbursement provisions are adequate.

Mr. Chairman, I would certainly urge defeat of the amendment.

Mr. MARKEY. Mr. Chairman, will the gentleman yield further to me?

Mr. FUQUA. I yield to the gentleman from Massachusetts.

Mr. MARKEY. I thank the gentleman for yielding further.

Mr. Chairman, that is why we have guinea pigs. The guinea pigs die so that the real patients do not have any problems. What we are saying is that there is a greater likelihood that the guinea pig is going to have the accident than the final patient, the final respository.

So, in fact in terms of reimbursement, we are asking the State, actually, or the Indian tribe that is going to be the guinea pig to take the higher risk. As a result of that, if anyone is to be reimbursed, the area in which we give the higher risk should have the higher repayment ratio.

That seems to me to be common decency to the area being asked to run the highest level of risk.

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. FUQUA. I yield to the gentleman from New Mexico.

Mr. LUJAN. I thank the gentleman for yielding to me.

Mr. Chairman, I want to congratulate the gentleman and join him in opposition. We have been up and down the street on this particular level of paying the States. This is a compromise figure.

I remember in the Committee on Interior and Insular Affairs, the gentleman from Massachusetts struck out for 100 percent for both States and Indian tribes at that time. The committee felt that that was excessive.

The gentleman from New York (Mr. OTTINGER), in the Committee on Science and Technology, moved the other way, feeling that perhaps the percentages were too high.

It is almost like anything. Any time you get a figure in there, it is a matter of compromise. The State or Indian tribe still has $3 million for monitoring, testing, and evaluation, and the purpose of not giving them 100 percent is so that they will also watch their expenditures.

Now, we are in a tough budgetary situation and we cannot just give an open checkbook to anyone. At the least, if someone has to put up a minimum of 10 percent, they are going to watch that expenditure a little bit. If we give them 100 percent, there is no reason for them to watch their expenditures.

The CHAIRMAN pro tempore. The time of the gentleman from Florida (Mr. FUQUA) has expired.

Mr. MARRIOTT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, could I have a colloquy with the chairman of the committee?

Mr. FUQUA. I would be glad to.

Mr. MARRIOTT. I would like to know how much money is involved here, No. 1, and what the States might be using the money to do. If the Government is going to go in and do some test and evaluation, what is it that the State needs the money for, and how much money do we anticipate would be involved.?

Mr. FUQUA. Mr. Chairman, will the gentleman yield to me?

Mr. MARRIOTT. I yield to the gentleman from Florida.

Mr. FUQUA. I thank the gentleman for yielding.

Mr. Chairman, on page 119 of the bill, it says that the amount paid by the Secretary shall not exceed $3 million per year from the date on which the site involved was identified, to the date on which the decontamination and decommission of the facility is complete. Then it cites a statement that the payment may be made to the State in which a potential test and evaluation facility has been identified, and then it cites section 213 and goes on to cite the Indian tribe on whose land the potential site has been identified under the section.

Then it has a limitation following that as to what can be done.

So this would really be for decommission and decontamination.

Mr. MARRIOTT. What does the gentleman anticipate the States would be needing additional funding for?

Mr. FUQUA. I do not anticipate States would need any funding.

Mr. MARRIOTT. It seems to me if we give the States a blank check on the Federal Government, they are going to use it to do things that may not have to be done, and the concern I have is that I want to protect the States but I want to know what the limit to that type of thing is.

Mr. FUQUA. If the gentleman will yield further, the gentleman from New Mexico (Mr. LUJAN) answered the question in a colloquy with the gentleman from Massachusetts: If we give the States a blank check, I am sure they may find some way to utilize that fund in some related activity.

By putting some limit on this, then I think we tend to put some kind of control and make the States be frugal in any expenditures that they may enter into. I do not anticipate that they would incur any costs.

Mr. MARRIOTT. Other than what is in this bill, which is provided by the Federal Government, that is.

Mr. FUQUA. That is correct.

Mr. MARRIOTT. The gentleman does not believe that even with the 75-percent limit that the States are going to incur large amounts of money to do anything.

Mr. FUQUA. They should not, I say to the gentleman.

Mr. MARRIOTT. I thank the chairman.

Mr. MARKEY. Mr. Chairman, will the gentleman yield to me?

Mr. MARRIOTT. I yield to the gentleman from Massachusetts.

Mr. MARKEY. I thank the gentleman for yielding to me.

Mr. Chairman, just so the record is clear as to what this money is reimbursed for, it would be reimbursements for costs incurred in notifying its citizens of the repository siting plans, in monitoring or testing the site independently of the Department of Energy, and of reviewing Department of Energy activities.

This is not a blank check. This is just something that will deal with rudimentary activities that are going to have to be conducted by the State in any circumstance, and it is also subject to oversight by the Department of Energy in insuring that only costs which have been justifiably incurred are reimbursed by the Federal Government.

Mr. MARRIOTT. Will the gentleman answer a question for me?

Mr. MARKEY. I would be glad to, Mr. Chairman.

Mr. MARRIOTT. What expenses would the State have to incur to monitor what the Federal Government is doing? The States have an organization, all types of people on the payroll to do that now in their various commissions. What additional expense? Would they hire an outside public relations firm to do something, or what is it that the States would have to do?

Mr. MARKEY. Well, as you know, there has been no real experience with the siting of nuclear waste facilities in this country. So no State is really going to have on hand the expertise to be able to adequately deal with this problem.

As you remember, back in Lyons, Kans., back in 1970 when the first deep geologic facility was attempted to be sited, what happened was the State was clamoring for additional protections from the Federal Government. When ultimately water, 250,000 gallons of water, was put into the geologic site that had been designated by the Department of Energy, a week later when they came back there was no water left in the repository. It had just leaked out because of a mistake made by the Department of Energy. That had been developed independently by the State of Kansas officials.

My argument here is: Why should we say to a State which has had no experience, because no State has, to force them to rely upon amateur judgment. Here we should give them at least the right to bring in at least expert opinion, perhaps out of State, to give them the basis of countering whatever arguments are made by the Federal Government in terms of their analysis of salt mines, salt formations, any other geologic questions which would have to be resolved.

□ 1045

Mr. MARRIOTT. Could the States hire environmentalist groups to come in and argue against the whole procedure with this money?

Mr. MARKEY. I do not think that probably is within the purview of what this amendment is. That would come under intervenor funding or other sections. This has to do with the State role, not outside groups.

The CHAIRMAN pro tempore. (Mr. PEYSER). The time of the gentleman from Utah has expired.

(By unanimous consent, Mr. MARRIOTT was allowed to proceed for 2 additional minutes.)

Mr. FUQUA. Mr. Chairman, will the gentleman yield?

Mr. MARRIOTT. I would be happy to yield to the chairman.

Mr. FUQUA. Mr. Chairman, let me try to explain a little further what the bill does. As I have mentioned earlier in our colloquy, there is a $3 million limit to be used by the Secretary to pay for the activities of the section. The gentleman from Massachusetts did not raise that figure, but raises the percentage from 75 percent to 90 percent. The $3 million can be used in section 215, which I read to the gentleman earlier in our colloquy, for consultation and costs. That is designed to reimburse the States for these incurred costs that they have—notification, cooperative agreements.

Mr. MARRIOTT. If I understand then, what the gentleman from Massachusetts wants to do, in addition to the $3 million, any dollars the State wants to spend to check up on the Federal Government, we pay up 75 or 90 percent. Is that the bottom line?

Mr. FUQUA. Yes, but the amendment is defective in that it does not carry out the objective because there are no funds provided. The $3 million is still left intact.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. MARRIOTT. I yield.

Mr. OTTINGER. As I understand the gentleman's amendment, the $3 million limitation remains. It is just a question of whether 75 or 90 percent of the cost is assumed.

Mr. MARKEY. That is correct. We are trying to make sure that with the bubbling, boiling cauldron of controversy which will develop over this issue, that the States have been put in a position in which they have been able to advocate most articulately their point of view without feeling that they are going to be put at any economic disadvantage by taking it to its logical conclusion.

Mr. MARRIOTT. That still needs clarification. If I may, let me just ask this question: How much is in the bill now for the States? Is it $3 million? Do the States get $3 million per year to monitor the Federal activities?

The CHAIRMAN pro tempore. The time of the gentleman from Utah has again expired.

(By unanimous consent, Mr. MARRIOTT was allowed to proceed for 3 additional minutes.)

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. MARRIOTT. Yes.

Mr. OTTINGER. The $3 million is a maximum under this section of the bill. There are other provisions without this limitation with respect to a permanent repository. With respect to this provision of the T&E, what we have is a maximum of $3 million that can go to the States.

Mr. MARRIOTT. Per year, for test and evaluation?

Mr. OTTINGER. That is correct. The gentleman inaccurately stated that the States would have to pick up 90 percent. It is the other way around. The Federal Government would pick up 75 percent under the bill and 90 percent under the Markey amendment. So, it is a question whether the States will assume 75 percent or 90 percent.

Mr. MARRIOTT. The question is this: Are the $3 million in the bill per year to the States, do the States get $3 million per site?

Mr. OTTINGER. A maximum of $3 million.

Mr. MARRIOTT. There is only going to be one anyway.

Mr. OTTINGER. They get a maximum of $3 million.

Mr. MARRIOTT. But not to exceed 25 percent of the cost.

Mr. LUJAN. It is just the opposite.

Mr. OTTINGER. The Federal Government would pay, under the bill, 75 percent of the cost. The States will pay 25 percent. The actual cost will be certified by the State to the Secretary. We will pay 75 percent of the actual cost, or under the Markey amendment we would pay 90 percent.

Mr. MARRIOTT. Not to exceed $3 million.

Mr. OTTINGER. Not to exceed $3 million.

Mr. MARKEY. Mr. Chairman, if the gentleman will yield further, just so that we can keep all this in perspective, the permanent repository is going to cost about $3 billion. The test and evaluation facility is going to cost several hundred million dollars anyway, and now we are going to start tossing around extra hundreds of thousands of dollars like they were manhole covers only because the State wants to have a role in trying to make sure their rights are going to be protected against a $3 billion or a $200 or $300 million project. I just do not see where we have got this thing scaled. Let us in proportion to the risk, the investment the Federal Government may be making, give some kind of proper respect for the rights and the economic interests that the States have.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. MARRIOTT. I will be happy to yield.

Mr. UDALL. Mr. Chairman, I think we are spending an awful lot of time on something that really is not all that vital. The fact is, if this T&E facility is located at a site which could become the site of the permanent repository, 90 percent of the State's oversight expense is going to be paid anyway. We ought to be very generous with the States and localities in the location of this permanent facility, but this 75-percent limit deals with the test and evaluation center if it is not at a repository site. We are concerned with the problem of whether it becomes the repository. In that case, the 90 percent applies. I do not think the amendment is necessary. I think the gentleman from Florida has put it in proper perspective.

Mr. MARRIOTT. I thank the Chairman.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Massachusetts (Mr. MARKEY).

The question was taken; and the Chairman pro tempore announced that the noes appeared to have it.

RECORDED VOTE

Mr. MARKEY. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 72, noes 321, not voting 40, as follows:

[Roll No. 407]

□ 1100

Messrs. SHELBY, CONTE, and WYLIE changed their votes from "aye" to "no."

Messers. WAXMAN, TAUZIN, HERTEL, and GRAY changed their votes from "no" to "aye."

Mr. HERTEL changed his vote from "aye" to "no."

So the amendment was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. RODINO

Mr. RODINO. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Chair will inquire, is the amendment in order under the rule?

Mr. RODINO. It is, Mr. Chairman.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. RODINO: On page 61, line 5, strike out the entire subsection through line 8.

Mr. RODINO. Mr Chairman, this is a very simple and very straightforward amendment. What it does, very simply, is to strike from the bill a provision that requires the courts of appeals to give expedited treatment to actions brought under the Nuclear Waste Disposal Policy Act.

I share the concerns of the committee in including such an amendment. I know that they were highly motivated, but I must suggest its deletion, and I am sure that after my explanation the Members will appreciate the reason for it.

On Monday, September 20, of this year, this House passed by voice vote H.R. 6872, the Federal Court Reform Act of 1982. Title 3 of that bill repealed what were then 85 existing statutory civil priorities which required expedited judicial action on a variety of certain types of cases. This action was taken based on the recommendation of the Judicial Conference of the United States, the American Bar Association, and the administration. We can well appreciate what would occur if we added another at a time when we have already eliminated, and wisely so, the kind of action that would have required that in those 85 particular cases there would have been expedited action.

These kinds of statutes really do not work. They are well-intended, but they only frustrate the courts because, as we know, the courts are already under a mandate to give first priority to criminal cases under the Speedy Trial Act. In addition, under current practice, the courts give expedited treatment to other types of cases involving liberty, such as habeas corpus applications and reviews of recalcitrant witnesses' status and civil contempts.

□ 1115

If we were to adopt this, we would merely be creating an illusion for ourselves that the court was going to act in these particular cases and act in an expedited manner. We would be creating a false impression.

I believe that it is important that we recognize that the action that the House took in September was the wise action and we want to just follow suit and eliminate this provision.

I am sure that the courts, recognizing good cause, would take the kind of action that is necessary in these particular cases.

Mr. BROYHILL. Mr. Chairman, will the gentleman yield?

Mr. RODINO. I yield to the gentleman from North Carolina.

Mr. BROYHILL. I certainly understand the gentleman's concern he has expressed. As he knows, there are those of us who have been supporting this section and, of course, this subsection. I am sure the gentleman understands the reasons why we are concerned.

These cases are complex, they have great controversy, and there is always the potential for undue delay in the consideration of the issues in these cases.

It was for that reason that we put this subsection in.

I can understand the gentleman's concern is that if this finds its way into a number of statutes the courts then find it very difficult as to how to sort this out and where to give priority.

But as the gentleman knows, we do not want, if this would be the section deleted, it would not be our purpose to say that the courts should be giving whatever side would like to have a delay. We would want to make sure that they do give expedituous consideration and priority treatment to these cases.

Mr. RODINO. That is the very reason why I am suggesting the deletion of this, so the courts, recognizing the urgency of the matters that come before it, would take that kind of action and, therefore, would not prejudice any kind of action that might be developing under the Nuclear Waste Policy Act.

Mr. BROYHILL. The gentleman does understand that these cases, being as controversial as they are, if you do not have some type of insistence that we have the potential of years of delay in the courts.

The CHAIRMAN. The time of the gentleman from New Jersey (Mr. RODINO) has expired.

(At the request of Mr. BROYHILL and by unanimous consent Mr. RODINO was allowed to proceed for 2 additional minutes.)

Mr. RODINO. I think the gentleman should be assured that there certainly would not be any delay.

However, if this section is not deleted, it would only lead to other actions on the part of other committees that would be seeking the same thing. This would run counter to what the judicial process is all about.

Mr. RAILSBACK. Mr. Chairman, will the gentleman yield?

Mr. RODINO. I yield to the gentleman from Illinois.

Mr. RAILSBACK. I want to commend the chairman and say I share, by the way, generally, the concerns and I favor expediting these actions. I want to commend the chairman and simply point out that in the bill we passed there were two provisions. One says that each court of the United States shall determine the order in which civil actions are heard and determined. But it does something additionally. It says that that section also provides that the courts shall expedite any action for temporary or preliminary injunctive relief or any other action if good cause therefor is shown.

I think we would rather not start or embark on another series of statutory priorities which in my opinion would be a terrible mistake.

All of the courts are against this.

But I think we want to make it clear by the colloquy that we are engaging in, and I know others are going to want to engage in, that we expect the courts to take into account the very serious nature of these kinds of actions.

Mr. RODINO. I can assure the gentleman that is my intention.

Mr. KASTENMEIER. Mr. Chairman, will the gentleman yield?

Mr. RODINO. I yield to the chairman of the subcommittee that dealt with this question.

Mr. KASTENMEIER. Mr. Chairman, we considered this fact and that is why the language was as the gentleman from Illinois just recited.

Furthermore, not all cases brought under this act would require expedited treatment. So either we start adding No. 1 again for expedited treatment, having wiped all 85 other categories out and therefore start really the precedent all over again, or we accept the gentleman from New Jersey's amendment confirming the House's judgment earlier this year, and I hope we do the latter.

The CHAIRMAN. The time of the gentleman from New Jersey (Mr. RODINO) has again expired.

(At the request of Mr. OTTINGER and by unanimous consent Mr. RODINO was allowed to proceed for 3 additional minutes.)

Mr. OTTINGER. Will the gentleman yield?

Mr. RODINO. I yield to the gentleman.

Mr. OTTINGER. We have no objection.

Mr. UDALL. Mr. Chairman, will the gentleman yield?

Mr. RODINO. I yield to the gentleman from Arizona.

Mr. UDALL. I wanted to say to the distinguished chairman that I understand his concern and I am sympathetic to it. We have gotten ourselves in difficulty where every committee on every major bill has an expedited judicial section and it turns out that the guy with the latest date of enactment is technically entitled to go to the front of the line.

We have here a bill which is designed to get this country off dead center on nuclear waste policy. I think we are going to be able to do it.

But in this case we have two competing considerations. One is to protect, if you will, judicial review. People who are concerned about this repository need to be assured that they will have a chance to go to court and that they will be able to make their case.

On the other hand, the country needs to know that this is not going to be delayed in the courts forever.

I think with the colloquy we have had and the understanding we have had that the amendment could be accepted and would not do any great damage and would preserve the thing the gentleman has fought for, to stop cluttering up the lawbooks with more and more of these independent, single, expedited judicial review kinds of things.

Mr. RODINO. It is my clear impression that many of the cases that the committee would be concerned with coming under this act would undoubtedly meet the good cause criteria and would warrant this kind of expedited action.

Mr. UDALL. I thank the gentleman.

Mr. BROYHILL. Mr. Chairman, I move to strike the requisite number of words.

Could I have the attention of the gentleman from New Jersey (Mr. RODINO) to continue to engage in a colloquy.

I thank the gentleman for his patience and I will not take but just a minute or two. But to follow along the arguments of the gentleman from New Mexico, I must agree with him. We have, for whatever reasons, delayed the political decision of making a final decison on this matter to put in place a procedure, a process to select a final resting place for these waste materials.

Of course, there is the concern that there could be undue judicial delay.

I would appreciate if the gentleman would address that once again to assure this gentleman that if we do accept this amendment of his assurance of the courts acting in an expeditious way and to assure that there is not going to be the continued years of litigation that are tying up the courts in knots with motions.

I am not a lawyer, but I have seen this happen.

Could the gentleman respond?

Mr. RODINO. Will the gentleman yield?

Mr. BROYHILL. I am glad to yield to the gentleman.

Mr. RODINO. Insofar as this gentleman can give any assurances as to what the courts might do and how they might take action, historically if one reviews the cases and the kinds of actions the court takes and when, the good cause criteria always dictates that action is expedited.

There is no question in my mind that the urgency of the matters that would be related to this particularly important issue would come undoubtedly within that criteria and, therefore, I would see no impediment.

On the other hand, if we were to continue the process that was extant up until September when this House took action, with 85 other priorities mandated in an expedited manner, we would find that committees would continue to do the same thing and the very action the gentleman is looking for would be frustrated.

So I am saying let us leave it to the courts under this criteria and I am certain that this would be the case.

Were it not, I am sure we could always review it once again. But I have no hesitancy in saying that I would not be taking this position unless I felt that it was in the best interest of expedited judgment.

Mr. BROYHILL. I thank the gentleman for his continued explanation.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. RODINO).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. PETRI

Mr. PETRI. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PETRI: In section 115, strike out subsection (a) (and redesignate subsection (b) as subsection (a)).

In section 115(a), as so redesignated, strike out "PETITIONS" and insert in lieu thereof "DISAPPROVAL".

In section 115, strike out subsections (c) through (f) (and redesignate subsection (g) as subsection (b)).

In section 135(f)(3)(A), strike out "and subsections (d) through (f) of section 115" in the first sentence.

In section 135(f)(3), strike out subparagraph (B) and insert in lieu thereof the following:

(B)(i) The provisions of this subparagraph are enacted by the Congress—

(I) as an exercise of the rulemaking power of the Senate, and as such they are deemed a part of the rules of the Senate, but applicable only with respect to the procedure to be followed in the Senate in the case of a resolution under this paragraph, and such provisions supersede other rules of the Senate only to the extent that they are inconsistent with such other rules; and

(II) with full recognition of the constitutional right of the Senate to change the rules (so far as relating to the procedure of the Senate) at any time, in the same manner and to the same extent as in the case of any other rule of the Senate.

(ii)(I) Not later than the first day of session following the day on which any notice of disapproval is submitted to the Congress under paragraph (2), a resolution shall be introduced (by request) in the Senate by the chairman of the committee to which such notice of disapproval is referred, or by a Member or Members of the Senate designated by such chairman.

(II) Upon introduction, a resolution shall be referred to the appropriate committee or committees of the Senate by the President of the Senate, and all such resolutions with respect to the same Federal site shall be referred to the same committee or committees. Upon the expiration of 60 calendar days of continuous session after the introduction of the first resolution with respect to any Federal site, each committee to which such resolution was referred shall make its recommendations to the Senate.

(iii) If any committee to which is referred a resolution introduced under clause (ii)(I), or, in the absence of such a resolution, any other resolution with respect to the Federal site involved, has not reported such resolution at the end of 60 days of continuous session of Congress after introduction of such resolution, such committee shall be deemed to be discharged from further consideration of such resolution, and such resolution shall be placed on the appropriate calendar of the Senate.

(iv)(I) When each committee to which a resolution has been referred has reported, or has been deemed to be discharged from further consideration of, a resolution described in clause (iii), it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) for any Member of the Senate to move to proceed to the consideration of such resolution. Such motion shall be highly privileged and shall not be debatable. Such motion shall not be subject to amendment, to a motion to postpone, or to a motion to proceed to the consideration of other business. A motion to reconsider the vote by which such motion is agreed to or disagreed to shall not be in order. If a motion to proceed to the consideration of such resolution is agreed to, such resolution shall remain the unfinished business of the Senate until disposed of.

(II) Debate on a resolution, and on all debatable motions and appeals in connection with such resolution, shall be limited to not more than 10 hours, which shall be divided equally between Members favoring and Members opposing such resolution. A motion further to limit debate shall be in order and shall not be debatable. Such motion shall not be subject to amendment, to a motion to postpone, or to a motion to proceed to the consideration of other business, and a motion to recommit such resolution shall not be in order. A motion to reconsider the vote by which such resolution is agreed to or disagreed to shall not be in order.

(III) Immediately following the conclusion of the debate on a resolution, and a single quorum call at the conclusion of such debate if requested in accordance with the rules of the Senate, the vote on final approval of such resolution shall occur.

(IV) Appeals from the decisions of the Chair relating to the application of the rules of the Senate to the procedure relating to a resolution shall be decided without debate.

(V) If the Senate receives from the House a resolution with respect to any Federal site, then the following procedure shall apply:

(I) The resolution of the House with respect to such site shall not be referred to a committee.

(II) With respect to the resolution of the Senate with respect to such site—

(a) the procedure with respect to that or other resolutions of the Senate with respect to such site shall be the same as if no resolution from the House with respect to such site had been received; but

(b) on any vote on final passage of a resolution of the Senate with respect to such site, a resolution from the House with respect to such site where the text is identical shall be automatically substituted for the resolution of the Senate.

(C)(i) The provisions of this subparagraph are enacted by the Congress—

(I) as an exercise of the rulemaking power of the House of Representatives, and as such they are deemed a part of the rules of the House, but applicable only with respect to the procedure to be followed in the House in the case of resolutions under this paragraph, and such provisions supersede other rules of the House only to the extent that they are inconsistent with such other rules; and

(II) with full recognition of the constitutional right of the House to change the rules (so far as relating to the procedure of the House) at any time, in the same manner and to the same extent as in the case of any other rule of the House.

(ii) Resolutions shall, upon introduction, be immediately referred by the Speaker of the House to the appropriate committee or committees of the House. Any such resolution received from the senate shall be held at the Speaker's table.

(iii) Upon the expiration of 60 days of continuous session after the introduction of the first resolution with respect to any Federal site, each committee to which such resolution was referred shall be discharged from further consideration of such resolution, and such resolution shall be referred to the appropriate calendar, unless such resolution or an identical resolution was previously reported by each committee to which it was referred.

(iv) It shall be in order for the Speaker to recognize a Member favoring a resolution to call up a resolution after it has been on the appropriate calendar for 5 legislative days. When any such resolution is called up, the House shall proceed to its immediate consideration and the Speaker shall recognize the Member calling up such resolution and a Member opposed to such resolution for 2 hours of debate in the House, to be equally divided and controlled by such Members. When such time has expired, the previous question shall be considered as ordered on the resolution to adoption without intervening motion, No amendment to any such resolution shall be in order, nor shall it be in order to move to reconsider the vote by which such resolution is agreed to or disagreed to.

(v) If the House receives from the Senate a resolution with respect to any Federal site, then the following procedure shall apply:

(I) The resolution of the Senate with respect to such site shall not be referred to a committee.

(II) With respect to the resolution of the House with respect to such site—

(a) the procedure with respect to that or other resolutions of the House with respect to such site shall be the same as if no resolution from the Senate with respect to such site had been received; but

(b) on any vote on final passage of a resolution of the House with respect to such site, a resolution from the Senate with respect to such site where the text is identical shall be automatically substituted for the resolution of the House.

(D) For purposes of this paragraph—

(i) continuity of session of Congress is broken only by an adjournment sine die; and

(ii) the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of the 90-day period referred to in subparagraph (A) and the 60-day period referred to in subparagraphs (B) and (C).

In section 116(b)(2)(B), insert at the end thereof the following new sentences:

The Secretary may enter into a tentative agreement with any State under this subparagraph at any time following the approval of a candidate site in such State under section 112(c). Any such tentative agreement shall set forth the amount of assistance to be provided to such State under this paragraph if a construction authorization for a repository is granted with respect to the site in such State, and the procedures to be followed in providing such assistance. Any such tentative agreement shall become binding upon the Secretary upon the granting of such construction authorization.

In section 118(b)(2)(B), insert at the end thereof the following new sentences:

The Secretary may enter into a tentative agreement with any Indian tribe under this subparagraph at any time following the approval of a candidate site on the reservation of such Indian tribe under section 112(c). Any such tentative agreement shall set forth the amount of assistance to be provided to such Indian tribe under this paragraph if a construction authorization for a repository is granted with respect to the site on the reservation of such Indian tribe, and the procedures to be followed in providing such assistance. Any such tentative agreement shall become binding upon the Secretary upon the granting of such construction authorization.

Mr. PETRI (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. PETRI. Mr. Chairman, I rise to offer an amendment which would strengthen the State veto provisions of this legislation so that States will have an absolute veto over the placing of nuclear-waste facilities within their borders.

My purpose for offering this amendment is to ameliorate the fears of a State worried about having to accept the site without its consent, moving the focus of the issue to the merits of the site.

In my judgment, the stronger a veto power we give the States the less likely they are to exercise it. Without a strong State veto, the public and local officials simply will not trust the Federal Government, and the Department of Energy in particular, not to try to ram down their throats something potentially injurious to them. With it, they will feel more comfortable about the process all the way along. Knowing that they have some power to block a site, they will be less likely to focus their energies and attention on the tactics of obstructionism and more likely to focus on the merits of a repository.

Thus the absolute State veto is a positive measure, designed to insure that the public and local officials are really consulted during the entire process of site selection, and that they come to a basic acceptance of an eventual site. Without such local acceptance, any decision will be tied up in court challenges and other obstruction for years. Besides, when local people directly affected by a decision are consulted, they can often make suggestions that improve the eventual result.

My amendment would provide for an absolute State veto by striking out the two-House override portion of the bill, section 115. The amendment is designed to affect only repositories and leaves the committee language concerning interim storage sites as is.

I would like to make it clear that this absolute State veto amendment will not prevent Congress from overriding a State veto. Congress and the President will still retain this ability and could override a State veto by simply passing a separate law approving a site, the State veto not withstanding. This amendment would only make the process slightly more difficult, giving the State greater assurance the veto will be upheld.

My amendment also allows the Secretary of Energy to enter into tentative agreement with a State at any time after site characterization for the amount of economic assistance to be provided under paragraph 116(b)(2) in the event the site is approved. This allows the Secretary to enter into agreements earlier than the committee language calls for.

In my mind, the issues of State veto and economic compensation have always been linked, since people will be more likely to accept a truly safe waste site if it is clear that their economic interests will not be harmed.

Unlike the last nuclear waste bill brought before the House in 1980, the current version contains very good provisions for economic compensation. In addition, a repository will create up to 5,000 new construction jobs for 6 years, 1,000 new jobs to operate the site, as well as 1,800 new support jobs and a billion-dollar property tax base. Therefore, it should be possible to gain public acceptance for a safe site, and the absolute veto will help clear the air and further the longrun interests of everyone concerned.

For those Members who are concerned about States rights and would like to see States have a real influence on site location, there is an additional reason why the absolute State veto is needed. The other body has already passed its version of a nuclear waste bill. That legislation contains a very weak State veto provision, similar to the Broyhill amendment which the House narrowly passed on Monday. If the House bill is not changed, there would be no way to increase the strength of the State veto in conference.

However, if the absolute State veto amendment is adopted, our House conferees would have a substantial bargaining chip, allowing them room to compromise on the issue and still settle on provisions calling for a viable State role in the selection process. I am convinced that the absolute State veto is the wisest provision, but at least we need a stronger State role than we will get if my amendment is not adopted.

I have one final thought I would like to leave with my colleagues. If a State actually exercises a State veto, we really ought to give the Secretary of Energy or the President the authority to embargo-nuclear waste exports from the vetoing State or the authority to require that State to make its own arrangements for disposing of any nuclear waste it might generate itself. This idea is not in my amendment today, but I think we should think seriously about it. The State veto should not be merely a license to act irresponsibly. If a State generates waste, it has some responsibility to dispose of it, and it should not be able to simply foist that off on someone else.

□ 1130

Mr. UDALL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, we have tried for 35 years to get a high-level waste policy for the country. We may be on the verge of success and if you adopt this amendment, you have killed the bill. The cold fact is that you are not going to find 1 of the 50 States who will accept a repository. So we are going to have to make a national decision, after very carefully considering the different sites and considering the States concerned, where this repository is going to be.

A fundamental principle of this bill is that we are going to give the States a veto. It is a real burden on the State to say, "On behalf of the other 49 States, you shall be in the site of this repository," and we are only going to do it after we have involved them very early in the process, and given them an opportunity try to stop the project. But at some point in the Federal interest, in the national interest, the country has got to come along and have a right to override that veto.

We now have in the bill a pretty good provision, from the standpoint of the States. It is going to be fairly easy for the States to issue a veto and to make it stick. But to say that the States have an absolute veto is to kill the bill, and I would urge my colleagues to oppose it.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. UDALL. I yield to my friend, the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, I feel the same. I feel the States do deserve very strong protection. Both the gentleman from Arizona and I opposed the Broyhill amendment. We would have given the States the protection of requiring two Houses of Congress to override a State veto rather than requiring one House to sustain the veto that prevailed in the Broyhill amendment. We were unsuccessful by a narrow vote in committee. We may get another chance at that in the House. But to go further and say that there should be an absolute veto I think is going too far and also runs in the face of the action that has already been taken by the committee. So I would urge defeat of the amendment.

[Mr. BROYHILL addressed the committee. His remarks will appear hereafter in the Extensions of Remarks.]

Mr. LUJAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment offered by Mr. PETRI which provides for an absolute State veto of a repository with no provision to protect the national interest. I fully support thorough and adequate State participation in the decisionmaking process leading to the siting and operation of a high-level waste repository. The bill before us, however, already provides for State participation. According the States an absolute veto power intrudes too far on a fundamentally Federal program and is unnecessary from a health and safety standpoint. We must all recognize that, as in other activities under the Atomic Energy Act, the Federal Government will exercise comprehensive and pervasive regulatory control over high-level radioactive waste repositories. This control is designed not only to assure that the environment and the health and safety of the public will be adequately protected, but also that the important Federal policy of developing atomic energy technology will be fulfilled. Under existing law, as interpreted in cases such as Northern States Power Co. against Minnesota,[1] Washington State Building and Construction Trades Council against Spellman,[2] and Illinois against General Electric,[3] States may not upset our fundamental national policies and complicate our comprehensive Federal regulatory framework by attempting to veto or to bar nuclear facilities, including disposal facilities, meeting applicable Federal requirements. I believe that this is a sound approach and that we should support it by opposing the amendment in question.

Mr. MARRIOTT. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to this amendment, although I have sympathy for what the gentleman is trying to do. And I would certainly hope that my good friend (Mr. PETRI) might withdraw this amendment.

Let me just make this commitment to him: I am concerned about the language that is in this bill. I believe the Broyhill amendment is in fact unconstitutional. If it is deemed to be unconstitutional, it will in fact provide no protection for the States whatsoever, and I plan to ask for a separate vote on the Broyhill amendment when the appropriate time comes. I think we have a chance of readdressing this issue on States veto rights and the role of Congress, and I would ask my good friend to withdraw that amendment and support us on the opportunity of getting a separate vote on the other amendment.

Mr. MONTGOMERY. Mr. Chairman, will the gentleman yield?

Mr. MARRIOTT. I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. Mr. Chairman, it seems like the strategy the gentleman has mentioned, if the gentleman from Wisconsin would withdraw his amendment, we do have a chance on a separate vote in the whole House. We only missed by six votes of defeating the Broyhill amendment that did give the States more rights and more considerations. I think we have a much better chance of taking the route that the gentleman from Utah suggested, and I would hope that the gentleman from Wisconsin would withdraw his amendment.

Mr. MARRIOTT. I thank the gentleman.

Mr. Chairman, I would just simply say that we do need to provide adequate protection for the States. The original language of the committee bill was the proper language, and I think we ought to go back and get a separate vote on that. I would leave that decision, though, up to my good friend.

● Mr. GOLDWATER. Mr. Chairman, I oppose the amendment offered by Congressman PETRI. Although I happily support State participation in the

[1] 447 F. 2d 1143 (1971). This ruling was endorsed in Train v. Colorado Public Interest Research Group, 426 U.S. 1, 17 (1976).

[2] 684 F. 2d 627 (9th Cir. 1982).

[3] 683 F. 2d 206 (7th Cir. 1982).

repository decisionmaking process, I believe that giving States an absolute veto power is subject to unacceptable abuse. In particular, it affords an unwarranted opportunity for antinuclear groups to prompt unreasonable delay and turmoil in the ultimate siting, construction, and operation of a high-level waste repository.

Mr. Chairman, we face a special challenge when we deal with atomic energy because of the phobic thinking which characterizes much of the debate on that subject. A phobia is a fear based on an exaggerated, unrealistic danger. One author has called it "a malignant disease of 'what ifs'." He explains that—

> The phobic thinking process is a spiraling chain reaction, to use an atomic energy analogy, of "what ifs" and each "what if" leads to another. Phobic thinking always travels down the worst possible branching of each of the "what ifs" until the person is absolutely overwhelmed with the potentials for disaster.[1]

The fruits of this phobic thinking is nowhere better represented than in perceptions of nuclear power. This is well illustrated in Dr. Upton's recent article in Scientific American entitled "The Biological Effects of Low-Level Ionizing Radiation."[2] Dr Upton graphically demonstrates that various groups in our society perceive nuclear power as many orders of magnitude more hazardous than it in fact is. This misperception is especially applicable to radioactive waste disposal. For example, a recent survey of scientists found that 99 percent felt the risks of nuclear energy were acceptable and the 100 percent felt that enough information was available to solve remaining problems, including nuclear waste disposal. In contrast, journalists, particularly of the electronic media, were heavily of the opposite opinion.[3] Dr. DuPont indicates that the phobic reaction among nonexperts is largely attributable to a failure to place the largely hypothetical risks of atomic energy in perspective with the many actual and much greater hazards which we commonly and ordinarily incur, and, indeed, even in perspective with the many actual and much greater hazards from alternative energy technologies

The misperception of the risks associated with nuclear waste disposal has led to unnecessary delays due to what amounts to overconcern and overregulation. We have got to the point where we worry about the infinitesimal risk that a repository will be hit by a cataclismic meteor or will be the site of a volcanic eruption.[4] This has frustrated attempts to site, construct, and operate waste facilities. It is undercutting our ability to accomplish the fundamental purpose of the Atomic Energy Act of 1954 to develop atomic energy technology and to keep our Nation in the forefront of atomic energy research. I believe that this fundamental purpose of the act is a good one. Nuclear power was and remains a safe, clean, and environmentally preferable means to generate electrical energy. If we do not vigorously pursue the nuclear energy option, we are in the ironic position of relying on less safe and less environmentally sound means of generating our electricity.

Mr. Chairman, I am troubled by legislation the effect of which is to foster the erection of unwarranted impediments to continued development of atomic energy technology. I believe that such legislation is largely a manifestation of a nuclear phobia and plays into the hands of antinuclear groups who will use it to thwart our essential national policies and to inhibit reliance on an environmentally desirable source for our electrical energy to the detriment of the public. We must be alert to striking the proper balance between competing interests so that all legitimate health and safety concerns are taken into account but in a fashion such that antinuclear groups are unable to exploit phobias and irrational fears to undermine the Atomic Energy Act. I fear that veto authority will be exploited by antinuclear groups to delay a vital Federal program and to frustrate essential national interests.●

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin (Mr. PETRI).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. PETRI. Mr. Chairman, I demand a recorded vote, and pending that, I made the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1145

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The pending business is the demand of the gentleman from Wisconsin (Mr. PETRI) for a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. MARKEY

Mr. MARKEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MARKEY: Strike out sections 101 and 102 and insert in lieu thereof the following (and conform the table of contents in section 1 accordingly):

APPLICABILITY

SEC. 101. (a) ESTABLISHMENT OF REPOSITORIES.—Any repository required to be licensed under section 202 of the Energy Reorganization Act of 1974 (42 U.S.C. 5842) shall be established in accordance with the procedures set forth in this Act.

(b) AUTHORITY OF COMMISSION.—Nothing in this Act shall be construed to expand or contract the licensing authority of the Nuclear Regulatory Commission with respect to any atomic energy defense activity under the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.) or the Energy Reorganization Act of 1974 (42 U.S.C. 5801 et seq.). The Commission shall not have any authority over the production or handling of any high-level radioactive waste or spent nuclear fuel resulting from any atomic energy defense activity prior to its delivery to a repository, except as otherwise provided in any other provision of law.

In section 1, after paragraph (15), insert the following new paragraph (and redesignate the following paragraphs accordingly):

(16) The term "person" includes any governmental entity.

In section 111(a)(3), strike out, "civilian".

Mr. MARKEY. Mr. Chairman, now we reach a central question in the nuclear waste deliberations that we are considering here this week. The central question: Should military nuclear waste be included in this legislation? Question: Should 90 percent of all the nuclear waste in this country be included in this bill? Question: The American people, according to a full-page advertisement in the Washington Post this week, put in by the American Nuclear Energy Council, want to see legislation passed to establish a comprehensive—a comprehensive—nuclear waste policy program. According to their advertisement, the public agrees with that point. It says that, according to a recent national opinion survey, 9 out of 10 Americans—92 percent—say the Government should stop procrastinating and resolve this issue once and for all.

Now, when the American people were polled and asked, "Do you think we ought to talk or do you think we ought to resolve the nuclear waste question once and for all?" Do you think in their minds they are excluding 90 percent of all the nuclear waste in this country, which is military waste? I do not think they are.

---

[1] Robert L. DuPont, Nuclear Phobia—Phobic Thinking About Nuclear Power (The Media Institute 1980).

[2] Arthur C. Upton, "The Biological Effects of Low-Level Ionizing Radiation," Scientific American (February, 1982).

[3] Wall St. J., p. 32, Nov. 9, 1982.

[4] For example, see Brown and Crouch, "Extreme Scenarios for Nuclear Waste Repositories," Health Physics 43:345 (1982).

I think in their minds they have a hard time differentiating whether nuclear wastes which are put in the permanent repository are civilian or military.

My opinion is that the American people want a solution once and for all to the entire nuclear waste problem in this country. That is what my amendment will do.

It says this: Defense Department, if you want to dispose permanently of your nuclear waste, you do not have to put it in the civilian respository that we are creating in this legislation.

However, if you are going to bury it, then you are going to be bound by the same rules and regulations, by the same process as will the civilian nuclear waste repository program. In terms of giving away military secrets—if you do not want to give your wastes to the civilian repository, you keep it, you dispose of it, and you monitor it for the next 20,000 years. But at least use the same guidelines to protect the citizens as will the domestic utility industry in cooperation with the Department of Energy in disposing of civilian nuclear wastes.

This does not seem like a terribly onerous burden to put on the Department of Defense. DOD has come up with ideas like Densepack. The Department is working on weapons systems that can hit a nickel in the middle of the Kremlin. I do not know why the Defense Department cannot easily conform to the regulations that are incorporated into H.R. 7187 so that a facility can be constructed following the guidelines of this act to in perpetuity take care of the 90 percent by volume of all the defense nuclear waste which has been generated.

So if you represent Utah or Nevada or Louisiana or Washington State, or wherever any of these repositories might be sited, do you think your citizens are saying, we want a lower standard for defense wastes than we have for civilian wastes even though the health effects are exactly the same? Or, do you think they believe that all nuclear wastes are going to be covered by this bill?

My belief is that if we are really going to be honest, and if we are not going to mislead the American people and other Members of Congress, then we are going to have to confront the fact that the waste problem is one that has to be dealt with comprehensively.

We will never return to this subject matter again. Let me repeat that. We will never return to this subject matter again if we do not deal with this bill comprehensively today. We will deal with the 10 percent which is civilian nuclear waste. We will take care of the domestic utility industry problem of disposing of the waste which is onsite at reactor generators today. But we will not come back, not for at least a decade if ever, to look at the issue of the other 90 percent of the nuclear waste which is in those defense facilities.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. MARKEY) has expired.

(At the request of Mr. MONTGOMERY and by unanimous consent Mr. MARKEY was allowed to proceed for 1 additional minute.)

Mr. MONTGOMERY. Mr. Chairman, will the gentleman yield?

Mr. MARKEY. I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. I thank the gentleman for yielding.

I am a little confused on the gentleman's amendment. As I understand it, it does eliminate section 102. And the reason I am interested in it is that I offered an amendment in the House Armed Services Committee that would permit States and Indian tribes to participate in action on defense nuclear waste the same as it would on commercial nuclear waste.

It seems to me the gentleman's amendment would completely knock out the amendment that I offered in the Armed Services Committee.

Mr. MARKEY. No; it does not do that.

Mr. MONTGOMERY. Therefore, I have nothing left.

Mr. MARKEY. If I can reclaim my time, as presently written, of the 50 sections in this bill which apply to civilian nuclear waste facilities, only four—only four—will apply to military waste facilities.

□ 1200

What we are trying to do here is to build in the other 46 sections, not take any out, but build in another 46 sections which will give the additional protections to the Indian tribes and to the States, which are not presently in the bill. So if the gentleman is interested in protecting the Indian tribes and the States, not only do I want to see the protections that the gentleman has already put in the bill, but I want to put in the other 46 sections which are in this bill to protect the States and Indian tribes in the event of citing civilian waste facilities and apply them to any defense waste facilities.

Mr. MONTGOMERY. Well, I hate to disagree with the gentleman, but it seems to me that the amendment as offered by the gentleman knocks out what we did in the Armed Services Committee.

The CHAIRMAN. The time of the gentleman from Massachusetts has again expired.

(At the request of Mr. MONTGOMERY, and by unanimous consent, Mr. MARKEY was allowed to proceed for 1 additional minute.)

Mr. MONTGOMERY. Mr. Chairman, if the gentleman will yield further, the leadership in the Armed Services Committee opposed my amendment and the amendment was adopted; but I am really afraid that the gentleman's amendment totally knocks out what we did in the Armed Services Committee to make nuclear wastes in the military coincide with the same thing that is happening commercially.

Mr. MARKEY. To reclaim my time, I am very proud of the fight the gentleman made in the Armed Services Committee in taking on the leadership and the amendment which he included is a very worthy one. It just did not go far enough. I understand the difficulties we have in dealing with people who do not want to see any coverage of military waste, so the incremental progress the gentleman made is very helpful. But again, it is only 1 step in a 50-step journey. We are going to try to take the additional 50 steps right now by making sure that we have got all those additional protections in so that when and if the Defense Department builds a nuclear waste facility, it is bound by the same standards as the civilian waste repository.

Whatever residents live nearby this defense facility will suffer the exact same health consequences if there has been a mistake made in the siting and in the environmental impact statement and the population evaluation as they would suffer living nearby a civilian waste repository.

Mr. LUJAN. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the amendment.

The gentleman from Massachusetts is correct in saying that commercial waste is 10 percent by volume of the high-level radioactive waste in this country. However, the radioactivity of the commercial wastes is about 90 percent of the total radioactivity of the country's high-level waste inventory. Furthermore by the time a repository is available under this bill, the commercial wastes will represent 97 percent of the total radioactivity. If we were only concerned with the volume of waste to be disposed of, the issues for this bill would be very simple. However, the radioactivity, not the volume, is the key factor in high-level radioactive waste issues. To threaten national security for only 3 percent of the total waste does not make much sense. It especially does not make much sense in view of the long history the Department has had of successfully operating its facilities with adequate protection of public health and safety.

I urge my fellow Members to join me in opposing this amendment.

Mr. GOLDWATER. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from California.

Mr. GOLDWATER. Mr. Chairman, I thank the gentleman for yielding.

I would only point out that I think the gentleman from Massachusetts is making a problem of a nonproblem, that the Department of Defense has a program in place. They are handling their nuclear waste problem.

The issue that we are addressing here is commercial waste and that is where our attention has been lax. It is here where we need to concentrate our efforts and not confuse the issue by including an additional burden that is being managed quite well at the present time.

I would urge defeat of this amendment.

Mr. MARKEY. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I think the gentleman from Texas wants his own time.

Mr. MARKEY. Will the gentleman from New Mexico yield on his own time?

Mr. LUJAN. I think in the interest of time I will yield back my time so that the gentleman from Texas may proceed.

Mrs. BOUQUARD. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong opposition to this amendment because I think it is mischievous with respect to national security. The administration has a well-founded fear that requiring the licensing of any defense repository could be a national security problem in that NRC is required to make most of the licensing-related information it obtains from DOE publicly available. Data that would be publicly available under the Freedom of Information Act could include all sorts of information that may be of benefit to unfriendly nations. This could include information regarding the facility that the particular waste was obtained from, the constituent elements of the waste, including radioisotopic content, and other information regarding the quantity and quality of the waste product. It is conceivable that this information could be used to infer the processes used to obtain that material and the useful products that the Defense Department may be employing. I cannot cite all of the potential uses or misuses of the information that may be available because I simply do not know them. But I can assure you unequivocally that this kind of information can be gleaned from otherwise innocent data.

The present provisions in the bill require the President to evaluate this issue, and if no problem is found, to use the commercial facilities for the disposal of defense waste. If it is a problem, the President will have the opportunity to evaluate the issue and make a determination on it. I think these provisions make sense and they should not be changed. Our Science and Technology bill H.R. 5016 would allow emplacement of defense waste in a civilian repository without any licensing of defense facilities.

I therefore urge that this amendment be soundly rejected.

Mr. OTTINGER. Mr. Chairman, would the gentlewoman yield?

Mrs. BOUQUARD. I yield to the gentleman from New York.

Mr. OTTINGER. I just would like to set the record straight. I think we have achieved the best compromise that we could in this bill with respect to defense waste; but the testimony that we got in our committee was that there are no national security problems with putting the defense waste in a commingled repository, provided that the NRC was not empowered to go back and inquire exactly how the waste got there and the processes; so I do not want the record to be confused on that basis. I supported the gentleman from Massachusetts (Mr. MARKEY) in a similar amendment in our committee. I must reluctantly oppose him today, because the provision we have before us is a compromise agreement of which I am a part.

Mrs. BOUQUARD. That is the statement I just made, it does allow emplacement of defense waste in a civilian repository.

Mr. OTTINGER. That is correct.

Mr. PAUL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to take a moment at this time, if I may, to speak about the bill in general and not directly to this amendment.

I am in opposition to this bill, but I would like to explain my position on this. I find myself voting frequently here on some of these amendments with many individuals who have a strong disagreement and an antagonism toward nuclear power. I have no antagonism toward nuclear power. As a matter of fact, I think nuclear power is going to be the saving grace to this Nation and to the world some day as a source of energy. I am personally strongly in favor of nuclear power.

My reasons are somewhat different in opposing what we are doing here. I have no fear of hysteria associated with nuclear power. I think it is safe and efficient. The problem I have is that I think what we have done since the Second World War is that we have never allowed the marketplace to determine what it should determine, that is whether nuclear power is safe and efficient or not. What we have done is that we have subsidized its research and development. We have subsidized insurance and now we plan to subsidize and support industry in the disposal of nuclear waste. For so long nuclear power as an issue has been dealt with on an emotional level and I think it should be dealt with in terms of free market principles.

I think there is a good defense for nuclear power. We have had nuclear submarines for 30 years and this concern that nuclear generators are somewhat dangerous does not seem to hold much water when you think that many men have been sleeping beside nuclear generators for 30 years and we have had absolutely no ill effect from this.

When you compare nuclear power to coal, all of a sudden we find out that coal is the real culprit. The Office of Technology Assessment, a creature of this Congress, has declared that right now today we have 39,000 deaths per year from coal pollution.

And yet we, with our legislation here in the Congress, have actually encouraged coal production. It is estimated that in 3 years 50,000 people will die from coal pollution.

They also claim there is no insurmountable technical obstacle to safe disposal. I happen to believe that and I happen to think there are a lot of things in industry and in this country today that are more dangerous than nuclear waste and yet the marketplace can handle them.

What we are doing here is assuming the responsibility and the liability for people who make a profit off nuclear power. I think the risk and the danger and the liability of nuclear waste should go to those people who are making the money and that is the utility companies and whoever else uses nuclear power.

We should reject the notion that the Government should continue to fund R&D, the insurance and waste disposal. The liabilities and risks should not be passed on to the taxpayer.

My position is that Government should have a neutral position; that is, they should protect the marketplace, allow it to develop, but put the liability and responsibility on those who are in a position to make some profits off the nuclear industry.

For this reason, I object to the whole idea that the Government should assume this role of waste disposal. I think it is nothing more than a subsidy to big business and instead we should allow the marketplace to operate.

Even though it is my interpretation that nuclear power is good, we truly do not know if nuclear power is efficient and safe. Only the marketplace can determine this and what we are doing today is distorting the marketplace.

Mrs. BOUQUARD. Mr. Chairman, will the gentleman yield?

Mr. PAUL. I yield to the gentlewoman from Tennessee.

Mrs. BOUQUARD. Mr. Chairman, I thank the gentleman for yielding.

I would like to refer the gentleman to section 302(a) under Contracts, which specifically obligates the utilities to pay for the cost of this facility; so this, indeed, is not a cost to the Federal Government.

Mr. PAUL. Well, I know that if there is any reimbursement at all, if this was a true reimbursement and no assumption of liability by the Government, I do not think we would even have the program. We do not have a Government program to deal with sulfuric acid and other dangerous elements; so I think the fact that we are involved means that there will be some indirect subsidy to business.

Mrs. BOUQUARD. Well, I would remind the gentleman from Texas that at the time our industries built the present nuclear plants in place, it was planned that we would have reprocessing plants in place to take care of the waste to be disposed of. Because of the political debate of the past 5 years, we do not have a balanced nuclear energy program that completes the back end of the fuel cycle. The Federal Government in effect has created the problem, by not allowing reprocessing or providing a balanced energy program.

Mr. PAUL. My major point is that we distort the marketplace by not allowing the market to operate. We do not even know for sure, even though in my opinion we should have nuclear power, I think programs like this distort the market and we do not get the right information that we need to decide whether or not nuclear power is really safe; so I do not believe we should be subsidizing this industry.

Mr. STRATTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the gentleman from Massachusetts (Mr. MARKEY) has been setting up a straw man and then trying to knock it down. He has been alleging that there is nothing in here to take care of defense waste; but the gentleman apparently has not looked very carefully at the amendment that was adopted by the committee the other day, offered by myself on behalf of the Armed Services Committee.

Actually, there is no "Department of Defense waste." The waste that is generated that the gentleman takes exception to is Department of Energy waste stemming from the defense activities of the Department of Energy. But I would call the attention of the House—the gentleman from Massachusetts has been offering so many amendments on this bill that he may not have had an opportunity to read this one—but I would point out that in the amendment adopted by the House with regard to defense wastes, in section (b) of that amendment it says:

> Not later than two years after the date of the enactment of this Act, the President shall evaluate the use of disposal capacity at one or more repositories to be developed under subtitle A of title I for the disposal of high-level radioactive waste resulting from atomic energy defense activities.

□ 1215

And again in section 3:

> In the repository for the disposal of high-level radioactive waste resulting from atomic energy defense activities only shall be subject to licensing under section 202 of the Energy Reorganization Act of 1973 and comply with all of the requirements of the Commission, that is, the Nuclear Regulatory Commission, for the siting development, construction and operation of a repository.

So the gentleman from Massachusetts has set up a straw man and is hitting us over the head for something that is already included in this legislation.

The fact of the matter is that there is no "two-track solution" as he is suggesting, one for civilian waste and another for what he has referred to as "the sacred cow of defense security." Incidentally, I wonder where this country would be if it had not been for that so-called sacred cow over the last 30 to 35 years of this Nation? As a matter of fact, as we are debating this bill today, it is the 40th anniversary of the chain reaction in Chicago brought about by the atomic pile created by Enrico Fermi. I think we ought not to try to downgrade and denigrate the achievement that that great refugee from fascism managed to contribute to the safety and security not only of the United States but of the entire free world.

Indeed, if the gentleman from Massachusetts had done his homework, he would have known that the Committee on Armed Services, in making our report, on page 11 says this:

> The Committee on Armed Services amendments are designed to prevent the establishment of storage facilities for civilian-generated nuclear waste at facilities now being operated for national defense purposes. The committee emphasizes that the recommended amendments do not foreclose the disposal of defense-generated radioactive wastes in such repositories as may be established by this legislation.
>
> The amendments do not mean that some parts of the real estate under the control of the Department of Energy may not be used for the interim storage of civilian-generated radioactive wastes. Moreover, the committee amendments do not exempt atomic energy waste defense activities of the United States from any law or regulation that now applies to those activities.

The CHAIRMAN. The time of the gentleman from New York (Mr. STRATTON) has expired.

(By unanimous consent, Mr. STRATTON was allowed to proceed for 2 additional minutes.)

Mr. STRATTON. Mr. Chairman, if the gentleman from Massachusetts had really been concerned about this, he should have realized that just yesterday in the authorization bill for the Department of Energy, which was passed unanimously, we had programs authorizing more than $500 million for defense waste management, research, development, and construction of waste management facilities.

But the gentleman was not even on the floor when this bill was up, so I do not think we can take his amendment very seriously.

The defense activities of the Department of Energy have been pursued with great care and precision. The House Committee on Armed Services has managed them with great skill, and I think the amendment must be rejected.

Mr. MORRISON. Mr. Chairman, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from Washington.

Mr. MORRISON. I thank the gentleman for yielding.

Mr. Chairman, I want to agree with the gentleman's statement. I point out that most of the U.S. military waste is in my district in the State of Washington. The military is acknowledged to be about 5 years ahead of the civilian processing and handling of nuclear waste.

I do not want to see this legislation slow down the excellent progress being made in this particular area, so I suggest we defeat the amendment.

Mr. STRATTON. Mr. Chairman, I think the gentleman is making a very good point: That the Department of Energy has been on the ball in this aspect for many, many years. The civilian waste problem is now finally beginning to be considered in this House, although it is taking us a good deal of time.

The gentleman from Massachusetts is trying to louse up the defense program while the civilian aspect is being considered.

Mrs. HOLT. Mr. Chairman, will the gentleman yield to me?

Mr. STRATTON. I yield to my colleague, the gentlewoman from Maryland.

Mrs. HOLT. I thank the gentleman for yielding to me.

Mr. Chairman, on previous occasions I have stated my support for H.R. 7187. I have also indicated my deep concern over the complicated nature of the bill's provisions. These do not reflect the technical or engineering problems that might arise in selecting a site and constructing an R&D repository or permanent repository. The interim storage provisions are probably more complicated than was the Apollo program plan to put men on the Moon.

This is unfortunate for several reasons. First, it adds years of convoluted political approval paths to what should be engineering decisions. Second, and of greater concern to me, is the constant effort by some to involve atomic energy defense activities in this maze. The amendment offered by the gentleman from Massachusetts is just such an effort. It has no merit and should be defeated.

As defined in section 2 of H.R. 7187, the term "atomic energy defense activity" means any activity of the Secre-

tary of Energy performed in whole or in part in carrying out any of the following functions: Naval reactors development; weapons activities including defense inertial confinement fusion; verification and control technology; defense nuclear materials production; defense nuclear waste and material by-products management; defense nuclear materials security and safeguards and security investigations; and defense research and development.

When the Armed Services Committee considered H.R. 3809, the major effort was to assure that the atomic energy defense activities were excluded from the provisions of the act. This thought was carried over into H.R. 7187 under section 101(a). As mentioned by Chairman STRATTON, he will introduce an amendment to have the "applicability" section removed from title I and incorporated in a new section 8, since the atomic energy defense activities are not logically included in a title on the disposal and storage of waste.

The amendment offered by the gentleman from Massachusetts would also ignore logic and remove the exclusion due atomic energy defense activities. Perhaps that stems from the serious misconception in this House that no one is in charge of our defense nuclear waste program and that at some time in the near future we will be overwhelmed by nuclear waste. It is difficult to trace the origin of such rumors which would be laughable if it were not for the fact that well-meaning but uninformed citizens and House Members, repeat those absolutely incorrect statements.

We do know how to handle nuclear wastes in this country, and so do the experts in many other nations. Safe interim storage has been a fact, not a wish, for 40 years. In that time not one member of the American public has been seriously inconvenienced, let alone harmed by nuclear waste. If any of my colleagues have knowledge to the contrary, I would be interested in hearing it.

The defense waste processing facility will provide the final step in the interim processing of the high-level waste at Savannah River for final disposal. The facility which should be ready for hot operations by 1990, will immobilize the high-level waste sludge, which contains most of the long-lived radionuclides, for storage, transportation to, and disposal in a geologic repository.

The waste isolation pilot plant, located near Carlsbad, N. Mex., will demonstrate closure of the defense nuclear fuel cycle. The WIPP facilities will be capable of routine operations to receive, inspect, package, and emplace pilot plant quantities of remote-handled high-level and transuranic waste and contact-handled waste in an environment typical of a repository. This research and development facility will be sized to handle quantities typical of defense nuclear waste inventories and anticipated generation rates.

We often hear catchy phrases such as: "Nuclear waste; let us have more than a 10-percent solution." This is associated with the rumors predicting total inundation by defense nuclear waste. As a matter of fact, I frequently am told that the waste repository bill before the House is not satisfactory because it does not cover the interim waste storage or other activities of the defense nuclear waste program. That is true. The bill must not cover the defense nuclear waste program or any other atomic energy defense activity. We on Armed Services hope to assure that the smoothly working waste program we support does not become involved with anything like the ponderous and complex practices and procedures to which H.R. 7187 is dedicated.

In less than 10 years the defense waste program will be capable of turning out glass encapsulated high-level waste suitable for repository burial. Those logs will wait for a repository to be built. It will not be the other way around.

I agree to the need of this Nation for a permanent repository for nuclear waste, and temporary storage for spent fuel from commercial power reactors. But we cannot afford the repository and temporary storage if the legislation which provides for such facilities will seriously affect national security.

Mr. Chairman, I support the one-House to sustain version of the bill. While I agree that States should participate in the siting, construction, and operation of high level waste repositories, I believe that we all must recognize that we are dealing with a program of national significance: the development of atomic energy technology. It is contrary to the fundamental purposes of the Atomic Energy Act to give a State veto or quasi-veto authority over a repository, national laboratory, or any other nuclear facility. Moreover, it is contrary to the supremacy clause and interstate commerce clause of our Constitution and to decisions of the Supreme Court. I would also add that a veto or quasi-veto is not required to protect health and safety. Under the Atomic Energy Act, the Federal Government will pervasively and comprehensively regulate for these purposes. State vetos and duplicative or differing requirements are contrary to the well-established Federal regulatory framework. Indeed, the additional State interference may in fact jeopardize health and safety and our national defense as well as result in a waste of taxpayers' and ratepayers' money. Vetos and superfluous regulatory demands are generally not permissible with respect to the federally regulated activities involved. We should not permit them in this context. The Fuqua-Broyhill version of section 115 provides ample room for State participation and is consistent with existing law and our Constitution. I support it and we all should.

Mr. STRATTON. I thank the gentlewoman.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. Is there further debate on the amendment?

Mr. FOGLIETTA. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, as a member of the Armed Services Committee, I was part of the debate on whether defense-produced nuclear waste should be subject to the provisions of this bill. I worked closely with my colleague from Mississippi (Mr. MONTGOMERY) and I was glad to see the committee accept his amendment to subject military waste at least to the States rights provisions of the bill.

I was pleased with the Armed Services Committee's actions, however, only in a limited manner. I felt at that time that subjecting defense-produced waste to the States rights provisions of the bill was the best that we could do in the Armed Services Committee. Yet, it was not nearly what I feel is most appropriate.

As we have already heard today, almost 90 percent, by volume, of nuclear waste generated in our Nation is the result of defense production. To pass a national, comprehensive program for disposal that only applies to about 10 percent of our waste makes little sense.

Concerns have been raised that having military nuclear waste come under the provisions of this bill would subject the military to a burdensome and oppressive bureaucracy that could slow down our weapons production systems. I am not convinced that such concerns are valid.

Some of my colleagues have expressed a concern that our Nation's security could be threatened by giving the Nuclear Regulatory Commission responsibility for disposal of nuclear waste produced by our military. They are afraid that the NRC might divulge information about the waste that could be useful in figuring out exactly what the military is producing. I point out that the Energy Reorganization Act of 1974 requires that the NRC license all repositories. Yet, the NRC is not in a position to give out information about the military waste. Access to classified and restricted information is controlled by the originating agency.

Mr. Chairman, we do need a nuclear waste disposal bill. But we need a bill that is truly comprehensive. Excluding

90 percent of our Nation's waste in order to arrive at a bill that has a chance of passing is not a good trade-off. The environmental, health, and safety concerns that surround nuclear waste disposal are every bit as much a factor when disposing of defense-produced waste as with commercial, civilian waste. I strongly support my colleague, Mr. MARKEY's amendment, and I hope that my colleagues will join me.

Thank you.

Mr. STRATTON. Mr. Chairman, will my colleague on the Committee on Armed Services, the gentleman from Pennsylvania, yield to me?

Mr. FOGLIETTA. I yield to the gentleman from New York.

Mr. STRATTON. I thank the gentleman for yielding.

Mr. Chairman, is the gentleman in the well aware that the amendment of the gentleman from Massachusetts (Mr. MARKEY) which he has just said that he is supporting would actually knock out the so-called Montgomery amendment which was adopted with the support of the gentleman from Pennsylvania in the Committee on Armed Services? I do not think he may be aware of that.

Mr. FOGLIETTA. My understanding, Mr. Chairman, and I expressed this to the gentleman from New York, is that this amendment would encompass and would expand that amendment and not knock it out totally.

Mr. STRATTON. If the gentleman will yield further to me, I have just been in consultation with the gentleman from Mississippi, the author of the amendment, and he is bleeding because of the result of the Markey amendment, were it to be adopted. So the gentleman might want to consult with the gentleman from Mississippi (Mr. MONTGOMERY).

Mr. MARKEY. Mr. Chairman, will the gentleman yield to me?

Mr. FOGLIETTA. I thank the gentleman from New York, and I yield to the gentleman from Massachusetts.

Mr. MARKEY. I thank the gentleman for yielding.

Mr. Chairman, I want to assure the gentleman from Pennsylvania (Mr. FOGLIETTA) that the gentleman from Mississippi (Mr. MONTGOMERY) is in fact very pleased that we are strengthening whatever provisions he put in there because he expressed a very strong interest in making sure that the States and Indian tribes have all the protections that are possible.

What this amendment does is to take the Montgomery formulation and put some real flesh on it to make sure those States and Indian tribes are given the protections that will be given to other areas in which civilian nuclear facilities are placed.

So taking the spirit of the Montgomery amendment in the Committee on Armed Services, we have helped to build upon it, to make sure that of those protections he was looking for are included, and we have done so in a specific fashion.

Mr. FOGLIETTA. That was my understanding also. I thank the gentleman from Massachusetts (Mr. MARKEY).

Mr. WEISS. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I want to commend the gentleman from Massachusetts for the series of amendments that he has offered. What we are contending with is one of the most serious problems to face the people of this country. Yet there is an attempt in this body, in spite of all the danger signals, all of the near disasters that have befallen the people of this country from nuclear power over these past few years, almost as if God were warning us, to terminate the discussion with the briefest of mention.

So the gentleman from Massachusetts (Mr. MARKEY) is to be commended for insisting that this subject deserves and must be given a thorough airing.

Mr. MARKEY. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I yield to the gentleman from Massachusetts.

Mr. MARKEY. I thank the gentleman for yielding.

Mr. Chairman, I would like to, if I may, clear up a number of misstatements that have been made by opponents of this amendment in this debate.

First, the gentleman from New Mexico says that 97 percent of the radioactivity is in the civilian waste; therefore, only 3 percent of the problem is military, so that does not make it that bad of a problem. He leaves a misimpression, however. Ninety-seven percent of the total radioactivity might be in the civilian waste, but 90 percent of the volume of the waste, is military waste.

Let me just give you an idea of what that means. All the civilian waste in the country is about 104,000 cubic feet, which is about one football field 2 feet deep. Military waste is about 1,130,000 cubic feet, if solidified. However, defense waste is in a very dilute liquid form right now, so in terms of the total amount of nuclear waste, it is many, many times greater on the military side.

The radioactivity is less. That is true. If one is exposed to it, one might die in an hour instead of only the 10 minutes that it might take if you are exposed to civilian waste. But in terms of the civilian population, it is almost impossible for them to be able to differentiate the effect it is going to have on their families.

Now, moving on to the next misstatement, the gentleman from California asked why we should talk about the Defense Department since they are doing such a terrific job taking care of the waste problem; why do we not just leave well enough alone?

Unfortunately, the gentleman from California is totally wrong. The Defense Department does not have a permanent waste program. They store it just the way the civilian program stores it. They do not have the vaguest idea what to do with it any more than we do. So anyone out there who has been misled by any of the people who have gotten up saying, "do not touch the Defense Department; they are doing such a terrific job," believe me, they are wrong. The Department of Defense does not know what to do yet about permanent disposal. They do not want to have a good, tough, strong environmental program in place and they are concerned about being bound by regulations that are going to insure that the public is protected. They do not know what to do about permanent disposal either.

The gentleman from New York says I set up a strawman; the bill already says defense wastes can be put in civilian reactors; so why is the gentleman from Massachusetts so concerned? Of all the arguments that are spurious on the floor of this body, the two that I have always found to be the most interesting are the ones that say it is not needed and that it is already in the bill and it is redundant.

How could one possibly argue against an amendment that is redundant? We ought to just accept it and move on. Why waste the time of the House?

The reason the gentleman knows it is not a strawman and the reason he fights so hard is, in fact, because there is no guarantee that defense waste is going to be covered in H.R. 7187; there is no protection for the environment; there is no guarantee that the States rights are going to be vindicated; or that we are going to have judicial review.

All of those things have to be included and they are not included.

The gentlewoman from Tennessee also made a terrible mistake in misstating the effect of this bill. Let me make it very clear. I specifically drafted the language in the amendment so that we made sure that everyone understood that we were not mandating that defense waste be put in civilian facilities. If defense facilities are built though, they have to be built under the same standards as civilian facilities. They could be kept under defense control, although the Department of Energy would be constructing and monitoring them.

□ 1230

In addition, the language of the amendment states:

The Commission (NRC) shall not have any authority over the production or handling of any high-level radioactive waste or spent nuclear fuel resulting from any atomic energy defense prior to its delivery to a repository * * *

So, the Defense Department does not have to hand over any of this waste, but if it does, it does so only when it is assured that it has disguised any possible Defense secrets that are in the material. Up until that point, the NRC has no authority over defense wastes.

Of all of the arguments which have been made against my amendment, every one of them is totally and completely wrong. They are erroneous.

The CHAIRMAN. The time of the gentleman from New York has expired.

(At the request of Mr. MARKEY and by unanimous consent, Mr. WEISS was allowed to proceed for 1 additional minute.)

Mr. MARKEY. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I will be pleased to yield.

Mr. MARKEY. Let me state as succinctly as I can that national security interests are not jeopardized by my amendment. All of this waste stays under Defense control completely, totally. They do not have to give it up. All I am saying is this: A bill ought to be comprehensive. It ought to include all waste. Defense waste ought to be covered by the same standard as civilian waste, but at the same time the Defense Department, working with the Department of Energy, ought not to be compelled to put this stuff in civilian facilities. If they do build their own permanent geologic repository in the environment of the United States, then they ought to be bound by the same regulations as civilian facilities.

That is it; quite simple; nothing up the sleeve; nothing clandestine; right out front. Let us protect the people; let us protect the States; let us have a comprehensive nuclear waste bill. Let us not fool the American people into believing we have solved the problem when 90 percent of it is unresolved.

Mr. UDALL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, this has been one of the most difficult bills I have had to handle in a long time. It was assigned to six different committees. Time was running out, and another 2 years apparently going down the drain. We finally made an agreement among the major committees involved on this vehicle which we are bringing to the floor.

There are things that I do not particularly strongly support that are in the bill, which I am bound by my agreement with my colleagues to support. There are some pretty good arguments made by the gentleman from Massachusetts. We should not have two kinds of facilities. We ought to have a single track, but we have got to this late stage of the session and we have got to put first things first.

We are making in this bill, if we get it passed, this final decision to get ourselves a deep geologic storage facility for high-level nuclear waste. We are going to have a mechanism by which this can be done.

I think it is a very difficult process to go through, to get a program authorized even for the civilian one. I said earlier in the debate that I think the Defense people are going to be coming knocking on the door when we get this thing ready to go in a few years. I hope that we will be ready to take their waste along with the civilian waste. But, I want to emphasize that we come out all right anyway at this point. We come out in pretty good shape, because the President is required to decide within 2 years whether the facility that we are going to get licensed under this bill shall also be used for military waste. I think when people look back and see the difficulty we have gone through simply to get this far, I think the President's decision will be favorable toward uniting the civilian and defense repository programs.

Second and finally, this bill has a lot of baggage already that makes it pretty hard to carry. I would emphasize that the bill, even if the Markey amendment is defeated, will have in it a requirement for licensing. NRC has to license facilities for defense or civilian uses. It will not have the other protections in addition to licensing that Mr. MARKEY has talked about, but it is a pretty good job. It is the best we could do. I am personally going to vote against the amendment, and I hope we can get on with the passage of the bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts (Mr. MARKEY).

The question was taken; and the chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. MARKEY. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 105, noes 281, not voting 47, as follows:

[Roll No. 408]

□ 1245

Mr. VANDER JAGT and Mr. ALBOSTA changed their votes from "aye" to "no."

Mr. SHANNON and Mr. DICKS changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

(By unanimous consent, Mr. LOTT was allowed to proceed out of order.)

LEGISLATIVE PROGRAM

Mr. LOTT. Mr. Chairman, I have asked for this time for the purpose of getting the schedule for the rest of today and tomorrow and, hopefully, for next week, and for that purpose I yield to the gentleman from Washington (Mr. FOLEY).

Mr. FOLEY. Mr. Chairman, I thank the distinguished Republican whip for yielding.

Mr. Chairman, with respect to the question advanced by the gentleman from Mississippi, the distinguished Republican whip, we will continue on the present legislation, the nuclear waste disposal legislation, until completed today, and, time permitting, we will take up the conference report on the Nuclear Regulatory Commission authorization. That will conclude the business of today.

On tomorrow, Friday, the House will meet at 10 o'clock, and we will adjourn no later than 3 o'clock in the afternoon to consider the fiscal 1983 Interior and related agencies appropriation legislation. Members should be advised that votes are expected on that legislation tomorrow.

I am sorry that I cannot accommodate the gentleman from Mississippi on the schedule for next week, but we will be happy to make the announcement on next week's schedule on tomorrow.

Mr. LOTT. The gentleman does expect, though, looking toward next week, that we will be in session on Monday, starting at 10 o'clock, and we can expect to have votes on Monday; is that correct?

Mr. FOLEY. The gentleman is correct. We expect a full schedule next week, Monday through Friday, and it is expected that the surface transportation legislation will be on the floor, among other things, next week. Members should anticipate that votes will be taken on bills on Monday. Meeting hours will be announced later, and may be adjusted to accommodate our respective caucus and conference meetings in the mornings.

Mr. LOTT. Does the distinguished majority whip have an idea at this time of the exact meeting time for this week?

Mr. FOLEY. Well, we shall announce the meeting times later. They may have to be changed because our respective parties will have organizational meetings during the early part of the week.

Mr. LOTT. Mr. Chairman, does the gentleman hope to be able to announce the details of the schedule for next week later on this afternoon? Will that announcement be made today or tomorrow?

Mr. FOLEY. We expect to announce the details of the schedule for next week on tomorrow.

Mr. LOTT. Mr. Chairman, I thank the gentleman.

AMENDMENT OFFERED BY MR. MARKEY

Mr. MARKEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MARKEY: In section 112(b)(1)(A), strike out the fourth and fifth sentences and insert in lieu thereof the following:

"Each recommendation of a candidate site under this subsection shall include a detailed statement of the basis for such recommendation."

In section 112(b)(1), strike out subparagraph (B) and redesignate the subsequent subparagraph accordingly.

In section 112(b)(2), strike out "assessment described in paragraph (1)" in the last sentence and insert in lieu thereof "impact statement".

In section 112(e), strike out "Except as otherwise provided in this subsection, each" and insert in lieu thereof "Each".

In section 113(b)(1), insert the following new subparagraph before subparagraph (A) and redesignate the subsequent subparagraphs accordingly:

(A) an environmental impact statement, prepared in accordance with section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), of the site characterization activities planned for such candidate site and a discussion of alternative activities relating to site characterization that may be undertaken to avoid any adverse impacts, the issuance of which environmental impact statement shall be considered to be a final agency action subject to judicial review in accordance with the provisions of chapter 7 of title 5, United States Code, and section 119;

In section 113(b)(2), insert "and environmental impact statement" after "plan" each place it appears.

In section 113, strike out subsection (d) and insert in lieu thereof the following:

(d) PRELIMINARY ACTIVITIES.—Except as otherwise provided in this section, (1) each activity of the Secretary under this section that is in compliance with the provisions of subsection (c) shall be considered a preliminary decisionmaking activity; and (2) no such activity shall be considered to be a major Federal action under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), or to require any environmental review under subparagraph (E) or (F) of section 102(2) of such Act.

In section 119(a)(1)(E), strike out "112(b)(1) or".

Mr. MARKEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. MARKEY. Mr. Chairman, this amendment is another in a series of amendments that have tried to give full protection to the States in order to insure that they are given adequate safeguards against the abuse of the environment in the State. This deals with the question of environmental assessment and environmental impact statements that will be conducted in the process of site characterization.

What is site characterization? Under this legislation the Secretary of Energy shall recommend to the President five candidate sites. That means five different places in the country that could serve as the permanent repository.

□ 1300

It also requires that not less than two different geologic media be tested among these five sites as the location of the permanent repository.

As the Department of Energy goes out into these different States taking large areas of a State and trying now to decide whether or not it has the proper characteristics for the permanent repository, permanent disposal for 20,000 years of nuclear wastes, clearly there are going to have to be some very serious geologic tests which will be conducted before a final determination can be made as to the appropriateness of one of these five for the permanent site.

We now have to decide what should be the protection given to this State as

these sites are being disturbed, as the environment is being disrupted, as shafts are being drilled.

At what point should there be an environmental assessment, an environmental impact statement, to insure that proper protections are made?

Under the NEPA law, the National Environmental Policy Act, we set up a series of tests which would be undergone to insure that the invironmental protection was guaranteed, no matter what action was taken, Department of Energy, Department of Defense; no matter what activity is conducted in our country NEPA would apply as a standard, as a minimum standard of protection for the environment.

Under the law which is applied to any other project in any other aspect of American life there is a standard. First you have an environmental assessment after an idea is formulated. In this instance the idea is let us drill holes over four or five States' areas and find out which would be the best place to site a permanent repository.

The environmental assessment is limited in scope. It is less scientific and it has less public access but it is reviewable; you can take that decision to a court and you can say "I do not think they did a very good job on that environmental assessment."

Assuming that that then is affirmatively resolved, you can move on to the next stage which is a full environmental impact statement. There you would have more scientific data, more alternative would be considered, a greater scope would be included, and again it would be reviewable by a court of law to insure that the NEPA standards were being upheld.

At that point you would then be able to engage in the activity that you were contemplating. In this instance it would be the beginning of the drilling of shafts, the disruption of the environment, and in some instances the inclusion of some nuclear wastes for testing to see whether or not a site has the proper characteristics to be the permanent repository.

This would go on in four or five facilities.

What does this bill do? This bill eliminates almost all of the protections which were built in for in many instances much minor disruptions of the environment.

We substitute a system that says this: We shall have an environmental assessment. Remember, there is a great difference between an environmental assessment and an environmental impact statement.

An environmental assessment has a much lower burden of proof. It has much of a legalistic aspect to it.

Here is the process that we are now going to engage in: An environmental assessment will be made but the environmental assessment is, as we all know, not an environmental impact statement. It is more legalistic, it is more passing of paper between parties. There really is no indepth scientific analysis as to what the effect of any of these experiments are going to have upon the terrain, upon the environment, in a particular State.

Most importantly, reversing what is the present law under NEPA, we take out judicial review with this process so now after only an environmental assessment, after only a perfunctory exchange of information between parties, the Federal Government now has the right to come in and drill.

No environmental impact statement will be completed before they drill or before DOE puts nuclear wastes in that hole to determine what the effect upon the environment will be.

At this point, after all of the experiments have been conducted, after all of the nuclear wastes have been deposited, after the shafts had been drilled perhaps down as far as 2,000 or 3,000 feet, after all of that has been done, now the President selects one of the five sites to be the final repository.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. MARKEY) has expired.

(By unanimous consent Mr. MARKEY was allowed to proceed for 5 additional minutes.)

Mr. MARKEY. In picking that site the President triggers the mechanism to initiate an environmental impact statement. So after you have drilled the shaft, after you have put down some nuclear wastes to test the site, after a process that has eliminated all judicial review has been completed, at this point, with no real public access, with no real judicial review, now you make a recommendation to the President saying we have found the site which we have totally disrupted and the other four sites, which might have been marred permanently. But at this we will have a process that will require an environmental impact statement.

That is what my amendment does. It puts back into place the NEPA law. It says that NEPA, a law which affects all other environmental or potentially environmentally disrupting activities in this country, that this activity as well shall be guided by that law.

It is a good law. It is a wise law. It is a law that the gentleman from Michigan and many others in this body fought long and hard to put on the books.

My argument is a simple one. It is that we do not know what we are doing. We do not have the vaguest idea what the effect of this legislation is going to be.

We are talking about spending $100 million per site. That is five sites, $100 million apiece, without any environmental impact statement, without a real environmental assessment, and with no judicial review.

So these States are going to be in a position in which there will be a tremendous amount of activity in a State without any real protection for the State.

This amendment then has the intention of just building in those rudimentary protections that have traditionally been a part of the law in this country.

We could go back to Lyons, Kans., back 10 years ago when without adequate protections they dumped a couple of hundred thousand gallons of water in a hole in Lyons, Kans., that had been designated as the site for the permanent repository in this country. What happened? They came back a couple of days later and all of the water had drained out of the geologic repository that was going to be the site.

There was no State participation, no real review, no real ability on the part of the State or the local community to have a real participatory role in any of the decisionmaking processes.

No one wants to block the siting of a premanent repository. We all share a common goal. Let us not in a 15-year process that we have to do the job right sweep out of the way rights and protections which were built into the law over the past couple of decades to insure that when serious potential disruption to the environment occurs that we have at least built in some minor roadblocks that will have to be hurdled by a bureaucracy which is hell bent on getting a solution to political mandate.

If we can at least give the people that kind of check and balance I think we have built a fundamental protection into this law.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. MARKEY. I am glad to yield.

Mr. OTTINGER. I think the gentleman's amendment is an exceedingly important one and I only wish I could support him.

I think an environmental impact statement at this juncture would be entirely appropriate and badly needed. The best we could get in our negotiations to reach an accommodation on this bill, however, was to have an environmental assessment at this juncture with an accelerated judicial review.

I think the gentleman misstated when he spoke and said there would be no judicial review. That being a part of the compromise, I have to support it.

But I think that the considerations and the arguments the gentleman makes ought to be carefully listened to by the House and they are very cogent indeed.

Mr. MARKEY. I thank the gentleman and again restate my hope that the amendment is adopted.

Mr. BROYHILL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the gentleman in his debate I think has tended to confuse Members who were following this debate with some of the statements he has made.

The fact is that we have provided for an environmental assessment at the characterization stage.

The only thing the gentleman has to do is to turn to page 19 and see that that environmental assessment which is issued shall be considered a final agency action subject to judicial review. That is in the law.

I would have to call this amendment the catch-22 amendment because, as we read it, an environmental impact statement would be required before the Secretary could even set foot on the property, on the proposed candidate site.

By inserting a full-blown environmental statement requirement, with full-blown judicial review at this point, I can assure you it is going to have the effect of delaying the siting of a final repository for years to come.

As I pointed out, the bill already fully addressed the environmental concerns at this stage of the siting process. It requires extensive environmental assessment which is judicially reviewable.

That assessment includes some of the following, and I would like to point this out to the Members:

An evaluation of suitability of the site for characterization, and they must use the guidelines that are spelled out in section 112 in that evaluation.

Also an evaluation of the effect of the site characterization on public health and safety and the environment.

Additionally, a reasonable comparative evaluation with other sites.

A description of the decision process by which any candidate site was recommended.

Also an assessment of regional and local impact.

The gentleman has made the implication to Members that no public hearings are required. That is not true. The Secretary shall hold public hearings in the vicintiy of such candidate site to inform residents of the area in which such candidate site is located of the proposed recommendation and to receive their comments.

In addition, the act goes on to require the Secretary to consult and work with the Governors of the legislatures of the States and the governing bodies of any Indian tribes that might be affected.

Also, there is another section that we wrote in here at the request of the Governors to require that upon any written request for information by a Governor or by a legislature or by the governing body of an Indian tribe that the Secretary shall reply in writing to such request within 30 days of the receipt of such request.

If the Secretary fails to respond within that timeframe then the Secretary shall immediately suspend all activities in such State and shall not renew such activities until a written response from the Secretary has been given.

I could go on and I wish I had time here to go on and recite all of the various subsections and sections of this bill that we included to assure consultation and cooperation with the States.

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. BROYHILL. I yield to the gentleman from New Mexico.

Mr. LUJAN. I think the gentleman is correct in what he said. I think that the entire intent here is to be sure that the Secretary goes in and makes the proper assessment, that if we require him to make an environmental impact statement before he steps on the ground, how in the world could we ever get the information in order to make the environmental impact statement?

So the whole idea is to get moving. As long as you are not going to put the repository on a particular site there is not the need for the full-blown environmental impact statement. But we have done environmental assessments before that, so that we can see what problems we are moving into.

It does not make sense that for a site the Secretary might just look at and discard that an environmental impact statement would be necessary.

Mr. BROYHILL. It is very possible in judicial review that a judge could find that the environmental impact statement was not sufficient because the Secretary was not able to go in and do a proper evaluation of the site itself.

□ 1315

Mr. LUJAN. That is correct. And the gentleman correctly defines it as a catch-22 situation, because if you cannot get onto the property you cannot make an environmental impact statement.

Mr. UDALL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the bill now has provisions which basically do the job that our colleague, the gentleman from Massachusetts, wants to do. We have got to keep in mind that our goal in this bill is to put in motion a process which in about 10 or 12 years will give us one specific permanent deep geologic repository. The bill sets up a process that leads us in that direction. It is important that we go as fast as we can, but it is important that we protect the environment, that we have environmental impact statements, that we have judicial review, and I think we have done a fairly good job in all of these areas in the language now in the bill.

The procedure is that five States will be nominated by 1984. With regard to each one of those, we do not make an environmental impact statement but an environmental assessment, which, as a result of specified criteria, is just about as good as an environmental impact statement. Then we drill three of those five, get additional information, and then we pick one of them. And after we have picked the one candidate site as the most likely one, then we do the complete environmental impact statement. Then is when it is needed. Then is when all the questions will have been raised.

So I think we do basically what the gentleman from Massachusetts is trying to do, and I would hope that the amendment would be defeated.

Mr. GOLDWATER. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I would suggest to my colleagues that this amendment neither is burdensome and does not really provide any substantial additional environmental protection. I believe that these multiple reviews that would be required under this amendment would, in essence, delay a final repository until after the year 2000.

Now, the committees involved in writing this legislation over the past 2 or 3 years have been greatly concerned about complying with the NEPA regulations, and it has been discussed and debated at great lengths. The language in this bill does represent a compromise, but, at the same time, keeping with the spirit of the National Environmental Policy Act, and also creates the vehicle in which we can realize a repository.

In essence, what the authors of this legislation have provided is a NEPA road map, directions that are specific, so that it will not be challenged or, if it is challenged in the courts, there is specific language and intent which can be referred to.

I would also point out that, in addition to this language, which is very specific in addressing ourselves to the environmental impact, we also must recognize that the States are playing a very specific role in their concern over the environment and the impact upon their areas of jurisdiction. They are concerned, and they will be looking at the impact of such a site selected. In addition to that, in this bill the Nuclear Regulatory Commission is required to monitor and to follow and to look at the whole process, and then to make recommendations as we proceed to refine the whole process.

So I think this amendment is really a lot of smoke because the issue at

hand has been very thoroughly discussed, addressed, and, I think, provisions made that will take care of the great concern that we must and should have over any impact it has on our environment.

Mr. Chairman, I would urge the defeat of this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts (Mr. MARKEY).

The amendment was rejected.

The CHAIRMAN. Are there any further amendments permitted under the rule?

● Mr. OTTINGER. Mr. Chairman, the consensus bill under consideration before the House today will establish the process of finding a permanent solution to the problems associated with nuclear waste. For almost four decades, Government policies have allowed ever-increasing quantities of radioacitve materials to be generated without providing for disposal of these materials in a safe and environmentally sound manner.

Unfortunately, past Federal efforts to establish demonstration repositories have met with serious problems. DOE's history of failures and false assurances to Congress and the public give little cause for confidence. In 1970, DOE assured us that the salt domes at Lyons, Kans., were ideal for a waste repository and that all their geological, hydrological, and other scientific tests confirmed this. DOE proposed legislation which was narrowly defeated in the House providing for permanent storage there. Shortly thereafter it was discovered that the Lyons, Kans., repository leaked. Similar false assurances and problems were encountered at the WIPP site chosen by DOE as a repository for military waste. The past failure to dispose of high-level radioactive materials will require rebuilding public confidence in the ability of the Government to safely dispose of these materials.

The bill before us today is by no means my ideal bill, but nonetheless it comes close enough to establishing a sound policy for the development of a repository that I reluctantly support it. When H.R. 6598 was reported from our committee it was the unwholesome progeny of greed, with wholesale elimination of participation by the public and State and local governments and seriously truncating environmental, NRC, and judicial review. I was discouraged that these extreme industry positions adopted by the narrowest of votes in our committee, threatened the hopes of many that a consensus could be reached on this long overdue policy.

Fortunately, following the actions of the various committees, we were able to fashion a consensus bill. The bill incorporates the provisions, and the legislative history, of H.R. 3809, H.R. 6598, and H.R. 5016. It still includes some provisions that I do not like, but significant changes have been made. And I feel that most importantly, we now have a bill which will give us a start toward disposing of these wastes.

I am pleased that the consensus bill before us provides for a better review of proposed repository sites prior to their being recommended for site characterization. It is important that sites are selected based on geologic suitability rather than on the basis of convenience. I am also pleased that the bill contains no special interest provisions which would absolutely exclude any one site. And I believe it is crucial to the success of the program that the States are given strong participation rights, including the right to disapprove a site unless both Houses of Congress agree that a repository should be located there.

While I still strongly believe there is no need for a Federal interim storage program, I believe the consensus bill has made a number of improvements which will help to insure that the program will be a last resort program, and that it will be run as safely as possible.

I also commend the chairman of the two committees on which I serve—Energy and Commerce and Science and Technology—for fashioning a compromise to blend the R&D activities with the repository program. The consensus bill is designed to insure that the safeguards and protections in the development of a repository contained in the Energy and Commerce and Interior bill will not be undermined by the development of an unlicensed test and evaluation facility.

The original bill, with request to monitored retrievable storage, had impossible deadlines and unprecedented restrictions on NEPA and the NRC licensing process. However, I believe that the Udall amendment has made that provision acceptable.

The Secretary must promulgate guidelines which will be the basis for the selection and subsequent evaluation of site as a potential location for a repository. The geologic condition of the site is stated to be the primary consideration in the selection and evaluation of a site. The fundamental premise of the bill is that, for the first disposal facility, a geologic formation deep in the Earth's core is most likely to provide the greatest amount of protection of the public health and safety for long-term isolation of these highly toxic substances.

The decision to go with deep geologic disposal is based on a belief that, no matter how well crafted, no manmade barrier is likely to last the eons during which the radioactive waste must be contained. We cannot be sure of the integrity of the packaging for decades, much less the thousands of years during which the waste will be active. It is expected that the engineered barrier will be developed to provide the greatest possible degree of containment, but it is not anticipated that the barrier will be used to justify or improve the ability of the host formation to provide the ultimate isolation.

The monitored retrievable storage (MRS) proposal contained in this act provides a necessary backstop in the event the geologic program runs into unexpectedly difficult technical problems. Although this is considered unlikely, the MRS proposal will insure that shorter term engineered containment alternatives receive proper consideration and development.

Under the repository program the Secretary is required to nominate five candidate sites in two different geologic media by July 1984 and at least one additional site in an additional medium by February 1985. Although these sites can be nominated at any time after the site selection guidelines have been published, the purpose of requiring a specific minimum number of sites and media is to encourage the Secretary to consider media other than salt and areas other than those with which the Department is most familiar. It is therefore anticipated that the Secretary will carefully review a range of potential candidate sites before recommending those which he believes most likely to prove to be suitable

Since only three of the six nominated sites need be characterized for environmental review of licensing purposes, it is anticipated that the Secretary will perform ongoing evaluations and reviews which will provide at least two suitable alternatives to the site eventually recommended for the repository.

In the environmental impact statement accompanying the recommendation of the repository site, the Secretary is required to discuss three sites at which a preliminary determination has been made that such sites are suitable for the development of a repository and at which site characterization activities have been completed. While this requirement is not intended to force the Secretary to demonstrate site suitability to the same degree as the recommended site, it is intended to provide the State in which the recommended site is located with assurance that the site selection was based on geologic suitability considerations from among sites which are genuine alternatives. In testimony before the subcommittee, the States expressed their disappointment with the current site identification process, indicating that the Department had selected particular sites without troubling to determine or discover suitable alternatives.

The Secretary is required, with respect to alternative sites, to make a preliminary determination of suitabil-

ity. It is envisioned that this preliminary determination would occur late in the site characterization program. It would make little sense for this determination to be made prior to testing at-depth, and consequently prior to a detailed understanding of the sites' geologic characteristics.

In addition to the preliminary determination of site suitability, there is the requirement that site characterization activities be complete at the three sites. The intent behind this requirement is to once again insure that all sites being characterized are given equal consideration as to their suitability and to prevent the site selection process from becoming a stacked deck for or against a specific site. I sincerely hope that these changes, especially that of a preliminary determination on site suitability, when taken together, will insure the honesty, competence and fairness of a site selection process based primarily on geologic suitability of the location.

The purpose of the public hearings requirement during the site selection and characterization stage is to inform the public and State and local governments or Indian tribes of the activities scheduled for the site and the purpose of such activities and to give them a chance to raise objection and concerns at the earliest possible stage of the site selection process. It is recognized that the hearings wil perform two important functions. One is to insure that the public is fully informed of all activities to be performed at the site. Such information has the potential to reduce public opposition to site development. It is also anticipated that information received at the hearings will improve the DOE's planning and insure consideration of issues important to the public. The hearings are therefore a key component in what is expected to be a continuing process of information sharing and cooperation necessary to build public confidence, and will thereby directly effect the success of the repository development program. As such, the Secretary is expected to make every effort to insure that members of the public desiring to express themselves will be provided with a fair and reasonable opportunity and that all information developed regarding the site will be made fully available to them. The Secretary shall base the recommendation of the site for repository development on the record of the hearings, the results of site characterization and the criteria contained in the guidelines.

The Secretary is required to accompany each recommendation of a candidate site with a detailed environmental assessment. The assessment is subject to judicial review. The assessment is designed to insure that DOE has performed the necessary environmental evaluations of potential sites prior to their recommendation as a candidate site. The Secretary is required to prepare a final environmental impact statement (EIS) to accompany the nomination of a repository site to the President and as part of its application to the Commission for construction authorization. The Commission is authorized to adopt the Secretary's EIS, to the extent practicable, to prevent unnecessary duplication of Federal effort. To the extent the Commission does adopt the EIS, the Commission's responsibility to prepare an EIS under section 102(2)(C) of NEPA is discharged. The Commission may adopt sections or portions of sections of the EIS under this provision, and its responsibility to prepare additional or supplemental reports as it deems necessary is recognized.

The purpose of section 120 is solely to expedite decisions on authorizations which may be granted pursuant to other laws. The language in section 120(a) which states "to the extent permitted by the applicable provisions of law administered by such agency or officer" is included to make clear that section 120(a) in no way affects the discretionary authority of such agency or officer to grant or deny such authorization pursuant to such other law.

Section 121 of the bill is designed to require EPA to establish standards of general applicability to protect the environment from offsite releases of radioactive materials in repositories. The NRC must promulgate requirements for approving or disapproving authorizations for repository construction. The requirement in section 121(b)(1)(B) that the NRC requirements and criteria shall not be inconsistent with comparable EPA standards in no way affects the independent responsibility of the NRC to protect the public health and safety under the Atomic Energy Act of 1954 in the development of such technical requirements. This is consistent with similar statutory language at the end of section 114 that requirements relating to NEPA are also in no way intended to affect the independent responsibilities of the Commission to protect the public health and safety.

If, and only if, the NRC determines after formal hearings that a utility cannot meet its spent fuel storage needs itself and that shortage of storage capacity would interfere with the operation of the reactor, the Secretary is authorized to provide not more than 1,700 metric tons of storage capacity for commercial spent nuclear fuel. The Secretary is provided four options to meet this responsibility. One option is to convert one or more existing Federal facilities, including the modification or expansion of such facilities, to this purpose. Although such conversion and use of a facility for spent nuclear fuel storage would otherwise require a license from the Commission, it is recognized that the data required for such licensing—verification of pipe welds and welder qualifications, manufacturer, and grade of steel used in the holding tanks, for example—would probably no longer be available. In the absence of such information, the NRC would be unable to make a licensing determination in accordance with its regulations. Therefore, the use of Federal facilities for storage of spent fuel, and modification and expansion of those facilities is exempted from NRC licensing to the extent that such licensing would have required documentation which is unavailable.

Although the Commission is not required to license existing Federal facilities used for spent fuel storage, it is required to determine whether such use would adversely affect the public health and safety. In making this determination, the Commission shall consider the environmental assessment or environmental impact statement prepared by the Secretary for the use of such facility or site.

The Secretary is required to provide interim storage capacity only for those utilities desiring such capacity which have demonstrated to the NRC, in a hearing on the record, that without the Federal capacity, the reactor's continued operation is jeopardized and that there is no private alternative which can provide the necessary storage within the time required. These safeguards have been established to insure that the provision of Federal storage capacity is a bona fide last resort of the utility, and limits the Federal responsibility established in this act.

The Commission is required to determine whether a utility has qualified under the "last resort" test for Federal storage capacity. It is anticipated that the Commission will certify only such capacity required prior to the time the utility can provide for its own storage needs or until a permanent repository is available.

The purpose of this subtitle is to prevent interference with reactor operation due to insufficient storage capacity. It is strictly limited to prevent any possibility that interim storage provided by the Federal Government could be used for indefinite storage or undermine the efforts and priorities of the repository development program, or the efforts of the utilities to provide for their own interim storage requirements. With the addition of language excluding the applicability of the act to facilities used in connection with atomic defense activities, combined with language in section 135 subjecting interim storage to that exclusion, the Federal facilities will be extremely limited.

I am particularly pleased that this bill contains no findings or provisions which could preempt State or Federal

laws, judicial decisions, or administrative agencies by a congressional determination that there is reasonable assurance that a safe disposal method currently exists. There is no such determination, and such findings which were originally included in the bill were deleted to insure that there be no preemption.

In conclusion, I am hopeful that we can finally get down to the task of building a repository to dispose of our nuclear wastes. We have developed a program that will start us down the road, while preserving opportunities to carefully explore options. I commend all of those who have worked so diligently on this bill.●

● Mr. LUJAN. Mr. Chairman, it is in the interests of taxpayers, regulated industry, and the public in general to pursue safe, cost effective and cost-justified approaches to ultimate stabilization of bulky low-level radioactive waste from mineral processing operations involving source material regulated by the Commission. Safe onsite stabilization is by far the most cost-effective and cost-justified approach. NRC has recognized this fact in its new low-level repository regulations and in other public statements. Unfortunately, there is a potential obstacle to onsite disposal for such wastes, except in the case of byproduct material; that is uranium or thorium mill tailings. This obstacle arises in that, in contrast to the law with respect to byproduct material, existing law may not provide for ultimate Government ownership of the stabilized tailings from extraction of zirconium, hafnium, or rare earths. This gap raises a concern among some that these tailings may therefore not be adequately assured against unwarranted intrusion or misuse in the future. In addition, the gap is an unwarranted disincentive for onsite stabilization because it subjects owners to the risk of shifting regulatory requirements even after they have completed expensive and good-faith efforts to meet all currently applicable requirements. The amendment proposed by my colleague, the gentleman from West Virginia, and adopted on the floor authorizes a transfer of stabilized material under appropriate conditions so as to pose no cost to the taxpayer, unless the Government is responsible under other law. It thus serves to obviate these problems and permits the Commission more vigorously to pursue onsite disposition of the tailings material in question. I am therefore pleased to support the amendment offered by the gentleman from West Virginia as a logical extension of a sound Commission policy with respect to onsite stabilization.●

● Mr. GOLDWATER. Mr. Chairman, I rise in strong support of H.R. 7187, the Nuclear Waste Policy Act of 1982. This legislation establishes a comprehensive nuclear waste management program which our Nation desperately needs. This program will allow us to move forward with the permanent disposal of high-level radioactive waste.

For many years now, we in Congress have debated the merits of various proposals to dispose of the growing quantities of nuclear wastes. In the summer of 1978, I visited the Hanford Laboratory facilities in the State of Washington to review their nuclear waste management activities. These activities focused on an investigation of basalt geologic formations for nuclear waste disposal. While satisfactory progress had been made, I was disappointed to learn that the permanent repository was still scheduled to begin operation more than 10 years down the road. This schedule was quite different from the pace of earlier activities at Hanford in which entire production reactors were built in just 13 months. This situation led me to seriously question our commitment to solving the nuclear waste problem.

Because I was convinced that the problem was a national concern, I introduced legislation in 1979 which called for the construction of a commercial-scale demonstration repository for nuclear wastes. That legislation, the Nuclear Waste Management Research, Development and Demonstration Act of 1979, required the Department of Energy to undertake an accelerated nuclear waste management program. The Department was directed to build and operate a repository within a specific timeframe. A Nuclear Waste Advisory Committee, composed of public and private sector representatives, was also recommended.

In my opinion, this proposal was necessary to keep nuclear power a viable option in California and other parts of the United States where restrictive laws had banned or slowed needed nuclear development. It was introduced at a time when the California State Legislature had refused to provide an exemption for the proposed, but since canceled, Sun Desert nuclear project from a California law that prohibited the construction of new nuclear powerplants until an adequate waste disposal technology had been demonstrated.

I believed, however, that we would need additional nuclear powerplants to satisfy the future energy requirements of my State. Our current inability to build them, due to the California law, would prove extremely damaging in the long run. Therefore, during the 96th Congress, I again introduced legislation that would have required the Department of Energy to construct a technology demonstration repository for high-level radioactive wastes. This legislation was based on the need to provide for a sound research and development base, including integrated technology demonstration activities, to support the construction of a permanent repository.

The Science and Technology Committee held several days of hearings during the 95th, 96th, and 97th Congresses on my proposal and several other nuclear waste legislative initiatives. During those hearings, there was a review of a seemingly endless series of studies and reports on the subject of nuclear waste. The hearing witnesses made it clear that the nuclear waste disposal issue had been studied to death. Quite frankly, I grew tired of having it delayed. What the Nation needed was a farsighted program to get the job done, and in my mind that included the construction and operation of a repository in a timely manner.

Since we now possess the technology for developing a permanent repository, it is imperative that we proceed expeditiously with a solution to our waste problems if we are to maintain nuclear energy as a viable energy option. In some parts of the country, the construction of new nuclear powerplants has already been affected due to the pressing and nuclear waste problem.

The Nuclear Waste Policy Act of 1982 will help restore public confidence in our Nation's ability to cope with nuclear wastes. It will help us avoid the frightening prospect of an energy shortage by providing for the timely construction of needed facilities to dispose of these wastes. And it will properly guide us in selecting disposal sites consistent with our public health and welfare needs and national security requirements.

Some of the key features of this legislation should be noted. First, the bill outlines an expeditious timeframe for the construction of a permanent waste repository. Second, it provides for an effective State government role in the construction and operation of a nuclear waste repository. Third, appropriate site standards consistent with environmental requirements will be developed. Fourth, and most important, the bill provides for a strong research and development program which, through a test and evaluation facility, should demonstrate the feasibility of a sound nuclear waste management program. The test and evaluation facility is the center piece of the nuclear waste management program. It will resolve technical questions which may otherwise occur during the permanent repository construction authorization or during the issuing of an operating license. It would also allow for the evaluation of the designs for the repository and the packaging, handling, and emplacement of the waste and spent fuel. It may improve the operating capacity of a final repository without excessive radiation exposure to workers. I firmly believe that the other provisions of this legis-

lation are complimentary, but additional to, the test and evaluation facility concept.

Mr. Chairman, the legislation we are now considering will provide our Nation with a firm policy to manage our nuclear waste. It will allow us to fully take advantage of the promise of nuclear energy. I urge my colleagues to support this legislation.●

● Mr. LOWERY of California. Mr. Chairman, although I support participation by States, and, for that matter, the public in general in the decisionmaking process leading to siting and construction of a repository, I believe that State veto or quasi-veto authority is far too extreme. It is unacceptably inconsistent with the basic tenets of the Atomic Energy Act as declared by our courts. It undermines the fundamental purpose of the act to develop atomic energy as an alternative source of energy for our country and it confuses, complicates, and impedes the regulation of nuclear activities by the Federal Government as provided under that statute. I believe that this is detrimental to our national defense and security and to the public health and safety. I accordingly oppose legislation conferring veto authority on States and I support legislation, such as the substitute for section 115 proposed by Congressmen FUQUA and BROYHILL, which is consistent with the Atomic Energy Act. The attached staff analysis summarizes current law:

STAFF MEMORANDUM RE REGULATORY AUTHORITY RELATING TO HIGH LEVEL WASTE REPOSITORIES

The Atomic Energy Act (Act) authorizes comprehensive regulation by the Nuclear Regulatory Commission (NRC) of radiological hazards associated with the nuclear industry and, pursuant to section 274 of the Act, 42 U.S.C. § 2021, by states which are parties to so-called "discontinuance agreements" with the NRC as provided in their agreements. In addition, NRC (or its predecessor) since 1971 has regulated non-radiological hazards associated with atomic energy activities under the National Environmental Policy Act (NEPA), as interpreted in the D.C. Circuit's famous Calvert Cliffs decision.[1]

In the seminal case of *Northern States Power Co.* v. *Minnesota*, 447 F.2d 1143 (1971), the United States Court of Appeals for the Eighth Circuit ruled that the comprehensive and pervasive federal regulation of radiological hazards associated with nuclear power activities as well as the fundamental federal purpose of developing atomic energy technology precluded additional duplicative or conflicting state regulation of those hazards. This ruling was endorsed by the Supreme Court in *Train* v. *Colorado Public Interest Research Group*, 426 U.S. 1, 17 (1976). Other courts have similarly affirmed that state regulation of radiological hazards associated with Atomic Energy Act activities is not permissible except as specifically provided under section 274 of the Act or under other statutes enacted by Congress specifically providing limited exceptions to the general rule. See, e.g., *Washington State Building and Construction Trades Council* v. *Spellman*, 684 F.2d 627 (9th Cir. 1982) (Atomic Energy Act prevents additional state regulation of low level radioactive waste disposal); *Illinois* v. *General Electric*, 683 F.2d 206 (7th Cir. 1982) (Atomic Energy Act prevents state attempt to bar AFR storage facility). Moreover, states can not interfere with the basic purpose of the Atomic Energy Act to develop atomic energy by discriminatory treatment of atomic energy activities under the guise of regulating non-radiological concerns. See, e.g., *Marshall* v. *Consumer Power Co.*, 65 Mich. App. 237, 237 N.W 2d 266, 282 (1975).

As a corollary to the above, under current law, states generally can neither bar high level radioactive waste storage or disposal facilities nor exercise duplicative or conflicting regulatory authority over radiological hazards associated with such facilities because of the pervasive Federal regulatory scheme.[2] In particular, states lack any veto or quasi-veto power over the siting of such facilities or over the construction and ultimate operation of these facilities. The chief state authority under existing law with respect to regulation of radiological hazards associated with high level radioactive waste facilities is the authority to participate (by filing comments and presenting evidence) in federal regulatory and licensing proceedings relating to such facilities. This authority assures that states can raise all legitimate concerns and have these concerns weighted in the decisionmaking process. The states may also seek judicial review and of course may bring their concerns to Congress.●

MODIFICATIONS OF AMENDMENTS

Mr. UDALL. Mr. Chairman, I ask unanimous consent that the following technical corrections be made in the substitute, to reflect the intention of the committee.

The CHAIRMAN. The Clerk will report the modifications.

The Clerk read as follows:

In the amendment offered by Mr. UDALL to section 141(c)(1) change the first sentence to read:

"Preparation and submission to the Congress of the proposal required in this section shall not require the preparation of an environmental impact statement under section 102(2)(c) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(c)).".

In the amendment offered by Mr. MARKEY to section 116(a)(3) after the word "Governor" insert "or legislature".

Mr. UDALL (during the reading). Mr. Chairman, I am advised that these are technical amendments, that they are understood, and I ask unanimous consent that they be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The CHAIRMAN. Is there objection to the initial request of the gentleman from Arizona?

There was no objection.

The CHAIRMAN. The modifications are agreed to.

The CHAIRMAN. Are there any further amendments permitted under the rule? If not, the question is on the amendment in the nature of a substitute, as amended.

The amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore. (Mr. NATCHER) having assumed the chair, Mr. PANETTA, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the Bill (H.R. 3809) to provide for repositories for the disposal of high-level radioactive waste, transuranic waste, and spent nuclear fuel, to amend provisions of the Atomic Energy Act of 1954 relating to low-level waste, to modify the Price-Anderson provisions of the Atomic Energy Act of 1954 and certain other provisions pertaining to facility licensing and safety, and for other purposes, pursuant to House Resolution 601, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the amendment in the nature of a substitute adopted by the Committee of the Whole?

Mr. MARRIOTT. Yes, Mr. Speaker.

Pursuant to the provisions of House Resolution 601, I demand a separate vote on the amendment proposing a new section 115 to the amendment in the nature of a substitute.

The amendment offered by the gentleman from North Carolina (Mr.

[1] *Calvert Cliffs' Coordinating Committee* v. *AEC*, 449 F.2d 1109 (D.C. Cir. 1971) (requires AEC to "take into account" and to "balance" non-radiological concerns pursuant to NEPA). Note, however, that the Supreme Court has subsequently indicated that NEPA is "essentially procedural" in nature. *Vermont Yankee Nuclear Power Corp.* v. *NRDC*, 435 U.S. 519, 558 (1978); *Strycker's Bay Neighborhood Council* v. *Karlen*, 444 U.S. 223, 227 and 228 n. 2 (1980).

[2] States enjoy certain limited regulatory authority over air emissions of radionuclides from high level waste repositories pursuant to sections 116 and 122 of the Clean Air Act Amendments of 1977. However, the Seventh Circuit has perspicaciously indicated that state Clean Air Act authority must be construed in a fashion compatible with the Atomic Energy Act and that the Clean Air Act does not accord states veto authority over radioactive waste storage or disposal facilities. *Illinois* v. *General Electric*, 683 F.2d 206 (7th Cir. 1982). States also may be in a position to attempt to regulate radiological hazards posed by high level waste repositories under the "Underground Injection Control" (UIC) Program of the Safe Drinking Water Act (SDWA), 42 U.S.C. §§ 1421 et seq. (an underground radioactive waste repository may be an "underground injection well" for purposes of EPA's SDWA UIC program). However, such regulation is logically subject to the same constraints recognized in the aforementioned Seventh Circuit decision. Enactment of high level waste legislation providing guidelines and timetables for resolving questions concerning the siting, construction, and operation of high level repositories will further inhibit state initiatives the effect of which is to thwart or to hinder the federal program under the Atomic Energy Act through imposition of duplicative, conflicting or other impeding requirements.

BROYHILL) was adopted in the Committee of the Whole on November 29, and is printed on page H8544 of that RECORD.

The SPEAKER pro tempore. Is a separate vote demanded on any other amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The Clerk will report the amendment on which a separate vote has been demanded.

The Clerk read as follows:

Amendment: Page 35, beginning on line 19, strike out section 115 in its entirety and insert in lieu thereof the following:

REVIEW OF REPOSITORY SITE SELECTION

SEC. 115. (a) IN GENERAL.—The designation of a site as suitable for application for a construction authorization for a repository shall be effective at the end of the 60-day period beginning on the date that the President recommends such site to the Congress under section 114, unless the Governor of the State in which such site is located, or the governing body of an Indian tribe on whose reservation such site is located, as the case may be, submits to the Congress a notice of disapproval under section 116 or 118. If any such notice of disapproval is submitted, the designation of such site shall not be effective except as provided under subsection (b).

(b) CONGRESSIONAL REVIEW OF SITE.—If any notice of disapproval of a repository site designation is submitted to the Congress under section 116 or 118 after a recommendation for approval of such site is made by the President under section 114, the designation of such site as suitable for license application as a repository shall be effective upon the expiration of the first period of 90 calendar days of continuous session of the Congress following the date of the receipt by the Congress of such notice of disapproval unless, during such period, either House of the Congress passes a resolution in accordance with this subsection disapproving such site designation.

(c) DEFINITION.—For purposes of this subsection, the term "resolution under this section" means a resolution of either House of the Congress, the matter after the resolving clause of which is as follows: "That the ——— hereby approves the notice of disapproval submitted by ——— regarding the disapproval of the site at ——— for a repository for the disposal of high-level radioactive waste and spent nuclear fuel.". The first blank space in such resolution shall be filled with the designation of the appropriate House of the Congress; the second blank space in such resolution shall be filled with the designation of the State Governor or Indian tribe governing body submitting the notice of disapproval involved; and the last blank space in such resolution shall be filled with the geographic location of the proposed repository site involved.

(d) PROCEDURES APPLICABLE TO THE SENATE.—(1) The provisions of this subsection are enacted by the Congress—

(A) as an exercise of the rulemaking power of the Senate, and as such they are deemed a part of the rules of the Senate, but applicable only with respect to the procedure to be followed in the Senate in the case of resolutions under this section, and such provisions supersede other rules of the Senate only to the extent that they are inconsistent with such other rules; and

(B) with full recognition of the constitutional right of the Senate to change the rules (so far as relating to the procedure of the Senate) at any time, in the same manner and to the same extent as in the case of any other rule of the Senate.

(2)(A) Not later than the first day of session following the day on which any notice of disapproval of a repository site selection is submitted to the Congress under section 116 or 118, a resolution under this section shall be introduced (by request) in the Senate by the chairman of the committee to which such notice of disapproval is referred, or by a Member or Members of the Senate designated by such chairman.

(B) Upon introduction, a resolution under this section shall be referred to the appropriate committees of the Senate by the President of the Senate, and all such resolutions with respect to the same repository site shall be referred to the same committee or committees. Upon the expiration of 60 calendar days of continuous session after the introduction of the first resolution under this section with respect to any site, each committee to which such resolution was referred shall make its recommendations to the Senate.

(3) If any committee to which is referred a resolution introduced under paragraph (2)(A), or, in the absence of such a resolution, any other resolution under this section introduced with respect to the site involved, has not reported such resolution at the end of 45 days of continuous session of Congress after introduction of such resolution, such committee shall be deemed to be discharged from further consideration of such resolution, and such resolution shall be placed on the appropriate calendar of the Senate.

(4)(A) When each committee to which a resolution under this section has been referred has reported, or has been deemed to be discharged from further consideration of, a resolution described in paragraph (3), it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) for any Member of the Senate to move to proceed to the consideration of such resolution. Such motion shall be highly privileged and shall not be debatable. Such motion shall not be subject to amendment, to a motion to postpone, or to a motion to proceed to the consideration of other business. A motion to reconsider the vote by which such motion is agreed to or disagreed to shall not be in order. If a motion to proceed to the consideration of such resolution is agreed to, such resolution shall remain the unfinished business of the Senate until disposed of.

(B) Debate on a resolution under this section and on all debatable motions and appeals in connection with such resolution, shall be limited to not more than 10 hours, which shall be divided equally between Members favoring and Members opposing such resolution. A motion further to limit debate shall be in order and shall not be debatable. Such motion shall not be subject to amendment, to a motion to postpone, or to a motion to proceed to the consideration of other business, and a motion to recommit such resolution shall not be in order. A motion to reconsider the vote by which such resolution is agreed to or disagreed to shall not be in order.

(C) Immediately following the conclusion of the debate on a resolution under this section and a single quorum call at the conclusion of such debate if requested in accordance with the rules of the Senate, the vote on final approval of such resolution shall occur.

(D) Appeals from the decisions of the Chair relating to the application of the rules of the Senate to the procedure relating to a resolution under this section shall be decided without debate.

(e) PROCEDURES APPLICABLE TO THE HOUSE OF REPRESENTATIVES.—(1) The provisions of this section are enacted by the Congress—

(A) as an exercise of the rulemaking power of the House of Representatives, and as such they are deemed a part of the rules of the House, but applicable only with respect to the procedure to be followed in the House in the case of resolutions under this section and such provisions supersede other rules of the House only to the extent that they are inconsistent with such other rules; and

(B) with full recognition of the constitutional right of the House to change the rules (so far as relating to the procedure of the House) at any time, in the same manner and to the same extent as in the case of any other rule of the House.

(2) Resolutions of repository siting approval shall, upon introduction, be immediately referred by the Speaker of the House to the appropriate committee or committees of the House. Any such resolution received from the Senate shall be held at the Speaker's table.

(3) Upon the expiration of 45 days of continuous session after the introduction of the first resolution under this section with respect to any site, each committee to which such resolution was referred shall be discharged from further consideration of such resolution, and such resolution shall be referred to the appropriate calendar, unless such resolution or an identical resolution was previously reported by each committee to which it was referred.

(4) It shall be in order for the Speaker to recognize a Member favoring a resolution to call up a resolution under this section after it has been on the appropriate calendar for 5 legislative days. When any such resolution is called up, the House shall proceed to its immediate consideration and the Speaker shall recognize the Member calling up such resolution and a Member opposed to such resolution for 2 hours of debate in the House, to be equally divided and controlled by such Members. When such time has expired, the previous question shall be considered as ordered on the resolution without intervening motion. No amendment to any such resolution shall be in order, nor shall it be in order to move to reconsider the vote by which such resolution is agreed to or disagreed to.

(f) COMPUTATION OF DAYS.—For purposes of this section—

(1) continuity of session of Congress is broken only by an adjournment sine die; and

(2) the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of the 90-day period referred to in subsection (c) and the 45-day period referred to in subsections (d) and (e).

(g) INFORMATION PROVIDED TO CONGRESS.—In considering any notice of disapproval submitted to the Congress under section 116 or 118, the Congress may obtain any comments of the Commission with respect to such notice of disapproval. The provision of such comments by the Commission shall not be contrued as binding the Commission with respect to any licensing or authorization action concerning the repository involved.

Page 30, line 17, strike out "and legislature".

Page 44, line 10, strike out "and legislature".

Page 44, line 11, strike out "jointly".

Page 44, line 15, strike out "and legislature".

Page 44, line 19, strike out "and legislature".

Page 44, line 21, strike out "and legislature".

Page 45, line 5, strike out "and legislature".

Page 45, line 7, strike out "and legislature".

Mr. UDALL (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the amendment be dispensed with, and that it be printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The SPEAKER pro tempore. The question is on the amendment.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. MARRIOTT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 213, nays 179, not voting 41, as follows:

□ 1330

Messrs. SCHEUER, MADIGAN, and HUGHES, and Mrs. MARTIN of Illinois changed their votes from "aye" to "no."

Messrs. HOPKINS, WHITE, GAYDOS, BEVILL, BROOKS, and LATTA changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question is on the amendment in the nature of a substitute, as amended.

The amendment in the nature of a substitute, as amended, was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

□ 1345

TITLE AMENDMENT OFFERED BY MR. UDALL

Mr. UDALL. Mr. Speaker, I offer an amendment to the title.

The Clerk read as follows:

Title amendment offered by Mr. UDALL: Amend the title of H.R. 3809 so as to read "A bill to provide for the development of repositories for the disposal of high-level radioactive waste and spent nuclear fuel, to establish a program of research, development, and demonstration regarding the disposal of high-level radioactive waste and spent nuclear fuel, and for other purposes."

The title amendment was agreed to.

A motion to reconsider was laid on the table.

AUTHORIZING THE CLERK TO MAKE CORRECTIONS IN ENGROSSMENT of H.R. 3809, NUCLEAR WASTE POLICY ACT OF 1982

Mr. UDALL. Mr. Speaker, I ask unanimous consent that, in the engrossment of the bill, the Clerk be authorized to correct section numbers, punctuation, and cross references and to make such other technical and conforming changes as may be necessary to reflect the actions of the House in amending the bill, H.R. 3809.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to

revise and extend their remarks in the RECORD on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE PRIVILEGED REPORT ON DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATION, 1983

Mr. YATES. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a privileged report on the Department of the Interior and related agencies appropriation bill for fiscal year 1983.

Mr. McDADE reserved all points of order on the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE PRIVILEGED REPORT ON DEPARTMENT OF DEFENSE APPROPRIATIONS, 1983

Mr. YATES. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a privileged report on the bill making appropriations for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes.

Mr. EDWARDS of Alabama reserved all points of order on the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

MAKING IN ORDER ON MONDAY, DECEMBER 6, 1982, OR ANY DAY THEREAFTER, CONSIDERATION OF DEPARTMENT OF DEFENSE APPROPRIATION BILL, 1983

Mr. YATES. Mr. Speaker, I ask unanimous consent that it may be in order on Monday, December 6, 1982, or any day thereafter, to consider the Department of Defense appropriation bill for fiscal year 1983.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

PERMISSION TO HAVE UNTIL MIDNIGHT, FRIDAY, DECEMBER 3, 1982, TO FILE CONFERENCE REPORT ON H.R. 7072, AGRICULTURE, RURAL DEVELOPMENT, AND RELATED AGENCIES APPROPRIATIONS, 1983

Mr. YATES. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tomorrow, December 3, 1982, to file a conference report on the bill (H.R. 7072) making appropriations for the Department of Agriculture, rural development, and related agencies programs for the fiscal year ending September 30, 1983, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

PERMISSION FOR COMMITTEE ON RULES TO FILE CERTAIN PRIVILEGED REPORTS

Mr. LONG of Louisiana. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight tonight to file certain privileged reports.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

Mr. LOTT. Reserving the right to object, Mr. Speaker, I do so for the purpose of inquiring what gentleman anticipates would be filed late by the Rules Committee tonight?

Mr. LONG of Louisiana. Mr. Speaker, if the gentleman will yield, the gentleman knows there is going to be a meeting of the Committee on Rules at 3 o'clock this afternoon to take up the appropriation bill for the Department of the Interior. We would hope that a report could be filed on that.

Mr. LOTT. Further reserving the right to object, that is the only issue?

Mr. LONG of Louisiana. That is No. 1.

The second appropriation bill is the Departments of Commerce, Justice and State and the Judiciary and related agencies. The gentleman knows that we have held hearings on that; however, we have had additional requests in the Rules Committee for additional witnesses that want to be heard, and the committee will make a decision at 3 o'clock as to whether or not to hear these additional witnesses.

Mr. LOTT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, I have asked for this time for the purpose of inquiring of the distinguished majority leader the recess schedule or any other pertinent information for the Members that he may be willing to divulge at this time.

Mr. WRIGHT. Mr. Speaker, will the distinguished minority leader yield?

Mr. MICHEL. I am happy to yield.

Mr. WRIGHT. I think the material we are about to recite and thus place in the record is a matter of interest and concern to all Members.

Following is the proposed House Calendar for 1983:

The Congress wil convene on January 3. The oath of office will be administered on that day to all Members. We expect to be in session that full week for the organization of the House.

We plan a district work period from January 10 through January 24.

On January 18, the President would send his budget message and it would be received in the absence of the House and included in the RECORD.

On January 25, the House would reconvene and on that evening, Monday, January 25, it is expected that the President would bring his state of the Union message.

There will be a Washington work period continuing from that point until February 10.

February 11 through 13 is the Lincoln district work period.

February 14 through 17 is a Washington work period.

February 18 through 21 is the George Washington district work period—maybe we had better go back over that.

The first Washington period has nothing to do with George Washington, but Washington, D.C.

February 14 through 17 is a work period here in the city of Washington, and beginning on the 18th and continuing through the 21st, a home district work period in which will be commemorated the birthday of the founder of our country.

Then February 22 through March 24, a Washington, D.C., work period.

March 15, the committees, of course, must submit reports to the Budget Committee on the fiscal year 1984 budget.

March 25 through April 4 will be the Easter district work period.

From April 5 through May 26, we will be here for a Washington work period.

On May 16, we must have completed action on the first budget resolution. That will be the deadline for reporting fiscal year 1984 authorization bills from the standpoint of the authorizing committees as well.

From May 27 through 31, there will be a Memorial Day district work period.

We will be back here in Washington from June 1st through the 30th.

Beginning on July 1 and continuing through the 10th, there will be an Independence Day district work period.

July 11 through August 12 will be a Washington work period.

From August 12 through September 11, an August to Labor Day district work period.

From September 12 through the 15, a Washington work period.

September 16 through 18, a Yom Kippur district work period.

September 19 through October 11, a Washington work period.

October 12 through 16, a Columbus Day district work period.

October 17 through 28, a Washington work period.

October 28 will be our adjournment target.

Now, reference, of course, can be made to this point in the RECORD for our permanent reference.

In addition, I am sure that the majority and minority whips will very soon have the whip cards published in order that Members may carry them on their person and they will be available shortly.

Mr. MICHEL. I thank the gentleman.

I wonder if he might respond to a question along this line: Next week both his party and our party will be organizing for the new Congress with our Members-elect. Since we will be having a session or having sessions next week, that is a very limited timeframe in which to have these organizational meetings, his caucuses and our conference. I would imagine they would be convening at 9 o'clock in the morning. Has there been any thought given to having the House convene at 1 o'clock, rather than noon, so that there could be at least 3½, nearly 4 hours, for a meeting in the morning when we are organizing, as distinguished from the very protracted time it usually takes Members, 15 or 20 minutes, to get here, anyway, and then the time is so short.

Mr. WRIGHT. If the minority leader would yield further, I think the point is extremely well taken. Obviously, there is a lot of work to be done by both the Republican and the Democratic caucuses. It is our expectation, therefore, that on next Monday the House would convene at 2 p.m., thus granting adequate time, and at this point perhaps it would be useful if I should go through the schedule generally for next week.

We would expect to have the Consent Calendar on Monday and take up either the Defense Department appropriation or the Surface Transportation Act, depending upon which of the two may be ready for consideration on the House floor.

On Tuesday, December 7, we expect to meet at 1 p.m., the hour suggested by our distinguished minority leader. It is a day for the Private Calendar.

Then we would take up either the Surface Transportation Act if it has not been taken up the day before or the Defense Department appropriation.

We would expect that for the remainder of the week, Wednesday and the balance of the week continuing through Friday, the House would meet at 2 p.m., on Wednesday and then at 10 a.m. for Thursday and Friday, in order that we might have completed the necessary work in our respective caucuses on Monday, Tuesday, and Wednesday.

□ 1400

On Wednesday, Thursday, and Friday, when the House does convene, we would expect to complete the Defense Department appropriation bill, the Energy and Water appropriations, and State, Justice and the Judiciary appropriations.

Members may expect possible action next week on a continuing appropriation for fiscal year 1983.

Also scheduled for consideration next week, time permitting, is H.R. 5133, Fair Practices in Automotive Products Act, subject to the granting of a rule.

Members should expect late sessions next week. Conference reports, of course, may be brought up at any time.

Any other program in addition to this would be announced later.

Mr. MICHEL. Did the gentleman make clear that tomorrow the House will definitely be in session between the hours of 10 a.m. and 3 p.m.?

Mr. WRIGHT. It is expected that the House will be in session.

Mr. MICHEL. Will the Interior appropriations bill be the order of business?

Mr. WRIGHT. If the Rules Committee completes its action, grants a rule, and if it is eligible for consideration under the rules of the House and is allowed to come up, that would be our expectation.

Mr. LOTT. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Mississippi.

Mr. LOTT. I thank the gentleman for yielding.

I would like to address just a couple of brief questions to the distinguished majority leader.

No. 1: Concerning the schedule for next year, I presume it is still tentative and could be subject to minor changes one way or the other. Is that accurate or not?

Mr. WRIGHT. Mr. Speaker, will the gentleman yield to me?

Mr. MICHEL. I yield to the distinguished majority leader.

Mr. WRIGHT. I thank the gentleman for yielding.

Mr. Speaker, of course, if there are reasons for changing it, we can change it. Nothing is ever totally set in concrete. It is just the proposed schedule for the House Calendar for next year, but if there are valid considerations warranting a change, we always can make changes.

Mr. LOTT. If the gentleman will yield further, I would like to make one request or suggestion: Some of us are young enough to have children still in school and we like very much to have some period during the year when we can be with our children. Traditionally we have been out from around August 3 or 4 to September 3 or 4, but for the last couple of years it slipped over to the middle of August, August 13 on this schedule, through September 11.

I would like to urge the leadership to give some consideration to the fact that many of us would have to be back in this city September 3 or 4, or earlier, to get our children in school, and, therefore, we would have less than 2 weeks to spend any time with our children. I would like to make that plea on behalf of some of us who have children.

Mr. WRIGHT. If the gentleman will yield further, the gentleman makes a good and valid point. The gentleman from Texas, chairman of the Committee on Government Operations, young JACK BROOKS, has just made that point to me. Therefore, it seems to me we might take it under advisement.

Mr. SAM B. HALL, JR. Mr. Speaker, will the gentleman yield to me for a question of the majority leader?

Mr. MICHEL. I would be happy to yield to my friend from Texas.

Mr. SAM B. HALL, JR. I thank the gentleman from Illinois, the distinguished minority leader, for yielding to me.

Mr. Speaker, I would like to ask the distinguished majority leader: I understand that on next Thursday the Rules Committee will take up the regulatory reform measure. If a rule comes out on that measure next Thursday, is there a possibility or probability that that bill could come up the beginning of the following week?

Mr. WRIGHT. If the gentleman will yield further, surely, there is a possibility. There are several pieces of legislation which may be considered on a time-permitting basis. The other body, according to the majority leader, Mr. BAKER, expects, I think, to conclude on the 15th, which would be Wednesday, 2 weeks from yesterday.

Now, if the session continues until the latter part of that week, there may be opportunity for certain bills that otherwise would not be eligible for consideration. There are several bills that might be considered. That is one of them.

Time becomes the crucial factor as we near the end of the session, of course.

Mr. SAM B. HALL, JR. I thank the gentleman.

CONFERENCE REPORT ON H.R. 2330, NUCLEAR REGULATORY COMMISSION AUTHORIZATION, 1982 AND 1983

Mr. UDALL. Mr. Speaker, I call up the conference report on the bill (H.R. 2330) to authorize appropriation to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of September 28, 1982.)

POINT OF ORDER

Mr. FRENZEL. Mr. Spaker, I have a point of order against section 23 of the conference report substitute.

The SPEAKER pro tempore. The gentleman will state his point of order.

Mr. FRENZEL. Mr. Speaker, I make a point of order that the matter contained in section 23 of the conference substitute recommended in the conference report would not be germane to H.R. 2330 under clause 7 of rule XVI if offered in the House and is, therefore, subject to a point of order under clause 4 of rule XXVIII.

The SPEAKER pro tempore. Does the gentleman from Arizona (Mr. UDALL) desire to be heard?

Mr. UDALL. Mr. Speaker, we concede the substance of the point of order the gentleman is making.

The SPEAKER pro tempore (Mr. NATCHER). The point of order is sustained.

MOTION OFFERED BY MR. FRENZEL

Mr. FRENZEL. Mr. Speaker, pursuant to the provisions of clause 4, rule XXVIII, I move that the House reject section 23 of the conference substitute recommended in the conference report.

The SPEAKER pro tempore. The gentleman from Minnesota (Mr. FRENZEL) is recognized for 20 minutes on his motion.

Mr. FRENZEL. Mr. Speaker, I rise in opposition to section 23 which contains an import restriction on uranium. This restriction was not a part of the House bill. It is not germane to the House bill and was one which was forced upon our conferees at the insistence of the Senate.

This provision has not received consideration by either House committee which had jurisdiction over this bill. This is a proposed, in my judgment unfair, trade barrier which comes less than a week after our U.S. Trade Representatives and Members of the House and Senate came back from the GATT ministerial meeting in Geneva, at which time all of us pledged to promote a moratorium on new trade barriers all over the world.

It seems to me there is no reason why we should support this restriction, particularly in light of the fact that it is nongermane and there have been no House hearings on it.

Currently, total uranium imports to the United States are less than 10 percent of the U.S. consumption and those imports come from friendly allies. About three-quarters of them come from Canada and Australia.

Under the current limitations which are scheduled for phaseout this year, imports from 1977 through 1981 were less than half of the allowed maximum. Imports have risen from 5 percent in 1977 to 10 percent in 1981, less than 10 percent, and that is no evidence of a surge in imports.

The national security argument is feeble, too. It is estimated that Government and commercial inventories of uranium could supply the Nation for 12 years. The President, as it is well known, already has the authority under 19 U.S.C. 1562 to limit imports whenever he finds them to be a threat to national security.

The administration opposes this provision very strongly.

The domestic uranium industry's problem is not imports, but a low demand caused by a slowdown in the nuclear powerplant program.

We can likely expect to provide some sort of compensation under our international trade treaties, and that compensation will probably be aimed at U.S. agricultural exports or at high-technology exports. I would guess that this compensation would be in the neighborhood of $200 million.

Further, Mr. Speaker, the cost to consumers of this amendment is staggering. The administration estimates that by 1990 the additional consumer cost would be about $1.6 billion.

The restriction itself is a clumsy one, as one would expect of one that has had no hearings. It triggers when projected levels of imports reach certain levels. Further, it bypasses the injury test required in our law and granted to our trading partners under our international trade agreements.

It is my fervent hope that we will not be the first nation in the world to violate the resolution which our country signed in Geneva last week at the GATT ministerial, at which time the trade ministers of 88 countries pledged to try to resist protectionist measures within their respective countries. I would urge my colleagues to vote against section 23 of this conference report.

□ 1410

Mr. Speaker, I reserve the balance of my time.

The SPEAKER pro tempore. Is the gentleman from Arizona (Mr. UDALL) opposed to the motion?

Mr. UDALL. I am, Mr. Speaker,

The SPEAKER pro tempore. The gentleman from Arizona (Mr. UDALL) is recognized for 20 minutes.

Mr. UDALL. Mr. Speaker, there is a rising tide of protectionism abroad in our country, and I share the concern the administration and my friend from Minnesota have expressed.

When the conference committee began its prolonged deliberation on the Senate amendment's outright uranium import restrictions, I told my colleagues that I embraced the philosophy that a rising tide raises all boats, and I remain committed to that point of view today. But unfortunately, the tide may be rising too late for our domestic uranium mining and milling industry. Over the past 2½ years, over half the miners have been laid off, exploration has dropped by 66 percent, and the number of operating mines has dropped by over 63 percent. As a result, the very limited relief provided in section 23 of the conference agreement is timely and needed, and I urge my colleagues to support the conference provision.

It is well known that the uranium import issue was the most difficult issue in the conference that we had over several weeks. The provision was the subject of extensive discussion by the conferees. A letter expressing opposition to the Senate amendment was sent to the conferees by the Ways and Means Committee's Subcommittee on Trade. The conferees received other letters expressing concerns from the Special Trade Representative and the Departments of State, Justice, and Energy. There are no easy answers in this situation.

Let me emphasize that we come back here with a much different provision than the one adopted by the Senate. The Senate provision would have restricted imports of uranium from foreign sources at 20 percent of our annual consumption and would have required each licensed nuclear plant to use 80 percent domestic uranium for fuel. The compromise before the House is a true compromise. The conference agreement sets in motion a rational process for ascertaining the viability of our domestic uranium industry and relationship of that industry's health to the national security.

So, let me clear up some misinformation about the conference recommendation on uranium supply. The compromise is not an import quota or restriction. We had to hang tight on this for a number of sessions to make sure that was the case. Under the agreement, when the level of project im-

ports reaches 37.5 percent for 2 consecutive years, a tariff is not triggered, but a study is triggered under existing law into the national security implications of imports. The President can act upon the recommendations of the study or he can take no action.

A 2-year contracting moratorium under the compromise is imposed during the course of the study on the national security implications of imports so as to prevent new contracts for higher levels of imports. No imports already under contract will be restricted in any way. If the study concludes that the level of imports is of concern, then higher levels will have been avoided. The moratorium will be shorter than 2 years if the study is done sooner. The long-term nature of utility uranium contracts—10 to 15 years—and the high level of existing inventories will prevent any shortages for utilities during that time.

Another key distinction between the Senate provision and the conference agreement relates to the expiration date of the provision. Under the Senate bill, a strict limitation on actual uranium imports would be in effect immediately. The conference report, which does not restrict imports, would expire in 1992, 10 years from now.

My colleagues may be interested to know that the Edison Electric Institute has concluded—I emphasize—that:

> The provision as adopted by the conference is primarily a study and we (EEI) do not believe it would actually result in an import limitation during the 1980's or early 1990's because current contracts are in place covering those requirements. Thus, while it would appear that there are potential limitations, we do not view this provision as an actual restriction * * *

My colleagues, the conference agreement on uranium supply enjoys the support of the National Governors Association, the Western Governors Conference and the AFL-CIO.

I strongly encourage my colleagues in the House to adopt the entire conference report, including these supply provisions.

Mr. Speaker, I yield 5 minutes to the gentleman from New Mexico (Mr. LUJAN).

Mr. LUJAN. Mr. Speaker, I thank the gentleman from Arizona for yielding time to me.

Mr. Speaker, Congress has consistently recognized the importance of maintaining a viable domestic uranium industry. Indeed, we supported a priority program to develop such an industry during and after World War II in order to avoid reliance on undependable foreign sources of supply. We adopted section 161(v) of the Atomic Energy Act directing the Atomic Energy Commission, now the Department of Energy, to take such actions in the provision of enrichment services as were necessary to maintain a viable domestic industry. The Department, to my sorrow, has failed to implement this provision. And now our domestic industry is, by the admission of a draft report of the Department, in a condition which can hardly be considered viable.

The uranium supply provision before us makes use of existing law to assure the maintenance of a viable uranium industry. It simply calls for the Department to issue criteria for determining viability and to make a viability determination, based on best available statistics, on an annual basis. This will serve to compel implementation of section 161(v). In addition, the provision makes use of existing trade laws.

Mr. Speaker, I realize that some have expressed concern about the portion of this section providing for a temporary moratorium on new contracts for foreign uranium if the foreign fraction of commitments reach 37½ percent. However, this moratorium is essential if we are to have time to take the actions necessary under existing law to preserve our uranium industry, an industry vital to the national security and essential to our energy independence.

□ 1420

Mr. FRENZEL. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, we have heard the statement by the managers of the bill, including the most recent one, particularly talking about national security aspects.

Obviously any signatory to our international trade agreements does have the option of protecting national security. However, in this case, the President himself and our administration have determined that this particular amendment is not a national security amendment. The administration, which is very concerned with our national security, has asked us to defeat the amendment. The reason the Department of Energy did not act on the suggestion of the study was because the Department of Energy felt that that was a bad policy.

Mr. Speaker, I will place in the RECORD a letter written by Secretary of State, George Shultz to the Speaker of the House of Representatives dated November 22, 1982. I would like to quote from the letter just briefly.

Secretary Shultz writes:

> An import restriction of this kind would be totally inconsistent with the U.S. Government's long-standing commitment to free trade. The proposed 2-year import moratorium . . . triggered by a specific import level, would represent a measure of the very kind we are urging other nations to avoid.

The Secretary goes on to say that such a restriction "would constitute a reversal of U.S. policy without consultation by friends and allies and would be seen by countries as evidence of unreliability of the United States in the nuclear field. The perception of U.S. unreliability and unilateralism would constitute a setback to U.S. nonproliferation efforts."

The Secretary says later in the same letter: The foreign countries most affected by the "restrictions are Canada and Australia. These two allies have provided significant support for U.S. nonproliferation policy. Both countries have strongly urged deletion of this amendment, and Canada has implied that it would challenge it in the GATT."

Mr. Speaker, the full text of the letter is as follows:

THE SECRETARY OF STATE,
Washington, November 22, 1982.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

DEAR MR. SPEAKER: I am writing to express the Department of State's opposition to Section 23 of the NRC authorization bill (HR-2330), as set forth in the Conference Report. Section 23 calls, inter alia, for the imposition of a moratorium on new contracts or options for uranium imports, pending study of the effects of such imports. The Conference Report was approved by the Senate on October 1.

An import restriction of this kind would be totally inconsistent with the U.S. Government's longstanding commitment to free trade. The proposed two-year import moratorium on uranium imports, triggered by a specified import level, would represent a measure of the very kind we are urging other countries to avoid. In addition, if the provision is passed, the U.S. might well face a serious challenge in the GATT, and we might very well expect retaliation from our major trading partners in areas such as agriculture and high technology.

Such an import restriction would constitute a reversal of U.S. policy without consultation with friends and allies and would be seen by many countries as evidence of the unreliability of the United States in the nuclear field. The perception of U.S. unreliability and unilaterialism could cause a setback to U.S. non-proliferation efforts, which are based in part on influencing other countries' activities by performing as a reliable nuclear partner.

The previous embargo on uranium imports, initiated in 1964, was extremely disruptive to the world market. The current phase-out of this embargo is working well. Since total uranium imports now comprise less than 10% of domestic consumption, the current economic difficulties being experienced by the domestic uranium industry cannot fairly be traced to foreign imports. World prices of uranium have been declining due to slowed growth of electricity use and a slowdown in civilian nuclear energy programs in many countries. The major negative foreign policy consequences of highly visible and controversial controls on uranium imports would far outweigh any short-term benefits which could reasonably be expected to flow to the domestic industry.

The foreign countries which would be most seriously affected by the proposed restrictions are Canada and Australia. These two allies have provided significant support for U.S. non-proliferation policy. Both countries have strongly urged deletion of this amendment, and Canada has implied it would challenge it in the GATT.

Passage of Section 23 will have serious consequences on our efforts to promote free trade, as well as on our non-proliferation goals. I strongly urge that you support deletion of this provision from the Conference Report of the NRC authorization bill. The Office of Management and Budget advises that from the standpoint of the President's program there is no objection to the submission of this letter.

Sincerely yours,

GEORGE P. SHULTZ.

Mr. Speaker, I yield 5 minutes to the distinguished chairman of the Subcommittee on Trade, the gentleman from Florida (Mr. GIBBONS).

Mr. GIBBONS. Mr. Speaker, I thank the gentleman from Minnesota (Mr. FRENZEL), and I thank the gentleman from Arizona (Mr. UDALL) for their courtesies in this debate.

Mr. Speaker, let me assure all the Members of the House that we do not seek to wreck the conference report. This has been clearly admitted to be not germane to the conference by the distinguished chairman of the committee, and there is no doubt in my mind that if the House deletes this measure—and it should delete this measure—it will just go back to the Senate and the Senate will accept the conference report.

Let me explain to the Members how this got in the conference report. If this had been introduced in the House, it would have been referred to the appropriate committees; if it had been introduced in the Senate, it would have been referred to the appropriate committees. It was never introduced anyplace. It was one of those notorious Senate amendments on which there was no record vote, and as usual there was nobody on the floor and we ended up in conference with it and our conferees are stuck with an unconscionable negotiating position.

I cannot get mad at anybody who has a mineral industry in their State that is depressed right now. I have the phosphate industry, and it is in much worse condition than the uranium industry. It has had very high unemployment. It is not related to imports, nor is the unemployment in this industry related to imports. It is related to domestic demand, and that is the problem and we should all admit that and face up to it.

No, this is not a quota. This is an embargo. If American prices get too high and people turn to other places for uranium supplies, then there is a 2-year embargo placed upon the contracting, just going out and contracting for the supply. Then immediately domestic prices will jump; immediately consumers will be faced with rate increases all over the United States, and they will be terrific rate increases because uranium is now supplying 50 percent of the power base of New England and other States that will be in the same sort of predicament.

My State which relies very little on uranium will not have that problem, so I have no parochial interest in opposing this.

There are adequate remedies under the present law that have been in existence for a long time, so that uranium industry, if it is impacted as they think it is going to be impacted can go and get relief. In addition to that, there are national security remedies that are available for this problem.

If the national security in this country is in any way affected, the President can immediately override all the trade laws we have and can take appropriate action to protect the domestic industry. So there is no need for us to even be considering this except that it was foisted off on the Senate at a deep and dark hour by a handful of Senators, and it was forced upon our conferees or we get no bill.

Mr. Speaker, it is time to say, "no" to the Senate. They have done this far too many times. It is bad economic policy, it is bad politics, it is bad government, and it should be deleted.

Mr. UDALL. Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. OTTINGER).

Mr. OTTINGER. Mr. Speaker, I join my colleague, the gentleman from Arizona (Mr. UDALL), as a member of the conference committee in supporting this provision and opposing the motion. I do not think any of us want to see us in a posture of international trade restriction.

The problem is that we were confronted with a very difficult situation in the conference, and I think, under the leadership of the gentleman from Arizona, we were able to get very substantial concessions where there are no longer import quotas or restrictions. There is just a provision for this study and a restriction on future contracts during the 2 years that study is being made. So I think we were very successful in conference in ameliorating the very strict and damaging import restrictions that were in the Senate provision.

Mr. Speaker, I think, in the interest of comity, if there is any kind of accommodation between the two Houses, we ought to acknowledge that the committee did a very good job in conference, and we have come out with an acceptable provision that is not unduly restrictive, and it should be supported by the House.

Mr. UDALL. Mr. Speaker, I yield myself 1 minute.

Mr. Speaker, I think we are all going to be faced in these next few months and years, day after day and time after time, with industries and groups wanting special protection as this recession becomes a worldwide recession, and I think all of us are going to have to acknowledge that we have difficulties in our own areas and our own districts.

My State is one of the major hard rock mining States in America, and the miners feel very strongly about this legislation. We watered it down from what clearly was a quota situation to a study which, if certain effects are found, will be turned into eventual action, but it will be followed with laws on the books with some kind of protection that will be put in those laws, and I do not see how we could have done a better job or come back with a better result given the situation that faced us in this time of severe economic difficulties.

Mr. Speaker, I yield 2 minutes to the gentleman from New Mexico (Mr. LUJAN).

Mr. LUJAN. Mr. Speaker, I would like to concur with the gentleman and with the gentleman from New York, who made a particular statement that is not a quota restriction. We did start off seeking a 20-percent limitation on imports. As it turned out, we were not able to do that, and I can understand the rationale that was used in the conference.

□ 1530

But what we finally ended up with was that a study should be made of the national security implications of a declining uranium industry and what that would do as far as our national security was concerned.

A mandatory action required is that the Secretary start this 2-year study. If he finds that we are adversely being affected, then the mix of uranium in the enrichment process may be increased, and that increase will be from domestic uranium.

Beyond that, there is the report to the President by the Secretary of Energy. The Secretary reports to the President possible courses of action. One could be a limitation on imports. But the President will choose a course of action and will submit it to the Congress.

So I want to reiterate that this is not necessarily an import restriction, that this is principally a study, and as a matter of fact, we are really asking the Department of Energy to implement the remedy processes that they have under present law.

Mr. UDALL. Mr. Speaker, I yield 2 minutes to the gentleman from North Carolina (Mr. BROYHILL).

Mr. BROYHILL. Mr. Speaker, I rise in reluctant opposition to the amendment offered by the gentleman from Minnesota, my good friend, Mr. FRENZEL, and in support of the conference report.

Unfortunately, the adoption of this amendment would have the effect of the conference report going down and we do not know what might happen if we might adopt the balance of the

conference report with an amendment and send it back over to the other body.

It is doubtful as to whether in these waning hours we could get final action on this bill.

I must agree with the gentleman from New York, it was a difficult conference. Anytime you send your conferees to conference with the other body on a bill where there is a great deal of divergence of issues, it makes for difficult conferences. But our duty is to try to come up with the best compromise that we can.

I would point out there are other parts of this bill that have been supported by a vast majority of this House and that these parts of this bill are not only needed but are vital if we are to continue the development of nuclear power in this country.

I specifically refer to those parts of the bill that relate to the licensing and the startup of nuclear generating facilities.

Many Members know of the difficulties that many nuclear electric generating facilities have had in getting their final licenses approved. We have had a number of cases where the plant has been idle for months, costing utilities consumers millions of dollars while awaiting a final license.

There is a provision in this bill which we can, under certain circumstances, permit a temporary operating license. We hope next year to get into more detail on this subject of licensing procedures themselves. But at least there is a temporary solution to some of the problems in this bill.

I hate to see those amendments go down because of the adoption of the Frenzel amendment.

Mr. FRENZEL. Mr. Speaker, I yield 1 minute to my distinguished colleague, the gentleman from Florida (Mr. GIBBONS).

Mr. GIBBONS. Someone once pointed out that there is no free lunch and you cannot get anything for nothing.

I think we should point out, because this is a trade debate, that the principal loser in this will be two sectors of the American economy and perhaps one of our best trading partners.

The principal victim in the foreign area will be Australia, where they are our biggest import source. In fiscal year 1982, that has just closed—and I wish the gentleman from New York (Mr. OTTINGER) would pay attention to this because this directly affects him, being the biggest supporter of trucks and autos—we sold to Australia $500 million worth of trucks and autos. We also sold to Australia $600-some-million worth of machinery and equipment, some of which was manufactured in New York.

We are going to lose those markets. We are going to increase consumer costs, and we are just hurting ourselves, all because a few willful Senators in the middle of the night stuck this amendment in there and forced it off on our committees.

That is no way to conduct this Government.

Mr. FRENZEL. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. I thank the gentleman for yielding me this time.

This is a very, very tough question. It is a very close question, and I think that people could very logically come down on either side of it, depending upon how you would weigh the equities on the interests that you believe ought to be prevailing ones in a debate of this nature.

I think, however, the gentleman from Minnesota has made a good point and it ought to be sustained. We are setting a bad precedent in section 23. If we use a potentially acceptable, theoretically acceptable loophole in GATT to justify this restriction upon imports of uranium into our country, we may indeed have escaped legal recrimination from these other countries.

But I think we are very likely going to incur trade retaliation regardless.

We are looking here at telling Canada or telling Australia or telling others that we are going to bump your products out of our country and we are going to do so in violation of the spirit of GATT.

I think the trade history in this country shows that you cannot undertake action which is calculated to hurt the industries of other countries without seeing retaliatory action taken in recourse.

So here, for example, I believe there is a very, very great risk that we run that there will be some sectoral retaliation which will take place.

For example, in the United States, uranium is used in our nuclear generating industry, located in the Northeast or other parts of the country. Some of us might be dependent upon nuclear energy, as, for example, we are in New England. But in New England we are now trying to consummate arrangements with Canada with regard to importation of their surplus hydropower. We might see there now a change in the Canadian negotiations posture with us and what they want to charge us for that hydropower for New England.

So while the Senate is trying to take care of Arizona or New Mexico, we up in New England or New York or other parts of the country will pay the price. There is no free lunch. There is no way of believing you can shove free trade with friends in this way and have it not come out another. It will. It invariably will. It inexorably will. It eventually will show up in another form.

I believe we will have harmed because, in addition, we have to talk about whether or not in fact there is a real problem with the domestic uranium industry and what is the source of it.

The primary source of the problem is that when they were opening these mines, when they were projecting what the growth of the uranium industry in this country would be a generation ago, the prospect was that there would be 300, 400, 500 nuclear reactors in our country.

There has not been a new nuclear reactor ordered in the past 5 years and there will not be another one for as long as we live in this country.

So we have a problem. We have an industry that was propped up, that was subsidized, that was put into business by one set of circumstances and now the whole premise upon which this industry was born has changed.

There appears now to be a surplus of uranium which will be available domestically through the coming generations. There is a real serious problem of a uranium glut worldwide.

What we will do is not only misanalyze the cause of the problem but I think we will exacerbate other problems that we have not just with trade, but also in terms of nonproliferation.

If we tell other countries such as Canada and Australia, that look to us as a market as potential purchaser of their uranium—that they no longer are welcome here, I am really afraid that as bad as our nonproliferation policy is, as bad as the Reagan nonproliferation policy is with regard to the sale of uranium or plutonium, dangerous nuclear materials to other countries, that they will feel the pressure. They will feel the domestic economic pressure to find other sources for the sale of this material because they will feel that pressure as well, and I am afraid what we will wind up with in 20 or 30 years in this world is not asking the question who has nuclear bombs but asking the question who does not have nuclear bombs.

□ 1440

So I think we have to be very, very careful as we enter into this very, very dangerous, unchartered terrain. I think it is important for us to have the Ways and Means Committee and subcommittees of jurisdiction to look at our overall trade policy, not just with regard to uranium, but with regard to high tech firms, with regard to our automobiles, to begin to put together a comprehensive policy that we all can rally behind, because I think it is critically important that we do so.

I am saying that at some future point it might not be important for us to take this kind of action against a country which is trying to undermine an industry, but let us do it in a com-

prehensive way, let us do it in an organized way, in a well-thought-out way.

Mr. FRENZEL. Mr. Speaker, I yield myself 3 minutes.

Mr. Speaker, I insert in the RECORD at this point two letters, the first of which was written by Chairman ROSTENKOWSKI of the Ways and Means Committee, and other senior members of that committee, on the subject of this matter, dated September 29, 1982, and another letter of the same date, from the U.S. Trade Representative, the Honorable Bill Brock, to members of the Ways and Means Committee on the same subject:

COMMITTEE ON WAYS AND MEANS,
Washington, D.C., September 29, 1982.

Subject: Conference Report on H.R. 2330, The Nuclear Regulatory Commission Reauthorization Act.

DEAR COLLEAGUE: This week the House will consider the conference report on H.R. 2330, the Nuclear Regulatory Commission Reauthorization Act, which contains a restriction on foreign purchases of uranium by U.S. nuclear power facilities. This provision was adopted by the conferees at the insistence of the Senate. The House bill contained no such restriction and none was ever considered by either Committee responsible for the bill.

We believe this restriction will have a significant adverse effect on our foreign relations. Limitations of this nature are proscribed by Article III of the General Agreement on Tariffs and Trade (GATT) and passage of the bill could lead to disputes with several important trading partners. The President already has discretionary authority to limit imports whenever he finds them to constitute a national security threat and we believe restrictions would be unjustified absent such a finding.

Another troubling problem is the potential effect of this legislation on consumers, who will have to bear the burden of higher energy costs. In some parts of the country nuclear energy provides up to 50 percent of electrical power, yet no credible assessment of the economic impact was offered by the Senate sponsors.

During consideration of the conference report we intend to join other Members in seeking rejection of the foreign purchasing limitation. A provision of such significance to our foreign policy and domestic economy should receive thorough attention from the appropriate committees before it is considered on the floor. We urge your support in opposing this hastily-adopted import restriction.

Sincerely yours,

DAN ROSTENKOWSKI,
Chairman,
Committee on Ways and Means.

SAM H. GIBBONS,
Chairman,
Subcommittee on Trade.

BARBER B. CONABLE, Jr.,
Ranking Minority Member,
Committee on Ways and Means.

GUY VANDER JAGT,
Ranking Minority Member,
Subcommittee on Trade.

BILL FRENZEL,
Member,
Subcommittee on Trade.

THE U.S. TRADE REPRESENTATIVE,
Washington, September 29, 1982.

Hon. BILL FRENZEL,
House of Representatives,
Washington, D.C.

DEAR BILL: I am writing to you once again to express the Administration's continued opposition to Section 23 of the Nuclear Regulatory Commission Authorization bill (H.R. 2330) as set forth in the Conference Report.

Section 23 contains provisions that would trigger an automatic moratorium on contracting for imported uranium upon a projected estimate that future imports might reach a specified level. Inherent in this formula is the assumption that this specified level of imports equates to a threat to the viability of the domestic uranium industry and thus our national security.

The Administration is concerned with the health of the domestic uranium industry, and its role in meeting our national security and energy needs. We also understand that the viability of this industry could be threatened were imports to increase dramatically. The President already has express statutory authority (under 19 U.S.C. 1562) to limit imports whenever he finds them to pose a threat to the national security. However, since total uranium imports comprise less than 10 percent of domestic consumption, the economic difficulties of our domestic industry cannot be fairly blamed on foreign imports.

Therefore, the Administration finds unacceptable any proposal that automatically "triggers" a trade restrictive action absent a finding of injury, consistent with our international obligations. We also oppose any proposal based upon the assumption that a predetermined level of imports constitutes a threat to the domestic industry and the national security. To accept such proposals would be a reversal of this Administration's trade policy, and would counter our efforts to discourage other countries from adopting similar measures.

Enactment of this uranium import restriction will hurt the workers and consumers of this country. This provision unquestionably violates our international obligations. We can expect that the uranium exporting countries, particularly Australia and Canada, will take action to retaliate against U.S. exports. Such retaliation, especially in the area of agriculture and high technology, could well lead to loss of U.S. jobs and work to the disadvantage of U.S. industry as a whole.

Additionally, in some parts of the United States, nuclear energy provides up to 50 percent of electrical power; higher uranium costs will raise energy costs to consumers and businesses. The Department of Energy projects that by 1990, this uranium import restriction would cost U.S. consumers $1.6 billion annually, based on 1981 dollars. Factories that are highly dependent upon nuclear energy will be faced with power cost increases at a time when they can least affort it. This will reduce their competitiveness in the United States and world markets.

We realize that the uranium industry, like many U.S. industries, is facing serious economic difficulties. However, adoption of Section 23, while possibly providing short-term relief to the domestic uranium industry, will have damaging consequences in the short run and the long run, not only for our trade policy, but for other U.S. industries.

I strongly urge you to support efforts on the House floor to eliminate this provision from the NRC Authorization Conference Report. The Office of Management and Budget advises that there is no objection from the standpoint of the President's program to the presentation of these comments.

Very truly yours,

WILLIAM E. BROCK.

Mr. Speaker, I would like everyone in this Chamber to know that I think our committee and our conference managers did a splendid job. I think we have a fine bill here, with the exception of this offending section 23.

I realize that any conference requires compromise, and that a spirit of comity between the two bodies is required to produce laws. Conferences are always difficult.

However, one of the reasons why we have the rule I invoked today was to get our conferees off the hook when nongermane materials are presented and would not otherwise be acceptable in the House. It was designed to help our conferees in supporting the House rules and the House position.

It has also been stated that this provision does not represent a restriction. It is my chore to inform this group that the administration feels it is an enormous restriction and hopes that my motion is sustained and that section 23 is removed.

Chairman ROSTENKOWSKI wrote:

During consideration of the conference report we intend to join other Members in seeking rejection of the foreign purchasing limitation. A provision of such significance to our foreign policy and domestic economy should receive thorough attention from the appropriate committees before it is considered on the floor. We urge your support in opposing this hastily-adopted import restriction.

So do I, Mr. Speaker. I hope my motion is sustained.

Mr. Speaker, I yield such time as he may consume to the gentleman from New Mexico (Mr. SKEEN).

Mr. SKEEN. Mr. Speaker, this Nation has long recognized that a viable domestic uranium industry is not only an integral part of the nuclear fuel cycle but also vital to assure our national defense and security. Unfortunately, the domestic industry's continued viability is being seriously threatened by unnecessary overregulation and by our rapidly increasing dependency on imported uranium.

The domestic uranium industry's ability to compete with foreign producers is seriously jeopardized because of unwarranted and costly regulatory impositions. For example, NRC has adopted onerous radon flux regulations, known as the uranium mill licensing requirements, which will cost the domestic industry a billion or more dollars but which NRC itself admits are unjustified. Indeed, in a recent memorandum, high-level agency staff declared that the risk from radon flux from tailing is "immeasurable and insignificant." The

NRC is now threatening to revoke New Mexico's regulatory jurisdiction because the State, after a lengthy hearing, concluded that NRC staff was correct and the Commission's approach was unsupported and impracticable. It is poor policy and poor government to impose billion-dollar requirements, which the agency admits are not justified, on a critical and already beleaguered industry. The language reported by the conference committee should remedy this problem by requiring EPA and NRC to assure that regulatory burdens are not out of proportion to benefits and that pertinent factors, such as economic costs and the significance of health risks, are properly weighed in setting agency requirements. While this will likely require EPA and NRC to reconsider and reformulate at least some of their actions, uranium mills will remain subject to NRC or agreement State licensing control in the interim while EPA and NRC develop a supportable approach. The public health will thus continue to be fully protected. The conferees have also appropriately clarified that NRC cannot revoke a State program without a hearing and that mill tailings are regulated either by a State under the agreement States program or by NRC, but not by both. In short, there is no dual jurisdiction.

I also wish to emphasize that it obviously makes no sense for the rules to keep changing on operators and DOE. EPA should issue reasonable standards (assuming arguendo that further standards beyond those specified in 10 CFR, part 20 are required) and NRC should not then adopt reasonable requirements. NRC should not first act, then EPA, and then NRC again. I read the language reported by the conferees as consistent with this interpretation. However, a puzzling statement crept into the conference report which makes a confusing attempt to sanctify NRC's precipitous action in issuing standards in advance of EPA standards. I certainly hope that this is not construed as somehow overriding the words of the statute or as giving our imprimatur to bureaucratic turmoil and lack of sound administrative practices.

The conferees have also taken some steps to address our rapidly developing dependence on imported uranium. I realize that some have urged that any action which may favor our domestic industry is contrary to interests in free trade. However, the uranium industry has long been viewed as vital to our national security and energy independence. Moreover, Canada and other uranium exporting countries have well-known policies to support the prices of their uranium through control over export contracts. These policies are intended to subsidize their own producers and consumers at the expense of importing countries, such as the United States. They are enforced in part by laws restricting or penalizing the applicability of American antitrust requirements. Since the price and availability of imported uranium is regulated by foreign governments, it is unfair and unwise not only from the perspective of our domestic producers but also from the perspective of our consumers to allow foreign uranium suppliers to dominate the American market so as to render our domestic industry incapable of servicing our needs. By way of illustration, I ask unanimous consent that a few excerpts from some Canadian and Australian documents suggesting the policies pursued by those countries be included in the RECORD.

Excerpts from statement by the Honorable Donald S. MacDonald, Minister of Energy, Mines and Resources on Canada's Uranium Policy, September 5, 1974:

Under existing uranium export policies, the regulating agencies are required prior to issuing an export license to examine contracts with respect to implications of such matters as international safeguards, *the relationship between contacting parties, price and volumes of sales* to the export market, and reserves and rate of exploitation. * * * While recognizing that considerable time may elapse between negotiating a sale and completing a contract, the Board will require producers to submit, within 90 days of the acceptance of an offer by a purchaser, documentation *giving the base pricing, quantity and delivery conditions.* * * * (Emphasis added.)

Excerpts from notes for an address by the Honorable Marc Lalande, Minister of Energy, Mines and Resources to the Canadian Electrical Association, June 22, 1981:

Here I would like to comment briefly on the federal government's basic export policy, whether it involves electricity or any other source of energy. We are strongly in favour of exporting energy, provided the Canadian market has first been fully and completely served, and provided the short- and medium-term expansion prospects of that market have been accurately established and an adequate safety margin has been retained to cover future needs. Beyond this, we are strongly encouraging producers to export their surplus, as determined by the National Energy Board; they would thus help the United States to further minimize their dependence on oil imported from overseas. *Such exports must, however, be priced high enough so that Canadian producers can realize a profit; such profits should then enable them to keep the prices they charge to Canadian consumers at a reasonable level.* (Emphasis added.)

Excerpts from Australia's Mineral Resources—Development and Policies (1981):

The fundamental objective of [Australian uranium export] controls is to protect the national interest. Among other things, export controls are used *where necessary to ensure fair and reasonable world market prices are achieved;* adequate supplies are available for the domestic market; international and strategic obligations are met; and the Government's nuclear safeguard and physical protection requirements on exports are met. * * * (Emphasis added.)

Although I fully support the provisions in the authorization bill, I believe that more must be done to sustain a domestic uranium industry capable of holding down prices and fulfilling our domestic needs in time of crises. In particular, current DOE approaches to uranium enrichment, such as the fixed tails assay and the split tails policy, must be modified. These DOE policies unfairly depress the demand for uranium and amount to a costly and hidden tax on the domestic uranium industry and its employees for the purpose of subsidizing the DOE enrichment program, including DOE's development of gas centrifuge technology. DOE should abandon these burdensome policies immediately. This would expand the demand for uranium and put some of the thousands of unemployed uranium miners in New Mexico and other States back to work.

● Mr. GORE. Mr. Speaker, I urge my colleagues to support the motion to strike section 23.

This section is an attempt to assist the ailing domestic uranium industry by limiting competition from foreign uranium imports. I do not believe that section 23 could accomplish what its sponsors apparently hope for. It is not addressed to the root causes of the domestic uranium industry's problem.

While it is true that foreign uranium enjoys a natural competitive advantage over domestic uranium, the fundamental reason for the current depressed state of the uranium industry is the decline in demand for electricity. In the past, nuclear plant owners, such as TVA, have been large purchasers of uranium. Faced with declining demand for electricity and the increasingly prohibitive costs of building nuclear plants, TVA and other electric systems have canceled many nuclear plants in the last few years.

In addition, many of these electric systems already had purchased substantial amounts of uranium to fuel these now canceled plants, and simply do not need to purchase more uranium at the present time. For example, in 1973 TVA believed that it would need 86 million pounds of uranium between 1979 and 1990 to fuel its projected 17 nuclear generating units. During the seventies, TVA purchased less than half of that amount, canceled or indefinitely deferred plans to build eight of these units, and now has a uranium inventory and supplies under contract sufficient to last it at least until 1988. Many of the Nation's other electric systems are in a similar position. Section 23 does not address, nor could it provide any remedy for, the overall decline in uranium demand.

To the extent that foreign competition is garnering an increasing share

of the meager domestic uranium market, it is doing so because of its natural competitive advantages. Many foreign uranium ore bodies contain high quality, easily accessible reserves which cost far less to mine than uranium found in this country. For example, a good U.S. mine produces 3 to 4 pounds of uranium concentrate per ton of ore mined, whereas the ore bodies in Saskatchewan average approximately 27 pounds of uranium per ton of ore.

The response proposed by section 23 to this natural competitive advantage is both inequitable and shortsighted. It is inequitable because it will have a disproportionate impact on electricity consumers across the Nation. For the past decade, those consumers have borne the burden of ever-increasing fuel costs and dramatically higher electric rates. Electric systems have a responsibility to turn to the lowest priced uranium available—which may well be low-cost foreign uranium reserves. When section 23 makes it impossible for electric systems to purchase these foreign reserves, their consumers will have to pay the penalty in even higher electric rates.

Further, uranium producers have claimed that the formation of the international uranium cartel in 1972 was encouraged by this kind of domestic industry protection policy. TVA and its electricity consumers were significantly injured by that cartel and have taken the lead in suing its members for their antitrust violations. We do not think that uranium producers should now have section 23 as an excuse to repeat that history.

The approach taken by section 23 also appears shortsighted from a national security standpoint. After all, uranium is not a renewable resource. By forcing electric systems to purchase domestic uranium, section 23 simply would implement a deplete America first policy. In addition, the largest bodies of low-cost foreign uranium resources are heavily concentrated in countries which are our current allies—Australia and Canada. No one can say with certainty, however, what the future will bring after we have used up domestic resources and are forced inevitably to turn to foreign sources for supply. For example, we already have seen Australia's Labor Government preclude development of uranium mining during the midseventies, and Canada has implemented a policy to insure that the needs of its own utilities are met first before uranium is exported. Thus, the United States might well be better protected in the long run without any limitations on current purchases of foreign uranium.

I urge my colleagues to support the action to strike section 23.●

Mr. UDALL. Mr. Speaker, I insert in the RECORD at this point two letters I referred to earlier, one from the Edison Electric Institute, supporting the conference report, and one from the American Federation of Labor and Congress of Industrial Organizations, supporting the conference report:

EDISON ELECTRIC INSTITUTE,
Washington, D.C., September 22, 1982.

Hon. WILLIAM E. BROCK,
U.S. Trade Representative, Washington, D.C.

DEAR BILL: The Edison Electric Institute strongly supports the Nuclear Regulatory Commission Authorization for fiscal years 1982 and 1983 (H.R. 2330). We have recommended that Congress approve the Conference Report as soon as possible and we will urge the President to sign into law this important bill.

EEI supports free trade and is aware of your concerns over a provision which requires a study of the domestic mining industry and which, depending upon the outcome of the study, could be followed by a future limitation on the amount of uranium imported into the United States. However, the provision as adopted by the conference is primarily a study and we do not believe it would actually result in an import limitation during the 1980's or early 1990's because current contracts are in place covering those requirements. Thus, while it would appear that there are potential limitations, we do not view this provision as an actual restriction and the issue pales in comparison to other vital issues addressed in this important bill.

H.R. 2330 includes nuclear power plant licensing reforms crucial to the well-being of the utility industry. One of these is the authority provided NRC to grant a temporary operating license (TOL) to a plant whose construction and safety approval procedures are complete but for which the final public hearing has not been conducted. Granting a TOL to new plants which would otherwise sit idle awaiting the final hearing could save consumers up to $30 million per plant per month. Part of this cost, of course, can be attributed to the imported oil that would otherwise be displaced by new nuclear capacity. The impact, therefore, on the U.S. balance of payments situation is obvious.

Another key provision reverses the so-called *Sholly* decision which requires the Commission to hold a public hearing, if requested by an intervenor, on any routine license amendment. Since a utility applies for hundreds of licensing amendments for operating plants, the *Sholly* decision, if not overturned, could result in hearings prolific enough to devastate the industry.

For these reasons, we ask you to join us in seeking the President's support of the Conference Report.

Sincerely,

FREDERICK L. WEBBER.

AMERICAN FEDERATION OF LABOR AND CONGRESS OF INDUSTRIAL ORGANIZATIONS,
Washington, D.C., September 30, 1982.

I would like to urge your support for the conference report on H.R. 2330, the Nuclear Regulatory Commission Reauthorization Act. This critical piece of legislation deserves congressional attention prior to the recess.

In particular, I would like to urge your support for the uranium supply provisions of the conference report. We would like to make clear that these provisions do not establish a quota on uranium imports.

The U.S. uranium industry is in extremely critical condition. DOE has reported that over 50 percent of uranium industry workers have been laid off. The uranium supply provisions of he conference report will revitalize the industry and put uranium miners back to work.

The uranium supply provisions of the conference report require a Presidential study of the impact of foreign uranium on U.S. national security. In addition, this section requires appropriate studies by the Department of Commerce and International Trade Commission before any limitation on uranium imports can be established. The section will require monitoring by the Department of Energy of contracting for foreign uranium and if contracting exceeds 37.5 percent of U.S. demand, then a brief limitation on further contracting will take place. Article 21 of the General Agreement on Tariffs and Trade specifically provides for adjustments to trade for uranium.

Again, I urge support for the conference report and consideration of this important piece of legislation prior to the recess.

Sincerely,

RAY DENISON,
Director,
Department of Legislation.

Mr. UDALL. Mr. Speaker, I ask for a "no" vote on the pending motion.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Minnesota (Mr. FRENZEL).

The question was taken; and the Chair being in doubt, the House divided, and there were—ayes 8, noes 9.

Mr. FRENZEL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 241, nays 148, not voting 44, as follows:

□ 1500

Mr. LONG of Maryland, Mr. HUNTER, Mrs. HOLT, Mrs. KENNELLY, and Messrs. LUKEN, MINISH, McEWEN, and WEAVER changed their votes from "yea" to "nay."

Messrs. WOLPE, SMITH of Iowa, MICA, ROEMER, ARCHER, PRICE, and BIAGGI, Mrs. ROUKEMA, and Messrs. PEYSER, LOEFFLER, STENHOLM, VOLKMER, SMITH of Oregon, ANNUNZIO, ROBINSON, WHITEHURST, D'AMOURS, LOWERY of California, MARLENEE, DAN DANIEL, FISH, TRIBLE, and BLILEY changed their votes from "nay" to "yea."

So the motion to reject section 23 of the conference report was agreed to.

The result of the vote was announced as above recorded.

POINT OF ORDER

Mr. STRATTON. Mr. Speaker, I make a point of order that the matter contained in sections 14, 17, and 18 of the substitute for the Senate amendment in the conference report would not be germane to H.R. 2330 if offered in the House and is, therefore, subject to a point of order under the rules of the House.

I make this point of order, Mr. Speaker, because sections 14, 17, and 18 would be permanent changes in law and this bill is a 2-year authorization bill; also, the three sections contain matters that fall within the jurisdiction of the Armed Services Committee.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Arizona (Mr. UDALL).

Mr. UDALL. Mr. Speaker, I concede the point of order and wish to be heard in the regular order on the motion.

The SPEAKER pro tempore. The point of order is sustained.

MOTION OFFERED BY MR. STRATTON

Mr. STRATTON. Mr. Speaker, I offer a motion.

The SPEAKER pro tempore. The Clerk will report the motion.

The Clerk read as follows:

Mr. STRATTON moves that the House reject sections 14, 17, and 18 of the substitute recommended in the conference report.

The SPEAKER pro tempore. The gentleman from New York (Mr. STRATTON) will be recognized for 20 minutes, and the gentleman from Arizona (Mr. UDALL) will be recognized for 20 minutes.

The Chair now recognizes the gentleman from New York (Mr. STRATTON).

□ 1510

Mr. STRATTON. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, I have made a point of order against the consideration of the conference report on H.R. 2330.

As the conference report points out, H.R. 2330 was passed by the House and then amended by the Senate. The conferees adopted numerous Senate amendments, which would be in violation of the provisions of clause 7 of rule XVI if such amendments had been offered as an amendment in the House. In other words, Mr. Speaker, several of the Senate amendments are nongermane since they deal with appropriations and subjects different from that under consideration in the House bill.

Furthermore, the conference report invades the jurisdiction of several committees of the House, since it contains directions and limitations on Government agencies other than the Nuclear Regulatory Commission.

Section 14 of the conference report, for example, is nongermane as an amendment to the House bill authorizing appropriations for the Nuclear Regulatory Commission. Section 14 was a Senate amendment that deals with special nuclear material by amending the Atomic Energy Act of 1954, but special nuclear material is material that is used for the purpose of making nuclear weapons and is, therefore, under the jurisdiction of the Committee on Armed Services.

The language of section 14, as adopted by the conferees, would therefore have been nongermane had such an amendment been offered in the House.

Section 17, which was a Senate amendment to the House bill, is also nongermane since it would revise permanent law through a 2-year authorization. This section would revise a statute dealing with the release of information concerning security measures by the Secretary of Energy, and other matters that involve the nuclear weapons program of the Department of Energy.

Section 18 of the conference report would revise permanent law through a 2-year authorization bill. The Senate amendment is also nongermane because it affects the Department of Energy in general, the Department of Energy defense programs in particu-

lar, and the Environmental Protection Agency, in addition to the Nuclear Regulatory Commission.

Mr. Speaker, this conference report, as the action taken by the gentleman from Minnesota a little while ago and sustained overwhelmingly by the House, is a Christmas tree. It contains a number of provisions that have been tacked onto a simple 2-year appropriation authorization bill for the Nuclear Regulatory Commission, and a good many of those really are not germane in the House or have no bearing on the basic operations of the Nuclear Regulatory Commission.

The appropriate committees of the House have a right to carefully consider these members if they are properly introduced and referred to them. But important changes in existing law should not be forced on the House through backdoor, nongermane Senate amendments, and we should not be forced to have only 40 minutes of debate on subjects that would change a national policy that has existed since the 1940's.

This is particularly the case with respect to section 14. It has been the national policy of the United States that the Federal Government shall have access to all special nuclear materials. This policy was based on the paramount importance of these materials to the national defense, and the Government has always claimed a right to these special nuclear materials no matter where they were located, either in a nuclear power reactor or elsewhere. However, the Senate, in section 14, would reverse that policy in a bill that is intended to authorize appropriations for the Nuclear Regulatory Commission. It would prevent the Government from recovering materials from any licensed facilities in time of war or for pressing needs from any facility licensed under the Atomic Energy Act.

As a matter of fact, Dr. Herman Roser stated the administration's strong position in opposition to this proposal in connection with an amendment added to H.R. 3809. He pointed out that the cost of section 14 could be as much as $15 billion to $30 billion to the taxpayers of the United States.

Section 17 is also another nongermane amendment. The statute which it deals with prohibited the dissemination of certain unclassified information if that information could be reasonably expected to result in having adverse effects on public health and safety.

The purpose of the legislation was to prevent terrorist acts or sabotage at vital Department of Energy defense facilities.

The Committee on Armed Services has found that there have been threats and certain information regarding alarm system layouts, wiring diagrams, and other information that would be helpful to terrorists or saboteurs have been available even to the Soviet Embassy or to the PLO through the Freedom of Information Act.

The Secretary of Energy could not classify this information under our classification arrangements, but now, by a nongermane amendment to this bill, the Senate would require the Secretary of Energy to make this information available freely, which could assist terrorists in making attacks on our nuclear installations.

How silly can we be?

The SPEAKER pro tempore. The time of the gentleman from New York (Mr. STRATTON) has expired.

Mr. STRATTON. Mr. Speaker, I yield myself 2 additional minutes.

Mr. Speaker, the nongermane amendment represented in section 18 of the conference report amends the law dealing with uranium mill tailings. This amendment would put the Nuclear Regulatory Commission in the position of establishing standards for health and safety, rather than the EPA, which now has that authority under the law.

The Committee on Armed Services in recent weeks has held exhaustive hearings on the subject of uranium mill tailings, and dozens of expert witnesses have appeared before the committee and were unable to cite any evidence that mill tailings have or ever will constitute a threat to the public health or safety.

Under the amendment offered in the Senate, the Nuclear Regulatory Commission, which has no authority, would be required to come up with standards which could require costly cleanup operations with regard to a substance which, as I have said, we have been assured has no harmful effect, and this has been so certified by competent witnesses before our committee.

So I think these three nongermane amendments: One of which would cost the Nation some $30 billion in recovering special nuclear materials in time of danger; the amendment that would open up to future terrorists the security procedures in effect in our nuclear installations, and an amendment that would require the expenditure of millions of dollars to cleanup a nonexisting threat, certainly should be voted down.

Mr. Speaker, I urge the House to reject, as they have already done with respect to section 23, sections 14, 17, and 18 of the substitute recommended in the conference report.

Mr. Speaker, I reserve the balance of my time.

GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the debate and the motion offered by the gentleman from Minnesota (Mr. FRENZEL) and on the series of motions subsequent thereto.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. UDALL. Mr. Speaker, I yield 3 minutes to the gentleman from Oregon (Mr. WEAVER).

□ 1520

Mr. WEAVER. Mr. Speaker, I thank the gentleman and my chairman. One of the provisions we are discussing here is the provision that would prohibit the use of nuclear waste materials from being incorporated for military explosive uses. This is similar to an amendment that I offered in the Interior Committee, and was accepted in the Interior Committee, to the nuclear waste bill. I had the opportunity to offer this amendment on the floor to the nuclear waste bill, but I chose not to because of the argument made to me that it was more properly placed in this bill, in this conference report. I accepted that argument, and I argue here therefore that it should remain, the Senate provision prohibiting the use of commercial nuclear materials for nuclear explosive devices, be prohibited.

I feel very strongly, Mr. Speaker, that the Atoms for Peace movement that began in the 1950's would be seriously undermined if we converted Atoms for Peace to commercial Atoms for Peace in war. I think that would tend to destroy the very idea of any peaceful nuclear use if we said, "No, we are going to change Atoms for Peace into Atoms for War."

I think that would be one of the worst things this country could do in leading the world toward more peaceful uses and purposes of the resources and materials we have. If we broadcast to the world, Mr. Speaker, that we were using our Atoms for Peace also for war, it could have a devastating effect on the leadership of the United States in this field.

So, I ask that the Senate provision prohibiting commercial nuclear act or materials from being used for nuclear explosive devices be kept in the bill.

Mr. STRATTON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I might simply respond to the distinguished gentleman from Oregon that the Atoms for Peace proposal was a part of the original Atomic Energy Act, and that the capability of the Government to recover atomic energy from spent nuclear fuel provides the nuclear atoms that have been made available for peace that was part of the original ligislation.

The gentleman says he was advised to put his amendment in this particular bill, but I might suggest to him he

would have been better advised to add that amendment to a bill coming out of a committee with jurisdiction over special nuclear materials, to wit the Committee on the Armed Services.

Mr. Speaker, I yield 10 minutes to the gentlewoman from Maryland (Mrs. HOLT).

Mrs. HOLT. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I rise in support of the motion to strike sections 14, 17, and 18 from the conference report on H.R. 2330.

Those of us who engage in conferences with the Senate are all too aware of the problems caused by nongermane amendments that seem to easily find their way into House bills that are carefully considered by appropriate House committees, that are sensitive to the germaneness rule and to the jurisdiction of other House committees.

A good many of these nongermane amendments are floor amendments that have not been exposed to the hearing process or to debate. Some of these amendments that the House conferees are urged to bring back to the House, in spite of the longstanding rule on germaneness, are pet projects of staff persons or parochial interests that could never be passed if they were in the form of a freestanding bill. Such is the case with the conference report on H.R. 2330.

This bill began as a Nuclear Regulatory Commission Authorization Act for fiscal years 1982 and 1983. The bill, now after the adoption of many nongermane Senate amendments, is simply an omnibus Atomic Energy Act amendments bill. This small, 2-year authorization bill now contains no fewer than 11 substantive and sweeping amendments to current law.

If these amendments were so badly needed, one wonders why the appropriate committees of the other body and of this body did not introduce such legislation, hold hearings, solicit the views of the administration, report a bill, and give the Members of this House an opportunity to debate the merits of these changes to permanent law.

Every legislative reorganization act that I remember has tried to deal with this type of abuse of the legislative process. We now have a mechanism for dealing with this sort of abuse. This is our opportunity to enforce that mechanism and the germaneness rule. This is our opportunity to assist House conferees in the future who spend endless hours being lobbied and harangued to accept amendments that we know that the rules of the House will not permit us to accept.

We now have the mechanism to vote down nongermane and ill-conceived amendments tacked on to House bills. Today, let us enforce the House rules. Let us send out the message that House bills are not the baggage carriers for every pet project that occurs to staff people or to members having parochial interests. Let us preserve the integrity as well as the honesty of the legislative process. Let us vote down these nongermane amendments.

Mr. Speaker, I strongly oppose section 14.

The fact that section 14 makes no sense is easily illustrated if we consider a few questions. Are we to ban military use of food because it is derived from the same farms that produce food for civilian use? Are we to prohibit military consumption of petroleum if that petroluem is taken from the same fields that produce it for civilian uses? Are we to preclude our soldiers, sailors and airmen from consuming Coca-Cola and Pepsi-Cola because the plants which produce our servicemen's beverages are basically civilian in nature? Should electricity from nuclear powerplants not be used for atomic energy defense activities? Are we to forbid chemical plants which produce goods from civilians from ever supplying the military? Obviously we are not and will not. But if we are not doing these ridiculous things, then why are we considering a similar action with respect to plutonium derived from civilian spent nuclear fuel? The answer, I am told, is that we must adopt a law barring military use of spent nuclear fuel because antinuclear groups otherwise will erroneously claim, as they erroneously will anyway, that civilian nuclear powerplants are "bomb factories." Well, I am deeply troubled, and I believe that we all should be, that it has somehow suddenly become ghastly and immoral to contribute to the Nation's defense, even as a "bomb factory." In years past, our bomb factories helped us protect our freedom and helped us to end wars started by totalitarian aggressors by supplying us with the means to defense ourselves. Even as we speak, these now lowly bomb factories continue to protect our liberties keeping this generation's crop of totalitarian aggressors at bay. In sum, this amendment is based on the presumption that our national defense is somehow immoral. This is grounds enough to oppose it. But there are other reasons as well. For one thing, it is illogical and wasteful of taxpayers' money to hinge decisions relating to the national defense on misperceptions and propaganda propounded by antinuclear groups. If it is economically desirable to resort to military use of spent nuclear fuel, why not allow the military to make that use? Why should taxpayers be burdened with the additional billions to produce plutonium for nuclear weapons if the President and the Congress agree that nuclear weapons must be produced and the plutonum could be made available from spent fuel.

Mr. Speaker, I believe that section 14 is flatly detrimental to the Nation's interests and I oppose it. We all should.

Mr. UDALL. Mr. Speaker, I yield 3 minutes to the gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. Mr. Speaker, what we are talking about here is turning every nuclear powerplant in America into a bomb factory. That is what we are talking about. We are saying that, whether you have Diablo Canyon, Three Mile Island, or Seabrook, every time one of our constituents turns on the light, they will also be producing materials that will be used to build nuclear bombs in this country. Is that what you want our civilian nuclear program to be, a generator of nuclear materials for bombs?

Now, we have for the past couple of decades tried to put together a policy in this country. In 1968, we signed the Arms Proliferation Treaty. In 1978, we put together the Non-Proliferation Act. We were trying to tell Pakistan, India, Brazil, and Argentina, "Don't take these civilian reactors with their plutonium or uranium to build nuclear weapons," because that would tear down the curtain that existed between civilian and military uses of the atom. So, we tried to construct a myth—and it is only a myth—but at least put up some walls, some safeguards, to make sure it would be pretty difficult to do it.

But, now former Secretary Edwards and others in the Reagan administration that do not think it really is economical to build more defense facilities to produce plutonium or uranium, they want to use part of the waste of civilian reactors. So, if you want to kill the nuclear industry in this country, if you want to be sure that the nuclear industry will die as sudden a death as any industry has ever, you let every man, woman and child in this country believe that every time they turn on the switch, every time a piece of toast pops up, every time they plug in a toaster, every time they use nuclear electricity, that they are also producing nuclear bombs.

Do you think the nuclear freeze issue is big? Wait until you see the reaction in this country of people who think that they are making bombs every time they are popping up their toast. It will kill the industry. The nuclear industry opposes the position of the gentleman from New York. They want to have a ban on the use of uranium and plutonium in civilian reactor facilities to be used for nuclear weapons. They do not want to see that wall torn down. They do not want to see the example which would be set to spread to other countries, the Third World countries—to the Qadhafi's, the

Galtieri's—to others who really generally do want to convert civilian peaceful programs into military programs.

Yes, there is a myth that exists. The myth is that there is such a thing as a peaceful atom and a war-like atom. No, there is one atom. It can be used either way depending upon whose hands it is in. It is about time we understood that every nuclear powerplant in this country is also potentially a bomb factory. If we want to go from an era in which we think of them as plants that generate electricity, which have this unfortunate byproduct of nuclear waste, into an era in which the generation of nuclear bombs has this wonderful byproduct of electricity, fine, support the gentleman from New York, but I tell you, in supporting him, you will also sound the death knell for the domestic civilian nuclear industry in this country. Never again will we build another plant.

Mr. UDALL. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. OTTINGER).

Mr. OTTINGER. Mr. Speaker, let me first address the questions of jurisdiction that were raised by my good colleague and dean from New York. We intentionally established in this country civilian control over the nuclear genie. We took out of the Defense Department the control of nuclear materials. As a matter of fact, even defense-related nuclear materials were put into the Department of Energy. The committees of the House that had to do with energy and the Interior Department were given control over the Nuclear Regulatory Commission and over the Department of Energy's civilian nuclear activities. The motion before us deals with the uses of civilian-produced spent fuel, which is clearly within the jurisdiction of the Interior and Energy and Commerce Committees. Therefore, it is entirely appropriate that we should be concerned and deal with these matters.

Second, perhaps the greatest danger to the world, far greater than the danger that the Russians will drop bombs on us, is the problems of proliferation. We can be reasonably assured that the Russians will not drop bombs on us because they know that if they do so we will destroy them in retaliation.

One of the most shocking proposals in contravention of our antiproliferation efforts that has been made by this administration is the suggestion advanced by my colleague from New York (Mr. STRATTON) contained in his motion—namely, to permit civilian spent fuel in our own country to be used for military purposes.

To do so would set a terrible example. At the present time we are seeking to prevail upon countries like Pakistan, North Korea, South Africa, India, and others, that they should not use their civilian reactors for military purposes, and that they should subject their civilian reactors to international safeguards for assure that there is no diversion of waste to produce bombs. Indeed, those negotiations are going on at the very moment that we are sitting here considering this measure today.

India, of course, set the horrible example. They showed that in spite of the arguments of many nuclear advocates that civilian nuclear reactors could never be used to produce bombs and that spent fuel was the least likely way to make bombs, India in fact used plutonium produced in their research power reactor to construct and detonate a nuclear device.

The conversion of civilian spent fuel to make bombs with the attendant specter of weapons proliferation has been shown to be a very real threat. U.S. conversion of civilian fuel for weapons would undermine our antiproliferation efforts.

It has been argued that the commercial spent fuel may be needed for the weapons program due to the inability of defense facilities to produce sufficient quantities of plutonium.

The SPEAKER pro tempore. The time of the gentleman from New York (Mr. OTTINGER) has expired.

Mr. UDALL. Mr. Speaker, I yield 2 additional minutes to the gentleman from New York (Mr. OTTINGER).

Mr. OTTINGER. Mr. Speaker, I thank the gentleman from Arizona.

This argument has proceeded despite the lack of documentation of any existing or projected shortfalls in plutonium supplies for weapons purposes. The real reason behind this is that the Department of Energy under Secretary Edwards has a fascination with reprocessing and it wants to get the civilian industry into reprocessing even though it is uneconomic and even though it creates these proliferation dangers. I am sure the Members are well aware of this administration's strong encouragement for reprocessing of commercial spent fuel and the severe technical impediments encountered in our and other countries' attempts to operate a cost-effective reprocessing facility. Since this administration has so far been unsuccessful in its efforts to revive private industry's interest in reprocessing, it appears that it is willing to forge ahead itself into this murky and, to date, unproductive field by allowing reprocessing of our civilian wastes for military purposes despite the lack of need, the diseconomics or the grave proliferation dangers.

Rejection of this provision would send a clear and unmistakable signal to every other nation that the United States is retreating from the fundamental premise and purpose of our nonproliferation policy. To undermine our vital anti-proliferation policy solely to bolster the nuclear industry with taxpayer dollars where private industry itself fears to tread, strikes me as a bad bargain indeed.

Mr. Speaker, I strongly urge the support of the Members for the provision in the conference bill and their rejection of the motion offered by the gentleman from New York (Mr. STRATTON).

The SPEAKER pro tempore. The Chair now recognizes the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. Mr. Speaker, may I inquire, how much time do I have remaining?

The SPEAKER pro tempore. The gentleman from New York (Mr. STRATTON) has 11 minutes remaining, and the gentleman from Arizona (Mr. UDALL) has 10 minutes remaining.

Mr. STRATTON. Mr. Speaker, I yield myself such time as I may consume.

The gentleman from Massachusetts (Mr. MARKEY), with his usual flair, managed to exaggerate the situation rather considerably when he made the comment a moment ago that this particular proposal would make a bomb factory out of every nuclear powerplant. That, of course, is total absurdity.

The basic law under which we have been operating has been in effect since 1946, and it has been in the hands of the Atomic Energy Commission, and the Joint Committee on Atomic Energy, headed by the chairman of our own Armed Services Committee (Mr. PRICE) which have been monitoring this situation since those years.

The fact of the matter is—and it is no surprise to anyone who is at all knowledgeable in physics—that spent nuclear fuel in a nuclear reactor is capable of yielding, under certain processes, a certain amount of plutonium, which is the material that is used for atomic weapons. I know that it is fashionable these days to deplore atomic weapons, but the fact of the matter is that because of those weapons providing a deterrent, we have had no nuclear world war for some 37 years.

The purpose of allowing spent reactor fuel to be reprocessed in an effort to recover whatever plutonium can be derived from it is a simple emergency provision. The House a few moments ago rejected any limitations on importing uranium into the country, but if for various reasons in time of emergency we were not able to get the uranium that we wanted, this kind of processing would provide us with whatever materials might be required to defend ourselves in an emergency situation. For us to deny ourselves of that capability which has been in the basic law since 1946—not by the deliberation of this House, not by the holding of hearings in either this House or the other body, but simply because of

a nongermane amendment put in on the floor by some Member of the other body and, as the gentleman from Minnesota (Mr. FRENZEL) pointed out in connection with the section that he succeeded in knocking out, with probably no Members on the floor at the time it was discussed—is simply totally irrational and unconscionable.

This is the kind of decision that, if we are going to make it and if that is what we want to do, should be made with deliberation, with the advice of the people knowledgeable in this field, and certainly with the concurrence of the appropriate committees of the House of Representatives, and that is why this kind of thing should be rejected.

The gentleman from New York (Mr. OTTINGER) suggested that somehow there are two different kinds of nuclear fuel, the bad kind and the good kind, just as did the gentleman from Oregon (Mr. WEAVER). But the fact of the matter is that the atoms, whether we put them to work for peace, whether we put them to work in the hospitals with medical isotopes, or whether we use them to irradiate food and preserve it for the hungry masses around the world, are all generated in exactly the same place and by exactly the same process. It is just a matter of where we use them and how we use them. Certainly we have not proliferated the available plutonium capabilities from spent nuclear fuel since that original law went into effect, but it would be a serious mistake for us to deny ourselves, simply because some Senator wanted to get something into the bill, and with very little discussion, if any, and succeeded in getting it in, just as he got in the other section which the House previously eliminated.

Mr. DELLUMS. Mr. Speaker, will the gentleman yield briefly to me for a question?

Mr. STRATTON. I am glad to yield to the gentleman from California.

Mr. DELLUMS. Mr. Speaker, I would like to ask the gentleman the following question:

Given the fact that we have roughly 10,000 strategic weapons and over 20,000 tactical nuclear weapons and we are presently developing additional strategic and tactical nuclear weapons, can the gentleman construct a scenario that would render this country vulnerable in some kind of crisis that would require us within a relatively short period of time to go to civilian nuclear powerplants to develop weapons when we already have over some 30,000 right now? What is the scenario that would put us in the crisis situation?

□ 1540

Mr. STRATTON. As a matter of fact, there has been a substantial suggestion that we ought to be bringing some of the battlefield nuclear weapons that are currently in Europe back from Europe and rely instead on the Pershing II which is a much more effective counterweapon to the threat that the Soviets are posing to NATO with their SS-20's.

If those weapons were brought back on a ship and the ship happened to be sunk, then we would have lost a substantial number of the weapons the gentleman is referring to.

Not only that, but nuclear weapons, just like Members of Congress, get older, get less effective and with less power and vigor, so we are annually retiring hundreds of nuclear weapons from our inventory and replacing them with younger, more alert, more vigorous weapons.

The fact that we might have a particular inventory at one particular moment does not necessarily mean that we ought to deny ourselves a fallback position if, God forbid, we should require it.

Mr. DELLUMS. Would the gentleman yield further?

Mr. STRATTON. Be glad to yield.

Mr. DELLUMS. In responding to the two examples the gentleman gave: First, age and erosion is an evolutionary process which certainly does not communicate urgency and, second, I would think that the gentleman would agree with me that on a scale of 1 to 10 the probability of the sinking of a ship that we have brought back with nuclear weapons is somewhere between zero and 1.

So where is the crisis we are talking about? Where is the urgency and immediacy the gentleman alludes to as the major thrust of his argument against the proposition that was propounded in this conference report?

Mr. STRATTON. The point that we are making here is that these provisions which we are bringing to the attention of the House are nongermane, they are irrelevant to the bill, which is an appropriation bill for the Nuclear Regulatory Commission and they infringe on the authority of the Armed Services Committee. Nuclear Regulatory Commission certainly has no responsibility over the defense activities of the Department of Energy; and the committee chaired by the distinguished gentleman from Arizona (Mr. UDALL) also has no authority over these defense matters as well.

The gentleman from California is a distinguished member of the Committee on Armed Services and that is the committee that has this direct and awesome responsibility. We are trying here to defend the role of the House and not be stampeded by some nongermane amendment presented by one Member of the other body without any real discussion.

Mr. DELLUMS. Will the gentleman yield for a final question?

Mr. STRATTON. Mr. Speaker, I reserve the balance of my time.

Mr. UDALL. Mr. Speaker, I yield myself 6 minutes.

Mr. DELLUMS. Mr. Speaker, will the gentleman yield?

Mr. UDALL. I yield briefly to the gentleman from California.

Mr. DELLUMS. I thank my colleague for yielding.

I simply want to suggest to my distinguished colleague from New York and members of the Armed Services Committee that given his response to my two questions that the major thrust of his argument clearly is not that this country is in some way vulnerable to some crisis but what this argument is really all about is committee jurisdiction and not really the vulnerability of our Nation.

I think if we can put that major straw man aside then we can deal with what the real issue is here. It is certainly not the vulnerability of the United States to some nuclear attack or in some way being vulnerable because we cannot build enough bombs. We have enough bombs to destroy this entire planet.

I thank my colleague for yielding.

Mr. UDALL. Mr. Speaker, we have had a difficult time with our committee being assigned these important and controversial matters. I think everyone understands the difficulty of getting with the other body in a conference and there are procedures where all kinds of nongermane amendments can be attached and we have to deal with them in as realistic a fashion as we can.

I would like to ask my friend from New York (Mr. STRATTON) a question. I enjoy his quick mind and he, like myself, I am sure, tries to be consistent.

Is there an inconsistency between the gentleman's position earlier in the day when it was very important that nuclear wastes be separated, commercial wastes be separated from defense wastes? Now the gentleman appears to be saying in this controversy this afternoon that it is very important that special nuclear materials not be separated, that commercial wastes be used for weapons production, plutonium for weapons production, and it is important that we blend and mingle the two together.

Does the gentleman have some rationale for his difference of opinion on these two situations?

Mr. STRATTON. Will the gentleman yield?

Mr. UDALL. I am happy to yield to the gentleman for an answer.

Mr. STRATTON. The gentleman is aware of the fact, I would assume, and I tried to bring it out in my brief remarks in connection with the gentleman's waste bill, there is a great deal of defense waste which is being proc-

essed, which is being dealt with and handled very effectively by the Department of Energy in its defense activities.

With respect to nuclear spent fuel we have virtually very little of this available and we have in fact not reprocessed very much of it.

The point is not whether there is any inconsistency there. The question is whether we should automatically deny ourselves this capability.

I would point out to the gentleman, the gentleman from California seems to think, as well as the gentleman from Arizona and the gentleman from Oregon, that this is some terrible thing that we in the United States are engaging in under the Department of Energy headed by Secretary Edwards.

Secretary Edwards is back in South Carolina. He is not running the Department. We have another head of the Department.

The fact of the matter is that all of the nuclear weapons states have reprocessing plants used to obtain plutonium for the nuclear weapons program.

Mr. UDALL. I hope the gentleman will forgive me for taking back my time in just a moment but I have very little time left. I had hoped to get a short, comprehensive and concise answer.

Mr. STRATTON. I am pointing out the gentleman that this is not unique to the United States. The United Kingdom has a plant at Windlesham. France has a plant at LeHavre. Belgium has a plant at Mol. The Soviet Union has a plant. All of them signed the nonproliferation treaty.

Mr. UDALL. Mr. Speaker, before my time runs out let me emphasize there are three different matters in the motion made by the gentleman from New York (Mr. STRATTON).

Very quickly, the first one was passed by the other body by a vote of 89 to 9 and this prevents the use, and it is identical to the Weaver amendment, the use of plutonium from spent fuel for the construction of nuclear weapons.

It would seem to me we ought to have the sense to adopt this, that we have enough problems with nuclear. The mere idea that we are going to extract plutonium to make bombs and get that plutonium from commercial reactors serves only to muddy the waters.

I do not want the utilities in the position of having to explain to their customers that it was really all right, that plutonium for bombs was an inevitable byproduct of turning your lights on.

The second matter objected to by the Armed Services Committee in our conference report is, and this provision is identical to a provision in the Senate bill, the original Senate amendment was the Hart-Simpson proposal accepted by the other body without objection, the provision which makes three changes in the existing section 148 regarding the Department of Energy's authority to withhold certain unclassified information.

I would emphasize that we are dealing here only with unclassified information and it does not affect the Department of Energy's authority to withhold classified information.

I think that clearly is a desirable provision.

□ 1550

The third item is in section 18. The amendments to the Uranium Mill Tailings Act do not create any new regulatory requirements or change any Federal jurisdiction. They have been agreed upon in response to a request by uranium-producing States and by the uranium industry. They do these things:

First, they increase the States' flexibility in licensing of tailings disposal;

Second, they straighten out deadlines that cause disruption in implementation of these matters; and

Third, they clarify that EPA will set general standards and NRC will set specific requirements pertaining to control.

The amendments are strongly supported by the mining industry and by the Senators and Representatives of the uranium producing States.

I would hope, Mr. Speaker, that the House would vote against the motion offered by the gentleman from New York.

Mr. Speaker, I include in the RECORD the joint letter signed by myself, Chairman ZABLOCKI and other Members, relating to one of the matters that I just discussed:

HOUSE OF REPRESENTATIVES,
Washington, D.C., November 22, 1982.

DEAR COLLEAGUE: When the House considers the conference report on the Nuclear Regulatory Commission authorization bill for fiscal years 1982 and 1983 (H. Rept. 97-884), a technical point of order may be raised resulting in a separate vote on Section 14. This provision amends the Atomic Energy Act of 1954 to prohibit the use of spent fuel from commercial nuclear power plants as a source of materials with which to manufacture nuclear weapons.

If such a vote is necessary, we ask that you join us in voting to retain Section 14 as part of the conference report.

The effect of Section 14 of the conference agreement would be to deny the President discretion to act without congressional concurrence to begin extraction of plutonium from commercial spent fuel for use in our nuclear weapons program. Such discretion would run counter to the historic distinction our nation has made between the peaceful and military uses of fission energy. Section 14 reiterates this distinction.

In addition, at a time when the United States is trying to discourage reprocessing of power reactor fuel in other countries, it would be imprudent for us to invent new reasons for extracting plutonium from our own domestic commercial reactor fuel. To do so encourages similar thinking in other countries and needlessly undercuts our nonproliferation policy.

We also point out that this conference provision originated in the Senate where it was approved by vote of 88 to 9.

Please join us in support of keeping Section 14 as part of the NRC authorization conference report.

Sincerely,

MORRIS K. UDALL.
CLEMENT J. ZABLOCKI.
JAMES T. BROYHILL.
JOHN D. DINGELL.
RICHARD OTTINGER.
PATRICIA SCHROEDER.
NICHOLAS MAVROULES.

Mr. OTTINGER. Mr. Speaker, will the gentleman yield?

Mr. UDALL. I yield to the gentleman from New York.

Mr. OTTINGER. Mr. Speaker, I would just like to make the gentleman aware and I will insert in the RECORD a letter from Senators DOMENICI and SIMPSON, indicating that there is a provision in the House Energy and Water Appropriations Act to prohibit the Nuclear Regulatory Commission from implementing or enforcing any portion of the uranium mill licensing requirements promulgated by the Commission as final rules on October 3, 1980. They indicate that if we adopt the more sensible provision contained in this conference report, they would not support the much more drastic provision contained in the Energy and Water Appropriations Act.

COMMITTEE ON ENVIRONMENT
AND PUBLIC WORKS,
Washington, D.C., November 18, 1982.

Hon. MARK O. HATFIELD,
Chairman, Committee on Appropriations, U.S. Senate, Washington, D.C.

DEAR MARK: The Energy and Water Appropriations Act for fiscal year 1982 (P.L. 97-88) included a provision prohibiting the Nuclear Regulatory Commission from implementing or enforcing any portion of the Uranium Mill Licensing Requirements promulgated by the Commission as final rules on October 3, 1980. This provision was adopted, in large part, you recall, because of the Commission's unwillingness to consider and approve State regulatory plans for the regulation of uranium mills and mill tailings if those plans deffered in any way from the Commission's requirements.

On June 16, 1981, the Subcommittee on Nuclear Regulation held hearings on the Uranium Mill Tailings Radiation Control Act of 1978. Based upon these hearings, the Senate, on March 30, 1982, adopted a number of changes designed to correct not only the problem referred to above, but also to correct certain specific problems that had arisen in the implementation of this Act that were identified in this hearing. The changes adopted were included as part of the Nuclear Regulatory Commission Authorization bill for fiscal years 1982 and 1983 (S. 1207), and are set forth in section 206 of that bill. The companion vehicle in the House, H.R. 2330, included no such changes.

Over the course of the past seven months, House and Senate Conferees have been engaged in extensive negotiations in an effort to reconcile the two versions of this bill. Just recently, the Conferees were able to

reach agreement on a compromise. Essentially, this compromise would further clarify the right of States to adopt alternatives to the federal requirements, but only if the NRC determined that such alternatives would achieve a level of stabilization and containment of the sites concerned that is equivalent, to the extent practicable, or more stringent than the level that would be achieved by the Commission's regulations and standards. In addition, the compromise would allow States, in establishing alternative requirements, to consider local or regional conditions, such as geology, topography, hydrology, and meteorology.

On September 28, 1982, the Conference Report, H. Rept. 97-884, was filed. Shortly thereafter, the Senate adopted the Conference Report, and it is presently pending before the House of Representatives.

The compromise agreed upon by the Conferees is, in our judgment, an effective and equitable solution to the problems that were identified in the hearing that we held in 1981 and will, we hope, restore the uranium mill tailings regulatory program to its proper course. More importantly, we are fully satisfied that the compromise agreed upon addresses the concerns of those who supported the earlier amendment to the Energy and Water Appropriations Act for fiscal year 1982. Accordingly, we would like to inform you that, upon enactment of H.R. 2330, we do not believe it necessary or desirable to include, nor would we be in a position to support, a similar provision in the Energy and Water Appropriations Act for fiscal year 1983.

Thank you for your interest in this matter.

Sincerely,

ALAN K. SIMPSON.
PETE V. DOMENICI.

Mr. UDALL. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. Mr. Speaker, I think we have to make the point very clear. Every nuclear powerplant is a bomb factory. Every nuclear powerplant is a bomb factory. In the hands of Qadhafi, a nuclear powerplant is a bomb factory. In the hands of South Africa, in Korea, in Taiwan, many of these plants are being turned into bomb factories. Bomb factories. They make atomic weapons. They were supposed to make electricity. They were supposed to heat the homes or light the homes of the people living in the areas. But they are going to be used to build nuclear weapons. It is very important for us to understand that, because our ability to tell Galtieri or to tell other countries not to sell materials to Qadhafi is very much contingent upon our country not engaging in the very same kind of activity. We cannot tell Caspar Weinberger, "Oh, you have run short of some plutonium; well, just go right over to the Diablo nuclear powerplant, go right over to Three Mile Island, they have got a lot of extra plutonium, use that for nuclear weapons."

What you are going to wind up with is a world in which we are awash with nuclear bombs. That is what will happen to us. And we will be in more situations where people like Menachem Begin have to send airplanes swooping into Baghdad to knock out nuclear powerplants that have been sold to generate electricity but which have been diverted into the construction of nuclear weapons. This is because we do not have a nonproliferation policy and the world does not have a nonproliferation policy, and the only nonproliferation policy will be the selective kind of policy that Begin engaged in, which is, "I am going to have to do it myself." And that is the kind of world we will be living in.

So maybe in many ways we will be better off accepting the amendment of the gentleman from New York, because once and for all we would put the lie to the myth that there is some separation between the peaceful and military atom. There is not. Ronald Reagan should have a strong, comprehensive nonproliferation policy. He does not.

The motion of the gentleman from New York should be defeated.

Mr. STRATTON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me just point out that these sections we are seeking to strike, are three sections that are nongermane and which go to the heart of the responsibilities of the House of Representatives and its own committees.

In the case of the reprocessing arrangement, the testimony of Dr. Herman Roser, the head of the Department of Energy's defense programs, was that the plutonium contained in these spent fuel cells is valued at from $15 to $18 billion. For us to allow just one nongermane amendment from the Senate to deny us that capability, whatever the scenario might be, and do it without any deliberation on the part of the House, without any hearings, would be foolish in the extreme.

With respect to section 17, we are living at a time when the Armed Services Committee has been concerned about the implications of the fact that some demonstrators were able to get into our nuclear Trident submarine facilities in Groton, Conn., with that kind of threat how can we possibly vote to make public the plans of how to break into classified sites where nuclear materials are being processed or developed? That would be utter insanity.

And finally, with respect to section 18, we are telling the Nuclear Regulatory Commission to spend billions of dollars to prevent a hazardous situation from occurring, which we have been told by the scientific experts poses no damage to health or to limb whatsoever.

We must reject these sections, Mr. Speaker. The legislation is going back to the Senate anyway, because of the other amendment, and I think it is time for the House to reclaim its prerogatives and insist the Senate not interfere with the responsibilities of House committees.

Mr. Speaker, I yield back the balance of my time.

Mr. UDALL. Mr. Speaker, I yield the remainder of my time to the gentleman from New York (Mr. OTTINGER).

The SPEAKER pro tempore. The gentleman from New York (Mr. OTTINGER) is recognized for 2 minutes.

Mr. OTTINGER. I thank the gentleman for yielding.

Mr. Speaker, in conclusion, I would like to point out that it would be a perfectly terrible precedent for this House now to vote for the motion of the gentleman from New York and to say that we condone the use of civilian reactor-produced materials for military purposes. It would undermine all the international antiproliferation efforts that we have always supported and promoted around the world. Regardless of the fact that this prohibition may have arrived on our doorstep in the form of a Senate amendment, it is vital that the principle be sustained.

The prohibition of civilian fuel for military use certainly was not without consideration in the House. It was carefully considered in the Interior Committee and subject to extensive hearing. There, as will be detailed by my friend from Oregon (Mr. WEAVER) to whom I now yield.

Mr. WEAVER. Mr. Speaker, will the gentleman yield?

Mr. OTTINGER. I yield to the gentleman from Oregon who can tell us the details of the hearings and consideration that in fact did take place in his committee.

Mr. WEAVER. I thank the gentleman from New York.

Mr. Speaker, there were extensive questions asked in hearings in the Interior Committee on this issue. I personally asked many. Other Members asked many questions of the various governmental and industry witnesses, and the Interior Committee, the legislative committee with jurisdiction over the NRC, deliberated this issue in committee and passed favorably this amendment in another bill.

Mr. LUJAN. Mr. Speaker, will the gentleman yield?

Mr. OTTINGER. I yield to the gentleman from New Mexico.

Mr. LUJAN. Mr. Speaker, I ask unanimous consent for permission to revise and extend my remarks.

Mr. Speaker, I strongly support adoption of the conference report on H.R. 2330, the Nuclear Regulatory Commission authorization for fiscal years 1982 and 1983. This report is the culmination of almost 5 months of joint effort with the Senate to develop a compromise. An enormous amount of Members' and staffs' time has gone

into preparation of the conference report, and the compromises reached on the issues are sound and fair.

In addition to setting authorization levels for the Nuclear Regulatory Commission for fiscal years 1982 and 1983, this bill also provides for several other important items of vital need to the nuclear industry and their regulatory agencies. I would like to briefly highlight a few of the most important of these.

First, this legislation grants new temporary authority to the Commission to issue interim operating licenses which will allow new nuclear power reactors to begin operation prior to completion of hearings if certain conditions, including public safety, are satisfied. This temporary authority, which is necessary to help relieve a regulatory logjam resulting in part from the accident at Three Mile Island, will expire on December 31, 1983.

Second, this legislation contains the so-called Sholly provision which grants the Commission new authority to approve and make immediately effective certain amendments to licenses for nuclear power reactors, provided that no significant hazards exist.

Third, and of particular interest to the uranium mining industry in my State of New Mexico, this legislation includes amendments to the Uranium Mill Tailings Radiation Control Act to straighten out problems which have developed over the past few years in implementing this act. All the conferees agreed that the public health and safety is paramount in the regulation of mill tailings. We also agreed, however, that costly regulatory burdens should not be imposed on the uranium industry to address insubstantial risks.

We accordingly incorporated statutory and report language making clear that although full-scale, cost-benefit optimization is not required, the Environmental Protection Agency and the Nuclear Regulatory Commission must issue regulations whose burdens stand in a reasonable relationship to the expected gains. In short, if the risk is small, so should be costs; if the risk is great then the costs may be great. In addition, the conferees' action is intended to lay to rest suggestions, such as those made by EPA officials to mill operators in my State, that the preamble to the Mill Tailings Act represents a congressional predetermination that a significant risk exists from radon from mill tailings or that particular forms of remedial action must be taken.

Instead, we intend that the agencies must independently exercise their best technical judgment, and employ proper measurement data and scientific procedures, to determine the risks involved from tailings and to craft an appropriate set of requirements designed to deal with those risks which are significant. We recognized that some of these issues are under litigation, and our action is not intended either to approve or to disapprove of results thus far reached in that litigation. Our action is instead intended to clarify our views concerning the proper regulatory approach and to get the regulatory process moving again.

I am also pleased to say that the conferees have recognized that the agreement States such as my State, New Mexico, may adopt alternative requirements, as long as they are at least as stringent, which diverge from Federal requirements which the State finds are impracticable within its borders.

A fourth item which this conference report contains, the mechanism for a uranium import restriction, deals with an issue affecting the national security interests of this country; namely, the viability of the domestic uranium mining industry. The conferees have reiterated the importance to the Nation of our domestic uranium industry by adopting a series of provisions to begin developing a program to assure the industry's continued viability. Unfortunately, our national security in the area of uranium supplies is threatened by increasing dependence on foreign sources. Almost all new contractual commitments are with foreign producers. This could pose a serious long-term threat.

Among other things, the conference report requires the Secretary of the Department of Energy to promulgate within 9 months final criteria to determine the viability of the domestic industry. The provision specifies that the Secretary must monitor the industry's viability and report annually to Congress and to the President a determination of the industry's viability. The compromise proposal articulates a number of criteria which the Secretary must assess in determining viability.

Although one of the criteria is whether executed contracts or options will result in importation of greater than 37½ percent of actual or projected domestic uranium requirements for any 2-year period, we do not intend to preclude the Secretary, under appropriate circumstances, from determining that the industry is not viable or that its viability cannot be assured if the foreign market share is some lower amount. If the Secretary finds that imports exceed the 37½-percent criteria, however, then the Secretary must revise the criteria for offering enrichment services in order to enhance the use of domestic uranium in utilization facilities within or under the jurisdiction of the United States.

The conference amendment also provides that if the Secretary determines that uranium imports will exceed 37½ percent for any 2-year period or otherwise threaten to impair the national security, then he shall request the Secretary of Commerce to initiate an investigation under section 232 of the Trade Expansion Act of 1962. We intend that the investigation be completed and appropriate action be taken by the President to adjust importation of uranium within a 2-year period.

In order to protect essential security interests, the conference amendment provides that it shall be unlawful to execute a contract or option resulting in importation of foreign uranium for domestic consumption for up to 2 years or until the President has taken action to adjust importation within that period.

Mr. Speaker, I wish to compliment my good friend, Congressman UDALL, on his able work as chairman of the conference committee. I am happy to commend the conference report for adoption by the House.

Mr. OTTINGER. Mr. Speaker, we have signed a nonproliferation treaty which calls for the continued separation of civilian from military uses of atomic weapons. I think it is critical for our safety and the safety of the world that we maintain this separation and reject a motion of the gentleman from New York.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York (Mr. STRATTON).

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. STRATTON. Mr. Chairman, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 107, nays 281, not voting 45, as follows:

□ 1620

Mrs. BOGGS, Mr. SNYDER, Mr. BROWN of Colorado, and Mrs. SMITH of Nebraska changed their votes from "yea" to "nay."

Messrs. ERLENBORN, SILJANDER, PICKLE, and WHITTEN and Mrs. BOUQUARD changed their votes from "nay" to "yea."

So the motion to strike sections 14, 17, and 18 of the conference report was rejected.

The result of the vote was announced as above recorded.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. NATCHER). Pursuant to clause 4, rule XXVIII, a motion to reject section 23 of the conference report having been adopted, the conference report is considered as rejected and the gentleman from Arizona (Mr. UDALL) is recognized to offer an amendment consisting of the remainder of the conference report.

MOTION OFFERED BY MR. UDALL

Mr. UDALL. Mr. Speaker, pursuant to clause 4, rule XXVIII, and the action of the House, I move that the House recede from its disagreement and concur in the Senate amendment with an amendment which I send to the desk.

The SPEAKER pro tempore. The Clerk will report the motion.

The Clerk read as follows:

Mr. UDALL moves that the House recede and concur in the Senate amendment with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate, insert the following:

AUTHORIZATION OF APPROPRIATIONS

SECTION 1. (a) There are hereby authorized to be appropriated to the Nuclear Regulatory Commission in accordance with the provisions of section 261 of the Atomic Energy Act of 1954 (42 U.S.C. 2017) and section 305 of the Energy Reorganization Act of 1974 (42 U.S.C. 5875), for the fiscal years 1982 and 1983 to remain available until expended, $485,200,000 for fiscal year 1982 and $513,100,000 for fiscal year 1983 to be allocated as follows:

(1) Not more than $80,700,000 for fiscal year 1982 and $77,000,000 for fiscal year 1983 may be used for "Nuclear Reactor Regulation", of which an amount not to exceed $1,000,000 is authorized each such fiscal year to be used to accelerate the effort in gas-cooled thermal reactor preapplication review, and an amount not to exceed $6,000,000 is authorized each such fiscal year to be used for licensing review work for a fast breeder reactor plant project. In the event of a termination of such breeder reactor project, any unused amount appropriated pursuant to this paragraph for licensing review work for such project may be used only for safety technology activities.

(2) Not more than $62,900,000 for fiscal year 1982 and $69,850,000 for fiscal year 1983 may be used for "Inspection and Enforcement".

(3) Not more than $42,000,000 for fiscal year 1982 and $47,059,600 for fiscal year 1983 may be used for "Nuclear Material Safety and Safeguards".

(4) Not more than $240,300,000 for fiscal year 1982 and $257,195,600 for fiscal year 1983 may be used for "Nuclear Regulatory Research", of which—

(A) an amount not to exceed $3,500,000 for fiscal year 1982 and $4,500,000 for fiscal year 1983 is authorized to be used to accelerate the effort in gas-cooled thermal reactor safety research;

(B) an amount not to exceed $18,000,000 is authorized each such fiscal year to be used for fast breeder reactor safety research; and

(C) an amount not to exceed $57,000,000 is authorized for such two fiscal year period to be used for the Loss-of-Fluid Test Facility research program.

In the event of a termination of the fast breeder reactor plant project, any unused amount appropriated pursuant to this paragraph for fast breeder reactor safety research may be used generally for "Nuclear Regulatory Research".

(5) Not more than $21,900,000 for fiscal year 1982 and $20,197,800 for fiscal year 1983 may be used for "Program Technical Support".

(6) Not more than $37,400,000 for fiscal year 1982 and $41,797,000 for fiscal year 1983 may be used for "Program Direction and Administration".

(b) The Nuclear Regulatory Commission may use not more than 1 percent of the amounts authorized to be appropriated under subsection (a)(4) to exercise its authority under section 31 a. of the Atomic Energy Act of 1954 (42 U.S.C. 2051(a)) to enter into grants and cooperative agreements with universities pursuant to such section. Grants made by the Commission shall be made in accordance with the Federal Grant and Cooperative Agreement Act of 1977 (41 U.S.C. 501 et seq.) and other applicable law. In making such grants and entering into such cooperative agreements, the Commission shall endeavor to provide appropriate opportunities for universities in which the student body has historically been predominately comprised of minority groups.

(c) Any amount appropriated for a fiscal year to the Nuclear Regulatory Commission pursuant to any paragraph of subsection (a) for purposes of the program office referred to in such paragraph, or any activity that is within such program office and is specified in such paragraph, may be reallocated by the Commission for use in a program office referred to in any other paragraph of such subsection, or for use in any other activity

within a program office, except that the amount available from appropriations for such fiscal year for use in any program office or specified activity may not, as a result of reallocations made under this subsection, be increased or reduced by more than $500,000 unless—

(1) a period of 30 calendar days (excluding any day in which either House of Congress is not in session because of an adjournment of more than 3 calendar days to a day certain or an adjournment sine die) passes after the receipt, by the Committee on Energy and Commerce and the Committee on Interior and Insular Affairs of the House of Representatives and the Committee on Environment and Public Works of the Senate, of notice submitted by the Commission containing a full and complete statement of the reallocation proposed to be made and the facts and circumstances relied upon in support of such proposed reallocation; or

(2) each such committee, before the expiration of such period, transmits to the Commission a written notification that such committee does not object to such proposed reallocation.

AUTHORITY TO RETAIN CERTAIN AMOUNTS RECEIVED

SEC. 2. Moneys received by the Nuclear Regulatory Commission for the cooperative nuclear research program and the material access authorization program may be retained and used for salaries and expenses associated with such programs, notwithstanding the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484), and shall remain available until expended.

AUTHORITY TO TRANSFER CERTAIN AMOUNTS TO OTHER AGENCIES

SEC. 3. From amounts appropriated to the Nuclear Regulatory Commission pursuant to section 1(a), the Commission may transfer to other agencies of the Federal Government sums for salaries and expenses for the performance by such agencies of activities for which such appropriations of the Commission are made. Any sums so transferred may be merged with the appropriation of the agency to which such sums are transferred.

LIMITATION ON SPENDING AUTHORITY

SEC. 4. Notwithstanding any other provision of this Act, no authority to make payments under this Act shall be effective except to such extent or in such amounts as are provided in advance in appropriation Acts.

AUTHORITY TO ISSUE LICENSES IN ABSENCE OF EMERGENCY PREPAREDNESS PLANS

SEC. 5. Of the amounts authorized to be appropriated under section 1, the Nuclear Regulatory Commission may use such sums as may be necessary, in the absence of a State or local emergency preparedness plan which has been approved by the Federal Emergency Management Agency, to issue an operating license (including a temporary operating license under section 192 of the Atomic Energy Act of 1954, as amended by section 11 of this Act) for a nuclear power reactor, if it determines that there exists a State, local, or utility plan which provides reasonable assurance that public health and safety is not endangered by operation of the facility concerned.

NUCLEAR SAFETY GOALS

SEC. 6. Funds authorized to be appropriated under this Act shall be used by the Nuclear Regulatory Commission to expedite the establishment of safety goals for nuclear reactor regulation. The development of such safety goals, and any accompanying methodologies for the application of such safety goals, should be expedited to the maximum extent practicable to permit establishment of a safety goal by the Commission not later than December 31, 1982.

LOSS-OF-FLUID TEST FACILITY

SEC. 7. Of the amounts authorized to be used for the Loss-of-Fluid Test Facility in accordance with section 1(a)(4) for fiscal years 1982 and 1983, the Commission shall provide funding through contract with the organization responsible for the Loss-of-Fluid Test operations for a detailed technical review and analysis of research results obtained from the Loss-of-Fluid Test Facility research program. The contract shall provide funding for not more than twenty man-years in each of fiscal year 1982 and 1983 to conduct the technical review and analysis.

NUCLEAR DATA LINK

SEC. 8. (a) Of the amounts authorized to be appropriated under this Act for the fiscal years 1982 and 1983, not more than $200,000 is authorized to be used by the Nuclear Regulatory Commission for—

(1) the acquisition (by purchase, lease, or otherwise) and installation of equipment to be used for the "small test prototype nuclear data link" program or for any other program for the collection and transmission to the Commission of data from licensed nuclear reactors during abnormal conditions at such reactors; and

(2) the conduct of a full and complete study and analysis of—

(A) the appropriate role of the Commission during abnormal conditions at a nuclear reactor licensed by the Commission;

(B) the information which should be available to the Commission to enable the Commission to fulfill such role and to carry out other related functions;

(C) various alternative means of assuring that such information is available to the Commission in a timely manner; and

(D) any changes in existing Commission authority necessary to enhance the Commission response to abnormal conditions at a nuclear reactor licensed by the Commission.

The small test prototype referred to in paragraph (1) may be used by the Commission in carrying out the study and analysis under paragraph (2). Such analysis shall include a cost-benefit analysis of each alternative examined under subparagraph (C).

(b)(1) Upon completion of the study and anlaysis required under subsection (a)(2), the Commission shall submit to Congress a detailed report setting forth the results of such study and analysis.

(2) The Commission may not take any action with respect to any alternative described in subsection (a)(2)(C), unless a period of 60 calendar days (excluding any day in which either House of Congress is not in session because of an adjournment of more than 3 calendar days to a day certain or an adjournment sine die) passes after the receipt, by the Committee on Energy and Commerce and the Committee on Interior and Insular Affairs of the House of Representatives and the Committee on Environment and Public Works of the Senate, of notice submitted by the Commission containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of such proposed action.

INTERIM CONSOLIDATION OF OFFICES

SEC. 9. Of the amounts authorized to be appropriated pursuant to paragraph 6 of section 1(a), such sums as may be necessary shall be available for interim consolidation of Nuclear Regulatory Commission headquarters staff offices.

(b) No amount authorized to be appropriated under this Act may be used, in connection with the interim consolidation of Nuclear Regulatory Commission offices, to relocate the offices of members of the Commission outside the District of Columbia.

THREE MILE ISLAND

SEC. 10. (a) No part of the funds authorized to be appropriated under this Act may be used to provide assistance to the General Public Utilities Corporation for purposes of the decontamination, cleanup, repair, or rehabilitation of facilities at Three Mile Island Unit 2.

(b) The prohibition contained in subsection (a) shall not relate to the responsibilities of the Nuclear Regulatory Commission for monitoring or inspection of the decontamination, cleanup, repair, or rehabilitation activities at Three Mile Island and such prohibition shall not apply to the use of funds by the Nuclear Regulatory Commission to carry out regulatory functions of the Commission under the Atomic Energy Act of 1954 with respect to the facilities at Three Mile Island.

(c) The Nuclear Regulatory Commission shall include in its annual report to the Congress under section 307(c) of the Energy Reorganization Act of 1974 (42 U.S.C. 5877(c)) as a separate chapter a description of the collaborative efforts undertaken, or proposed to be undertaken, by the Commission and the Department of Energy with respect to the decontamination, cleanup, repair, or rehabilitation of facilities at Three Mile Island Unit 2.

(d) No funds authorized to be appropriated under this Act may be used by the Commission to approve any willful release of "accident-generated water", as defined by the Commission in NUREG–0683 ("Final Programmatic Environmental Impact Statement" p. 1–23), from Three Mile Island Unit 2 into the Susquehanna River or its watershed.

TEMPORARY OPERATING LICENSES

SEC. 11. Section 192 of the Atomic Energy Act of 1954 (42 U.S.C. 2242) is amended to read as follows:

"SEC. 192. TEMPORARY OPERATING LICENSE.—

"a. In any proceeding upon an application for an operating license for a utilization facility required to be licensed under section 103 or 104 b. of this Act, in which a hearing is otherwise required pursuant to section 189 a., the applicant may petition the Commission for a temporary operating license for such facility authorizing fuel loading, testing, and operation at a specific power level to be determined by the Commission, pending final action by the Commission on the application. The initial petition for a temporary operating license for each such facility, and any temporary operating license issued for such facility based upon the initial petition, shall be limited to power levels not to exceed 5 percent of rated full thermal power. Following issuance by the Commission of the temporary operating license for each such facility, the licensee may file petitions with the Commission to amend the license to allow facility operation in staged increases at specific power levels, to be determined by the Commission, exceeding 5 percent of rated full thermal power. The initial petition for a temporary operating license for each such facility may be filed at any time after the filing of: (1) the report of

the Advisory Committee on Reactor Safeguards required by section 182 b.; (2) the filing of the initial Safety Evaluation Report by the Nuclear Regulatory Commission staff and the Nuclear Regulatory Commission staff's first supplement to the report prepared in response to the report of the Advisory Committee on Reactor Safeguards for the facility; (3) the Nuclear Regulatory Commission staff's final detailed statement on the environmental impact of the facility prepared pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)); and (4) a State, local, or utility emergency preparedness plan for the facility. Petitions for the issuance of a temporary operating license, or for an amendment to such a license allowing operation at a specific power level greater than that authorized in the initial temporary operating license, shall be accompanied by an affidavit or affidavits setting forth the specific facts upon which the petitioner relies to justify issuance of the temporary operating license or the amendment thereto. The Commission shall publish notice of each such petition in the Federal Register and in such trade or news publications as the Commission deems appropriate to give reasonable notice to persons who might have a potential interest in the grant of such temporary operating license or amendment thereto. Any person may file affidavits or statements in support of, or in opposition to, the petition within thirty days after the publication of such notice in the Federal Register.

"b. With respect to any petition filed pursuant to subsection a. of this section, the Commission may issue a temporary operating license, or amend the license to authorize temporary operation at each specific power level greater than that authorized in the initial temporary operating license, as determined by the Commission, upon finding that—

"(1) in all respects other than the conduct or completion of any required hearing, the requirements of law are met;

"(2) in accordance with such requirements, there is reasonable assurance that operation of the facility during the period of the temporary operating license in accordance with its terms and conditions will provide adequate protection to the public health and safety and the environment during the period of temporary operation; and

"(3) denial of such temporary operating license will result in delay between the date on which construction of the facility is sufficiently completed, in the judgment of the Commission, to permit issuance of the temporary operating license, and the date when such facility would otherwise receive a final operating license pursuant to this Act.

The temporary operating license shall become effective upon issuance and shall contain such terms and conditions as the Commission may deem necessary, including the duration of the license and any provision for the extension thereof. Any final order authorizing the issuance or amendment of any temporary operating license pursuant to this section shall recite with specificity the facts and reasons justifying the findings under this subsection, and shall be transmitted upon such issuance to the Committees on Interior and Insular Affairs and Energy and Commerce of the House of Representatives and the Committee on Environment and Public Works of the Senate. The final order of the Commission with respect to the issuance or amendment of a temporary operating license shall be subject to judicial review pursuant to chapter 158 of title 28, United States Code. The requirements of section 189 a. of this Act with respect to the issuance or amendment of facility licenses shall not apply to the issuance or amendment of a temporary operating license under this section.

"c. Any hearing on the application for the final operating license for a facility required pursuant to section 189 a. shall be concluded as promptly as practicable. The Commission shall suspend the temporary operating license if it finds that the applicant is not prosecuting the application for the final operating license with due diligence. Issuance of a temporary operating license under subsection b. of this section shall be without prejudice to the right of any party to raise any issue in a hearing required pursuant to section 189 a.; and failure to assert any ground for denial or limitation of a temporary operating license shall not bar the assertion of such ground in connection with the issuance of a subsequent final operating license. Any party to a hearing required pursuant to section 189 a. on the final operating license for a facility for which a temporary operating license has been issued under subsection b., and any member of the Atomic Safety and Licensing Board conducting such hearing, shall promptly notify the Commission of any information indicating that the terms and conditions of the temporary operating license are not being met, or that such terms and conditions are not sufficient to comply with the provisions of paragraph (2) of subsection b.

"d. The Commission is authorized and directed to adopt such administrative remedies as the Commission deems appropriate to minimize the need for issuance of temporary operating licenses pursuant to this section.

"e. The authority to issue new temporary operating licenses under this section shall expire on December 31, 1983.".

OPERATING LICENSE AMENDMENT HEARINGS

SEC. 12. (a) Section 189 a. of the Atomic Energy Act of 1954 (42 U.S.C. 2239(a)) is amended—

(1) by inserting "(1)" after the subsection designation; and

(2) by adding at the end thereof the following new paragraph:

"(2)(A) The Commission may issue and make immediately effective any amendment to an operating license, upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person. Such amendment may be issued and made immediately effective in advance of the holding and completion of any required hearing. In determining under this section whether such amendment involves no significant hazards consideration, the Commission shall consult with the State in which the facility involved is located. In all other respects such amendment shall meet the requirements of this Act.

"(B) The Commission shall periodically (but not less frequently than once every thirty days) publish notice of any amendments issued, or proposed to be issued, as provided in subparagraph (A). Each such notice shall include all amendments issued, or proposed to be issued, since the date of publication of the last such periodic notice. Such notice shall, with respect to each amendment or proposed amendment (i) identify the facility involved; and (ii) provide a brief description of such amendment. Nothing in this subsection shall be construed to delay the effective date of any amendment.

"(C) The Commission shall, during the ninety-day period following the effective date of this paragraph, promulgate regulations establishing (i) standards for determining whether any amendment to an operating license involves no significant hazards consideration; (ii) criteria for providing or, in emergency situations, dispensing with prior notice and reasonable opportunity for public comment on any such determination, which criteria shall take into account the exigency of the need for the amendment involved; and (iii) procedures for consultation on any such determination with the State in which the facility involved is located.".

(b) The authority of the Nuclear Regulatory Commission, under the provisions of the amendment made by subsection (a), to issue and to make immediately effective any amendment to an operating license shall take effect upon the promulgation by the Commission of the regulations required in such provisions.

QUALITY ASSURANCE

SEC. 13. (a) The Nuclear Regulatory Commission is authorized and directed to implement and accelerate the resident inspector program so as to assure the assignment of at least one resident inspector by the end of fiscal year 1982 at each site at which a commercial nuclear powerplant is under construction and construction is more than 15 percent complete. At each such site at which construction is not more than 15 percent complete, the Commision shall provide that such inspection personnel as the Commissions deems appropriate shall be physically present at the site at such times following issuance of the construction permit as may be necessary in the judgment of the Commission.

(b) The Commission shall conduct a study of existing and alternative programs for improving quality assurance and quality control in the construction of commercial nuclear powerplants. In conducting the study, the Commission shall obtain the comments of the public, licensees of nuclear powerplants, the Advisory Committee on Reactor Safeguards, and organizations comprised of professionals having expertise in appropriate fields. The study shall include an analysis of the following:

(1) providing a basis for quality assurance and quality control, inspection, and enforcement actions through the adoption of an approach which is more prescriptive than that currently in practice for defining principal architectural and engineering criteria for the construction of commercial nuclear powerplants;

(2) conditioning the issuance of construction permits for commercial nuclear powerplants on a demonstration by the licensee that the licensee is capable of independently managing the effective performance of all quality assurance and quality control responsibilities for the powerplant;

(3) evaluations, inspections, or audits of commercial nuclear powerplant construction by organizations comprised of professionals having expertise in appropriate fields which evaluations, inspections, or audits are more effective than those under current practice;

(4) improvement of the Commission's organization, methods, and programs for quality assurance development, review, and inspection; and

(5) conditioning the issuance of construction permits for commercial nuclear powerplants on the permittee entering into contracts or other arrangements with an independent inspector to audit the quality assurance program to verify quality assurance performance.

For purposes of paragraph (5), the term "independent inspector" means a person or other entity having no responsibility for the design or construction of the plant involved. The study shall also include an analysis of quality assurance and quality control programs at representative sites at which such programs are operating satisfactorily and an assessment of the reasons therefor.

(c) For purposes of—

(1) determining the best means of assuring that commercial nuclear powerplants are constructed in accordance with the applicable safety requirements in effect pursuant to the Atomic Energy Act of 1954; and

(2) assessing the feasibility and benefits of the various means listed in subsection (b);

the Commission shall undertake a pilot program to review and evaluate programs that include one or more of the alternative concepts identified in subsection (b) for the purposes of assessing the feasibility and benefits of their implementation. The pilot program shall include programs that use independent inspectors for auditing quality assurance responsibilities of the licensee for the construction of commercial nuclear powerplants, as described in paragraph (5) of subsection (b). The pilot program shall include at least three sites at which commercial nuclear powerplants are under construction. The Commission shall select at least one site at which quality assurance and quality control programs have operated satisfactorily, and at least two sites with remedial programs underway at which major construction, quality assurance, or quality control deficiencies (or any combination thereof) have been identified in the past. The Commission may require any changes in existing quality assurance and quality control organizations and relationships that may be necessary at the selected sites to implement the pilot program.

(d) Not later than fifteen months after the date of the enactment of this Act, the Commission shall complete the study required under subsection (b) and submit to the United States Senate and House of Representatives a report setting forth the results of the study. The report shall include a brief summary of the information received from the public and from other persons referred to in subsection (b) and a statement of the Commission's response to the significant comments received. The report shall also set forth an analysis of the results of the pilot program required under subsection (c). The report shall be accompanied by the recommendations of the Commission, including any legislative recommendations, and a description of any administrative actions that the Commission has undertaken or intends to undertake, for improving quality assurance and quality control programs that are applicable during the construction of nuclear powerplants.

LIMITATION ON USE OF SPECIAL NUCLEAR MATERIAL

SEC. 14. Section 57 of the Atomic Energy Act of 1954 (42 U.S.C. 2077) is amended by adding at the end thereof the following new subsection:

"e. Special nuclear material, as defined in section 11, produced in facilities licensed under section 103 or 104 may not be transferred, reprocessed, used, or otherwise made available by any instrumentality of the United States or any other person for nuclear explosive purposes.".

RESIDENT INSPECTORS

SEC. 15. Of the amounts authorized to be appropriated under section 1, the Nuclear Regulatory Commission shall use such sums as may be necessary to conduct a study of the financial hardships incurred by resident inspectors as a result of (1) regulations of the Commission requiring resident inspectors to relocate periodically from one duty station to another; and (2) the requirements of the Commission respecting the domicile of resident inspectors and respecting travel between their domicile and duty station in such manner as to avoid the appearance of a conflict of interest. Not later than 90 days after the date of the enactment of this Act, the Commission shall submit to the Congress a report setting forth the findings of the Commission as a result of such study, together with a legislative proposal (including any supporting data or information) relating to any assistance for resident inspectors determined by the Commission to be appropriate.

SABOTAGE OF NUCLEAR FACILITIES OR FUEL

SEC. 16. Section 236 of the Atomic Energy Act of 1954 (42 U.S.C. 2284) is amended to read as follows:

"SEC. 236. SABOTAGE OF NUCLEAR FACILITIES OR FUEL.—

"a. Any person who intentionally and willfully destroys or causes physical damage to, or who intentionally and willfully attempts to destroy or cause physical damage to—

"(1) any production facility or utilization facility licensed under this Act;

"(2) any nuclear waste storage facility licensed under this Act; or

"(3) any nuclear fuel for such a utilization facility, or any spent nuclear fuel from such a facility;

shall be fined not more than $10,000 or imprisoned for not more than ten years, or both.

"b. Any person who intentionally and willfully causes or attempts to cause an interruption of normal operation of any such facility through the unauthorized use of or tampering with the machinery, components, or controls of any such facility, shall be fined not more than $10,000 or imprisoned for not more than ten years, or both.".

DEPARTMENT OF ENERGY INFORMATION

SEC. 17. (a) Section 148 a. (1) of the Atomic Energy Act of 1954 (42 U.S.C. 2168(a)(1)) is amended by inserting after "('Secretary')" the following: ", with respect to atomic energy defense programs,".

(b) Section 148 of the Atomic Energy Act of 1954 (42 U.S.C. 2168) is amended by adding at the end thereof the following new subsections:

"d. Any determination by the Secretary concerning the applicability of this section shall be subject to judicial review pursuant to section 552(a)(4)(B) of title 5, United States Code.

"e. The Secretary shall prepare on a quarterly basis a report to be made available upon the request of any interested person, detailing the Secretary's application during that period of each regulation or order prescribed or issued under this section. In particular, such report shall—

"(1) identify any information protected from disclosure pursuant to such regulation or order;

"(2) specifically state the Secretary's justification for determining that unauthorized dissemination of the information protected from disclosure under such regulation or order could reasonably be expected to have a significant adverse effect on the health and safety of the public or the common defense and security by significantly increasing the likelihood of illegal production of nuclear weapons, or theft, diversion, or sabotage of nuclear materials, equipment, or facilities, as specified under subsection a.; and

"(3) provide justification that the Secretary has applied such regulation or order so as to protect from disclosure only the minimum amount of information necessary to protect the health and safety of the public or the common defense and security.".

STANDARDS AND REQUIREMENTS UNDER SECTION 275

SEC. 18. (a) Section 275 of the Atomic Energy Act of 1954 is amended—

(1) by striking in subsection a. "one year after the date of enactment of this section" and substituting "October 1, 1982" and by adding the following at the end thereof: "After October 1, 1982, if the Administrator has not promulgated standards in final form under this subsection, any action of the Secretary of Energy under title I of the Uranium Mill Tailings Radiation Control Act of 1978 which is required to comply with, or be taken in accordance with, standards of the Administrator shall comply with, or be taken in accordance with, the standards proposed by the Administrator under this subsection until such time as the Administrator promulgates such standards in final form.";

(2) by striking in subsection b. (1) "eighteen months after the enactment of this section, the Administrator shall, by rule, promulgate" and inserting in lieu thereof the following: "October 31, 1982, the Administrator shall, by rule, propose, and within 11 months thereafter promulgate in final form,";

(3) by adding the following at the end of subsection b. (1): "If the Administrator fails to promulgate standards in final form under this subsection by October 1, 1983, the authority of the Administrator to promulgate such standards shall terminate, and the Commission may take actions under this Act without regard to any provision of this Act requiring such actions to comply with, or be taken in accordance with, standards promulgated by the Administrator. In any such case, the Commission shall promulgate, and from time to time revise, any such standards of general application which the Commission deems necessary to carry out its responsibilities in the conduct of its licensing activities under this Act. Requirements established by the Commission under this Act with respect to byproduct material as defined in section 11 e. (2) shall conform to such standards. Any requirements adopted by the Commission respecting such byproduct material before promulgation by the Commission of such standards shall be amended as the Commission deems necessary to conform to such standards in the same manner as provided in subsection f. (3). Nothing in this subsection shall be construed to prohibit or suspend the implementation or enforcement by the Commission of any requirement of the Commission respecting byproduct material as defined in section 11 e. (2) pending promulgation by the Commission of any such standard of general application.";

(4) by adding the following new subsection at the end thereof:

"f. (1) Prior to January 1, 1983, the Commission shall not implement or enforce the

provisions of the Uranium Mill Licensing Requirements published as final rules at 45 Federal Register 65521 to 65538 on October 3, 1980 (hereinafter in this subsection referred to as the 'October 3 regulations'). After December 31, 1982, the Commission is authorized to implement and enforce the provisions of such October 3 regulations (and any subsequent modifications or additions to such regulations which may be adopted by the Commission), except as otherwise provided in paragraphs (2) and (3) of this subsection.

"(2) Following the proposal by the Administrator of standards under subsection b., the Commission shall review the October 3 regulations, and, not later than 90 days after the date of such proposal, suspend implementation and enforcement of any provision of such regulations which the Commission determines after notice and opportunity for public comment to require a major action or major commitment by licensees which would be unnecessary if—

(A) the standards proposed by the Administrator are promulgated in final form without modification, and

(B) the Commission's requirements are modified to conform to such standards.

Such suspension shall terminate on the earlier of April 1, 1984 or the date on which the Commission amends the October 3 regulations to conform to final standards promulgated by the Administrator under subsection b. During the period of such suspension, the Commission shall continue to regulate by product material (as defined in section 11 e. (2)) under this Act on a licensee-by-licensee basis as the Commission deems necessary to protect public health, safety, and the environment.

"(3) Not later than 6 months after the date on which the Administrator promulgates final standards pursuant to subsection b. of this section, the Commission shall, after notice and opportunity for public comment, amend the October 3 regulations, and adopt such modifications, as the Commission deems necessary to conform to such final standards of the Administrator.

"(4) Nothing in this subsection may be construed as affecting the authority or responsibility of the Commission under section 84 to promulgate regulations to protect the public health and safety and the environment.".

(b)(1) Section 108(a) of the Uranium Mill Tailings Radiation Control Act of 1978 is amended by adding the following new paragraph at the end thereof:

"(3) Notwithstanding paragraphs (1) and (2) of this subsection, after October 31, 1982, if the Administrator has not promulgated standards under section 275 a. of the Atomic Energy Act of 1954 in final form by such date, remedial action taken by the Secretary under this title shall comply with the standards proposed by the Administrator under such section 275 a. until such time as the Administrator promulgates the standards in final form.".

(2) The second sentence of section 108(a)(2) of the Uranium Mill Tailings Radiation Control Act of 1978 is repealed.

AGREEMENT STATES

SEC. 19. (a) Section 274 o. of the Atomic Energy Act of 1954 is amended by adding the following at the end thereof: "In adopting requirements pursuant to paragraph (2) of this subsection with respect to sites at which ores are processed primarily for their source material content or which are used for the disposal of byproduct material as defined in section 11 e. (2), the State may adopt alternatives (including, where appropriate, site-specific alternatives) to the requirements adopted and enforced by the Commission for the same purpose if, after notice and opportunity for public hearing, the Commission determines that such alternatives will achieve a level of stabilization and containment of the sites concerned, and a level of protection for public health, safety, and the environment from radiological and nonradiological hazards associated with such sites, which is equivalent to, to the extent practicable, or more stringent than the level which would be achieved by standards and requirements adopted and enforced by the Commission for the same purpose and any final standards promulgated by the Administrator of the Environmental Protection Agency in accordance with section 275. Such alternative State requirements may take into account local or regional conditions, including geology, topography, hydrology and meteorology.".

(b) Section 204(h)(3) of the Uranium Mill Tailings Radiation Control Act of 1978 is amended by inserting the following before the period at the end thereof ": Provided, however, That, in the case of a State which has exercised any authority under State law pursuant to an agreement entered into under section 274 of the Atomic Energy Act of 1954, the State authority over such byproduct material may be terminated, and the Commission authority over such material may be exercised, only after compliance by the Commission with the same procedures as are applicable in the case of termination of agreements under section 274 j. of the Atomic Energy Act of 1954.".

AMENDMENT TO SECTION 84

SEC. 20. Section 84 of the Atomic Energy Act of 1954 is amended by adding the following at the end thereof:

"c. In the case of sites at which ores are processed primarily for their source material content or which are used for the disposal of byproduct material as defined in section 11 e. (2), a licensee may propose alternatives to specific requirements adopted and enforced by the Commission under this Act. Such alternative proposals may take into account local or regional conditions, including geology, topography, hydrology and meteorology. The Commission may treat such alternatives as satisfying Commission requirements if the Commission determines that such alternatives will achieve a level of stabilization and containment of the sites concerned, and a level of protection for public health, safety, and the environment from radiological and nonradiological hazards associated with such sites, which is equivalent to, to the extent practicable, or more stringent than the level which would be achieved by standards and requirements adopted and enforced by the Commission for the same purpose and any final standards promulgated by the Administrator of the Environmental Protection Agency in accordance with section 275.".

EDGEMONT

SEC. 21. Section 102(e) of the Uranium Mill Tailings Radiation Control Act of 1978 is amended by adding the following at the end thereof:

"(3) The Secretary shall designate as a processing site within the meaning of section 101(6) any real property, or improvements thereon, in Edgemont, South Dakota that—

"(A) is in the vicinity of the Tennessee Valley Authority uranium mill site at Edgemont (but not including such site), and

"(B) is determined by the Secretary to be contaminated with residual radioactive materials.

In making the designation under this paragraph, the Secretary shall consult with the Administrator, the Commission and the State of South Dakota. The provisions of this title shall apply to the site so designated in the same manner and to the same extent as to the sites designated under subsection (a) except that, in applying such provisions to such site, any reference in this title to the date of the enactment of this Act shall be treated as a reference to the date of the enactment of this paragraph and in determining the State share under section 107 of the costs of remedial action, there shall be credited to the State, expenditures made by the State prior to the date of the enactment of this paragraph which the Secretary determines would have been made by the State or the United States in carrying out the requirements of this title.".

ADDITIONAL AMENDMENTS TO SECTIONS 84 AND 275

SEC. 22. (a) Section 84 a. (1) of the Atomic Energy Act of 1954 is amended by inserting before the comma at the end thereof the following: ", taking into account the risk to the public health, safety, and the environment, with due consideration of the economic costs and such other factors as the Commission determines to be appropriate,".

(b) Section 275 of the Atomic Energy Act of 1954 is amended—

(1) in subsection a., by inserting after the second sentence thereof the following new sentence: "In establishing such standards, the Administrator shall consider the risk to the public health, safety, and the environment, the environmental and economic costs of applying such standards, and such other factors as the Administrator determines to be appropriate."; and

(2) by adding at the end of subsection b. (1) the following new sentence: "In establishing such standards, the Administrator shall consider the risk to the public health, safety, and the environment, the environmental and economic costs of applying such standards, and such other factors as the Administrator determines to be appropriate.".

Mr. UDALL (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The SPEAKER pro tempore. The gentleman from Arizona (Mr. UDALL) is recognized for 30 minutes.

Mr. UDALL. Mr. Speaker, the conference agreement before us today represents a compromise between the House and Senate passed versions of the NRC authorization for 1982 and 1983. I had hoped that the NRC authorization bill we began to consider in early 1981 would have emerged as a clean authorization bill; I had hoped the tough nuclear policy questions would be dealt with in separate legislation. This did not happen, however, and as in previous years the NRC authorization has become the vehicle for legislative change in our nuclear policies.

The conference agreement now before us is the product of many months of hard work by House and Senate conferees. As conference chairman, I can say with some confidence that the agreement reflects a balance of many diverse views. By taking up this conference report, the House is not only fulfilling its responsibility to authorize appropriations for the NRC; we are also acting on a bill which has significant policy implications.

I would like to summarize some of the conference report's major provisions.

FUNDING LEVELS

For the first time, the Conference agreement is a 2-year authorization for the NRC. I believe the 2-year cycle can reduce significantly our congressional legislative workload without impairing our ability to oversee the NRC. The conferees agreed that the total amount authorized to be appropriated for fiscal year 1982 would be $485.2 million. The total is $15.5 million below the Commission's January 1981 request, comparable to the Senate bill and $673,000 less than the House bill. The conference report would authorize $513.1 million in fiscal year 1983. The 1983 total is $26.9 million below the NRC request of January 1981 and the Senate bill. The 1983 total is comparable to that provided for in the House bill.

I want to note that the conference agreement retains the specification that $4.5 million is available in fiscal year 1982 and $5.5 million in fiscal year 1983 for gas cooled reactors. These funds have been earmarked because the conferees agreed that, in comparison to light water reactors, gas reactors are potentially advantageous with respect to safety, uranium requirements, and cooling water needs.

With reluctance, I agreed that some $24 million should be authorized each year for licensing of Clinch River and other fast breeder reactor activities. I believe at this time that breeder related work at the NRC should be put on the back burner. Along with many of our colleagues, I have stated repeatedly that to proceed with Clinch River at this time is unwise. Nevertheless, a majority of Congress until now has gone along with the administration; and in this context, the NRC should be authorized funds for regulatory activities related to breeders. The conferees did agree, however, that if the Clinch River project is terminated, that the breeder related funds shall be used for other purposes in the NRC offices for which they are authorized.

TEMPORARY OPERATING LICENSES (TOL)

I have mixed feelings about the temporary operating license (TOL) provision.

This provision was originally rationalized on the ground that the NRC staff had fallen behind in its licensing schedule as a result of an additional workload resulting from the accident at Three Mile Island. As a result, it was claimed, significant numbers of reactors would be sitting idle because the NRC and its licensing boards had not been able to address them on a timely basis. Since the temporary operating license (TOL) provision was proposed, experience has shown that plants have not been ready to operate on the schedules published by the NRC last year.

I have supported this measure only with the understanding that the Commission itself will devote special scrutiny to any reactor that might be allowed to operate prior to completion of hearings. I intend to closely monitor the Commission's activities in this area.

I hope that both the Commission and utilities anxious to bring their facilities on line will take due note of the concerns of those who believe these provisions have abrogated their right to a full airing of the issues. It will be unfortunate if the price paid for a few months of reactor operation is growth of the belief that the nuclear regulatory process is more concerned with protection of utilities' investments than it is with protection of the public health and safety.

SHOLLY DECISION

The conferees agreed to grant the Commission new authority to approve and make immediately effective certain amendments to licenses for nuclear power reactors. This could be done upon a determination by the Commission that the amendment involved no significant safety hazards consideration.

I have supported this provision with the understanding that it will not be used to circumvent hearing rights or other of the Commission's procedures intended to assure that reactors are operated in a manner to provide the highest practical level of protection to the public health and safety. I expect that the Commission, in exercising its authority under this provision, will take great care to prevent undermining of its intent.

QUALITY ASSURANCE

The bill's provisions on quality assurance stem directly from what is now perceived as an exceedingly severe problem. Over the last year it has come to light that, in spite of extensive resources devoted to inspection of reactors under construction, major breakdowns have occurred in the quality assurance programs required by the Commission's regulations. As a result of these breakdowns, the Commission must now determine whether virtually completed nuclear reactors have been built in accordance with its regulations. There are enormous costs associated with making such a determination long after concrete has been poured and welds are in place. Moreover, I believe the NRC would have great difficulty in confronting a situation where it was economically infeasible to determine that a plant was in compliance with regulations.

I fear that rather that denying a license to a plant constructed with disregard for quality assurance requirements, the Commission will accept rationalizations as to why compliance is unnecessary. I will remind my colleagues of the self-defeating nature of pressures upon the Commission to expedite licensing of plants where there is considerable doubt as to the quality of construction. A serious accident at such a plant would for the foreseeable future end public support for any expansion of the nuclear technology; in such circumstances it would be immaterial whether the proposed expansion were to be in the form of additional powerplants or reprocessing facilities or breeder reactors.

USE OF SPENT FUEL IN NUCLEAR WEAPONS

The conference report contains an exceedingly important provision to prohibit the use in nuclear weapons of plutonium produced in licensed nuclear reactors. It constitutes an expression of congressional intent that we adhere to the historic assumption that a clear distinction can be made between the user of fission for electric production and the use of fission to produce plutonium for bombs.

URANIUM SUPPLY

As is now well known, I have qualms about the conference report provisions that might restrict uranium imports and allow modification of uranium enrichment criteria for purposes of increasing use of domestic uranium. I am fully aware of having to make the painful choice between maintaining a healthy uranium industry and adopting policies that could lead to restrictions upon our exports in other areas. With a view toward the deteriorating employment situation at our uranium mines, I reluctantly came down on the side of providing modest help to the uranium industry.

At the same time I want to call attention to the conferees' statement regarding uranium enrichment policy. This is that changes in enrichment criteria should be made only after due account has been taken of the need to operate our enrichment facilities in an efficient manner. In addition, changes in enrichment criteria should be made only after careful consideration is given to the effects of such changes upon the price paid by utilities for uranium and enrichment services.

I would like to reiterate that in voting on this conference report our primary concern should be the safety and reliability of operating reactors and those under construction. Should this goal be achieved and should the waste problem be resolved and should public confidence be established, the technology will as likely as not play a

more prominent role than what we might now predict. To achieve this end it would be more productive to use our energies to assure light water reactor safety and efficiency rather than in engaging in sterile debate over reprocessing, Clinch River, and nuclear licensing reform.

Mr. Speaker, a number of my colleagues have asked me the status of the debate on this matter this afternoon, and before I yield to some of my colleagues, let me outline the situation.

We have had before us today, Mr. Speaker, the conference report on this important bill. During the course of the proceedings today, an amendment by the gentleman from Minnesota (Mr. FRENZEL) was adopted which struck from the conference report certain matters relating to import restrictions on uranium. For this reason, we now have to go back to the Senate to confer further on this matter.

So this will probably conclude, once we vote on the motion now pending, to go back to the Senate, it will conclude our action on this bill today.

Mr. Speaker, I do have several colloquies between Members who wish to make further points in connection with this legislation.

I do not anticipate a vote on the motion I have just made, but there could be one.

We hope to be able to get out of here in the next 25 or 30 minutes after we have concluded with these colloquies which I have referred to.

Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. DOWNEY).

Mr. DOWNEY. Mr. Speaker, I thank the chairman for yielding this time to me.

I would like to have a colloquy with my colleague, the gentleman from New York (Mr. OTTINGER).

Mr. Speaker, the temporary operating license provision passed last year by the House and contained in the conference report was intended to authorize the Commission in its discretion, to issue a limited operating license to a utility prior to the conduct or completion of any required hearing in order to prevent completed nuclear powerplants from standing idle pending the completion of such hearings. A temporary operating license could not be issued unless, in all other respects, the requirements of law are met, and the Commission determines that there is reasonable assurance that the operation of the reactor will not adversely affect the public health and safety and the environment. Am I correct to conclude, therefore, that there is nothing in this provision which would allow the Commission to short-circuit its required safety review, or, in any way, to require a less stringent safety standard for a reactor which receives a temporary operating license?

Mr. OTTINGER. Mr. Speaker, if the gentleman will yield, that is correct. This bill does not affect the standards and requirements to be applied before a plant goes into operation. The standards the NRC must apply for a plant undergoing temporary operating license review and review for a "regulator" operating license are exactly the same.

Mr. DOWNEY. The Commission currently makes a distinction in its emergency plan requirements based on authorized reactor power levels. Is there any provision in this act which would allow the Commission to make a distinction, for purposes of emergency plan requirements, based on power levels authorized by a temporary operating license and levels authorized by a "regular" operating license?

Mr. OTTINGER. The answer is "No." There is no provision in this act which allows the Commission to make any distinction in requirement for reactor operations authorized by temporary or regular operating licenses.

Mr. DOWNEY. The conference report allows the NRC to issue an operating license if it determines that a State, local or utility plan exists which would provide reasonable assurance that the public health and safety would not be endangered. Is this a change from current regulations?

Mr. OTTINGER. Yes. Currently, the NRC requires an approved State or local government plan. This provision allows the NRC to consider a utility plan only in the absence of a State or local government plan. The reference to a State or local plan is clearly intended to apply only to a plan which has been officially submitted by a State or local government. A utility, therefore, cannot submit a local government plan. NRC consideration of a utility plan is a last resort and is not intended to preempt a State or local plan. This legislation does not in any way affect the authority of the Federal Emergency Management Administration with respect to its authority and requirements regarding emergency management plans.

Mr. DOWNEY. I thank the gentleman.

The SPEAKER pro tempore. The Chair now recognizes the gentleman from New Mexico (Mr. LUJAN) for 30 minutes.

Mr. LUJAN. Mr. Speaker, I reserve my time.

Mr. UDALL. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. Mr. Speaker, I thank the chairman for yielding this time to me.

I would like to engage the chairman of my subcommittee of the Committee on Energy and Commerce in a brief colloquy, if I may.

I note that with respect to section 12 of the bill, the so-called Sholly provision, the statement of managers emphasized that, in determining whether a proposed amendment to a facility operating license involves no significant hazards consideration, the Commission should be sensitive to those license amendments that involve irreversible consequences. As chairman of the subcommittee that originated the Sholly provision in this House, do you understand that statement to mean that the Commission should be especially careful in evaluating, for possible hazards considerations, amendments that involve irreversible consequences?

Mr. OTTINGER. Yes, that is exactly what I understand our intent to have been. Once a license amendment with irreversible consequences has received the Commission's approval and has gone into effect, as a practical matter it will be impossible to correct any errors that may have entered into the Commission's decision. Therefore, we believed that the Commission has an obligation, when assessing the health and safety considerations of amendments having irreversible consequences, to insure that only those amendments that very clearly raise no significant hazards issues will be allowed to take effect before the required hearings can be held.

□ 1630

Mr. LUJAN. Mr. Speaker, will the gentleman yield?

Mr. MARKEY. I yield.

Mr. LUJAN. Mr. Speaker, we have not had an opportunity to review the colloquy. We do not know if we necessarily agree with how the question was phrased or how the answer was phrased. I understand it requires additional hearings depending on the answer that the gentleman gave to the gentleman from Massachusetts, and I am not sure that we want to complicate the matter further.

Mr. SPEAKER pro tempore. The time of the gentleman from Massachusetts has expired.

Mr. UDALL. Mr. Speaker, I yield 5 minutes to the gentleman from New York (Mr. OTTINGER).

Mr. OTTINGER. Mr. Speaker, I would like to say to the gentleman from New Mexico that I do not think there is anything in here with which he would disagree. We are just underlining that with respect to our treatment of the Sholly provision, that license amendments having irreversible consequences should be handled with particular care by the Commission. They ought not to be granted unless it is quite clear that there are no significant hazards.

Mr. LUJAN. Mr. Speaker, will the gentleman yield?

Mr. OTTINGER. Yes.

Mr. LUJAN. In answering that, was it clear that no additional hearings are

necessary by the Nuclear Regulatory Commission in determining what a significant hazard might be?

Mr. OTTINGER. This does not change the statute in any way. It just gives guidance to the Commission that they should take particular care when it comes to a matter before them having irreversible consequences.

Mr. LUJAN. Just to make due diligence, but not necessarily to say that we will have more hearings to be absolutely correct in what the gentleman described a particular hazard as being significant or insignificant.

Mr. OTTINGER. The colloquy does not affect the statutory authority in any way as regards hearings.

Mr. LUJAN. I thank the gentleman.

Mr. OTTINGER. Mr. Speaker, I would like the opportunity to clarify the somewhat confusing provisions of the conference report relating to uranium mill tailings. The provisions attempt to restore some order to the uranium mill tailings regulatory program which had been disrupted by the EPA's failure to issue its standards within the time required by the mill tailings statute. The conference determined that a temporary suspension of the NRC's mill tailings regulations is required to achieve this goal. I understand that there were no other considerations which the conferees intended to address by this suspension.

Mr. UDALL. The gentlemen's understanding is correct. The Uranium Mill Tailings Radiation Control Act required the EPA to set standards for active uranium mill sites by 1980, and required the NRC to issue regulations to protect the public health and safety and the environment which conform with the general standards promulgated by the EPA. Although the EPA has not yet issued its standards, the NRC issued its regulations to meet its obligations under that act. The conference suspended these regulations for the sole purpose of eliminating the confusion and possible conflicting requirements which might occur if the EPA now issues regulations for active mills. It is anticipated that the EPA will issue proposed standards by October 31, 1982. NRC regulations are suspended only through January 1, 1983, in order to allow the Commission time to review its regulations for conformance with the EPA proposed standards. However, the NRC may extend the suspension of any regulation which conflicts with the EPA standards and would require a major commitment which would be unnecessary under the EPA standards. This additional suspension shall terminate no later than April 1, 1984.

Although this new schedule appears somewhat complicated, the intent to prevent a waste of Federal and private resources resulting from conflicting regulatory requirements is clear.

Mr. OTTINGER. Thank you for the clarification. I note that the conference report also requires that the NRC and the EPA give due consideration to the environmental and economic costs of the mill tailings regulations. Is it your understanding that this is not intended to impose a new or different basis for the issuance of regulations or for the review of regulations previously issued?

Mr. UDALL. That is my understanding. The agencies have assured the conference that such factors have been duly considered in the development of their mill tailings regulations. If such regulations are feasible, nothing in this provision would require either agency to reformulate or reconsider regulations which have been issued.

Mr. OTTINGER. The statement of managers contains the following language:

The conferees are of the view that the economic and environmental costs associated with standards and requirements established by the agencies should bear a reasonable relationship to the benefits expected to be derived. At all times, the conferees fully intend that EPA and NRC recognize as their paramount responsibility protection of the public health and safety and the environment.

The statement continues by saying that the conferees do not require that the agencies engage in cost-benefit analysis or optimization. Would it be fair to say that this statement does not require a strict accounting of the costs and benefits or a 1-to-1 relationship of the costs and benefits of implementing the mill tailings regulations.

Mr. UDALL. That is certainly my understanding of this provision.

Mr. OTTINGER. In considering this amendment the conferees were careful to make clear that we do not intend and in fact oppose any interpretation of the conference agreement which would undermine the recent judicial determination of sufficiency of prior agency consideration of cost in promulgation of mill tailings regulations.

Mr. UDALL. Yes, I believe the conference agreement is clear on that point. There is one more issue I would like to clarify regarding the exercise of regulatory authority under these amendments. Section 18(a)(3) of the conference report states that if the EPA fails to promulgate final standards for tailings regulation by October 1, 1983, the Administrator's authority to promulgate such standards terminates. At that point, NRC would continue to regulate tailings under the Tailings Act without regard to any requirement involving the EPA standards.

Mr. OTTINGER. Is it correct that the Commission's existing uranium mill tailings licensing requirements would then automatically go into effect, without constraints related to possible inconsistencies with proposed EPA standards?

Mr. UDALL. Yes, that is correct. The applicability of NRC's existing standards in total would not be left in doubt by any provisions of the amendment.

Mr. OTTINGER. Do the amendments require the Commission to provide any new regulatory review, or notice and comment period, prior to implementation of its tailings regulations?

Mr. UDALL. No, the amendments do not require any new notice and comment or rulemaking period in those circumstances. The Commission has already conducted the proper review and public comment activities with regard to its tailings licensing regulations. There would be no cause for new rulemaking activities simply as a result of the termination of EPA authority to promulgate generally applicable standards. The Commission may determine that it should itself promulgate generally applicable standards for tailings control in the absence of EPA standards. The Commission may also determine in its discretion that its existing tailings regulatory requirements require amendment at any time, or prior to promulgation of standards of general applicability by the Commission. If so, any such amendments to its requirements shall be adopted after notice and opportunity for public comment.

Mr. OTTINGER. Thank you. That is consistent with my reading of the language.

Is it your understanding that any NRC hearing, whether a licensing hearing or a special hearing, such as the Indian Point safety hearing, should cover all substantial safety concerns sought to be raised by the public and their representatives and given as full and fair a hearing as possible?

Mr. UDALL. Yes, I agree with the gentleman. We do not intend in any way to limit or restrict access to the Commission by the public nor to limit the kinds of issues the Commission can consider in carrying out its responsibility to protect the public health and safety.

PARLIAMENTARY INQUIRY

Mr. STRATTON. Mr. Speaker, a point of order.

Are the gentleman from New York and the gentleman from Arizona establishing statutory legislation with these colloquies? They are giving to the EPA something that it does not have under the statutory law, or to the Nuclear Regulatory Commission.

The SPEAKER pro tempore. The gentleman from New York fails to state a point of order.

Mr. STRATTON. Well, it is a point of inquiry, Mr. Speaker. I am trying to determine whether this colloquy is

going to go down in the law books as being the law of the land, because it certainly differs to what the legislation at the present time. The Nuclear Regulatory Commission has no authority over mill tailings or has any authority to direct the EPA.

The SPEAKER pro tempore. The Chair is unable to respond to the gentleman's inquiry. The response will have to come from the gentleman from Arizona (Mr. UDALL).

Mr. UDALL. Mr. Speaker, let me say to the gentleman from New York that obviously we cannot with a colloquy change the law. We cannot change the conference report. We can indicate what it means and how it is interpreted by Members who served on it. If there is any understanding by the gentleman from New Mexico or by the gentleman from New York, we can work it out.

Mr. STRATTON. I would like to reserve my objection on this effort to clarify the law of the land.

Mr. LUJAN. Mr. Speaker, will the gentleman yield?

Mr. OTTINGER. I will be glad to yield.

Mr. LUJAN. Mr. Speaker, let me ask the gentleman in terms of which will be paramount, whether it is safety or the environment or cost. I do not believe that anyone would say that health and safety needs should suffer any, but would it be fair to summarize the entire question of economics as one that would say, if the risk is small, the cost of rehabilitating those fields would be small, and if the risk is great, then of course there would be some reason for the cost being great. Is that a fair summary of the intent of the legislation?

□ 1640

Mr. OTTINGER. I think it is. The conferees spent a great deal of time discussing this when we came out with that resolution. Of course the health and safety considerations ought to be paramount but economic considerations ought to be considered.

Mr. LUJAN. And seriously considered.

Mr. OTTINGER. Where you have very small risks and very large economic consequences we intended that that be taken into account.

Mr. LUJAN. I thank the gentleman.

Mr. UDALL. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. MOORHEAD)

Mr. MOORHEAD. Mr. Speaker, this important bill embodies a broad, bipartisan compromise reached through arduous and long negotiations by the leadership of both authorizing committees. The compromise includes much of the substance of the bipartisan amendments sponsored by Mr. DINGELL, Mr. OTTINGER, Mr. BROYHILL and myself in the Commerce Committee, and adopted by nearly a two-thirds majority in that committee last June.

Additionally, after our committee completed action on the bill, Mr. UDALL and Mr. LUJAN, recommended, on behalf of the Interior Committee, further compromise language very similar to amendments which had been defeated in our committee. For example, we include in this bill language on State consultation similar to that offered by Mr. MOFFETT. We also include language on two-step interim licensing similar to that supported by Mr. MARKEY and Mr. SYNAR.

In short, this bill represents compromise on top of compromise that is really a tribute to the leadership of the two relevant committees. I also would like to commend Mr. BEVILL and Mr. MYERS of the Energy and Water Development Appropriations Subcommittee for focusing attention on the urgent need for licensing reforms at the NRC.

Not only will the licensing reforms adopted in this bill speed the licensing of nuclear powerplants while maintaining public safety and sound environmental protection, but this bill also is decidedly proconsumer and anti-inflation. The licensing reforms contained in this bill will help avoid over $2 billion in higher electric rates and consumer costs due to NRC delays in licensing nuclear plants. Additionally, DOE estimates that these reforms will help reduce U.S. dependence on foreign oil by reducing our comsumption of oil by over 200,000 barrels per day.

If the American economy is going to turn around and expand at the rate we wish to see, we are going to have to utilize every domestic energy source at our disposal. Nuclear power will of necessity be an important component of that energy mix. It is essential that balance be incorporated into the regulatory process, and while we would have liked to have seen stronger and more comprehensive reforms of the NRC licensing logjam, the reforms we do achieve with this legislation go a long way toward restoring some balance in our regulatory process, and thus assuring that nuclear power can remain an option for the American people.

By passing this legislation today, we will be simultaneously helping the beleagered American electricity consumer and dealing a blow to OPEC oil suppliers. I urge my colleagues to support this urgent legislation.

I have just three questions I would like to ask the chairman of the conference, my friend Mr. UDALL, if I may:

First, I would like the distinguished chairman to tell me: Is it not true that where the statement of managers speaks or "irreversibility" in connection with the provisions in the bill relating to the so-called Sholly case, that the conferees intend "irreversibility" to be just one of many factors the Commission may consider in determining whether a license amendment represents a "significant hazard" or "no significant" hazards?"

Mr. UDALL. Mr. Speaker, will the gentleman yield?

Mr. MOORHEAD. I yield to the gentleman from Arizona.

Mr. UDALL. Yes, the gentleman is correct; his statement is true.

Mr. MOORHEAD. My second question is: Is it not true also that the conferees intend that the "significance of the hazard" is far more important in NRC's consideration of a license amendment than "irreversibility"?

Mr. UDALL. Yes, the gentleman is again correct; his statement is true.

Mr. MOORHEAD. Finally, I ask the chairman: Is it not true that the conferees do not intend the Commission to need to show special sensitivity to "irreversibility" in those cases where the Commission determines that "no significant hazards" are involved?

Mr. UDALL. Yes, the gentleman is correct; his statement is true.

Mr. MOORHEAD. I thank the chairman, and I commend his leadership on this bill as well as other bills in which I have been fortunate enough to participate with him.

Mr. UDALL. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. I thank the gentleman from Arizona for yielding me these 3 minutes.

What I wanted to do was to determine what the colloquy between himself and the gentleman from New York (Mr. OTTINGER) was intended to determine.

The basic legislation at the present time provides that none of the money authorized for the EPA shall be spent in dealing with the cleanup of uranium mill tailings. The EPA has established no standards but even if they established the standards there is no money that is going to be available for enforcing them.

I understand the colloquy between the gentleman from Arizona and the gentleman from New York to suggest that the Nuclear Regulatory Commission, pursuant to the section, nongermane section which I took exception to, was now going to be directed to set those standards and to require EPA to enforce them. But there will be no money available even if the NRC directs the EPA to come up with those standards.

Mr. UDALL. Mr. Speaker, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman.

Mr. UDALL. Let me say to the gentleman there is certainly no intention on my part or any willful intent on my part to change the law or the conference report.

I would say to the distinguished gentleman from New York that the NRC is authorized, required to regulate uranium mill tailings by the Atomic Energy Act and the Mill Tailings Act that we passed here a couple of years ago.

The EPA authority is to set general standards to be consistent with these NRC responsibilities.

I think we keep that relationship. I do not think we change it in the conference report. If we do, if the gentleman will point it out, I will try to get it corrected.

We have to go back to the other body, obviously, for other reasons anyhow.

Mr. STRATTON. I want to point out we have a provision in the law at the present time which would deny any money for this undertaking because of the fact that we have not received any competent evidence before our committee that uranium mill tailings have any adverse effect on the national safety or individual health.

Mr. UDALL. I understand the gentleman's position.

Mr. STRATTON. Therefore, in a crucial budget situation such as we are facing, it would be foolish to spend millions of dollars to correct a health hazard that does not exist.

Mr. UDALL. I understand the gentleman's position.

Mr. STRATTON. I hope the gentleman was not amending the law to that extent.

Mr. UDALL. No.

Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. OTTINGER).

Mr. OTTINGER. I was not aware that the Armed Services Committee had special expertise or indeed jurisdiction over health considerations involved. But the fact of the matter is the EPA has failed to issue standards and that is the reason we had to deal with it.

We provided the NRC could go ahead and issue standards on its own if the EPA continued to fail with those standards. That is entirely within our jurisdiction and I think we made the correct resolution.

GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on H.R. 2330.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. UDALL. Mr. Speaker, I have no further requests for time and I move the previous question on the motion.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arizona (Mr. UDALL).

The motion was agreed to.

□ 1650

IN PURSUANCE OF RESOLUTIONS OF IMPEACHMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 30 minutes.

Mr. GONZALEZ. Mr. Speaker, during this particular point in the session, in the 2d session and waning hours of the 97th Congress, I rise to continue in pursuance of the processes that I initiated earlier in this Congress with respect to two resolutions, one seeking the impeachment of Paul Volcker, the Chairman of the Federal Reserve Board, and the other one having to do with a reform which, as I have said before, is fundamental to any real change in the course of our financial, economic, monetary, and fiscal directions and well being.

At this point I rise to continue with respect to the first resolution. The record will show that I have presented to the House, in the absence of assurance from the Committee on the Judiciary during this Congress that it would give my resolution any consideration, and placed into the RECORD the correspondence between myself and the distinguished chairman of the Committee on the Judiciary, in which he clearly stated that other than referring my resolution to the staff of the proper subcommittee for evaluation—which evaluation has, as far as I know, yet to be made—that there was no possibility that the committee or subcommittee could entertain serious consideration of the matter because of the pendency and the pressure of other matters that the committee had to give priority to.

So I then announced, and it is so recorded, that I would proceed, because I consider this resolution in that class of highly privileged resolutions in the precedent and rules of the House, to make the case to the Assembly, the Congress, the House of Representatives, as if the House would constitute itself then into the committee. And I laid out three general indictable or, in other words, general clauses of impeachment satisfactory to the precedents that have been established thus far by the Congress in the consideration of these matters.

And then I went further, because I felt and feel that it is necessary to be other than general, to be specific, because otherwise there would be no point in laying the case before the House.

As a matter of fact, the resolution itself is couched in general terms because this is exactly why the matters are referred to the specific committees that have jurisdiction: They are staffed, they are funded, in order to pursue these matters in serious purpose, which is all I am seeking.

My intention has not been one of levity. It has not been one of seeking a means of publicity in pursuance of this matter. As I have said repeatedly, if that were my purpose, I think that I have been experienced enough in this matter of political activity to know better, easier and quicker ways to do that.

As a matter of fact, I think the record will show that I have not even made releases when I have presented the specifications of the charges and have become specific.

Now, in the three general categories I have also outlined three specific instances of wrongdoing such as would be envisioned by anybody holding a Federal official accountable under these impeachment provisions of the Constitution.

Unfortunately, there is so much that is not understood or known either by the Members or nonmembers of the Congress—the general public—concerning this proceeding. It is always associated with what has heretofore been the publicity-getting or the attention-getting factors in impeachment resolutions. There have been impeachment resolutions directed against Presidents. Now, very seldom, if at all, outside of those directed against Presidents or members of the judiciary—our third organ of Government—have there been precedents with respect to individuals outside of those two categories, with the exception of during periods of passion subsequent to the Civil War and during the Civil War with respect to a combination of civilian and military. But in a straight category of civilian—Cabinet level, sub-Cabinet level—there is very little precedent. So we have to dig into the history of this, go back to the reasons why the writers of the Constitution included this provision, as reflected in the debate in the Convention, which I have done; and, of course, going back into the history in England, and I guess one of the more dramatic episodes under this type of procedure, and that was the impeachment of Hastings in England which, incidentally, was coincidental with the emergence of our Constitution and our form of government as we have it today.

Now, today I rise in further advancement of some of the doings of not only the Chairman but the colleagues sitting with him, acting as both colleagues and members of the Board, as well as those who sit together with the Board and constitute what is known as the Open Market Committee which, as I have said, was one of the developments that has helped to completely pervert the whole purpose—the congressional intent, the historical reasons why such a thing as the Federal Reserve Act was enacted in 1913.

I have gone into the history of that, so I am not going to repeat it other than to add some specifications or, as I said during the Watergate impeachment hearings, the specificities of the matter.

Now, I have alleged two very timely matters, one that has never arisen since the formation and the acceptance of this Open Market Committee which in effect gives control and the total determination of policy with respect to fiscal as well as budgetary and financial matters of the Government, and the American people as the consequence, the allocation of credit, which is what the whole issue has been since the time that our country emerged first visibly as a Nation under the first two Congresses known as the Continental Congresses and then, of course, the Articles of Confederation, and then, since its inception, the First Congress in 1789, in the processes of giving flesh and blood and bone to this framework we call the Constitution—the utterances of such great Americans as Thomas Jefferson, and subsequent to that, President Jackson, and subsequent to that, almost on the eve of his death, the greatest preoccupation on the mind of Abraham Lincoln was exactly this, which is now an accomplished fact in our Nation. We have lost control of our destiny because economics, the finances, the fiscal and monetary matters of the Nation are the most fundamental of all. What good does it do to have political freedom if the people do not have economic freedom? And we do not. And we are not about to, until the day comes—and I hope it will not come, as I see now that it apparently must be, and that is out of convulsive crisis, which always shows and history reveals is not the best environment with which to act or legislate, much less—and as I see it now, with the specific actions of the leakage of this vital information from what is supposed to be the secret proceedings of the Open Market Committee.

I will, for the record, state that the Open Market Committee consists of five private bankers not answerable to the people, not selected by the Congress, not selected by the President, but five private bankers from the system who then joined the Board in deliberating the basic fate of any administration. Anytime the Open Market Committee wants, it can make or destroy any administration by just simply determining what is going to be the rates on Treasury bills and the like, which it establishes without accountability to anybody except their own fraternity.

□ 1700

You know, of course, we live in a generation and time when most of the kids today do not know what a chicken house is, or much less what a fox looks like. But what we used to say in our day and time is that it is putting the fox in charge of the henhouse. And this is exactly what has been going on.

Now, today I want to add to the first charge in which I raised the allegation. I also presented for the record, it is in the record, the result of a so-called investigation which was not an investigation, and only because some of us raised questions, then within the Banking and Currency Committee, of which I have been a member for 21 years, at the time that the then chairman came before us, and I raised the question to the chairman and finally persuaded the chairman of the committee to direct an inquiry.

So then the Board for the first time went out and was supposed to have appointed a committee—of course all within house—and then they went out and hired a lawyer, the lawyer belonging to one of the firms that does business with the banks, with the principal bank that in effect really is one of the few that is in total, in privacy, in total association, cheek by jowl, with such intimacy that the head of the First City National Bank, Walter Wriston, can demand and get a secret meeting with Chairman Volcker in Florida in order to bail out the speculator, the billionaire, Nelson Bunker Hunt of Texas, who together with a lot of bank resources—over $10, $15 billion—tied up in this ill-begotten venture to try to corner the silver market.

And they can have such power that they can compel or at least he went voluntarily, Mr. Volcker, to a secret meeting in Florida in order to discuss how they could save that situation for the banks and for Nelson Bunker Hunt—in violation of the highest trust that our law sets for those representing the Federal Reserve Board.

After all, as I have brought out, the legal definition of the Federal Reserve Board is that it is the fiscal agent of the Treasury of the United States. I defy anybody to tell me that it acts like an agent. It acts like a master, like the principal, and unaccountable at that, unaccountable to the President who has to beg for an equal secret meeting in the White House, mind you—the only way the President can do anything is to call for a secret meeting with Mr. Volcker in the White House to say, "Hey, Paul, can't you kind of loosen up a little bit right now, I am beginning to get a lot of static on high interest rates."

We do not know what the results of that were, because as I have said before even when these international leaders have summit meetings at least they come out with some communique that says, well, we met and we ate lunch, this, that and the other. We do not even have that to this day from President Reagan and Paul Volcker, after their last two secret meetings, earlier this year.

Now, here they are, ensconced in Florida—that is Nelson Bunker Hunt and Mr. Volcker and Mr. Wriston. They certainly were not down there to look at the dolphins. And they were not there on vacation. And they must have been absolutely, and as has been established exactly what it was they did discuss, because Mr. Wriston, in his smugness, maybe some could say his complacency or arrogance, let the cat out of the bag by not realizing what he was saying. And the enormity of the consequences of interpretation of a meeting of that nature.

Now, what small bank or semismall or semibig in this country having problems can its President call and arrange a meeting with Mr. Volcker? I defy anybody to answer that question affirmatively. There is none.

So it means, then, that this Federal Reserve Board, and since 1923 particularly, has been amenable only to those very same interests that from the beginning, from the inception of our country, have been the ones that have been controlled so as not to take over the mastery of the destinies of a country or its government, and we in our time have failed.

Woodrow Wilson, in 1916, 3 years after the formation of the Federal Reserve Board and the enactment of the Federal Reserve Act, clearly—it is in his writings and speeches—was considering that the number one issue in that he discerned as the rising contest for power, the power today that is before us, the power to determine the fiscal and monetary policies of our people, its government, and whether it is going to be the people or it is going to be Paul Volcker, as it is up to now.

Now, in addition to the secret meetings of Mr. Volcker, there have been subsequent to that others of a similar nature. There have been secret meetings concerning this growing crisis, dramatically illustrated last night by the generous pronouncement to by our President, Ronald Reagan, down in Brazil, in which he said, "Folks, I bring with me $1.2 billion to save the day."

Now, the $1.2 billion matches exactly the 1.2 that Mexico was offered and given just about a month and a week ago.

Now, these are the people who are telling us that that is budget busting, that one-third of that for domestic needs to invest in America is budget busting and inflationary. But here grandiosely we announce through the President $1.2 billion—for whom now, for Brazil. Well, that is the way it read. Like the public announcement for Mexico. But it is not for Mexico, it is not for Brazil, it is to bail out Mr. Rockefeller of the Manhattan Bank, Mr. Walter Wriston of the First City National, and the Hanover Manufac-

turers Trust principally in New York, who are up to their necks in these bad, bad loans, and barely can get the taxpayers of the United States to advance enough to roll over the interest payments, not even on the principle.

This is where we are right now internationally, but with such a direct impact nationally.

This could never have happened if we had not diverted and had not allowed that power and the diversion of power to flow to this sequestered oligarchic powerful group whose ambitions and desire for more will never be satiated. No country in the history of the world—even 7,000 years before Christ, mankind in the ancient writs of Hammurabi, clearly reflects the need to have to curb those appetites. they even had then restrictions on interest rates.

And so today, what I want to bring out is the fact that the leaks continued from the open market credit—the open market committee in which you have had speculation that has redounded to the profit and the advantage and to the detriment of the American taxpayers, and the well being of the American people generally.

□ 1710

The specifics of that I will bring out in the next one. This is one additional subpoint to the second category of the charge that I outlined earlier this year.

On top of that, the fact is the people are not fooled. Let me assure my colleagues that we may deceive ourselves into thinking that this is almost undecipherable, that this an almost esoteric subject matter, that only a few select minds are able to understand. Well, that is a lot of bull. The people back home know what is happening. They have known what has been happening. They are way ahead of us. The only thing they do not understand is why—why it is happening, why the Congress, the only bulwark, does not do anything.

After all, I must remind my colleagues that the Federal Reserve Board is not an independent autonomous body springing forth, as I said, from the brow of Jove, but it is a creature of the Congress.

Interest rates are not an act of God. They are manmade, through manmade actions. Therefore, they are susceptible to control and manmade solutions.

The contest is, who are we going to let rule us, the people or the bankers?

The only place I know where the remedy can be forthcoming is here in the Congress of the United States, which is the birthplace of the entity.

It was the Congress that created the Federal Reserve Board. People do not understand why things are not being done. They understand very well what is going on. Nobody is going to kid them. All these speeches we heard on the floor here, ad infinitum, a few weeks ago, about how inflation has gone down, do you think all the folks back home think or will tell you inflation has gone back down 3 percent or 1 percent?

Are rents going down? Are mortgage rates going down? Are the grocery bills less?

Let me assure you they are not and the people know it and that is just a lot of folderol when we try to bull them into thinking that because inflation is down, therefore, it must mean that that is an excuse for unemployment to be up.

Interest rates, if you think that the average businessmen back home, desperately trying to keep his business alive now is pleased because interest rates are affordable, you are deceiving yourselves.

I have businessmen who have been in a family business for over 80 years going out of business now because of the present rates of interest, not the ones that they were supposed to have come down from a few months ago, 17 percent or 16 percent.

You still cannot get money for much less than that now and if you do not believe me, just go out and talk to your businessmen and ask them what they must pay if they want to get a line of credit from their banker today in order to fund their inventories.

What we are seeing is the throttling of the American way and to sit back and say that nothing can be done as reflected—I want to place into the RECORD two recent newpaper articles in which this, I think, very dramatically is illustrated, when Mr. Volcker is quoted as saying just 3 days ago that there is nothing they can do about changing the policy, that he is going to insist on this policy because—he does not say now that inflation is out of control because that will make him a liar, because they just said that because of their policies inflation went down, but that unemployment which is now at unprecedented rates might be a consequence and now the administration is saying that Americans, healthy, able and willing to work, shall forever be reduced to 7 million, no more and no less, to be permanently unemployed; that at no time will it be possible for our economy, which is still a dynamic economy, a growing economy, none of this is going to straitjacket the American people; but what I am saying is that the consequences of this we are going to have to pay for and before not too long.

In the meanwhile, serious attention ought to be given to what it is that can be done. One of the first things that can be done by the Congress is to go back, pick up the unfinished work after 1916, revise some of the actions that the Congress slipped through very quietly in some of the amendments to the Federal Reserve Act very obliquely that I think are indispensable because at this point I think it is irreversible, in my opinion, until the Congress regains control of its destiny insofar as a national policymaking body with respect to fiscal and monetary matters is concerned, it will not happen.

We are faced with what I consider now to be an irreversible reality, which means chaos and catastrophe and us reacting then and floundering out of desperation, which is not the best way to act.

I think always anticipatory action, anticipatory legislation is wise. For this reason over 15 years ago I first introduced in the company of our distinguished chairman, then Wright Patman, that fellow Texan, legislation that I have been reintroducing and is one of this kit that I speak of today.

Mr. Speaker, I yield back the balance of my time with the promise that I will resume this tomorrow with some of the specifics involving the charges that I have raised against Mr. Volcker.

YALE UNIVERSITY PRESIDENT A. BARTLETT GIAMATTI ADDRESSES NATIONAL ITALIAN AMERICAN FOUNDATION EVENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, the National Italian American Foundation recently gave its Career Achievement Award in Education to A. Bartlett Giamatti, the distinguished president of Yale University, and I rise to call to the attention of my colleagues President Giamatti's address to those in attendance at the Foundation's Fourth Biennial Awards Dinner.

The National Italian American Foundation is dedicated to promulgating the positive contributions and achievements of Italian Americans in our society and the Award to President Giamatti was in recognition for his outstanding accomplishments in the field of educational administration and for his contributions to human knowledge through his personal scholarship in the field of Renaissance literature.

President Giamatti's address follows:

ADDRESS BY A. BARTLETT GIAMATTI

Reverend Clergy, Ambassador and Mrs. Petrignani, Senator Sovinelli, Distinguished leaders of the National American Italian Foundation, Ladies and Gentlemen:

This is an extraordinary honor for me, and I am deeply grateful to receive it. To have it presented by a man of the intelligence, integrity and moral courage of Senator Domenici, whom I, like millions of Americans, admire so much, adds a measure

of pride to this award that I shall cherish the rest of my life. To be in the company of your other recipients is to be humbled; indeed, as Mr. Iacocca has implied, to stand next to Miss Loren in a receiving line is not simply to be humbled. It is to achieve a state of abject inferiority.

My father died six months ago and it is he I think of now—he whose parents came young and penniless, as teenagers, to America from proud, poor villages outside of Naples; my father, who with absolutely no money, and by his own zest, brains and work first went to Yale, then to Harvard, and then spent his life teaching and studying the language and culture of Italy, particularly Dante and the Commedia. I am so glad my wonderful sister can be here, so that she and I can both think of him on a night he would have reveled in—as we do.

From my father I learned many things. But central to what he taught me was the centrality of education to the Italian experience and to the fulfillment of the contribution to America of Italian Americans.

From Italy, we all derive a cultural heritage—woven of strands religious, legal, artistic and humanistic. That cultural inheritance is at the heart of, indeed is the heart of, Western civilization. From the Etruscans and the Romans until today, whatever is central to Western culture has come from or been transmitted to Italy. And education has been the main medium for that transmission: the first universities in the world were Italian—in Bologna, in Salerno—for law, for medicine, for that program of ethical education and renewal that was humanism. That heritage is what we uniquely bear from Italy as Italian Americans.

In America, education has always been the way to become an American. In this open, free, mobile society, education has been the traditional American route to full participation in America. It is historically and currently the way merit and brains and character develop themselves. The route to social access and personal fulfillment through education is viewed as a better system than the older, European model that made judgments about people based on blood or social class or inherited wealth. Americans believe in access, mobility, merit. Italian Americans, with enormous gifts, with deep devotion to their old heritage and to this grand, new country, have brought their energies to education and must continue to do so. There have been barriers. There are still subtle and gross forms of prejudice. But we are not alone in being affected by that vicious meanness of spirit and prejudice is not the whole story. We are too proud to forget our heritage; too strong of character and intellect to be deflected from the opportunity there is; too deeply and enduringly attached to America not to want to do for her and all her people the most we can.

Let no one think that Americans of Italian heritage do not fully understand their cultural heritage of education; let no Italian American think America and all she means is not available to her or him through education. Let all of us glory in the talents it is our obligation to fulfill and to share. Let us remember our children, the young women and men of Italian American heritage, who are essential to America. Their education is our responsibility. Through discharging that responsibility, we continue to enrich America.

It is in this spirit I accept this award. On behalf of us here, and all who are not here. Amici miei, vi ringrazio dal cuore, da un cuore pieno dei sentimenti affetuosi e cordiali.●

A TRIBUTE TO DR. PHILLIP CARRUTHERS BROOKS, SR.

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUBBARD. Mr. Speaker, I speak today in tribute of my constituent and longtime friend, Dr. Phillip Carruthers Brooks, Sr., who died at age 81 on November 27 in Hopkinsville, Ky.

Dr. Brooks, who was involved in numerous local, State, and national medical activities, founded Brooks Memorial Hospital in Hopkinsville to serve the black community. However, through the years, people of all races were served by his private medical facility. The 30-bed Brooks Hospital was built and maintained solely by the physician with absolutely no financial help from the Federal Government.

Dr. Brooks was an honor graduate of Howard University, Washington, D.C., and he graduated at the head of his class from the Howard Medical School. In 1954, he was named "General Practitioner of the Year" by the black National Medical Association. His community further recognized his contributions to Hopkinsville and Christian County by establishing the Dr. P. C. Brooks scholarship to aid in the financing of medical educations for those students financially unable to attend college.

It was my honor and privilege to participate last year in a "This Is Your Life" program at which a large crowd of admirers paid tribute to Dr. Brooks.

His survivors include two sons, Phillip C. Brooks, Jr., and Cowan Henry Brooks, and two brothers, Garland H. Brooks and Paul D. Brooks, all of Hopkinsville, and four grandchildren.

I extend my sympathy to the survivors and friends of this fine gentleman, who was truly an inspiration to those who knew and respected him. Indeed, we have lost an outstanding person who unselfishly gave of himself to his community.

A TRIBUTE TO HON. JACK BRINKLEY, THIRD DISTRICT OF GEORGIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. BARNARD) is recognized for 60 minutes.

Mr. BARNARD. Mr. Speaker, today I have requested this opportunity for this special order to pay tribute to one of the outstanding Members of Congress who will be very shortly retiring from this body and returning to his native state of Georgia. This Member is the Honorable JACK BRINKLEY, the distinguished member-chairman of the Subcommittee on Military Construction of the Armed Services Committee.

Mr. Speaker, when JACK BRINKLEY leaves Congress, we will lose not only the dean of our Georgia delegation, but a valued colleague. JACK BRINKLEY has done an admirable job in tending to the interests of Georgia, especially in military affairs through his contribution on the Armed Services Committee.

JACK BRINKLEY has been a dedicated and diligent public servant. His attendance record in the House has consistently been in the 90-percent range, and he has taken pains to do his homework on any number of projects important to Georgia and its citizens. His reelection to eight terms of Congress is a testimony to how well he has performed his duties for the people of his district.

Although the work and pressures of Congress demanded much from JACK, he did not neglect the other areas of life. An active churchman, he was an influential member of the congressional prayer breakfast group. Nearly every weekend, he returned to Georgia to renew ties with family and friends.

I recall an old saying on his wall which seems to sum up his attitude toward his job and its many responsibilities. It reads, "Don't ever forget who you are, where you came from, and who sent you."

JACK BRINKLEY was one who remembered the needs of his home State, and did an excellent job of fulfilling them. His presence in the next Congress will indeed be missed.

□ 1720

GENERAL LEAVE

Mr. BARNARD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the life, character, and public service of our colleague, the gentleman from Georiga, JACK BRINKLEY.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. BARNARD. Mr. Speaker, I am now pleased to yield to the Honorable EARL HUTTO, the gentleman from Florida.

Mr. HUTTO. Mr. Speaker, I appreciate the gentleman's yielding to me and I appreciate the fact that the gentleman is taking this special order so that we can honor and pay tribute to our beloved colleague, the gentleman from Georgia, JACK BRINKLEY.

Mr. Speaker, the conclusion of the 97th Congress will bring to an end the illustrious and exemplary congressional career of our colleague, JACK BRINKLEY. I am privileged to join others in honoring this outstanding public servant who has served his Georgia con-

stituents and the people of our great Nation in an absolutely superior manner.

JACK BRINKLEY's 16 years of service in the House of Representatives will probably best be remembered for the tremendous contributions he made to the military capability and defense of our country. As chairman of the Armed Services Subcommittee on Military Installations and Facilities, on which I am privileged to serve, he had a significant hand in providing for necessary facilities modernization and improvement projects for our Armed Forces worldwide. He has served the Nation's military needs in the best traditions of Georgia's legendary Armed Services Committee chairman, Carl Vinson. I consider it a high privilege to have had the opportunity to serve with JACK BRINKLEY.

It is with a great deal of respect and appreciation for JACK, and in praise and thanksgiving for this outstanding American, that I pay tribute and ask God's blessings on him and his family.

Mr. BARNARD. Mr. Speaker, I now yield to the distinguished gentleman from Georgia, the Honorable ED JENKINS.

Mr. JENKINS. I thank my colleague from Georgia for yielding to me.

Mr. Speaker, I, too, am proud to pay tribute to JACK BRINKLEY for his outstanding service to our State of Georgia and to the entire Nation.

During his 16 years in the Congress, JACK has achieved many great goals. I will not attempt to list all of those goals, but he served as the distinguished dean of the Georgia delegation for several years.

During the 96th Congress, JACK offered his leadership as a Democratic zone whip for Georgia and South Carolina.

He has been a dedicated member of the Committee on Armed Services and a productive chairman of the Military Installations and Facilities Subcommittee.

He has provided valuable leadership as a member of the Committee on Veterans' Affairs.

He will be remembered for his active role in the field of civil defense, and for introducing legislation pertaining to benefits for military personnel.

He was able to see to fruition a longstanding dream for a regional cemetery at Fort Mitchell.

My warm friend, JACK BRINKLEY, undertook the task of obtaining funds to renovate and expand the Warm Springs rehabilitation complex, the former residence of our great President Franklin Delano Roosevelt.

Mr. Speaker, I could go on and on in listing the great work that JACK BRINKLEY has done. I have known him for over 30 years. When I was a student at Young Harris College, at the same time he was a student there. Later we went to school at the University of Georgia Law School together. At that time he was a perfect gentleman.

I want to say as a tribute to him that of all the people I know, I know of no other human being who is more decent, a more decent person, than JACK BRINKLEY.

So with all of the things that we could say about his career, I can simply say that I have known him for over 30 years. He has never changed. He is a good person, and that is the best that one can say about any colleague. I am delighted to join in this tribute to a real friend, JACK BRINKLEY, whom all of us will miss in the next Congress.

Mr. BARNARD. Mr. Speaker, I now yield to the distinguished gentleman from Connecticut, the Honorable BILL RATCHFORD.

Mr. RATCHFORD. Mr. Speaker, I thank the gentleman for yielding to me.

Mr. Speaker, I, too, join the gentleman in paying tribute to the man I think is the ultimate gentleman. I am sure there are those who would wonder why someone from Connecticut, someone from a Northern State, would get involved in a tribute to a man from Georgia.

Well, I am prepared on behalf of all of our Members on both sides of the aisle to share with our Members the reasons for doing it.

I think there a number of reasons, but above all, what comes through is the man we talk about as the ultimate gentleman, always, thoughtful, always considerate, always willing to take time for Members, regardless of their point of view.

I can recall in my first term here the debate on an issue relating to a matter of great controversy, and that was the expansion of Fort Carson. There was a variety of views, and there were different expressions of opinion. The man called upon to serve as the ultimate arbiter, or referee, or judge, was the man we honor tonight.

He heard it out. He took the time to listen to the different points of view. He worked it through. Even those who represented a different point of view were left with the overriding feeling that they had been treated fairly because that was the nature of the human being whom we speak about this evening.

He is respected on both sides of the aisle. He is indeed the totally effective lawmaker, and from my point of view, the only way I can frame it is that he is a prince of a human being.

Many of us here, from Speaker O'NEILL to the other Members, pride themselves on their respect for this body, pride themselves for the company they keep, but above all, are proud of those who serve here.

Some of us happen to be sports fans. I am one of those. It is rare in sports or life, and certainly rare in politics, when an individual can go out at the top. I think in terms of sports of a Ted Williams, of a Stan Musial, of a Mickey Mantle. The man we honor today is in that tradition. He is the ultimate champion. he has served in this particular case the people of Georgia and the United States well, and he is going out at the top.

So JACK, from this Connecticut Yankee, on behalf of our delegation, and those on both sides of the aisle: "You go with our blessing, you go with our thanks, and above all, JACK, you go with our total love."

Mr. BARNARD. Mr. Speaker, I now yield to the distinguished chairman of the Committee on Veterans' Affairs and member of the Committee on Armed Services, the Honorable SONNY MONTGOMERY.

Mr. MONTGOMERY. Mr. Speaker, I thank the gentleman in the well for giving me this opportunity to honor JACK BRINKLEY.

□ 1730

Mr. Speaker, I had the privilege of arriving in the 90th Congress in 1967, and that was the class of JACK BRINKLEY, and I have had the privilege of the 16 years, wonderful years, of serving with JACK BRINKLEY.

As the gentleman in the well knows, JACK and I now serve on the House Veterans' Affairs Committee. He was the chairman of the subcommittee at one time, and he is now serving on the Subcommittee on Compensation and Pension in the Veterans' Affairs Committee, and also serving on the Housing Subcommittee of the Veterans' Affairs Committee.

He has been very active, and as someone mentioned earlier, he has taken a strong part in getting a regional cemetery in the Georgia-Alabama area for our veterans. He is now serving, as the gentleman in the well knows, as chairman of the Subcommittee on Military Construction of the House Armed Services Committee, which I also have the privilege of serving on. I serve as the ranking member with JACK BRINKLEY on the House Subcommittee on Construction.

As the gentleman will recall, several months ago when JACK closed out his handling of the construction bill on the floor for the military, that the whole House stood up and applauded JACK BRINKLEY for the wonderful job he had done as chairman of the subcommittee.

He has been active in our prayer breakfast group. I recall this morning he was right there at the regular prayer breakfast group. He served one time as president of the House prayer breakfast group.

I would like to say that I have had the privilege of working and being involved with JACK BRINKLEY almost

every day in the Congress when we have been in session. As someone said earlier, he is a decent man, and we will certainly miss him in this House.

Mr. BARNARD. Mr. Speaker, I would like to yield to the gentleman from Texas (Mr. KAZEN).

Mr. KAZEN. Mr. Speaker, I thank the gentleman for yielding to me. I am just so happy that I came through the Chamber at this particular time, because I had no idea, I had not been notified that this special order had been taken to pay tribute to JACK BRINKLEY.

I too, came at the same time that JACK BRINKLEY came to this Congress, along with my colleague from Mississippi, SONNY MONTGOMERY, and several others. There are few of us left from that class. All during the 16 years that it has been my privilege to serve in the Congress I have worked very closely with JACK BRINKLEY. I know him as a great legislator. I know him as a fine gentleman, and I know him as a fine, patriotic, sincere American who has the interests of this country at heart.

His work on the Armed Services Committee is unexcelled by anyone else. He is the chairman, as has been mentioned earlier, of the Subcommittee on Military Installations and Facilities, and I serve on the subcommittee. Serving on that subcommittee, I have known what this man has been able to do for the military, the security of this country, and our military posture all over the world.

Mr. Speaker, we are going to miss JACK BRINKLEY. He has been a tremendous friend. He has been a great legislator, as I have said before, and a man like that will be sorely missed.

I am highly privileged to have been able to call him my friend, and wish him and his family the very best in the future. JACK, we will miss you.

Mr. BARNARD. Mr. Speaker, I now yield to the distinguished gentleman from Kentucky (Mr. HUBBARD).

Mr. HUBBARD. Mr. Speaker, I thank the gentleman for yielding. I thank him for leading this tribute to our esteemed friend and colleague, JACK BRINKLEY.

We have heard these words thus far: "My friend—a decent man—the ultimate gentleman—a prince of a man" and other correct comments attributed to the person, JACK BRINKLEY. During these 8 years I have served in Congress, I have considered him a dear friend and one in whom I have a lot of confidence, and from whom I have received a lot of good advice.

I will never forget, I say to the gentleman from Georgia, one Sunday about 2 years ago when I spoke on Layman's Day at a Baptist Church in Columbus, Ga. After the service, as I stood in front shaking hands with the members of the church, more than half of the congregation who came by, not knowing if others had, asked me if I knew their Congressman, JACK BRINKLEY. Of course, I said that I did, and they spoke very warmly of him and wanted me to know how highly he was thought of in his hometown, Columbus, Ga. That says a lot about him when he is that highly thought of in his hometown, among those who have known him best.

We wish him well. Thank you, JACK BRINKLEY, for what you have done for this particular Congress and for the years that you have been here. As someone said earlier, we wish you Godspeed.

Mr. BARNARD. Mr. Speaker, I yield to the gentleman from Missouri (Mr. SKELTON).

Mr. SKELTON. Mr. Speaker, I thank the gentleman from Georgia for yielding to me.

It is not an easy task for me stand here today and pay tribute to JACK BRINKLEY. Quite frankly, this serves to remind me that he will soon be ending his distinguished congressional career. I say without equivocation that JACK BRINKLEY will be sorely missed by Member of this body, who will miss his leadership both on the floor and in the committees. In his 16 years of service he has been the distinguished dean of the Georgia congressional delegation. He has served as chairman of the Veterans' Committee subcommittees and distinguished himself in some many ways. We have already heard wonderful words of tribute.

Let me just a mention a couple or three things, because in my work here in this House our paths have crossed many times. On each of those occasions they have been most pleasant and most fruitful. JACK BRINKLEY was and is deeply interested in the subject of civil defense. He has performed an invaluable service to our Nation by emphasizing the dual use of civil defense. His efforts have made people aware of the fact that an effective civil defense program can save lives in the event of natural disasters as well as in the threat of a nuclear disaster. It was through JACK BRINKLEY that my work on civil defense received encouragement and suggestions. I wish to thank him for helping row that boat together with me.

Also, as the gentleman knows, he represents an area in Georgia that three of us in this body hold near and dear. That is a place called Warm Springs, Ga. I am one of those three Members who have spent a portion of our younger lives at a place called the Warms Springs Foundation. JACK BRINKLEY's interest and dedication in trying to see that this is a living memorial to Franklin Roosevelt will long endure.

Last, I am pleased to say that I have had the opportunity to know and be with JACK BRINKLEY on those, yea, those many Thursday morning prayer breakfasts, listened to him and talked with him and drawn inspiration from him. There is a saying that in order to have a friend you have to be one. Well, JACK BRINKLEY is a friend, and that is why he has so many friends wherever he goes.

Thank you for the opportunity to say bon voyage to our friend, JACK BRINKLEY. He is a wonderful person.

Mr. BARNARD. Mr. Speaker, I yield to the distinguished gentleman from Kansas (Mr. WINN).

Mr. WINN. Mr. Speaker, when running for political office, it is easy to make promises.

When JACK BRINKLEY was first campaigning for Congress in 1966, he made one promise. "I promise to remember who I am, where I am from, and who sent me."

I believe those words sum up the kind of service the people of the Third District in Georgia received for 16 years when JACK BRINKLEY was their Congressman. He served with devotion and integrity and achieved a degree of respect from his colleagues in the House that we all strive for. JACK is now retiring which strikes a special note in my heart because JACK entered Congress at the same time I did.

The freshman class of the 90th Congress has contributed a great deal to the House of Representatives. JACK BRINKLEY and I came to Washington from different parts of the country as complete strangers, but in the 16 years that I have known him, we have become good friends. A lot has happened since our swearing-in ceremonies and I believe we have grown together as Members of Congress, better able to serve the people who sent us here.

JACK BRINKLEY achieved three subcommittee chairmanships in his tenure in Washington. He served as chairman of the Military Installations and Facilities Subcommittee; he chaired the Veterans Housing Subcommittee in the 94th, 95th, and 96th Congresses; and headed up a Special Subcommittee on Civil Defense in the 92d Congress. JACK is recognized as an accomplished expert in the crucial field of civil defense and has worked to alert the American public to the needs of civil defense in times of strategic uncertainty. JACK has shown his thanks and compassion to America's veterans, having served as an Air Force pilot during the Korean war. His knowledge of military and defense issues is well regarded and he will be missed on the Armed Services Committee with America working to meet the Soviet threat.

JACK BRINKLEY possesses a reasoned sense of self-importance. I base this on his kindness and compassion which couples with a strong consideration for the people of the Third District in Georgia. In his farewell letter addressed to "Friends and Constituents,"

JACK expressed his deep sense of thanks to his closest admirers:

Since I've been in Congress, I've kept in mind that I don't work for the government; I work for you. Soon, at the end of my term, I will be going back to Georgia for good and I wish to report to you that all is well. Thank you for the privilege of being your man in Washington.

Basically, good men and women serve you in all levels of government. At the Federal level, things can be mighty slow, but that's the system our Founding Fathers intended. Had it been otherwise, a monarchy could have been established and government could move with lightening speed.

But here the people govern. Just as surely as they did in Franklin's day. And after the dust settles and after the smoke clears, we can take stock again and know with assurance that ours is the finest country upon which the sun has ever shone.

The House of Representatives is a better place because of the contributions of JACK BRINKLEY. He will be missed. I wish he and his lovely wife Lois many more wonderful years together.

□ 1740

Mr. BARNARD. I thank the gentleman for his comments.

Mr. Speaker, I am now pleased to yield to another great Member of the Congress who is retiring from this body and who will be sorely missed, and I refer to the Honorable BO GINN from Georgia.

Mr. GINN. Mr. Speaker, I thank the gentleman from Georgia (Mr. BARNARD) for yielding to me so I might say a few words about our distinguished colleague JACK BRINKLEY.

If I have ever known a man, an individual, who wore the title "Honorable" and who is worthy of being honored it is the gentleman from Georgia, JACK BRINKLEY.

JACK was already in the House when I arrived here as a freshman Member in 1973. He has been of inestimable value to me with the advice which he has freely given me. I must say that that advice has always been sound.

JACK has represented his district, in my judgment, as well as any person ever has who has ever served in this position.

JACK has served with great distinction as chairman of the authorizing subcommittee for the Armed Services Committee for Military Construction. During a portion of that chairmanship I had the great privilege of serving as chairman of the Appropriations Subcommittee for Military Construction. In that capacity JACK BRINKLEY and I had the opportunity to work together closely and to test each other's mettle and to get to know each other extremely well.

I know of no man, Mr. Speaker, no person who has ever served here with greater distinction than JACK BRINKLEY. I can say with great feeling and great belief that while this House of Representatives will always be a better place because JACK BRINKLEY served here, and that is a fact, our State of Georgia is about to become an even better place in which to live and work because our friend, JACK BRINKLEY, will be returning there to live at the local level and all of us will have the benefit of his advice and counsel.

My family and I send JACK and Lois and his sons our love. We send them our great thanks for their service to our State and to this great country and to this House.

We wish our friend JACK BRINKLEY Godspeed and we hope that he will continue to give all of us the benefit of his advice and counsel which he has done so ably in the past.

Mr. BARNARD. Mr. Speaker, these comments this afternoon are comments which are felt by so many Members of this Congress, those serving now and those who have served in the past.

There is an expression that is used quite often in this chamber, and that is that someone is a great American. I think that JACK BRINKLEY epitomizes the qualities of a great American as much as anybody I know.

Today we are delighted that we can have this opportunity to pay tribute to him and wish him well in his future activities, and we certainly hope to lean upon him often for advice and counsel as the occasion does develop.

I am pleased at this time to yield to the gentleman from Colorado (Mr. KRAMER).

Mr. KRAMER. Mr. Speaker, it has been my pleasure to serve with JACK BRINKLEY on the House Armed Services Committee's Subcommittee on Military Installations and Facilities for the past 2 years. I have been honored to serve with him, and I am sorry to see him leave.

Mr. BRINKLEY has chaired his committee with competence and dedication. The construction of military facilities is one of the most important elements of our defense strength. Our soldiers, for example, must be trained, equipped, housed, treated for injury or illness, deployed, and exercised. Their equipment and their weapons must be stored repaired, deployed, and eventually retired or otherwise disposed of. Every one of these activities involves a military installation, building, or training ground that was paid for by the American taxpayer and authorized or considered by his subcommittee. In a very real sense, there are few other committees whose activities get so involved in the lives and careers of our fighting soldiers and contribute so much to their fighting effectiveness.

Mr. BRINKLEY has served our Nation's Armed Forces well. He has recognized the problems in past underinvestment in facilities that need such urgent attention. He has recognized the need to build for the future, to put backbone behind the muscle that our Nation has determined to rebuild.

Mr. BRINKLEY's fairness and even-handedness will be remembered by many of the Members who had the privilege of serving under his chairmanship. He was careful to listen to all sides of an argument, to be judicious in his decisions, and considerate in his handling of sensitive issues. These marks of a statesman were also those that he brought to the floor of this body. He has dignified the Congress by being here, and we will miss him.

As he leaves the Congress, he goes with my best wishes. I know that the qualities that he displayed while he was on congressional service will be put to excellent use in his future career. He is the model of a public servant, and will continue to be an asset not only to the people of Georgia, but also to this great Nation of ours.

I wish him the best in his next career. This body has been well served by having people of his character in its membership.

● Mr. LEVITAS. Mr. Speaker, I am pleased to join in this special order to pay tribute to the service of our respected friend and colleague, JACK BRINKLEY. When thinking of JACK BRINKLEY's service, the words honor, integrity and loyalty come to mind. These qualities are embodied in JACK BRINKLEY and in his record of service in Congress.

He is a quiet, but determined and effective force. He has never sought or expected glory or recognition for his efforts, but those of us why know him well and have worked with him so closely all these years know how much he deserves praise and recognition. Clearly, you can say that JACK BRINKLEY is a workhorse not a showhorse.

In 1966, JACK BRINKLEY was elected to Congress to represent the Third District of Georgia. As a candidate for office, Congressman BRINKLEY said "I promise to remember who I am, where I am from and who sent me." In every sense JACK BRINKLEY has lived up to those words.

JACK BRINKLEY epitomizes the meaning of a public servant. He works for the people and has served his constituents and the Nation with distinction. His contributions are many.

JACK BRINKLEY is a native of Georgia, born on December 22, 1930, in the town of Faceville. His hometown, Columbus, Ga., is in the heart of the Third District. In 1949, JACK BRINKLEY received his B.A. degree from Young Harris College, in Dahlonega, Ga., and in 1959 he received his J.D. from the University of Georgia. He taught in the public schools in Georgia from 1949 to 1951, at which time he began 5 years of service in the U.S. Air Force. Jack went on to practice law in Colum-

bus from 1957 to 1959. He served in the Georgia House of Representatives for one term just before coming to Congress in 1967.

Throughout his 16 years of service, JACK BRINKLEY has maintained an attendance and voting record of better than 95 percent. Since 1981 his voting record has been 99.2 percent and he has been present for quorum calls 100 percent of the time. Congressman BRINKLEY has served his colleagues in many ways. The Georgia delegation is particularly grateful for his leadership as the dean of the Georgia delegation. He also serves as a member of the board of directors of the Sunbelt Research Coalition and has served as the president of the House prayer breakfast group, 1979 to 80, and the Democratic zone whip of region VI for Georgia and South Carolina during the 96th Congress.

As a member of the House Armed Services Committee and the Veterans' Affairs Committee, JACK BRINKLEY has done much for the military needs of our country. During the 94th, 95th, and 96th Congresses he chaired the Veterans' Housing Subcommittee.

Many veterans live in the Third District of Georgia and they can be proud of the service rendered them by JACK BRINKLEY. He succeeded in providing for the establishment of the Fort Mitchell Regional Veterans Cemetery. He sponsored successful legislation in the House which is designed to provide for greater coordination and sharing of medical resources between the Veterans' Administration and the Department of Defense. Thanks to Congressman BRINKLEY's efforts veterans and members of the Armed Forces on active duty will benefit from better health care and the Government will save tax dollars in the process.

He has been a leader in the area of civil defense. In the 92d Congress he chaired the Special Subcommittee on Civil Defense and he has continued his distinguished efforts in this area as chairman of the Military Installations and Facilities Subcommittee in the 97th Congress.

The dual-use civil defense program has become a familiar and respected concept to us all thanks to the efforts of Congressman BRINKLEY. As the champion of this concept, JACK BRINKLEY has successfully promoted a civil defense program which prepares our country not only for attack-related nuclear disasters, but also for the very real and devastating threats of natural disasters. Congressman BRINKLEY realizes that not only do we need to protect our citizens from war-related disasters, but from disasters such as hurricanes, tornados, storms, floods, earthquakes, et cetera. In all of the debates over civil defense, JACK BRINKLEY has been conscious of the structure of the program and a protector of adequate levels of funding.

In other areas, JACK BRINKLEY has spoken out and his colleagues have listened. He has been a strong advocate of funding for cancer research programs. These efforts have had widespread support in his district and throughout the Nation.

JACK BRINKLEY has been vocal on the issue of social security, and has called for a study on, and a resolution to, the notch problem which has resulted in escalated benefits. Congressman BRINKLEY sees the need to make needed corrections in the system to put social security on a sound footing and assure the continuation of adequate benefits.

The work and service of JACK BRINKLEY has been noted by many. He enjoys a 95-percent rating from the American Security Council for the past 10 years in his votes and efforts to provide for our Nation's defense. He received the "Twice a Citizen Award" this year from the Atlanta chapter of the Naval Reserve Association. As a friend of small business, he has received the Guardian of Small Business Award from the National Federation of Independent Business. He is a member of the Golden Age Hall of Fame of the National Alliance of Senior Citizens; a member of the Advisory Council of the Citizens Committee for Decency Through Law; and a member of the Columbus Metro-Urban League. He is a member of the bar of Georgia, the District of Columbia, and the Supreme Court of the United States. He is a Mason and a member of the Baptist church.

JACK BRINKLEY is married to the former Alma Lois Kite, and they have two sons, Jack, Jr., and Fred, both of Columbus.

As you can see JACK BRINKLEY has accomplished many things. He has many friends in Washington who will be sorry to see him go. We will miss his leadership and his wisdom. But JACK BRINKLEY has not forgotten where he came from or who sent him to serve in Congress. He wishes to go back to his home and be with those people. I know they join us in appreciation for his years of dedication as their public servant.●

● Mr. ALEXANDER. Mr. Speaker, I appreciate this opportunity to participate today in this event recognizing the skills and service of our colleague from Georgia, JACK BRINKLEY.

He was a community leader before the people of Georgia elected him to serve them in Congress and I am sure his talents will continue to be used for the benefit of our people. But JACK's voluntary decision to leave the House will mean a loss strongly felt by those of us interested in and concerned with the needs and problems of our veterans and with maintaining a strong defense as a means of achieving and maintaining a peaceful world.

Having shared interest in national defense and in highway transportation issues, I have learned to know and appreciate JACK BRINKLEY's ability to get results on matters of concern in these areas.●

● Mr. FOWLER. Mr. Speaker, JACK BRINKLEY's 16 years of service in this body have been years of excellent service on behalf of his district, the State of Georgia, and the entire Nation.

Georgians and the Nation's veterans in partrcular owe a great debt of gratitude to Congressman BRINKLEY. His service on the Veterans' Affairs Committee was distinguished by his untiring devotion to the legitimate needs and concerns of those who served this Nation in time of war, and he accomplished much in helping the country show its appreciation for their sacrifices.

As a member of the Armed Services Committee, JACK BRINKLEY has been unfailingly attentive to the interests of his own constituency and conscientious in the discharge of his duty to maintain the strength and readiness of the Nation's defenses. Of course he did a superb job for the installation of his own district, Fort Benning, but I want to express my own appreciation and commendation for his vigilance and effectiveness on behalf of Fort McPherson in my area.

He demonstrated once again his ability to be a gentleman in the heat of battle while maintaining his effectiveness in the battle during the debate in this body over the commitment to purchase C-5B military transport planes. JACK BRINKLEY can win friends and influence people in the best tradition of this body, and he put these talents to good and effective use in that successful effort.

As the dean of the Georgia delegation, Congressman BRINKLEY has been both fair and solicitous of all the needs of all our constitutents in that position of leadership.

It has been a high privilege and a great pleasure to serve in the delegation with JACK BRINKLEY, and I can say with all sincerity that we will miss him.●

● Mr. BEVILL. Mr. Speaker, it is a privilege for me to praise the work of my good friend and colleague, JACK BRINKLEY, upon his retirement from Congress.

JACK and I both came to Congress together 16 years ago, and during these many years of working closely on many issues, I have developed a great respect for him. He works hard for the people of the Third District of Georgia. I might also mention that JACK has had the great honor of representing the home district of former President Jimmy Carter.

Since my home State of Alabama borders JACK's State of Georgia, we

shared a great many interests, and I had an opportunity to work with him on matters of importance to both of our States.

I have been most impressed with JACK BRINKLEY's ability to analyze a problem, weigh the merits of proposed solutions, and actively seek the support of his colleagues for the measures which he believes would best solve the problem.

I deeply appreciate the wise advice and counsel which JACK has provided to me on many occasions and I wish him a long and prosperous retirement from Congress. Although this body will greatly miss him, our country is fortunate to have had his unselfish and excellent service in the U.S. House of Representatives.●

● Mr. SAM B. HALL, JR. Mr. Speaker, I hasten to add my praise and heartfelt thanks to our dear friend, JACK BRINKLEY, for the magnificent contribution he has made to this Congress and the Nation.

It has been my distinct privilege to serve with JACK BRINKLEY on the House Veterans' Affairs Committee where he has demonstrated a concern for the Nation's veterans unmatched in its intensity and commitment. Over the years we have worked together on a number of key legislative items affecting the welfare of America's veteran population. I am going to miss his advice and good counsel on the committee, but more important, millions of our veterans will miss his service to their cause.

JACK BRINKLEY represents a great area of this country. His constitutents, like JACK, are very patriotic and have an abiding love of our beloved country. In the great tradition of men like Carl Vinson and Richard Russell, it is good to know that one of their fellow Georgians, JACK BRINKLEY, can fill their shoes as a successful defender and promoter of an adequate national defense.

Many of us in this House have been afforded the honor of visiting Fort Benning, a legendary Army installation vital to the Nation's defense, and located in JACK's district. In fact, I feel certain that there are many in this body who "put in some time" at Fort Benning long before coming to the House. Some of the most outstanding American military leaders of this century are vitally linked to Fort Benning. JACK BRINKLEY is a main reason why Fort Benning continues to be a testing and training ground for our best combat-ready troops.

JACK BRINKLEY has made many friends in this body. His quiet and unassuming manner, perception and understanding the issues, and a keen wit have endeared him to his colleagues. In my judgment he is just too young to retire, but I have a feeling that JACK will continue to put his expertise and experience to good use for his State and Nation.

I have enjoyed my service in the House with JACK BRINKLEY, and I look forward to our continued association and friendship.●

● Mr. GINGRICH. Mr. Speaker, it is with particular regret that I note the retirement of Congressman JACK BRINKLEY. As dean of the Georgia delegation, Congressman BRINKLEY has been a close friend, a teacher and a leader to all of us.

When I was a freshman, before I was even sworn in, I went to Columbus to ask his advice. It was sound advice. He places country above party. He places the national interest above his own. He is committed to speaking for his constituents, rather than for special interests or special causes. Few men in the Congress can match JACK BRINKLEY in his decency, his kindness and his concern for America.

He has been a fine dean of our delegation, and a good Representative for the Third District of Georgia. He played a key role in getting the C-5 contract through. He worked ably and hard on the Armed Services Committee, not just for Fort Benning and Warner Robbins, but to insure that all of America is more effectively defended.

In particular, we will all miss his efforts in civil defense and the statesmanlike position he took in difficult times as he spoke out for programs vital to the survival of this country.

So, with considerable sadness, I say: Have a good retirement and continue to serve Columbus and Muscogee County and the people of Georgia well. We will all miss you.●

● Mr. JONES of North Carolina. Mr. Speaker, it is a pleasure to participate in this special order in honor of my good friend, Congressman JACK BRINKLEY of Georgia. In addition to being an admirer of his legislative skills and ability, I have for many years also had the privilege of being his neighbor in what is generally known as the Methodist Building. Along with many others, I will certainly miss JACK BRINKLEY as he was a dedicated public servant who had the wisdom to attend the sessions and remain silent until he had something to say. Certainly he was the type Representative which all of us admire and his leadership and calm disposition will be missed.

I join with others in wishing he and his family many healthy years and happiness in the days to come.●

● Mr. FORD of Michigan. Mr. Speaker, I have had the pleasure of serving with JACK BRINKLEY for the past eight Congresses and I will miss his presence in the upcoming 98th Congress. As the dean of the Georgia delegation, JACK has ably served his constituents and his Nation in the House of Representatives. The people of the third district have consistently approved of his actions as evidenced by the overwhelming margins of his reelections.

JACK has gained the respect and admiration of the Members of Congress on both sides of the aisle. As an advocate of a strong national defense, JACK has risen to the chairmanship of the Defense Subcommittee on Military Installations and Facilities. JACK has also fought for much deserved benefits for veterans during his tenure in Congress. We will all miss JACK BRINKLEY as he leaves the House of Representatives.●

● Mr. PANETTA. Mr. Speaker, I appreciate this opportunity to pay tribute to JACK BRINKLEY, who is retiring from the House. Working with JACK has been an honor. His commitment to the work of the House and to his constituents has been an example for all of us. JACK's work in the area of national defense has been particularly crucial.

I know I speak for all of my colleagues in wishing JACK the best of luck in the years to come. He has made a great contribution to his constituents and to the country.●

● Mr. HUGHES. Mr. Speaker, I am pleased to join my colleagues in paying tribute to JACK BRINKLEY for his 16 years of dedicated service in the House of Representatives.

Although I never had the privilege of serving with JACK on a legislative committee, I did have the opportunity to become acquainted with him through our congressional prayer breakfasts. On these occasions, I was able to witness the personal warmth, unquestionable integrity, and rare qualities of leadership which have always characterized his work in the House.

Since his election to Congress in 1966, JACK BRINKLEY has represented Georgia's Third District with the highest level of competence and legislative ability, largely through his distinguished service on the Veterans' Affairs and Armed Services Committees. As chairman of the Subcommittee on Military Installations and Facilities, he has served his large military constituency with admirable skill—in the great tradition of his fellow Georgian, Carl Vinson, who retired from his body in 1964.

To all the deliberations of the House, JACK brought a strong sense of personal conviction, honesty, and high moral character which will be sorely missed with his retirement. I am genuinely sorry to see him leave, and wish him much success and happiness in his future endeavors.●

● Mr. MAZZOLI. Mr. Speaker, I wish to add my thanks and appreciation to my friend and colleague, JACK BRINKLEY, the distinguished dean of the Georgia delegation, who is leaving the House after many years of dedicated service.

JACK is a man of high principle and has exhibited tireless effort in his work for the good of his constituents, as well as this Nation. JACK spent many years involved in civic and community affairs before coming to Congress and the ability and skill which he has exhibited here will be greatly missed among the ranks of the House.

I extend to JACK and his family my sincere best wishes for the future as well as my thanks for diligent service in the past.●

●Mr. NICHOLS. Mr. Speaker, I am grateful to our colleague for arranging this special order to honor our distinguished colleague of some 16 years, the Honorable JACK BRINKLEY, who has so ably represented Georgia's Third Congressional District during his tenure in the Congress.

JACK and I came to Congress together. His district joins mine just across the Chattahoochee River from Alabama's Russell County and for some 10 or 12 years now he has been my desk mate on the House Armed Services Committee. I have gotten to know him extremely well. His philosophy and that of my own are quite similar and he has been as close to me as any Member of the Congress, including my own Alabama delegation.

Mr. Speaker, as we gather here this afternoon to express our appreciation for the services rendered by this son of Georgia, there are so many areas I could mention in which JACK has represented his district, his State and his Nation to such good advantage. I would start with the services he has rendered toward strengthening the defense posture of this Nation. JACK has ably represented the Columbus, Ga., area and its No. 1 industry—the Infantry School—housed on what I believe may be the largest military post in the Nation, Fort Benning, Ga. He has left no stone unturned to see that Fort Benning was treated justly in the defense bills passed by this Congress and, through JACK's efforts, this outstanding military post today is a showcase to the armies of the free world.

Then as I reminisce about our friend who is soon to return to practice law in his hometown of Columbus, Ga., I am reminded of the moral fibre and the character which has been an inspiration to us all. JACK has been a regular attender of the Thursday Morning Prayer Breakfast since coming to Congress, and I recall very well the year in which he served as president of this group and presided over the annual President's Prayer Breakfast here in Washington. He ably represented the House of Representatives on this occasion. Finally, Mr. Speaker, a great part of the respect I hold for my colleague stems from his love and his devotion for his family. When Jack served his constituents from his office here in Washington on Monday through Friday, I would venture to say that there were few weekends during these 16 years when the sun began to set across the Potomac that Jack failed to board a flight to Atlanta and back home where he and his family were regular attenders at the Edgewood Baptist Church for Sunday services. His roots remain in the clay hills of the northern portion of his district and in the sandy loam below Upitau Creek and sand hills area of sprawling Fort Benning. Perhaps that is the reason he was so loved by his constituency and why they returned him to Congress year after year with little opposition.

When Jack elected to leave the Congress, he wrote a letter to his constituents in Georgia's Third Congressional District which I believe is worthy of insertion in the RECORD of this special hour. The promise he made to his constituency 16 years ago when he first ran for Congress should be kept in mind by each of the 435 Members of this congressional body.

HOUSE OF REPRESENTATIVES,
Washington, D.C., March 4, 1982.

DEAR FRIENDS AND CONSTITUENTS: Since I've been in Congress, I've kept in mind that I don't work for the government; I work for you. Soon, at the end of my term, I will be going back to Georgia for good and I wish to report to you that all is well. Thank you for the privilege of being your man in Washington.

Basically, good men and women serve you in all levels of government. At the federal level, things can be mighty slow, but that's the system our founding fathers intended. Had it been otherwise, a monarchy could have been established and government could move with lightning speed.

But here the people govern. Just as surely as they did in Franklin's day. And after the dust settles and after the smoke clears, we can take stock again and know with assurance that ours is the finest country upon which the sun has ever shone.

Sincerely yours,

JACK BRINKLEY,
Member of Congress.

THE TIME TO SAIL

I've always remembered a Millard Grimes column when he was leaving the *Enquirer* years ago. Quoting Frost, he spoke of a fork in the road offering a choice of two paths and his decision to take the path less traveled.

I feel about the same way in announcing my withdrawal from public service. For a long time my family and I have considered the happy prospect of a return to private life where family things can come first again. Therefore, after completion of my term in 1982, I shall not be a candidate for public office again.

Let me answer in advance two questions which might naturally be wondered about.

First, my health is fine and I hope for quite a few more happy birthdays.

Also, my political health is fine, and I believe those who "Back Jack" could handle another election, or several other elections, reasonably well, because my relationship with the people back home has always been one of friendship and service. I understand that the opposition party has recently conducted polls across Georgia and I have no idea as to what the results are. But even though they were picking and asking the questions, it would be interesting for that poll to be made public.

ANOTHER TIME AND ANOTHER SEASON

In 1966 one of my most important campaign messages employed the familiar words, "There is a time for every season; a time to speak and a time to be silent." After eight elections to Congress, there is another time and another season for me.

I have been faithful to the Edmund Burke philosophy of putting constituent interest always, ever, before my own;

I have not sought or received improved financial status from public life, but in terms of good will, I have been doubly blessed;

I have built an attendance and voting record which I commend to our future Representatives as a high standard of service and the first line of responsibility.

In summary, after doing my best as a Representative of the people, I welcome the change of season and face it without regret. The time to sail is on the high tide.

This has been my most successful year ever in Congress. As Chairman of the Military Installations and Facilities Subcommittee, major achievements have been attained in both military construction and civil defense law. Also, as a member of the Veterans' Affairs Committee, I have seen the fruition of a long standing dream for a regional cemetery at Fort Mitchell.

The decision is a timely one. Reapportionment has been attended to in a fair and objective manner without the temptation to which our District might have been subjected had there been no incumbent. In my testimony to the Reapportionment Committee last May, I was careful to offer my best judgment "without regard to incumbency." That outcome provides continuity for an excellent, well-rounded, national defense-oriented Third District.

Another factor related to tenure. To delay too long would do myself and my famly the disservice of being put unnecessarily in the 1982 political arena; to announce too early would limit effectiveness within the Congress. Halfway through the term, between the First and Second Session of Congress, seemed to be the best time.

PROUD TO BE A DEMOCRAT

The inspiration of public office is serving people and that's where the exhilaration is, too. There's more satisfaction in giving people a helping hand than having political power. Although I'm proud to be a Democrat, I couldn't be a very good party man because I couldn't vote simply on the party-line basis. To have made a pledge, and to have tried to keep it . . . "to remember who I am, where I'm from, and who sent me," has assured a Third District of Georgia uniqueness and independence, which is reflected in my voting record. I have not been a "yea sayer" for Presidents or groups, but have honestly tried to hear the voices of others and exercise my own independent judgment in casting my ballot. As a product of Georgia, naturally, my votes reflecting my own conviction are more often than not in consonance with those of the people who sent me.

Sometimes it gets lonesome when there is another promise to keep—to go with men of either party in pursuit of right, as you see it, or to go it alone if necessary in opposition to wrong. But not often. I can vouch for the fact that public officials by and large care about people, about fairness and about right.

This leads me to a word about candidates. They are offering to serve, and it seems to me that we should treat each and every one of them with respect and courtesy. To presume the best in others is good practice and reflects credit to ourselves. The candidate himself should stand for something.

MY WIFE

At this point a word about my wife, Lois, seems to be in order. She has been a good soldier in the finest of traditions. She is a veteran of the Washington scene during my early years in Congress. We have lived in Silver Spring, Sleepy Hollow, Vienna, Alexandria, the Methodist Building in D.C. and in McLean. She has displayed immense fortitude, along with our children, who, because of our sojourn, have attended all too many schools and have lived in all too many neighborhoods.

Lois has dealt with a tornado, break-ins, and being alone, but has still managed to treat the role of homemaker as a high calling. She is a high credit to me.

GOODBYE

In conclusion, I wish to sincerely thank all citizens of the 3rd District. Congressional service has been the highest of privileges. But because those "miles to go and promises to keep" have been arduous ones, through long skies and crowded terminals, homecoming looms as a great attraction. My fondest hope is for your welcome and continued goodwill.

It will be a time where I can be at the controls of an airplane again, as I was before; a time where I can experience the drama of a courtroom, or solitude of the Library of Congress, or excitement of the classroom—as I did before; it will be a time when I can put my family first again, as I did before.

There is a time for every season! And for every season one should be glad and give thanks. I am, and I do.

JACK BRINKLEY.

BIOGRAPHICAL

Congressman Jack Brinkley is the first Member of Congress from Columbus, Georgia, to serve in this century.

(a) Rep. Thomas Wingfield Grimes—last served, 1887-1891.

He has served in Congress second longest of any Georgia Third District Representative since the War Between the States.

(a) Speaker Charles Frederick Crisp, 14 years—March 4, 1883-Oct., 1896.

Rep. Stephen Pace, 14 years—Jan. 3, 1937-Jan. 3, 1951.

Rep. Elijah Lewis ("Tic") Forrester, 14 years—Jan. 3, 1951-1965.

Rep. Charles Robert Crisp, a little over 20 years—Dec. 19, 1896-March 3, 1897 and March 4, 1913-Oct. 7, 1932.

Rep. Brinkley is in his 16th year of service, Jan. 3, 1967 to present. He is dean of the Georgia Congressional Delegation. He is a member of the House Armed Services Committee and chairman of the Military Installations and Facilities Subcommittee. He is a member of the board of directors of the Sunbelt Research Coalition, Inc.

Rep. Brinkley's voting record: 1967 through 1980-record votes 96.1% and quorum calls 94.1%; 1981-record votes 99.2% and quorum calls 100%.

Congressman Brinkley has also served as:

President of the House Prayer Breakfast Group, 1979-80; Democratic Zone Whip for Region VI for Georgia and South Carolina during 96th Congress; Chairman, Veterans Housing Subcommittee—94th, 95th and 96th Congresses; and Chairman, Special Subcommittee on Civil Defense—92nd Congress.

Education:

Young Harris College—honor graduate; University of Georgia School of Law—Juris Doctor degree Cum laude.

He is a member of the Bar of Georgia, the District of Columbia and Supreme Court of the United States.

Rep. Brinkley was a USAF pilot during the Korean War and served for 5 years.

He is a Mason, a Baptist, is married to the former Alma Lois Kite, and they have two sons, Jack, Jr. and Fred, both of Columbus.

"I promise to remember who I am, where I'm from, and who sent me."—Jack Brinkley, Candidate for Congress, 1966.

I shall miss JACK BRINKLEY as much as I have missed any Member of this Congress and I want to wish for him and his wife, Lois, who is from my own congressional district on the west side of the river, my best wishes for many happy years as he departs from this legislative body.●

● Mr. COELHO. Mr. Speaker, I am proud to join my colleagues today in paying a very special and well deserved tribute to a man who for 16 years has served this House ably, effectively, and loyally, JACK BRINKLEY. Throughout his tenure, he has exhibited an unquestionable allegiance both to his constituents and to this Nation. For those of the Third District of Georgia, his retirement will deprive them of a representative of loyalty and understanding, who has throughout his eight terms continued to remember the words he proclaimed in his first congressional election in 1966,

I promise to remember who I am, where I'm from and who sent me.

For this Nation, a distinguished and faithful servant who cared for and worked for its future will be sorely missed.

Although, within his 16-year tenure, JACK has numerous accomplishments and achievements that will be remembered for years to come, I would especially like to commend his work as chairman of the Subcommittee on Military Installations and Facilities. In his role as chairman, he displayed a great concern for the security of our Nation and accomplished major achievements in both military construction and civil defense law.

I was privileged to be able to serve with JACK on the Veterans' Committee in the 96th Congress, and would like to give well-earned praise to his many efforts on behalf of our Nation's veterans. He worked extremely hard to assist our veterans in many areas where they required assistance.

Throughout his career, JACK has been a steady, thoughtful, dedicated and thorough legislator who earned and won the respect of all who came to know him.

His well-earned retirement at the end of this term will leave a vacancy among our ranks which will be hard to fill. We cannot, however, but wish him the best in the future, while simultaneously suppressing our regret that he will no longer be among us.●

● Mr. DERWINSKI. Mr. Speaker, it is a pleasure to join with my colleagues in paying a well-deserved tribute to our good friend and colleague, JACK BRINKLEY. After 16 years of distinguished service to the constituents of the Third District of Georgia, JACK will be leaving us at the end of this session.

His effective service on the Armed Services and Veterans' Affairs Committees has shown his deep concern for the national security interests of this country. He has been a leader in guiding legislation to strengthen our Nation's defense capabilities and to revitalize our defense preparedness stature. JACK is a true southern gentleman whose love for his country was reflected in his efforts to improve benefits for our military servicemen and women.

His outstanding record of faithful service and his strength of character have earned him an honored place in the hearts of all of us who had the privilege of knowing and working with him.

As dean of the Georgia delegation, JACK has had a distinguished career in the House of Representatives and has served his constituents in Georgia diligently and conscientiously over the years. He has been an asset to the House, and his influence and presence will be missed. I join my colleagues in extending JACK and his family my very best for their future endeavors.●

● Mr. FUQUA. Mr. Speaker, during the 16 years we have served together in this body I have come to know JACK BRINKLEY not only as a competent and effective colleague but as a true friend.

Though our districts do not join, JACK BRINKLEY and I have had many occasions to work together because the Chattahoochee River, which flows through his district, joins with the Flint at the Florida-Georgia border to form the Apalachicola River, which flows through my district.

While the interest of our constituents sometimes varied on the appropriate management of this tririver system, JACK and I have usually managed to find areas of compromise which have resolved the problems faced by those we represent.

I use this example as a means to underscore one of the qualities that have made JACK BRINKLEY such an honored and respected Member of this House.

He never flinched from facing a difficult issue, always exhibited a willingness to listen to opposing views, and, when possible, compromised to attain the greatest good for the greatest number.

His long and exemplary record of elective service to his fellow man which started as a State legislator

ends at the close of the current session of Congress.

We will all miss his knowledge, his intellect, and his dedication.

But most of all we will miss his presence among us.●

● Mr. ANNUNZIO. Mr. Speaker, I rise in tribute to the Honorable JACK BRINKLEY, who has dedicated his life to public service, and the last 16 years to ably representing the people of the Third District of Georgia in the U.S. House of Representatives. As the senior Member of the Georgia delegation in the House, his tireless efforts on behalf of his constituency, and on behalf of all citizens of the United States are truly commendable.

Before his election to the House of Representatives, JACK taught in the Georgia public school system, served in our country's Air Force as a pilot from 1951–56, and practiced law. He also served in the Georgia House of Representatives from 1965–66, and has served as Georgia State volunteer March of Dimes chairman of the Muscogee County Muscular Dystrophy Association.

Elected to serve in the 90th Congress in 1966, JACK BRINKLEY has been a dedicated Congressman since that time, serving with distinction as chairman of the Subcommittee on Military Installation and Facilities of the House Armed Services Committee, and as a Member of the House Veterans' Affairs Committee. His efforts in these committees have been both fruitful and beneficial to the citizens of this Nation.

JACK is a fine legislator, and a Congressman of compassion, courage, and patriotism, who has provided exemplary service to our beloved country. He will be missed by those of us in the House of Representatives who have had the pleasure of working with him.

I extend to JACK BRINKLEY my best wishes for continued success in devotion to the highest principles.●

● Mr. WATKINS. Mr. Speaker, it is a privilege to rise today to pay tribute to the distinguished gentleman from Georgia, my good friend and colleague, the Honorable JACK BRINKLEY.

During his 16 years in Congress, JACK BRINKLEY has served his State and this Nation well. He is a man of the highest integrity, and has made tremendous contributions to our Nation's well-being. His service as chairman of the Military Installations and Facilities Subcommittee of the House Armed Service Committee has been exemplary, as has his service as a member of the House Veterans' Affairs Committee.

One thing that many people do not know about JACK BRINKLEY is one of the things that I appreciate most about him—every Thursday morning I look across the table at the congressional prayer breakfast, and there sits JACK BRINKLEY. He is a very busy man, yet he finds the time to regularly attend prayer breakfasts with his colleagues. He has, in fact, served as president of the national prayer breakfast. I will always cherish the brotherly love I have been fortunate enough to share with JACK as a result of our prayer breakfasts.

JACK is a gentleman of the highest integrity who has served as a true statesman in the Halls of Congress. I join my colleagues in wishing him every success in the future. He has chosen to retire from the House, but his presence and contributions in the House will not soon be forgotten. To JACK I extend best wishes for success and happiness in whatever new challenges he undertakes.●

● Mr. REUSS. Mr. Speaker, I am pleased to join in this tribute to JACK BRINKLEY. JACK is one of the finest with whom I have been privileged to serve in my 28 years in Congress. This decent, modest, and courteous man is an exemplary model for all public servants.

As an active member and former president of the House prayer breakfast group, JACK has shared with his colleagues the deep religious faith which guides his thoughts and actions.

He has accomplished much as a member of the Armed Services Committee and as chairman of its Subcommittee on Military Facilities and Installations. He has been the primary sponsor of military benefits legislation which has provided millions of deserving veterans and their dependents with essential medical and dental care. He has also worked hard and effectively for veterans' housing benefits.

I have been particularly impressed with JACK's leadership in establishing the Warm Springs Rehabilitation Complex, and in making it a "living memorial" to President Franklin D. Roosevelt, who gained physical and emotional sustenance from his frequent visits there.

I have enjoyed and benefited from my association with this quiet, generous man from Columbus, Ga. When I spoke at a dinner honoring JACK in Columbus last year, and later visited my alma mater at the Infantry School, Fort Benning, I saw at firsthand how beloved JACK is in the eyes of his fellow Georgians.

His colleagues and this institution will miss JACK BRINKLEY greatly.●

● Mr. ADDABBO. Mr. Speaker, it is with some sorrow that I join my colleagues today in paying tribute to our good friend and colleague, JACK BRINKLEY. JACK has decided to leave the public arena and devote his time and energies to his family and personal pursuits. While we all are happy for both JACK and his family, JACK will be sorely missed by this House.

For the past 16 years, JACK has served his constituents, the residents of the Third Congressional District of Georgia, the House of Representatives, and this Nation with dedication, wisdom, and compassion. As chairman of the Military Installations and Facilities Subcommittee of the Armed Services Committee, JACK has sponsored major legislation affecting America's civil defense program, including the authorization of civil defense funds for natural, as well as nuclear disasters. His work in this area won him recognition from the U.S. Civil Defense Council for his fine work. His efforts on the Veterans' Affairs Committee have been no less notable: He authored many pieces of legislation increasing and extending assistance programs for veterans in housing and education.

The job of Representative is often a demanding, rigorous, and trying one, but JACK proved himself worthy of the confidence of his constituents. I would like now to join my colleagues in wishing him the best in his new private life. He will be missed.●

● Mr. LOEFFLER. Mr. Speaker, JACK BRINKLEY, my distinguished friend from Georgia and dean of the delegation from that great State, will be sorely missed in this House. I extend my great appreciation to JACK for his dedicated leadership in behalf of our armed services and our veterans. Our colleague has truly given the best of himself for his Nation and for the people of Georgia.

Thank you, JACK, for your expertise, your hard work, and your friendship. I wish you the very best always.●

● Mr. MATSUI. Mr. Speaker, it is with great pleasure that I join the Members of the Georgia delegation in paying tribute to the Honorable JACK BRINKLEY, who is retiring from this House after 16 years of distinguished service. His constituents in the Third Congressional District of Georgia, the Members of this body, and our Nation will miss his steady leadership and effective advocacy on behalf of Americans, especially veterans.

I had the privilege of working with JACK on many projects of great importance to my constituents in the Sacramento area during his tenure as chairman of the Armed Services Subcommittee on Military Installations and Facilities. Throughout these efforts, he demonstrated his consummate skill as a legislator, and I developed great respect for his intelligence, manner, and ability.

My legislative experiences with JACK were reflective of his basic concern about crafting laws that improved the lives of our citizens, particularly those in the military community. He labored diligently on the behalf of retired and active military personnel by sponsoring legislation to provide them with essential medical and dental care. In addition, JACK's deep interest in the welfare of our Nation's veterans translat-

ed into his successful authorship of numerous measures, one of which insured their access to alternative types of housing.

JACK's impressive record of legislative achievement is one of which he and his constituents should rightly be proud. I admire, and I am certain that this feeling of admiration is shared by every Member of this House. In closing, I extend to my respected colleague, JACK BRINKLEY, my regards and best wishes for his continued success in future endeavors as well as a rewarding retirement.●

EDUCATION REGULATIONS

(Mr. PERKINS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. PERKINS. Mr. Speaker, for the past 3 years the Committee on Education and Labor has regularly scrutinized all proposed and final regulations for education programs when they are published in the Federal Register. Our review procedures, instituted during these 3 years, involve word-by-word analysis of the regulations to determine whether they follow the authorizing statutes and congressional intent.

To my knowledge, we are the only congressional committee that conducts these detailed examinations of all regulations as a matter of course. Our efforts are bipartisan and, we hope, objective. We carry out this review under the authority of section 431 of the General Education Provisions Act, which also gives Congress the authority to disapprove education regulations when they are inconsistent with the law.

In the CONGRESSIONAL RECORD last March, I inserted statistics showing the scope of the committee's work on regulations. Since that time, we have built upon this record, and our endeavors have produced results.

In August, Congress exercised the section 431 veto authority when we disapproved the regulations of chapters 1 and 2 of the Education Consolidation and Improvement Act because they contradicted the authorizing statute. As a result of our disapproval, the Department of Education recently published important changes to these regulations which will bring them more in line with the authorizing law and insure the smooth operation of the chapters 1 and 2 programs at the school district level.

I am convinced that without our committee's formal review procedures and attention to these regulations in the proposed stage, we could not have moved this resolution of disapproval through both Chambers so expeditiously and with the support of both sides of the aisle.

I wish to highlight the following statistics showing the extent of our committee's regulation work, as updated through the present time:

From 1979 to the present, the committee has reviewed approximately 2,796 pages of final and proposed regulations published in the Federal Register.

These include 112 sets of final regulations and 73 sets of proposed regulations.

One hundred and twelve letters have been written to the Secretary of Education outlining concerns about education regulations. These letters have, in most instances, resulted in the administration changing the regulations in accordance with the committee's observations.

I have no doubt that this process, arduous and time consuming as it is, has paid off enormously. I believe that we have assisted in eliminating many unnecessary requirements and scores of pages of regulations and that our education regulations are greatly improved as a result of our oversight.●

THE REFUGEE ADMISSIONS PROGRAM FOR FISCAL YEAR 1982 AND THE PRESIDENT'S PROPOSED REFUGEE ADMISSIONS PROGRAM FOR FISCAL YEAR 1983

(Mr. RODINO asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. RODINO. Mr. Speaker, the Refugee Act of 1980 (Public Law 96-212) requires the President to consult with Congress prior to the beginning of each fiscal year on his proposals for refugee admissions for the coming year.

The following letter sent on behalf of the President by Ambassador H. Eugene Douglas, U.S. Coordinator for Refugee Affairs, dated September 14, 1982, initiated the consultative process:

U.S. COORDINATOR FOR REFUGEE AFFAIRS,
Washington, D.C., September 14, 1982.

Hon. PETER W. RODINO, Jr.,
Chairman, Committee on the Judiciary, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: I am pleased to transmit the information required by the Refugee Act of 1980 in preparation for the consultations on refugee admissions for Fiscal Year 1983. In formulating our recommendations, the Administration has fully considered the effect and consequences which our refugee policies have on states and communities throughout the country. We have carefully sought to weigh the domestic costs against the foreign policy and humanitarian implications of these same refugee policies.

The documents transmitted today include proposed refugee admission levels and allocations among groups of special humanitarian concern to the United States. The Administration's final determination on admission levels and allocations will be made after carefully considering Congressional and other views expressed during the consultation process.

Sincerely,

H. EUGENE DOUGLAS,
Ambassador at Large.

Mr. RODINO. The following is a summary of the report to Congress on refugee admissions and allocations for fiscal year 1982 and the President's proposal for refugee admissions and funding for fiscal year 1983:

BACKGROUND

This is a summary of the Report to the Congress on proposed refugee admissions and allocations for fiscal year 1983 which initiates the "appropriate consultation" set out in Section 207(e) of the Refugee Act of 1980. These consultations provide an opportunity for the Congress and the Administration to focus on the domestic and international concerns which influence the complex decision-making process of determining refugee admissions levels.

The Report reviews the refugee situation, projects the extent of necessary participation of the United States in refugee resettlement, discusses the reasons why the proposed admissions numbers are in the national interest, describes plans for refugee movement and resettlement, and analyzes the impact of refugee admissions. The President's proposal has been developed with regard to the views expressed by state and local governments, private voluntary organizations, public interest groups, U.S. agencies and the international community. After considering the views of the members of the Committees on the Judiciary of the Senate and the House of Representatives, the President will make his final determination on refugee admissions levels and allocations for Fiscal Year 1983.

U.S. REFUGEE POLICY

The United States emphasizes the use of diplomatic means to minimize the underlying causes of refugee flows and supports the principle of international responses to refugee problems by encouraging the broadest possible participation of other countries.

The U.S. response to worldwide refugee problems includes relief and resettlement programs. The basic policy is: (1) to provide emergency relief assistance to refugees in place; (2) to support voluntary repatriation whenever possible; (3) to facilitate resettlement in a country of asylum, in neighboring countries within the region, or in other third countries; and, (4) if necessary to accomplish the humanitarian and foreign policy objectives of the United States, to admit refugees for resettlement in the United States. To carry out this policy, the United States places maximum reliance on appropriate international organizations, including the United Nations High Commissioner for Refugees (UNHCR), the International Committee of the Red Cross (ICRC), the United Nations Relief and Work Agency for Palestine Refugees (UNRWA), and the Intergovernmental Committee for Migration (ICM).

Refugee relief

During fiscal year 1982, U.S. support for international relief programs, which are often more appropriate and less costly than resettlement in the United States, included major relief programs in Southeast Asia, Africa, Latin America, the Near East and South Asia.

TABLE I.—INTERNATIONAL UNITED STATES REFUGEE ASSISTANCE

	Fiscal year 1982 estimate [1]	Fiscal year 1983 appropriation request
United Nations High Commissioner for Refugees (UNHCR):		
Africa	$49,239,300	$61,000,000
East Asia: Indochinese	22,200,000	17,400,000
East Asia: Orderly departure program	350,000	
Latin America	8,200,000	5,000,000
Near East and South Asia: Pakistan	24,150,000	33,000,000
Other	1,000,000	1,000,000
UNHCR subtotal	105,139,300	117,400,000
United Nations Relief and Works Agency for Palestinians in the Near East (UNRWA)	67,000,000	72,000,000
Soviets and Eastern Europeans resettling in Israel	12,500,000	12,500,000
International Committee of the Red Cross (ICRC):		
Ordinary Budget	1,500,000	2,000,000
Political Prisoners	1,500,000	1,750,000
Africa	7,000,000	7,900,000
Latin America: El Salvador	1,800,000	
Near East and South Asia: Pakistan	650,000	
Other	1,420,000	
ICRC subtotal	13,870,000	11,650,000
Other:		
Africa: Resettlement assistance	30,000,000	
Africa: Special projects	9,500,000	8,000,000
East Asia: Khmer relief	16,295,000	12,000,000
Near East: Lebanon relief (AID allocation)	10,000,000	
Near East and South Asia: Pakistan—Special Projects	1,350,000	5,000,000
Intergovernmental Committee for Migration (ICM)	4,500,000	4,700,000
Resettlement Projects	1,000,000	10,000,000
Other subtotal	72,645,000	39,700,000
Subtotal—refugee program	271,154,000	253,250,000
Other assistance: Food for Peace (Public Law-480, title II)	74,800,000	82,600,000
Grand total	345,954,300	335,850,000

[1] As of Sept. 1, 1982.

Voluntary repatriation

In addition to providing humanitarian relief for refugees overseas during FY 1982, the United States participated through international organizations and with other governments to support voluntary repatriation. Large scale repatriation resulted in the return of approximately 85,000 refugees to Chad and 46,000 refugees to Angola. Smaller programs involved repatriation in Latin America and East Asia. A UNHCR effort with the Vietnamese installed regime in Phnom Penh to promote voluntary repatriation of Khmer has not been successful. However, since October 1980, some 25,000 Khmer have voluntarily been relocated from the holding centers to the border.

Resettlement in third countries

The United States encourages the international community to provide resettlement opportunities for refugees. Countries which have resettled significant numbers of Indochinese refugees since 1975 include China, France, Canada, Australia, the Federal Republic of Germany, the United Kingdom and Hong Kong. Countries which have resettled significant numbers of East European and Soviet refugees include Australia, Canada, France, the Federal Republic of Germany, and Israel.[1]

U.S. refugee admissions

The U.S. refuge admissions program strives to ensure that refugees admitted to the United States have appropriate sponsorships, receive adequate services upon arrival, and that Federal resources available for refugee resettlement are effectively utilized.

[1] See Country Reports on the World Refugee Situation.

In fiscal year 1982, the admissions ceiling of 140,000 refugees was authorized. Approximately 99,200 refugees will have been admitted by September 30. The difference between the ceiling and actual admissions numbers reflects inter alia, the increasingly restrictive emigration policies of the Soviet Union, and the unwillingness of certain countries to release political prisoners, and the U.S. Government's decision, to accept less than the allowable numbers of Indochinese as long as first asylum was maintained.

Although a large number of refugee applicants for U.S. admission meet the criteria for admission, there is no entitlement. We have developed a priority system for applicants who meet the criteria for refugee admission, have special ties to the United States, and who are members of groups determined to be of special humanitarian concern.

TABLE II.—FISCAL YEAR 1982 U.S. REFUGEE ADMISSIONS

Projected admissions	Area of origin	Total admissions
Africa	[1] 3,500	3,356
East Asia	[1] 96,000	73,522
Eastern Europe and the Soviet Union	[1] 31,000	[2] 13,536
Latin America and the Caribbean	3,000	579
Near East and South Asia	[1] 6,500	6,304
Total	140,000	97,297

[1] These figures reflect revisions made during the course of fiscal year 1982, following consultations with the Congress. The admissions level for Africa was increased by 500, Eastern Europe by 2,000, and the Near East and South Asia by 1,500. The East Asian admissions level was decreased by 4,000.
[2] Of this amount, 6,647 are Polish refugees.

PROPOSED FISCAL YEAR 1983 ADMISSIONS

In response to domestic and foreign policy concerns and in accordance with humanitarian goals, the President proposes to admit up to 98,000 refugees to the United States during FY 1983 dependent upon the continuing need for refugee resettlement at anticipated levels throughout the twelve-month period.

The projected admissions include 68,000 refugees from East Asia, 17,000 refugees from the Soviet Union and Eastern Europe, 8,000 refugees from the Near East and South Asia, 3,000 refugees from Africa and 2,000 refugees from Latin America and the Caribbean.

In addition, consideration will be given by the Immigration and Naturalization Service to the adjustment to permanent resident alien status of up to 5,000 persons who were previously granted asylum in the United States and have been in the United States as refugees for at least one year, pursuant to Title II, Section 209(b) of the Refugee Act of 1980.

TABLE III.—*Fiscal year 1983 proposed refugee admissions*

Area of origin	*Amount*
Africa	3,000
East Asia	68,000
Eastern Europe and the Soviet Union	17,000
Latin America and the Caribbean	2,000
Near East and South Asia	8,000
Total	98,000

The proposed refugee admissions numbers are ceilings and not goals. To the extent possible, consistent with needs and objectives, the program will be managed to admit fewer than the authorized ceiling. The underlying principle is that refugee admission is an exceptional ex gratia act, provided by the United States in furthering foreign and humanitarian policies. It is not a right of a refugee to be admitted to the United States because a program has authorized spaces available.

Asia

The proposed admissions ceiling for East Asian refugees for fiscal year 1983 is 68,000. Of the proposed admissions, 200 will be reserved for East Asians other than Indochinese.

The situation in Southeast Asia continues to present a major threat to the safety of refugees and the stability of the region. By October 1982, the refugee population in countries of first asylum will be nearly 220,000. At least 44,000 new refugees are expected to appear in first asylum countries during fiscal year 1983, compared with approximately 60,000 in 1982. Countries in the region granting temporary asylum do so in the expectation that their existing refugee populations will continue to decrease and that the world community, with the United States in the lead, will provide resettlement for many of those now in camps and for most new arrivals. An inadequate resettlement effort could signal a change in U.S. refugee policy which could lead to forcible repatriation or push-offs of boats back to sea. There is need to continue a U.S. policy which will maintain the principle of first asylum, save lives and reduce political instability in the region. The proposed admissions program includes within the ceiling, refugees going directly from Vietnam to the United States under the Orderly Departure Program (ODP).

Soviet Union and Eastern Europe

The proposed admissions ceiling for the Soviet Union and Eastern Europe is 17,000. Continuing restrictive Soviet emigration policies are likely to result in low admissions numbers for fiscal year 1983. Eastern European admissions will include refugees from Poland and other Eastern European countries. There is substantial domestic support for the admissions programs from this region for reasons of ethnic and religious ties and as a means of assisting those fleeing oppression under communist regimes.

Near East and South Asia

The proposed admissions ceiling to meet resettlement needs for refugees from the Near East and South Asia is 8,000 and is in response to, but not limited to, situations in Iran, Afghanistan, Syria, and Iraq.

Africa

The proposed admissions number for refugees from Africa is 3,000. This projection is based on a best estimate of the numbers who may qualify for refugee status and require resettlement. Most African refugees have been granted asylum within the region where the United States provides a major portion of funding for care and maintenance through international organizations.

Latin America and the Caribbean

The proposed admissions number for refugees from Latin America and the Caribbean is 3,000. Numbers from this ceiling will be used primarily for political prisoners and their families, persons under life-threatening conditions, and for family reunification. Current and former political prisoners and other cases of special humanitarian concern within their country of nationality or habitual residence will be considered for admission, pursuant to Section 102(a)(42)B of the INA, as amended.

DOMESTIC RESETTLEMENT

The refugee resettlement program historically has enjoyed broad public support in the United States. Involvement on the part

of U.S. citizens, private agencies, ethnic communities, and state and local governments continues. Resettling refugees continues to cause some strain on state, community and private resources, however.

Refugees need some transitional assistance once they arrive in the United States. Owing in large part to the geographic distribution of the new refugee arrivals, combined with prevailing economic conditions, there has been a rise in the use of cash assistance by refugees. Available data, however, show that refugee employment and self-sufficiency increase with the length of time a refugee is in the country.

To reduce welfare dependence, increase job readiness and facilitate adaption to the American way of life before a refugee arrives in the United States the English-as-a-Second Language and Cultural Orientation (ESL/CO) program has been strengthened in the overseas Refugee Processing Centers in Southeast Asia and the Sudan during the last year.

High concentrations of refugees in certain localities have had substantial impacts on community resources. The new placement policy recognizes the importance of improving the quality of initial refugee placement and should reduce the incentives for secondary migration. Refugee resettlement planning among state and local officials, private voluntary resettlement agencies and the Federal agencies, has been strengthened and a monitoring program has been instituted. While problems in resettling large numbers of refugees are genuine, so is the commitment to the American tradition of providing a homeland to those fleeing persecution.

ESTIMATED COST OF REFUGEE MOVEMENT AND RESETTLEMENT

Costs associated with the care and maintenance, processing, transportation, and initial reception and placement of refugees are borne by the Department of State. Once refugees arrive in this country, they are eligible for many of the same services, available to disadvantaged Americans. Costs associated with these services are borne primarily by the Department of Health and Human Services (HHS).

This estimate includes expenditures for programs which directly assist refugees. Expenditures for refugee assistance are also made through job training, programs, public housing activities, and various other federal and state programs which assist refugees as part of a broader population of needy Americans.

ESTIMATED COSTS OF REFUGEE MOVEMENT AND RESETTLEMENT IN THE UNITED STATES—FISCAL YEAR 1982–83

[In millions of dollars]

Agency	1982 program total cost	1983 Arrivals	1983 Prior arrivals	1983 Total

Department of Agriculture: Food stamps	159.2	52.6	176.7	229.3
Grand total	1,093.8	391.1	691.4	1,082.5

[1] Of this amount, $22.3 million was obligated for the 1981–82 school year and $22.7 million for the 1982–83 school year.

[2] Does not include $20 million appropriated for refugee and Cuban/Haitian entrant assistants in the fiscal year 1982 Urgent Supplemental.

Mr. RODINO. The Committee on the Judiciary, adhering to the two-tier consultation format used in prior years, held a closed meeting between designated consultative Members and cabinet-level administration officials followed by a public hearing before the full committee.

On September 28, 1982, the consultative Members, ranking member of the full committee, ROBERT MCCLORY, subcommittee chairman ROMANO L. MAZZOLI, subcommittee ranking member, HAMILTON FISH, JR., and I met with Acting Secretary of State Kenneth W. Dan, Assistant Attorney General Edward Schmultz, Under Secretary of Health and Human Services David B. Swoap, and U.S. Coordinator for Refugees H. Eugene Douglas.

The President's proposal for fiscal year 1983 as summarized above was presented to the congressional representatives. I stated my deep concern over the continuing problems of refugees, especially regarding the more than $1 billion being spent each year by the Government to implement the program. I expressed my satisfaction with the efforts made by the administrators of the program for living up to its commitment to keep fiscal year 1982 admissions considerably lower than the 120,000 ceiling authorized. In fact, as the table above indicates, total admissions for fiscal year 1982 were held to 97,297. I emphasized the need for further continuous action by the administration to get more countries involved in refugee resettlement activities to relieve the disproportionate share of the responsibility being borne by the United States.

On the same day, following the closed meeting, a public hearing was held by the full Committee on the Judiciary to complete the two-tier procedure. Witnesses before the full committee were Ambassador H. Eugene Douglas, U.S. Coordinator of Refugee Affairs; James N. Purcell, Acting Director, Bureau of Refugee Programs, Department of State; Alan C. Nelson, Commissioner of the Immigration and Naturalization Service, Department of Justice; and Phillip Hawkes, Director, Office of Refugee Resettlement, Department of Health and Human Services.

The consultative Members considered the information received during the formal consultation process, as well as the various materials submitted by the administration.

The following two letters were sent to the President expressing the views of the consultative Members:

COMMITTEE ON THE JUDICIARY,
HOUSE OF REPRESENTATIVES,
Washington, D.C., September 29, 1982.

THE PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: We are pleased to advise you that the consultative process mandated by the Refugee Act of 1980 with regard to the FY 1983 refugee program has been completed.

We impose no objections to the numbers and allocations of the 98,000 refugee admissions for FY 1983 in your proposal as submitted by the Coordinator of Refugee Affairs, Ambassador H. Eugene Douglas, on your behalf.

During the year, should you perceive a need for a shift of numbers from one area of origin to another, we would expect to be consulted prior to making any such reallocation.

We would appreciate receiving quarterly progress reports from the Refugee Coordinator during the year on the implementation of this projected FY 1983 program.

Sincerely,

PETER W. RODINO, JR.,
Chairman.

ROBERT MCCLORY,
Ranking Member.

HAMILTON FISH, JR.,
Ranking Member, Subcommittee on Immigration, Refugees and International Law.

COMMITTEE ON THE JUDICIARY,
HOUSE OF REPRESENTATIVES,
Washington, D.C., September 30, 1982.

THE PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: The House Committee on the Judiciary has completed its consultation on refugee admissions for Fiscal Year 1983 as required by the Refuge Act of 1980. Chairman Peter W. Rodino, Jr. and the other two House consultative Members are sending you a letter expressing their views. I generally endorse their letter but have elected to send you this separate set of views.

Based on extensive testimony, discussion, and investigative trips conducted by my Subcommittee, I make the following recommendations concerning the refugee admissions program for Fiscal Year 1983:

A total refugee admissions ceiling of 86,000.

Continued emphasis on the domestic effects of refugee resettlement. Funding levels for refugee resettlement programs in the United States must be maintained at levels adequate to move refugees quickly to a position of self-sufficiency.

Closer consultation between federal, state, and local government officials and voluntary agencies. Sponsorships must be tightened and made more professional, business-like, and cost-efficient. The overriding goal of our resettlement program—to place refugees into jobs not onto welfare—must be emphasized at all levels of the program.

Better health screening of refugees and better treatment of their health problems prior to their entry into the United States.

These recommendations are made with a continuing commitment to maintaining America's refugee resettlement program, but with a frank assessment that unless refugee admissions are maintained at the lowest levels necessary to accomplish essential justice and to give the Administration the flexibility it must have to react to emergency situations, the entire refugee program may be undermined.

The total admissions level your refugee advisors have proposed—98,000—I feel, respectfully, is too high. My views are based on careful analysis.

As you may remember, Mr. President, the Administration initially recommend 173,000 admissions for Fiscal Year 1982. I proposed 120,000 admissions. 140,000 was the agreed figure. Actual admissions during Fiscal Year 1982 will total 99,000. I think it is fair to say that my recommendation last year was reasonable. I believe my recommendation for Fiscal Year 1983 is also reasonable.

The request your refugee advisors have proposed for East Asia—68,000—is, I suggest respectfully, high under present condition. Refugee arrivals into countries of first asylum are down dramatically. Though many displaced persons remain in camps in countries of first asylum, many of them are not seeking resettlement or are not eligible either because they are not refugees or are not of special humanitarian concern to the United States.

The request your refugee advisors have proposed for Eastern Europe—17,000—appears also to be too high. I have serious doubts about the continuation of the Rumanian third country processing program (TCP) under which, in essence, our country agrees to accept Rumanians as refugees though these people have never been subject to an examination by an official of the Immigration and Naturalization Service to determine whether they fit the refugee definition and whether they may be excludable. I also believe certain Eastern Europeans, who are well settled in other nations of Western Europe and, thus, disqualified from entering the refugee program, are being allowed into it nonetheless.

Finally, Mr. President, I continue to question the tendency of certain officials in your Administration to view sympathetically applications for refugee or asylee status advanced by those leaving Communist countries but to view unsympathetically the applications for refugee or asylee status advanced by those departing from noncommunist countries.

Not everyone emerging from Southeast Asia is a refugee. Some are economic migrants. And, by the same token, not everyone emerging from Central America or the Caribbean is an economic migrant. Some are refugees and asylees. The Refugee Act requires each such application to be considered objectively on its own merits, regardless of the nature of the government of the country from which the person is fleeing or of its standing with our government. The Refugee Act must be followed in this regard.

Mr. President, you should soon have before you an act reauthorizing the refugee program for one additional year. This bill passed the House overwhelmingly and is now moving through the Senate. It makes needed changes in the domestic resettlement program which should lower the welfare dependency rate among refugees. It will also lessen the financial and social burden on state and local governments, such as those in your home state of California, which have already absorbed so many refugees. I commend this bill to your attention.

In closing, I want to congratulate you and responsible officials in your Administration for taking most seriously the consultative process of the Refugee Act. Many critics feel the consultative process is merely "window-dressing" and to be effective must be replaced by some form of legislative veto.

On the basis of the way the two formal consultations and the numerous private briefings and informal discussions on refugee programs have proceeded during the two years I have served as Chairman of the Subcommittee. I feel the consultations have been seriously engaged in by both the Executive and Legislative Branches and have been effective in restructuring our refugee program.

If the process continues to work in this fashion in the future, I see no need to alter it fundamentally.

All best wishes,

Sincerely,

ROMANO L. MAZZOLI,
Chairman, Subcommittee on Immigration, Refugees, and International Law.

Mr. RODINO. On October 11, 1982, the President informed the U.S. Coordinator of Refugee Affairs, H. Eugene Douglas, of his decision on the fiscal year 1983 refugee ceilings.

The following Presidential determination was published in the Federal Register on October 19, 1982.

[Presidential Determination No. 83-2 of Oct. 11, 1982]

FISCAL YEAR 1983 REFUGEE CEILINGS

Memorandum for the Honorable H. Eugene Douglas, United States Coordinator for Refugee Affairs

Pursuant to Sections 207(a) and 207.1(a)(3) and in accordance with Section 209(b) of the Immigration and Nationality Act (INA), after appropriate consultations with the Congress, I hereby determine that:

The admission of up to 90,000 refugees to the United States during fiscal year 1983 is justified by humanitarian concerns or is otherwise in the national interest;

The 90,000 refugee admission ceiling shall be allocated as 64,000 for East Asia; 15,000 for the Soviet Union/Eastern Europe; 6,000 for the Near East/South Asia; 3,000 for Africa; and 2,000 for Latin America/Caribbean; and

An additional 5,000 refugee admission numbers to be available for the adjustment to permanent residence status of aliens who have been granted asylum in the United States is justified by humanitarian concerns or is otherwise in the national interest.

Pursuant to Section 101(a)(42)(B) of the INA and after appropriate consultations with the Congress, I hereby specify that special circumstances exist such that, for the purposes of admission under the limits established herein, the following persons, if they otherwise qualify for admission, may be considered refugees of special humanitarian concern to the United States even though they are still within their countries of nationality or habitual residence:

Persons in Vietnam with past or present ties to the United States; and

Present and former political prisoners, and persons in imminent danger of loss of life, and their family members, in countries of Latin America and the Caribbean.

You will inform the appropriate committees of the Congress of these determinations.

This memorandum shall be published in the Federal Register.

RONALD REAGAN.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. PHILLIP BURTON (at the request of Mr. WRIGHT) for today on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. BARNARD, for 60 minutes, today.

(The following Members (at the request of Mr. THOMAS) to revise and extend their remarks and include extraneous material:)

Mr. COLLINS of Texas, for 30 minutes, December 8.

Mr. COLLINS of Texas, for 30 minutes, December 9.

Mr. COLLINS of Texas, for 30 minutes, December 10.

Mr. BUTLER, for 10 minutes, today.

(The following Members (at the request of Mr. GONZALEZ) to revise and extend their remarks and include extraneous material:)

Mr. GONZALEZ, for 30 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. FORD of Michigan, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. GOLDWATER, following offering Broyhill substitute for Luken amendment in section 115, H.R. 3809, in the Committee of the Whole on Tuesday, December 1.

Mr. RODINO, to revise and extend his remarks in the RECORD and to include therein extraneous material, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,428.

(The following Members (at the request of Mr. THOMAS) and to include extraneous matter:)

Mr. MCCLORY in two instances.

Mr. DOUGHERTY.

Mr. BEREUTER.

Mr. VANDER JAGT.

Mr. BROOMFIELD.

Mr. GOODLING.
Mr. DORNAN of California.
Mr. SAWYER.
Mr. KINDNESS.
Mr. PURSELL.
Mr. DANNEMEYER.
Mr. DERWINSKI in two instances.
Mr. YOUNG of Florida in 15 instances.
Mr. PHILIP M. CRANE in two instances.
(The following Members (at the request of Mr. GONZALEZ) and to include extraneous matter:)
Mr. WEAVER.
Mr. LANTOS.
Mr. FASCELL in five instances.
Mr. MOFFETT in five instances.
Mr. LEVITAS in two instances.
Mr. HARKIN.
Mr. ROSENTHAL.
Mr. MOTTL in two instances.
Ms. OAKAR.
Mr. BARNARD.
Mr. SIMON in five instances.
Mr. IRELAND.
Mr. LEATH of Texas.
Mr. GARCIA.
Mr. OBEY in three instances.
Mr. SABO in three instances.
Mr. PHILLIP BURTON.
Mr. MINETA.
Mr. BARNES.
Mr. MATSUI.
Mr. BONKER.
Mr. MONTGOMERY.
Mrs. KENNELLY.
Mr. STUDDS.
Mr. LELAND.
Mr. MOAKLEY.

ADJOURNMENT

Mr. BARNARD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 47 minutes p.m.) the House adjourned until tomorrow, Friday, December 3, 1982, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

5205. Under clause 2 of rule XXIV, a letter from the Director, Defense Security Assistance Agency, transmitting addenda to the annual reports on foreign military sales as of September 30, 1982, pursuant to section 36(a) of the Arms Export Control Act, was taken from the Speaker's table and referred to the Committee on Foreign Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MOAKLEY: Committee on Rules. House Resolution 616. Resolution providing for the consideration of H.R. 7356, a bill making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-940). Referred to the House Calendar.

Mr. LONG of Louisiana: Committee on Rules. House Resolution 617. Resolution providing for the consideration of H.R. 6957, a bill making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-941). Referred to the House Calendar.

Mr. YATES: Committee on Appropriations. H.R. 7356. A bill making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-942). Referred to the Committee of the Whole House on the State of the Union.

Mr. ADDABBO: Committee on Appropriations. H.R. 7355. A bill making appropriations for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes (Rept. No. 97-943). Referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BIAGGI:

H.R. 7348. A bill to amend the Social Security Act to include Fridays among the days on which social security and SSI benefit checks may not be delivered, so as to assure (without postponing the delivery date) that the recipient of any such check will have a reasonable opportunity to cash or deposit it without delay; to the Committee on Ways and Means.

By Mr. BUTLER:

H.R. 7349. A bill to reform the Federal court system, to eliminate diversity jurisdiction, to expand and make permanent the system of U.S. trustees, to establish bankruptcy courts under article III of the Constitution, and for other purposes; to the Committee on the Judiciary.

By Mr. PERKINS:

H.R. 7350. A bill to amend the Foreign Trade Zones Act to exempt bicycle components parts which are not reexported from the exemption from the customs laws otherwise available to merchandise in foreign trade zones; to the Committee on Ways and Means.

By Mr. ROBINSON:

H.R. 7351. A bill to provide for the distribution within the United States of the U.S. Information Agency film entitled "Dumas Malone: A Journey with Mr. Jefferson"; to the Committee on Foreign Affairs.

By Mr. ROSENTHAL:

H.R. 7352. A bill to amend the Securities Exchange Act of 1934 to increase the sanctions against trading in securities while in possession of material nonpublic information; to the Committee on Energy and Commerce.

By Mr. WEBER of Minnesota (for himself and Mr. OBERSTAR):

H.R. 7353. A bill to declare that the United States holds certain lands in trust for the Mille Lacs Band of Chippewa Indians; to the Committee on Interior and Insular Affairs.

By Mr. WHITE:

H.R. 7354. A bill to amend title XVI of the Social Security Act to provide that a blind or disabled child otherwise qualified may be eligible for SSI benefits even though not a resident of the United States, if such child is accompanying a parent who is a member of the Armed Forces serving a tour of duty overseas; to the Committee on Ways and Means.

By Mr. ADDABBO:

H.R. 7355. A bill making appropriations for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes.

By Mr. YATES:

H.R. 7356. A bill making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983, and for other purposes.

By Mr. GOODLING:

H. Con. Res. 431. Concurrent resolution expressing the sense of the Congress that financial institutions should cooperate with the economic recovery plan of the Federal Government by following the lead of the Board of Governors of the Federal Reserve System in setting lower interest rates for consumer loans; to the Committee on Banking, Finance and Urban Affairs.

By Mr. ZABLOCKI (for himself, Mr. ROSTENKOWSKI, Mr. FASCELL, Mr. BROOMFIELD, Mr. DERWINSKI, Mr. BOLAND, Mr. ANNUNZIO, Mr. DINGELL, Mr. MINISH, Ms. MIKULSKI, Mr. FARY, Mr. NOWAK, Mr. BOWEN, and Mr. DAUB):

H. Con. Res. 432. Concurrent resolution expressing the sense of the Congress on the situation in Poland and calling for a determined policy aimed at ending the repression of the Polish people; to the Committee on Foreign Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 4657: Mr. SCHEUER.
H.R. 6073: Mr. MCEWEN.
H.R. 6348: Mr. JAMES K. COYNE, Mr. GEPHARDT, Mr. WHITEHURST, Mr. SCHEUER, Mr. BUTLER, Mr. EDWARDS of California, Mrs. BOUQUARD, Mr. DANIEL B. CRANE, Mr. JONES of Tennessee, Mrs. HOLT, and Mr. HYDE.
H.R. 6386: Mr. FAZIO and Mr. SYNAR.
H.R. 6462: Mr. QUILLEN.
H.R. 6829: Mr. BENNETT.
H.R. 6833: Mr. BAILEY of Missouri, Mr. BEARD, and Mr. ROBERTS of South Dakota.
H.R. 7002: Mr. LEE, Mr. LEBOUTILLIER, Mr. CLAUSEN, Mr. HARTNETT, Mr. WINN, Mr. LENT, Mr. MOTTL, Mr. SPENCE, Mr. BEARD, Mr. SOLOMON, Mr. WHITEHURST, Mr. MONTGOMERY, Mr. PICKLE, Mrs. HOLT, Mr. HAMMERSCHMIDT, Mr. WALKER, Mr. MCGRATH, Mr. STANGELAND, Mr. MILLER of Ohio, Mr. SMITH of Alabama, and Mr. HYDE.
H.R. 7053: Mr. MINETA, Mr. DE LUGO, and Mr. HERTEL.
H.R. 7157: Mr. DUNCAN.
H.R. 7251: Mr. NOWAK and Mr. ROBERTS of Kansas.
H.R. 7312: Mr. YATRON, Mr. APPLEGATE, Mr. ECKART, and Mr. DUNCAN.
H.R. 7313: Mr. APPLEGATE, Mr. ECKART, and Mr. DUNCAN.
H.R. 7323: Mr. YATRON, Ms. OAKAR, and Mr. DIXON.
H.R. 7334: Mr. ARCHER.
H.R. 7337: Mr. STANTON of Ohio.
H.J. Res. 591: Mr. FORSYTHE, Mr. GRADISON, Mr. ROBERTS of Kansas, Mr. ROEMER, Mr. VENTO, Mr. WILSON, and Mr. YOUNG of Alaska.
H. Con. Res. 413: Mr. VENTO, Mr. BEVILL, Mr. LOWERY of California, Mr. PORTER, Mr. HUGHES, and Mr. LIVINGSTON.

H. Con. Res. 425: Mr. DE LA GARZA, Mr. DUNCAN, Mr. FROST, Mr. CROCKETT, Mr. FLORIO, Mr. DOWDY, Mr. CLAUSEN, Mr. MARKEY, Mr. WILSON, Mr. BRINKLEY, Mr. FORSYTHE, Mr. BEVILL, Mr. KOGOVSEK, Mr. SOLOMON, Mr. BRODHEAD, Mr. BARNES, Mr. AUCOIN, Mr. HYDE, Mr. GUNDERSON, Mr. FRENZEL, Mr. EDWARDS of California, Mr. VANDER JAGT, Mr. WHITEHURST, Mr. LOWRY of Washington, Mr. WAXMAN, and Mr. MINETA.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 5133

By Mr. DANNEMEYER:

(Disclosure of domestic content.)

—In lieu of the matter proposed to be inserted by the amendment in the nature of a substitute insert the following:

SECTION 1. DEFINITIONS.

As used in this Act:

(1) The term "model year" means a vehicle manufacturer's annual production period (as determined by the Secretary) which includes January 1 of a calendar year, or if a vehicle manufacturer does not have an annual production period, the calendar year. A model year shall be designated by the year in which January 1 occurs.

(2) The term "motor vehicle" means any three-wheeled or four-wheeled vehicle propelled by fuel which is manufactured primarily for use on the public streets, roads, and highways (except any vehicle operated exclusively on a rail or rails), and which is rated at ten thousand pounds gross vehicle weight or less. Such term does not include (A) any motorcycle, or (B) any vehicle determined by the Secretary to be an automobile capable of off-highway operation within the meaning of section 501(3) of the Motor Vehicle Information and Cost Savings Act.

(3) The term "Secretary" means the Secretary of Commerce.

(4) The term "vehicle manufacturer" means any person engaged in the business of producing motor vehicles for ultimate retail sale in the United States and includes as one entity all persons who control, are controlled by, or are in common control with, such person. Such term also includes any predecessor or successor of such a vehicle manufacturer.

SEC. 2. DISCLOSURE OF DOMESTIC CONTENT.

Each vehicle manufacturer who sells motor vehicles in the United States shall cause to be maintained, in a prominent place on each such vehicle manufactured in any model year after model year 1982, a label disclosing the value of the labor used by the manufacturer in the United States in the production of such vehicle and parts for such vehicle and the value of any material or part produced in the United States which is used in the manufacture of such motor vehicle.

SEC. 3. RULES.

The Secretary shall prescribe such rules as are necessary or appropriate to carry out this Act.

(1983 domestic content ratio.)

—Page 8, beginning in line 5, strike out "shall not be less than the higher of" and all that follows through line 10 and insert in lieu thereof the following: "shall not be less than the applicable minimum content ratio specified in the following table:".

(Confidentiality.)

—Page 10, strike out lines 14 through 23 and insert in lieu thereof the following:

(3) All information submitted by a vehicle manufacturer to the Secretary in compliance with this Act shall be confidential and shall not be disclosed except when required under court order. The Secretary shall by regulation prescribe such procedures as may be necessary to preserve such confidentiality, except that—

(A) the Secretary may release or make public any such information in any aggregate or summary statistical form which does not directly or indirectly disclose the identity or business operations of the manufacturer who submitted the information; and

(B) the Secretary shall release upon request any such information to the Congress or to any committee of the Congress.

(Auto import agreements or understandings.)

—Page 14, redesignate section 7 as section 8 and insert after line 11 the following new section:

SEC. 7. AUTO IMPORT AGREEMENTS OR UNDERSTANDINGS.

(a) IN GENERAL.—Sections 4 and 5 shall not apply to a manufacturer outside of the United States during any model year in which there is in effect an agreement or understanding between the United States and the government of the country in which the principal office of such manufacturer is located which agreement or understanding was entered into after the date of the enactment of this Act and which limits the importation of motor vehicles into the United States from such country.

(b) NOTICE TO CONGRESS.—The President shall notify the House of Representatives and the Senate of any agreement or understanding entered into after the date of the enactment of this Act under which the importation of motor vehicles into the United States is limited.

Page 15, redesignate section 8 as section 9.

By Mr. GRAMM:

—Page 14, redesignate section 7 as section 8, and insert after line 11 the following new section:

SEC. 7. WAIVER.

Sections 4 and 5 shall not apply to any vehicle manufacturer whose primary production facilities are in a country (other than the United States) which, as determined by the President, has substantially reduced the quotas, tariffs, and other trade barriers applied to products imported in that country from the United States.

Page 15, redesignate section 8 as section 9.

H.R. 6957

By Mr. BROYHILL:

—Page 45, after line 4, insert the following new section (and redesignate the following section accordingly):

SEC. 507. (a)(1) Notwithstanding any other provision of law, any use of funds appropriated in this Act or in any other law for the Federal Trade Commission shall be consistent with the provisions of the Federal Trade Commission Act and the Federal Trade Commission Improvements Act of 1980, as in effect on Spetember 30, 1982.

(2) In the administration of section 21 of the Federal Trade Commission Improvements Act of 1980 pursuant to paragraph (1), those provisions of such section which were enacted as an exercise of the rulemaking power of the Senate and the House of Representatives also shall apply in the case of any use of funds which is subject to such section as a result of paragraph (1).

(b) The provisions of subsection (a) shall apply to any use of funds described in subsection (a) which occurs on or after October 1, 1982.

—Page 45, after line 4, insert the following new section (and redesignate the following section accordingly):

SEC. 507. (a) No funds appropriated in this Act for the Federal Trade Commission may be used for the purpose of conducting any study, investigation, or prosecution of any agricultural cooperative for any conduct which, because of the provisions of the Act entitled "An Act to authorize association of producers of agricultural products", approved February 18, 1922 (7 U.S.C. 291 et seq.), commonly known as the Capper-Volstead Act, is not a violation of any Federal Antitrust Act or the Federal Trade Commission Act (15 U.S.C. 41 et seq.).

(b) No funds appropriated in this Act for the Federal Trade Commission may be used for the purpose of conducting any study or investigation of any agricultural marketing orders.

By Mr. COLLINS of Texas:

—Page 33, after line 24, insert the following new section:

SEC. 303. None of the funds appropriated in this title may be used to pay any contribution for expenses necessary to meet annual obligations of membership in the United Nations or any affiliated agency in excess of 20 percent of the total annual assessment of the United Nations or such agency. This section shall not apply to the International Atomic Energy Agency and to the joint financing program of the International Civil Aviation Organization.

—Page 25, after line 23, add the following new section:

SEC. 203. No part of any sum appropriated by this title shall be used by the Department of Justice to bring any sort of action to require directly or indirectly the transportation of any student to a school other than the school which is nearest the student's home, except for a student requiring special education as a result of being mentally or physically handicapped.

By Mr. LEVITAS:

—Page 45, after line 4, insert the following new section (and redesignate the following section accordingly):

SEC. 507. No funds appropriated in this Act for the Federal Trade Commission shall be used to (1) promulgate any trade regulation rule; or (2) administer or enforce any trade regulation rule which was promulgated before the date of the enactment of this Act but which has not taken effect before such date of enactment.

By Mr. LUKEN:

—H.R. 6957 is amended by adding at the end thereof the following new section to read as follows:

SEC. 508. None of the funds appropriated under this Act may be used by the Federal Trade Commission for the purpose of investigating, issuing any order concerning, promulgating any rule or regulation with respect to, or taking other action (other than one that is already the subject of litigation in the courts of the United States on or before the date of enactment of this Act) against any State licensed and regulated profession (as that term would apply under the definition in 29 U.S.C. 152(12)) or the local, State or national non-profit membership associations thereof.

H.R. 7145

By Mr. PRITCHARD:

—Page 13, line 20, strike out "$158,779,000," and insert in lieu thereof "$158,029,000,".

EXTENSIONS OF REMARKS

INTRODUCTION OF LEGISLATION ON BEHALF OF ARMANDO G. LEAL, JR.

HON. HENRY B. GONZALEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. GONZALEZ. Mr. Speaker, I recently had the honor and privilege of speaking at Veterans' Day services at Leal Middle School in San Antonio. The significance of this occasion is that this school is named after Armando G. Leal, Jr., who was killed in Vietnam in 1967. In his honor and for justice' sake, I am introducing legislation today that would waive the time limitations to authorize the President to award the Congressional Medal of Honor posthumously to the family of this brave man.

At the time, Mr. Leal was serving as a corpsman with the First Marine Division in connection with Operation Swift against enemy aggressor forces in the Republic of Vietnam. The division came under heavy enemy attack and Mr. Leal ran through a fire-swept area to administer first aid to several casualties. Although exposed to heavy enemy fire and wounded himself, Mr. Leal rendered aid for 2 hours to wounded marines who were located between friendly and enemy lines. He refused to be evacuated in order to continue administering aid. While treating his comrades and moving them to safety, Mr. Leal was severely wounded for a second time but continued to administer aid. Since the second wound immobilized him, an attempt was made to move him to safety, but he was shot and mortally wounded by a North Vietnamese soldier firing at a close range from a machinegun.

I feel that we should not deny his memory or his family the recognition he so rightfully deserves, that is to be awarded the Medal of Honor. In fact, the Navy posthumously awarded him the Navy Cross for his courageous actions.

I feel this bill is especially timely since we as a nation have recognized the contributions made by Vietnam veterans to the struggle for freedom as represented by the dedication of the Vietnam Veterans Memorial. The costs of freedom are high, and Armando Leal, Jr., paid that price and more. He deserves to be called a hero, and we should see that he is recognized as such. His noble story will remain forever with us. He did not fail his comrades; let us not fail him.●

MAYOR JANET GRAY HAYES

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. MINETA. Mr. Speaker, it is with sincere pleasure that I join the citizens of the city of San Jose today in recognizing and honoring Mayor Janet Gray Hayes, one of the most highly regarded and outstanding public leaders to serve the city.

Janet Gray was the first woman in this country to be elected as the mayor of a major metropolitan city. For 8 years she has presided over the technological capital of the Nation while at the same time being a champion fighter for the rights of all citizens, an innovator of national urban policy, and a hard-working, honest politician.

Mayor Hayes is a grassroots activist who started out committed to making the city of San Jose a better place to live. She has used her organizational experience and expertise to help transform San Jose, a city once characterized by urban sprawl, into one of the top financial, cultural, transportation, and population centers of the region.

Janet Gray has tackled the No. 1 challenge of her political career like a tenacious fighter. Few could have succeeded as well as she in balancing the competing interests of growth, prosperity, and the natural inheritance of the Santa Clara Valley and end up with one of the most technically advanced, yet livable cities in the country. She has earned the respect needed to successfully encourage financial investment and industrial development. San Jose is the 14th largest city in the country, the fastest growing, and the 4th largest in California. The success of this great city is the result of a sensible growth plan which protected wilderness and agriculture. Mayor Hayes made sure there was backbone in that plan.

Janet Gray started her professional career as a psychiatric social worker for the Jewish Family Service Agency in Chicago. She also worked for the Denver Crippled Children's Service and the San Jose Adult and Child Guidance Clinic. She is a past president of the League of Women Voters of the San Francisco Bay Area and the Central Santa Clara Valley. She now serves as chair of the National League of Cities' Energy, Environmental Quality and Natural Resources Steering Committee and Public Technology Inc. as board member and chair of the advisory council. I know firsthand that Janet Gray is especially respected and admired among her colleagues in San Jose, where her accomplishments have been directly felt. In 1975, she received the Woman of Achievement Award from the San Jose Mercury News and in 1975 and 1976 she was selected as the most admired elected official in Santa Clara Valley by two public opinion surveys. In 1980, she received the Santa Clara County Women of Achievement Award and the National Conference of Christians and Jews Community Service Award.

Janet Gray, however, was never content to be the only woman in San Jose's political arena and through her persistent adherence to equal opportunity and human rights, she has led San Jose to the forefront of the women's movement; a city with the highest percentage of women in decisionmaking positions. Today, 3 out of 5 Santa Clara County supervisors, 7 out of 11 San Jose City council members, one superior court judge and the president of San Jose State University are women.

Mayor Hayes is a patron of the arts, an urban leader, an involved parent, and a tough politican. Her accomplishments demonstrate that a working mother who cares about the problems her community faces can make a difference. She is, quite simply, a remarkable woman.

Mr. Speaker, I ask all the members of the House to join me in paying tribute to Janet Gray Hayes. She is a woman who has made an unforgettable impact on our community. Her career gives everyone a great deal of inspiration. Mayor Janet Gray Hayes is an outstanding woman of our time.

Thank you.●

LET US TAKE A VOTE: STUDENT EDITORIAL

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. PURSELL. Mr. Speaker, I would like to take this opportunity to read into the CONGRESSIONAL RECORD an editorial by 16-year-old Dane Peterson of Jackson, Mich. Dane's editorial, which appeared last month in the Lumen Christi High School paper, the Titan Times, reminds all of us that we do have more than just a responsibility to vote. I find it refreshing to see that someone so young is already ac-

tively looking for more ways to get his fellow students involved in such an important democratic practice. I proudly present the following editorial to the CONGRESSIONAL RECORD as a tribute to Dane and his fellow students:

The article follows:

LET'S TAKE A VOTE

(By Dane Peterson)

Is voting a moral obligation?

I believe it is. My own interest in politics comes from a heritage handed down in my family. This heritage states that one cannot be a good Christian without being a good citizen. In order to be a good citizen, one must take an active role in the political picture with it being a responsibility to be informed on the issues and the candidates.

Main reason why it is so important is that the government touches the lives of all people and since God has put us in a social structure, in order to be responsible for others and to help others we must do as much as possible to make the government responsive to all people. We can do this by voting and by helping others in any way we can to become more and better informed.

An old proverb says "as the twig bends, so grows the tree." Which means people do as adults what they practice as young people.

We may be a part of the generation who is shying away from our moral obligation of voting. In the recent Homecoming King and Queen election, of the 1,083 students at Lumen Christi only 387 voted, or 36 percent. Voting statistics are based on voting records kept by Student Council.

Senior class led the voting with 56 percent. This is to be expected because they had the privilege of voting for their peers.

One of the problems with not having an underclassman court for Homecoming is that the underclassmen have little interest in the election of the king and queen. One way to get these students involved in the election and voting procedure would be to have an underclassman court involved in the Homecoming festivities.

Many of the reasons students gave for not voting were that it didn't make a difference in their lives, they forgot or they thought of the election as just a popularity contest.

Another aspect of the lack of involvement of the students can be found in the low level of enthusiasm at the Pep Rally and nonparticipation during Titan Week.

Now we don't pretend to have all the answers to these problems. Perhaps a letter to the editor or a suggestion column might be in order. Let us know what you are thinking.

If our experiences at Lumen Christi are to do a complete job of preparing us for the future, we must be more in tune with our world.●

ROBERT BOUCHARD—DEDICATED PUBLIC SERVANT

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. PANETTA. Mr. Speaker, I would like to take this opportunity to pay tribute to Robert Bouchard, who is retiring from his post as San Benito County Superintendent of Schools after long and distinguished service in the field of education.

A graduate of Boston University and the University of Arizona, Mr. Bouchard has devoted his entire career to education. He spent many years as a teacher of music, and his perspective was further broadened by his activities as music supervisor and general consultant for the San Benito County Office of Education and as an officer in various State organizations dealing with teaching, education, administration, and curriculum development.

This unique and varied experience enabled Mr. Bouchard to establish an impressive record as county superintendent of schools. His accomplishments in that post have ranged from the construction of elementary school buildings and a community center, to the modernization of administration techniques in the county office of education, to the institution of a mobile library and a county-wide drug abuse prevention program. The dedication, imagination, and competence Mr. Bouchard has brought to his job will be missed not only by the students, parents, teachers, and residents of San Benito County, but also by those of us at all levels of government who have enjoyed the privilege of working with him.

Mr. Speaker, Robert Bouchard exemplifies the finest traditions of public service. I would like to extend my congratulations on his retirement, and wish him success in all his future endeavors.●

DAIRY SUPPLY MANAGEMENT ENDORSED

HON. STEVE GUNDERSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. GUNDERSON. Mr. Speaker, beginning today, dairy farmers across the United States will receive 50 cents less for every 100 pounds of milk they produce as the most recent solution to the problems of dairy overproduction is implemented.

The solution will not work.

It will only serve to make difficult economic times for most family dairy farmers even more difficult, forcing some out of business.

Many of us, in the last 2 years, have repeatedly said that the dairy problems would not be solved by simply lowering the support price farmers receive. Facts now prove our predictions true. Production has been increasing instead.

The assessment that goes into effect today is just another example of that same ineffective approach. Even the Department of Agriculture now admits the inability of the 50 cents assessment to address the real problem.

With this in mind, I have introduced legislation that would repeal the assessment and maintain the dairy price support level at $13.10 per 100 pounds of milk for the current fiscal year.

It then becomes our responsibility as Members of Congress to work with dairy farmers, the dairy industry, and the Department of Agriculture to unite our efforts in seeking a real solution to the dairy overproduction problems.

Last April I introduced the Milk Marketing Improvement Act which was designed to eliminate the overproduction problems and reduce the cost to the taxpayers while still providing dairy farmers with an adequate price for their product. Although the plan was not approved by Congress, the supply management-base concept embodied in the plan won the approval of many dairy farmers and dairy organizations and still remains the most workable solution today.

In the coming weeks we will work with those concerned about the dairy problems in an effort to achieve a solution that is agreeable to all.

In my home State of Wisconsin that willingness to work together to solve the problem already exists as is reflected in the following editorials from the La Crosse Tribune, the Wisconsin State Journal, and the Capital Times of Madison, and WEAQ and WIAL Radio of Eau Claire:

[From the La Crosse Tribune, Nov. 30, 1982]

DAIRY PLAN MAY GET A COMEBACK

Congressman Steve Gunderson plans once again to take on the prevailing wisdom (such as it is) on dairy prices and production.

We wish him luck.

The first time Gunderson tried to change the administration's misguided dairy policy was with the introduction of a bill to encourage farmers to produce only at 90 percent of their capacity.

In exchange for that moderation, Gunderson's bill would have offered a better price support. Anyone going over 90 percent of capacity would get a lower price support. Overseeing all of this would be a National Dairy Board, made up of appointed farmers, processors, consumers and the secretary of agriculture.

But it was not to be. Gunderson's "Milk Marketing Improvement Act of 1982" was killed in committee. It may yet rise again.

Gunderson now plans to re-introduce the bill next session. In addition, he will sponsor, during the upcoming lame-duck session of Congress, a measure to eliminate the administration's controversial 50-cent tax for every hundred pounds of milk a farmer produces.

Farmers have objected strenuously to the tax, because it would effectively lower the price a farmer would get for milk. And, as Gunderson's staff members argue, every time a farmer gets a lower price he will try to produce more.

In one news story earlier this year a farm wife said she and her husband planned to milk anything that could limp into their barn. Any why not? Farm incomes are hardly grand, and anything that threatens to lower prices will be countered by in-

creases in productivity—in the attempt to keep the income up.

This is a natural economic response—a free-market response, really—that the free-market Reaganites choose to ignore in their dairy policies. By concentrating on what they say is an overly generous support price, Reagan administration officials totally ignore the basic structural problem of overproduction.

Gunderson's National Dairy Board may strike some as being a New Deal-style government intrusion into the marketplace. And it very clearly would introduce another degree of centralized planning to the farm economy—a factor that is only as good as those doing the planning.

But as problematic as central planning may be, there is ample reason to suspect that the current policies will be more harmful. They will hurt farmers by lowering their income and they will contribute to the long-term problems by encouraging the buildup of huge dairy surpluses.

The dairy board idea is clearly the better approach.

[From the Wisconsin State Journal, Nov. 19, 1982]

MILK PLAN SOURS

It's time for Wisconsin dairy farmers and the state's congressional delegation to dust off a plan introduced in Congress earlier this year by Rep. Steve Gunderson, R-Wis.

That plan, authored by Gunderson and Professor Robert Cropp, an agricultural economist at UW-Platteville, calls for price incentives for farmers who cut production during times of dairy surpluses and penalties for those who don't.

Gunderson introduced the plan in Congress last April, but it went nowhere. Instead, Congress voted to assess farmers 50 cents on each 100 pounds of milk they market.

The assessment goes into effect Dec. 1 and may be followed by a second 50-cent assessment on April 1. Wisconsin is expected to be hit harder than other states, with the assessments taking $200 million from the state economy.

Dairy farmers contend the assessment will force them to increase milk production, not decrease it, to pay their bills.

Clearly something must be done to reduce the taxpayers' $2.2 billion yearly expense of buying and storing dairy surpluses.

Part of the solution is more sophisticated marketing and promotion to increase domestic dairy sales. A trade program also should be developed for dairy exports.

The other essential is to decrease production. The 50-cent assessment is a punitive attempt that could backfire.

A worthy proposal being advanced within the National Milk Producers Federation is to ask Congress during its lame-duck session to provide that all assessments be returned to farmers who decrease milk production. That plan takes the incentive approach, and may be all that's immediately achievable.

The Gunderson-Cropp plan is more comprehensive; it can quickly get milk supply and demand into balance and allow a dairy farmer to use his resources most efficiently. It also would reduce support-program costs for taxpayers.

The dairy industry and Wisconsin's other congressmen should join Gunderson in an effort to have the next Congress give serious consideration to the plan.

[From the Capitol Times]

"MILK TAX" A BAD DEAL

Unless John Block suffers an attack of good sense before Dec. 1, the secretary of agriculture on that date will begin assessing dairy farmers 50 cents for every 100 pounds of milk they produce. The plan is designed to cover the costs of a ballooning dairy surplus and discourage the overproduction that caused the surplus.

Washington should forget about the "milk tax" because it will do more harm than good.

Dairy economists estimate the milk tax will cost the average Wisconsin dairy farm family $2,500 a year. Statewide, Wisconsin stands to lose $113 million. No wonder that Gov.-Elect Anthony Earl has commendably lent his voice to the cry against this plan.

There is no doubt but that dairying has an overproduction problem that needs to be resolved. The problem is costing the government a record $2 billion a year. But the milk tax will be difficult to administer and will not get at overproducion.

University of Wisconsin-Extension dairy economists Truman Graf and Robert Cropp predict that dairy farmers will actually add cows to their herds in order to make up for lost income and to recover fixed operating costs.

The 50-cent reduction will not lower consumer prices, because the dairy plants that handle the surplus milk will continue to be paid the standard government support price.

A better measure would be a simple reduction in the support price itself. Although that would also reduce farm income it would lower consumer prices and thereby stimulate more expenditures for dairy products.

Better yet is the kind of supply-management program proposed by U.S. Rep. Steve Gunderson and others—one that rewards the farmers who reduce their production and penalizes those who do not.

The government already has such a program in place for corn growers, providing a direct payment to farmers who take 20 percent of their acreage out of production. Let's do the same thing for dairying.

[From WEAQ and WIAL Radio, Nov. 24, 1982]

Wisconsin dairy farmers are being given a raw deal by Congress. Unless there is a last-minute change of heart, the federal lawmakers will begin assessing farmers fifty cents on each one hundred pounds of milk they put into the market. This is supposed to curtail production and reduce the mounting surplus of dairy products in the country. But many farmers argue that it will do just the opposite. They'll have to increase production to pay the assessment.

Instead of an incentive to cut back on the amount of milk they produce, farmers have to sell more and that means more dairy products will be added to the already huge stockpile being subsidized by the taxpayers.

Earlier this year, third district congressman, Steve Gunderson, had proposed a plan which would have given farmers who voluntarily cut back on production, a better price for their products.

And it would penalize farmers who don't reduce production. Professor Robert Cropp, who is an agricultural economist at the UW-Platteville helped Gunderson develop the plan. He believes once such a system is in place, it will prevent the roller coaster like rise and fall in milk prices.

Of course, there is no simple solution to the dairy surplus problem. Government subsidies, well intended or not, have prevented dairy farmers from achieving a balance between demand and supply for dairy products. We think Gunderson's plan will get the job done.

So far, there aren't enough people in Congress who agree with us. And, until there are, dairy product surpluses will continue to pile up in warehouses all over the country.●

TOM RAILSBACK—A VOTE FOR REASON

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. O'BRIEN. Mr. Speaker, TOM RAILSBACK has been a voice for reason and moderation throughout his 16 years in the Congress.

He was a respected young lawyer in his hometown of Moline when first elected to the Illinois General Assembly in 1962 and to Congress in 1966.

His service on the Judiciary Committee and as ranking Republican on its Subcommittee on Courts, Civil Liberties, and the Administration of Justice have been exemplary.

During the trying days of 1974, when the Judiciary Committee's impeachment proceedings were carried on television, the entire Nation was impressed by TOM RAILSBACK's deep sincerity and probing mind.

His Republican colleagues in the Illinois delegation so admired TOM that we made him our chairman. I consider him one of my closest friends in the House. I have benefited many times by his wiser counsel and look forward to continuing our friendship as he begins his new career with the Motion Picture Association of America.●

SEAGA SAYS JAMAICA ON "ROAD TO RECOVERY"

HON. THOMAS B. EVANS, JR.

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. EVANS of Delaware. Mr. Speaker, early last month, the Washington Times published an important interview with Jamaica's Prime Minister Edward Seaga. Prime Minister Seaga's election in 1980 marked a vital turning point for the country of Jamaica, a country that is of extreme strategic importance to our own United States. Because I feel that this interview gives a good indication of the many critical economic, social, and cultural reforms undertaken by Prime Minister Seaga, I respectfully submit it for the RECORD.

[From the Washington Times, Nov. 9, 1982]

SEAGA SAYS JAMAICA ON "ROAD TO RECOVERY"

INTERVIEW—JAMAICAN PRIME MINISTER EDWARD SEAGA ON THE CARIBBEAN'S ECONOMY AND POLITICS

Edward Phillip George Seaga became prime minister of Jamaica on Oct. 30, 1980, when the Jamaica Labor Party, which he has led since 1974, won a landslide election victory over the People's National Party and Prime Minister Michael Manley. The election was hailed as a turn away from socialism and close ties with Cuba's Fidel Castro and toward free enterprise and the United States.

Since assuming office, Seaga, 52, has worked to revitalize the depressed Jamaican economy. By securing loans, opening new trade avenues and initiating training and employment programs, he has managed to turn the corner on what has been described as the world's second-worst economy.

Seaga has been one of Jamaica's pioneers in economic, social and cultural reform. He has made "Change Without Chaos" the motto of his 21-year political vocation. An outstanding example of this creed is his work in transforming a Kingston slum known as "Back-O-Wall" into a vibrant community called "Tivoli Gardens," a model of total development planning.

While in Washington recently for an address at Howard University, Seaga visited with a group of senior editors at The Washington Times. Following is an edited transcript of that interview.

Q: Prime Minister, why are you in Washington? What brings you here?

A: Principally, I came to deliver the Mordecai Johnson Memorial address at Howard University. But, having come for that purpose, I'm also taking advantage of the visit to wrap up some specials with the World Bank on our structural adjustment on the Jamaican economy. I've had the opportunity to see OPIC (Overseas Private Investment Corp.) and run through a number of programs with them.

Q: You've been in office now almost two years. At this juncture, what has pleased you and what has disappointed you in the way things have gone in Jamaica?

A: Well, I'll start with the disappointment. It's really one disappointment and that is the mining sector. It so happens to be the major foreign exchange earner, and therefore it hurts whenever that sector is weak.

Insofar as the recovery program goes, because that's the essential focus of attention, this year is a continuation of last year. There will be further growth. There will be a further surplus on the balance of payments account, which will be a further reduction in unemployment. It's been marginal, but, you know, if you take off one point per annum and you end up taking off five points, you have done something that no other government has ever done in the history of the country.

We have just introduced a new institution which is far-reaching in the extent to which it can pioneer in development strategy. It is aimed, in part, at investment in the informal sector by doing two things, both through training: training for employment and training for self-employment.

Trainging for employment—by converting, over five years, some 90,000 unskilled people, mostly to low-level skills which our projections for the economy show we will require—and training for self-employment because in the rural areas there isn't much employment because there aren't many employers, Everybody's his own employer. So we have to open new avenues and opportunities, and it's a very creative exercise in trying to find the things that you can do that isn't what your father has been doing for decades and others made a living at.

Q: What about tourism, sir? How did your "Come Back to Jamaica" program work for you?

A: Tourism has gone up by 20 percent. This year it will probably repeat and probably do a bit better, but it's on target in terms of a 60 percent growth over three years.

Q: Where will that put you compared with pre-Manley levels?

A: We have now just about exceeded the best year ever. We are now back to our previous best. When we set the target for 20 percent per annum for three years, we did it against a background of a number of uncertainties. It's a very delicate and fragile thing, and coming out of the problems that we had over the last few years any little thing could have triggered a bad reaction.

Fortunately, we've had real stability. Levels of violent crime are down to what you just find in ordinary circumstances, anywhere. The country is really concentrating on the future, and individuals on their own personal problems and making their own headway.

So we've had the right climate and we've had a very good marketing program through the ads, and the combination of that, plus the old PRing of Jamaica in the United States, which was helped by my being invited as the first official head of government to visit with the president. He has mentioned Jamaica several times in speeches, and we have really excellent press here.

Q: What is your level of unemployment right now?

A: It is now 25 percent. When we took over it was 27 percent. As I was indicating, we were targeted by the traditional strategy to drop it one point per annum, which would be unprecedented.

Q: Are those statistics meaningful? You have had a lot of underemployment also. Chaps are selling matches and pieces of soap.

A: Well that happens in all economies of that sort, so we have to compare like with like, so however it has been done over the years, we couldn't deviate from that now. But this new program that I am telling you about, by penetrating the informal economy, is expected at low investment cost—because these are low investment deals—to drop it another point per annum. If that works over five years, we will have reduced unemployment by 10 points, where, I can assure you, when we have an unemployment rate of 15 percent, means that as far as adult males are concerned you have no unemployment. Such unemployment as you have would be among females and some youth. We haven't seen that rate since the '50s, so that would be an achievement.

Q: Where are we now on the Caribbean Basin Initiative? I have the feeling it has run out of gas a little bit politically.

A: Well, if I may say so, the tendency here is when something hits the front burner it's everything. Right now it's Tylenon. CBI is on a back burner. That doesn't mean it won't get on the front burner. It's the major foreign policy thrust of a positive and constructive basis of the whole U.S. government. They can't afford to let it lie on the back burner. I think a critical thing is that it should be passed by this Congress because if it's not, then it turns over to the new Congress, then we have to start again. Now the kind of work that we have to do in terms of lobbying, in terms of helping to frame much of the thoughts that went into working with the administration and with the people who put the packages together, it's really something I don't think we can duplicate again.

Q: Early on President Reagan decided to make Jamaica the showcase of our Caribbean policy, but the world has changed a great deal. Now, we have problems in Mexico and so forth, and other priorities have intruded themselves. Do you think President Reagan remains as devoted personally to the notion as . . .

A: I think he remains as personally devoted to the situation. I would think that is all the more reason Jamaica has to be that showcase. Over the last 10 years, Jamaica had the world's second-worst economy. That's where we are coming from. Now if we can come from there, and in one year turn it around and in years two and three take off in the sense of moving in a forward direction with continuing growth and all indicators pointing in the right direction, this is what causes you to take heart again against the background of Mexico and the others that are collapsing.

We virtually had a civil war. We had eight years of negative growth. We lost all our reserves, they were wiped out, replaced by a mountain of debt. We saw unemployment soar by 50 percent. We saw standards of living fall by 57 percent. We had eight successive devaluations during that period of time. We went through all that and in one year we've turned around and have prospects for continuing that, so that's all the more reason that we need to be made that example, or we need to be given a chance to be that example.

Q: How do you feel about Castro's current position in the Caribbean? Is it stronger now than it was a year ago or weaker?

A: Castro has been weaker ever since the Jamaican elections. He became weaker yet after we severed diplomatic relations. The Carribbean is not responding to the Castro hype, not anymore, with the exception of Grenada, which is very firmly committed to that model, and which has the good fortune of getting assistance from both East and West, and therefore is being put in a position where it will show more advance and development than its small sister islands, who are only getting a measure of assistance from the West.

Q: Do you regard Michael Manley as an agent of Castro?

A: There's no question in my mind that Manley's position, both in terms of the ideological direction he was moving in and the very personal relations that he had struck up with Castro, that, whether he wants to consider himself or not, he was acting as an agent for Castro. Because, it was not just a matter of adopting ideology, or personal friendship, but Jamaica's presentation of Castro's Cuba was as one-sided as you would get in Cuba.

Q: I was going to ask about the Law of the Sea treaty and Jamaica's feelings about that.

A: Well, we're very unhappy that the U.S. administration has not gone along with the formulation on the law of the sea. We ourselves do not understand how the U.S. can benefit from staying out of an international jurisdiction. It would seem to me that the U.S. may very well be excluding itself from the benefits of a regulated use of the sea. There are far more than enough countries

who have already signified their intention to ratify it, to bring it into force. So, I have a feeling that U.S. strategy is going to change, because I don't see an alternative. I don't see a viable alternative.●

PAUL FINDLEY—MAN OF PRINCIPLE

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. O'BRIEN. Mr. Speaker, PAUL FINDLEY has demonstrated by his work that political courage is alive in the 20th century.

Years before anyone thought it was a good idea PAUL FINDLEY called for the normalization of relations with the People's Republic of China. He was roundly criticized * * * and then vindicated.

On numerous other occasions PAUL has had the courage to come out and say the unpopular, and not flinch in the ensuing crossfire.

This dedication to principle over politics makes PAUL FINDLEY a unique public servant, indeed, a unique person.

In our pursuit of good public policy we need to hear the unpopular, the out of step, the inconvenient. That is why PAUL FINDLEY is needed in Congress, and that is why he will be missed by all of his colleagues.●

PRIVATE PENSION PLANS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. HAMILTON. Mr. Speaker, I would like to submit my Washington Report for Wednesday, December 1, 1982, for inclusion in the CONGRESSIONAL RECORD:

PRIVATE PENSION PLANS

Public attention today is focused on the ill health of social security, but I am impressed by the growing interest in the condition of private pension plans. Many Hoosiers are worried about their retirement and the soundness of these plans.

In 1974, Congress decided to insure the kind of pension on which most workers rely—the "defined-benefit" pension under which a company promises an employee a retirement income based on both pay and years of service. The "defined-contribution" pension—which gives the retiree an income much like that from a savings account—is not insured since it is, by definition, fully funded. The Pension Benefit Guaranty Corporation (PBGC), a federal agency, now insures the pensions of 36.3 million workers in 92,000 plans. The PBGC is backed by corporate premiums—$2.60 per insured pension plan participant per year—and has an unused $100-million line of federal credit.

The PBGC insures pensions much the same way the Federal Deposit Insurance Corporation insures bank accounts. If a pension plan is terminated for any reason without sufficient assets to cover vested benefits, the PBGC takes over corporate assets totaling up to 30% of the company's net worth and uses those assets and the premiums it collects from other companies to pay the pensions. The maximum payment to a retiree is $1,380 per month, a sum which is annually adjusted for inflation. As things now stand, the PBGC is protecting 71,200 workers and retirees in 659 failed plans. It is paying the retirees $62.3 million per year. Were it not for the PBGC, these workers and retirees might have nothing.

But the PBGC and the private pension system it insures have many problems. Slow economic growth and general business distress have boosted claims against the PBGC by 250% since 1977. It has picked up 130 failed plans in the last eleven months, and it must consider its $3.1-billion liability in the 30 major plans it thinks are candidates for early termination. The sudden termination of two or three very large plans could overwhelm the PBGC and require the intervention of Congress. A second problem is the widespread dissatisfaction with the PBGC among companies whose plans are healthy. It arises in part because premiums are not related to risks. They are the same for all companies no matter how well or poorly their plans are funded. Moreover, abuses are cropping up more often. Businesses with low net worth and high pension liability are ending their plans because current law gives them an incentive to do so. Others are getting rid of subsidiaries with burdensome pension liabilities.

Companies have reacted to these problems in understandable ways. When they consider the needs of their retiring employees, more of them think of defined-contribution plans such as stock option plans, profit-sharing plans, and money purchase plans. Only 29% of the plans introduced last year were defined-benefit. The trend is toward the defined-contribution plan because it reduces costs, solves the problem of unfunded liability, increases the portability of pensions, and puts workers' funds beyond the reach of the employers' creditors. A drawback is that workers bear the risk that their investments will perform poorly.

The long-term health of a plan depends in part on the assets a company sets aside to cover its pension liability. Those assets earn interest which pays benefits far into the future. Thus, an accurate assumption about what interest rates will be is extraordinarily important, yet it is very hard to make when interest rates fluctuate as much as they have recently. Fluctuating interest rates also open up opportunities for abuse. A company can make a sick plan appear healthy by making an optimistic assumption about interest rates.

The other essential ingredient in the long-term health of a plan is an accurate projection of pension liability. This involves calculations about the changing character of the work force. For example, older workers may mean higher pension costs if businesses offer them early retirement to free up positions for younger workers. On the other hand, older workers may mean lower pension costs if they work beyond age 65. Future change in the social security system must be taken into account because nearly 30% of pension plan participants are in plans which are integrated in some way with social security benefits. Pensions would have to be more generous to make up for a cut in the rate of growth of benefits.

The problems of estimating interest rates and penson liabilities are ones which Congress cannot do much to solve. However, Congress should take steps now to help meet the worst of the short-term problems. One step would be a general increase in the corporate premium paid by companies with plans. Such an increase would be quite unpopular, but it may be necessary. Another step would be enactment of a risk-related premium designed to force companies with poorly funded plans to pay more than companies with well funded plans. The chance that such a premium might cause some companies to terminate their plans could be minimized by phasing the new premium in over a period of time. Also needed is reform of the provision giving companies with low net worth and high pension liability an incentive to terminate their plans. Instead of permitting them to terminate by surrendering 30 % of their net worth, the PBGC might require that all pension liability be covered; it would pick up a plan only when the company was in liquidation. Yet another reform would demand that companies which got rid of plans by selling or spinning off subsidiaries be held potentially liable for the plans for 15 years.

I am impressed by the rising number of workers who expect to receive pensions from their employers. However, the complexity and variety of pension plans are causing great confusion among workers. Workers have to understand the benefits and risks of their plans and begin planning for retirement early. The choices that they make today will determine what resources are available to them 20 or 30 years from now. Also, workers should know that many employers, especially small ones, are terminating pension plans and are leaving their workers dependent on social security and personal savings for their retirement.●

THE TRUTH WILL WIN OUT

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. DYMALLY. Mr. Speaker, on November 18, 1982, the Associated Press—California—ran a story which I thought might be of interest to the Members of Congress.

The story can be called a case of misuse of media power, or the abuse of the justice system.

The printed article and letter attached are only part of the story; the other part is also interesting.

During the course of my 1978 campaign for reelection as Lieutenant Governor, State of California, I was accused by my opposition as "a criminal who was going to be indicted." As the attached letter and article explain, this false information was leaked to Bill Stout of KNXT-CBS-TV by Deputy Attorney General Michael Franchetti.

The then Attorney General Evelle Younger, Republican candidate for Governor, also predicted that a prominent elected constitutional officer was going to be indicted. When questioned by the editors of the San Diego Union, the attorney general identified that

constitutional officer as me. What was interesting about that statement is the fact that the same attorney general was saying privately to one of his colleagues—a former deputy district attorney and superior court judge—that he had no information of a criminal nature about me.

The upshot of these political accusations was to lead the U.S. Department of Justice and the FBI into an intensive and damaging investigation of me from August 1978 to January 1980 which led to my defeat, only to discover that I was innocent of any wrongdoing.

It should be noted that this episode was not without the involvement of Los Angeles Times Reporter Robert Fairbanks, who sought information about a false rumor from his source in the attorney general's office—Kenneth O'Farrell.

Mr. Franchetti, not satisfied with leaking wrong and damaging information about me, then ordered a raid on my lawyer's office for my files. When no information was forthcoming, he, with the approval of the new Republican Attorney General George Deukmejian, ordered the convening of a grand jury in San Diego County to have me indicted on false charges of accepting a bribe. So ridiculous were the charges that the grand jury refused to act.

To make the matter more comical, his Deputy Attorney General John H. Gordinier, who conducted the grand jury investigation, then volunteered to the San Diego media that I was never a target of his investigation.

Mr. Speaker, it has taken Mr. Hugh Pike 4 years, with full time counsel, to receive an apology from Mr. Franchetti. It took KNXT-CBS-TV 2½ years to apologize to Mr. Pike.

In my case no such apology was forthcoming. After 3 years, KNXT-CBS-TV finally agreed to give me 1-minute rebuttal time after I pointed out to the FCC that the wife of the commentator, Bill Stout, who aired the false charges, was an employee of the attorney general gubernatorial campaign committee, which was responsible also for the leak through Sheldon Lytton, also of the attorney general's office.

Mr. Franchetti's detailed, two-page apology, dated November 4, 1982, was sent to Mr. Pike 2 days after Mr. Franchetti's boss, Attorney General George Deukmejian was elected Governor of California—letter attached.

For this miscarriage of justice, Mr. Michael Franchetti has been rewarded with the highest appointive post in California—the director of finance—by his old and now new boss Governor-elect George Deukmejian.

Mr. Speaker, I bring this matter to the Members' attention to show how vulnerable and defenseless elected officials are to false and damaging charges by the media and unscrupulous law enforcement officials.

Fortunately for me, Mr. Hugh Pike was blessed with the financial resources to retain full time counsel to expose this injustice.

I trust this statement and the attached article and letter will help to put an end to the abuse of power by those who hold responsible positions in the media and the criminal justice system.

STATE OF CALIFORNIA,
DEPARTMENT OF JUSTICE,
Los Angeles, Calif., November 4, 1982.

HUGH G. PIKE,
Sherman Oaks, Calif.

DEAR MR. PIKE: In 1978, during former Attorney General Evelle Younger's last year in office, the department was involved in an investigation into possible instances of political corruption in California. In the course of that effort, a number of investigators in the department accumulated many evidentiary leads, intermingled with unverified rumors. As is customary, the resulting written memoranda became part of the permanent confidential files of the department.

On October 5, 1978, Special Agent Kenneth O'Farrell had an informal conversation with Robert Fairbanks, a Los Angeles Times reporter in Sacramento, who conveyed to O'Farrell a rumor that you and former Lieutenant Governor Mervyn Dymally were about to be indicted by a Federal grand jury. O'Farrell prepared a routine memorandum of that information. In the ordinary course of my duties I was present at a meeting at which that memorandum was discussed.

At that time Mr. Younger was a candidate for Governor, and his campaign organization employed Mr. Sheldon Lytton, who had previously been a special assistant to Mr. Younger in the department. I understood at the time that Mr. Younger needed to be kept abreast of developments within the department and that he used Mr. Lytton as a liaison for that purpose. In response to a routine inquiry from Mr. Lytton of his character, I told him of the rumor our investigator had received and the resulting memorandum.

Subsequent to my conservation with Mr. Lytton, Mr. Lytton contacted me and told me that Bill Stout of KNXT-TV, Los Angeles, had broadcast a news story stating that there was a State Department of Justice report which stated that you and others were about to be indicted by a federal grand jury. Mr. Lytton stated that Mr. Stout had indicated a desire to actually review the memorandum, and inquired as to whether or not I could obtain and forward to Mr. Lytton a copy of the memorandum. I was able to obtain a copy of the memorandum and did give it to Mr. Lytton. It now appears that the memorandum should not have been made available to Mr. Lytton.

With the single exception of the Fairbanks' rumor, this department has never possessed any information alleging criminal wrongdoing on your part. Furthermore, the department to my knowledge has never had any other information that you were a target of any federal, state or local criminal investigation. The passage of more than three years is a strong indication that the originator of the rumor acted out of misinformation.

Following an internal inquiry, Mr. Younger took steps to prevent the recurrence of unauthorized "leakage" of confidential department documents. When he succeeded to the office of Attorney General, Mr. Deukmejian reaffirmed and strengthened these salutary precautions. You may be interested to know that the O'Farrell memorandum of October 5, 1978, now bears the notation that it is not to be examined or circulated in whole or part, inside or outside the department, without the written approval of the Attorney General. A copy of this letter has been attached to that memorandum.

Permit me to express my sincere regret over this matter, and allow me to apologize on behalf of myself and my colleagues who were involved in it for any harm which may have been caused by our conduct.

Sincerely yours,

MICHAEL FRANCHETTI,
Chief Deputy Attorney General.

[From the Torrance (Calif). Daily Breeze, Nov. 18, 1982]

DEUKMEJIAN AIDE ADMITS LEAKING CONFIDENTIAL DOCUMENT ON DYMALLY

LOS ANGELES.—The man Gov.-elect George Deukmejian has selected as state finance director, Michael Franchetti, has admitted leaking a confidential state document in 1978 containing a false rumor that Lt. Gov. Mervyn Dymally was about to be indicted.

The document—which said on its face that it was based only on a rumor—had earlier been the subject of a Los Angeles television news broadcast predicting, a month before the 1978 election, that Dymally would be indicted.

Franchetti, who has been chief deputy attorney general under Deukmejian since 1979, disclosed his actions in a letter of apology to a former Dymally campaign aide, made public Wednesday.

In his letter, Franchetti stated his "sincere regret" for the leak and said he had been wrong to provide a copy of the document to one of Attorney General Evelle Younger's campaign aides, who gave it to a televison reporter. He also said the office never had any evidence of wrongdoing by Dymally or his 1974 finance chairman, Hugh Pike.

In return for the apology, Franchetti was dismissed as a defendant in a libel suit by Pike, who was also described in the leaked document as facing indictment by a federal grand jury. No indictments were ever issued.

Calls to Deukmejian's office were returned by the attorney general's press secretary, Tony Cimarusti, who issued this statement for Deukmejian: "The case is settled and the matter was dismissed, and there isn't any further comment from this office."

But Pike said Wednesday that he wouldn't have agreed to drop Franchetti as a defendant had he known Deukmejian would appoint Franchetti on Nov. 4 as finance director, one of the most powerful positions in state government.

"The people of this state sought to know about the character of the man who was appointed to this job, taking private confidential documents and leaking them to the press for purely political gain," Pike, a Los Angeles businessman, said in an interview.

Franchetti's letter was dated Nov. 4, but Pike said the settlement was reached in August. He didn't explain the delay.

But the Los Angeles Times, quoting unnamed sources, said the letter was delayed so as not to embarrass Deukmejian before the Nov. 2 election, in which he defeated Los Angeles Mayor Tom Bradley.

Publicity about Dymally's supposed legal troubles apparently contributed to his

defeat in 1978 by Republican Mike Curb. Curb predicted shortly before the election that Dymally would be indicted and also said Dymally was guilty of "criminal offenses."

Curb said he based his information in part on a broadcast by Bill Stout, the Los Angeles television reporter who later was the recipient of the document Franchetti leaked.

The principal characters in the 1978 episode were Franchetti, then a legislative assistant to Younger, and Sheldon Lytton, who had left the Attorney General's Office to work in Younger's campaign for governor and later served briefly as Curb's chief of staff.

According to Franchetti's letter, about a month before the November 1978 election, Los Angeles Times reporter Robert Fairbanks called Kenneth O'Farrell, an investigator in Younger's Justice Department, and asked if he had heard a rumor that Dymally and Pike were about to be indicted over a business transaction.

O'Farrell said he hadn't heard of it but made a confidential memorandum about it, in which Fairbanks was described only as a "news source."

Pike's lawyer, Steven Smith, said the memo "said on its face that it was pure rumor or low-grade rumor."

Franchetti said he heard about the memo at a meeting and told Lytton about it soon afterward, "in response to a routine inquiry." He said Lytton kept Younger abreast of developments in the Attorney General's Office during the campaign.

About that time, Stout said on a KNXT news broadcast that the Justice Department had a report predicting indictments of Dymally and Pike. Smith said he doesn't know where Stout got the erroneous information. Pike immediately demanded a retraction.

According to the letter, it was after the broadcast that Lytton asked Franchetti if he could get a copy of the memo to give to Stout.

"I was able to obtain a copy and give it to Mr. Lytton," Franchetti wrote. "It now appears that the memorandum should not have been made available to Mr. Lytton."

Pike said sworn statements given to his lawyer by Franchetti, Lytton and a department investigator describe how Franchetti asked for a copy of the document for his own use, and then mailed it in a personal envelope to Lytton's home.

Smith, Pike's lawyer, said that after the memo was sent, the CBS network refused to retract Stout's statements. But Stout issued an on-the-air apology several years later, and he and CBS were dropped as defendants in Pike's suit.

The remaining defendants are Lytton, Fairbanks and the *Times*.

Pike quoted Lytton as saying in his sworn statement that he called Franchetti after Stout's broadcast because "if, for example, Yvonne Burke became attorney general, I felt it was in our (his and Franchetti's) interest to have a copy of that document." He also said he needed it before the election.

Mrs. Burke, then a congresswoman, was defeated by Deukmejian for attorney general.

Franchetti said in his letter to Pike that "with the single exception of the Fairbanks rumor, this department has never possessed any information alleging criminal wrongdoing on your part."

"Furthermore, the department to my knowledge has never had any other information that you were a target of any federal, state or local criminal investigation. The passage of more than three years is a strong indication that the originator of the rumor acted out of misinformation."●

EXTEND LEGISLATION FOR OUR NATION'S HIGHWAYS

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. HUBBARD. Mr. Speaker, I received a letter on November 3 from a good friend of mine and fellow Kentuckian, Harry J. Davis, of Eaton Asphalt Paving Co., Inc., in Covington, Ky. Mr. Davis has written me an excellent letter in which he stresses the urgent need for the Congress to pass a 1-year extension of the highway trust fund and Federal-aid highway program. Indeed, I agree that we cannot allow an abrupt discontinuation of the Federal-aid highway program which will adversely affect the highway construction industry, one that is suffering from an extremely high unemployment rate of 20 percent. I believe my colleagues will be interested in Mr. Davis' comments. His letter follows:

EATON ASPHALT PAVING CO., INC.,
Covington, Ky., October 29, 1982.

Rep. CARROLL HUBBARD,
Rayburn House Office Building,
Washington, D.C.

DEAR CONGRESSMAN HUBBARD: Congress passed a highway bill on October 1, 1982 extending non-Interstate federal-aid highway programs for only 78 days, through December 17, and authorizing $3.225 billion in Interstate construction for the entire new fiscal year, which began on October 1. As soon as the President signs the bill into law, those funds will be apportioned among the states, and will be available for obligation along with $800 million in Interstate 4R funds apportioned previously.

As has been reported, this year it was necessary to extend the Highway Trust Fund as well as pass a one year extension of the Federal-aid Highway Program. The highway bill that Congress passed on October 1 did not contain a trust fund extension because the leadership of the House Public Works Committee refused to go along with the trust fund extension language developed by Ways and Means Committee Chairman Dan Rostenkowski, which would place the Highway Trust Fund in the Internal Revenue Code and would permit Ways and Means to review all future highway legislation before allowing trust fund monies to be released to support programs contained in the legislation.

With no extension of the Highway Trust Fund, the House and Senate Public Works Committees decided to go forward with a "shortened" bill in an effort to at least keep the Federal-aid Highway Program from grinding to a halt on October 1. The result was a bill providing approximately $5 billion in new contract authority with non-Interstate programs authorized only December 17.

We need your aid in seeing to it that Congress passes a simple one year extension of the Highway Trust Fund and Federal-aid Highway Program in the lame-duck session scheduled to begin on November 29.

The following points are pertinent:

One. The Federal-Aid Highway Act of 1982, passed by Congress on October 1, 1982, only extended non-Interstate Federal-aid Highway programs through Dec. 17.

Two. Unless Congress passes a simple one year extension of the Highway Trust Fund in the lame duck session, the only federal aid available after Dec. 17, 1982 for repairing our nations highways will be for the Interstate System. This is not fair to highway users who are paying dollars into the Highway Trust Fund and are conducting 80 percent of their travel off the Interstate System.

Three. An abrupt discontinuation of the Federal-aid Highway Program, which will occur without an extension of the Highway Trust Fund, will disastrously affect the highway construction industry, already suffering a 20 percent unemployment rate, more than twice the national average.

Four. The House Ways and Means and House Public Works and Transportation Committees must be urged to reach agreement on the Highway Trust Fund Extension.

We are all reading the constant flow of articles, editorials, etc., regarding the deteriorating condition of the nations roads and bridges, including the Interstate Highway System which was designed and built as a Defense Transportation Network. Our nation can ill afford to see this system disintegrate as have the railroads.

H.R. 5470 is now ready for a quick conference between Senate Finance Committee members and House Ways and Means Committee members, and final passage by both houses which has to take place in the 15 day lame-duck session.

Respectfully yours,

HARRY J. DAVIS,
Sales Manager.●

DANGEROUS MYTHS ABOUT NUCLEAR ARMS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. McDONALD. Mr. Speaker, in the debate over the so-called nuclear freeze, there are many myths circulating relative to nuclear war. They concern whether or not there is a parity in nuclear arms between the United States and the U.S.S.R.; whether we would really destroy each other in a nuclear war; whether stopping U.S. research and development on nuclear weapons would make the world safer; whether or not a nuclear war would make the planet Earth uninhabitable; whether or not a nuclear war would destroy the ozone layer over the Earth; and lastly, whether having a good civil defense system would help? As a scientist of renown, Dr. Edward Teller, the father of our H-bomb, and the author of this article, has destroyed each myth in a very concise manner. The article from the Reader's Digest of November 1982, follows:

DANGEROUS MYTHS ABOUT NUCLEAR ARMS

(By Edward Teller)

Educating people about the nature and actual perils of nuclear weapons would not be easy under any circumstances. It is almost impossible when elementary facts are guarded by strict regulations of secrecy. Given such conditions, dangerous myths develop and proliferate.

The reality of nuclear weapons is grim enough. Exaggerations about them are apt only to paralyze us. Some of the current myths have grown from misinterpreted scientific studies; others seem to be based on simple wishful thinking. They all have one common characteristic; so long as they are believed, they obstruct an accurate assessment of our problems and will prevent the development of workable plans to preserve peace.

Myth 1: The Soviet and American nuclear stockpiles are close to identical. A nuclear freeze would stop the arms race and offer improved mutual protection.

Neither the United States nor the Soviet Union publishes information on its current arsenals, and secrecy laws prevent me from discussing even the available estimates. There is, however, an officially released fact: between 1966 and 1981 the total megatonnage of the American nuclear arsenal was reduced to less than one-half its former size. The Soviet arsenal has rapidly increased in yield, accuracy and diversity during the same period and currently includes a total nuclear explosive power in excess of what the United States ever had.

The Soviets have built the most powerful single weapons ever constructed. Militarily such weapons have very limited value, but as a blackmail threat against free-world cities, they seem to be quite effective. Weapons of such immense size are the most likely to cause damage to the earth's ozone layer (which acts as a shield against lethal amounts of ultraviolet radiation) and lower the global temperature. A movement that says "freeze the current arsenals as they are" grants acceptability to these extraordinarily destructive Soviet weapons when they should be vigorously opposed.

By comparison with the Soviet Union, we have but a small fraction of the world's existing nuclear megatonnage. We do have sufficient power to create great damage, particularly to the Soviet industrial plant, if our retaliatory forces are safe from a first strike. They are not safe, however, and their deterrent effect has become doubtful.

Myth 2: Each nation has the power to destroy the other totally. Mutual destruction can most surely be avoided by disarming.

Our nuclear defense strategy, Mutually Assured Destruction, has the most appropriate acronym of MAD. The theory: if the Soviet Union and the United States have their urban populations at risk, then neither will attempt a first strike.

The Soviets have never agreed to the ideas on which MAD is based. The landmass of the U.S.S.R. is more than twice that of the United States; its urban concentration proportionately much lower. The Soviets' civil-defense planning may well enable them to lose fewer people in a nuclear conflict than the 20 million or more casualties they suffered in World War II.

Disarmament (as opposed to simple surrender) must be based on openness or trust. The extreme reticence of the Soviets to allow on-site inspections has been a continuing problem since 1958. Our basis for trust has not grown since. Recently declassified information offers an example of our problems. Since silos but not missiles can be counted by aerial surveillance, the SALT treaty limited silos. The obvious objective was to limit the number of deliverable missiles. The American silos are not reloadable. The Soviet silos are. This is not a breach of the treaty. American negotiators, neglecting the possibility that the Soviets might not have an equal urge to disarm, failed to insert an essential clause.

We have negotiated for 25 years, and the results are readily visible. Why would a totalitarian empire that depends on military force to maintain its power voluntarily disarm itself?

Myth 3: Stopping U.S. weapons research and development will help make the world safer from the destructive effects of nuclear weapons.

For more than 25 years the primary purpose of U.S. weapons laboratories has been to make nuclear weapons less indiscriminately destructive. Cleaner bombs (with less fallout), smaller, more military effective weapons, and neutron bombs useful for battlefield defense (with less civilian damage than that created by a conventional artillery barrage) are among the results.

Furthermore, extremely important research is being conducted on systems to defend against incoming nuclear missiles. For example, exploding a very small nuclear bomb near an attack missile as it enters the upper-to-middle atmosphere over our nation would have no effects on the ground and negligible effects on the atmosphere, but could totally disarm the incoming missile without detonating it. Such a system, used to protect our vulnerable missile silos, could be an important first step in improving both our current retaliatory position and directing our policy toward defense. The nuclear-freeze movement would end further work on what could be the best defense systems.

The Soviets have already deployed an antiballistic-missile system around Moscow. We have the right to deploy a similar system but have not done so. The Soviet-American antiballistic-missile treaty is now being reviewed. We should change our policy and emphasize defense rather than retaliation.

Myth 4: If a large number of nuclear weapons were exploded, fallout would pollute food and water supplies, making combatant countries uninhabitable. The spread of radioactive fallout throughout the world would end life on earth.

Fallout is part of many myths, and one of the common misunderstandings has to do with the durability and extent of its effects.

The radioactivity of fallout declines rapidly. For example, if 1000 rems per hour (a lethal dose) were released by a bomb, seven hours later the dose would be 100 rems per hour (far below lethal). In 49 hours radiation from this fallout would be reduced to 10 rems per hour. In 100 days the radiation would be 0.1 rems, comparable to the amount received from a chest X ray.

The amount of radioactivity produced by a bomb, contrary to myth, is finite. Radiation from fallout of the intensity described would be limited to the immediate vicinity of the explosion and the adjacent areas downwind. People in these areas could move to uncontaminated regions. (Decontamination is feasible if we prepare for it.)

Fallout in the vicinity of a nuclear explosion is a visible material, an ash. It can be wiped or washed off cans, wrappers, skin or any other surface. It can be easily filtered out of water. Food exposed to fallout is not harmed by the radiation. In fact, radiation is used commercially for food preservation. The only risk connected with food is if the fallout itself is eaten in the food or through some part of the food chain.

Skin contact with fallout is not necessarily fatal—depending on the intensity of the radiation and the precautions taken. Injuries can be reduced simply by washing off the ash. Through tragic miscalculation, 23 Japanese fisherman were covered with fallout from the multi-megaton test at Bikini Atoll in 1954. The fallout reached their boat three hours after the explosion and continued for an additional 4½ hours. They made no effort to brush or wash off the ash. All suffered skin lesions, most had appetite loss, some experienced nausea and vomiting. One died shortly afterward, and two others died 20 years later of liver disorders that may have been associated with the fallout. The rest have survived. Simple knowledge on how to deal with fallout would practically have eliminated the effects.

There would be numerous dreadful real consequences if a nuclear exchange occurred. Preventing war—in particular, nuclear war—is our single most important task. Should nuclear war occur in spite of every good effort, the number of people killed would be truly terrifying, but many more would survive. Perhaps this is the most frightening thing about our current myths: the misconceptions that exist currently would intensify the fear and suffering of survivors needlessly.

Myth 5: The explosion of nuclear weapons in the atmosphere will bring an end to life on this planet by damaging the ozone layer.

This new doomsday myth is gaining popularity. What we know today about the ozone layer suggests that if weapons larger than half-megaton bombs—such as only the Soviets possess—were exploded in the atmosphere, they would generate considerable amounts of nitrogen oxides at high altitudes. These oxides continue to destroy ozone over a protracted period. If the ozone were depleted, more ultraviolet radiation would reach the earth.

Assuming a worst-case scenario—a nuclear attack in which 5000 weapons, all of 1- to 20-megaton size, were exploded in the atmosphere—there would probably be a 50-percent decrease in the ozone layer over the Northern Hemisphere during the following year. (In the next few years, the ozone layer would return to about 80 percent of normal.) If this occurred, people would suffer rapid sunburn and a significant increase in skin cancer. Some ultraviolet-sensitive species could be extinguished, and some serious ecological changes might follow. However, our survival can be considered certain.

More detailed scientific information about the ozone layer is needed and should be gathered on an international basis. In the meantime, limiting the explosive power of all individual nuclear weapons to 400 kilotons would effectively eliminate the possibility of any significant damage to the ozone layer. Such a limitation should become an important part of disarmament talks.

Myth 6: Civil defense is without value in saving lives and may actually increase the risk of war.

This is perhaps the most dangerous myth of all.

Today some Soviet nuclear missiles may carry an explosive force a thousand times greater than the 15-kiloton Hiroshima bomb. However, while the vertical force of the explosive increases a thousand times,

the horizontal distance over which such bombs produce equal damage increases much more slowly. For example, a one-megaton bomb, while almost 70 times more powerful than the Hiroshima bomb, produces equal damage over only about four times the distance.

Few people realize the following facts about the effects of the Hiroshima and Nagasaki bombings. Earth-covered conventional bomb shelters practically under the airburst atomic bombs were essentailly undamaged even though blast and fire destroyed all other buildings in the area. In Nagasaki, people in caves survived one-third of a mile from ground zero. In Hiroshima, a well-built wood-frame house one mile away from ground zero was badly damaged but stood. The day after the blast, bridges were open to traffic; the second day, trains ran; the third day, streetcars were operating. The people of these cities were without any knowledge of how to protect themselves. Yet 1.6 to 3.1 miles from ground zero, 98 percent of the inhabitants—283,000 people—survived. Among this group in the past 33 years, about 500 more deaths from cancer have occurred than would be predicted in an unexposed similar group of people.

What about predictions of genetic damage? Detailed analyses have been made of about 35,000 children born to atomic-bomb survivors. So far no evidence of genetic damage has been found. This does not mean that none exists. However, genetic damage compared with the other horrors of nuclear war is practically negligible. Radiation during pregnancy—especially in the early stages—is very harmful to the fetus. More than one quarter of the infants born five to nine months after the bombing suffered from retarded growth, including mental retardation. About seven percent of those born in the four months following the bombing also suffered these defects. Yet the myth suggests that all fetuses tragically exposed by nuclear war will suffer developmental malformation. The actual effects of atomic weapons are ghastly enough. Exaggeration discourages reasonable measures to protect those most vulnerable.

Under Soviet civil-defense plans, nonessential city workers would be evacuated if the immediate danger of war (or intent for a Soviet first strike) arose. The evacuees would build crude but effective shelters in the countryside according to well-prepared instructions. (Tests of the Soviet shelter plans at Oak Ridge National Laboratory show them to be excellent). With optimum conditions, these plans would allow the Soviet Union to protect all but about 5 to 10 percent of its people from a full retaliatory strike. Well over 50 percent of the unprepared U.S. population would die, in a nuclear attack. This need not be so. Comparable civil-defense planning in the United States could save 100 million more lives.

War has always been more terrible than words can describe. Nuclear war would create immense suffering. Surely taking out some insurance against increased suffering is neither wasteful nor inhumane. We could accomplish so much for so little were we to spend only one percent of our defense budget on civil defense.

Planning the evacuation of urban residents and stockpiling food already owned by the government in the corresponding evacuation areas is a most important cheap insurance policy. Were the Soviets aware that the American people are able to survive an attack, they would be much less likely to take the risk of initiating a conflict. And can you really believe that civil defense will make the American people or our government more likely to risk nuclear war?

Our first step toward stability, toward improving the prospects for peace and for the security of all people, must be the replacement of myths with knowledge. Only then can we approach the best possible solutions. They will not be perfect. But they will offer the chance for improvement—of changing mutually assured destruction into a decent chance of survival, of maintaining sufficient military strength to coax Soviet leaders toward real détente. If our salvation is to be real, it must be based on fact, not fantasy.●

ED DERWINSKI—MY GOOD FRIEND

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 30, 1982

● Mr. O'BRIEN. Mr. Speaker, when I came to Congress 10 years ago ED DERWINSKI introduced me to his friends and offered his counsel any time I needed it. I availed myself of that offer many times and, over the years, we grew to be friends.

Fate then played a cruel trick on us. We were placed in the same district by reapportionment. Neither of us wanted the other to leave Congress, and neither of us wanted to leave ourselves. So with the greatest reluctance, we began a campaign against each other.

Now that campaign is well into the past. It is time to look ahead. In doing so, one must credit the Reagan administration for asking ED to come aboard with a high ranking job at the State Department. As Counselor he will influence foreign policy in a totally new way from that of his seat in the House. Also, his familiarity with the workings of Congress will be at the disposal of the Secretary.

No one is more disappointed than I that ED DERWINSKI must leave the House. But all of us can be thankful that his involvement in Government is long from over.●

INVESTIGATION AND PROSECUTION OF MURDERS IN EL SALVADOR

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Ms. OAKAR. Mr. Speaker, tomorrow is the second anniversary of the murders of the American missionaries Ita Ford, Jean Donovan, Dorothy Kazel, and Maura Clarke, in El Salvador. Two years have passed during which the families, friends, and religious communities of these four women of peace have passed and pleaded for information and action in the investigation and prosecution of these murders. My efforts, and the good offices of many Members of Congress, have been unrelenting in their support for the families of the churchwomen, and in calling our own Government as well as that of El Salvador to accountability in pursuit of the justice this atrocity deserves.

The accused murderers have been in custody since April 1981. It is now December 1982, and still there has been no trial—more importantly, there has been no systematic and thorough investigation by authorities in El Salvador of others who may have had knowledge of, or may have ordered, condoned, or encouraged these murders.

For this reason, the families and friends of these four courageous women—indeed the American public, and we, their representatives—will mark the passing of two frustrating years tomorrow with a renewed resolve and continued determination to press and pursue this case to a just resolution.

Today I am placing in the CONGRESSIONAL RECORD a recent communication by the families through their attorneys on the Lawyers Committee for International Human Rights. The letter explains their reluctance to hire a private attorney in El Salvador to represent them as next of kin in the anticipated trial. As the letter clearly indicates, the families are reluctant to retain any of the candidates from El Salvador who have been interviewed thus far because of the obvious and explicit intention of these attorneys to exclude any further investigation or fixing of blame beyond the five accused guardsmen.

Moreover, the families of the murdered churchwomen are not satisfied with either the efforts of the government of El Salvador or those of the U.S. State Department and American Embassy in El Salvador. The resolution of this case should not be a legitimation of a corrupt and impotent justice system, nor should it be a whitewash of those who bear responsibility for actions by the security forces of El Salvador.

THE LAWYERS COMMITTEE FOR INTERNATIONAL HUMAN RIGHTS,
New York, N.Y., November 12, 1982.

Mr. L. CRAIG JOHNSTONE,
Director, Office of Central American Affairs, U.S. Department of State, Washington, D.C.

DEAR MR. JOHNSTONE: I am writing to inform you about the decision the families have now reached regarding the effort to hire a Salvadoran lawyer to serve as acusador particular in the case involving the December 1980 murder of four U.S. churchwomen.

I write this letter under some constraint. As you know, during the last three months the Lawyers Committee, acting on behalf of the four families, has taken a number of steps to help secure the services of a Salva-

doran lawyer in this case. Starting with a meeting arranged by the Department of State and including Scott Greathead's visit to San Salvador in August, we have met with a number of Salvadoran lawyers in El Salvador and in the United States. Without exception, these lawyers, whether they were contacted independently by us or through the Department of State, have imposed stringent conditions of confidentiality on us because of the considerable risks to them in even discussing the case. It is our intention to respect these conditions. Accordingly, in this letter I am unable to go into as much detail as I would like about our search process or the various discussions that have led to our decision.

It is sufficient to say that during the past three months, we have made a concerted effort to gather as much information as possible about the judicial process and the prospects for utilizing effectively an acusador particular in this case. In so doing, we have sent a representative to El Salvador and Mexico, and invited Salvadoran lawyer(s) to the United States, all at the expense of the Lawyers Committee and the families.

On the basis of what we have been told, we have reached the following conclusions:

1. There is currently no serious investigation of the possible involvement of Salvadoran officers in ordering the killings or covering them up.

2. With regard to the case itself we have been told that an anticipated defense of the five guardsmen will be that they were only acting under orders from their superiors. Lawyers have warned us that the only way to guarantee a conviction of the five guardsmen is to refute their claims that others were involved. We reject this specious reasoning. The families insist on a thorough investigation of the case, no matter where that investigation leads.

3. All of the lawyers with whom we have spoken have expressed the fear that their lives may be jeopardized if they become involved in this case. Several have stated that elements in the Salvadoran armed forces do not want this or any case against members of the armed forces to be tried.

4. In part, because of the threat to their personal safety, lawyers have told us that it will cost between $30,000 and $100,000 to hire a Salvadoran lawyer as acusador particular.

5. A thorough investigation of the possible involvement of Salvadoran officers ordering the killings or covering them up and prosecution of all those responsible has not been and will not be possible without the full support of the United States Government.

6. Currently, we are unable to discover any lawyer in El Salvador willing to pursue a vigorous investigation of all leads in this case. This is, in part, because lawyers there do not believe that the United States Embassy is willing to support such an investigation.

After carefully weighing all of these factors, the families have decided that they are not, at this time, prepared to hire an acusador particular. While it has been their intention from the beginning to take whatever steps are possible and necessary to encourge a full and fair investigation of this case, they now believe that under the present circumstances, the effective inolvement of any private lawyer has become virtually impossible. This, coupled with the potential danger to any lawyer who would aggressively pursue the case, makes the hiring of an acusador particular imprudent at this juncture.

In making this decision, we remain convinced that a major responsibility for the pursuit of all evidence in this case rests with the United States Department of State and its Embassy in San Salvador. Clearly the Embassy has played a key role in whatever progress has been made to date. For the case to be resolved properly, it is essential that a serious investigation be undertaken into the possible involvement of Salvadoran officers, both in ordering the killing and covering it up. The United States Government has a special responsibilty in seeing to it that such an investigation takes place.

In the past two weeks we have become aware for the first time, of new evidence in the case suggesting that "superiors" ordered the killing. According to one account, on August 1 of this year, a former national guardsman named Julio Cesar Valle Espionza, testified that on December 2, 1980 subsergeant Colindres Aleman, the principal suspect in the current investigation, told him, "We are to pick these women up; we are under superior orders." In this instance, as on a number of occasions in the past, we have learned important information about this case as the result of a newspaper article.

Similarly, since April we have requested, but have never been given, the name and address of, or access to, a retired Salvadoran national guard sergeant who was Colindres Aleman's immediate superior officer. According to information attached to your letter of April 13, 1982, the FBI interviewed this man in the United States in February 1982 at which time he "admitted that Colindres had confessed to the murders." In your letter you go on to say that the sergeant "is still available for further interviewing if necessary."

We have just learned, again from sources other than the State Department, that a retired sergeant named Dagoberto Martinez Martinez has testified in this case, describing a similar admission by Colindres Aleman. According to one account, Sergeant Martinez urged Colindres Aleman to conceal his involvement to protect the honor of the Salvadoran National Guard. We are particularly interested in knowing if this is the same man, and if we can interview him.

After investing substantial time, money and effort over the past several months, the decision not to hire an acusador particular has been a very difficult one for the families. However, despite their deep interest in this case and strong desire to be involved, they do not believe that they can now obtain counsel in El Salvador who can independently pursue these and other evidentiary leads that are critical to the successful prosecution of all who were involved. What the families want, and what we will continue to pursue, is the opportunity to obtain a lawyer who can act effectively on their behalf, with undivided loyalty to them in the manner they choose. As you know, this is the essential interest any client has in dealing with his or her counsel.

This does not mean that the families are ruling out the possibility of future legal representation for them in El Salvador. Moreover, the families intend to remain actively involved in the case in whatever way possible. They would like, for example, to send observers to the public trial, when it occurs, and would appreciate sufficient prior notification to allow us to make appropriate arrangements.

We remain willing and eager to work with the State Department and Salvadoran authorities, in any way possible to assure that a complete investigation takes place and that all of those who are responsible for the execution and cover-up of this heinous crime are brought to justice.

Sincerely,

MICHAEL H. POSNER,
Executive Director.

THE LAWYERS COMMITTEE FOR INTERNATIONAL HUMAN RIGHTS,
New York, N.Y., November 30, 1982.

MR. L. CRAIG JOHNSTONE,
Director, Central American and Panamanian Affairs, U.S. Department of State, Washington, D.C.

DEAR MR. JOHNSTONE: I am writing in response to your November 22 letter regarding the hiring of an acusador particular. I have circulated your letter to each of the four families and subsequently spoken with each of them. In the course of these discussions the families have asked that I respond.

On November 12, I wrote to inform you that the families were not prepared to hire an acusador particular. In your response you note that the State Department is considering "how we might be of help to the families in meeting the expenses of the acusador particular." While we appreciate this offer of assistance, expense is not the issue.

As we have explained previously, the decision not to hire an acusador particular is based principally on the families' inability to identify any lawyer in El Salvador who would be willing and able to pursue a thorough investigation of the case. As you know, during the past six months the Lawyers Committee and members of the four families have devoted substantial time and expense in an effort to identify independent Salvadoran counsel. After meeting with a number of Salvadoran lawyers in New York, Washington and San Salvador, we have concluded that:

1. Lawyers in El Salvador have grave, and probably justified fears that if they become involved in this case their lives may be jeopardized.

2. In part because of these fears, no lawyer appears willing to help conduct a thorough investigation of the possible involvement of higher authorities in ordering the killings or covering them up.

3. A number of these lawyers have stated to us that they do not believe that the U.S. Embassy in San Salvador supports a more thorough investigation of the case.

Until these conditions change, it does not seem possible that, in your words "the concerns and doubts of the family members can be thoroughly explored and, hopefully, put to rest."

Concerning the investigation itself, your letter raises several additional points. You write that the U.S. Government will "continue to pursue any leads, no matter where they will take us" but that "to date, *no* evidence has come to light which would give credibility to allegations of higher level involvement in the crime." Based on the record as we know it, this statement is simply not correct.

As you state, "Colindres Aleman's immediate superior was retired Sergeant Dagoberto Martinez Martinez to whom Colindres Aleman confessed his crime after the fact." According to Sgt. Martinez' statement, taken by the FBI in February of this year, Colindres Alemen confessed to him in December 1980 before Sgt. Martinez retired from the National Guard and left the country. At that time Sgt. Martinez urged Colindres Aleman to conceal the murders. Sgt.

Martinez' conduct was itself a crime, misprision of a felony, of which there has been no investigation and no prosecution.

A second testimony was provided to the court on August 9, 1982 by a national guardsman named Julio Cesar Valle Espinoza. Regarding this testimony, you say "Mr. Valle did state early in his declaration that the Sergeant [Sub-sergeant Colindres Aleman] had mentioned that the guardsmen were detaining the churchwomen's vehicle pursuant to high orders."

Six days after Mr. Valle testified in August, a New York lawyer and member of our Board of Directors, Scott Greathead, went to El Salvador on our behalf to assess the status of the investigation and to meet with lawyers. During his visit, Mr. Greathead met with Benjamin Cestoni, the Salvadoran prosecutor handling this case, and with a representative of the U.S. Embassy. In each meeting Mr. Greathead asked specifically if there was any evidence in the court record suggesting that the five guardsmen were acting under orders. Both the prosecutor and the Embassy representative stated unequivocally that no such evidence had been presented.

In your letter you seek to assure the families that "our government remains committed to seeing that all of those responsible for the murders are brought to justice." While we welcome that commitment, the families are not going to be satisfied until these and other leads are fully explored and a full and fair investigation takes place.

Sincerely,

MICHAEL H. POSNER.●

A MAN FOR ALL SEASONS

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. DORNAN of California. Mr. Speaker, it is certainly a pleasure and a great privilege for me to have the opportunity to honor Fred Massimini. Fred's untiring service and selfless dedication to his community and to his church exemplify those shining qualities, seldom noted in our newspapers, that have made our country the most generous in the world. It is certainly no exaggeration to say that Fred's accomplishments read like a "Who's Who in America."

Following distinguished military service in the United States Marine Air Corps in the South Pacific during World War II—for which he received the Purple Heart—Fred returned to North Hollywood and established his own business doing custom cabinetmaking for homes and fine offices. Fred's reputation for excellent work soon spread and his company became increasingly busier. Some of his excellent creations include cabinets for the rectory at St. Charles Catholic Church, which he donated. He and his lovely wife Dolly were active in the affairs of their church—Fred served on the St. Charles Parish Council and Dolly was president of the women's auxiliary in 1958.

As his children grew, Fred developed an interest in youth groups and became manager of the North Hollywood Cardinals Little League team from 1956 to 1961. He also became district chairman of Boy Scouts of America. In addition, Fred was special projects chairman for refurbished Colonia Guerrero Orphanage in Baja, Calif., through the North Hollywood Rotary Club from 1974 through 1977. He also served as major gifts chairman for East Valley YMCA from 1978 through 1981. Supporting educational endeavors, he contributed his time and financial support to the North Hollywood High School band and athletic groups. Fred is a past president of the Patron's Club of Notre Dame High School and chairman of the fund raising committee from 1963 to 1967. Fred was also a founding father of North Hollywood Boys Club in 1969.

Realizing the important role that health care plays in the communities of the San Fernando Valley, Fred served as a member of the executive committee of the advisory board of St. Joseph Medical Center as well as a member of the board of directors from 1976 to 1981. Fred donated $10,000 to St. Joseph's which sponsored one complete private room, including furniture. He currently serves on the executive board of St. Elizabeth Convalescent Hospital of Toluca Lake. Fred is also a member of the fund raising committee for Villa Scalabrini Home for the Retired in Sun Valley and has devoted much time and financial help to the San Fernando Valley Association for the Retarded.

Recognizing the importance of community service organizations, Fred became an active member of the North Hollywood Rotary Club, climaxing in his service as president in 1977–78 and serving on the board of directors from 1967 to 1980. Fred is currently a member of the San Fernando Valley Business and Professional Association, Police Community Council, and Police Activity League. On the social and sports scene, he is a longtime member of the Lakeside Gold Club and on the political side is a member of the Lincoln Club.

Fred Massimini's most outstanding contribution to his community has been his enthusiastic support of the North Hollywood Chamber of Commerce, in particular, his unending participation on many of the chamber's committees such as redevelopment, antigraffiti, industrial, and ways and means. At one time or another, Fred served as either chairman or member of virtually every committee the chamber has had over his span of 33 years' membership.

It has been said that it is better to light one candle than to curse the darkness. Fred Massimini's candle has shown brightly and in the process given warmth and cheer to those about him. Thank you, Fred, and congratulations. We're proud of you.●

BAHA'IS OF IRAN

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. DERWINSKI. Mr. Speaker, the Baha'is in Iran have suffered tremendous pressure and persecution at the hands of the Moslem fundamentalist regime in that country. Recently, I joined with other members of the Foreign Affairs Committee in writing to the President to urge his support for maximum humanitarian assistance to those Baha'is fleeing as refugees from Iran and to direct our representatives to appropriate international fora to express our moral outrage over this situation. In addition, I feel that the United Nations should send special representatives to Iran to investigate the persecution of the Baha'is.

An article by Georgie Anne Geyer, which appeared in the November 16 Washington Times, reports on the tragic situation that exists in Iran and on the arrests murders, and religious persecution that suggests a genocidal campaign by the Iranian regime against the members of the Bahai faith. I would like to insert this article as I believe that world attention should be directed to this tragedy:

BAHAIS IN IRAN: MASSACRES GO ON

(Georgie Anne Geyer)

While world attention has recently focused on the courageous Israeli investigation into the Beirut massacres, massacres continue unabated elsewhere. Little people pass unknown and often unmourned into history.

The Ayatollah Khomeini's maniacal Iran, for instance, has been trying, with all its skill at killing, to wipe out a small, tolerant, education-loving religious group, the Bahais. But the human spirit prevails in extraordinary ways.

"The massacres in Lebanon were not a surprise to the Bahais," Yale Professor Firuz Kazemzadeh told me recently. "There have always been massacres in the Middle East. There could be millions more (who will) die."

But he, unlike many Americans, knows why. "Khomeini is totalitarian," he said. "He feels that he is in control of all truth, that he will 'purify' the earth and stop the 'corruption.' If you grant that fundamentalist view, then you remove the leg to cure the body."

"But Americans are not prepared to believe that. How can it be? Something else must be operating."

The siege of the small Bahai faith over the last two years in Iran is classic persecution. First, the entire top leadership was taken away and murdered by Khomeini's people. The leaders who replaced them were then eliminated too. The third group boldly sent Khomeini a list of their names and addresses. So far they have not been touched.

It is eerie to see a picture of the leadership—tolerant, educated men and women, people who talked of love in the world—and to know that every single one has been killed. And the next group, too.

Several hundred Bahais are also still in jail. From 3,000 to 5,000 have been driven out of their homes, and over 10,000 have fled the country, going to "holding pens" in Pakistan and Turkey. Those who stay are deprived of jobs; their children are deprived of school. Perhaps eventually their lives will be forfeit too.

The world today seems to be returning to the period of the great "religious" wars. But one has to be careful about the language. As Kazemzadeh points out, whether "Christian" Phalangists kill "Moslem" Palestinians or "Shiite" Persians kill "Bahais," what these conflicts really amount to is a return to tribalism and clan—with all that means in terms of vengeance and the destruction of whole people and religions.

In Iran, he points out, the zealotry is a harnessing of extreme reactionaries and the exploiting of a mixed rhetoric of nationalism, xenophobia and fear of the unknown.

Ironically, what all of this "religious" fanaticism has brought about is the grouping of the entire intellectual life of the country (what is left of it) around the Tudeh or Communist Party.

The Tudeh, which cooperates strategically with Khomeini and his increasingly mendacious mullahs, now controls about a third of the foreign ministry. It is the only group allowed to publish scholarly articles, so even the non-communists intellectuals use the Tudeh to get their works published.

What is so arresting about this new travail of the Bahais, who believe in the consecutive revelations of God through many prophets, is that it is precisely the Bahais who personify tolerance. They believe in the acceptance of differences, the equality of the races and sexes, the harmony of religion in science, the establishment of a world federation, the maintenance of world peace through collective security and a universal auxiliary language.

It is not too extreme to say that the Bahais represent light in the world; and the Khomeini forces, darkness. But in our "rational" world, we have recently forgotten that darkness always tries to oppress light. As Kazemzadeh, one of the 100,000 American Bahais, put it:

"Tolerance was always present only at the edges of Europe when it became prosperous, or when there existed a stalemate of classes or religion. In the West, our memories are short."

He and the Bahais reluctantly have come to the conclusion that since there are no commissions in inquiry in Iran as there are in Israel, the Bahais' only choice is to publicize the massacres of their own people there. "No matter how much of a murderer you are," he says, "you don't want to do it in the sunlight." Meanwhile, "the Bahais stand on their principles and die." He paused and then added sadly, "And those principles of non-violence and tolerance . . . are the hardest ones to stand for."●

IMMIGRATION REFORM AND CONTROL ACT OF 1982

HON. HAROLD S. SAWYER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. SAWYER. Mr. Speaker, the Immigration Reform and Control Act of 1982 is in my opinion very poor legislation. It, among other things, extends immediate legalization or amnesty to all illegal aliens who have been in the United States since January of 1978.

No one knows how many people this involves. The estimates range from a low of 3 million to a high of 12 million. One year is given to the Immigration Service to complete the adjudication on this matter. There are no systems prescribed for adjudication nor any appellate apparatus.

Supposing, for example, that 6 million illegal aliens come forward: Who is going to judge 6 million cases? The Immigration Service cannot handle its present obligation, let alone take on a task of such monumental proportions. And it is not just a question of checking documents. Some are going to say:

I was here illegally—I took all my pay in cash—I didn't have a social security number—I never put anything in my own name, but my friend here will testify that I was here on January 1 of 1978, because we had a beer together. And when he's finished I will then testify that he too was here based on the same beer.

Who is going to undertake the fantastic problem of trying to adjudicate these claims?

This is also then an open invitation for anyone not already here to quickly come and tell the same story with witnesses whom I am sure can be obtained.

In the meantime, nobody knows if this rather watered down employer sanction provision, which is supposed to be the solution to the illegal alien problem, is going to work. Failure to comply does not become a criminal offense until several violations have accrued. Nobody knows if it will work or if it will not. No additional resources are being allocated either to the border patrol, which presently has less officers than the Capitol Police Force, nor to the computerizing of the Immigration Service, which now keeps its visas in shoeboxes and has no idea who among those who come in with visas have in fact left and who are illegally staying here beyond their time as either students or whatever.

I recognize that the huge illegal alien problem has to be addressed. It is not a healthy situation to allow this subculture to go on existing and festering and being exploited. It seems to me, however, that we are going about it the wrong way.

In my opinion, the orderly way to a solution of this problem is as follows:

One. Put into effect employer sanctions and test them for a period of time to see how effectively they curtail the flow of immigrants.

Two. At the same time, devote sufficient assets and resources to greatly expanding the capability and adequacy of the border patrol, the Coast Guard, and the computerization of the Immigration Service.

Three. When satisfied that the border is reasonably secure and that the Immigration Service is in a position to control the coming and going of visaed visitors, we should then move up the registry date. The registry date is a date which is presently fixed at 1948. Any illegal alien under present law, who was here in 1948 can apply to the Attorney General for legalization. This is granted if there is no criminal record and the party is self-supporting. Now we should first move that date, say, to 1970, which makes it a realistic date and instruct the Attorney General to be liberal in his granting of legal status to those who apply and see how many come forward. We should at all times keep control of the situation. When we are then satisfied that we have exhausted that number, move the registry date again to say 1975 and go through the same process. Gradually bringing the date up to the relatively current date.

In this way, we will have tested the adequacy of our deterrence, both by way of employer sanction and Border Patrol, Coast Guard, and a computerized Immigration Service and we will have, in an orderly process, over a period of time, gradually eliminated, without ever losing control of it, the illegal alien problem.

To approach this matter any other way threatens to virtually bankrupt many States or the Federal Government which will be immediately blamed by the States for the drain on revenue available for welfare, medicaid, education, and whatnot. We are literally under the proposed bill, opening Pandora's box, just as the Carter administration did in connection with the Cuban Marielito immigrants, when they suddenly opened the gates and were buried with 125,000 criminals, mentally disturbed people, and whatnot—far more than they were able to handle and far more than they bargained for. It just seems to me that that mistake should be still fresh in our minds and we should get into this situation, recognizing it has be addressed, but in a way that is designed to keep it under control. To get rid of the current reservoir of illegals without inviting all the others waiting to become illegals to come in and without ever losing control of an orderly process for adjudicating the cases involved.●

COMMENDATION FOR RESPONSIBLE STUDENT LOANS

HON. BILL NICHOLS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. NICHOLS. Mr. Speaker, in recent years I have expressed my disappointment with the growing rate of defaults of student loans. At the same time, I have also highlighted those institutions of higher learning that exhibited remarkable success in impressing upon their students the necessity in repaying their student loans in a timely and responsible fashion. Tuskegee Institute, located in Alabama's Third Congressional District, is one of the institutions which has repeatedly received high marks for loan repayment.

In today's Wall Street Journal, Tuskegee Institute is finally getting national attention for a job well done.

Not only is Tuskegee Institute's loan default percentage far below the national average, it is one of the lowest in Alabama and even lower than that of Harvard University.

At a time when many in Congress have been critical of the failures found in Federal loan programs, I am proud to represent a university in the Congress which believes that if a debt is incurred, a debt should be repaid.

For the reading of my House colleagues, I submit to the RECORD of this body the article "As Student-Loan Default Rules Tighten, Tuskegee's Success Gets a Lot of Attention." I believe the attention is rightfully deserved.

[From the Wall Street Journal, Dec. 1, 1982]

AS STUDENT-LOAN DEFAULT RULES TIGHTEN, TUSKEGEE'S SUCCESS GETS A LOT OF ATTENTION

(By Sonia L. Nazario)

TUSKEGEE, ALA.—Last summer, the Reagan administration announced it would stop making student loans to any college or university with a loan-default rate of more than 25%. The ruling fell heavily on the nation's historically black institutions, and 47% of them were cut off from new federal lending.

But at Tuskegee Institute, the country's biggest private black college, the ruling caused scarcely a ripple. When it comes to squeezing money out of its former students, the venerable institution, most of whose students are poor, has one of the best collections records anywhere. "We're bullish on collecting," says Napoleon Thomas, Tuskegee's staff loan collector.

About 97% of Tuskegee's students get financial aid of some sort. Two-thirds rely on the government's national Direct Student Loan program, in which default standards have tightened. But Tuskegee's NDSL default rate runs at only 5.7%, far lower than the average for black institutions, less than half the 13% for all federally aided institutions of higher learning and even below Harvard University's 7.5%.

ATTRACTING ATTENTION

That's not bad for a school whose students come from families with average earnings of less than $12,000 a year, half the national average for families of college students. The low delinquency rate at Tuskegee is drawing considerable attention from other institutions with college troubles. Education Secretary Terrel Bell has even cited Tuskegee's collection success as an example of how things ought to work.

Pride and idealism help. So do Tuskegee's steady prodding of debtors and its no-nonsense approach to finance. "The loan collection process begins when you hand out the money," says Walter Sapp, who administers the NDSL loan program at Tuskegee. Mr. Thomas, the bill collector, has had his office moved next to the counter where students pick up their loan checks as a pointed reminder.

The real job starts once the student leaves Tuskegee. Repayments of federal loans are supposed to begin in six months. Deadbeats get personalized bills stamped in "the deepest purplish red I can get," Mr. Thomas says, with slogans as mild as "oops, did you forget?" or as ominous as "further action pending." Lest there arise any misunderstanding, each notice states, "This is a bill."

Mr. Thomas, a rotund, double-chinned man, doesn't shy from subterfuge. He varies the styles of envelopes in which bills get mailed to reduce the possibility that a debtor will spot the bill by the envelope and discard it unopened. He also uses letterheads of the college's attorney to shake up nonpayers. Accounts of the most persistent deadbeats get referred to collection agencies. "This is a job that if you want to be liked," he says, "you don't do."

It's a job done poorly at many other places. "The socioeconomic conditions of blacks are naturally going to make them a higher risk," says Christopher S. Edley, executive director of the United Negro College Fund. He asserts that 65 percent of black college students come from families whose income falls below the poverty level. "There is some correlation between unemployment and paying back these loans," says Elias Blake, president of Clark College in Atlanta. Nearly 22 percent of black college graudates between 20 and 24 are unemployed, almost five times the rate for non-minority graduates of the same age.

Educators say poor black students often lack the conditioning that encourages prompt repayment. "Many of our students come from families that have never had a checkbook," Mr. Edley says.

The pressure to reduce defaults nevertheless appears to have had an effect at some black colleges. "My college has gone down from 40 percent to a 20 percent default rate this year," Mr. Blake says. Although he foresees little additional decline, he says, "We've been talking to places like Tuskegee to see how they're doing it."

Mr. Thomas freely discloses his secrets. It's important to keep good track of debtors' addresses to make sure they get their bills, he says. Even the hometown minister is summoned to divine the whereabouts of a former student. When debtors say they never got their bills, he tells them, "Tuskegee hasn't moved since 1881." Mr. Thomas says he and his superiors have no fear of alienating graduates "by sending the collection agencies after them," but only about 16 percent of the defaulters do have to contend with the agencies. To those who repay, he says, "We send appreciation letters."

Tuskegee starts early inculcating the idea that taking out a loan requires paying it back. "Future generations of students may or may not have an opportunity for educational development depending on how well you pay back your loans," Tuskegee president Benjamin F. Payton said at the commencement address. It means, says senior Melvin L. Bobo III, that repaying his loan will help another needy student, not just a faceless "federal government." He says, "If you don't pay back the loans, someone else may never get here."

"Students see this place as some sort of Mecca," says Julian E. Thomas, professor of biology, and there is a pride in the institute and the town itself, largely governed by blacks, that many wish to share.

HELPING WITH EMPLOYMENT

Recent cuts in federal student aid mean that Tuskegee can now provide only 65% of the financial assistance that students need. The college itself has begun making short-term loans for the remaining 35%. Those loans must be repaid before the beginning of the next semester, or the borrower cannot re-register. That helps condition students to repay loans.

Tuskegee also helps provide employment—the best guarantee of loan repayment of all. Since its founding by Booker T. Washington 100 years ago, the institute has stressed vocational education. And today, says Ruby Robinson, a junior, "Students have a really good chance of getting a job out of here."

Many students and former students seem grateful. "They couldn't have done it without Mother Tuskegee," Professor Thomas says. "If it weren't for Tuskegee helping me, I'd be at home waitressing right now," says Debbie Smith, a junior, both of whose parents were jobless all summer.

"I don't know how many times I ran out of money and packed my bags my freshman year," Dexter Campbell says. "But friends and Tuskegee pulled me through."

In economic terms, says Pearle Bailey, a freshman, "I guess students think they're getting their money's worth. Why would you try to rip them"—Tuskegee—"off?"●

REFORMING PRISON STANDARDS IN TEXAS

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. LELAND. Mr. Speaker, I would like to make my colleagues aware of the work of Charles and Pauline Sullivan who have devoted themselves to the reform of Texas prisons. An article which appeared in the Fort Worth Star Telegram describes their tireless dedication to the improvement of the penitentiary system and their emphasis on the need to humanize our approach to the institutionalization of these individuals.

The article follows:

[From the Fort Worth (Tex.) Star Telegram, Sept. 19, 1982]

FORMER NUN, PRIEST DEDICATE LIVES TO REFORMING PRISON STANDARDS

(BY BOB LLOYD)

AUSTIN, TEX.—As lobbyists go, Charles and Pauline Sullivan don't quite fit the mold.

The former Catholic priest and nun have spent the past decade—not in tailored business suits, but in cast-off clothes—fighting for prison reform. They have no car or phone. They live on $350 a month, walk 3 miles to work and represent a group of people who can't even vote.

Yet the guest list to their organization's recent annual conference indicates that the Sullivans and Citizens United for Rehabilitation of Errants (CURE) have earned respect as the major citizen voice for prison reform in Texas.

"They are practically the only voice in prison reform in Texas in a legislative forum," said state Sen. Ray Farabee, D-Wichita Falls.

Although prison and state officials have spoken at CURE workshops before, the guest list had never been so distinguished.

Attorney General Mark White, the Democratic nominee for governor who has been on the opposing side of prison lawsuits, spoke and fielded questions from more than 100 CURE members.

George Strake, the tough law-and-order Republican candidate for lieutenant governor, braved the unfriendly climate and gave his stands about prison issues, some of which sharply conflict with CURE's goals.

John Byrd, executive director of the Board of Pardons and Paroles; S.O. Woods, director of prison records and classification; David Myers, warden of Jester Unit; and Chris Mealy, director of the governor's clemency division, sat through three hours of pointed questions from inmates' relatives about parole and furlough decisions.

"It shows we've come a long way," Sullivan said. "They cannot ignore us now. The issue is one of the top issues in the state."

During the last 10 years, criticism of the troubled Texas prison system has soared as much as the prison population. The Sullivans have been among the most critical.

Some officials believe the Sullivans have been in the right place at the right time and are successful simply because the issue has become heated.

Yet they agree that the Sullivans have made inroads in prison reform, chiefly on their own credibility and dedication.

They operate CURE, which has a membership of 2,000, on less than $11,000 a year.

They rent a duplex in one of Austin's poorer neighborhoods. Most of their clothes are donated, even from sympathetic legislators.

"I always say: 'Whatever Joe (Hernandez, D-San Antonio) is wearing this session, I'll be wearing the next," Sullivan said.

Even those who sometimes disagree with the Sullivans respect them.

"They exemplify one of the most dedicated couples I've seen in a lobbying or advocacy effort," Farabee said. "Tireless efforts. Intense moral commitment.

"They have no money. They don't have a large public following. But I've never heard anyone question their dedication. You don't hear criticism of them as much as the ACLU (American Civil Liberties Union). Even among people who sharply disagree with them, you don't hear slurs."

"I have grown over the past 3½ years to know them," said Harry Whittington, an Austin attorney and member of the prison board. "I would say they are on a different level from most people because of their budget. But they are sincere people and dedicated.

"They do their homework and do their job. . . . They must do a credible job. There are not too many people waiting to replace them because of their budget."

Mealy said: "Though they have a very little budget, those people are responsible almost single-handedly for lobbying efforts for reform."

The Sullivans' efforts are also respected by their friends.

"Charles and Pauline have accomplished more good with less money than any other lobbying group in the history of Texas. And they've done it with just hard work and perseverance," said John Duncan, director of the Texas Civil Liberties Union.

Sullivan says CURE's efforts helped establish two state agencies—the Texas Commission on Jail Standards, in 1975, and the Adult Probation Commission, in 1977.

Sullivan also claimed victory in helping establish the situational furlough program in 1979. The program allows the prison system to give inmates furloughs at any time. The Legislature gave money to halfway houses in 1981—a measure CURE supported—but the Sullivans say they played only a background role in that effort.

"You try to create an atmosphere," Sullivan said. "We've let the facts speak for themselves. The situation is bad enough. We don't need to exaggerate it."

Observers say the Sullivans' persistence has made legislators more aware of prison problems, adding that it is difficult, however, to assess their impact.

"As far as the board itself, we haven't had much opportunity to say this is being done or not being done because of CURE," Whittington said. "Some of the board members are agitated by the positions they take. Some of the board members feel they (board members) are being picked out or singled out.

"CURE does serve a purpose. They represent the viewpoint of people in the penitentiaries who are being treated one way or the other. The manner of their treatment is something they can comment upon."

The Sullivans teamed with inmate David Ruiz, who filed the federal court case that led to recent prison-reform mandates. They say CURE benefited from supporting Ruiz.

"That's symbiotic relationship," Sullivan said. "We kind of fed off of each other."

The Sullivans' interest in prison reform began about 11 years ago, after a friend was arrested in San Antonio.

Sullivan led a demonstration outside the jail, yelling to prisoners on the fifth floor to join a hunger strike.

He was arrested and spent five days in jail, but he and his wife did not begin their push for reform until after they were arrested in a 1972 Washington, D.C., peace demonstration.

They returned to San Antonio and become involved in efforts that would be long-term.

Sullivan ran for Bexar County sheriff in 1972 as a write-in candidate on a jail-reform platform.

They had been told that many families were unable to drive to prisons to see incarcerated relatives. Sullivan organized a trip from San Antonio to Huntsville, and within a week had filled five buses.

"We noticed how many people on the buses were older and retired," he said, "so we thought: 'Hey, let's go up to Austin during the week and lobby.' "

They moved to Austin in 1974 to begin their lobbying.

The Sullivans say that their devotion and ability to subsist on a small salary is because of religious training. They say their satisfaction is derived from helping people adjust to life in prison.

They remain close with several ex-inmates who are trying to stay free. Yet their chief functions are fighting for better conditions in Texas prisons.

Sullivan says he does not particularly respect some legislators with whom he must be friendly, but that to effect change, he has learned to play the lobbying game.

By most accounts, the Sullivans have learned the rules.

"You've got to be on the jury to hang the jury," Sullivan said. "You've got to keep asking yourself: 'Are you hanging the jury?' "●

WASTE IN NORTH DAKOTA

HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. JEFFORDS. Mr. Speaker, I urge my colleagues to support efforts to cut funding for the Garrison diversion unit when the energy and water appropriations bill comes up for a vote.

The controversy over this project has taken many twists and turns. I would like to bring my colleagues' attention to a new twist they may not be aware of—that of the suit brought by South Dakota landowners to enjoin construction until the impacts of the Garrison project on the James River are ascertained.

I think it is significant that Garrison has been frought with problems at every turn, and that fact should be a red flag to each of us today. Once again, citizens have banded together to challenge the wisdom of this $1 billion boondoggle. As this ill fated project threatens to enter their backdoor and contaminate their water, South Dakotans have taken action. Add their names to the citizens of Manitoba, Canada, concerned members of many conservation groups, and overburdened taxpayers.

The newest development in the Garrison case was brought about when the Department of the Interior modified the Garrison project, splitting construction into phases. Phase 1, underway now, will irrigate a small portion of the project in southeastern North Dakota. However, run off from phase 1 will enter the James River with unknown consequences. Because this action was never contemplated in the original environmental impact statement, the implications for this modification by the Department of the Interior are anybody's guess. The landowners of South Dakota do not think that is good enough and want some facts before construction continues. I think they have a point.

What unforeseen problems lie ahead? The Canadian issue has not been resolved, mitigation plans are woefully inadequate as they stand now. There is growing public opposi-

tion to Garrison within North Dakota itself. The South Dakotans have entered the frey. How can we in good conscience appropriate money for a project with so many bad turns?

I urge this Congress to cut funding for the Garrison diversion unit and pave the way for serious reconsideration of the project itself. Surely the taxpayers' money is scarce enough without throwing it down this rathole. Surely we owe it to our constituents to look this over carefully, meet these concerns and resolve them before any more financial resources are committed. I hope you will join me in opposing this problem-ridden North Dakota albatross.●

ATTACK ON PEARL HARBOR TO BE REMEMBERED

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. GUARINI. Mr. Speaker, December 7 will mark the 41st anniversary of the attack on Pearl Harbor, an attack which catapulted the United States into World War II.

The "day of infamy" proclaimed by the late President Franklin D. Roosevelt will long be remembered in the annals of world history. Two thousand four hundred Americans were killed in action on that day as a result of the sneak attack of the Japanese military machine.

Many men from the State of New Jersey were on military duty in Hawaii on that eventful day, with many casualties.

I am proud to report today that the Jersey City Pearl Harbor Memorial Committee will be holding its sixth annual observance of the anniversary on December 5 at Liberty State Park in Jersey City, in full view of our beloved Statue of Liberty. The annual event has become the biggest of its kind in the United States. The observance's success is strengthened by the dedication and drive of Richard T. Bozzone, Sr., who was recently reelected to head the Jersey City Pearl Harbor Committee, which will have representation from the American Legion, the Veterans of Foreign Wars, Disabled American Veterans, Jewish War Veterans, Catholic War Veterans, Gold Star Mothers, Veterans of World War I, AMVETS, Navy Mothers, and other groups, including outstanding service organizations such as the Jersey City Elks Club.

This year Dick Bozzone has chosen as cochairmen of the event Edward Meehan, the Americanization chairman of the Jersey City-East District Elks; Stanley Stine, a U.S. Navy veteran who served aboard the battleship U.S.S. *Missouri;* Benjamin Fleischman, a veteran of the attack; Dr. John Kopycinski, of the New Jersey College of Medicine and Dentistry and a Polish-American community leader; and George Danko, a U.S. veteran who was at the attack.

It has been my pleasure to participate in this event each year, which has as one of its high points the placing of a commemorative wreath in the waters of the Hudson River as well as bringing a wreath to Bedloe Island, the home of the Statute of Liberty.

America has witnessed many changes since 1941, both at home and in the international arena. From the devastation and horror of World War II emerged technology which has ultimately aided peace and communication. The world is much smaller now due to the development and refinement of aircraft, which received a baptism of fire in this awesome conflict. We have seen in the past 41 years the development of the space age and nuclear weapons, whose production we hope and pray will help us avoid another world conflict. We have overcome the attack on Pearl Harbor and the ensuing 4 years of World War II to begin to develop better understanding among men and women throughout the world.

Although we have had severe problems with racism and human rights, we are working to overcome them, and the rapport which has resulted between the peace-loving people of Japan and our Nation is exemplary. It indeed proves that there is no place for bigotry and hatred. It was Daniel O'Connell who said:

> Bigotry has no head and cannot think, no heart and cannot feel. When she moves it is in wrath; when she pauses it is amid ruin. Her prayers are curses, her God is a demon, her communion is death, her vengeance is eternity, her decalogue written in the blood of her victims, and if she stops for a moment in her infernal flight it is upon a kindred rock to whet her vulture fang for a more sanguinary desolation.

The economic and social adjustments made by both nations involved in the Pearl Harbor attack have become the great hope of mankind, showing that if men of good will join heart and hand, unhappy situations may be corrected.

It was Alan K. Paton who said:

> The tragedy is not that things are broken. The tragedy is that they are not mended again.

I wish to commend Richard Bozzone and his group, and the Fort Hamilton Army unit which annually has sent military personnel and their band to attend the ceremonies.

A special tribute must be paid to the millions of men and women who served in our Armed Forces during World War II and the great sacrifices they made. Thousands upon thousands of them still are in veteran's hospitals throughout the country.

While we appreciate the courage with which men have died, we also must pay tribute to the courage with which many have lived since December 7, 1941.

In closing, I ask my colleagues in the House of Representatives to thank all those in the group which will be at Liberty State Park on December 5, remembering that momentous day of 41 years ago, and especially remembering those who have died.

Ralph G. Ingersoll eloquently puts in proper perspective the tribute we pay to the dead of December 7, 1941, and, indeed, all who have made the supreme sacrifice for freedom in Korea and Vietnam:

> These heroes are dead. They died for liberty—they died for us. They are at rest. They sleep in the land they made free, under the flag they rendered stainless, under the solemn pines, the sad hemlocks, the tearful willows, the embracing vines. They sleep beneath the shadow of the clouds, careless alike of sunshine or storm, each in the windowless palace of rest. Earth may run red with other wars—they are at peace. In the midst of conflicts, they found the serenity of death.

I am asking that Americans all please join me in my salute to the Jersey City Pearl Harbor Memorial Committee for their role in remembering this day. We must remember the past to awaken the future of our Nation, ever mindful that no nation can build its destiny alone. The age of worldwide interdependence is here and now. We must work and pray for a worldwide victory of peace and justice for humanity, for no people who have survived the trials and tribulations of hundreds and thousands of years should be compelled to surrender their traditions, values, aspirations, and cultures—and their existence—now.●

SUPPORT ADEQUATE POSTAL APPROPRIATIONS

HON. DONALD JOSEPH ALBOSTA

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. ALBOSTA. Mr. Speaker, I want to let it be known that I was unable to be here for the vote on the Treasury-Postal Appropriations bill Tuesday, November 30, but that if I had been here, I would have voted for the bill as a majority of my colleagues did in passing H.R. 7158.

One of the most important things that the Congress did in approving this bill was to approve an appropriation for the Postal Service that is large enough to prevent a drastic increase in postal rates for nonprofit mailers, newspaper and magazine publishers, shippers of books and records, and other mailers that perform public ser-

vices heavily dependent on affordable postage rates.

The bill contains $708 million for the U.S. Postal Service which is $208 more than the administration requested. Although that figure may be reduced somewhat before the bill is finally approved by both Houses, this greater support means direct assistance to the very groups that have been hit hardest by both past budget cuts and the depression we are now in. Churches and charities raise much of their budgets through the mail. Studies by the Urban Institute and others show that the private nonprofits cannot step in and replace all of the lost Government safety-net of services while absorbing skyrocketing mailing costs. In fact, their services have been cut back to meet unexpected rate increases that went far beyond the scheduled changes on which they had relied when making up their budgets. This same pressure is felt by publishers who are particularly important to rural areas such as the 10th district where people rely heavily on the mail.

As a member of the Subcommittee on Postal Operations of the Post Office and Civil Service Committee, I supported a budget, an authorization and an appropriation that would provide postage rates at least as reasonable as those anticipated in the schedule established originally in 1971. There is no reason to break our promise to these mailers and to the American people by forcing these rates up at an ever faster rate.

I expect to continue to support reasonable and reliable rates and oppose efforts to raise them at the expense of those who rely most heavily on America's information and service organizations.●

SOVIET WATCH: SOME ANDROPOV SAYINGS

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. FIELDS. Mr. Speaker, I would like to introduce this article on Yuri V. Andropov for the perusal of my colleagues.

(By Albert L. Weeks)

SOME ANDROPOV SAYINGS

Just weeks before the Soviet military invasion of Afghanistan, December 1979, the green-buck-ram volume of speeches and writings of Yuri V. Andropov appeared in Moscow bookstores. Few other top Soviet leaders had had their "works" published—Brezhnev, Kosygin, Suslov, Kirilenko, Ustinov. So, the appearance of Izbranniye Rechi i Stat'i (Selected Speeches and Articles) by Yu. V. Andropov clearly indicated the KGB chief's new-found status among his peers in the Politburo and Secretariat.

Andropov's writing contain some emphases and nuances as as well as outright assertions that give some indication of the new general secretary's political line. The following excerpts are arranged according to a few categories of Soviet concerns, foreign and domestic. A reading of the complete volumes reveals Andropov's positions on such question as civil rights, the Soviet military buildup, labor discipline, foreign policy, Red China, the United States, "national-liberation struggle," world revolution—positions that can scarcely be labeled "liberal."

Moreover, the stands he takes in his speeches and writings are often repeated in his successive writings—a hint that such stands may express themselves in Kremlin policy-making now under his guidance. On civil rights, labor discipline, foreign policy, and the U.S. Andropov is hard-line; on reconciliation with China he is rigid, unyielding; on "poletarian internationalism" (world revolution) he is militant.

United States: "The most reactionary circles in imperialist states, and above all in the United States, try in every way to stop the strengthening of detente (and to) sharpen international tensions . . . Such zigzags in Washington's policies with respect to detente demand that we take corresponding measures to cope with them."—Ibid., p. 292.

"Strengthening mutual understanding and trust today is an important condition for success in securing a lasting peace, scaling down the arms race, disarmament, and improving the international situation. If the ruling circles of the U.S.A. and the other Western countries are ready, as they claim, to help in such efforts, they they should desist in their efforts to aggravate the atmosphere with hostility. This is an obvious truth, and it is important that it be understood quickly in the West."—Ibid., p. 271.

"The ideological struggle (with capitalism) cannot, of course, be suppressed; it is an historical struggle on the merits of the socialist system as opposed to the capitalist, and about the road to be taken to reach the heights of progress. Such a struggle is inevitable and will continue to be in the future."—Ibid., p. 270.

"Meanwhile, subversive centers abroad step up their activities through such means as Radio Liberty and Radio Free Europe. . . . They demand of us, no less, that we place no obstacles in the way of such activity; . . . Such activity is nothing other than evidence of hostile intent violating the principles of detente and the Helsinki agreements."—Ibid., p. 270–1.

World revolution: "Marxism-Leninism is the textbook for achieving socialist world revolution and the building of a new society in every country of the world."—Ibid., p. 73.

"The Communist Party of the Soviet Union is in the vanguard of the world-revolutionary movement. It represents the very highest ideals of contemporary life and organically embodies the reason, honor, and conscience of our epoch."—Ibid., p. 171.

Civil rights: "Our constitution clearly spells out the rights of Soviet citizens to criticize and make suggestions. . . . But among us are individuals who suffer from political and ideological confusion, or from religious fanaticism, nationalistic pride, or psychological instability. . . . With such persons it is necessary to undertake a process of reeducation (and) to apply penal sanctions to the fullest extent."—Ibid., p. 269.

"We cannot shut our eyes to anti-state crimes, anti-Soviet activities and behavior which results from foreign influence. . . . The organs of state security, the KGB, merely carry out the wishes of the Soviet people, who severely condemn criminal activities by cast-offs from socialist society."—Ibid., p. 311.●

KARL MARX OR JESUS CHRIST—THE WORLD COUNCIL OF CHURCHES

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. McDONALD. Mr. Speaker, the World Council of Churches has compiled an unbroken record of supporting Communist and leftwing causes all over the world. Never does the World Council ever contribute to an anti-Communist organization or loudly criticize a Soviet action. This activity has embroiled the council in controversy, loss of membership, and money. Therefore, the howls of rage were predictable when the Reader's Digest published an article about this subject in its August 1982 issue. However, to the best of my knowledge, the World Council has not been able to disprove a single claim made in the article. As the saying goes, "If the shoe fits, wear it." The article follows:

[From the Reader's Digest, August 1982]

WHICH MASTER IS THE WORLD COUNCIL OF CHURCHES SERVING—KARL MARX OR JESUS CHRIST?

(Joseph A. Harriss)

Bible-toting Masai tribeswomen, necks ringed with ceremonial beads, bearded Russian Orthodox bishops and sarigowned women from Sri Lanka were among the colorful throng of delegates attending the last Assembly of the World Council of Churches (WCC) in Nairobi, Kenya, in 1975.

Almost half of the delegates who gathered there were from Third World countries, and the speeches reflected a militant anti-Western mood. Michael Manley, then prime minister of Jamaica, was applauded when he called for peoples' democracies to replace capitalist states.

The 18-day conference heartily endorsed the WCC's Program to Combat Racism, which gives money to a variety of political organizations, including revolutionary guerrilla movements. It urged the creation of a program to challenge corporations accused of exploiting the Third World. And it denounced South Africa's intervention in Angola, overlooking the fact that the Soviet Union was engineering the arrival of thousands of Cuban troops in Angola.

All in all, the Geneva-based ecumenical organization made clear its preference for social concerns over purely religious ones. It showed that its approach to solving the world's ills owes almost as much to Marxism as to Christianity.

Still, countless World Council supporters were shocked in August 1978 when the WCC announced that its Program to Combat Racism had given $85,000 to the Patriotic Front, a Marxist guerrilla organization then fighting the white-dominated regime in Rhodesia. At the time of the grant, the Patriotic Front had murdered 207 white civilians and 1712 blacks, and only weeks before had slaughtered nine white missionaries and their children. London's *Daily Express* headlined: "Bloody Money—Rhodesian mission killers get cash aid—courtesy of world's churches." The Salvation Army, a founding member of the WCC, suspended its member-

ship in protest, as did the Irish Presbyterian Church, which called the grant "racism in reverse."

HIGH HOPES

The World Council of Churches, today representing 400 million believers, was founded in 1948 in the hope of uniting the world's fragmented Christian churches. But its increasingly aggressive involvement in politics and its financial support of violence have made it a factor of division rather than unity.

The irony is tragic, for the organization is capable of much good. The World Council has helped millions of victims of wars and natural disasters. More than two million refugees have been resettled thanks to WCC funds.

But the council has been focusing its attention more and more on political matters. This change can be attributed to two main causes:

First, its initial goal of Christian unity withered over the years, as the doctrinal differences among the various churches proved to be unyielding, and the largest Christian church of all, the Roman Catholic, refused to join. The organization then shifted to "secular ecumenism." Church unity, the World Council's leaders argued, would be furthered by overcoming mankind's economic, racial, educational and other social ills and problems.

The second reason for the change is the WCC's altered composition. At the council's founding assembly in Amsterdam, churchmen from the Third World made up only a small percentage of the voting delegates; at Nairobi, they amounted to almost half. Of the 301 member churches, only 28 are American.

The Third World viewpoint is incarnate in General Secretary Philip Potter, a 61-year-old West Indian Methodist clergyman. Potter, who presides over a staff of nearly 300 from some 40 countries, makes no bones about his anti-Western, anti-capitalist attitude in his writings and speeches. He is fond of citing Marxist writers. He also admires black-power advocates like Stokeley Carmichael and Malcolm X.

Predictably, many WCC senior staff officers share Potter's views. Says Uruguayan Emilio Castro, head of the council's Commission on World Mission and Evangelism, "The philosophical basis of capitalism is evil, totally contrary to the Gospel."

A logical result of the WCC's evolution into high-profile social activism is the Program to Combat Racism (PRC), which had a budget of $1 million last year. An official of the PCR is Prexy Nesbitt, an American who came to the WCC from Washington's Institute for Policy Studies, a leftist research organization dedicated to radically changing U.S. political and economic life.

Grants from the PCR's Special Fund, to which donors make specially earmarked contributions, are supposed to be used for humanitarian activities. And, since 1970, the PCR has officially given over $5 million to more than 130 organizations that are ostensibly fighting racism in some 30 countries. But nearly half of that money has gone to guerrillas seeking the violent overthrow of white regimes in southern Africa. That has included the Soviet-backed MPLA of Angola ($78,000), the Marxist FRELIMO in Mozambique ($120,000), and SWAPO in Namibia ($823,000), which is Russian-supplied and Cuban-trained.

BLIND EYE

Africa is not the only area favored with PCR manna to fuel organized social agitation. Special Fund money has gone to Aboriginals in Australia, Eskimos in Canada, Koreans in Japan, Moroccans in France, and to Haitians, Chicanos and farm workers in America.

The WCC seems to be making a special effort in the United States, where, PCR director Anwar Barkat says, "racism is the predominant reality." Nearly 40 American groups have received a total of $572,500. Among the recipients:

The National Conference of Black Lawyers, an affiliate of the International Association of Democratic Lawyers—a group listed by the CIA as an international Soviet-front organization.

The American Indian Movement, which, according to a 1976 Senate Internal Security Subcommittee report, has ties with Cuba, China, the Irish Republican Army, the Palestine Liberation Organization and the U.S. Communist Party.

The Center for National Security Studies, a leftist organization that monitors the CIA and the FBI and advocates further restrictions on American intelligence operations.

Incredibly, not a cent of PCR money goes to dissident groups in the Soviet Union, where the government practices overt repression of ethnic and religious minorities such as Lithuanians, Ukrainians, Moslems and evangelical Christians. Marxist governments in general—and the Soviet Union in particular—get kid-glove treatment by the WCC.

Usually so articulate on human rights, the WCC turns a blind eye to the plight of Ethiopia, where the Marxist government has summarily executed over 10,000 persons for political reasons and closed more than 200 churches. When the WCC Executive Committee got around to mentioning the Soviet invasion of Afghanistan, two months after the fact, it said merely that the move had "heightened tension"; in the same communiqué, it went out of its way to express "serious concern" over the NATO decision to deploy new missiles in Europe.

WCC officials justify the lack of public criticism of Soviet human-rights violations by arguing that, with the Kremlin, private approaches are best. In fact, the few polite inquiries the WCC has sent to Moscow—about trials of Russian religious dissidents, for example—have had no visible effect.

The council also contends that not criticizing the Russians ensures that the Russian Orthodox Church will not resign from the WCC in protest. But being gentle with the Kremlin is a high price to pay for the continuing membership of the Russian Orthodox delegation. As Bernard Smith, head of Britain's Christian Affirmation Campaign, asks, "Is this an admission that the WCC is being blackmailed into silence by the Russians? Or does it mean that the WCC is a willing partner to a private arrangement by which the Russian delegates agree to retain their seats provided there is no criticism of the Soviet Union?" Either way, Russian membership effectively neutralizes WCC criticism of socialist countries.

Even before the Russians were admitted to the WCC in 1961, Martin Niemöller, a leading West German theologian who was involved in the long negotiations, asked, "Is there really a church there or only a propaganda instrument? Is the Russian church a servant of Stalin first or of Christ first?"

After years of delay the Kremlin authorized the admission of the Russian church to the WCC at the height of Khrushchev's determined persecution of Russian Christians, one of the worst in the history of the Soviet Union, when over 10,000 Orthodox churches were forcibly closed. Allowing the Russian church to join the WCC tended to camouflage that action and forestall outside protests. Judging by the results, it was a shrewd move.

SOUL-SEARCHING TIME

The WCC today faces a growing backlash. It began with Protestant laity, who have been voting with their feet and their pocketbooks. The United Presbyterian Church, which gives more per capita than any other American WCC affiliate, has lost nearly one million members in the last decade. As one Presbyterian lay representative has observed, "We hear deep resentment about the World Council from many church members. They simply feel that the WCC is dominated by people with a leftist ideology." Financial support by U.S. congregations for activities like the WCC has dropped drastically, to less than half of what these activities received in the past.

The grass-roots backlash is now gaining the support of theologians and professional churchmen. Lutheran theologian Richard John Neuhaus, for instance, says, "The WCC has almost became an anti-ecumenical organization by using social and political criteria to distinguish good guys from bad guys. This creates much sharper divisions in the church than any of the old denominational and doctrinal problems did." Says West Germany's Peter Beyerhaus, head of the International Christian Network, "If we don't succeed in bringing the WCC back onto a course that represents its true calling, it would be far better to simply dissolve it."

Plans are now being made for the WCC's Sixth General Assembly, scheduled for July 1983, in Vancouver. This, say many church authorities, is the time for the council to search its soul and rediscover its ecumenical purpose. This time, instead of leaving the entrenched WCC bureaucracy free to determine the assembly's results beforehand, member churches need to take the initiative.

The world's Christians today generally agree that the church must be present with its unique witness on the troubled international scene. For the best example of how to do that, however, WCC officials need turn not to Karl Marx but to Jesus Christ.●

ADDITIONAL UNEMPLOYMENT BENEFITS (EXPLANATION OF H.R. 7327)

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. FORD of Tennessee. Mr. Speaker, the unemployment rate is now 10.4 percent and rising. Over 11 million Americans are out of work. Areas of this country are experiencing what can only be described as a depression and no one can predict when the economy will begin to recover.

In response to this alarming rate of unemployment, and the terrible hardship faced by the millions of unemployed, in August the Congress passed a temporary Federal supplemental compensation (FSC) program. (This

program was included in the Tax Equity and Fiscal Responsibility Act of 1982.)

Under the FSC program, which began on September 12 of this year, jobless workers who have exhausted all other State and Federal unemployment benefits may receive additional weeks of federally financed benefits. The number of weeks of FSC benefits that jobless workers may receive depends on (a) the number of weeks of regular State unemployment benefits received by each claimant, and (b) the State in which the claimant lives. Qualified claimants are entitled to receive FSC benefits for one-half of the number of weeks they received regular State unemployment benefits, up to a maximum of 10, 8, or 6 weeks. The maximum is 10 weeks of FSC benefits in States in which Federal/State extended benefits are being paid or have been paid at any time since June 1, 1982.

A maximum of 8 weeks is payable in States in which the insured unemployment rate equals or exceeds 3.5 percent; and up to 6 weeks of FSC can be paid in all other States. As of November 13, the FSC maximum was 10 weeks in 38 States, 8 weeks in 3 States and 6 weeks in 12 States. (A copy of the most recent "FSC trigger status, "which shows the number of weeks of FSC benefits payable in each State as of November 13, is included at the end of this statement).

FSC is a 6-month program that will expire on March 31, 1983. When enacted, it was hoped that strong signs of economic recovery would emerge during the program's 6-month duration creating new employment opportunities. FSC was intended to bridge the gap for jobless workers until new employment became available. Unfortunately, recovery is not eminent and thousands of jobless workers are exhausting FSC benefits without finding new employment. The exhaustion rate will increase over the next few years.

Yesterday, I introduced legislation, H.R. 7327, that will provide additional weeks of FSC benefits. H.R. 7327 would make the following changes in the FSC program:

(1) For jobless workers who first received FSC benefits on or before December 1, 1982 (including those who have already exhausted their FSC benefits) the maximum number of FSC benefits payable in all States would be increased by 5 weeks. In other words, the 10 week States would be increased to 15, 8 week States would be increased to 13, and 6 week States would be increased to 11.

(2) For jobless workers who first receive FSC benefits after December 1, 1982, the maximum number of FSC benefits would be 13 weeks in all States.

The bill does not extend the FSC program beyond the current expiration date of March 31, 1983. The Congressional Budget Office estimates that the additional benefits provided under H.R. 7327 will increase the cost of the FSC program by $650 million.

To deny this help for our Nation's unemployed would be to turn our backs on the pain and suffering caused by this recession. I urge my colleagues to support this vital legislation.

FSC TRIGGER STATUS AS OF NOVEMBER 5, 1982

State	10 Weeks	8 Weeks	5 Weeks	Effective date
Alabama	x			B 10 Week, Sept. 12, 1982.
Alaska	x			B 10 Week, Sept. 12, 1982.

TRIBUTE TO CHARLES L. KORYDA

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. WOLF. Mr. Speaker, Charles L. Koryda, principal at Hutchison Elementary School in Herndon since 1977 died of a heart attack this past summer. The community he served was deeply saddened by his death—he was a big man with a generous heart who really cared about the school, the employees in it, and his many friends in our area.

Mr. Koryda had an effect on each life he touched. He believed that we could truly effect changes in the lives of children and that working with children was just about the best thing we could ever do.

Charles Dickens once said that we change the world through small acts of generosity. Mr. Koryda felt that working with children involved daily acts of generosity—of spirit, effort, composure, trust, and caring—that reached each person in the school and ultimately had a ripple effect in the community. He encouraged this attitude in each of us and respected and encouraged the individuality of our methods used to create these changes.

Our lives have been truly blessed and enriched because he touched us.●

LEST WE FORGET

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. DORNAN of California. Mr. Speaker: During this past July at the annual meeting of the National League of Families, I had the privilege of hearing some very poignant lyrics in honor of our MIA's and POW's written by young Joseph Doyle, son of an MIA hero and president of Operation MIA/POW of Texas Tech University. The lyrics were so moving that I would like to submit them as a tribute to those 2,500 brave men still unaccounted for.

DADDY'S LITTLE PRINCESS

(Joey Doyle)

Daddy's little Princess
He's her favorite hero
Now he's gone to war
And the Princess watched him go
She's the apple of his eye
Daddy's little girl
Waiting for her hero to come home

When the war was ended
The soldier boys came home
But the princess could not find her hero
She asked everyone in a uniform
And watched each returning plane
Everyone remembered her pleading voice
She said, "have you seen my daddy, was my daddy on that plane
Someone please tell me where did my hero go."

Years have past and days get longer
The Princess stands alone
Her tender sweetness bitter now with scorn
But her daddy's not forgotten by her and she knows she's still his girl
It only hurts when she thinks of how he's Forgotten by the world

What will it take to give back to her
The hero that she loves
To reunite the hero and the Princess
Her strength and courage can teach us all a lesson about love
Her tears and broken heart can teach us pain
I wish her determination could motivate our nation
To reunite the Princess with her missing soldier boy
To put her mind at ease about her daddy's unknown fate
Though he's been gone for years it's not too late

There's no ring on her finger
But there's a band around her wrist
That bear's the name of her hero
The father she has missed
It's an old one that has been rusted
By her hundred million tears
Her soldier boy is still missing
He's gone for now ten years.

WHERE DID DADDY GO?

(Joey Doyle)

For ten long years this New Years day
My woman's been alone
I left her with a baby, to raise while I was gone
I said I'd be home in a few short months
But I'm still not home today
And every night when I go to sleep
I can hear my little son say
Mommy what will happen when daddy comes back home
Will I be a big boy then, will I be full grown
Do you think he still loves me like he did so long ago
It's been so long since he's been home mommy,
Where did daddy go.

Was my daddy a brave man, will I ever see him again
Does Jesus love him too mommy and does God know where he's been
Did he have a puppy mommy, like the one that you gave me
I named my puppy Colonel mommy, cause that's what daddy used to be.

I'll bet that he was handsome and as nice as nice can be
Do I look like him mommy, does he look like me
And what it he's hurt or maybe he can't walk
Will you still love him then, and mommy tell me just once more,
Where has daddy gone.

Was my daddy a brave man, will I ever see him again
Does Jesus love him too mommy and does God know where he's been
Will he ride me on his shoulders and play with me in the park
And will he read me a story mommy, when I'm afraid of the dark

What if he don't like me, will he go away again
And what if he don't come home at all, what would happen then
When will I ever meet him mommy, when can I see my dad
Daddy please come home to us so mommy won't be sad.

For ten long years I've been away and lived in agony
Just thinking of my wife and child living without me
Won't someone tell my wife and son, where I'm at and how I am
I'm a missing soldier boy lost in Vietnam.

MY DAD'S AN M.I.A.

(Joey Doyle)

My dad has not come home yet, he's been gone for many years
I haven't seen his face as yet but I've seen mother's tears
I remember how he made me laugh, and made my mother smile
Now mother says he's gone away, he won't be back for awhile
My sister says he went to war, he hasn't come home yet
He fought in Laos and Vietnam but he'll be home I bet

My dad's an M.I.A. sir, my dad's an M.I.A.
He hasn't come home just as yet but I know he will some day
My dad's an M.I.A. sir, my dad's an M.I.A.
He hasn't come home just as yet but I know he will some day

A letter came the other day that said dad wasn't found
He's just like 25 hundred other men lost on foreign ground
The rest of my life will be spent in hope as I live from day to day
Wondering and hoping to hear from dad, a U.S. M.I.A.

DON'T LET THEM BE FORGOTTEN

(Joey Doyle)

Don't let them be forgotten, they never have a nice day
Whatever happened to my son, he's still not home today.
Let them know that we still care, send a letter over there
It's more than any man can bear, join us now and say a prayer.

My little girl asked me the other day, "tell me daddy what's an M.I.A.
I wiped a teardrop from my eye, not wanting her to see me cry
I propped her gently upon my knee, and then I begged her to listen to me.

A missing man in a far away land, fighting someone else's war
Years of praying that he's still alive, does anyone care anymore
They tell me all is over now, but this I can't believe
My boy called out to me today, and it wasn't just a dream.

Tell me sir, where is my son, he hasn't come home like you promised
Uncle Sam, sir, where is Sean and Bill and Dave and Greg and John.
I heard the news I saw the photographs, 2,000 men can't disappear
This Vietnam has got my boy, my only son, my pride and joy
A U.S. soldier's unaccounted for, it's up to you America
To open his door.

Don't let them be forgotten! ●

PERSONAL EXPLANATION

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 1, 1982

● Mr. McDONALD. Mr. Speaker, due to my required presence in Atlanta, Ga., earlier today, I regrettably missed a vote. Therefore, I would like to take this opportunity to explain how I would have voted had I been present.

"No" on rollcall No. 402, passage of H.R. 7204, Labor and Health and Human Services appropriations for fiscal year 1983.●

SHOULD THE UNITED STATES ACT AGAINST ILLEGAL WHALING?

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. BONKER. Mr. Speaker, in the coming months the United States will face a crucial test of our longstanding commitment to whale protection: whether to act against countries which violate International Whaling Commission (IWC) regulations. The challenge will come from Japan, the Soviet Union, Brazil, Iceland, Korea, and Norway as they set out this winter to hunt minke whales with the cold—nonexplosive—harpoon, a weapon whose use the IWC has banned. As chairman of the House Foreign Affairs Subcommittee that oversees the IWC, I believe we must respond strongly and unequivocally to countries that willingly flaunt IWC rules.

The cold harpoon is a particularly cruel weapon. The time from strike to death takes from 3 to 50 minutes in the smaller minke whales—which average 27 feet in length—and can take several hours in larger whales. The nonwhaling states of the IWC have argued simply that the cold harpoon is an inhumane weapon; the whalers, led by Japan, have contended they must continue to use the cold harpoon to kill minke whales because explosive harpoons "damage too much meat."

The IWC first recognized the cold harpoon as an inhumane weapon in 1979. The following year, the annual IWC meeting overwhelmingly adopted an American proposal to ban the use of the cold harpoon for the taking of all whales but minkes. In 1981, the Commission agreed by consensus to extend the ban to include the taking of minke whales. However, Brazil, Iceland, Japan, Norway, and the U.S.S.R. filed objections to this decision, making use of a loophole in the 1946 Whaling Convention to exempt themselves from the ban.

While the IWC itself has no authority to enforce its rules, the United States does have sufficient clout to assure that the whaling nations abide by the cold harpoon ban. Under the 1971 Pelly amendment to the Fishermen's Protective Act and the 1979 Packwood-Magnuson amendment to the Fishery Conservation and Management Act, the Secretary of Commerce, in consultation with the Secretary of State, is required to certify to the President a country which is engaged in activities "in a manner or under circumstances which diminish the effectiveness of the IWC." Upon certification, the offending nation automatically loses 50 percent of its fisheries allocation in the U.S. 200-mile zone. The President then has the discretion to impose a partial or total ban on imports of fisheries products from that country.

Prior to the enactment of the Packwood-Magnuson amendment, the United States successfully used the threat of the Pelly amendment sanctions to persuade the U.S.S.R., Japan, Peru, Chile, Korea, Spain, and Taiwan to comply with various IWC regulations. Now, the United States must reaffirm its intent to invoke these amendments against any whaling nation which chooses to ignore the cold harpoon ban.

Mr. Speaker, I wish to submit for the record the following excerpts from the IWC's 1980 workshop on humane killing techniques for whales. I hope this will broaden our understanding of the need to stand firmly behind the ban on the cold harpoon.

REPORT OF THE WORKSHOP ON HUMANE KILLING TECHNIQUES FOR WHALES, CAMBRIDGE, NOVEMBER 10-14, 1980

The workshop considered the question of its terms of reference, which were defined only so far as indicated in the Introduction above. Discussion of the meaning of the word "humane" brought out the fact that there are a number of factors potentially or actually involved before or beyond any pain caused when the whale is killed. In the case of whales, these include the pursuit and in some cases selection of one individual from a group of whales, resulting in stress and possibly fear and panic both in the target whale and other whales nearby.

These components of the whaling activity need consideration to ensure the fullest possible interpretation of the humaneness of the whaling operations. However, the present group recognised the deficiency of accurate ethological knowledge of the whale. Realising it did not possess the required expertise to deal fully with this aspect of the subject, it confined its own observations to the direct components of the killing operation surrounding the activities whereby the whale is struck in such a way as to induce rapid unconsciousness and death.

It was suggested that this approach would also permit reference to be made to aboriginal whaling and the despatch of stranded cetaceans, in so far as any conclusions on humane and expeditious techniques for killing were relevant to these other subject areas.

As a working definition it was accepted that humane killing of an animal means causing its death without pain, stress or distress perceptible to the animal. That is the ideal.

Any humane killing technique aims first to render an animal insensitive to pain as swiftly as is technically possible. In practice this cannot be instantaneous in the scientific sense.

The group noted that the development of a means of achieving a rapid, painless death would also and incidentally increase the efficiency of the whaling operations and improve the quality of the meat obtained (by reducing the stress caused to the whale). Thus the commercial whaling industry is interested in attaining the same objectives.

SMALL WHALES

In both pelagic and small-type minke whaling, cold (i.e. non-explosive) grenades are used, since the explosive grenade used for larger whales destroys too much meat. The gunner again aims just behind the flipper along the horizontal midline, although in this case the gunner relies on shock waves rather than hemorrhaging to kill or render the animal unconscious. If the whale is not killed instantaneously in the Japanese operations, an electric lance is employed (see Section 3.2).

In 1979, legislation was introduced in Norway requiring each small-type whaling vessel to carry and use a large calibre rifle (minimum calibre 7mm, minimum impact energy 350 Kkgm at 100m) to kill the whale after it has been hit by a harpoon. Initial reports suggest that this method has proved successful in those instances where it has been used.

ELECTRICAL METHODS

An electric lance is used in Japanese pelagic minke whaling when the first harpoon fails to kill the whale. The electrodes are inserted on either side of the heart and an electric shock is applied. Experiments have shown that a 110v AC 60-cycle power source is most effective, with death occurring 4-5 minutes after the shock is first applied.

Research into improving the design of the lances and the power supply is continuing.

OTHER TECHNIQUES TRIED

(a) CO_2 injection.—This method of killing whales has three potential advantages:

(i) Death by embolism should be rapid and, as it is not essential to hit a vital organ, the effective target area is large;

(ii) The injection of gas should ensure that the whale floats when dead;

(iii) The meat should not become tainted as quickly as it does when air is injected for buoyancy, because the body temperature would be lowered and because CO_2 does not support oxidation.

However, several problems emerged when the method was tried circa 1959. Two approaches were developed, one involving a harpoon with a liquid CO_2 cylinder attached and the other employing a lance to inject CO_2 after the whale had been struck by conventional means. In the case of the harpoon/cylinder technique, it was found that the cylinder nozzle became blocked with frozen CO_2 preventing complete release of the gas; that the meat around the cylinder was freeze-burned; and the interaction between blood and CO_2 blackened the meat rendering it unacceptable for human consumption.

It was noted that with respect to point (c) above, whales contain many anaerobic bacteria and that unless processing occurred soon after injection with CO_2, then decom-

position by these bacteria might actually be promoted by CO_2.

Diving animals such as whales are more tolerant to high levels of CO_2 in the blood and the effect of CO_2 injection might therefore be expected to be slower. However, the mechanism by which CO_2 injection would affect the brain is not by CO_2 narcosis but by gas embolism. The subject of gas embolism is further discussed in Section 4.

(b) Explosive bullets.—Explosive bullets (containing 10-15g of black powder) were first used experimentally by Japanese whalers in the Antarctic in 1973/74. However, it was found difficult to shoot accurately in field conditions. The use of explosive bullets was discontinued after the development of the electric lance (see Section 3.2).

(c) Drugs and poisons.—Whalers have experimented with drugs since the 1830s when prussic acid was tried but very quickly stopped due to the subsequent death of whalers who handled poisoned blubber. Other drugs tried included a mixture of strychnine and curare in the 1860s. More recently Japan has carried out ten experiments since 1964 using succinylcholine but has not continued the work for reasons of safety and practicality.

(d) Electrical harpoons.—Electrical harpoons have been tested intermittently since 1852. Generally the technique has been one involving the passing of a current through the whale line to the more or less standard harpoon fixed into the whale. It is reported that large numbers of whales (over 2,000) were killed by this method before World War II, but British, Norwegian and German experiments employing various conductors and currents all encountered technical problems associated with crew safety in the use of electricity at sea, stretchable conductors, and current leakage.

RECOMMENDATIONS

The workshop was very appreciative of the technical expertise which has been brought together by the Japanese authorities in their national group to improve whale killing technology, and which was made available to this meeting. It strongly supports and encourages the research programme which is being pursued, especially the developments and field testing of penthrite explosive.

The workshop also encourages the proposals by the Norwegian authorities to investigate high velocity projectiles for use in its small-type whaling operations.

The workshop endorsed the following specific recommendations for future action:

1. Harpoons using penthrite.—Penthrite explosive harpoons are thought to have an excellent potential for producing rapid and humane death in struck whales. The penthrite produces an explosive force over six times more powerful than the presently used black powder, providing an initial explosion with great concussive force and potential for rupturing blood vessels. In addition, large amounts of CO_2 and other gases are produced by the explosion which could cause emboli preventing blood circulation to the brain.

A series of experiments should be conducted on some cetacean above the dolphin size (e.g. pilot whale or larger) that can be anaesthetised and properly instrumented for recording electroencephalogram, electrocardiogram and blood pressure. Such instrumented, anaesthetised animals could then be struck by penthrite harpoons of varying charge. Strikes should be made in the thorax (simulating an on-target shot), in the abdomen (simulating a slightly off target shot), and in the dorsal musculature (simulating a further off-target shot).

If, for example, 20g of penthrite is effective for a pilot whale the charge could be scaled up for the minke and larger whales. It is believed that the expertise and capability to carry out these experiments are available.

2. High velocity projectiles.—Research into the use of high velocity projectiles in the Norwegian minke whale fishery should be pursued. Projectile size, construction and velocity, and target area need to be investigated.

3. Electrical methods.—Similar controlled studies to those outlined for the penthrite grenade should be undertaken to determine the effect of electrocution (both by a single harpoon and two electrodes) at various places in the body (particularly the brain and the heart) in consultation with electrical engineers. It is particularly important to determine the pathways taken by an electric current through the whole body in salt water.

4. Time to death or unconsciousness.—The Workshop recognized the practical difficulties in determining unconsciousness or death at sea. It recommends that observations on the behaviour of whales during the actual killing process be made. In particular the times taken for the mouth to slacken, the flipper to slacken and all movement to cease should be recorded along with information on the location of the harpoon and the damage caused to the animal.

The observations should also be made on the animals used in the controlled experiments described above in order to evaluate the criteria used to judge unconsciousness and death in the field.

5. Use of drugs.—The use of drugs such as etorphine hydrochloride should be further investigated with respect to stranded animals and animals killed for non-human consumption. In particular, safety problems associated with the use of powerful drugs in the field and the dose required, the action of the drug and any residues should be studied.

Research into the metablolism of carbohydratres is necessary to determine the effect of insulin on cetaceans.

6. Information on the failure of grenades to explode should be obtained. This should include the collection of data on failure rates in different operations, and the reasons for failure.

7. Possible improvements in techniques used to kill large and small whales in aboriginal/subsistence fisheries should be examined as a matter of urgency. This might be done in the context of the *ad hoc* Working Group on Management Principles for Subsistence Whaling to be held in July 1981.

8. Paralysing drugs should not be used for catching or killing cetaceans, since they do not produce loss of consciousness.

9. The IWC should continue to evaluate humane killing methods and their adaptation to the humane killing of whales. It is the opinion of the workshop that an evaluations of the present field studies, research and other observations of killing methods should be carried out by appropriate experts.●

SUPPORT FOR AIDS RESEARCH

HON. PHILLIP BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. PHILLIP BURTON. Mr. Speaker, the issue of providing adequate Federal funding for research into the causes of Kaposi sarcoma and related immune-deficiency diseases is one which this Congress must address.

The appropriation which we are voting on today must be the beginning of a massive national effort to confront a major health problem.

Like legionnaire's disease and like toxic shock syndrome, the acquired immune deficiency diseases are a public health issue which is the responsibility of the Federal Government.

The medical struggle to understand, and ultimately to defeat, the acquired immune deficiency syndrome (AIDS) is likely not to benefit those who might contract the disease, but also to increase greatly our understanding of the nature of the immune system and of cancer itself.

The issue of adequate, long-term funding for AIDS research, then, is not simply a matter of fulfilling our public health responsibilities to the gay community, which has so far borne the brunt of this epidemic, or to the major metropolitan areas, where this epidemic is now centered—although these responsibilities alone more than justify the funding which we request. What is at stake here also is an opportunity to gain medical knowledge which could greatly enhance our ability to strike a blow at cancer—probably the major health problem of modern times.

This would be of enormous value not only to those who suffer during this epidemic, but to all the people of this country.

I urge my colleagues to join in supporting this appropriation and all future measures needed to respond adequately to the health crisis which we now face.●

REMARKS DURING INTRODUCTION OF BILL TO BAR SOCIAL SECURITY CHECK DELIVERY ON FRIDAYS

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. BIAGGI. Mr. Speaker, today I am introducing legislation to assist the millions of elderly now receiving social security benefit checks from experiencing unnecessary delays in their delivery. It has been brought to my at-

tention that a number of elderly citizens now receive their checks on Friday, and thus, are often unable to go to the bank and cash them before Monday. Given the fact that social security remains the sole means of support for 26 percent of current recipients and the primary means of support for an added 40 percent, such a change would ease the lives of many of these dependent senior citizens.

Social security checks are now delivered on the third of every month. This date was chosen when the system was first put into place in 1940 at the request of the Post Office because it feared that delivery on the first day of every month would only worsen the normal load of mail that must be delivered on that day. The Social Security Amendments of 1977 went one step further and stipulated that when the third of the month falls on a weekend or holiday, the payment is due to be delivered the preceding, usually a Friday. Obviously, this exacerbates the problem of Friday check delivery.

My bill would address this problem by also prohibiting mail delivery on Fridays, so that recipients would have ample time to go to the bank and cash their checks. It is a simple solution, that could easily be achieved administratively by the Social Security Administration.

There are a number of proponents of the "direct deposit" method of delivering checks who claim that this type of delivery—directly to the recipient's bank—most quickly addresses the problem. Our experience has been that this method is highly unattractive to the same elderly who are frightened by the presence of their check in the home for the duration of the weekend. The direct deposit system could ultimately benefit all social security recipients but will not do so unless it is utilized by all recipients. Under my bill, the fears of all recipients could be allayed.

As an original member of the Select Committee on Aging, I feel that we must continue to seek ways in which to ease the many fears which continue to plague social security beneficiaries today. I am pleased that our distinguished chairman of the Social Security Subcommittee, Mr. PICKLE, will be considering technical amendments to the Social Security Act next week. It would be my hope that my legislation could be incorporated in this bill, H.R. 7326, which makes minor, technical changes in the Social Security Act and does not, in any way, seek to change benefits or address question of finance of the system. The following is the text of my bill:

A bill to amend the Social Security Act to include Fridays among the days on which social security and SSI benefit checks may not be delivered, so as to assure (without postponing the delivery date) that the recipient of any such check will have a reasonable opportunity to cash or deposit it without delay

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 708(a) of the Social Security Act is amended by inserting "Friday," before "Saturday," each place it appears.

SEC. 2. The amendments made by the first section of this Act shall apply with respect to benefits for months after the month in which this Act is enacted.●

STOP GSA FROM CONTRACTING OUT VETERANS' JOBS

HON. MARVIN LEATH

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. LEATH of Texas. Mr. Speaker, yesterday the House approved the Edgar amendment to the Treasury-postal appropriations bill, H.R. 7158, which provides that funds available to the General Services Administration shall not be used to contract for jobs which are presently being performed by individuals as Federal civil service employees.

The Edgar amendment will stop the contracting out of some 13,000 jobs in the GSA during this fiscal year. I am told by representatives of the veterans' organizations and the American Federation of Government Employees that 80 percent of the jobs are held by veterans, under a provision of law which reserves these jobs for veterans so long as veterans are available. I am referring to section 3310 of title 5, United States Code, which was enacted in 1966, to help veterans of the Vietnam era make a successful readjustment to civilian life following their service.

It came as a shock to learn that the contracting out of these jobs has already begun in the GSA and, unless Congress acts promptly, it will be too late. Even more incredible is the fact that this was going on during the very week that the eyes of the Nation were riveted on Washington on Veterans' Day and the dedication of the Vietnam Veterans Memorial in memory of the more than 57,000 individuals who died in Vietnam.

BOB EDGAR's amendment is in line with an amendment that I offered, which has now become law, Public Law 97-306, which prohibits contracting out within the Veterans' Administration's Department of Medicine and Surgery for services which are determined to be direct patient care or incident to direct patient care. The Office of Management and Budget has shown a zealousness to carry out its circular A-76, which if successful, would have seriously impaired the capacity of the Veterans' Administration to provide the quality of medical care that veterans deserve and Congress intended.

In the same vein, BOB EDGAR's amendment will serve notice to the Office of Management and Budget that Congress does not tolerate contracting for civil service jobs which are reserved for veterans. I commend the House for promptly approving the Edgar amendment, and urge the Senate to do likewise. Time is of the essence and the Edgar amendment must be approved without delay.

Mr. Speaker, the message the House is giving the executive branch on the contracting issue is this, where veterans are concerned, there will be no contracting out for services—there will be no loss of jobs. In other words, the message is we are going to protect veterans and the programs that are designed to enhance the lives of those who served in defense of their country.●

U.S. FOREIGN POLICY IN CENTRAL AMERICA

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. SIMON. Mr. Speaker, Richard E. Feinberg, of the Overseas Development Council, had an article in the New York Times which calls for a reappraisal of U.S. foreign policy in Central America.

What he has to say makes eminent good sense, and I urge my colleagues to read it. And I urge the administration to read it and reflect on it.

The article follows:

FOR A NEW CENTRAL AMERICAN POLICY

(By Richard Feinberg)

WASHINGTON.—Why does the Reagan administration believe that its policies are working in Central America when many Central Americans perceive a deteriorating political environment? These different perceptions suggest we should reconsider U.S. interests in the region.

The administration's central objective is to reassert U.S. infuence in our backyard. To achieve this, it is fostering friendly governments, and fighting to keep less pliant leftist forces from power.

Largely through increased economic and military aid, the administration has successfully nurtured client regimes in El Salvador, Honduras and Costa Rica, and has corralled them into a pact with a foreign policy that echoes ours.

The administration believes that the left has been checked. Dominoes have not fallen and the Sandinista regime is less steady.

Many Central Americans see quite a different picture: declining incomes, rising violence, political polarization and spiraling tensions between states.

Foreign and domestic investors have fled political instability. Violence is escalating in

Guatemala, Honduras and, to a lesser degree, even in Costa Rica. The death toll has passed 30,000 in El Salvador. Centrist political parties and liberal institutions are crumbling.

Washington should recast its interests to be more in line with the region's needs—to give more priority to reducing violence, maintaining regional peace and fostering economic development. These objectives are consistent with the global imperative of containing Soviet power. Yet, they do not require that the United States impose its direct influence or ideological preferences.

Violence will be reduced only when regional and civil conflicts are contained or resolved. An appropriately recast U.S. policy would stop dragging Honduras and Costa Rica into confrontation with neighboring Nicaragua. Last week, fortunately, Nicaragua and Honduras opened talks to avoid a full-scale war along their border. There have been continuing accusations that the Honduran military has been allowing right-wing guerrillas to stage raids into Nicaragua from Honduran territory.

Rather than obstructing such talks, the United States should have been working toward an agreement providing security guarantees to both countries. Washington should also pursue talks with all interested parties to end the Salvadoran civil war.

Only when regional tensions are relaxed will capital return to Central America and economic growth resume. Only then could the administration's proposals for a free-trade zone and investment incentives work.

A new definition of our interests would free the United States to settle for a mix of friendly and non-aligned governments in Central America. It would allow us to tolerate leftist forces, provided that they demonstrate independence from the Soviet Union. We would welcome diplomatic initiatives by Mexico, Venezuela and Western Europe, even when they lessen U.S. influence.

A more pragmatic policy would serve U.S. strategic objectives by driving a wedge between socialist-oriented movements and Moscow. For example, a Nicaragua enmeshed in treaties with its neighbors, subject to influence from regional and European powers, and engaged in regional economic projects would be more likely to distance itself from the Soviet Union.

The administration's politics of confrontation may have unleashed forces in Central America that will resist, momentarily, a more flexible policy. But a policy that is more congruent with local interests stands a better chance in the long run.●

TRUCKERS AND TAXES

HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. IRELAND. Mr. Speaker, while I support a 5-cent-a-gallon increase in the Federal fuel tax at the refinery, I am not so sure about some of the other parts of the overall highway package just presented to the Congress. We cannot simply accept the myth that heavy trucks are responsible for all our highway damage. We also cannot so simply accept stiffer taxes on big trucks to repair highway damage.

The weather, traffic conditions, construction procedures, and oversight all are factors in the deterioration of a highway. We cannot view this issue in a vacuum. Most of the goods in the Nation move by truck. Higher taxes beyond a fuel increase may well damage an already battered trucking industry and also damage our economy by fueling inflation. We all know these tax increases will be passed on to the American consumer.

It is our duty to closely investigate anything beyond a mere 5-cent-a-gallon fuel increase. Therefore, I recommend to all Members of the Congress the following statement submitted to the House Ways and Means Committee by an independent trucker's group.

MARYLAND INDEPENDENT TRUCKERS AND DRIVERS ASSOCIATION, INC.,
Baltimore, Md., December 1, 1982.

Hon. DAN ROSTENKOWSKI,
Chairman, Committee on Ways and Means, House of Representatives, Washington, D.C.

DEAR CHAIRMAN ROSTENKOWSKI: The attached statement is submitted jointly by the Maryland Independent Truckers and Drivers Association, Inc., a group of owner-operators and drivers residing in Eastern Seaboard states, and the Truckers Action Conference, 1109 Plover Drive, Baltimore, Md. 21227, which is a small group of persons from around the country who are associated with the trucking industry either as owner-operators or small fleet owners.

We hope that the Committee will consider our statement along with others submitted orally today in the hearing concerning proposals to raise the highway use taxes.

We thank you for the opportunity to present our views.

Yours truly,

RITA BONTZ,
President, Maryland Independent Truckers and Drivers Association.

THEODORE E. BROOKS, Sr.,
Director, Truckers Action Conference.

Mr. Chairman and Members of the Committee on Ways and Means: The members of the Maryland Independent Truckers and Drivers Association and the Truckers Action Conference are stunned by the proposals to raise the highway use taxes.

These proposals come at a time when our expenses are at an all-time high—when freight rates are being cut far below our cost of operations—and when the amount of available freight is at a low.

We are fighting the most serious battle for survival that we have ever known. The trucking industry is in a tumultuous period as its components strive to adjust and survive the effects of deregulation initiatives that have already taken place.

We recognize that many of the Nation's highways and bridges are sorely in need of repair and replacement. We know that we, as do all highway users, contribute to the deterioration. We are willing to bear our fair share of the cost to repair and replace the highways and bridges.

But we believe that we have not only been paying our fair share over the years; we have been paying more than our share. And now we are being asked to pay astronomical increases in highway user fees and are being told that 20 percent of that money will be parceled out in block grants to states and cities to update and repair urban mass-transit systems.

This nation needs a stable, safe, and efficient trucking industry. And it needs independent truck owner-operators who are such a vital part of that industry. For example, we haul most of the Nation's produce and meat, much of its processed foodstuffs, nearly all of its heavy equipment, steel, a large portion of its manufactured goods, and a significant portion of military shipments.

These proposals will drive many of us out of business—forever. Truckers who have for years provided reliable service at a reasonable cost will disappear. They will be replaced by the inexperienced—those who will be able to survive in the industry only long enough to cause problems.

We are not asking to be excluded from helping to pay for the repairs and replacement of highways and bridges. We are only asking that our payment be a reasonable share.

It is unreasonable, we believe, to expect one group of users to bear such a disproportionate share of the costs. The proposals are being touted as costing the average motorist $30 a year. Not bad if it brings us road repairs and replacement. That's less than the cost of a pair of shock absorbers for the average automobile.

But let's look at what it will cost the average trucker. Most truckers will pay the $2,700 fee—or close to it. If the trucker drives 100,000 miles a year—not an unusual amount—there's an extra $1,000 for 20,000 gallon of fuel (at 5 miles per gallon). Increases in taxes on truck sales, parts, tires, tubes, and so on could add as much as $1,500. How does that compare with the $30 the average motorist pays? Is it in proportion?

This bill is being promoted as a measure to create new jobs. We see it in a different light. Our assessment of this bill can be summed up in three paragraphs.

First, the net gain in jobs will be minimal at best. We predict this bill, if enacted, will be a boondoggle in the truest sense of the word. There will be so many trucking industry people thrown out of work that their numbers may actually equal the projected number of created jobs.

Secondly, we truckers spend twenty, thirty, even forty years of our working lives on the highways. We watched the Interstate System being built. We see the repair work being done. We are out there every day and we can state in all sincerity that the major part of this work is not up to the standards which highway users have been paying for. One instance among hundreds comes immediately to mind. One of the writers of this statement travelled Interstate 80 across Pennsylvania the day it was opened. We saw hundreds of pavement cracks, concrete slabs rocking under the weight of vehicles and shooting muddy water 6 feet in the air, bridges so rough they threatened loss of vehicle control. All of this on the day the road was opened to the public. This is only one of many examples of poor design, poor workmanship, poor supervision, and waste of our money which are repeated over and over from coast to coast.

There is ten times more highway damage caused by poor construction and skimpy material than was ever caused by truck traffic. Truckers pay for this fraud in damage to their equipment, injury to their health, and damage to the goods they haul. Further taxation adds insult to literal injury.

Finally, passage of this bill in its present form would constitute an inflationary quick-fix for the sake of political expediency. It would place cost in varying degrees on those least responsible for the condition of our highway system and in large part on an industry which is least able to pay the grossly unfair and unrealistic share proposed by this measure.

We realize the fuel tax is unchanged over the last 23 years. We accept the 5 cent increase as reasonable and fair. To put this in perspective, the average truck will pay tax on 20,000 gallons of fuel per year, a rate of payment at least 40 times that paid by the average motorist.

We deem totally unacceptable the astronomical proposed increases in user and excise taxes. And we especially reject the concept of diversion of highway taxes into non-highway uses. We consider these sections of the bill to be unfair, unlawful, and confiscatory.

We sincerely hope that Congress will consider the potentially devastating long-term effect of this bill as it is now written. And finally, we hope the Congress will take the steps necessary to ensure that those who provide the funds for the Highway Trust Fund receive fair value for the taxes paid.

Thank you for considering our views.●

THE REAL LESSONS OF VIETNAM

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. DORNAN of California. Mr. Speaker, in the 10 years (Jan. 27, 1983) since the last American soldiers began leaving Vietnam, our involvement in Southeast Asia has been tainted by criticism and remorse. As time rinses away the verbal scales from our eyes, we can begin to acknowledge the reasons for our involvement in Southeast Asia. Mr. Speaker, I am submitting a review by Mr. Jeremy Leggatt because I feel that it testifies to the nobility of the cause for which our young men and women fought.

THE REAL "LESSONS OF VIETNAM"

(A review by Jeremy Leggatt)

In the nearly eight years since South Vietnam collapsed under North Vietnamese invasion, food production in that once self-sufficient land has dropped so catastrophically that the population lives at malnutrition levels. Tens, perhaps hundreds, of thousands of South Vietnamese have been executed or have died in the communists' vast system of "re-education camps." There is no way of estimating the toll in the slave-labor camps established to tame South Vietnam's "new economic zones"—jungle areas notoriously incompatible with human life. Nor is there any way of counting the numbers who have fled, or attempted to flee, the repression.

Americans have shifted their sight from Vietnam to Central America, the Persian Gulf, and concern over the flagging national economy. Our 13-year war in Southeast Asia, and the crippling self-interrogation that accompanied it, are quickly fading in our memories.

One American who refuses to forget is Norman Podhoretz, editor of Commentary magazine and a former critic of U.S. involvement in Vietnam. In Why We Were in Vietnam, Podhoretz recalls, "The United States sent half a million men to fight. . . . More than 50,000 of them lost their lives, and many thousands more were wounded. Billions of dollars were poured into the effort, damaging the American economy to such an extent that the country's competitive position was grievously undermined. Perhaps most destructive of all, millions of Americans growing to maturity during the war developed attitudes of such hostility toward their own country that their willingness to defend it in the future was left in doubt."

Just what was in it for America?

We are still split on the question of Vietnam. In May 1977 President Jimmy Carter spoke of "the intellectual and moral poverty" of the policies that took us into the war. Three years later Ronald Reagan called the war "a noble cause." Reagan's unfashionable contention set off—as Robert W. Kagan wrote in The Wall Street Journal—"titters throughout America's better-educated set." And yet, says Podhoretz, "the story shows that Reagan's remark was closer to the truth than Carter's denigration of an act of imprudent idealism whose moral soundness has been so overwhelmingly vindicated by the hideous consequences of our defeat."

In retelling the painful story of the Vietnam war, Podhoretz bulldozes the ramparts of myth that have obscured the realities and continue to cloud our foreign-policy attitudes today.

CONTAINMENT ON THE CHEAP

One of the most persistent myths is that President John F. Kennedy committed uniformed U.S. forces to South Vietnam against his better judgment. Not so, says Podhoretz. As a Senator, Kennedy stated his position plainly in 1956 (the year North and South Vietnam were scheduled, under the Geneva agreements that terminated French rule, to be unified under a "freely elected" government). "Neither the United States nor Free Vietnam," declared Kennedy, was "ever going to be party to an election obviously stacked and subverted in advance" by the communist North and its agents in the South. Free Vietnam, said Kennedy, was "a proving ground of democracy" and "the cornerstone of the Free World in Southeast Asia."

Kennedy's attitude was consistent with U.S. policy. The Truman Doctrine preached U.S. determination to "contain" totalitarian aggression worldwide. The United States had already demonstrated its military commitment to containment in divided Korea and divided Germany. Thus, when President Kennedy extended the Truman Doctrine to Vietnam, he enjoyed national support. Much of it came from people who would later spearhead the antiwar movement.

Kennedy's successors, Lyndon B. Johnson and (at least initially) Richard M. Nixon, were similarly committed to the containment principle. But all three Presidents, says Podhoretz, made the mistake of trying to meet their goals "on the cheap."

President Kennedy intervened in Vietnam on the military cheap. Ignoring his advisers, he hoped that "going in slow and small" with minimum military force would reduce the domestic political risks that a bigger show of force might trigger.

President Johnson sought to contain the Vietnamese communists on the political cheap. He readily assumed the burden of his predecessor's commitment, but either refused or neglected to build political support for the war within the United States.

Even after the Vietnam war had provoked protest marches and antiwar demonstrations, Johnson rejected advice, as author Guenter Lewy put it, to "provide the American people with a vivid foe." Instead, says Podhoretz, Johnson "confined himself to arguments about military tactics, leaving the moral question of American involvement to the radical opposition, whose wild arguments went almost unanswered." Trying to win on the political cheap lost Johnson not only the war but his office.

His successor, President Nixon, tried to win—or at least save face—on the strategic cheap. Nixon spoke only of how to get out of Vietnam; he saw no point in arguing about why we were there. The effect, once again, was to concede the moral and political arguments to the antiwar forces—who had become, in effect, the enemy within.

The rise of this adversary, says Podhoretz, is "one of the most amazing—and disquieting—aspects of the American experience in Vietnam." Opinion-makers clamoring for immediate American abandonment of an ally accused their own country of "war crimes" and "genocide."

REVERSED ROLES

What caused this turnabout? Partly to blame, says Podhoretz, was the "credibility gap." In the early years of the Vietnam conflict, reporters on the spot quickly noted discrepancies between gung-ho official reports and the reality of a struggle against a resourceful and determined enemy. But their realistic reports were edited back home to conform to the official we-are-winning line.

Exaggeration of battlefield data by the military soon caused all official reports on the war's progress and all government statements of our Vietnam policy to be discounted. By 1965 the unthinkable was commonplace: the President of the United States was being routinely charged with "lying."

Reporters alienated by inflated military claims now overreacted by inflating reports of communist successes. The most destructive example of this was coverage of the communist offensive launched during the 1968 Tet festivals. A coordinated attack by Viet Cong guerrillas on every major city in South Vietnam, it succeeded in places—briefly. As a whole, however, the Tet offensive was a shattering defeat for the Viet Cong. Their losses were huge, nearly 70 percent, according to one estimate: yet, says Podhoretz, Tet was reported as a crushing U.S. defeat. The antiwar movement fully exploited the Tet "disaster" as proof of the need for immediate U.S. withdrawal.

It was but a small step for much of the media to fall in line with those who held that America's mere presence in Vietnam constituted a crime. The notorious My Lai massacre, in which an American unit opened fire on defenseless villagers, was labeled routine. But no evidence ever surfaced to corroborate this. Similarly, reports of U.S. "terror bombing," of civilians butchered through pilot carelessness, of hospitals deliberately attacked, were rife. In reality, so stringent were the limitations placed on targets and attack approaches for American pilots that they were often sitting ducks for North Vietnamese gunners.

HISTORY'S WASTEBASKET

By the early '70's the national consensus was that, however bad communism might be, nothing could be worse than the genocidal war Uncle Sam had unleashed on Southeast Asia. This consensus guaranteed that any U.S. move to defeat the enemy would be

condemned in advance by U.S. public opinion. In the long negotiations between Henry Kissinger and the North Vietnamese, Kissinger's opposite numbers consistently countered his arguments and proposals with references to American public opinion.

Congress, responding to a nationwide mood of war weariness, gradually chipped away at our guarantees to South Vietnam. When North Vietnam finally invaded the South, Congress cut off our former allies without a bullet.

Within months of Hanoi's victory most of the arguments advanced by the American antiwar movement toppled into the wastebasket of history. First to go was the myth that the Vietnam war was a purely South Vietnamese struggle for self-determination. North Vietnamese personnel poured in to fill every top- and middle-rank position in the "liberated" South, while every southerner of leadership caliber was shipped off to "re-education" or worse. Regimentation and hardship became the rule.

The next myth to fall was that communism was preferable to the horrors of war. The most eloquent rebuttal of this came from hundreds of thousands of Vietnamese who sought to escape across jungle frontiers and by sea. That people traditionally bound to the soil where their ancestors are buried should rush to leave is revealing enough. That they should make the attempt by boat—knowing the heavy odds against surviving—is supreme proof that communism has indeed turned out to be worse than war.

RALLYING CALL

Podhoretz concedes that saving South Vietnam from communism was "not only beyond [America's] reasonable military, political and intellectual capabilities but ultimately beyond its moral capabilities as well." But he unequivocally asserts that the United States went into Vietnam "for the sake of an ideal"—in order to save an ally from what events have proved to be a dreadful fate. "One can characterize this impulse as naïve or describe it in terms that give it a subtly self-interested flavor," Podhoretz writes. "But there is no way in which it can be called immoral."

That the ideal was unattainable, says Podhoretz, is a tragedy with disastrous ripple effects. Since our pullout from Vietnam, the communists have felt emboldened to probe weaknesses and destabilize institutions everywhere. Despite this spurt in communist expansion in Afghanistan, Africa and Central America, the veterans of the Vietnam antiwar front have not recanted or accepted the lessons of the past. Indeed, "lessons of Vietnam" has become a potent antiwar rallying call. As politically naïve as any slogan concocted during the Vietnam war, its thrust is to prevent the United States from acting to counter communist aggression.

Podhoretz's essential point cannot be escaped: we were morally right to go in. Muddled, clumsy, ineffective—but right. The story he tells is one that must be heard and pondered—both to redeem the past and buttress the future.●

H.R. 6514—NOT A JOBS BILL

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. GARCIA. Mr. Speaker, I want to call my colleagues attention to an article in today's New York Times about H.R. 6514, the Immigration Reform and Control Act of 1982. The article states that supporters of the bill have said that it will help reduce unemployment.

The only cure for unemployment is to get the economy moving. The primary cause of this problem is not immigration but the faulty economic policies of the present administration. Blaming immigrants is scapegoating. This is not only unfair, it is dangerous.

It is unfair because, as I said, it is scapegoating. It is dangerous because if we erroneously blame immigrants, documented or undocumented, for our excessive unemployment rate, then we are hiding from the real problem—that Reaganomics is not working.

There was another point made in the New York Times article that also disturbs me deeply; that is, that the legalization component of the bill may be eliminated.

I can assure you that the only reason anyone in the Hispanic community would be willing to even consider supporting this bill is because of the legalization program. I believe this program, as included in H.R. 6514, does not go nearly far enough. If it is eliminated, it would be a travesty for all Hispanics.

Legalization is more than a tradeoff to the Hispanic community. It is an opportunity for the United States to wipe its slate clean, and to begin handling its immigration problems from a fresh start. Without a legislation program the underclass of undocumented persons in the United States will continue to become more and more alienated from the mainstream of American society. We do not need to expand our Nation's underclass. We need all people living and working in this country to join together to build for the future.

America was built by immigrants. Let us not scapegoat or chastise the most recent wave of migrants to come to the United States. Let us incorporate their enthusiasm and labor for our benefit.

H.R. 6514 should not be considered during a lameduck session. It is much too important a piece of legislation to be rushed. But if it is considered, the legalization program must not only remain in the bill, it should be expanded.

I submit the article from today's New York Times for the edification of my colleagues.

DRIVE TO REVAMP IMMIGRATION LAW IS GAINING

(By Robert Pear)

WASHINGTON, December 1.—Members of Congress appear increasingly eager to pass a comprehensive immigration bill this year, but there is growing support for efforts to delete a proposed amnesty for illegal aliens.

Since Congress reconvened Monday, supporters of the bill have been telling colleagues that it would help reduce unemployment by making it unlawful for anyone to employ an illegal alien. Thus, they say, the bill would open hundreds of thousands of jobs to United States citizens. Discussions of the bill on Capitol Hill have increasingly emphasized its restrictionist features.

The Reagan Administration still supports legalization as a component of the bill. But Justice Department officials said today, for the first time, that they would be willing to consider deferring legalization until the Government's enforcement capabilities had been strengthened.

House Democrats said the bill could come to the floor for debate as early as next week. Eliminating the amnesty provisions would profoundly alter the nature of the bill, which, its supporters say, represents a delicate balance between tougher enforcement and humanitarian changes.

The Senate and the House Judiciary Committee have approved comprehensive immigration bills that would offer permanent resident status to several million illegal aliens who entered his country before Jan. 1, 1977, and lived here continuously since then. The precise number of people who would qualify is unknown. The bills would offer provisional amnesty to illegal aliens who arrived from Jan. 1, 1977, to Jan 1, 1980. They could become permanent residents after a three-year waiting period. Permanent residents, in turn, can become citizens after five years.

David D. Hiller, a Justice Department official, said: "We were an early proponent of a realistic, properly limited legalization program. That is an appropriate part of an overall bill. However, there is a great deal of sentiment out there for deferring legalization until such time as we are convinced that enforcement measures are in place and effective."

If there was a strong push to delete the amnesty provisions, he said, "the enforcement parts of the bill should go ahead and the issue of legalization could be revisited later, when Congress felt more comfortable with it."

Deletion of the amnesty would cause great concern to Hispanic Americans, who see aggressive enforcement as a possible threat to their civil rights. But with more than 11.5 million Americans out of work, even some liberals in Congress have expressed reservations about granting amnesty.

Representative F. James Sensenbrenner Jr., Republican of Wisconsin, intends to offer an amendment to delete the amnesty provisions, which he described as "the most objectionable features" of the bill. "It seems ludicrous to be granting amnesty to millions of illegal aliens at a time when our country is suffering from such high unemployment," he said.

In a statement filed with the Judiciary Committee report, Mr. Sensenbrenner said that amnesty would set "a bad precedent" and encourage further illegal immigration. In addition, he said, it was "unfair to the hundreds of thousands of immigrant applicants, some of whom have been waiting as long as 10 years to come to this country legally."

Representative William J. Hughes, Democrat of New Jersey, said that Congress should not approve a "mass amnesty program" until it gave the Immigration and Naturalization Service more resources to enforce the law.

In September the House Judiciary Committee rejected, 16 to 12, a bid to delete the amnesty section of the bill.

Representative Romano L. Mazzoli, Democrat of Kentucky, and Senator Alan K. Simpson, Republican of Wyoming, the sponsor of the Senate bill, have repeatedly said that the legislation was "not nativist, not racist and not mean."●

RUBY AND DOUG JACKSON, CAPITOL HILL NEIGHBORS

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. McCLORY. Mr. Speaker, a virtual legend on Capitol Hill where my wife, Doris and I have resided during most of my years of service in the Congress is to be found in the home and in the lives of our close friends and neighbors, Ruby and Doug Jackson.

Ruby Jackson's account of her childhood years on Capitol Hill is a significant part of the history of the area and is a human interest story which I wish to share with my colleagues and with all who glean these pages of the CONGRESSIONAL RECORD.

Ruby and Doug Jackson's neat and well-groomed premises are located just around the corner from our home on Constitution Avenue. Our rear yards abut on the alley adjoining Frederick Douglass Court.

Ruby and Doug Jackson are respected, admired, and well liked in our neighborhood.

My wife, Doris, has transformed Ruby Jackson's account into a bit of Capitol Hill lore which I am attaching to these introductory remarks.

RUBY JACKSON: A "HILL PROFILE"

(By Doris Hibbard McClory)

This is the story of a Capitol Hill that once was—one we all might wish still existed—and one that may yet exist.

Ruby Rice was born in Lauren, South Carolina, population 450. She came to Washington, D.C. when she was two. She was one of nine children, including two sets of twins, of which Ruby was one. The only other living member of the Rice clan is a sister, one of the other set of twins.

Ruby's parents settled at 327 Constitution Avenue, Northeast—and the house is still there although somewhat changed.

Here's the way Ruby tells it: "Ma died when I was eight so my father and oldest sister raised us. Pop was a railroad worker and a strict disciplinarian.

When we were little we didn't even have to lock the doors. To keep cool, we'd leave the front door open—that's how safe we were. We'd sit out on the front porch and the only thing that bothered us was mosquitoes.

There was a grocery store at the corner of 4th and Constitution. The store owner lived upstairs and his name was Dapplebaum. On 4th Street between Maryland and Constitution was a blacksmith shop and nearby a seafood carryout which was really good!

There were frame houses all along Constitution Avenue except for 319 which was brick. At 3rd and A there was a Sanitary Grocery Store. That was a chain and they were all over the District. At 4th and Capitol was a big A & P and another one at C and 3rd. And, at 3rd and Maryland was another grocery store and by the school at 4th and C was a laundromat; it was a restaurant before that. Yup, there was a grocery store at every corner. We didn't have to walk far to buy anything. And it was always safe. My father never had to worry about us.

"Things started changing some in 1950 (her father died in 1946 and she, her sisters and brothers stayed on at 327). We stopped sitting on the porch. We didn't even own porch furniture after that. One day a man walked by as I was coming out of the house and said to me 'I didn't know anyone lived here'."

The house at 327 Constitution was sold along with many others when the speculators came in—and the Hill changed.

Fortunately for Ruby, she met Douglas Jackson, a Navy man, who had relatives on 4th Street who introduced them. In 1956, Ruby and Douglas were married and she and he bought the house at 120 4th Street Northeast, around the corner from her old home. They both liked living on "The Hill" and even though Douglas was from rural Virginia, they both settled here happily.

Back to Ruby: We never had any desire to move away. Everything was right here. It was a good place to live and the people were nice.

I can still remember roller skating and sledding down Pennsylvania Avenue. There weren't too many cars so we were safe. We always played in Stanton Park. They had sand boxes. We used to climb all over Stanton's statue, but one day it fell over in the wind. Thank goodness, we weren't there that day!

I couldn't go to Peabody School because then it was all white. I went to Logan School at 4th and G Northeast—it's still there. We always walked even in bad weather. Then I transferred to Giddlings at 4th and G Southeast. I went to Randall High School in Southwest.

When the speculators started coming in, the Hill started to be more transient. There were rooming houses all along East Capitol and Maryland Avenue. Tourist houses, too. Frederick Douglass Court was used for storing the carts the street cleaners used. The carts were lodged in a large garage. Up over the garage was an upholstery shop. Mr. Greathouse owned it and he lived on 3rd Street. Adjacent Millers' Court still has a lot of the original houses which have been renovated.

Frederick Douglass' nephew lived at 318 A Street, Northeast. We all liked him because he walked around and gave us candy—I can still remember him.

Capitol Hill Hospital—the only thing that's changed is the name. On one side was a stable and when I was 12, I had to have my appendix out. So, Pop and I walked to the hospital and they took me up over the stable and operated on me. Oh, it wasn't still a stable—they'd made it into a hospital by then!

We used to play some in Lincoln Park but then gangs started forming so my parents wouldn't let us play there. We mostly roller skated and rode our bicycles.

In those days, Capitol Hill was an area that extended from the Capitol to 4th Street—that was it!

Grubb's Drug Store (Which happily still exists at East Capitol and 4th) was an ice cream parlor where we sat and had sodas. Of course, the granddaddy of them all is Sherrill's Bakery and Luncheonette and it's still there on Pennsylvania Avenue.

We always played ball on the Capitol grounds. We relaxed on the benches there and that's where the boys and girls met.

The 1968 riots really made the biggest change. I was on the 4th Street bus near Gallaudet College and I couldn't wait to get home. The ice cream store at 7th and Constitution was bombed. It was scary. For three days all we saw was smoke and fire. We traded groceries with our neighbors so we all had enough to eat because nothing was being delivered. Yes—the riots—they made the real change. It was like war. People stopped saying hello to each other—and the Good Humor man didn't come by anymore. People used to keep their front yards nice and clean—and the streets and sidewalks were always neat.

Yes, the Hill has changed. Maryland Avenue which once was a series of boarding houses is now called "millionaires row."

And that is the story of Capitol Hill according to Ruby Rice Jackson. But, would she and Douglas live anywhere else? "Nope!" says Ruby. It's still the best place to live. Where else can I have an organic garden in my backyard and meet my neighbors over the back fence—and still be right in the city? And Princess (the Douglas dog)—she likes it, too! So, that makes it fine by me."

We, her neighbors, all call her "Our Ruby." Why? Because she's a top Hill Booster—an involved and active citizen of the area: Secretary of the Stanton Park Neighborhood Association; and up until recently the sparkplug behind the annual SPNA annual picnic: purveyor of home made ice cream (strawberry) and Douglas' specialty freshly-roasted hot dogs.

The Hill: it's a great place to visit and a great place to live!●

THE MANY WAYS MX IS HYSTERICAL

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. SIMON. Mr. Speaker, many of our colleagues were not in Washington on Sunday, November 21, when Walter Pincus had an exceptionally fine article about the MX and the various deployment systems.

Before we vote $26 billion for the President's latest proposal, Members ought to read this article.

THE MANY WAYS MX IS HYSTERICAL

(By Walter Pincus)

Wanted: An invulnerable, permanent home for at least 100 of the Air Force's gaint, 92-inch wide, 71-foot-tall, new MX intercontinental ballistic missiles. You know—the ones we must have to prevent the Soviet Union from attacking us.

Probably Monday, President Reagan will make his latest contribution to a saga that has now spanned 10 years and four administrations, a saga that would be simply hilarious if it weren't also serious. In each chapter of the saga, the administration of the day is searching for a safe place to put these missiles, whose 1,000 highly accurate warheads, each more than 10 times as powerful as the Hiroshima bomb, are supposed to be the needed answer to the Soviets' missile force.

Reagan's latest attempt to find a home for the MX come 13 months after the same Reagan announced on national television that "after one of the most complex, thorough and carefully conducted processes in memory" he had come up with a program for the MX.

The notions put forward that day in October 1981 for MX basing lasted well into the summer of 1982, but not much longer. The next chapter will unfold under the name of "Dense-Pack."

If there were not serious defense, diplomatic and domestic policy questions involved in this endless saga, the whole process could be seen as a bizarre satire on the Pentagon as a political and economic playground. The stars of the satire have changed with each change of administration, but the show has gone on year after year. The Reagan players don't seem to deserve any more ridicule than any of their predecessors, they just happen to be the current occupants of the major roles.

If you remember (and it would hardly be surprising if you don't), on Oct. 2, 1981, the president, with Secretary of Defense Caspar W. Weinberger by his side, went on national television to announce his plan "to revitalize our strategic forces and maintain America's ability to keep the peace well into the next century." It included building the B-1 bomber and developing a new Trident II submarine-launched missile. But the centerpiece of the program was the president's decision to go ahead with building 100 new MX missiles, placing the first 40 in existing missile silos that would be made much stronger—and thus less vulnerable to Soviet attack—by the addition of huge quantities of concrete and steel.

The administration would study three other schemes for deploying the other 60 MXs, announcing a decision later. So Reagan said last year.

The three options under study, Reagan said then, were deep underground basing, airborne basing or deceptive basing in silos, perhaps protected by a new antiballistic missile system.

What we didn't know at that moment but do know today, thanks to this newspaper's White House correspondent Lou Cannon, and his book "Reagan," is how the president reached that decision. According to Cannon's account, Weinberger had drafted the decision shortly before it was announced.

Weinberger made his decision at the last minute, after rejecting the advice of both his own expert panel and the Joint Chiefs of Staff, apparently in the hope that something better would turn up. The most embarrassing, but perhaps most illustrative, portion of Cannon's history of that moment is that Weinberger sold the nation's commander-in-chief on his proposal, not by explaining it in any detail, but rather by showing the president a cartoon from a newspaper which made fun of former President Jimmy Carter's plan for MX basing. That was the "shell game" idea—building 4,600 shelters for MXs, and shuttling 200 missiles from shelter to shelter to fool Soviet targeters.

The cartoon depicted a Carter-like figure showing three nutshells on a table to a Brezhnev-like figure, asking him to guess where the missiles were hidden. In the next panel the Brezhnev figure crushed all three.

"Reagan chuckled," Cannon writes, after explaining that the president was tired that afternoon, "and approved the Weinberger plan" without any explanation of it.

This certainly was not the first time a president has blindly accepted a defense plan from a trusted cabinet member. What's disturbing about this one is that Weinberger was, as one military man put it recently, "flying on his own." The defense secretary had ruled out the Carter plan and any other multiple basing scheme for political reasons, though he never expressed it just that way.

He clearly didn't want to appear to be adopting any idea with a Carter label on it. Moreover, Weinberger did not want to inflame the Nevada constituents of Reagan's close friend Sen. Paul Laxalt (R-Nev.), who would have to give up a large part of their state to accommodate the MX shelters envisaged in the shell-game scheme. Laxalt spoke for popular sentiment in Nevada when he came out against the shell-game idea.

As Cannon gracefully put it, Reagan's tough stand during the presidential campaign for strengthening the U.S. ICBM force "faded softly into the Nevada sunset."

Within four months of the October 1981 announcement, Reagan's MX decision was in shambles. It became clear there was no way you could satisfactorily "harden" existing silos with concrete and steel, and the three "promising" permanent basing ideas, all of which had been explored by earlier administrations, were found wanting again.

Sometime during the summer, the Air Force, with encouragement from the White House, resurrected the idea of packing MX silos close together on the theory that if the Russians tried to knock out all 100 silos, the radiation, debris, explosive pressure and heat from the first warheads that landed would do as much harm to the remaining incoming warheads as it did to the first few silos that would be hit. In the lingo of the nuclear weapons community, this theory was termed "fratricide"—in other words, the first H-bombs to explode would kill off their brothers raining down subsequently.

The new basing plan was given the name "Dense-Pack" and various studies were undertaken to see if it could be said to work. In the succeeding months, "Dense-Pack" gained a predictable following, led by the Air Force, whose overriding interest is to get the MX.

But Weinberger has had his doubts, as have many of the experts. It is now part of this saga that every new idea produces a new set of critics. Dr. Charles Townes, the chairman of Weinberger's panel of scientific experts, warned that the new plan offered no solution for the long run—if the Soviets build more warheads, "Dense-Pack" will become vulnerable.

One clever opponent came up with a study that showed that at best, "Dense-Pack" could only survive repeated Soviet attacks for four hours, if the Soviets timed their shots carefully. Thus you were spending $20 billion or more for just four hours of security.

Perhaps the final beauty of Dense-Pack for its proponents is that no one can *prove* that it won't work. There is no way you can test what the "fratricide" effect will be when one nuclear warhead explodes on the surface of the earth as another comes down through the sky to explode.

This logic can be taken another step. The rational behind all our nuclear forces is "deterrence"—to make the Soviets believe they can't get away with attacking our missiles without theirs being attacked in return. So the purpose of any MX basing plan is to come up with something that we can tell the Russians will work. Naturally, then, an American government will say the system works. Whether it really will makes no difference.

Confused? Well, you are supposed to be if you are a normal individual and not a nuclear strategy expert. Simple logic has no obvious place in considerations of the MX problem.

More typical is last minute improvisation. In a delightful new book entitled, "Super Weapon, The Making of MX," author John Edwards provides exquisite detail on how the Carter administration decided to place 200 MX missiles among 4,600 horizontal shelters that looked like cement garages.

In 1978, according to Edwards' chronicle, Defense Secretary Harold Brown favored building an MX and basing it in a "shell-game" system. (Brown favored a "vertical shelters" shell game over the later "racetrack" shell game, but that's another story.) Zbigniew Brzexinski proposed putting the missiles on mobile trucks. And President Carter toyed with idea of building no new missile while studying the idea of launching our force of Minuteman missiles when it was clear our force was under attack. (If we've launched them, the Soviets can't blow them up, according to this line of thinking.)

Eventually, all the key players in the Carter administration changed their minds.

Back in 1981, the Air Force put together a wall chart that illustrated 27 different basing ideas that had seriously been explored and rejected for the MX. Among the more original were basing it in mid-ocean, underwater (there was fear someone might steal it); and putting in on a large flying boat—a cousin of Howard Hughes's spruce goose.

Whatever President Reagan announces tomorrow, the MX saga won't end there. Congress retains the last word on the missile's future, and with any luck, Congress will move this debate from the arcane and often irrelevant world of the nuclear strategists into the realm of common sense.

Common sense will lead to the conclusion that we don't need an MX missle. A little history explains why.

Back in 1945, according to Manhattan project archives, when a distinguished group of government officials, scientists and military men (Henry Stimson, Gen. George C. Marshall, J. Robert Oppenheimer, James B. Conant and others) decided on the targets for the first atomic bombs, they selected two Japanese cities where military installations lay close to residential areas. Their reasoning was simple—and brutal.

They considered the atomic bomb a weapon of terror, designed to frighten a country into surrender with the threat of possible extermination. But because these were civilized men, they liked the idea of "targeting" the military installations at Hiroshima and Nagasaki to cloak their uncivilized aim of mass human destruction.

It is too easy to forget that just two small atomic bombs—less than one-tenth the size of each of those 10 hydrogen-bomb warheads on top of just one MX—killed 200,000 Japanese and injured another 130,000.

If we realize that mass destruction is the real mission of these weapons, then it becomes harder to explain why—when we already have 7,500 warheads on land- and sea-based missiles—we really need 1,000 more. The strategist reply that we need them to attack "military targets" like thousands of missile silos on U.S. and Soviet territory. But if "the balloon goes up," to use one of the many horror-disguising euphemisms of the strategists, the first wave of missiles may be aimed at missiles on the other side, but their principal effect will be to kill millions of people.

And if there is a real deterrent that would stop the Soviets from attacking, it is that their cities and people would face destruction, not that their remaining missiles would be threatened. This is the mutual assured destruction theory of Defense Secretary Robert S. McNamara that cutely and disparagingly has been nicknamed MAD.

That was the theory behind the first atomic bomb attacks and dispite the strategists' euphemisms, it would be the theory of any other. Destruction must also be the main fear of any attacker.

Despite all the hundreds of thousands of pages that have been devoted over the past 37 years to describing tactics and strategies for basing and using nuclear weapons, any Russian or American leader who pushes the button will know that the first strike is also going to be the last. The strategists' contrary nonsense has given us thousands of missiles, bombs and other devices, but it has not given us any security.

Nuclear weapons remain what they were in 1945, when they were first used—weapons of terror. And that is how we should talk of them.●

AMWAY CORP.'S TRUTH CAMPAIGN

HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. VANDER JAGT. Mr. Speaker, as far as I am concerned, a recent editorial by the WZZM television station in Grand Rapids, Mich., was right on target when George Lyons, president and general manager of the station, opened the editorial comment on "Trade War" by stating:

The current problems between the Canadian Government, the Amway Corporation and its officers, point to one undeniable fact: The United States and Canada are in a trade war and have been for years. The protectionist policies of our friendliest neighbor are not friendly at all.

The U.S. Government has made some attempts to counter the "Canada-first" attitudes up North, but today free trade between the two countries remains little more than an illusion.

As a member of the Subcommittee on Trade of the House Committee on Ways and Means, I and many other Members get a very close look at the treatment U.S. companies doing business in Canada have been receiving from our neighbor. And, of course, we are all mindful in recent months of Canadian firms gaining U.S. business either for the Army's new light armored vehicle or the manufacturing of subway cars for New York City. Yes, these are difficult, highly strained times between our two countries.

And, now it hits home once again as a Canadian provincial prosecutor has filed a criminal information suit against two of my close personal friends, Jay Van Andel and Rich DeVos, chairman and president, respectively, of the Amway Corp. What is the suit about? Allegedly for underpayment by Amway of customs duties.

This is not a new issue really; it goes back for years and really, from everything I have read and heard, simply involves a misguided effort on the part of some Canadian officials to extract large sums of money from the Amway Corp. under the guise that custom duties were underpaid. Civil action is pending in Canadian courts, but now the Canadians have chosen to try to criminalize what is at most a civil tax dispute in an attempt to expedite the collection of very, very disputable duties and penalties.

I am told by Amway officials that after 2 years of trying to work out an agreement in a business-like manner, the Canadians have decided to use more embarrassing tactics. Amway, as you perhaps have seen from their special advertisement in today's Washington Post, has finally decided to tell its side of the story. I hope you will read that advertisement.

I have known Jay Van Andel and Rich DeVos for many years. Their integrity, their character, and their honesty are above reproach. But now, because of this harsh and unfounded action by the Canadian Government, they are engaged in having to prove their honesty, character, and integrity.

They will be vindicated. But, I am concerned about this new development by the Canadian Government impacting on personal and business relationships between individuals and companies of our two countries. This action presents another reason why our Congress and the present administration are on the brink of taking more direct and positive action relative to world trade arrangements and agreements. We have been for free trade—fair trade—and we do not seek a world trade war, but enough is enough. Amway does not intend to be a "fall guy" to the Canadian Government. I applaud them for sticking to their guns. The most sad commentary on the whole situation, however, is the time, the effort, and undoubtedly huge sums of money that now must be expended by Amway in its "truth campaign to prove its innocence and demonstrate the absurdity of the Canadian charges."●

THERE IS HOPE FOR POLAND!

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. BROOMFIELD. Mr. Speaker, I know that many of my colleagues join me in hoping that the Polish Government will continue its recent efforts toward national reconciliation of which the release of Lech Walesa is an example. The authorities should reestablish Solidarity as the legitimate union of Polish workers, and lift martial law. I am also encouraging the President to do everything possible to send this message to the Polish Government.

There are some positive signs that the martial law authorities are moving in the right direction. It is deplorable that the military Government of Poland made the ill-advised decision to ban Solidarity, the officially sanctioned and very effective workers organization. With nationwide support and millions of members, Solidarity played an important role in Polish society. It did much to improve the lot of Polish workers. As all of you know, Communist theory stresses the key role which the proletariat plays in society and the importance of organizing the workingman.

It seems ironic that in Poland the very organization which did so much to promote the common man was officially banned. Although martial law still forbids the conduct of union activity, Lech Walesa, Solidarity's former leader, is now free.

Walesa is a respected world figure who was recently mentioned for the coveted Nobel Peace Prize. The illegal incarceration of this brave union leader and ensuing separation from his family for nearly a year was inexcusable and counterproductive. It is gratifying to see that the martial law authorities saw the futility of continuing the illegal detention of the widely idolized Walesa, and finally freed him.

Although the Polish Government now claims that Walesa is powerless and no longer a threat, that Government undertook a smear campaign against Walesa accusing him of sexual indiscretions and of having made bitter comments regarding the Pope. Would any government take such measures to discredit a really powerless man? It is obvious that the martial law authorities took away Walesa's liberty but not his honor. Although Walesa is now taking his bearings after his long isolation, both he and Solidarity have an important role to play in the Poland of the future.

Let us hope that the Polish authorities keep their promise to lift martial law. It is in the best interest of all parties if the Government continues its dialog with the Roman Catholic Church of Poland, the nation and Lech Walesa. Polish Government sensitivity to the desires of the Polish people will help bring an end to civil unrest and the justified popular dissent in Poland. The continued detention of almost 5,000 Polish citizens under martial law is now ridiculous and purposeless. The recent release of some internees and the possible visit by the Pope to Poland are encouraging conciliatory gestures.

It would be most fitting if Poland's new spirit of reconciliation would be

manifested by the lifting of martial law on December 13, the anniversary of the imposition of that repressive law in Poland.●

GO SLOW ON GAS TAX

HON. DAVID R. OBEY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. OBEY. Mr. Speaker, Governor-elect Anthony S. Earl of Wisconsin has made some telling points against the administration's 5-cent gas tax program.

I urge Members to review his comments. A good many States will be significantly shortchanged unless that package is changed.

[From the Washington Post, Dec. 2, 1982]

WHY THE GAS TAX HIKE IS A BAD IDEA

(By Anthony Earl)

As governor-elect of an economically distressed Midwestern state, I have spent the four weeks since the election in transition briefings learning in minute detail about the problems and the policy choices that will confront me in January. Not once so far in the search for answers has anyone jumped up on a briefing and said, "What this country needs is a good 5-cent gas tax increase."

So before Congress constructs a bona fide bandwagon for highway legislation during the lame-duck session, will somebody explain once again why this particular highway legislation is important and why those of us digging out of the economic rubble in the Midwest should be happy to see it?

It is not that the roads and bridges in Wisconsin and the Midwest do not need attention. On the contrary, the amount of investment needed for basic road preservation efforts is staggering, as it is in other parts of the country.

It is not that we feel that enough money is already being devoted to highway needs. Rather, stagnant highway revenues and repeated deferral of necessary revenue increases at all levels have contributed greatly to the current situation.

And it is not the jobs are not needed in the region. New jobs are in desperate demand, especially jobs related to a productive investment in our economic future, like highway jobs.

Yet, on balance, it appears that the legislation likely to be considered by Congress will do more harm than good for Wisconsin and much of the Midwest. Unless the highway legislation that is actually passed makes some significant changes in the traditional federal highway program, passage of highway legislation this session will be one more problem to be overcome by several distressed states.

First, the jobs issue: everyone agrees that the highway legislation being proposed is not a jobs bill, as such. But everyone recognizes that if there were not intense pressure for some federal action to stimulate job creation, this legislation would not have such a high priority.

What seems to be overlooked in the rush for legislation is that the existing federal highway program, with its dedicated user taxes and categorical distribution formulas, is highly redistributive. It taxes all highway users equally, but sends far more back to some states in proportion to their contributions than to others. Thus a dollar of federal highway taxes will result in $1.50 in federal aid in one state, but will produce only 65 cents of federal aid in another.

For the "loser" states, the federal highway program actually exports jobs to other states. A 5-cent federal gas tax increase would cost Wisconsin highway users about $100 million annually, but we would expect to get back only about $70 million under existing formulas. The $30 million difference would be our contribution to highway construction employment in other states, most of which have lower unemployment than ours.

There are even bigger losers under the highway program who can afford their losses even less. Michigan (14.5 percent unemployment) would get back only 67 cents per dollar contributed, and would export about $150 million in FY 83 under the highway legislation under consideration by the House; Ohio (12.3 percent unemployment) would get 76 cents back, and export about $134 million; Indiana (11.4 percent unemployment) would get back only 68 cents, and export about $125 million.

This inequity exists in the current highway program at current tax levels. If the federal gas tax is raised and highway funding increased without changing the pattern of spending, the percentage relationships will remain the same, but the absolute amount of dollar loss from these states will, of course, grow even larger.

Unless the highway legislation expressly recognizes unemployment as a factor for distributing funds, or some realistic minimum level of return on contributions is established, an expanded highway program could actually worsen the relative economic positions of some of the most severely affected states.

The other argument that is most often made in support of immediate action on an expanded federal highway program is that we can no longer ignore our decaying "infrastructure," especially the roads and bridges that serve as the basis arteries of mobility and commerce.

Again, this concern is valid. There is a need for greater resources to be devoted to highway system preservation at all levels.

Most often, rehabilitation of aging Interstate routes and repair or replacement of vital bridges are cited as examples of what increased emphasis on the highway program will accomplish.

But under last year's program, only 22 percent of the federal aid was directed at those two critically important needs. Under the bill to be considered by the House for an expanded program, in FY 83 the proportion of federal aid for these categories would rise only to 29 percent. By contrast, by conservative estimate, probably more than 40 percent of the expenditures from the Highway Trust Fund under the House bill would go for new construction. The remainder would probably be used for resurfacing, rehabilitation and reconstruction of routes not on the Interstate system.

Further, much of the work that is usually associated with road and highway repair is not done with federal aid: pothole repair, joint and shoulder repair, minor bridge repair and resurfacing of many older roads. These are specifically excluded from the federal program because they are defined as maintenance, which is a state or local responsibility, or because the most cost-effective repair or resurfacing alternative did not allow for widening shoulders, grading new sightlines or leveling hills, which is necessary to qualify for federal aid.

Two other factors about a federal gas tax increase and an expanded federal highway program appear to raise red flags at the state level.

First, most states are currently facing a need for increased revenues to fund their own basic preservation efforts. If a federal gas tax is passed along with a federal aid program geared to upgrading and new construction, many states may find it difficult to raise their own taxes next year enough to fund basic state and local preservation programs.

Sedond is the broad consensus that is developing in favor of completely redefining and restructuring federal-state highway relationships.

There is agreement that essentially local needs should be met locally, and that the future federal responsibility should only involve highways of overriding national concern. There is not yet agreement on where the lines of local and national interest should be drawn, on whether responsibilities and fiscal capacity will be passed in tandem to states, or on what the size and scope of the remaining federal programs should be.

Further, as documented by a Congressional Budget Office Study this summer, there is increasing uncertainty regarding whether there exists either the fiscal capacity or the justification to continue blindly to pour money into a pot called "Interstate completion" since only one-quarter of the remaining cost actually represents unbuilt links in the intercity network, the rest being local segments primarily of benefit to commuters in various cities.

Considering the serious, informed questioning of the existing program that is going on, in contrast to the almost universal support that it has historically enjoyed, this does not appear to be the time for Congress routinely to authorize, and in fact to expand, the traditional program for four more years. If such authorization is enacted, it should come only after Congress has had time to examine the alternative approaches that have been proposed. The current session does not appear likely to offer an opportunity for realistic consideration of alternatives.●

I. HARRY CHECCHIO HONORED FOR OUTSTANDING PUBLIC SERVICE

HON. CHARLES F. DOUGHERTY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. DOUGHERTY. Mr. Speaker, I would like to take this opportunity to express sincere congratulations to I. Harry Checchio, Esq., upon whom the rank of knight commander by magisterial grace from the Sovereign Military and Hospitaller Order of St. George in Karinthia will be conferred on December 4, 1982.

The order was founded in 1273 and is dedicated to charitable work in aiding the needy throughout the world. The honor of knight commander is bestowed upon outstanding mem-

bers of the community who have distinguished themselves by their accomplishments in their total life experiences including family, profession, and faith.

Mr. Checchio has been a practicing attorney in Philadelphia County for approximately 33 years. Throughout this time, he has been a dedicated servant of the people in educational, political, civic, and health areas. Among his varied list of achievements, Mr. Checchio founded the Pennsylvania Medical-Legal Institute, was a member of the Pennsylvania House of Representatives, and also serves as a member of the board of trustees of Nazareth Hospital. I. Harry Checchio is indeed well deserving of this honor and I would like you to join me in congratulating him for his many contributions which have served to better our community.●

BEN BURROWS—CIVIC CITIZEN

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. MOTTL. Mr. Speaker, a city is a way of organizing people for the betterment of their way of life. It is much more than a governmental structure; it is dynamic and reflects the views and mannerisms of its inhabitants.

The city of Parma is no exception. The ideas of the people are voiced through the various civic and local groups representing the citizens. At the forefront of many of these groups is Mr. Ben Burrows.

Ben, a leading merchant and the owner of Burrows' Wallpaper and Paint Supply Co., has a strong sense of civic duty and responsibility. His activities prove this. They have led him to devote himself to numerous organizations of widely different interests. In line with his business interests, Ben is president and director of the Parma Businessmen's Association, vice president and director of the Parma Chamber of Commerce, and was a full director of the American National Bank for 15 years.

Ben's concerns do not end here. He has also involved himself in several social and youth-welfare organizations. In addition to holding positions on the finance committees of the YMCA and the Boy Scouts, Ben had been a member of the Parma Kiwanis Club for 34 years; now he is a director. Other directorships include the Southwest Music Association, the Friends of the Library, and the Pine Hills Golf Club.

Ben was active on the original committee which provided financing for the Parma Community Hospital. He was also active in subsequent hospital extension drives.

The city of Parma has recognized Ben's accomplishments. In 1951 the mayor named him chairman of the Police Building Advisory Committee. This committee aided the city of Parma and the police department in selecting a building site for the Parma Police Station. Ben is one of only two people to be named "Honorary Police Chief of Parma," an honor he received in 1974.

Mr. Speaker, fellow Members of the House, please join me in honoring a truly civic-minded individual, Mr. Ben Burrows.●

ADMINISTRATION POLICIES WIDEN INCOME GAP

HON. JAMES J. FLORIOS

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. FLORIO. Mr. Speaker, Treasury Department figures released by our colleague HENRY REUSS show that most tax breaks or loopholes are regressive and provide an overwhelming proportion of benefits to the most affluent. According to an analysis of the Treasury figures by the Joint Economic Committee, 71 percent of the revenues lost through 33 tax loopholes, totaling $112 billion, go to the 4.4 percent of taxpayers earning more than $50,000 a year.

The following article reports that the most regressive loophole is the tax-free preference given for interest earned on State and municipal bonds. Ninety-four percent of the exclusion of interest on State and local bonds, which costs the Treasury $4.6 billion, goes to Americans earning $50,000 or more. Stated another way, $4.4 billion goes to taxpayers making more than $50,000; $265 million, or 5.6 percent, goes to taxpayers earning from $20,000 to $50,000; and only $16 million, or 0.3 percent, goes to those making less than $20,000.

The JEC study concludes that only 5 percent of Federal tax breaks provide proportional benefits to all taxpayers and less than a quarter of tax breaks can be described as progressive.

I believe that the Treasury Department figures support the conclusion being reached by an increasing number of Americans; that one of the central consequences of the administration's policies is that income differences between our Nation's rich and poor will increasingly enlarge. While reductions in Government spending will have little effect on persons in the top tax brackets, this group benefits enormously from the administration's tax policies. During the administration's 3-year tax cut program, Americans in the top fifth of the income spectrum will have their Federal income tax liability reduced by 49 percent compared to the income and social security taxes these Americans paid in 1981. By contrast, taxpayers in the bottom fifth receive less than half of the percentage tax reduction enjoyed by all other income categories. While the administration's tax cuts will do little to help the poorest of American families, cutbacks in Government programs will actually leave them poorer and increase the number of Americans below the poverty line, according to studies by the Congressional Budget Office and others.

Mr. Speaker, I would like to share the following article with my colleagues.

[From the Newark Star Ledger, Nov. 21, 1982]

AFFLUENT REAP MOST FROM BOND "BREAKS"

WASHINGTON.—Americans with annual salaries greater than $50,000 get more than 94 per cent of $4.6 billion in federal tax breaks because interest on state and municipal bonds is not taxed, Treasury Department figures released yesterday said.

The break for holders of the tax-free bonds is just one of many tax credits that benefit the affluent under current tax laws, Rep. Henry Reuss (D-Wis.) suggested in releasing the Treasury study.

Reuss, chairman of the Joint Economic Committee, called the analysis "an important contribution" to "the new drive for broad-based income taxation."

The study, Reuss said, shows that some revenue losses resulting from tax breaks provided under existing law "have exceedingly regressive impacts on our tax system."

The Treasury study ranked the exclusion of interest on state and local bonds as the most "regressive" revenue loss because taxpayers with income of over $50,000 a year get 94.1 per cent of the benefits.

According to the study, high-income taxpayers also get more than 63 per cent of the $13.2 billion in taxes lost to the Treasury due to a tax break on long-term capital gains on other than home sales.

While the study indicated that these and certain other tax credits benefit high-income taxpayers more than others, they do not result in the biggest tax losses to the federal government.

The biggest loss, about $24.4 billion, comes from the exclusion of pension contributions and earnings from taxation. Only 26 per cent of the benefits from such tax savings go to high-income taxpayers.

The second biggest loss in tax revenues, $19.6 billion, comes from the deductibility of mortgage interest on owner-occupied homes. The more affluent taxpayers get 30 per cent of the benefits from that tax break, according to the study.

Reuss said the study was the "most current and thorough" analysis of revenue losses resulting from 33 separate exclusions, exemptions, deductions and other tax credits provided for under existing tax law.

It shows, he said, that the "most progressive" tax breaks under current law include the earned income credit, exclusion of disability pay, exclusion of untaxed unemployment benefits and tax credit for the elderly go to those with incomes exceeding $50,000 and that high income taxpayers get no benefits from the other three.

The study indicated that the Treasury loses a total of $156.6 billion a year from all

the tax breaks for which figures are available and that more than 33 per cent of the total benefits go to high-income taxpayers.

Reuss noted, however, that taxpayers with income exceeding $50,000 a year make up only 4.4 per cent of all taxpayers, but pay nearly 33 per cent of all taxes even after taking advantage of various tax credits.●

JOBLESSNESS IN OUR NATION

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. MOFFETT. Mr. Speaker, I rise to bring to your attention, and that of my colleagues here today, testimony submitted to this past September's child welfare forum hosted by St. Joseph College in Connecticut. As you will readily remember, I was joined by my friends Representative GEORGE MILLER and Representative BARBARA KENNELLY in receiving testimony from service providers on the effects of the New Federalism on the children of Connecticut.

The statement that follows was submitted by a young woman named Gladys Santos. I first met Gladys at an informal hearing in Connecticut on the juvenile justice program and its benefits to the community. I was greatly impressed by Gladys' candor, her insightfulness, and her deep concern for fellow urban teenagers striving for "an alternative to hanging out in the streets looking for something to do," to use her own words. What young people need most, says Gladys, is a sense of belonging, of worth, and of dignity. As this lameduck Congress works to fashion a meaningful jobs program to remedy the tragedy of joblessness in our Nation, I sincerely hope that my colleagues will heed the call of Gladys Santos to promote training for jobless youth. This effort, on our part, would demonstrate to Gladys and her generation that we are sincere in our commitment to creating for them a better future.

STATEMENT OF GLADYS SANTOS

My name is Gladys Santos and I would like to give my testimony based on a teenage perspective of how I feel youth counseling centers can help the teenagers of New Britain.

First of all I would like to say the city of New Britain, Connecticut, doesn't offer much to its youth. Young people need a place to go, a place where they can meet with their friends to do things together like take part in different activities or participate in different sports. Most important, they need to get involved in something they can put their energy into. We have to give them something positive to do, an alternative to hanging out in the streets looking for something to do.

During the summer, CETA runs a two month program for teens that offers them jobs where they could learn new job skills and gives them something to do for the summer. But unfortunately, this program is only for two months. So for the next ten months, teenagers have trouble looking for jobs or don't know how to go about finding one. The high unemployment rate isn't making it easier. This only pushes them more and more to drugs and crime. Some teenagers have trouble looking for employment because they have no job skills or they have no diploma. They start to feel rejected when no one will hire them. One way of releasing their anger is to steal what they need. No one will help them get what they need so they take it.

If we could have a youth service that will teach teenagers different job skills then they could feel that they have something to back them up when they go look for a job. Also, if we could have trained staff that could guide these kids and help them decide what they want to do with their lives, what kind of job they would like to have and learn more about themselves.

Teenagers need to learn more about drugs, crime, and peer pressure at a young age. So when they encounter drugs or decide to steal or do something that could hurt themselves they will have the knowledge about these things and can decide for themselves whether or not they want to get into trouble. Or if they have friends that are into drugs they could tell them what they learned. And if their friends want to steal or start trouble, they could tell them what could happen to them. Teenagers can help each other to think about what they are getting themselves into. Just getting teens to stop and think is a step in the right direction.

I know people that are into drugs, gangs, stealing, and I've seen a lot of my friends getting pregnant at thirteen, fourteen, fifteen. And, as I watch these things happen, I see that they have little knowledge of what they are getting into. They want to belong, to feel wanted. Part of something. If they have no one there to educate them, and drugs and sex is where it's at, they will turn in that direction. Why? Because when they are in their groups, they belong.

I know youth counseling centers can help teenagers because I have had some experience.

For the past two summers, I've worked in Sheldon Community Guidance Clinic in New Britain. I've seen from my own personal experience how Sheldon clinic has helped teenagers. Part of Sheldon is the Station Youth Counseling Center that runs a variety of counseling programs for teens. I worked in the peer outreach drama program. Through this program the peer outreach workers learned theatrical skills, and counseling skills. Also, we learned about many teen issues like dating, family relationships, drugs, alcohol, etc. And, we did our performances based on small skits taken from these issues.

Throughout both summers, I have made new friends and seen the changes in these teenagers. They become more open, relaxed, and become more and more interested in learning. One teenager even quit smoking marijuana and quit his gang.

I would also like to mention the two women I worked with. Juliann Wolfarth was the drama director and Marilyn O'Neil was the counseling coordinator. These two women really cared about the kids they worked with. They were not there because it was their profession, but because they cared. They really wanted to help and it showed in the way they worked with us.

Sheldon offers other programs for teens that can help them in many ways. This fall, Marilyn and Julie are helping me decide what I want to do with myself and if I choose to go to college, they will help me to do the best I can. I feel lucky because I've been able to see the help offered and experience it. But there are still so many teenagers that must be reached. The more programs we offer, the better our chances of reaching them. And, that is a definite set in the right direction.●

CIVIL AIR PATROL

HON. THOMAS N. KINDNESS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. KINDNESS. Mr. Speaker, one of the particularly outstanding service organizations in our country is the Civil Air Patrol, which this week celebrates the 41st anniversary of its founding.

A nonprofit, volunteer association committed to humanitarian work, the Civil Air Patrol is also an auxiliary of the U.S. Air Force.

CAP was originally established to offer private aviationists a means to utilize their skills in the defense of the Nation. During World War II these volunteers played a key role in patrolling U.S. coastal areas, and performed so admirably that in 1946 the Congress authorized the official chartering of the organization.

The Civil Air Patrol continues to provide leadership in aerial search and rescue missions, and trains volunteers for that purpose.

I take a great deal of pleasure in paying tribute to the fine people of the Civil Air Patrol, and particular pride in acknowledging the service of Composite Squadron 102 in Butler County, Ohio.●

WE NEED A UNIFIED APPROACH TO THE DRINKING AGE

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. GOODLING. Mr. Speaker, recently two Cabinet Secretaries testified before the President's National Commission on Drunk Driving and endorsed a unified approach to the drinking age. Both Transportation Secretary Drew Lewis and Health and Human Services Secretary Richard S. Schweiker, who were speaking on behalf of their respective Departments said they would favor having the States raise the legal drinking age to 21.

I applaud Secretaries Lewis and Schweiker for having taken this stand on what can only be termed a national epidemic—the rise of alcoholism and

highway fatalities among our Nation's youth.

All of us in Congress and in statehouses across the country lately have been forced to take significant steps to increase penalties for driving under the influence of alcohol. This was due in part to the intense lobbying efforts of groups such as Mothers Against Drunk Driving (MADD), Students Against Drunk Driving (SADD), and Remove Intoxicated Drivers (RID).

But, a related and equally serious matter that has received less attention is the need to raise the legal drinking age in the States that still allow persons under the age of 21 to purchase and consume alcoholic beverages.

The National Transportation Safety Board recognizes this problem, and, on July 23 the Board urged that the legal minimum drinking age for drinking and purchasing alcohol be raised to 21 nationwide in an effort to cut the highway death toll from drunken driving. The Board's recommendation of raising the minimum drinking-purchasing age to 21 was sent to the Governors and State legislatures of the 35 States and to the Mayor and City Council of the District of Columbia where the drinking age is now less than 21. And this idea is also under study as a possible recommendation by the President's Commission on Drunk Driving, which makes its report next April.

Just before we recessed, Congress passed legislation which will reward the States with funds from the Highway Trust Fund to encourage and facilitate the implementation of comprehensive, coordinated, and community-based drunk driving programs. That measure was signed by the President as is now public law.

But this is just one step along the road to addressing the most frequently committed violent crime in the United States today, drunk driving, and specifically, drunk driving among teenage Americans.

National Transportation Safety Board President Jim Burnett recently spoke on this subject before the 70th Annual National Safety Congress and Exposition. Mr. Speaker, I have read his remarks, and was astonished by the Board's findings. I think my fellow Members need to hear them.

Did you know, that, of the 25,000 persons who die each year in drunk driving accidents, 5,000 are teenagers?

Did you know that almost 60 percent of fatally injured teenage drivers had alcohol in their blood?

Did you know that the life expectancy in America has improved over the past 75 years for every age group except one—15- to 24-year-olds—and did you know that the leading single cause of death for this age group was drunk driving?

We in Congress should make our voices heard about this national disgrace. I fell very strongly about the drunk driving problem, and I know that others in this Chamber do as well. That is why I introduced House Concurrent Resolution 429 expressing the sense of Congress that the age for drinking and purchasing all alcoholic beverages should be raised to 21 in those 35 States and the District of Columbia where the drinking age is now less than 21.

Senator ARLEN SPECTER has introduced the companion legislation, Senate Concurrent Resolution 129. National Transportation Safety Board Chairman Jim Burnett has called this resolution a key example of the kind of support needed to end the epidemic of drunken driving accidents which have claimed the lives of 250,000 Americans over the last 10 years. Burnett has said, "I hope Congressman GOODLING'S resolution is a first step that will lead to Congress giving its full support to the concept of raising the drinking age to 21 as an effective way to cut the Nation's highway death toll."

We all know that in the early seventies, many States lowered the drinking age usually from 20 or 21 to 18 or 19 as part of a national trend toward lowering the age of majority.

Numerous empirical investigations were conducted during the debate in public policy and academic areas, and the results generally showed significant increases in alcohol-related motor vehicle crash involvement among young drivers after reductions in the drinking age. As reported in the winter 1981-82 issue of Alcohol Health and Research World an excellent overview of this subject, several studies also found indications of increased alcohol consumption and increased rates of admission to alcohol treatment programs after drinking ages were lowered.

As the result of emerging evidence, a number of States raised the drinking age in the late seventies and early eighties. Research on the effects of this return to higher drinking age has revealed alcohol-crash involvement among young drivers decreased significantly.

Michigan lowered the drinking age to 18 in January 1972 and raised it back to 21 in December 1978. In the first 12 months after the age limit was raised, a study showed a reduction of 31 percent in alcohol-related accidents among drivers aged 18 to 20. In Illinois, a study showed an 8.8-percent decline in single vehicle nighttimer male driver accidents involving drivers 19 and 20 when the drinking age was raised in 1980.

But today, most State laws are a hodge-podge of jurisdictional incongruities. Unification of State laws under a nationwide drinking age would correct these incongruities, and we as U.S. Members of Congress should actively encourage the States to look at the problems associated with these differing drinking ages seriously.

I support the National Transportation Safety Board's recommendation for several reasons.

First, it would reduce the general availability of alcohol to teenagers. The Massachusetts Secondary School Administrator's Association found that, when the drinking age was lowered to 18, there were increases in vandalism and other disciplinary problems. As a former school superintendent and a ranking member of the House Education and Labor Committee, I can sympathize with concerns that the lowered drinking age provided opportunities for younger students—some as young as 13 or 14—to obtain liquor through friends who became 18 their senior year, and I recognize that this was one reason which prompted Massachusetts to bring its drinking age up again.

Second, a unified drinking age would correct an undesirable situation in which access to alcohol by teenagers is only a matter of motoring across the State line. Pennsylvania, which has always been a "21" State, is bordered by New York, New Jersey, Delaware, Maryland, and Ohio—all of which at one time had lower drinking ages. In the 10 New York counties that are contiguous to Pennsylvania, 10 percent of the alcohol-related accidents involving an 18- to 20-year-old driver involved a driver who was licensed in Pennsylvania, according to a 1981 Bureau of Alcohol and Highway Safety Research report.

There will, of course, be arguments that by unifying the drinking age at 21 we are denying a right to our young people. That, if someone is old enough to vote, to get married, to register for the selective service, then it is unfair to deny drinking rights.

I say that purchasing and drinking alcohol was never a constitutionally protected right, but rather, a privilege.

Our forefathers were concerned about the preservation of "life, liberty, and the pursuit of happiness."

Last year, 25,000 people died in alcohol-related highway accidents; 8,484, or about 35 percent, were between the ages of 16 and 24. As these National Transportation Safety Board figures indicate, the death toll among young Americans is grossly disproportionate. It is scandalous.

Let us end this national tragedy. Let us save these young lives.

I urge all of my colleagues to send a message to those States and the District of Columbia where the drinking age is under 21 to take the beginning steps to raise it.

Thank you.●

THE SECOND ANNIVERSARY OF THE MURDERS OF FOUR AMERICAN CHURCHWOMEN IN EL SALVADOR

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Ms. OAKAR. Mr. Speaker, today we remember and pay tribute to the memory of four women of peace who were brutally murdered in El Salvador on December 2, 1980. Ita Ford and Maura Clarke of Maryknoll; Dorothy Kazel, an Ursuline sister; and Jean Donovan, a lay missionary, were known to very few the night they were thrown in a ditch along a dark road in El Salvador. Today they are remembered by millions around the world. In December of 1980 they were simply four dedicated missionaries, sheltering and clothing the homeless, comforting wounded bodies and frightened souls. Today their names are symbols of the awakening of our national conscience.

In December of 1980, the United States and El Salvador pledged their respective Governments to do everything possible to bring those responsible for this atrocity to justice. The accused murderers have, in fact, been in custody since April of 1981. Some have confessed to their crime. Still, there has been no trial, no prosecution. More incredibly, there has been no serious and systematic investigation of the involvement of higher officers or others in encouraging, ordering, or condoning the murders.

Indeed, when the investigation of a similar case involving the American labor representatives revealed clear evidence of the participation of higher officers, the Salvadoran courts dismissed the case. Now, as the possibility of a trial in the churchwomen's case looms on the horizon, observers fear that it will be a "show trial," a legitimation of a corrupt and impotent justice system and a whitewash of those who bear responsibility for actions by the security forces of El Salvador.

Congress also bears a responsibility. Twice in this session of Congress the President of the United States was allowed to certify that "progress" has been made in reducing human rights violations and in promoting a political solution to the strife in El Salvador, in spite of overwhelming evidence to the contrary.

In recent weeks we have witnessed another betrayal of our national honor: the sad spectacle of a U.S. Ambassador, who finally spoke the hard truth to the Salvadoran elite, being publicly rebuked by his Government.

Today we should reflect on what the eclipse of our human rights policy in Latin America has really meant: a license for those who carry our guns, ammunition, and equipment—some of whom have been trained on American soil or by American personnel—to arrest and kill at random, to label innocent people as "subversives," to obliterate all political opposition with bullets rather than the ballot or negotiation, even to undermine and sabotage legitimate governments.

Today is a day for renewing our dedication as public servants to shaping a foreign policy that will end the spreading violence and militarization throughout Central America that has claimed the lives of thousands. Let us remember that Ita and Maura and Dorothy and Jean were not killed with rifles and bullets made in El Salvador. Let us dedicate ourselves to eliminating arms traffic in this hemisphere, including our own. Let us dedicate ourselves to bringing the technologies and arts of peace rather than the engines and arts of war to the torn and ravaged countries of Central America.

The martyrs of El Salvador speak more eloquently, in their silence, of our responsibility than any words we will hear today.●

MR. PARMA HEIGHTS, OHIO

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. MOTTL. Mr. Speaker, more than 25 years ago Paul W. Cassidy was elected mayor of the city of Parma Heights, Ohio, which I represent.

During that time, Mayor Cassidy has taken Parma Heights from a sleepy community to a city of some 23,000 industrious, hard-working residents. The growth and orderly development of Parma Heights has served as a model for other communities.

Mayor Cassidy and his administration have prided themselves—and rightly so—on instigating many public projects without outside help from the State or Washington.

In addition to his many years of public service, Mayor Cassidy has built an enviable record as a practicing attorney and is widely respected among his peers. Despite the demands on his time, Mayor Cassidy still finds time to serve on charitable and civic boards. His accessibility to his constituents is legend.

Mayor Cassidy has but three loves in his life—his wife, Elise, his family, and his city.●

LIBASSI'S GOOD ADVICE ON THE AGED

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. MOFFETT. Mr. Speaker, most of my colleagues remember Peter Libassi for his service at the Department of Health and Human Services under Secretary Joe Califano. He was one of the Department's top advisers in his role as General Counsel.

More recently, Peter has embarked on a distinguished career as senior vice president of the Travelers Insurance Co. He used his Washington experience and political acumen, last summer, with his work on the 1982 tax bill.

During the recess, Peter contributed a fine article on the op-ed page of the Hartford Courant, in which he discussed a terribly important issue: The need to insure that there are ample places among the workforce for our elderly citizens. Peter argues persuasively that it is in our economic interest—as well as a measure of justice in our society—to make such slots available for seniors who are able and interested in employment.

I commend the article to the Members, and I commend Peter Libassi for continuing his efforts on behalf of our society.

[From the Hartford Courant, Nov. 15, 1982]

ALLOWING OLDER PEOPLE TO WORK WOULD HELP THEM AND THE ECONOMY

(By F. Peter Libassi)

The aging of America deeply affects all of us. Today, many of us live longer because of the triumphs of medical progress.

But, even as we acknowledge this progess, we must also recognize there is uncertainty about the future among older people. And we must ask a critical question: Will there be abundant opportunities in the future for older people to be active and productive? Can we assure older citizens that theirs can be a truly independent and good life?

I believe that expanded job opportunities is one important key to resolving this uncertainty about aging. Not only would it help older citizens economically and psychologically, it would be good for business and our national economy.

Today's older people are healthier and better educated than any previous generation. Not only can they work, increasingly they are saying they want to work. For millions, the opportunity to work beyond traditional retirement age or during retirement, means a chance to remain alert, useful, in touch with other people and to earn extra income.

A major expansion of economic opportunity for older citizens would help reassure millions that they need not be uncertain about old age: that, if they chose to supplement their incomes with earnings from employment, they could do so.

What's more, these older workers may be needed. It is projected that the number of new entrants into the labor force—workers age 18 to 24—will drop by 15 percent over

the next 20 years. At the same time, that part of our population over 65 will grow by nearly 30 percent.

It is common sense for business to look for employees where the potential supply is greatest: among older people. Fortunately, this growing cohort of older citizens represents a vast repository of knowledge, experience and potential productivity.

In 1981, a committee of the White House Conference on Aging studied the effects on our economy if older people, instead of continuing to leave the work force in ever-increasing numbers, should remain there at 1970 levels.

The economic analysis of this question showed that the gross national product would grow nearly 4 percent or more by the year 2005 because more people would be working and contributing to our economy. It also showed that this increased employment would create an increase in federal tax revenues of $40 billion by 2005.

Given all these enormous potential benefits, we would expect a strong national trend toward expanded employment of older people. Yet, we have created a structure that severely limits older citizens' choices. We have created a system of economic barriers, public and private, which penalize older people seeking to earn extra income.

The most insidious barrier of all is ageism—ignorance about aging and older people. How often do we hear that older people are slow, inflexible, cranky, unproductive, unhealthy and easily distracted? While some old people certainly are sick and frail, these descriptions do not apply to vast numbers of people over 65.

In my judgment, we can enlist American business in an effort to expand job options for older workers.

Business should begin experimenting, on a much larger scale, with a range of work options for older people: part-time jobs; jobsharing; flextime; phased retirement; job transfers; retraining, and rehiring of retirees. Even working at home.

I'm convinced that, as employers expand job opportunities for older workers, they will find that older people are highly productive. They will discover that helping older workers continue working is profitable. They will find, in short, that it works.●

FIRMING UP SOCIAL SECURITY

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. BEREUTER. Mr. Speaker, I can think of few issues as vital to the future and well-being of our older citizens as the condition of our social security system.

In this connection, I wish to bring to the attention of my colleagues an editorial that appeared in the Lincoln Journal on November 4, 1982.

FIRMING UP SOCIAL SECURITY

The incessantly-talked about crunch in Social Security funds becomes a reality Friday. That is when federal officials must for the first time in the system's history, begin borrowing money to provide checks to beneficiaries.

The first billion-dollar chunk is to be shifted from the system's Disability Insurance Trust Fund to the Old Age and Survivors Insurance Trust Fund. Because revenues from payroll taxes are falling short of projections, and the outgo drain from the largest, basic Social Security fund is constant, as much as $11 billion may be required in transfers before mid-1983.

There's no profit speculating about the soundness of the entire Social Security system if only the country's economy hadn't gone haywire. That doesn't solve the great problems affecting the nation today, or tomorrow.

Very shortly, a presidential commission is to make its recommendations on changes required for restoring the current health and future prospects of Social Security—which is our bedrock public retirement system. One need not be a member of the commission to know the remedial choices are not that extensive.

The Journal's advance judgment, which factors in political realities, is that virtually all proposals for changes in the system ought to be favorably considered for enactment. The exception would be those proposals which might tend to cancel each other out, and thus be counterproductive, wasting time, emotion and money.

Spreading the adjustments across the spectrum so that everybody involved is affected—those who benefit as well as those who finance the system—would seem the least that social justice demands.

What are some of the possible changes? Let's list just a few of them to get the juices flowing:

Gradually extend the age at which full Social Security retirement benefits will be paid, from the current 65 years to 68.

Make Social Security benefits subject to taxation, at least those where beneficiaries' total income exceeds agreed-upon low income minimums.

Revise the current indexing arrangement, at least to the extent that annual benefit adjustments do not exceed the nation's increase in productivity, or Gross National Product or the average level of higher wages paid.

Gradually end the separate federal retirement program for the military and federal officials and workers, bringing all of them into the Social Security system. Presently earned benefits should not be reduced or dropped, however.

Prohibit groups from opting out of the system.

Transfer support of the medical care aspects of Social Security to a dependency upon the nation's general revenues, being subject to congressional appropriations.●

NEW MONEY MARKET DEPOSIT ACCOUNTS

HON. DOUG BARNARD, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. BARNARD. Mr. Speaker, yesterday I introduced legislation to perfect the new money market deposit account that most financial institutions will be offering to their customers as of December 14.

These accounts, which were specifically authorized by the Garn-St Germain Depository Institutions Act of 1982, will allow banks, thrifts, and credit unions to directly compete with the money market mutual funds for the first time. They are, according to the enabling legislation, to be formulated in such a way so that they are "directly equivalent to and competitive with money market mutual funds," and the regulations issued by the Depository Institutions Deregulation Committee have gone a long way toward meeting that goal.

Unfortunately, there are many vital features that the money funds can offer that are still forbidden to depository institutions. As a result, the new account, while a major advance toward equality, will not meet the goal expressed by Congress in October.

Chief among these forbidden features is the ability to offer a competitively priced account that allows third party payments. This is a feature that is essential to attract funds now managed by professional cash managers. Deposits of professional managers make up about two-thirds of the total assets of money market mutual funds, and the ability to compete with them is vital if we are to meet our goal of competitive equality.

It is possible for depository institutions to offer this feature if they can afford to pay the cost of holding 12 percent of the deposits in the form of sterile, noninterest paying reserves with the Federal Reserve System. Unfortunately, this would significantly increase their costs. For example, at 10 percent annual interest, the 12-percent reserves would require the depository institutions to pay 1.36 percent less for personal deposits and 0.30 percent less for nonpersonal deposits. In an industry where profit margins are a few hundredths of a percent, realistically they could not compete.

My legislation would make this competition possible. It would authorize the Federal Reserve to pay interest on these reserves so that the depository institutions can be competitive.

There is a precedent for this. When the Monetary Control Act of 1980 was passed there was a real possibility that the Federal Reserve would be forced to require reserves at a higher rate than would normally be allowed by that legislation in order to control the money supply. In such cases, they are authorized to pay interest on those special reserves at the same rate as their portfolio yield.

Today also, there is a monetary policy consideration that complements the needs for competitive equality. For most of the last 2 years, the Federal Reserve has warned that the $230 billion in money market mutual funds is outside their control and endangers monetary stability. Allowing banks, thrifts, and credit unions to compete for these funds will bring a significant portion of this uncontrolled money back into normal channels.

Finally, there is the question of meeting the financial needs of local communities.

In the last few years, literally billions of dollars that would have been deposited in local financial institutions to meet the needs of local borrowers have been sucked into the money market mutual funds. These funds then placed the money with major money center banks.

Some of this money was lent to local banks, thrifts, or credit unions at higher interest rates, but a great deal of it remained outside the local communities at any price. As a result, local financial needs remained unfilled.

If we allow local financial institutions the ability to compete for all the customers of the mutual funds, they will at least have the chance to keep this money in the community.

My legislation does not seek to give depository institutions any advantages over money market mutual funds, but it does seek to allow them the ability to match their features at a relatively competitive cost. The real beneficiaries will be the consumers who will have a choice.

Mr. Speaker, I ask my colleagues to support my legislation, and I request that further information and the text of my bill follow these remarks.●

A TRIBUTE TO AMWAY AND ITS COMMITMENT TO THE FREE ENTERPRISE SYSTEM

HON. HAROLD S. SAWYER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. SAWYER. Mr. Speaker, I would like to join with my colleague, GUY VANDER JAGT, in his concern over the recent charges filed against Amway Corp. and its two owners by a Canadian provincial prosecutor. Like GUY, I have known Jay Van Andel and Rich DeVos ever since they started Amway 24 years ago. As a friend of theirs and as a Congressman whose district includes Ada, Mich., where their company is headquartered, I can assure you of their personal integrity and that of the company itself. Amway and its two owners are the embodiment of the free enterprise system.

As the former chairman of a corporation that had a distribution system somewhat similar to Amway's in that it went from manufacturer to retailer, I am fully aware of the problems relating to the fair and equitable valuation of goods for customs duties in Canada.

I would also like to call my colleagues' attention to the advertisement in this morning's Washington Post, and applaud Amway for its decision to explain and defend its position to the public. I believe the Congress should watch closely how the Canadian authorities treat American citizens doing business in their country.●

HELP THE VASHCHENKOS

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. LANTOS. Mr. Speaker, yesterday's New York Times describes the agony of the Vashchenkos, a Russian Pentacostal family who have taken permanent refuge for 4 years inside the U.S. Embassy in Moscow. The Vashchenkos and their two daughters, both in their twenties, together with Mariya Chmykhalov and her 20-year-old son have lived in the Embassy basement after a futile campaign to emigrate to the United States.

The article tells of Avgustina Vashchenko seeing her two youngest children for the first time in 4½ years through her barred basement window in the Embassy. This emotional reunion witnessed by American reporters and diplomats has once again raised the question, "What can the United States do to assist the Vashchenkos?"

What we can do is outlined in H.R. 2873. This bill would allow the United States to grant a visa and admit the Vashchenko family as permanent residents. H.R. 2873 is now in the Subcommittee on Immigration in the House of Representatives. A parallel bill, S. 312, was passed in July by the Senate.

It has always been in the humanitarian tradition of the United States to assist those who suffer from religious persecution. Giving relief to the Vashchenko family would once more demonstrate to the world the principles upon which this country was founded and which it should continue to uphold.

[From the New York Times, Dec. 1, 1982]

THROUGH BARS, A TEARFUL REUNION OF PENTECOSTALS

(By Serge Schmemann)

Moscow, November 30.—Kneeling on the sill of the barred basement window of the United States Embassy, Avgustina Vashchenko saw her two youngest children today for the first time in four and a half years.

Flanked by two grown daughters and backed by her husband, the Pentecostal struggled with tears and gazed on Avram, 8 years old, and Sarra, 12, who stood silently on the pavement outside with an older sister and a phalanx of American reporters and diplomats and Soviet police.

"Mama, don't cry, don't cry, we'll all be together soon," said Lidiya, the 32-year-old daughter who had accompanied the children.

She had been one of the Pentecostal refugees inside the embassy until she went on a hunger strike last year and was evacuated to a hospital, from which she went home to Siberia.

Mrs. Vashchenko tried to touch Avram through the thick screen and the ornamental ironwork.

LITTLE BOY SEEMS OVERWHELMED

"Avramushka," she said, "you're so big now, you're a man. Have all your teeth fallen out? Show me."

The boy seemed overwhelmed and struggled with a drippy nose. His anxious mother sent her husband, Pyotr, off for some pink tissues, which were stuffed through the grating. Then Mr. Vashchenko tried to catch the boy's interest by showing him the family cat, but the cat took fright and scrambled off.

The emotional rendezvous, which occurred while eight other Vashchenko children were waiting at the Yaroslavl railroad terminal, followed the sort of confused and troubled planning and negotiating that have characterized the life of the Pentecostal refugees ever since they burst into the embassy four years ago after a futile campaign to emigrate.

The Vashchenkos and their two daughters, both in their 20's and Mariya Chmykhalov and her 20-year-old son Timofei have lived ever since in the embassy basement, first in one and then in two rooms. Through the years they have grown bitter at the United States, feeling certain that the Government, if it wanted to, could arrange their departure from the Soviet Union.

RETURN TO HOMETOWN DEMANDED

The Soviet authorities have declined to consider applications for emigration unless the refugees first return to their hometown of Chernogorsk in Siberia, and the Pentecostals fear that this is simply an attempt to pry them out of the embassy.

An embassy spokesman said that originally all the Vashchenko children had wanted to visit their parents and sisters, but the embassy did not want more than two to enter the building at one time. The spokesman declined to explain the conditions, but it seemed intended to prevent more of the Pentecostals from taking permanent refuge.

The elder daughters—Lidiya on the outside and Lyubov inside, both of whom speak for the group—refused the condition, saying, "We want to discuss our future together as a family." After several hours of negotiations, only the two youngest children were brought to the window.

The daughters' rejection of the embassy's conditions was evidently meant in part to dramatize the family's plight. The family made no effort to clear reporters away, and Lidiya Vashchenko said at one point: "Let people see how we are separated."

Mrs. Vashchenko appeared dismayed that she could not meet with all the children from whom she has been separated for so long.

"I though we would have an evening together," she said, "It would have been good if you had all come."

With the glare of television lights and the iron grate between them, the family members seemed at a loss what to say during their encounter. Mrs. Vashchenko fretted about whether Lidiya was warm and pushed cookies and small gifts past the edge of the grate, while Mr. Vashchenko tried to hand a stack of Christmas cards to the children.

At times the mother seemed to differ with her daughters and their bitter countenance.

"There is no room for us here, and no one wants us there," Lidiya said, alluding to the Soviet Union and to the United States.

"There are some very good American people, it's just some of the people here," Mrs. Vashchenko suggested. "We'll all be together soon."

"It would have been good if you had all had come," she continued. "Will you be all right?"

"Don't worry, mama," Lidiya answered. "If they take us away, they'll take us away. If the don't, we'll continue to wait."

The time came to separate, and 12-year-old Sarra politely said, "Thank you, papa and mama." As Lidiya walked off with the two children, the mother and her two daughters inside broke into sobs.

A NIGHT IN THE STATION

Lidiya Vashchenko said she and the 11 children would spend the night at the Yaroslavl station, and in the morning would decide what to do next.

The policemen who witnessed the scene made no atempt to interfere with the sidewalk meeting, although several cars drove up with uniformed and plainclothes reinforcements.

The Pentecostals have posed a continuing problem for the embassy, which has been helpless in arranging emigration and, at the same time, has been unable to convince the Siberians of its impotence.

The refugees have focused attention on efforts by Pentecostals to emigrate. In contrast to other organized religious denominations, the Pentecostals and other Protestant fundamentalist sects have not been officially accepted in the Soviet Union on the ground that their religious precepts and traditional interpretations of the Bible come into conflict with military service and other social obligations incumbent on citizens.●

PEACE IN EL SALVADOR

HON. GERRY E. STUDDS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. STUDDS. Mr. Speaker, on the second anniversary of the murder of four American religious women in El Salvador, I think it is appropriate for us to pause and reflect on the current status of conditions in that war-torn country. Unfortunately, not only are these murder cases unresolved, but the murders of tens of thousands of Salvadorans have gone unpunished as well, while the abuse of human rights in that country continues. A recent editorial from the Boston Globe highlights several of the most essential elements of the current situation in El Salvador, and I would like to include a copy of this article in the RECORD at this time for the benefit of my colleagues. Among the most important points are the fact that dominant political control of the country continues to rest, not as it should with the civilian leadership, but in the hands of the military council headed by Gen. Jose Guillermo Garcia; that General Garcia does not, as some have claimed, constitute a moderate alternative to rightwing leader Roberto D'Aubuisson; and that U.S. policy is fatally flawed by our continuing refusal to support proposals for dialog to help put an end to the violence. On this special occasion, I think it is important to send a message to El Salvador that the people of the United States stand firmly by our commitment to terminate future supplies of military assistance to El Salvador unless there is a genuine good-faith effort to fully investigate and bring to justice all of those responsible for murdering U.S. citizens in the country.

The editorial follows:

[From the Boston Globe, Nov. 21, 1982]

GRAVEYARD SPIRAL IN EL SALVADOR

A blistering speech delivered recently in El Salvador by US Ambassador Deane R. Hinton caused an uproar there. Hinton told a prominent Chamber of Commerce audience that powerful elements in the Salvadoran establishment are a "mafia. . . . The gorillas of this mafia, every bit as much as the guerrillas in Morazan and Chalatenango [provinces] are destroying El Salvador," he said.

The business leaders lashed back with a newspaper ad calling Hinton's warning an "act of arrogant imperiousness" worthy of "a delegate of ancient imperial Rome. . . ." That retort could be translated roughly as: "The shoe fits and we don't like it."

The White House didn't like the speech either. It was too blunt, too powerful, too true. Hinton may have given momentary cheer to Administration critics because his words suggested greater State Department willingess to acknowledge the grave mistakes inherent in current US policy toward El Salvador. But President Reagan, who prefers "quiet diplomacy" when dealing with those he considers friends, hastened to undercut the ambassador. And so the message to the Salvadoran regime was left as ambiguous and as permissive as ever.

Administration policy toward El Salvador consists of interwoven strands: shoring up the status quo, pretending for home consumption that civilian government holds sway, attaching no serious conditions to American aid, hoping for a military victory in the civil war, spurning repeated guerrilla offers for peace talks—and turning a blind eye to the consequences.

This policy is similar to that of the Carter Administration several years ago in Nicaragua. Carter moved too little and too late to distance the United States from the corrupt, discredited Somoza regime. This accelerated the alienation of the Nicaraguan left and steadily weakened the political center, so that by the time the Sandinistas finally won their military victory, the influence of moderates in their ranks was severaly diminished.

Applied now to El Salvador, this dismal policy is equally shortsighted. But it is also deceptive. The pretense that we are dealing with a legitimate, democratic government masks the reality that the *real* center of power in El Salvador, which should be held accountable for all that happens there, is the military. Specifically, it is the military council headed by the minister of defense, Gen. Jose Guillermo Garcia.

For 50 years the power has been held by the military, who have exercised it for their own benefit and for that of the wealthy, narrow upper crust known as the oligarchy. The president and the constituent assembly, subject of so much attention at last March's election, provide only a facade of democracy. The court system, banks, budgets, death squads—all the instruments of government in El Salvador—are in one way or another controlled by military officers jockeying perpetually and warily for power.

Events such as the Hinton-speech flap or the recent announcement that some suspects in the 1980 killings of four American churchwomen may actually face trial should not obscure the fact that, beneath it all, very little has changed, either in Washington or San Salvador.

Much the same goes for the recent reports of a power struggle between Gen. Garcia and Roberto D'Aubuisson, the irrepressible former national guard intelligence officer who heads a rightwing party in the Constituent Assembly.

D'Aubuisson, who has many friends in the military, has been trying to engineer a coup to dump Garcia. Garcia seems to have thwarted the effort of shuffling several of his subordinates.

Watching such palace coups is good entertainment, but it's a mistake to read too much into them. D'Aubuisson, the designated bad guy, is indeed a dangerous, violent and ambitious man. But if Garcia is the good guy, his most evident attribute is merely that he knows how to hold onto power. Through four presidencies he has survived as minister of defense. Americans are told Garcia is furthering American interests. What results has he, in fact, produced?

The traditional career aim of many Salvadoran officers is to get rich through graft. To do that they must play the game while they rise through the ranks in a highly intricate system of cohorts. For years they cooperate in subordinate roles, knowing that when they get to be colonels, or thereabouts, the money will pour in.

As a result, many Salvadoran field commanders are not really soldiers. Their units fight like campfire girls. An offensive early last summer is reported to have thoroughly discredited Salvadoran troops in the eyes of Honduran counterparts deployed at the border in a "hammer and anvil" strategy to trap the guerrillas. Much had been expected of the troops and officers of the special brigades trained in the United States. But instead of demonstrating the bold new anti-guerrilla tactics they had been taught, small units and night patrols, they reverted to clumsy mass movements and the guerrillas ran circles around them. In image-conscious Central America, the United States was seen as backing a loser.

It's time for U.S. policy to get down to basics. The real source of power in El Salvador is the military. The minister of defense must be held responsible, not for purported good intentions, but for results.

One way or another, Gen. Garcia must stop the killing of the "little people," over 30,000 of whom have died in the past three years. He must punish the killers and their bosses—or drive them into exile if that's easier. And he must not be allowed to purchase a succession of temporary dispensations, for example by allowing a show trial to begin in the case of the slain American nuns. After all, it is the killing of a Salvadoran multitude that is destroying the country.

To pull El Salvador out of its graveyard spiral the Reagan Administration will have to do two things: First, give the military a short deadline for shaping up the country militarily, judicially, politically. And Second, reverse its position on peace talks. Both demands will have to be backed with the threat to end American aid.

Unless the United States insists on a political settlement in El Salvador as the price for continued assistance, the old corrupt system will continue.

With one leg already out of the country, with bank accounts pre-positioned in friendly havens like Miami, oligarchs and military chiefs alike will follow a course of accelerated graft, getting rich as fast as they can as long as they can, conceding nothing to lay the groundwork for a stable future.

The Reagan Administration has not shown the moral compass, political wits and diplomatic backbone to deal with this situation to date. So in January, at the next deadline for "certifying" progress in El Salvador, it will be time for Congress to step in.●

DOMESTIC CONTENT: PUT ANOTHER AMERICAN OUT OF WORK

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. DANNEMEYER. Mr. Speaker, all of us are painfully aware of the tragic situation that exists today with respect to unemployment. The Bureau of Labor Statistics has reported that the unemployment rate in October was 10.4 percent, which translates into fully 11.6 million Americans out of work.

Under these circumstances, it is difficult to resist the temptation to resort to protectionist legislation, but resist it we must. Before the books are closed on the 97th Congress, we may very well be called upon to act on H.R. 5133, the Fair Practices in Automotive Products Act. This measure, commonly known as the domestic content bill, would require a progressively increasing percentage of domestic parts and labor in all vehicles sold in the United States. Proponents of the bill claim that it would save or create jobs in a job-hungry economy.

Unfortunately, nothing could be further from the truth. This is a jobs bill, allright. It is, however, a jobs transfer bill, not a jobs preservation or creation measure. If this bill is enacted into law, Americans whose jobs relate to auto imports, such as longshoremen and import auto dealership employees, will be lost. In its analysis of the direct employment effects of H.R. 5133 as amended by the Energy and Commerce Committee, the Congressional Budget Office stated that, by 1990, some 38,000 auto jobs would be created, but would be offset by the elimination of 104,000 nonauto jobs.

Specifically, those whose jobs are dependent upon exports will be placed in great jeopardy. We may reasonably expect that foreign nations will use our passage of domestic content legislation as grounds for retaliatory action against American exports. In fact, such a step is sanctioned by the General Agreement on Tariffs and Trade (GATT). This retaliatory scenario is described as a "highly probable outcome" by the Congressional Budget Office in its analysis of the original legislation which was prepared at the request of the Ways and Means Subcommittee on Trade.

There are those who have challenged this export effect on the grounds that retaliation will simply not take place. While I strongly disagree with this assertion, I must further note that a negative impact on U.S. employment will occur even without formal or informal foreign retaliation against American exports. This loss of jobs will likely take place as a result of the impact of the legislation on currency exchange rates between the dollar and the foreign currency of the auto exporting nations, such as the yen in the case of Japan.

While we were away for the election period recess, an excellent analysis of this very point was carried on the oped pages of the Washington Post. Economics professor Robert M. Dunn, Jr., of the George Washington University, wrote a thought-provoking commentary that merits our further consideration. The article was printed under the appropriate headline of "Save an Auto Workers' Job, Put Another American Out of Work * * *" Dunn argues that under the present system of floating exchange rates, job gains in Detroit will be offset by job losses in other cities.

Dunn does not stop with a negative approach to domestic content legislation. He goes on to point out that part of the auto import problem stems from the exchange rate between the dollar and other world currencies. The overvaluation of the dollar relative to other currencies has put U.S. firms in a difficult position to compete because U.S. exports are made more expensive while imports from other countries, such as autos, are made less expensive.

The answer, he argues, is not domestic content legislation. Rather, the Congress should look at the fact that a large part of the exchange rate problem stems from the high level of interest rates in the United States. He goes on to note:

> Although interest rates are determined by a number of factors, predictions of huge federal deficits have been a dominant element in maintaining high U.S. yields since early 1981.

Mr. Speaker, as my colleagues are aware, I have been arguing for further restraint in Federal spending increases to combat record deficits and other borrowing-related activities for quite some time. If we are truly serious about dealing with the economic problem of unemployment, as opposed to the short-run perceptual problem of unemployment, we would be seeking to bring interest rates down, thus increasing job opportunities for all Americans. Instead, we are thinking about pursuing a protectionist path with the domestic content bill that will either shift unemployment from one American to another on the basis of political leverage, or shift our unemployment problem to other world economies.

Mr. Speaker, as part of the continuing debate over domestic content legislation, I ask unanimous consent to insert the full text of the article by Professor Dunn at this point in the RECORD:

[From the Washington Post, Oct. 28, 1982]

SAVE AN AUTO WORKER'S JOB, PUT ANOTHER AMERICAN OUT OF WORK

(By Robert M. Dunn, Jr.)

People who support domestic-content (or "local-content") laws for imported automobiles argue that they would reduce unemployment in the United States. They are wrong.

As long as the United States maintains a floating exchange rate, the adoption of protectionist measures to help one industry will merely shift jobs from elsewhere in the economy to the favored sector, with no significant effect on total employment. Changes in the exchange rate for the dollar are the mechanism through which output and jobs are lost in the unprotected industries. Protectionism is never a sensible way to increase domestic employment, but it is wholly self-defeating for a country with a floating exchange rate.

Under fixed exchange rates, it might be possible to view the short-term effects of a tariff solely in terms of impact on the protected industry, because there would be no exchange rate movement to cause undesirable effects elsewhere in the economy. If foreign countries did not retaliate against U.S. restrictions on car imports, for example, employment would increase in Detriot without loss of jobs elsewhere in the United States.

But since the exchange rates began to float in 1973, this in no longer true. A decision to apply domestic-content rules to cars sold in the United States, for example, would greatly reduce imports from Japan, causing a parallel decline in the U.S. demand for yen to pay for those cars. The yen would then depreciate and the dollar would appreciate until the balance in international transactions was restored. As consumers in the United States and abroad responded to this change in relative prices by purchasing fewer U.S. goods and more foreign products, sales and employment would be lost in a range of U.S. industries. The U.S. car industry might gain from the imposition of domestic-content rules, but other domestic industries that must compete in world markets would lose. Total employment in the U.S. economy would not increase.

With fixed exchange rates among currencies, the worldwide employment effects of U.S. protectionism would be a "zero-sum game," in that job gains in the United States would be offset by job losses abroad. Under the existing system of floating exchange rates, the effects of protectionism on employment are a "zero-sum game" within the United States. Job gains in Detroit are matched by job losses in Boston and Seattle, with exchange rate changes imposing the losses on unprotected parts of the U.S. economy.

A statistical study has recently been completed in the Labor Department supporting this argument. It concludes that the original form of the domestic-content bill would

create about 300,000 jobs in automobile manufacturing and related industries, but that about the same number of job would be lost elsewhere in the U.S. economy as the exchange rate for the dollar rose. The study indicates that the apparel and electronic components industries would be particularly injured by the exchange rate change, and that computers and commercial aircraft would also be seriously affected. The study suggests that because the U.S. auto industry uses fewer workers per million dollars in sales than do many other affected industries, the adoption of the domestic-content bill for cars might actually cause a slight net loss of employment in the United States.

It is surprising that industries such as apparel and computers have not realized that protectionism for automobiles would hurt them, and entered the lobbying battle against the domestic content bill. The late harry Johnson of the University of Chicago argued many years ago that floating exchange rates were a good idea precisely because they would destroy the traditional arguments for tariffs and encourage an era of free trade. He optimistically assumed that politicians and lobbyists would understand that protection for one industry was merely a tax on other domestic industries under floating exchange rates. But it doesn't seem to be working out that way. Walter Mondale's conversion to protectionism is a particularly unfortunate example.

If Washington wants to help U.S. industries compete against foreign firms, the first goal must be to reverse the sharp increase in the exchange rate for the dollar that has occurred during the last 18 months. A decline of the dollar to more realistic levels would be expensive for American tourists abroad, but it would greatly help U.S. industries that compete against imports, such as cars and apparel, and those that export, such as computers and aircraft.

Bringing down the exchange rate for the dollar requires a continuing decline in U.S. interest rates. Although interest rates are determined by a number of factors, predictions of huge federal deficits have been a dominant element in maintaining high U.S. yields since early 1981. Gaining permanent control over federal deficits requires decisions that are painful and politically risky. It is far easier for politicians to promise help for U.S. workers and industries through domestic content rules and other protectionist policies. Such an approach will actually produce no increase in employment or any other help for the economy, but that result would be apparent only in the long run. Election results are always in the short run.

IMPACT OF THE NEW FEDERALISM ON HEALTH SERVICES FOR CONNECTICUT CHILDREN

HON. BARBARA B. KENNELLY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mrs. KENNELLY. Mr. Speaker, I rise today to call to the attention of my colleagues some compelling testimony delivered at a forum in my district last September, held to discuss the impact of the New Federalism on children in Connecticut. The forum, hosted by St. Joseph College in West Hartford, aired the views of State officials, nonprofit agency heads, and many others. I was very pleased to participate as a panelist along with my good friends Representative TOBY MOFFETT and Representative GEORGE MILLER.

Few among us would quarrel with the need to control Federal spending, yet most of us also would agree that budget cuts should not come at the expense of one of society's most precious—and most vulnerable—resources: our children. Among those offering testimony at September's hearing were Estelle Siker, director of the community health division of the State's department of health services, and Gene Bennion, social policy and human resources director for the League of Women Voters of Connecticut. In commenting on the New Federalism, Mr. Bennion and Ms. Siker voiced deep concern over the impact of budget cuts on programs that promote proper nutrition for low-income mothers, their infants, and young children. As Bennion points out:

Research indicates that without adequate nutrition during pregnancy and early childhood, physical and mental development is impaired.

He and Ms. Siker expressed the view that cutting these nutritional services for short-term savings may very well result in far higher expenses for health care programs and institutional care in the future. As the debate over Federal priorities and fiscal 1983 spending continues, I would like to take the opportunity to share some of this testimony with you.

IMPACT OF THE "NEW FEDERALISM" ON HEALTH SERVICES FOR CONNECTICUT CHILDREN

I am Estelle Siker, Director of the Community Health Division in the State Department of Health Services. I am a board certified pediatrician with a Masters in Public Health. The major responsibility for health programs for mothers and children (Maternal and Child Health) rests in my division.

Our priorities are promotion of good health and prevention of disease and disability. Our efforts are directed to assure that (1) babies are born healthy, (2) that children are provided with ongoing care to promote good health and provide early identification and intervention for potential health problems, especially in the first 6 years of life, (3) that children receive comprehensive rehabilitative care for physical disabilities.

The "New Federalism" with diminished federal dollars in the Maternal and Child Health services block grant, has meant a 25% reduction in funds from fiscal 1981 to fiscal 1983 with an anticipated reduction in services to approximately 9,000 children. This has resulted in reduction of services to handicapped children by elimination of 3 regional clinics, reduction in dental health services, reduction in breadth of services at local MCH primary care clinics funded by our department and reduced technical assistance and monitoring in our child day care licensing program.

The impact of these reduced services is greater on the populations targeted in the MCH services block grant legislation, low income mothers and children and those with limited availability of or access to quality maternal and child health services.

We ask you to consider the capacities of these neglected children, 20 years from now, for independent living, responsible citizenship and even political leadership.

We will be happy to provide additional information.

LEAGUE OF WOMEN VOTERS OF CONNECTICUT TESTIMONY AT CONGRESSIONAL FORUM, ST. JOSEPH'S COLLEGE, HARTFORD, CONN., SEPTEMBER 8, 1982

I am Gene Bennion, social policy and human resources director for the League of Women Voters of Connecticut. We would like to present brief testimony on "New Federalism: Its Impact on Connecticut Children".

Throughout Connecticut one of the unheralded but significant changes is that clinics and agencies are limiting and/or eliminating educational and preventive programs. Lack of funds is forcing a return by agencies and clinics to the traditional fee for service. Neither corporate giving nor giving from the rest of the private sector has grown to cover lost federal funds. Examples of the programs that have been restricted at one agency are the program for child abuse prevention and the emergency service program at the Wheeler Clinic in Plainville, Conn. Present projections are that all funding for the child abuse prevention programming may be gone in one year. The emergency service program (which is an emergency mental health program serving both adults and children) faces shrinking funds and increasing demands. Other agencies and clinics throughout Connecticut have similar needed programs which share bleak chances for survival.

The WIC program, a federally funded nutrition program serving children under five, pregnant women, and nursing mothers and their infants has been cut. Formerly eligibility was based on 195% of poverty level; now for persons to be eligible, their income must not exceed 185% of poverty level. In the Waterbury area this change resulted in 132 being dropped from the WIC program. It is important to note that the change in eligibility requirements has not resulted in a decrease in program participants because of unemployment. Unemployment has increased and unemployed persons are eligible to participate if they meet the WIC guidelines.

Research indicates that without adequate nutrition during pregnancy and early childhood, physical and mental development is impaired. The costs of this preventable damage are higher for society in terms of schooling and other institutional care. WIC is a successful preventive program that should be strengthened.

The programs mentioned in today's testimony help children and their parents. Under new federalism these programs have shrunk. The League of Women Voters of Connecticut does not believe that this is appropriate or wise social policy.

Thank you for your attention.●

RACIAL INJUSTICES INFLICTED ON BLACK AMERICANS

HON. WILLIAM L. CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. CLAY. Mr. Speaker, with the many problems that our great Nation is facing today, we cannot afford to let the continuing struggle of America's minorities be abandoned. Black Americans, for one, have made tremendous gains in the fight for equality. That is why it is imperative that now, more than ever, we must critically examine the policies this administration has advanced toward the minority community.

In a recent editorial written by Carl T. Rowan for the National Leader, Mr. Rowan focuses on the racial injustices the administration's policies have inflicted on black Americans.

I commend this column to my colleagues:

LETTER TO LYNDON

(By Carl T. Rowan)

DEAR PRESIDENT JOHNSON: I hope this letter finds you and President Kennedy in the same precinct, and that you both can brace yourselves on a cool stump, because I'm about to write about how you conned up Black people into thinking that you were our friends, leaving us to find out at this late date that your Great Society programs injured Black people severely.

All these years I've been talking and writing about how Mr. Kennedy made racial justice and integration fashionable in a Washington that had been shamefully Jim Crow, and how you were the nation's greatest civil rights president. I've been praising you for bludgeoning Congress into passing a Public Accommodations Act that ended apartheid in America's hotels, restaurants, buses; for daring to say to a joint session of Congress, on national TV, in those turbulent '60s, "We shall overcome," as you pushed into law a Voting Rights Act that opened the door of democracy to millions of Blacks who had been disenfranchised through violence, intimidation, trickery.

Now comes the terrible revelation that, unwitting or not, you sold Black people into bondage.

Who is the Great Revealer? President Ronald Reagan, the new champion of racial justice—the man who is trying to give tax-exempt status to schools and colleges which practice blatant racism, and who made a futile effort to sabotage your Voting Rights Act.

I hate to suggest, sir, that your reputation, and that of Jack Kennedy, for producing social programs that helped Black families is phony. But that is the word that 10,000 conservative Black Republicans are exhorted to spread across the land (their inflated number).

You understand my dilemma, I hope. I've been telling Americans how Mr. Kennedy and you raised Black family income from a level of 54 percent of white family income in 1961 to where it was 64 percent of white family income in the late 1960s.

Now I ask: How could you hurt Black families this way?

I am inspired to ask that question by Ronald Reagan, who has befriended Black families by imposing policies that have pushed Black family income down to where it is now only 56 percent of white family income.

Before I deliver my ultimate "Shame on you!" I want to deal with education. I've been telling college convocations and educators' conventions that fewer than 750 Black Americans were in college at the turn of the century, and only 274,000 in 1965 when you pushed through the Higher Education Act that made it possible for 1,133,000 Blacks to go to college in 1981.

How could it have taken me so long to learn that this was just another of your "Great Society" tricks to enslave Black people?

Who exposed you on this matter? President Reagan, who has slashed federal funds for education, from kindergarten through graduate school, and who is miffed that a Congress yet unweaned from your wicked ways recently thwarted his attempt to snatch another $365 million away from the education of disadvantaged children and needy teenagers aspiring to a college education.

You ask why I listen to Reagan? Well, he did tell those Black conservatives that Blacks were worse off in 1980 than in 1969—the same thing I've been saying. All this time I've thought that the villains were Richard Nixon and Howard Phillips, the Conservative Caucus honcho that Nixon commissioned to wage war on your War on Poverty.

Now Reagan tells me that *you're* to blame for almost everything—especially the rise in Black unemployment, since Reagan took office, from 14.3 to 18.8 percent, including a jobless rate among Black teenagers of 51.6 percent, Reagan implies that your ghost holds his hand when he jerks food away from hungry kids.

We are sure lucky to have Mr. Reagan to tell us what enemies of Black people you and John Kennedy and FDR and Hubert Humphrey really were.

That's why I wish you were still in the Oval office, so we Blacks could drop in and say exactly what we think about you.

Sincerely,

CARL T. ROWEN.●

THE MURDER OF FOUR AMERICAN CHURCHWOMEN IN EL SALVADOR

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. MOAKLEY. Mr. Speaker, 2 years ago today, four American churchwomen were killed by soldiers of the Government of El Salvador. In today's Washington Post we are informed that the families of these slain Americans are giving up their efforts to participate in the trial of the soldiers charged in the killings. The families have been unable to find a Salvadoran lawyer who is willing to handle their case, because the fear of retribution at the hands of the military is so great. There is reason to believe that these five soldiers were acting under orders, but without a lawyer, the aggrieved families will never see this possibility investigated.

Mr. Speaker, I am outraged that the Reagan administration will be seeking certification for human rights conditions in El Salvador. It takes a rather avid imagination to perceive improvement in the human rights situation in El Salvador. The administration appears to have such an imagination. The same voices which speak with such fervor about totalitarian repression in the Soviet Union are strangely indifferent to the excesses of the Salvadoran army. Are the victims of such terror to find comfort in the fact that their government is only "authoritarian?"

I wonder when the administration will see fit to apply the same standards of conduct to our authoritarian friends as it does to our Communist adversaries. How many people will be killed, tortured, or maimed, before we decide that we can no longer support the Government of El Salvador in good conscience? How much are we willing to sacrifice in the name of anti-Communist paranoia? Are we willing to sacrifice the very ideals of freedom which this country was founded upon, and which form its unique strength?

Two years ago, four American churchwomen were killed and raped by Salvadoran troops. It is difficult to conceive of a more heinous crime. Sadly, conditions in El Salvador have not improved since that time. The land reform program is in a shambles, and the current government has even less respect for human rights than the one which proceeded it. Yet 2 dismal years after these American churchwomen were slain, the Reagan administration is seeking certification for human rights improvements in El Salvador. Such certification would be absurd. If the term "human rights" is to have any meaning whatsoever, then we cannot continue to support the Government of El Salvador.●

JUDICIAL REFORM

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. PHILIP M. CRANE. Mr. Speaker, I have long been concerned with the judiciary system's encroachment upon the legislative branches, constitutionally directed responsibility to make policy. Senator JOHN EAST has introduced a bill that would restore the proper role the court system has ceased to occupy. The bill would also return to the legislative and executive branches the authority that is constitutionally delegated to them. It would reinstate the separation of powers intended by the Founding Fathers which has been disregarded and ignored.

Today, the Federal courts have overstepped their boundaries by focusing on the creation of policy and not on judicial review of errors and injustices that occur in our system. Their constant and broad interpretations of the Constitution and its amendments have led to a proliferation of policy initiatives. The courts have no constitutional jurisdiction in this area. Senator EAST's bill will give Congress the opportunity to reassume our constitutionally defined legislative function of originating, deliberating, debating, and formulating policy.

Mr. Speaker, allow me to call to my colleague's attention a Washington Times lead editorial in today's edition. I commend the paper for bringing the aforementioned problem to the public's attention, and I commend Senator EAST for his comprehensive and necessary proposal. I urge my colleagues to seriously review this important bill that would return our governmental process to the fundamental basis on which it was founded.

The article follows:

[From the Washington Times, Dec. 2, 1982]

RESTORING THE CONSTITUTION

Sen. John East has fired the first resounding shot in what promises to be one of the most important congressional battles of the century. A few days before the election recess he introduced the Judicial Reform Act of 1982. This is no half-hearted attempt to redress this or that example of overreaching by the federal courts. The bill's 12 parts propose nothing less than to return the U.S. Constitution to its original "uninterpreted" state.

The several provisions would strip the federal judiciary of the legislative and executive authority it has usurped from Congress and the executive branch. It addresses every issue raised by the irrepressible judicial activism of the last several decades. The fight will be a glorious one.

The proper role of the federal judiciary has been one of the most intensely debated issues in this nation's history. Where, out of political cowardice, Congress has defaulted on its responsibility to resolve difficult and controversial disputes, federal judges have stepped into the vacuum. The result has been that too much of the most important "legislation" of the 20th century has been written, not by elected representatives, but by appointed judges.

Although some parts of the bill overshoot the mark, the Judicial Reform Act gives Congress the opportunity to reassert its unquestioned, if little-used, powers to shape and control the jurisdiction of the federal courts. Led by the Supreme Court, federal judges have redrawn political boundaries, taken over school boards, directly interfered in prison administration, punished police by excluding completely reliable evidence, taken religion out of the schools, and even told doctors when they may—and may not—perform abortions. It is the premise of the East bill that Congress could—and should—accept its legislative responsibility to debate and decide these issues itself.

But it is not only Congress that will benefit from once again having the constitutional power the bill would retrieve. State governments will find themselves freed of the large and onerous burden of federal judicial second-guessing which has been grafted onto the Constitution by ever-broader interpretations of the 26 amendments. The powers reserved by the Founding Fathers to the states and to the people will be theirs once more.

Sen. East's legislation also includes provisions which would greatly improve congressional oversight of the federal judiciary, which would make the Supreme Court's membership geographically representative—as it was at the beginning, and which would in other ways reduce the tremendous power of the federal courts.

The Senate Judiciary Subcommittee on Separation of Powers, chaired by Sen. East, will schedule hearings after the 98th Congress convenes in January. We'll have more to say before then.●

COMMEMORATING AMERICAN MARTYRS IN CENTRAL AMERICA

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. BONKER. Mr. Speaker, today is the second anniversary of the brutal slayings of four churchwomen in El Salvador. I would like to take this opportunity to express my continued personal concern to the friends and family of Maura Clarke, Ita Ford, Dorothy Kazel, and Jean Donovan, and my support for the dedicated men and women who continue these women's work with the poor and suffering in Central America.

Yesterday the Subcommittee on Human Rights and International Organizations held a hearing on the subject of "Religious Persecution as a Violation of Human Rights in Latin America." I would like to commend to the attention of my distinguished colleagues my opening statement.

The statement follows:

Today's hearing is the eighth in a series on Religious Persecution as a Violation of Human Rights. Over the past year, the Subcommittee on Human Rights and International Organizations has examined many examples of religious persecution, including the Baha'is in Iran, the Christians and Jews in the Soviet Union, the Copts in Egypt, the Falashas in Ethiopia, and the Presbyterians in Korea and Taiwan. This afternoon we will be examining the plight of the Christian Church in Latin America.

The issue of the repression of the Church in Latin America is of particular interest to me because several American priests and nuns have themselves been the victims of murderous repression. Two years ago, four U.S. churchwomen: Maryknoll Sisters Maura Clarke and Ita Ford, Ursuline Sister Dorothy Kazel, and lay missionary Jean Donovan were brutally murdered by Salvadoran soldiers. Over a year ago when the then-President Duarte appeared before the Foreign Affairs Committee, I asked him about the status of the investigation and prosecution of those responsible for the murders. To this day there has been no investigation of the high level officers who may have ordered their murders, and no prosecution and conviction of the soldiers who actually carried out those orders. The tragic assassination of Archbishop Romero illustrates the problems of the Church vividly.

In nearby Guatemala, two American priests were assassinated: Father Stanley Rother in August of 1981 and Brother James Miller in February of 1982. Both of these men worked with indigenous communities in rural Guatemala, and both were gunned down by "death squads". A Mennonite missionary, John Troyer, was also killed by unidentified gunmen. Eight Guatemalan priests and dozens of Catholic catechists were victims of government violence last year.

The Catholic Church has experienced similar repression in Chile and Brazil. In these countries, the Church has emerged as an advocate for the poor, the oppressed, and the tortured.

In Nicaragua, church activities were restricted under the Somoza dictatorship, and priests and nuns were persecuted. I am concerned that church-state relations continue to be tense under the Sandinista government. Prominent clerics have been attacked, the church's access to the media is restricted, and there is an increasing tendency to substitute mob rule for dialogue and discourse. And the Moravian Church, an important advocate for the Meskito Indians who have been subject to relocation by the Nicaraguan authorities, is under increasing pressure.

Because of our close proximity to our Latin American neighbors, relations between U.S. church groups and Catholic and Protestant church workers in Latin America have been particularly close. We are honored to have with us today several distinguished representatives of the U.S. church community who have close ties with their Latin American co-religionists.●

A TRAGIC ANNIVERSARY

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. GILMAN. Mr. Speaker, I rise today to remind my colleagues of a tragic anniversary—one which I, and the entire American people wish had never happened. I am referring to the brutal events of December 2, 1980, when, thousands of miles from home, four American churchwomen were massacred by a group of Salvadoran National Guardsmen. These four courageous women, Ita Ford, Maura Clarke, Dorothy Kazel, and Jean Donovan, were in El Salvador because of their convictions in helping the people of El Salvador. Amidst the bloodshed and continuous violence, they tried to alleviate the fear and death surrounding the populace. It is a crime to humanity that these women were murdered, that innocent lives were lost.

Mr. Speaker, this anniversary cries out for recognition—American citizens, blameless but for their humanity to their fellow man, are slain without any regard for their vocation or nationality. We cannot allow this anni-

versary to go forgotten. We must continue to pursue a thorough investigation and trial of the accused. It has been too long. Justice delayed is justice denied. I have proposed, Mr. Speaker, and will continue to insist, that this incident must be a major factor in any consideration of aid by this Government to the country of El Salvador. This case must be a test of the good will of the El Salvadoran Government. The actions taken by the Government of El Salvador can represent their commitment to respecting human rights, individual liberties, and the rule of law. But too few steps have been taken in this direction, and I continue to urge the Salvadoran authorities to leave no stone unturned in efforts to fully uncover the facts of this tragic situation, as well as resolving beyond any reasonable doubt the guilt of all those responsible for these actions.

Mr. Speaker, in recent times I have proposed, and this body adopted, a provision requiring Presidential certification of progress made in El Salvador before aid can be granted. I am, therefore, pleased that H.R. 7323 has already been considered and endorsed by my Subcommittee on Inter-American Affairs. As you know, this bill for "good faith efforts" to investigate the crimes against the four churchwomen and the two labor leaders as a permanent condition of certification. I laud the intent of this bill, and am pleased to be a sponsor.

Yet, we must remember this infamous day, recognizing that it occurred 2 years ago. And that in those 2 years, the guilty have not yet been convicted. This unconscionable act must not go unpunished, nor should we allow any undue delay. In honoring the memory of these brave, dedicated women, we must persist and prod, resolve and remember.●

A CRUEL INVASION OF PRIVACY

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. WYDEN. Mr. Speaker, 2 days ago, women suffered a cruel invasion into their private lives.

I am shocked and alarmed by a provision included in the Treasury and Postal Service appropriations bill that passed the House on Tuesday—a provision that many of us were unaware was included in the bill.

Tucked away in that spending bill was a provision that severely restricts the right of a woman to control her own body. It restricts that right by denying any funds appropriated in the act to be spent on abortions, except where the life of the mother would be in danger.

Mr. Speaker, I am appalled that women who depend on Federal funds have been singled out for this unfair restriction. The decision to terminate a pregnancy should be left to a woman and her physician. At a time when we are attempting to pare down the role of the Federal Government, how can we justify more governmental intrusion into this highly personal matter?

In 1973 the Supreme Court, in Roe against Wade, extended the right of privacy spelled out in the 14th amendment to protect a woman's right to terminate her pregnancy.

Congress has no business undercutting this constitutional right by backdoor ploys to cut funding for abortions. The right to choose should be respected for all women—including those who cannot afford an abortion.

It is my sincere hope that this unfair provision will be deleted when the Treasury and Postal Service appropriations bill goes to conference committee.

Thank you●

TIME FOR ANOTHER SPUTNIK?

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. LaFALCE. Mr. Speaker, during the recent congressional recess, the Nation celebrated a significant anniversary—the 25th anniversary of the launching of Sputnik by the Soviet Union. Few single events in recent decades so shook our Nation's self-confidence. Fewer still proved to be an impetus of such magnitude that we were thrust forward to reach a well-defined national goal.

Twenty-five years ago the United States came face to face with our clear second place position in space exploration. The success of the Soviets defined our own weakness in math, science and technical fields. Of course, the Sputnik launch did more than simply define our weaknesses in the technical fields; it gave us the opportunity to demonstrate our great resourcefulness and ability to establish ourselves as preeminent in vital disciplines.

Following the Sputnik launch, the Nation put together its greatest scientific minds and dedicated its resources toward space exploration and the reestablishment of math and science capabilities. Within months of Sputnik, Congress, at the request of President Eisenhower, passed the National Education Defense Act. Along with the act came not only dollars, but a comprehensive plan for making science, math, and foreign language training a prominent goal for America's economic well-being and national security.

Today we again witness the softness of our technical capabilities. No longer is math and science excellence an established fact that accompanies a diploma. Two articles that appeared recently highlight our serious problems. The first column, by Edward B. Fiske, dramatizes our deficiencies in science and math and notes that the challenge we face is not in the training of our needed technical specialists, but in combating the scientific incompetence of the work force as a whole. The second item, written by Thomas Y. Hobart, Jr., president of the New York State United Teachers, presents sobering statistics on the level of student accomplishments in the technical fields. Mr. Hobart advises us that:

> We are already past the time for exhaustive discussions. . . Action to restore vitality and meaning to science and math education is needed now if we are to halt the withering of those human resources and technological skills which have made our nation a world leader.

Mr. Speaker, bills that have been introduced in recent months to address the math/science/foreign language competency crises lay dormant. As we set our sights on the 98th Congress we must resolve to push forward with these and other measures to insure success. If we do not act quickly, we may find ourselves hopelessly unable to respond to the next Sputnik that our foreign friends or foes may launch.

The articles by Mr. Fiske and Mr. Hobart follow:

[From the New York Times, Oct. 5, 1982]

SPUTNIK RECALLED: SCIENCE AND MATH IN TROUBLE AGAIN

(By Edward B. Fiske)

Twenty-five years ago yesterday, the Soviet Union's launching of the satellite Sputnik not only ushered in the modern space age but shocked Americans into the recognition that Russian science and technology were capable of surpassing their own.

Sputnik was a dramatic and vivid symbol. Americans could go out into their backyards at night and watch the tiny speck move slowly and inexorably across the sky. The Russian accomplishment was to inspire profound changes in many aspects of American life, and in none more than education.

In the next decade, the quality of education at all levels became the center of a national debate and the focus of major Federal programs. High school science education was catapulted in a few short years from the 18th to the 20th century, and schools at all levels discovered foreign languages. Millions of dollars were poured into retraining a generation of science, math and language teachers, and the precedent was set for pervasive Federal involvement in elementary and secondary education.

A decade later, the rush to reconstruct American education ended as abruptly as it had begun. When Neil Armstrong walked on the moon in 1969, it signified that the immediate job of "catching up with the Russians" had been accomplished. The Great Society programs, the war in Vietnam and other changes sent the country looking in other directions.

Today, educators look back on the post-Sputnik decade with some nostalgia. "There was an excitement in education at the time," recalled Ernest L. Boyer, a former United States Commissioner of Education. "The public seemed to turn to education for answers to a critical problem. Teachers and local schools were brought into the action."

They also look back with some sense of irony. There is evidence that, in the face of new kinds of threats—such as economic competition from Japan—the country faces the same urgent need to bolster declining science, math and language skills as it did in the late 1950's, but today there is no vivid symbol like Sputnik to rally national attention.

"What we need is another Sputnik," Mr. Boyer suggested. "Maybe what we should do is get the Japanese to put a Toyota into orbit."

To some, the weaknesses in the American educational system dramatized by Sputnik came as no surprise. The country emerged from World War II knowing that science and technology would play an increasing role in American life. "The development of radar, the atomic bomb, electronic intelligence—all of these gave the country a sense that science and technology were going to improve the quality of life," observed Alphonse Buccino, deputy director of the Office of Scientific Engineering Personnel of the National Science Foundation.

In 1945, Vannevar Bush, director of the Office of Scientific Research and Development, reported to President Truman that in the absence of significant scientific progress "no amount of achievement in other directions can insure our health, prosperity and security as a nation in the modern world." His report led Congress in 1950 to establish the National Science Foundation, which was to develop a national policy to promote basic research and education in science.

Throughout the early 1950's, critics were pointing out flaws in American education. Nicholas DeWitt of Harvard found evidence that the Soviet Union had overtaken the United States in turning out engineers and scientists, and a 1956 study by the Modern Language Association pointed to the low number of people studying foreign languages in a country that had taken on a new role in the world.

In 1957, Elliot L. Richardson, then Assistant Secretary of Health, Education and Welfare, organized a task force on the educational needs of the country, and a subcommittee of the House of Representatives began hearings on what might be done.

So when Sputnik burst across the sky it dramatized problems already identified by academic and political leaders, but pushed them higher on the national agenda. "Nothing really happened until Sputnik made the situation into a crisis event," said Paul D. Hurd, professor emeritus of science education at Stanford.

EISENHOWER'S PLEAS TO CONGRESS

In January 1958, President Eisenhower twice appealed to Congress, stressing the importance of education to national security, and that July Congress passed the National Defense Education Act, identifying math, science and foreign languages as areas in which the nation had a special stake. Financing of educational programs by the National Science Foundation also began to soar.

The net result was a truly remarkable crash program to upgrade the nation's educational resources. By 1973 half a million secondary schoolteachers in math, science, languages and, eventually, other areas, had gone through summer workshops and other federally supported programs to raise their skills. Thousands more had received graduate fellowships.

The next priority was curriculum reform. In the years after Sputnik, the N.S.F. poured more than $100 million into new curriculums that revolutionized the teaching of the sciences. The "new math" and the so-called "alphabet soup" curriculums, such as P.S.S.C., the Physical Science Study Committee, were designed to incorporate the latest findings into the high school textbooks and to break the traditional cycles of reading-lecture-recitation. "High school science curriculums went from Newton to Einstein in little over a decade," recalled Harold Howe 2d, a former United States Commissioner of Education.

Meanwhile, new connections were established between research-oriented scholars and classroom teachers. The language laboratory became a permament fixture in schools at all levels, and the National Defense Education Act set the precedent for Federal involvement in local elementary and high schools.

A REDUCED SENSE OF URGENCY

By the late 1960's, though, these strenuous efforts had begun to run their course. The moderation of the cold war and the success of the space program had reduced the sense of urgency. A back-to-basics movement took root, cutting into school time for science and languages.

Perhaps the most important, President Johnson's Great Society program created a new social agenda that emphasized equal access to education, in contrast to the earlier emphasis on producing high-level specialists. The National Defense Education Act was replaced as the focus of Federal educational efforts at the precollege level by the Elementary and Secondary Education Act of 1965, which supported projects such as Head Start for disadvantaged students.

Reaction also developed against the "alphabet soup" curriculums and the "new math." These had worked well for many teachers and for the most talented students, but many others found them too specialized and abstract, and most high school science teaching has now gone back to the old methods. Enrollment in high school language instruction dropped sharply, largely because, during the revolt of college students against required courses in the 1960's, language requirements were the first to go.

The pendulum continued to swing, and evidence is now plentiful that 25 years after Sputnik the country finds itself debating many of the same issues that it faced then.

The National Assessment of Educational Progress has issued a series of reports on the low level of knowledge of science and math by elementary and high school students, and three years ago a Presidential commission headed by James A. Perkins, the former head of Cornell University, criticized what it called the "scandalous incompetence" of American citizens in foreign languages.

"Nothhing less is at issue," the panel warned, "than the nation's security."

A DIFFERENT KIND OF PROBLEM

There are, however, some significant differences between the situations now and in the 1950's. Today there is no dearth of able science majors in college and none of the manpower shortages in scientific fields that marked the pre-Sputnik era. Instead, the problem revolves around the scientific competence of the population and work force as a whole.

"Sputnik made us realize we were still importing scientists, said F. James Rutherford, chief educational officer of the American Association for the Advancement of Science. "But it did not reach people who are legislators and heads of business enterprises who don't understand enough about science and technology but still have to make decisions involving it."

Gerald Holton, the prominent Harvard physicist, agreed, suggesting, in retrospect, that Sputnik had not been crisis enough. "The reasons the Russians got Sputnik into obrit first was that they put their money on large boosters," he said. "Their electronics was not at all that sophisticated. It only took us six months to get back in the race, and once we'd won it we relaxed."

In doing so, Mr. Holton said, the nation passed up the opportunity to develop a scientifically educated citizenry. "The post-Sputnik era turned out scientists, but the real challenge was to lay the foundation of scientific literacy in the nation as a whole."

Another difference lies in the public perception of the threats faced by the country. "The problem today seems both more pervasive and more ominous," suggested Mr. Boyer of the Carnegie Foundation. "The threat is not just military, but it seems to have found its way into the interior of the economy. Somehow it doesn't have the headline-grabbing, traumatizing explicitness of that little basketball glittering up there 25 years ago.

The political climate is also different. President Reagan, while he has been publicly critical of the level of math and science instruction, is committed to mobilizing the private sector while reducing the Federal role in education, not to enlarging Federal programs under the guns of such threats as Japanese technology. Because the threat is seen in terms of economic rather than military security, many people feel the solution lies outside the political system.

Others, however, reject that approach. "There seems to be a myth that somehow if we let every school district do what it wants without any guidance, the national purpose will somehow be served," said Paul Simon, the Illinois Democrat who heads the House Select Subcommittee on Education, "It will take leadership to provide this, but unfortunately the Reagan Administration is not prepared to do so."

In a broader sense, though, the change is rooted in the way Americans have traditionally approached education. Since the late 19th century the Government has poured billions of dollars into education, but rarely for plainly educational purposes. The Morrill Act of 1862, establishing the land grant colleges, was a means to dispose of excess Federal land. The G.I. Bill was a device to reward veterans and ease their way back into normal life. The Elementary and Secondary Act, pushed by a President who was once a teacher but never had his name on a major educational bill, was essentially a device to combat poverty.

The outpouring of Federal funds into education that followed the launching of Sputnik in October 1957 may have been a response to a military threat, but it also represents one of the rare moments in American history when the core of the educational process—the content of curriculums and textbooks, the skills of teachers and so forth—moved to the center of the national attention.

Perhaps the nostalgia of educators for the post-Sputnik decade lies in the fact that such a fervor for education had rarely occurred before and has not happened since. Like Sputnik itself, the urgency about education as a national priority and the excitement of educational reform passed across the sky and over the horizon.

[From the New York State United Teachers, Nov. 7, 1982]

PRESIDENT'S PERSPECTIVE—MATH, SCIENCE PROGRAMS MUST BE UPGRADED

(By Thomas Y. Hobart, Jr., President)

The space shuttle *Columbia* is being prepared for another journey to space. Each time this remarkable craft blasts off and then returns with a new knowledge about space, Americans are reminded of the preeminent position which our country holds in both science and technology. We are also reminded of the drastic changes which our educational institutions had to make in teaching math and science following the successful launching of Sputnik a quarter century ago.

Americans were rudely awakened by this Soviet success and realized the harsh reality that other countries had made an all-out commitment to science and math education. This commitment had paid handsome dividends to the other countries while America faced the ultimate embarrassment of being beaten to space by the Soviet Union.

It was a credit to our national pride that we rededicated ourselves to the pursuit of scientific knowledge and gained a clear and almost insurmountable edge in the "space race."

Now, however, our position as leader of the world's scientific community is once again clearly in jeopardy. There has not been a single startling event, such as the launching of Sputnik, to demonstrate this slippage. Rather it is best seen in the de-emphasis of science and math in our schools over a long period of time. Once more, however, our national leaders are regrouping and seeking ways to strengthen the science and math curricula in our schools. Already there have been several national conferences called to study this issue, and numerous groups, including the American Federation of Teachers, are preparing policy statements aimed at reversing a shocking and potentially dangerous national condition.

Statistics presented at a national convocation sponsored by the National Academies of Sciences and Engineering point to the seriousness of this problem.

There have been marked declines in math scores for both 13-year-old and 17-year-old students. Each of three successive nationwide assessments has shown a decline in achievement over the preceding test.

The science and math scores on the SAT tests have been dropping steadily for two decades. This decline exists at all levels—from 1967 to 1975 those scoring above 700 declined by 15 percent while those students scoring below 300 on that test increased 38 percent.

The shortage of qualified math and science teachers is becoming critical. In 1980, 28 states reported a shortage of mathematics teachers; by 1981 that figure had increased to 43 states. Similar shortages exist for science teachers.

Science and math programs in other countries, such as Japan, the Soviet Union, East Germany and the People's Republic of China, are thriving. Students in these countries spend approximately three times as much time on science and math as even the most science-oriented American students do.

The seriousness of the problem has been recognized. We must now begin the more difficult task of finding solutions. Some of the important issues which will have to be addressed include:

RAISING STANDARDS

For too long educators have allowed a softening of the curriculum. The norm in many states today is a requirement of only one year of science and one year of mathematics for graduation from high school. Already, there are serious attempts to reverse this pattern. For instance, California is now proposing at least three years of math and two years of science for graduation and a special commission in Florida has recommended a requirement of four years of math and four years of science. Such a stiffening of standards will play an important role in rebuilding math and science programs.

UPGRADING TEACHING STAFF

The current shortage of math and science teachers has aggravated the poor state of science education. There must be wide ranging discussions on ways to attract top candidates into science and math teaching. This discussion must center on ways to provide adequate remuneration, necessary teaching equipment and opportunities to conduct meaningful research programs. In order for these discussions to be fruitful it is essential that the designated representatives of the teaching staff play a key role.

CHANGING NEEDS

Educational curriculum must also be examined to insure that it is meeting the changing technological needs of our society. America is rapidly approaching a critical shortage of skilled workers in high technology fields. Education, government and private industry must work cooperatively to insure that these labor shortages can be corrected.

There will be no single answer to meeting the scientific and technical needs of our country during the remainder of the twentieth century. Debate is already under way. All participants in this debate must recognize one rather harsh fact of life as they go about their work—we are already past the time for exhaustive philosophical discussions. Action to restore vitality and meaning to science and math education is needed now if we are to halt the withering of those human resources and technological skills which have made our nation a world leader. For it is precisely that position in the world which will be in jeopardy if we fail to respond.●

TIME TO CUT FUNDS FOR GARRISON DIVERSION PROJECT

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. CLAY. Mr. Speaker, I rise in support of the amendment to delete funding for the Garrison diversion project in North Dakota.

Many words have been spoken today in an attempt to sway the undecided and perhaps change the minds of others who have voted to continue this project in the past. It is my fervent hope that there will always be Members with open minds who can change their positions, as many noted colleagues have done on this one issue.

With all the many facts and figures and noted champions on the side of Garrison, year after year it rolls on. Congress after Congress continues to appropriate money for it. Each year we come closer to killing this wasteful boondoggle but victory has eluded us. Why? Why do some of us continue to vote for a wasteful and destructive water project of such magnitude that it almost defies description? Why do Members who vote correctly on a whole score of other environmental issues vote for Garrison? Why do Members who otherwise favor good Canadian-United States relations vote for Garrison? And why do Members who categorically vote against high-priced Federal expenditures continue to vote for Garrison?

This country has been coasting along for decades, finding the easiest way to deal with pressures and party lines and problems it to vote money for them. The downhill ride is about to end and I fear a brick wall looms ahead. A wall of economic recession, environmental degradation, and loss of faith with the American people we represent. We must put the brakes on wasteful Government spending now. There is simply no way we can continue to vote for projects like the Garrison diversion unit with equanimity.

I ask that each of you reach down into your conscience and ask a few honest questions: Do we really need this project and it's $1 billion price tag? Might there not be a better way, a cheaper way, to give the people of North Dakota the kinds of benefits they need rather than a project that will only irrigate six-tenths of 1 percent of the land? Is the damage or destruction of 12 congressionally authorized national wildlife refuges not worth considering? And is there any reason we should continue to antagonize our good neighbors in Canada? They are deeply concerned about the intrusion of runoff from this project in North Dakota into the Hudson Bay watershed in Manitoba.

Certainly there are no easy answers to these questions. I only say that we must take our responsibilities as representatives of the people seriously enough to ask them and to come up with an answer of no funding for Garrison until some of the harder questions are put to rest.

I hope you will join me in supporting the Conte amendment to cut funding for Garrison in fiscal year 1983.●

EL SALVADOR

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. BONIOR of Michigan. Mr. Speaker, 2 years ago today, four American churchwomen were brutally murdered in El Salvador. It is the shame of our country that we continue to back with military aid, a government that has failed to bring those responsible for this crime to justice, and whose repressive policies continue the flagrant violation of its own citizens' human rights.

We should not use this anniversary merely to deplore the manner of those brave women's death but to dedicate ourselves to the cause for which they lived—social justice and a lasting peace for the people of El Salvador. I take this occasion to reiterate the plea made last summer by the bishops of El Salvador, a plea for all parties to begin the process of political dialog, and I would now like to insert their statement in the RECORD.

SALVADOREAN BISHOPS CALL FOR DIALOG

Having completed four days of intense work, we, the bishops of the ecclesiastical province of El Salvador, cannot leave without directing a pastoral message to the beloved faithful committed to our care and to all Salvadoreans of good will concerning the dramatic situation in which we live in El Salvador.

Conscious that we are not expert in social, economic or political questions, we seek to be interpreters of our suffering people and, from a pastoral perspective, to express the following:

1. From the depths of our heart as pastors we share the sorrow and the anguish of our people, innocent victims of this uncontained wave of violence which has already exacted too high a price in human lives and material goods, putting thousands of homes into mourning and making daily existence ever more unbearable.

2. As people of faith we believe that there is a solution for this dramatic situation and that the solution has to be sought along the paths of reason and not the sterile way of violence.

3. For this very reason we exhort all the parties involved in the conflict to abandon every obstinate attitude and be open to a dialogue that is sincere, open and true, animated by good will and a spirit of authentic patriotism, placing the unity of the Salvadorean family above individual or group interests. For its part, the Church maintains its readiness to work tirelessly, within its own proper sphere, for peace and for reconciliation among Salvadoreans who have been constrained to become enemies to one another.

4. Finally, we invite everyone to place their hope not in human forces but in Him who said "Peace be with you" and who came to give us the Good News of peace.

May the Divine Saviour, whose feast we are about to celebrate, together with the Queen and Peace, inspire, sustain, and bring to a happy conclusion every effort for peace accomplished among us in order finally to establish that longed for gift.

With our blessing, /S/ Bishops Alvarez, Aparicio, Revelo, Rivera, Rosa, Fr. Delgado San Salvador, July 15, 1982.●

TRAGEDY IN EL SALVADOR: TWO YEARS WITHOUT JUSTICE

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. BARNES. Mr. Speaker, it has been 2 years since four American churchwomen were murdered in El Salvador. On December 2, 1980, Sisters Maura Clark, Ita Ford, Dorothy Kazel, and Lay Missioner Jean Donovan were found in a shallow grave in El Salvador. They had been raped and brutally murdered by members of the Salvadoran Armed Forces.

During these 2 long years, many Members of Congress have shared the grief and sadness that is felt by the members of the families of the women. We have shared the frustration over resistance to investigate the murders, and then to the painful discussion of the details as pressure was brought to bear on officials in Washington and in San Salvador. At each turn of events there have been reassurances that the killers had been found and that they would soon stand trial. To date, there has been no trial and we are all still waiting for justice.

It was only a few weeks ago that U.S. Ambassador to El Salvador Dean Hinton voiced his concern over the breakdown of the Salvadoran justice system and went on to note that over 30,000 Salvadorans have been killed during the civil war. There have been no trials for the murders of Salvadorans or Americans. This is a tragedy. It is a tragedy for the families of the dead, a tragedy for the Salvadoran people, and a tragedy for the American people.

It is time that justice be done for the dead. And it is time that justice be done for those who must deal with the threat of death daily. The civil war in El Salvador must be ended and the killing must stop. I know that the families of the four American churchwomen want justice for their loved ones, but they also want the killing to stop.

As we contemplate the memories of these four brave women, we should also think about U.S. policy toward El Salvador. Neither subject is pleasant but both are important today.●

A TRIBUTE TO THE OBSERVER NEWSPAPERS

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. MATSUI. Mr. Speaker, it is my pleasure to rise today in tribute to one of America's outstanding black journalistic enterprises, the Sacramento Observer, which is celebrating its 20th anniversary under the leadership of its publisher, Dr. William H. Lee.

Recently lauded in a Columbia Journalism Review article as one of the more successful black newspapers in the country, the Observer plays a major role in the life of our city and county, with its influence extending beyond the black community, which it serves so well.

Bill Lee, who I am proud to count as a personal friend, started the Sacramento Observer with his wife and business partner Kathryn to fill what they felt was a void in positive information about the black community.

Our philosophy is to improve the quality of life of the people that read our newspaper and follow its direction.

Dr. Lee said in a recent interview with the Sacramento Bee.

We can't just give them civil rights news and black news; we've got to show them how to survive, how they can buy a house or live happily. In our communities we have acute health problems, acute crime problems and we must provide some of the answers through our papers.

Those comments from Bill Lee provide insight into the success he has achieved with his three newspapers, including the Observer papers he publishes in Stockton and San Francisco as well as Sacramento. He has been successful because he has approached his publication enterprise with an enlightened attitude about the needs of the black community and of our entire Sacramento community.

The future is bright for the Sacramento Observer. Dr. Lee plans to begin construction of a new 20,000-square-foot plant next year, and a 500-page special edition commemorating his paper's two decades of service to Sacramento is slated for publication in February.

Because of Bill and Kathryn Lee and the entire staff of the Sacramento Observer, our community is a better place in which to live.

I am sure that all Members of this House, and particularly my colleagues from the State of California, will join me in an enthusiastic tribute to the Observer Newspapers.●

DAVID POGOLOFF

HON. G. V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. MONTGOMERY. Mr. Speaker, it is my pleasure to recognize today one of the Veterans' Administration's most dedicated and conscientious employees. For 25 years, Dave Pogoloff, chief of the VA's House liaison staff, has executed a difficult job in an out-

standing manner. He has rendered valuable assistance to virtually every congressional office on the Hill, while very ably and quietly assisting untold thousands of veterans and their dependents.

I am very pleased the Administrator has recognized Dave's many years of outstanding service by recently giving him the VA Administrator's Superior Performance Award, which carries with it a cash payment of $3,800. The award is presented when an employee's contribution substantially exceeds performance requirements.

Dave is no less an inspiration to his colleagues and friends for his personal achievements. A combat veteran of World War II, he lost a leg soon after returning to the States as a result of his war injuries. To his great credit, Dave has come to represent the highest ideal of the physically disabled in the work force, an ideal of successful integration and extraordinary contribution of which we, the public, are the real beneficiaries.

I know Dave's many friends on the Hill join me in expressing appreciation for his service and best wishes for many years of continued success.●

PURSUIT OF TRUTH FOR THE MARYKNOLL SISTERS

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. HARKIN. Mr. Speaker, Maryknoll Sisters Ita Ford and Maura Clark, Ursuline Sister Dorothy Kazel, and Jean Donovan disappeared 2 years ago today. Their burnt-out van was found the next day, along the airport road. On the anniversary of their deaths, I want to share some thoughts expressed by the Maryknoll community with regard to the trial of their accused slayers, and the search for justice in El Salvador:

THE SECOND ANNIVERSARY

MARYKNOLL, N.Y.—On December 2nd and 3rd, families and friends of Maura, Ita, Jean and Dorothy will come together at Maryknoll to mourn and to celebrate their deaths and their lives. During these two years we have grown together in our pursuit of truth; we have become more sensitive to the suffering and pain of our sisters and brothers who are poor and powerless; we have come in direct contact with the network of injustice and evil in our world. During these years our hearts have not turned to stone in a spirit of revenge but we have been made strong in our search for justice. Our commitment to justice with forgiving hearts confuses and unsettles many. Our hope is that we may continue to grow in that love which is the source of action for justice in our world; that love which embraces our enemies in truth.

We extend our gratitude to all those who have joined with us in seeking truth and justice so that God's peace may come to our sisters and brothers in El Salvador.

STATEMENT REGARDING TRIAL IN EL SALVADOR

No matter what the outcome of the trial of these five men, we (the Maryknoll Sisters) hold that justice and truth have not been served because the involvement of higher-ups has not been vigorously investigated. Neither Maryknoll nor the families felt it was just to hire a lawyer to prosecute these five enlisted men alone. Prosecuting and perhaps executing these five men does nothing to stop the officers and government officials who are tolerating, permitting and encouraging the climate of terror and violence in El Salvador that has claimed 35,000 lives in the last three years. Therefore, we are not hiring a lawyer to represent us for fear of giving our stamp of approval or seeming to legitimize the trial.

For Maryknoll, the trial has always represented the culmination of a long legal process during which a genuine investigation could be conducted. With the announcement of the trial of the five National Guardsmen alone all investigation ceases.

We regret that seeking justice in the way that we know it here is impossible in El Salvador today. We believe that the trial as it is designed to be carried out cannot lead to justice.

We hope that the Government of the United States will play an active role in the pursuit of truth regarding the death of its citizens in El Salvador. If justice cannot be pursued with the support of the U.S. Government in relation to U.S. citizens, how can we hope that it will be pursued for citizens of El Salvador?

On this day in particular these words hold special meaning, and give us an added purpose and resolve to work for a just solution to El Salvador's problems.●

A COAL MINER'S SON

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. CLAY. Mr. Speaker, I would like to take this opportunity to pay tribute to the late Mr. Harold J. Gibbons, a man who epitomized the virtues of the working citizens of our Nation. The son of a coal miner, Harold Gibbons worked to become one of the most instrumental and respected figures in the American labor movement. His love for humanity and democracy are documented in his service to our society.

In his lifetime, Harold Gibbons was proceeded by his reputation for unmitigated integrity. Long after his death Harold Gibbons will be remembered for the many countless contributions he made to the labor movement. A self-made man and champion for the underdog, his life was an exercise in strength and fortitude. The death of Harold Gibbons is a great loss to our Nation and to the St. Louis community where he was especially loved and admired. I am honored to have known and worked with Harold Gibbons and I would like to share with my colleagues a brief biography of his life.

HAROLD GIBBONS—FROM COAL MINER'S SON TO INTERNATIONAL FIGURE

Harold Joseph Gibbons, longtime St. Louis Teamsters leader, was once thought to be a likely successor to Jimmy Hoffa as head of the 2 million-member union.

Gibbons, 72, had been a vice president of the International Brotherhood of Teamsters—the largest labor union in the free world—since 1957.

The youngest of 23 children, he was the son of a coal miner. Born April 10, 1910, at the mining camp of Archibald Patch, Pa., Gibbons rose to become one of the best-known leaders in the American trade union movement.

He came to St. Louis from Chicago in 1941 as director of the old St. Louis Retail, Wholesale and Department Store Union, CIO.

In his rise to national prominence, he became known as a major intellectual of the labor movement, one of its most articulate leaders and a social activist. Through most of his career, he was a staunch supporter of Hoffa.

He was also known as a political liberal who bucked the union leadership in 1972 to support Democratic U.S. George S. McGovern for president and who harshly criticized the Vietnam War—positions that some observers maintained cost him much power and influence in the Teamsters hierarchy.

During his colorful career, Gibbons was executive assistant to Hoffa, who asked him to be his right-hand man from 1957 to 1964. During that time, Gibbons also headed Teamsters Local 688 in St. Louis, the largest Teamsters local in Missouri, which he helped form in 1949. He also was director of the Central Conference of Teamsters and the union's national airline and warehouse divisions.

Among his many accomplishments, Gibbons pioneered the development of such pacesetting programs as the Labor Health Institute, its Health and Medical Camp in Pevely and a $20 million retirement complex, Council House, 300 S. Grand Blvd.

Gibbons was vitally concerned with civil rights, public housing and health care for the poor.

A community action program started by Local 688 under Gibbons' leadership in 1951 was the subject of considerable national and international attention. The outgrowths of the program today are the Tandy Area Council and the Carondelet Area Council, which give residents the means and skills to voice their interest in community affairs.

He also was the founder and president of the St. Louis Civic Alliance for Housing, a coalition of about 70 community leaders and tenants that brought an end to the lengthy public housing rent strike in St. Louis in 1969.

Gibbons was only 14 when his father died and his family moved to Chicago, where he finished high school and worked at odd jobs to pay for night classes.

He later attended an industrial workers' summer school program at the University of Wisconsin. His tuition was paid by the YMCA after he won a contest.

Gibbons was quoted in an interview several years ago as saying that while in the program—where he participated in a number of socialist discussion groups—he saw "a society divided between those who own and those who work." It was then he developed a desire "to be a trade union man," he said.

He later studied economics and history at the University of Chicago, until he was

forced to quit during the Depression. After leaving school, Gibbons wrote textbooks for the Works Progress Administration in a worker education program.

While working for the WPA, Gibbons organized and became the first president of Local 346 of the American Federation of Teachers. In 1936, he was elected an international vice president and organizer for the AFT.

He also was among the delegates who attended the first convention of the Congress of Industrial Organizations, when United Mine Workers leader John L. Lewis was elected president. The CIO merged in 1955 with the American Federation of Labor to form the AFL-CIO.

In 1937, after leading a strike of Chicago taxi drivers who became members of the Teamsters, he was appointed assistant regional director of the CIO in Chicago. In 1938, he was named Midwest organizer for the Textile Workers Union.

During that year, he met his first wife, the former Ann Colter, at a Socialist-sponsored peace rally. She was chairwoman of the rally and he was a guest speaker. Three months later, they married. She died in 1974.

As the CIO's assistant regional director in Chicago, Gibbons worked with and became a friend of Lewis, he said during an interview several years ago.

Gibbons came to St. Louis in 1941 as director of the St. Louis Retail, Wholesale and Department Store Employees Union, CIO, which affiliated with the then-AFL Teamsters in 1949 and became the powerful Teamsters Local 688.

In 1949, Gibbons engineered the merger of the CIO United Distribution Union's 6,000 members into the ranks of AFL Teamsters Local 688—one of the biggest labor raids in St. Louis labor history and a major step in the Teamsters' drive to double the union's membership to 2 million.

Gibbons emerged as one of the city's top Teamster leaders at the end of an 85-day 1953 building industry strike when he was named trustee of the Teamsters Joint Council and eight Teamster locals here.

That year, he was promoted to lead the 250,000-member national warehousing section of the Teamsters union, establishing a Washington office while maintaining leadership of Local 688 here.

Gibbons was jailed for 43 hours in 1954 for refusing to provide records to a federal grand jury investigating Local 688, although he later agreed to supply the information. An indictment accusing Gibbons and other union officers of making false reports to the U.S. Department of Labor was dismissed in federal court.

As his influence grew locally, Gibbons took stands on such political issues as the lack of cooperation among St. Louis County municipalities and the lack of progress in controlling rats in the city.

He also became more active nationally and internationally, appearing before a congressional committee investigating health care to explain the Labor Health Institute—an employer-financed health program started by Gibbons for his members—and urging support of Israel after a 1955 visit on behalf of the American labor movement.

In 1957, Gibbons was selected an international vice president of the union, giving him a seat on the Teamsters' general executive board, a post he held until his death. He was elected president of Teamsters Joint Council 13 here in 1958 in an election in which his opponent, E. E. "Gene" Walla, former president of Teamsters Local 682, charged vote rigging. Gibbons' election was upheld.

In the same year, Gibbons dedicated Local 688's employer-financed Health and Medical Camp near Pevely, considered the trend-setting concept in union activities and contract bargaining.

During the years he helped guide the union under Hoffa, Gibbons became known as one of the Teamsters' most articulate spokesmen during testimony before U.S Sen. John McClellan's racketeering committee hearings. A member of the committee was then-Sen. John F. Kennedy, D-Mass., and its attorney was Robert F. Kennedy, later to become U.S. attorney general in his brother's administration.

Gibbons once told a reporter about how he enjoyed an almost mischievous delight at "tweaking the nose" of young Robert Kennedy during the hearings.

"During testimony, he asked me in a snub tone, 'Mr. Gibbons, can you tell this committee if you know Anthony Giordano, head of the underworld in St. Louis? And can you, Mr. Gibbons, tell the members of this committee if you know John Vitale, Giordano's right-hand mobster?'" he recalled. "And I answered, 'Yes, I know both of those men. But I also know Cardinal Cody and Archbishop Ritter, too.'"

With that answer, the gallery broke into laughter, Gibbons said.

Gibbons resigned as Hoffa's executive assistant in late 1963 after a falling out with the fiery Hoffa. Gibbons had ordered that the flag on Teamsters headquarters in Washington be lowered to half-staff and the union's offices closed when President Kennedy was assassinated—a gesture strongly opposed by Hoffa, who hated the Kennedys.

Gibbons headed Local 688 until 1973, when he was ousted from nearly all his leadership posts by then-Teamsters General President Frank E. Fitzsimmons. Gibbons, who always maintained his loyalty to Hoffa, often disagreed with Fitzsimmons on union and political matters.

Although several members of Local 688 had started a movement against Gibbons, his Waterloo came in 1972 when he publicly endorsed McGovern, Democratic nominee for president, over Fitzsimmons' choice of the GOP presidential candidate, Richard M. Nixon.

While Gibbons kept his elected office of international vice president, he was stripped of his other posts when he was forced to resign as Local 688's chief executive.

In February 1977, three years after the death of his first wife, Gibbons married longtime friend Toni Stein, who had a modeling agency here.

Gibbons, an idealist, was quietly being pushed in June 1981 to make a run for the union presidency after Fitzsimmons died of cancer one month before the Teamsters convention in Las Vegas. Although there was some support for Gibbons and Canadian Teamsters leader Ed Lawson to seek the union's top two jobs, a groundswell never materialized. Subsequently, Gibbons ran for and was re-elected the union's second vice-president.

He served under Teamsters President Roy L. Williams of Kansas City, who was more generous to Gibbons than Fitzsimmons had been. He gave the aging labor leader responsibilities that Gibbons "a purpose, a feeling of being needed," one close friend said.

In his younger days, Gibbons, had been one of the union's chief strategists, second only to Hoffa, who was kidnapped from suburban Detroit and apparently killed in 1975.

In an interview several months ago, Clayton attorney Gene Zafft, Hoffa's tax lawyer for many years, said Hoffa had told him that one of the greatest mistakes he ever made was naming Fitzsimmons, rather than Gibbons, as his successor.

After his rise through Hoffa to the union's presidency, Fitzsimmons betrayed Hoffa and battled to prevent him from receiving part of his pension after Hoffa resigned from the presidency as part of a probation agreement.

Gibbons was the subject of an entire chapter in the Steven Brill book, "The Teamsters," which both praised and criticized Gibbons.

Gibbons was chairman of the Cervantes Convention Center Commission, a board member of the Gateway National Bank in St. Louis, and a board member of the Cystic Fibrosis Foundation and a number of other charities. He was also a member of the national advisory board to the American Civil Liberties Union. He was recognized as Man of the Year by B'nai B'rith, was a trustee of the Martin Luther King Center and a board member of the All-American Collegiate Golf Foundation.●

THE YEAR OF THE FINNISH AMERICAN ARCHIVES

HON. MARTIN OLAV SABO

OF MINNESSOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. SABO. Mr. Speaker, it is a privilege to rise in honor of over 400,000 Finnish immigrants who have graciously shared with this Nation their cultural traditions and heritage. The preservation of Finnish history has been threatened, however, because of insufficient funds to insure that Finnish historical materials are transferred to microfilm and otherwise protected from deterioration. In an effort to raise funds for this important project, Minneapolis Mayor Don Fraser has declared that 1983 be known as "The Year of the Finnish American Archives." This proclamation reads:

Whereas, three hundred and forty-five years ago the history of Finnish Americans began in a settlement on the Delaware River; and, since the year 1865 over 400,000 Finnish immigrants have given America both the benefit of their labor and the richness of their culture; and

Whereas, their descendants continue to assert their identity as Finnish Americans within the ethnic and cultural diversity that is America; and

Whereas, historical archives at Suomi College in Hancock, Michigan and at the Immigration History Research Center of the University of Minnesota are the source of inspiration and information that make Finnish Americans more conscious of their heritage as well as more visible to America; and

Whereas, these archives are threatened by lack of resources to microfilm and otherwise protect their holdings from deterioration and are unable to further build their collections of historical materials; and

Whereas today public funds alone will not adequately support these archives, and this

responsibility falls on their principal beneficiaries: both Finnish Americans and all other Americans aware of the need to preserve cultural diversity,

Now, therefore, I, Donald M. Fraser, Mayor of the City of Minneapolis do hereby declare 1983 as

The year of the Finnish American Archives in Minneapolis and urge all citizens to join with me in working for the preservation of the rich cultural heritage of our Finnish immigrants.●

WELCOME HOME, GARY ACKER

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. DORNAN of California. Mr. Speaker, words cannot adequately express the joy that I feel for Gary Acker and his wonderful parents now that he has returned safely to his home in Sacramento, Calif., after rotting for nearly 7 years in a Communist prison in Angola. "More things are wrought by prayer than this world dreams of," Tennyson reminds us, and I have no doubt that countless prayers said on Gary's behalf have been instrumental in his release and return home.

Gary Acker can best be described as a volunteer American freedom fighter in whom his fellow countrymen can take great pride. There is not the slightest doubt in my mind that Gary felt that he was being hired by an intelligence arm of the U.S. Government to fight for freedom against Communist forces in Africa. He was funded by our Government in the same manner as was the Lafayette Escadrille fighter squadron in France before our entry into World War I; the way our American volunteer group, the Flying Tigers, were funded to fly and fight in China against the invading Japanese in 1941; and, also, in the exact same manner our young American fighter pilots were supported in 1940 to fly with the RAF Eagle Squadron in England against the Nazi enemy of liberty in those dark days before our entry into World War II. Gary Acker certainly falls within the category of a modern day Flying Tiger, or for that matter, a Lafayette who, at age 23 when he arrived to join George Washington in 1776, was only 2 years older than 21-year-old Acker when he arrived in Angola in 1976. When Gary left for Angola in January 1976 he was firmly committed to rekindling the torch of freedom that had been left barely flickering by the U.S. Congress tragic and shortsighted decision to end all assistance to the forces fighting for Angolan freedom. As soon as Gary learned of the Communist aggression in Angola from a classified Sacramento newspaper ad request for professional assistance, he decided to go to Africa to do what he personally could to prevent millions of people from falling under a Marxist totalitarian dictatorship as had happened only 8 months before in South Vietnam. Of course he expected to get paid, but keep in mind that General Chennault's Flying Tigers personally received $500—in 1940 dollars—for every Japanese aircraft shot down.

But Gary's decision was reached not for reasons of money, glory, or excitement. He went to Angola in the belief that a man must do more than just hold to a set of principles; a man must also live by his principles. A proud American, he was sickened by the retreatist attitude of some of the leadership of this country. Gary was going to make his mission count, the forces of freedom would triumph, and he would play a part in it.

As we know, things did not work out that way. The pro-Western forces never even came close. But it was not due to the likes of men like Gary Acker or his companion freedom fighter Danny Gearhart of Maryland who was executed in Angola on July 10, 1976, after a kangaroo court trial.

Just 4 days after they arrived in Africa, Acker and Gearhart were captured in an ambush by a phalanx of Cuban-armed troops working for MPLA—the Popular Movement for the Liberation of Angola. Gary was subsequently sentenced by a phony court to 16 years in prison. He served nearly 7 of those years—unnecessarily harsh it seems to me—since Gulf Oil Corp., which pays Angola more than $500 million a year for the oil it takes out, could easily have exerted leverage on Gary's behalf years ago. After all, the entire Communist controlled part of Angola is supported almost solely by the oil money Gulf must pay to the Communist dictatorship.

To those who still believe in the principles of freedom, Gary's sacrifice of 7 of the best years of his life was admirable. I wish him well in rebuilding his life. He has a running start—two wonderful, helpful, loyal, loving parents to help him. Joyce and Carl Acker are terrific. They could not have fought harder to keep our U.S. Government working to gain the freedom of their "freedom fighter." God bless them.

And may we never forget our hero Daniel Gearhart or his loving wife and beautiful children. America is lucky to have such a dedicated man.●

LAWYERS COMMITTEE AGAINST U.S. INTERVENTION IN CENTRAL AMERICA

HON. JAMES WEAVER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. WEAVER. Mr. Speaker, I would like to call attention to action on the part of the Oregon State Bar Association, and a group of attorneys making up the Lawyers Committee Against U.S. Intervention in Central America, to denounce the Reagan administration's foreign policy in Central America. As a long-time opponent of foreign military aid, I commend these organizations for their concern and resolve in speaking out against these unconscionable policies.

I only hope that more citizens, organizations, and professional associations around the country will raise their voices against our interventionist foreign policy as these Oregon groups have. I strongly recommend the following letter from Ms. Peggy Nagae of Portland to all my colleagues:

DEAR CONGRESSMAN WEAVER: I am happy to announce that at the last Oregon State Bar Convention, a resolution against United States intervention in Central America was passed. It is very important that lawyers acknowledge the important role they play in U.S. politics and exercise responsibility in that role. By passing this resolution, we feel that fellow members of the Oregon bar made a definite statement about governmental overstepping. The specific resolution was, as follows:

Be it hereby resolved, That the Oregon State Bar supports the following principles based on United States and International Law, including but not limited to U.S. Const. art 1, section 9, cl. 11 and the War Powers Resolution, 40 U.S.C. section 1541 et. seq.:

We oppose any form of covert action or economic pressure by the United States, whether directly or through intermediaries, aimed at de-stabilizing governments in Central America.

Be it further resolved, That copies of this Resolution be sent to the Senators and Representatives in Congress from the State of Oregon, to the President of the United States, to the Secretary of Defense of the United States, to the Secretary of State of the United States, to the Chairman of the Foreign Relations Committee of the United States Senate and the House of Representatives respectively, to the Chairman of all other committees of Congress into whose jurisdiction such matters may fall, and to the Ambassador of the United States to the United Nations.

Presenter: Michael D. Royce●

DOCUMENTARY TELLS OF AMERICAN POWS' EXPERIENCES

HON. DAVID R. OBEY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. OBEY. Mr. Speaker, on Sunday, December 5, from 7 to 8 p.m., NBC News will present an hour-long documentary "NBC Reports: Bataan, the Forgotten Hell." The documentary describes the experiences of several American veterans who survived the Death March of Bataan at the beginning of World War II and the tremendous brutality of their Japanese captors during 3½ years of imprisonment.

In the documentary, former POW's describe their terrible experiences in cruel and deadly prison camps where thousands died of starvation, disease, physical abuse, and outright execution.

NBC crews gathered their material in Bataan, Corregidor, and Japan, and survivors are interviewed on the sites of the battles and prison camps in the Philippines where they had been 40 years before.

This important documentary lets Americans know at long last the story of the suffering and sacrifices of those prisoners of war who endured Bataan and afterward. I highly recommend this program to my colleagues.

In Washington, the program will be shown on WRC-TV, Channel 4.●

LET'S TAKE A VOTE: STUDENT EDITORIAL

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. PURSELL. Mr. Speaker, I would like to take this opportunity to read into the CONGRESSIONAL RECORD an editorial by 16 year old Dane Peterson of Jackson, Mich. Dane's editorial, which appeared last month in the Lumen Christi High School paper, the Titan Times, reminds all of us that we do have more that just a responsibility to vote. I find it refreshing to see that someone so young is already actively looking for more ways to get his fellow students involved in such an important democratic practice. I proudly present the following editorial to the CONGRESSIONAL RECORD as a tribute to Dane and his fellow students.

The article follows:

LET'S TAKE A VOTE

(By Dane Peterson)

Is voting a moral obligation?

I believe it is. My own interest in politics comes from a heritage handed down in my family. This heritage states that one cannot be a good Christian without being a good citizen. In order to be a good citizen, one must take an active role in the political picture with it being a responsibility to be informed on the issues and the candidates.

Main reason why it is so important is that the government touches the lives of all people and since God has put us in a social structure, in order to be responsible for others and to help others we must do as much as possible to make the government responsive to all people. We can do this by voting and by helping others in any way we can to become more and better informed.

An old proverb says "as the twig bends, so grows the tree." which means people do as adults what they practice as young people.

We may be a part of the generation who is shying away from our moral obligation of voting. In the recent Homecoming King and Queen election, of the 1,083 students at Lumen Christi only 387 voted, or 36 percent. Voting statistics are based on voting records kept by Student Council.

Senior class led the voting with 56 percent. This is to be expected because they had the privilege of voting for their peers.

One of the problems with not having an underclassman court for Homecoming is that the underclassmen have little interest in the election of the king and queen. One way to get these students involved in the election and voting procedure would be to have an underclassman court involved in the Homecoming festivities.

Many of the reasons students gave for not voting were that it didn't make a difference in their lives, they forgot or they thought of the election as just a popularity contest.

Another aspect of the lack of involvement of the students can be found in the low level of enthusiasm at the Pep Rally and nonparticipation during Titan Week.

Now we don't pretend to have all the answers to these problems. Perhaps letter to editor or a suggestion column might be in order. Let us know what you are thinking.

If our experiences at Lumen Christi are to do a complete job of preparing us for the future, we must be more in tune with our world.●

PROMPT ACTION NEEDED ON THE IMMIGRATION BILL

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. McCLORY. Mr. Speaker, it would be most unfortunate if the 97th Congress adjourns without taking final action on the Immigration Reform and Control Act of 1982. This measure, with which I have been personally involved for the last 2 years as well as during the preceding 2 years as a member of the Commission on Immigration and Refugee Policy, culminates the efforts of virtually every possible political, economic, and social interest in the Nation. If we are to regain control of our national borders and regulate the flow of immigrants and refugees into our country, we must first establish the basic law upon which this control can be based.

Mr. Speaker, a most illuminating article in support of the position which I am endeavoring to advance appeared in the Wednesday, December 1, issue of the Chicago Tribune. The article by the Tribune's staff columnist Joan Beck deserves the thoughtful attention of every Member of this body. I am attaching Joan Beck's article to these remarks and invite your thoughtful attention to the message which she projects.

[From the Chicago Tribune, Dec. 1, 1982]

CAN IMMIGRATION BILL BE SAVED?

(By Joan Beck)

One of the most useful actions Congress can take in its lame duck session is to pass a stiff version of the Immigration Reform and Control Act proposed by Sen. Alan K. Simpson (R., Wyo.) and Rep. Romano L. Mazzoli (D., Ky.).

The Simpson-Mazzoli bill has already been okayed by the Senate and in somewhat different form, by the House Judiciary Committee. But unless Congress finishes work on it this month, three years of hearings, debate and bipartisan effort will be lost. The United States will be left without effective control of its porous borders and the rapidly increasing millions of illegal aliens.

An uncomfortable mix of compassion and guilt makes it hard for Americans to act sensibly in tightening controls on illegal immigration. We are distracted by mental snapshots of malnourished Mexicans trudging through the border desert in hopes of stoop-labor jobs and of helpless sweatshop workers rounded up by Immigration and Naturalization Service officers for deportation.

This is a nation of immigrants' offspring. To shut the golden door even an inch to illegal entrants feels elitist and mean. Besides, who else but undocumented aliens will do the menial chores too demeaning for such a rich people?

But 1880s Statue of Liberty poetry doesn't work as 1980s policy. What was once a legal, orderly, controllable flow of immigrants now includes at least half a million illegals a year. At least 6 million aliens are here unlawfully and the number may be far higher.

Much else is new since the last immigration legislation in 1965. Net immigration was the highest in the nation's history in 1980 and now accounts for half of all U.S. population growth. The economic ills, unemployment and high birth rate of Latin American nations—especially Mexico—spur hundreds of thousands of people to make the easy crossing of our borders illegally every year; many stay here permanently.

It's often argued that illegal aliens do jobs Americans won't and pay more in taxes than they cost in government benefits. But new data show that a big percentage of illegals hold jobs in construction and industry that pay well over minimum wages and millions of Americans take precisely the same jobs as undocumented workers. American unemployment could be cut substantially if the flood of illegal aliens could be abated.

Illegal aliens are also making increased use of state and federal antipoverty programs, in some areas more so than citizens. And the Supreme Court decision last June that children of illegal aliens have a right to public schooling raises the likelihood that further court actions will increase such rights.

Even if illegals were adding more to the economy than they were getting in benefits, it would be reason to change the situation. The moral and political peril of importing and exploiting helpless workers is a lesson this nation should have learned with slavery and its aftermath.

There are, however, problems with the Simpson-Mazzoli bill, most of which can be worked out before passage. It does aim at the right target: employers of illegal aliens. Jobs are the magnet that attracts most immigrants. Making it unlawful to hire those who are here illegally would help stem the tide of undocumented workers.

Unfortunately, this would necessitate some kind of reliable way to identify those who are here legally. The bill would require the President to design a fraud-proof system within three years. The House version mandates considering a telephone verification system similar to that used for checking credit cards; both versions slide over the controversial question of a national ID card which is anathema to many Americans.

Even if the bill eventually results in a national ID card as a price for regaining con-

trol over our borders, we can probably learn to live with it without loss of civil rights—just as we tolerate drivers' licenses and Social Security numbers.

The bill would give permanent resident status to illegal aliens who have been in the United States since before Jan. 1, 1977, and temporary resident status to those here before Jan. 1, 1980. Both groups could eventually become naturalized citizens.

Such a humane action would be expensive. It's estimated that the cost of adding new eligibles to the nation's social programs, even after a proposed three year waiting period, would cost at least $10 billion. But it's the only way to provide legal protections to millions of people already permanently in the United States in second-class limbo.

Such a drastic move can only be justified by reducing the flood of illegal aliens to a small trickle. Since it is impossible to police our long borders adequately or round up those who overstay visas, workable sanctions to stop employers from hiring illegal aliens are essential.

Failure to pass the Simpson-Mazzoli bill would aggravate and perpetuate some of the nation's most worrisome problems, contribute to unemployment and increase pressures for the nation to become more bilingual and bicultural. It would also tell the world we have given up on keeping our immigration the orderly and generous process that has served the nation so well for more than a century.●

HUMAN RIGHTS AND EL SALVADOR

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. AuCOIN. Mr. Speaker, 2 years ago, the brutal murders of four American churchwomen in El Salvador outraged us and brought forth demands for an investigation from people all over the United States. Finally, after months of obfuscation and self-serving excuses on the part of the Salvadoran Government, a Salvadoran court has ordered five former national guardsmen to stand trial for these deaths. A long-awaited example of human rights improvement in El Salvador? Not quite.

The proceedings thus far are most notable for what they exclude. There is no indication that the court will allow introduction of evidence—of which there is no lack—on the role of Government officials in the deaths. To the contrary, it is as though by making an example of the five indicted men, the Salvadoran Government seeks to obscure its role in the murders, avoiding all responsibility.

The Reagan administration is calling this trial a human rights success. It is understandable—for the administration has precious little else to work with in a country where human rights continue to deteriorate. In mid-October, 15 Salvadoran political and union officials were seized in separate incidents. Eight are still being held in military jails, the whereabouts of the others is unknown. Two national guard officials, identified as having given the order to assassinate two U.S. labor representatives and a Salvadoran agriculture official in January of 1981, were recently released by the Salvadoran Government. And the incidence of murders and disappearances within El Salvador marches along at a steady, brutal pace.

By continuing to supply massive amounts of military hardware to El Salvador, the United States undercuts any chance for a negotiated settlement and runs the risk of plunging the entire region into conflict. The American people know this and are calling for an end to U.S. military aid.

On November 2, Multnomah County, Oreg., citizens had the opportunity to vote on an initiative calling for an end to U.S. military assistance to El Salvador; 135,050 people, 61 percent of the voters in Multnomah County, a middle class, mainstream county, voted for the initiative.

Rather than touting the upcoming trial as an example of Salvadoran commitment to human rights, President Reagan should listen to what people across the United States are telling him—that nothing less than real, sustained commitment to human rights justifies our involvement in El Salvador.●

DIFFERING VALUES IN ACADEMIA AND INDUSTRY

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. LaFALCE. Mr. Speaker, more and more, universities and businesses are collaborating on research and development that is so crucial to our scientific advancement. Cooperation between industry and academia blends the best resources that each has to offer, and the results are of mutual benefit to the academic and the business communities and the public at large.

If, in fact, "necessity is the mother of invention," then the academic community's need for financial support has certainly nurtured the assistance that has historically been provided by the business community. As we witness the inevitable closer ties between business and academia, it is important to keep in mind that their goals are not always identical, although they may be joined as partners on a common enterprise. The following editorial from Science magazine reflects the often diverging interests of these partners. I commend it to my colleagues.

[From Science, Sept. 17, 1982]

DIFFERING VALUES IN ACADEMIA AND INDUSTRY

(By Philip H. Abelson)

Many universities are examining searchingly their relations with industry. The basic reason is financial. The academic community is nervous about federal funding of research. Some universities report that they have retained a satisfactory level of support, but half or more have not. Apprehension about federal support has been coupled with other financial problems of the universities brought on by recession and inflation.

In this environment it has become fashionable to look to industry as a possible source of funds. Already a number of universities have entered into contracts involving substantial sums, and additional arrangements will doubtless follow. In general, industry has not been devoting a sufficient sum to basic research within its own laboratories or elsewhere. It was treated to a lesson when a large number of companies were caught flat-footed by academic developments in molecular biology. Other sectors of industry have become concerned about future supplies of personnel trained in computer-related fields.

Despite an apparent basis for close cooperation between academia and industry, the likely outcome is far from a cure-all for the financial ills of the universities. The money spent by industry at universities is unlikely to top 10 percent of the federal funds they now receive. Close cooperation between universities and industry could lead to harmful tensions induced by competing value systems. Universities already have their share of such differences. The humanists look down on the engineers and vice versa; the various science departments usually have little interaction. However, the faculty share common goals in the pursuit of knowledge and in fostering the education of the young. Most of the faculty place these goals above that of attaining personal wealth.

The value system and the mode of conducting research and development in industry are quite different from those of academia. To survive, a company must make a profit. It must evolve with the changing times. And it must be well managed, with a clearly defined chain of command. The bankruptcy courts are very busy these days. Only the strong and nimble remain viable.

In industry, the pressure of the bottom line inevitably dictates policies with respect to R & D. The goal is not pursuit of knowledge; it is the attaining of proprietary advantage. Accordingly, research results obtained at industrial laboratories often go unpublished or are released slowly in the patent literature. In the university, fast publication of scientific findings is eagerly sought. Much of the activity in industry is conducted by interdisciplinary teams whose members are arbitrarily assigned to tasks. Projects may be suddenly terminated. Only a favored few in the typical industrial laboratory have the privilege of personally choosing a research area and sticking with it through discouraging phases of effort. This frenetic tempo is incompatible with the tempo of graduate training in the natural sciences. In their thesis research, it is essential that students pursue a line of inquiry patiently and in depth.

These examples of differing values and procedures make it obvious that close collaboration between academia and industry is likely to create new problems and tensions. That is not to say that cooperation is

undesirable. One time-tested method of cooperation is that of consultation, preferably conducted off-campus. Professors spend at most an average of a day a week at this. They bring their expertise to industry and in turn learn of new developments and new job opportunities for their students.

However, some of the new arrangements between universities and industry come close to inserting an industrial enclave into the campus. It would be unfortunate if such examples were carelessly multiplied. Rather, emphasis should be placed on avoiding relationships that might damage the universities and their ability to carry out well their essential functions of undergraduate and graduate education.●

TENNESSEE-TOMBIGBEE WATERWAY

HON. TOM BEVILL

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. BEVILL. Mr. Speaker, the opponents of the Tennessee-Tombigbee Waterway have consistently disseminated misinformation about this project to the Members of the Congress and the public.

The most vicious and misleading attack was contained in a recent allegation by the Environmental Policy Center that construction of the Tennessee-Tombigbee has not benefited minorities because of flagrant acts of racial discrimination. Nothing would be further from the truth.

My distinguished colleague from Ohio and a leading member of the Black Caucus, Mr. STOKES, was personally maligned by these allegations because of his strong support for completion of the waterway. Mr. STOKES has investigated these charges by the Environmental Policy Center and issued a comprehensive report on his findings. I ask unanimous consent that Mr. STOKES' report be printed in the RECORD and encourage each Member to carefully review his findings.

Recently, the Cleveland Plain Dealer, carried an article written by a Washington Bureau reporter captioned, "Should Stokes Have Backed 'Boondoggle' Canal?" The reporter begins the article with the misleading and dramatic statement that "Rep. Louis Stokes is under fire for persuading some of his Black House colleagues to vote for a controversial deep south canal that never has met federal quotas for minority hiring."

The reporter's assertion that I am under fire is based upon the reporter's knowledge of only one letter written by Brent Blackwelder, Executive Director of the Environmental Policy Center, Washington, D.C. In the article singling me out for special attack, the reporter near the end of the article, reports that Rep. Mary Rose Oakar voted for the project, as I did, but that Reps. Eckart and Mottl opposed it.

One must question how I am singled out for a special story attacking my vote on a project in which two Cuyahoga County representatives vote for it and two vote against it. Additionally, one must question the purpose or reason for singling me out when ten of the twenty-three Members of Congress from Ohio voted in favor of the project, as I did.

In singling me out for attack and utilizing the letter of Brent Blackwelder, the reporter made it look as though I and other members of the Congressional Black Caucus were voting for a project that was not in the best interest of Black people in terms of minority hiring.

I was disappointed that the reporter, who spent an hour in my office interviewing me during which time I provided data justifying my vote, chose to omit such material from the article, thereby depriving the article of both fairness and balance.

Since the reporter chose, for reasons of her own to omit these facts, I hereby resort to this medium to put the facts on the table.

I told the reporter that two years ago, when the bill was on the Floor, a white paper had circulated accusing the Army Corps of Engineers and the Tennessee Tombigbee officials of denying minorities meaningful participation in the multi-million dollar project. I told the reporter that as the top-ranking Black Member of the House Appropriations Committee, I went to Tom Bevill, Chairman of the Subcommittee on this bill and asked him about it. I explained to the writer that he told me that it was absolutely untrue and invited me to come down to tour the site and ascertain the facts for myself. I told the reporter that I accepted that invitation and visited the project. That while there, I took a helicopter trip over the Tennessee, Mississippi and Alabama segments of the project. That I also talked with the Army Corps of Engineers officials, employees and Blacks in a leadership position in those states.

I specifically told the Cleveland Plain Dealer reporter that I also met Mr. Wendell Paris, Executive Director, Minority People's Council, who represented over 4,000 people organized into 15 or more County Chapters bordering the Tennessee Tombigbee.

The reporter was also informed that when Mr. Paris came to Washington to testify in favor of this project that at his request, I accompanied him to the hearing and was permitted to sit in on Chairman Tom Bevill's Subcommittee of which I was not a member. The reporter was provided with a copy of Wendell Paris' testimony in which he stated, "The major goal of our organization is to insure that minorities and poor people receive a fair and proportionate share of all the benefits of this $2 billion federal public works project." While Mr. Paris did criticize the Corps for not complying with all established goals, he stated in his testimony, "The Minority People's Council has consistently supported full federal funding for construction of the Tennessee Tombigbee Waterway, provided that minorities, women and poor people are given an equitable share of the jobs, training contracts, and other benefits of the project."

I also provided that reporter with two letters which she chose not to quote in the article. Both letters were written to the Subcommittee on Energy and Water Development by Dr. Aaron E. Henry, nationally recognized civil rights leader and President, Mississippi State Conference, N.A.A.C.P. In both letters, he urged full funding for this project and in a letter dated March 18, 1982, explicitly stated, "To date, over $35 million of construction work has gone to minority business . . ." In the same letter, this distinguished civil rights leader said, "Tenn-Tom flows through one of the most economically depressed regions in the nation. We respectfully request this Committee and the Congress to continue construction of this project. . ."

Since the article appeared, I have talked again with Mr. Wendell Paris, Chairman of the Minority Council who stated, "All I have tried to say is that we are not satisfied. We have never wanted this project shut down." Dr. Aaron Henry says, "I still vigorously support it because what employment there is is due to Tennessee Tombigbee." He stated that he wants the same thing for Blacks in the Delta that was done for whites in Appalachia.

In the article, the reporter attempts to give the impression that Blacks in the South will not support the project this year. In a letter written since the Plain Dealer article by Ms. Esther M. Harrison, Executive Director, Construction and Business Assistance Center, Inc. to Mr. Brent Blackwelder, she says, "I am writing this letter in a two-fold capacity. First, as the local Branch President of the N.A.A.C.P. and as Director of the Agency that deals with contracting assistance for disadvantaged and minority business." Ms. Harrison then says, "The N.A.A.C.P. has never gone on record opposing the project nor has it made statements that minorities were not benefitting. The State N.A.A.C.P. has always given its full support for continued funding and construction of the project and has made this known to the Congressional Black Caucus."

I am at a complete loss as to why the Plain Dealer reporter did not report that the Corps of Engineers has established a training program in conjunction with this project wherein 101 trainees have graduated from this program. 50.5 percent of the graduates are minorities and 23.8 percent are female. Additionally, over $5 million has been awarded in 8-A sub-contracts and $32 million in sub-contracts to minority firms.

In investigating the circumstances around the reporter's article, I became curious as to what kind of minority hiring record was evidenced by the Environmental Policy Center, whose Executive Director, Brent Blackwelder, is quoted extensively in the article. For instance, in one paragraph, Mr. Blackwelder excoriates the Army Corps of Engineers for setting 30 percent Black employment as a goal. He stated that, "This would be like setting a goal of hiring 30 percent Blacks for a youth jobs program in the District of Columbia. The District's population is about 70 percent Black." The fact is that the Corps of Engineers has consistently maintained a 27-30 percent goal and under their affirmative action plan, the overall percentage minority utilization has averaged in the 23-27 percent range. Now let's look at the minority employment record of the Environmental Policy Center of which Mr. Blackwelder is Executive Director. It consists of two organizations and two policy making Boards of Directors. One Board of Directors has 16 members, none of whom are Black and the other has 9 members none of whom are Black. Additionally, the Environmental Policy Center has 30 employees, only two of whom are Black. One employee is a clerical personal secretary to the President of the Corporation and one is a lobbyist. Ms. Louise Dunlap, President of this Corporation, which has no Blacks making policy and less than 1 percent Black employees also admitted that they have no affirmative action plans or goals in existence. All of this is in Washington, D.C., a city more than 70 percent Black. Ms. Dunlop also advised me that to her knowl-

edge, their record on hiring Blacks, as deplorable as it is, is the best in the environmental field. She is probably correct. The famous Sierra Club in Washington, D.C. admits that of their 14 employees, only one is Black.

In a few days, in this lame duck session of Congress, we will once again be voting on this $1.8 billion jobs project known as the Tenn-Tom Waterway Project. To stop this project would cause the loss of 5,000 jobs, a large number of which would impact heavily upon Black Americans who reside in this tri-state area.

It is the height of callous indifference and arrogance for an environmental group with the record of the Environmental Policy Center to tell the Congressional Black Caucus that they should not be supporting this project because it will perpetuate a pattern of racial discrimination. As for my voting for a so-called boondoggle canal, I am painfully aware that nationwide, Black adults are unemployed at a rate of 20.2 percent and that Black youth are unemployed at a rate of 46.7 percent. Perhaps the environmentalists can afford the luxury of being concerned about the trees in the forests. I have to be concerned about human misery amongst the living.●

U.S. QUERIES EL SALVADOR ON DEATH OF AMERICAN

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. LELAND. Mr. Speaker, today is the second anniversary of the slaughter of four American nuns working in El Salvador. And nearly 2 months since the mysterious death of a young American, Michael Kline.

One can also say this marks the El Salvadoran Government's continued refusal to honor the rights of its citizens. Repeatedly, Congress has called for an end to this blatant and unjust denial of freedom. The perpetual discrepancies between official reports and contrary evidence can no longer be accepted. Cooperation and mutual understanding are always the keys to successful negotiating. However, murder, disappearances and the general disregard for social welfare negate that possibility. To relax our stance against this violent, inhumane existence would make us an accomplice to murder.

One of the requirements for any military aid to El Salvador is certification of continued investigation of the shooting of the American churchwomen in 1980. Instead of resolving these assassinations in order to prevent further brutality another blanket of lies is being thrown over the fire to smother the truth. I want to insert this article describing the vague demise of Michael Kline, an American youth. We cannot allow these deaths to slip into the safe haven of past issues. Nothing has been resolved. The rights as well as the lives of innocent El Salvadorans continue to be pulverized. El Salvador, under its present regime, cannot in all good conscience be supported by the United States of America.

[From the Washington Post, Nov. 19, 1982]

U.S. QUESTIONS SALVADORAN KILLING OF AMERICAN 'DRIFTER'

(By Christopher Dickey)

SAN SALVADOR, Nov. 18—U.S. officials here are investigating the possibility that a young American picked up for questioning by Salvadoran soldiers last month and reportedly killed while trying to escape may have been murdered.

The officials said in interviews this morning that they were concerned about apparent discrepancies between the soldiers' initial account of the Oct. 13 killing of Michael David Kline, 24, and later medical reports that raise the possibility he was summarily shot.

The death of Kline, described as a "drifter," comes as the Reagan administration is already under heavy pressure from Congress to show that the government it backs here is making progress in investigating and prosecuting the murders of four American churchwomen in December 1980 and two U.S. labor advisers a month later.

Members of the Salvadoran military have been implicated in both cases, and the United States has had only limited success in pushing for substantive investigations and prosecutions. This week, a Salvadoran judge ruled that evidence against five National Guard soldiers held in connection with the deaths of the four women was sufficient for trial.

Kline's death has placed the U.S. Embassy here again in the difficult position of pressing for evidence that could damage overall U.S. policy goals in El Salvador by making even more difficult the certification of human rights improvement demanded by Congress.

In a speech last month and later interviews U.S. Ambassador Deane Hinton warned that Washington's economic and military aid, needed by this country's rulers in their fight against leftist insurgents, could be cut off over the human rights issue in general and the American murder cases in particular.

A U.S. diplomat authorized to speak about the case described Kline's death as "sensitive" and said, "The important thing now is how it is resolved by the Salvadoran authorities." A new examination of Kline's body by Salvadoran doctors at the military hospital is under way.

"We are trying to verify the soldiers' story," the diplomat said. "It could be he did try to escape and maybe they dropped him and then came up close to finish him off."

Much about Kline is a mystery, including most details about his background, his motives for traveling to one of the most war-torn provinces in El Salvador, and why he was carrying $500 in traveler's checks but no passport or other documents.

But there is also much about Kline's death that has the ring of the commonplace in this war where it is estimated that more than 35,000 people have died in three years.

The killings of Americans, as one Western diplomat put it, tend to "synthesize the whole problem here" by drawing attention to the conditions in which Salvadorans die.

The picture of Kline put together by U.S. officials is of a young "drifter" born in Tijuana, Mexico, to a German-born mother who has returned to her home near Hamburg and a father who lives in Chicago but who, according to the U.S. account, was said to be uninterested in the case.

A U.S. consular report from West Germany said Kline's mother, Renate Margaret Kline, believed he wanted to be a journalist.

There are spotty records of Kline buying traveler's checks in Alaska earlier this year, leaving Costa Rica in May, and reporting the loss of the checks and a passport in Cancun, Mexico, on Sept. 6, He apparently found them again before traveling to Guatemala later in the month, then crossed into El Salvador on Oct. 11, according to Guatemalan records given U.S. officials. The documents were reportedly gone when he died.

Kline was not positively identified as a U.S. citizen until Monday, when dental records arrived here. It was not until then, U.S. officials said, that they were able to press the investigation.

First word of Kline's death came when the head of El Salvador's Armed Forces Press Committee, Col. Marco Aurelio Gonzales, took the unusual step of calling a press conference here Oct. 15 to tell foreign journalists that a gringo mercenary," possibly an American or Canadian, has been killed by government troops in Morazan province.

The press office reportedly claimed at one point during the conference that Kline had seized one of the soldiers' guns and fired at them before they killed him, but this is nowhere corroborated by the basic account of what happened. This account comes from Army Sgt. Jose Desposorio Lopez, who was directly involved in the incident.

As U.S. officials recount the story from Lopez's affidavit and an interview with him on Oct. 21, Kline was riding a bus that runs from the city of San Miguel to the garrison town of San Francisco Gotera about 100 miles northeast of the capital when was it was stopped by the army at a routine checkpoint.

Lopez found Kline suspicious on the basis of his "long hair, dirty clothes and rubber sandals" and lack of identification papers, he said in his report. Kline was ordered detained.

Kline was taken to the bivouac at the checkpoint and his belongings searched. Initial accounts based on the press conference cited the report that he carried a knapsack, an air mattress, insect repellent, medicine (Alka-Seltzer) and lubricating oil that "could be used for cleaning a weapon" as evidence that he might be a guerrilla.

U.S. officials say that Lopez told them Kline spoke little or no Spanish and did not seem to understand everything he was told. He carried no identification except for the traveler's checks, Lopez reported.

Lopez said he, a solider named Hector Rubina Reyes and another referred to only as "Cristobal" flagged down a pickup truck to take them to headquarters at San Francisco Gotera.

According to Lopez' account the truck slowed about four miles down the road and Kline lunged for one of the soldiers' rifles. When he failed to get it he jumped off and began running uphill.

Lopez told U.S. officials Kline was ordered to stop, but kept running and was shot down at a distance of about 30 feet.

"We have problems with the sergeant's story," said one embassy official. "He reports three shots two in the neck and one in the back, all from the back".

But photographs of the body and the first medical report on the case, written the day after the killing, showed that one of the

shots was in the head, from front to back, according to U.S. officials.

Moreover, the doctor who wrote that report noted that there were no powder burns on the wound in Kline's back, but he did not mention the state of the wound in his head (which has yet to be determined conclusively) and did not mention the third wound in the body at all.

The officials said they are awaiting the new report from the military hospital before deciding what further steps to take in the investigation.

VOLUNTARISM AT WORK IN THE 10TH DISTRICT OF VIRGINIA

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. WOLF. Mr. Speaker, at a time when voluntary efforts are being encouraged nationwide to meet the special needs and demands of our cities and communities, it gives me great pleasure to bring to the attention of my colleagues in the House of Representatives an extraordinary example of voluntarism at its best.

Last spring a group of parents whose children attend Glen Forest Elementary School in the 10th District of Virginia, which I represent, recognized the importance of a recreational facility in the physical and mental development of their children. At that time, the students' only play area was a small, flat and barren field.

These parents organized and coordinated a full scale effort to finance and construct a playground in the schoolyard. The dedication of these parents, who did the manual labor themselves; the faculty, students, staff, and the hundreds of citizens, businesses, and clubs helped make the playground project a successful and fun community event.

The generous contributions of money, time, services and equipment have resulted in a uniquely beautiful playground that will continually challenge the imagination of future classes of children at Glen Forest Elementary School.

I fully appreciate the enthusiasm and involvement it took to make this project successful and I want to take this opportunity to congratulate and thank everyone who participated including:

Bailey's Crossroads Host Lions Club, Fairfax County Park Authority, Arlington Fairfax Elks Lodge No. 2188, Charles E. Smith, Inc., Wild and Wooly Needlecraft, Mr. Thomas M. Davis III, Metro Antenna, Bailey's Crossroads Volunteer Fire Dept., Fairfax County Fire Department, Dunn Loring Station.

Southern Builders, Chapel Valley Nursery, Southern Railroads, Perceptions of Virginia, Inc., Hodges Tractors, Duron Paints, Dyer Brothers Paint, Spring Hill Motor Lodge, Lake Barcroft Women's Club, Arlington Unitarian Cooperative Preschool.

Smith and Sons Equipment Corp., Alwards Garage, Glen Forest Garden Club, Woodson High School/Mr. Simm's Class, Meenahan's Hardware, Fairfax County Dept. of Transportation, Dick Herriman Ford, Metal Distributors, Inc., Anderson Excavating, LRC Printing, Curray Copy Center, Walter Brothers Printing.

Glen Carlyn Baptist Church, Culmore United Methodist Church, Voluntary Action Center/Fairfax Co., Girl Scout Cadet Troupe No. 2387, Honeycutt's Inc., Giant Food, Willston Center, Dr. Richard B. Hicks, VEPCO, C & P Telephone, Sea Galley.

Jeb Stuart High School: Mr. Kobus' classes, Key Club, Keyettes, Civitan, Civinettes; Mr. Joe Gass, Jerry's Sunoco, Spencer Lock Company, S. J. Bell Contractors, KMT Contractors, Southern Office Supply, Advanced Bathroom Design, Carpet Bazaar.

Pizza Hut, Burke Lumber, Chuck E. Cheese Pizza Time Theater, Dino's N.Y. Style Pizza, Dart Drug, Arthur Treacher's Fish and Chips, Hechinger's, Shanghai 4-5-6, Wooten Associates.

Brownie Troop No. 342, Bekins, Natural Foods Supermarket, Culmore Pizza, Donut King, Reston Farm Market, Chesapeake Seafood, McDonalds, Roy Rogers.

Mr. and Mrs. H. Nathan, Mrs. Lillie Mae Harris, Plus Supermarket, Peking Gourmet, Mr. Mike Perez, Magruders, Dr. Alfred C. Griffin, Safeway, Inc., and Fairfax County Public Libraries.

Erol's Color TV, Dr. Jerome Goldfarb, Falls Church Concert Band, Krispy Kreme Doughnuts, Wonder Bread, Tiffany Bakery, Culinary School of Washington, Georgetown Bagelry, Bread and Chocolate, Coca Cola.

Mr. Bill Moran, Northern Virginia Land, Inc., Magnifico's Pizza, Old Chicago Pizzaria, Mrs. Maggie Capozio, Subway Sandwich Shop, Cox Farms, Brownie Troop No. 342, Serafino's, Joe's Place.●

SUMMARY OF EARLY WARNINGS ON SPENDING BILLS

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. ASPIN. Mr. Speaker, the following early warning on the Interior appropriations bill was prepared by the staff of the Budget Committee:

EARLY WARNING

H.R. 7356, INTERIOR AND RELATED AGENCIES APPROPRIATION, FISCAL YEAR 1983

Committee: Appropriations.
Subcommittee: Interior.
Chairman: Mr. Yates (Illinois).
Ranking Minority Member: Mr. McDade (Pennsylvania).
Scheduled: Friday, December 3, 1982.

I. Description of bill

This bill provides $7,604 million in budget authority and $5,179 million in outlays for discretionary programs in the Department of Interior and for related agencies for fiscal year 1983. Such funding has already been provided in the Continuing Appropriations Act (Public Law 97-276). This regular appropriation will supersede and replace funds provided in the continuing resolution. The effect of this bill, therefore, is to provide an incremental change to the current level of spending that is already provided by law.

II. Comparison with budget targets

Now that fiscal year 1983 has started, there are two budget targets to consider. The first is the aggregate ceiling on budget authority and outlays that was specified in the First Budget Resolution for fiscal year 1983. Pursuant to section 7 of that resolution, the aggregates automatically become binding ceilings on October 1. Summary table B, below, shows that while the current level of budget authority, based on enacted law, is substantially under the budget resolution ceiling, the current level of outlays is over the ceiling.

The second target is the 302(b) target provided for this subcommittee when the Appropriations Committee subdivided its share of the First Budget Resolution's budget authority and outlays. These are the targets which the Budget Committee scorekeeping system uses as a measure of spending action. These targets are separated between discretionary spending, over which this subcommittee has control, and mandatory spending, over which it does not. While the overall resolution ceiling has been breached by other bills, Summary table C, below, shows that, with this bill, the subcommittee would remain under the 302(b) targets for discretionary spending that were provided in the first resolution. This bill has no impact on the current level of mandatory spending.

III. Summary tables

[In millions of dollars]

	Budget authority	Outlays
Summary table A.—Comparison of continuing and regular appropriations, discretionary spending: [1]		
1. Continuing appropriations (Public Law 97-276) [2]	7,881	5,352
2. This bill (H.R. 7356)	7,604	5,179
3. Over (+)/Under (−)	−277	−173
Summary table B.—Comparison with current level and ceilings:		
4. Budget resolution ceilings	822,390	769,818
5. Current level	806,948	775,026
6. Over (+)/Under (−)	−15,442	+5,208
7. a. Impact of this bill	−277	−173
b. Scoring adjustment due to this bill [3]	+85	+85
8. Over (+)/Under (−)	−15,634	+5,120
Summary table C.—Comparison with 302(b) subdivisions, discretionary spending: [1]		
9. 302(b) targets	7,650	5,335
10. Current level	7,881	5,352
11. Over (+)/Under (−)	+231	+17
12. Impact of this bill	−277	−173
13. Over (+)/Under (−)	−44	−156

[1] This bill does not affect the current level of mandatory spending.
[2] The scoring for both the continuing and the bill include amounts appropriated for the entire year in Public Law 97-276 for SPRO, Smithsonian construction, and the Native Hawaiian Study Commission.
[3] Enactment of this bill would also affect the scoring of certain proprietary receipts and permanent appropriations not in the jurisdiction of the Appropriations Committee.

IV. Possible future requirements

The Budget Resolution does not assume funding for any additional programs within the jurisdiction of this subcommittee.

V. Credit

The First Budget Resolution for Fiscal Year 1983 also contains targets for credit program amounts. As with budget authority and outlays, the Appropriations Committee is allocated amounts for credit program amounts and subdivides those amounts among subcommittees. The table below shows the additional credit assistance provided by this bill; credit assistance program levels already enacted, including action in the Continuing Appropriations Resolution;

and credit assistance programs not yet acted on. These amounts are then compared to the Appropriations Committee subdivisions.

	Direct loan obligations	Primary guarantee commitments	Secondary guarantee commitments
1. 1983 credit program limits already enacted	15	36	
2. Additional program limits in the bill	+5	−20	
3. Limits assumed in the budget resolution not acted on in the bill and other amounts not subject to annual limits	677	−667	
4. Possible total for subcommittee	697	−651	
5. Credit subdivisions	800	−625	
6. Over (+)/Under (−) Subdivision	−103	−26	

VI. Definitions of terms in the summary tables, section III

Line 1. Continuing appropriations (Public Law 97-276): This is the amount of discretionary budget authority outlays provided by that law, for programs funded by this subcommittee, as estimated on a full-year basis pursuant to congressional scorekeeping rules and GAO interpretation.

Line 2. This bill (H.R. 7356): This is the amount of discretionary budget authority and outlays that will be provided to the agencies in questions if this bill is enacted—in that case it would supersede the continuing appropriations.

Line 3. Over(+)/Under(−): Line 2 minus line 1, which is the net impact on current level of this bill.

Line 4. Budget resolution ceilings: These are the total amounts of budget authority and outlays in the First Budget Resolution for fiscal year 1983.

Line 5. Current level: This is the official estimate of total fiscal year 1983 spending, based only on existing law, including the continuing appropriations Public Law 97-276).

Line 6. Over(+)/Under(−): Line 5 minus line 4.

Line 7a. Impact of this bill: See line 3.

Line 7b. Enactment of this bill would also affect the scoring of certain proprietary receipts and permanent appropriations not in the jurisdiction of the Appropriations Committee.

Line 8. Over(+)/Under(−): Line 6 plus line 7.

Line 9. 302(b) targets: The targets for discretionary spending for this subcommittee, set by the Appropriations Committee pursuant to the Budget Act.

Line 10. Current level: This is the official estimate of total fiscal year 1983 discretionary spending for this subcommittee, based on existing law, i.e., the continuing appropriations (Public Law 97-276).

Line 11. Over(+)/Under(−): Line 10 minus line 9.

Line 12. Impact of this bill: See line 3.

Line 13. Over(+)/Under(−): Line 11 plus line 12. This compares the reported bill (H.R. 7356) with its 302(b) targets.●

THE HARD TRUTHS OF THE BREZHNEV LEGACY

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. DERWINSKI. Mr. Speaker, with the death of Leonid Brezhnev, there has been a great deal of speculation, and a good deal of it wishful thinking, over the future of United States-Soviet relations and of the role of Yuri Andropov. The Heritage Foundation recently released a background paper by W. Bruce Weinrod, director of foreign policy and defense studies of the foundation, on the implications of the Brezhnev legacy. I wish to insert it for the Member's attention:

THE HARD TRUTHS OF THE BREZHNEV LEGACY

(By W. Bruce Weinrod)

The death of Leonid Brezhnev is already producing an assortment of favorable reminiscences, as well as hopeful expectations for the course of future U.S.-Soviet relations: we hear Jimmy Carter fondly recalling Brezhnev's fervent desire for world peace and Cyrus Vance stating that Brezhnev's greatest legacy is his arms control efforts.

Do these and other similar generally sympathetic comments about the Brezhnev era reflect the actual Soviet record under Brezhnev? This question is critical, for how it is answered will influence the U.S. approach to dealing with the U.S.S.R. in the immediate post-Brezhnev era. The U.S. will be ill-served by romanticizing and distorting the Brezhnev legacy.

A pluralistic world was completely unacceptable to Brezhnev. The most dramatic demonstration of this is the "Brezhnev Doctrine" of 1968. Brezhnev used this to justify the Soviet invasion of Czechoslovakia in 1968, the invasion of Afghanistan in 1979 and the suppression of Polish liberties in 1981. This is part of the Brezhnev legacy.

The Brezhnev legacy threatens the security of the free world. Just in the past decade, the Soviets have added 733 nuclear-capable missiles (land, sea and air) and have increased their warhead supply by over 4,000. Since SALT I and the start of the so-called détente era, when the strategic equation was supposed to be stabilized, the Soviets have added, among others: several hundred later model SS-11 rockets, over 800 SS-18s, SS-19s and SS-20s; over 50 nuclear subs with about 2,000 nuclear warheads; and over 150 Backfire intercontinental bombers. Despite the well-publicized "Brezhnev freeze," in which he announced in March 1982 that the Soviets would stop further deployment of SS-20s targeted on Western Europe, deployment has continued.

The Soviets and their Warsaw Pact satellites have continued to increase what already was conventional weapon superiority over the West. In all, Brezhnev's Soviet Union is, at his death, spending roughly 40 percent more on military outlays than is the United States. And Moscow is allocating roughtly 12 percent to 15 percent of its GNP to military spending; the U.S., even with current spending hikes, is only at about 6 percent of GNP. From 1971 to 1981, the U.S.S.R. outspent the United States militarily by around $400 billion. During the past decade, Brezhnev added 10,000 new heavy and medium tanks, 8,000 pieces of artillery and 765 combat aircraft. Just since Reagan took office, the Soviets have added 2,000 tanks, 1,350 fighters and fighter-bombers, and 4,500 fighting vehicles. This is an unavoidable hard truth of the Brezhnev legacy.

Not only did Brezhnev snuff budding liberty and pluralism in Eastern Europe, he also provided substantial aid to terrorists trying to disrupt Turkey's pro-democratic and pro-Western government and has continued attempts to exploit Iran's instability. While Americans were being held hostage, Brezhnev continued to fan anti-American fervor in Iran.

In Asia, the Soviets financed and encouraged the North Vietnamese invasion of the South, in violation of the peace agreement of 1973, and also is financially underwriting the Vietnamese occupation of Cambodia. The Soviets under Brezhnev continued to refuse to discuss the return to Japan of islands seized at the end of World War II; in contrast, the U.S. voluntarily returned Okinawa, won at the cost of bloody fighting, to Japan.

In the Middle East, the Soviets encouraged Nasser's blockade of Israel in 1967, which precipitated the Six-Day War, and subsequently supported the Arabs in the 1973 war. A Soviet-supported coup in 1978 in South Yemen has made that nation a protectorate of the Russians, and the Soviets have transferred large amounts of arms to both sides in the Iran-Iraq war, encouraging instability in that region.

In Africa, the Soviets under Brezhnev have aided the most radical and destabilizing groups, including the African National Congress and SWAPO. Moscow is aiding the Polisario guerrillas fighting against America's ally, Morocco. Further south, the Soviets brought the Cubans into Angola. Closer to the United States, Brezhnev continually sought to violate the understanding ending the Cuban missile crisis by trying to expand the Soviet submarine base at Cienfuegos.

The Brezhnev legacy is pock-marked by Soviet treaty violations. Experts can cite continuing Soviet violations of the SALT I Treaty—supposedly a symbol of Brezhnev's commitment to arms control. Moscow trains and supports terrorists from the PLO to Libya to the attempted assassin of Pope John Paul II. The Brezhnev legacy is filled with unremitting domestic repression as well.

What then are the hard truths of the Brezhnev legacy? The answer: Unremitting efforts to gain advantage at the expense of the United States and the free world and an unyielding hostility to pluralistic societies.

Can the future bring improvements in U.S.-Soviet relations? Perhaps Moscow's new leadership will seek to relax world tensions. U.S. policy, however, cannot be based upon hopes that have often proved illusory in the past.

The hard truths, learned from painful experience, teach that the United States should continue to pressure the Soviets, forcing them to make difficult choices in terms of foreign involvements and the allocation of resources. If Moscow decides to move toward genuine peace, Washington will know it soon enough. Unless and until the Soviets alter their course in a meaningful way, such as allowing independent trade unions in Poland, or permitting a genuinely independent government in Afghanistan, conciliatory gestures from the United States are inappropriate. The fundamental fact is that it is the realities of the Soviet Union

and not the individuals who develop policies which govern U.S. decisions. The burden must be on Moscow's new leaders to prove that they are not the heirs of the Brezhnev legacy.●

NATIONAL PUBLIC RADIO LACKING IN FAIRNESS

HON. THOMAS J. BLILEY, JR.

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 2, 1982

● Mr. BLILEY. Mr. Speaker, each year the American people pay millions of dollars in taxes to support National Public Radio. For that money people expect professionalism, quality, and fairness—most of all: fairness.

I believe that the people of this country may be getting less than their money's worth in the news department of National Public Radio. Although the quality of the programs is normally good, there may be evidence that the news coverage is sadly lacking in professional integrity and in fairness—most of all: fairness.

I submit for the attention of my colleagues the following article from the November-December 1982 issue of the Washington Guide. This article suggests that the American taxpayer and the Congress of the United States should take a closer look at the organization and reporting of our public broadcasting system.

In a time of huge budget deficits and tremendous unemployment, every program must be carefully scrutinized. In light of information such as that in this article, I believe that the public broadcasting budget bears a special burden of proof—of its necessity and its public purpose.

The article follows:

NATIONAL PUBLIC RADIO'S HIDDEN HUSBANDS

Would the American public trust the news department of NPR if they knew about the connections to power that their correspondents have at home?

"All Things Considered" is the National Public Radio (NPR) ninety minute afternoon news program, which is broadcast by more than 250 stations throughout the United States, every afternoon.

Two thirds of NPR's budget of $21 million is provided by the taxpayers of the United States, in whose ranks are millions of conservatives, and millions more who could be categorized as middle-of-the-road. But when asked if there are any conservatives or middle-of-the roaders among the liberal Democrats who abound on the reportorial staff on NPR, the Vice President For News, Barbara Cohen replied:

"I don't know what you're talking about."

Mrs. Cohen is the wife of Washington Post columnist Richard Cohen. But her biographical news release, issued in the NPR press kit, makes no mention of this interesting interlocking of Big Media news people in our nation's capital.

During her brief interview in her office, Mrs. Cohen also told Washington Guide:

"I would describe Walter Mondale as a middle-of-the-roader."

News Director Cohen's ability to categorize the political position of the former Vice President—but not her reporters—came about later in the interview, when she identified one of the commentators on All Things Considered as Martin Kaplan, a former Mondale speechwriter.

Among the other five commentators on general subjects, this government-subsidized program has one (1) conservative, the formerly Rev. John McLaughlin, an ex-Jesuit who married the attractive press secretary of Treasury Secretary Donald Regan.

The other people who (openly) express opinions on NPR include:

Daniel Schorr, who was fired by CBS for having leaked a classified government document to Manhattan's Village Voice.

Bob Kuttner, editor of Boston's liberal weekly, Working Papers.

Tom Noyes and Edwin Yoder, former editorial writers for the Washington Star (whose editorals, in its last years, rarely, if ever differed from the Washington Post.)

Adam Hochstein of Mother Jones magazine, a left wing periodical involved with the similarly left wing Institute For Policy Studies.

When Washington Guide asked if the lineup of reporters and anchormen and women is any more balanced than the stable of all (but one) liberal commentators, Mrs. Cohen retorted:

"We don't hire reporters for their political views. We hire them for their journalistic abilities. And I wouldn't characterize them by any political stripe."

By striking contrast to this inability (or unwillingness) to categorize her reporters, NPR has a list of 77 people, entitled: em "Partial List of 'Conservative' Commentators and Interviewees On NPR News Programs."

Included in this list of "conservatives" are Dr. Henry Kissinger and his aide Helmut Sonnenfeld; Senators John Danforth and Nancy Landon Kassenbaum, Secretary of Defense Casper Weinberger and White House Chief of Staff Jim Baker.

By contrast to this list of "conservatives," Mrs. Cohen's reporters "don't represent political points of view, in my opinion," she said.

No one on her entire staff, she added, represents any viewpoint, liberal or conservative.

So Washington Guide asked: "Why did that extensive and attractive NPR press kit, with all those photographs and biographies, cover up the existence of "so many interesting husbands?"

News Director Cohen frowned and replied: "Your point that there is a coverup and that we are hiding our personal family connections is kind of insulting. To suggest that my views, or my approach to my job is at all influenced by what my husband writes, is quite wrong."

Does Vice President Cohen of NPR believe that it is wrong for civil courts to apply special rules regarding the testimony of a wife in a case concerning her husband, or vice versa?

"I pursue my professional career, and my husband pursues his professional career."

You never discuss anything to do with the news with your husband?

"Of course we do."

So we asked Mrs. Cohen what she supposed was the nature of such familial news discussions between her reporter Linda Wertheimer, and her husband, Fred.

Fred Wetheimer—another very notable NPR husband who is unmentioned in his wife's biographical news release—is the head of the liberal lobby Common Cause. This is a lobby which is involved in a great many current legislative issues on Capitol Hill—from whence his wife broadcasts news reports. (Among other issues, Common Cause has opposed efforts to repeal court ordered busing, and to reform the wide-open-to-criminals, competitors, and spies Freedom of Information Act; has opposed the Reagan Budget, and the constitutional amendment for a balanced budget; favored the Voting Rights Act, the Clean Air Act, the Legal Services Corporation and strict limitations on Political Action Committees.)

In putting Linda Wertheimer on the air, at U.S. Government expense, does NPR ever identify her as the wife of a lobbyist?

Mrs. Cohen appeared slightly shaken by this question, which she answered in an almost funereal tone:

"We take great pains to make sure that Linda is never assigned to cover a subject in which Fred has any interest."

Why doesn't NPR reveal Linda's lobbying connection even in her NPR biographical news release?

"I don't think it's relevant," retorted Cohen. "We conduct our business in a professional, above-board manner. To make something out of who are spouses or parents, I find a very sexist approach."

Washington Guide then asked about the also unmentioned-husband of NPR judicial reporter Nina Tottenberg. For Tottenberg, the scourge of conservatives in the Supreme Court as well as in the U.S. Senate, is in real life Mrs. Floyd Haskell. He is the liberal Democrat who was once U.S. Senator from Colorado.

Washington Guide was able to reach Sen. Haskell by telephone. He explained that while he had left the law firm he joined after losing his bid for re-election, he is now involved with some "Non-profit organizations"—which he refused to identify.

We asked News Director Cohen if she had determined the identity of Sen. Haskell's concealed activities. But in striking contrast to her expressed concern about Linda Wertheimer's never covering anything relating to her husband's lobbying, Cohen said:

"No, I determine how Nina pursues her job."

If you don't know what Nina's husband is doing, how do you know Nina is not covering areas in which her husband is involved?

"Because people here are journalists," replied Cohen. "And they are very leary of getting involved in anything in which they could possibly have a conflict of interest."

We mentioned the current wave of journalisitic liars, such as Janet Cooke of the Washington Post, and similarly fraudulent reporters at the New York Daily News, the Toronto Sun and the Stamford Advocate. But this epidemic of lying reporters apparently has had little or no effect upon News Director Cohen, and her assurance that nobody at NPR could ever by unduly influenced by a husband.

Another one of NPR's hidden husbands is New York Times reporter Steven Roberts, who is the spouse of NPR reporter Cokie Roberts. Cokie might be described as a twofer. For not only is there this New York Times connection, but Cokie is the daughter of the late Congressman Hale Boggs and Congresswoman Lindy Boggs.

Reporter Roberts' relationship with these two Democratic stalwarts in the House of Representatives, as well as the Bid Media identity of her husband, is unmentioned in her NPR biographical news release. And

when Roberts reports from Capitol Hill, NPR does not advise is listeners that her reports are the products of a Daughter of House Democrats.

This appearance of a conflict of interest is at least a conflict of family relationships, similar to a baseball umpire being married to the sister of a team manager. This would be cause for concern in some media organizations, but not at the top level of NPR.

For the President of NPR is the former aide to such strongly liberal Democrats as Senators Robert Kennedy and George McGovern. Frank Manckiewicz had to go through the anguish of being a top campaign aide to one of the most badly beaten Presidential candidates in American history. But Manckiewicz—who was not available for comment—now enjoys the satisfaction of seeing himself in control of the nation's public radio system, where he has been able to load the staff with liberal Democrats, whose salaries are paid by the taxpayers.

Mr. Manckiewicz' Vice President For News, Mrs. Cohen, who considers Fritz Mondale to be middle of the road, has another notable impression, about another of Washington's institutions—her husbands employer:

"I think the editorial page of the Washington Post leans toward the conservative. The Post is a conservative paper.

Since Cohen contended that there is nothing amiss in NPR's not mentioning the very interesting husbands of some of its star reporters, we asked her:

"Would you, as vice president of news, be willing to put on the air a commentary by Dorothy Coble, without ever telling listeners, or ever mentioning it in your press kit, who she is?"

"I don't know who she is," replied Mrs. Cohen.

"Dorothy Coble is Mrs. Jesse Helms," we explained.

The ensuing silence was ear-splitting. Finally Cohen responded: "It would certainly depend on the context of the story. I'm very uncomfortable with getting into these hypothetical hypotheticals."

News Director Cohen may be even more uncomfortable to learn that Mrs. Jesse Helms is an experienced newswoman, with the Raleigh News and Observer.

Will Mrs. Helms be given any opportunity to try to balance the ratio of conservatives to liberals on this government subsidized radio organization? And if that ever takes place, would News Director Cohen fail to inform the listeners and the public that she is really the wife of North Carolina's strongly conservative Senator?●

HOUSE OF REPRESENTATIVES—*Friday, December 3, 1982*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We are conscious, O God, of the ways in which Your love encourages and strengthens people in all the moments of life. We praise Your name that You speak to us in joy and laughter and in hardship and disappointment. Remind us that Your love transcends all the worry and pain of the day, and ever help us to use the time and talents that You have given to us in ways that help our neighbor and bring peace to all people. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment concurrent resolutions of the House of the following titles:

H. Con. Res. 376. Concurrent resolution recognizing the outstanding service and patriotism exhibited by the volunteers of the American National Red Cross during times of war and expressing the gratitude of the Congress for the service of such volunteers; and

H. Con. Res. 412. Concurrent resolution extending to the Graduate School, U.S. Department of Agriculture, the appreciation of the Congress on the sixtieth anniversary of the founding of the school.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 7019. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 7019) entitled "An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1983, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. ANDREWS, Mr. COCHRAN, Mr. ABDNOR, Mr. KASTEN, Mr. D'AMATO, Mr. HATFIELD, Mr. CHILES, Mr. STENNIS, Mr. ROBERT C. BYRD, Mr. EAGLETON, and Mr. PROXMIRE to be the conferees on the part of the Senate.

The message also announced that the Senate further insists upon its amendment to the bill (H.R. 3963) entitled "An act to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to extend the periods for which funds are authorized to be appropriated," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. THURMOND, Mr. MATHIAS, Mr. LAXALT, Mr. HATCH, Mr. DOLE, Mr. BIDEN, Mr. KENNEDY, and Mr. LEAHY to be the conferees on the part of the Senate.

HOURS OF MEETING FOR THE WEEK OF DECEMBER 6, 1982, THROUGH DECEMBER 10, 1982

Mr. WRIGHT. Mr. Speaker, pursuant to a colloquy held on the floor yesterday afternoon in which the distinguished minority leader participated, I ask unanimous consent that when the House adjourns today, it adjourn to meet at 2 p.m. on Monday next;

That when it adjourns on Monday, it adjourn to meet at 1 p.m. on Tuesday next;

That when it adjourns on Tuesday, December 7, it adjourn to meet at 2 p.m. on Wednesday next;

And that on Thursday and Friday it meet at 10 a.m.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair regrets the fact that there will be only one 1-minute today. Because of a personal request of one of the Members, the House had agreed there would be no more.

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS, 1983

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 616 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 616

Resolved, That upon the adoption of this resolution it shall be in order, clause 7 of rule XXI to the contrary notwithstanding, to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill reported by the Committee on Appropriations making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983, and for other purposes. During the consideration of said bill, all points of order against the following paragraphs in said bill for failure to comply with the provisions of clause 2 of rule XXI are hereby waived: Operation of the National Park System under National Park Service; Construction under National Park Service; Surveys, Investigations, and Research under Geological Survey; Office of Water Policy under Departmental Offices; Youth Conservation Corps under Forest Service; SPR Petroleum under Department of Energy; Navajo and Hopi Indian Relocation Commission under Department of Education; Smithsonian Institution; the following paragraphs under the heading National Foundation on the Arts and Humanities: National Endowment for the Arts, salaries and expenses and matching grants; National Endowment for the Humanities, salaries and expenses and matching grants; Institute of Museum Services and administrative provisions. During the consideration of said bill, all points of order against the following paragraphs in said bill for failure to comply with the provisions of clause 6, rule XXI, are hereby waived: Surveys, Investigations, and Research under Geological Survey; State and Private Forestry under Forest Service; and Energy Conservation under Department of Energy.

The SPEAKER. The gentleman from Massachusetts (Mr. MOAKLEY) is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Missouri (Mr. TAYLOR), pending which I yield myself such time as I may consume.

Mr. Speaker, the resolution provides for the consideration of the bill, H.R. 7356. The bill is the appropriation for the Department of the Interior and related agencies.

I am aware of no controversy over the rule. It provides certain waivers of points of order necessary to enable the House to deal promptly with the legislation.

The rule waives clause 7 of rule XXI, the 3-day layover applicable to appropriation bills, to enable the House to handle this matter today. The committee has worked closely with the authorizing committees and the minority to insure that Members are familiar with the legislation. As a result, there is general familiarity with the matter and no objection to the waiver.

The rule also waives points of order under clause 2 of rule XXI for several appropriations contained in the bill. Some of the waivers are purely techni-

cal and accommodate minor items which exceed obsolete authorizations. Some are necessary because action has not yet been completed on authorizing legislation. However, a few of the waivers do permit appropriations which are not authorized.

All of these waivers, however, address appropriations language. The bill contains some provisions of a legislative character but no waivers have been requested or provided for those sections.

The rule also provides waivers of clause 6 of rule XXI for three provisions which reappropriate unexpended balances. I am aware of no controversy over these provisions. Indeed, I would point out that the prohibition on reappropriations derives from the Legislative Reorganization Act of 1946 and probably should be reexamined by the Committee on Rules in light of the Congressional Budget Act. I am not at all sure that the objectives of fiscal discipline and sound management are well served by a rule of the House which prevents Congress from reducing prior appropriations which turn out to be in excess of fiscal requirements.

Mr. Speaker, the items protected by the rule are each specifically designated in the rule. Under leave of the House, I will insert at this point in the RECORD correspondence from the chairman of the Committee on Appropriations which explains the requested waivers in detail and explain the need for each waiver:

COMMITTEE ON APPROPRIATIONS,
Washington, D.C., December 2, 1982.

Hon. RICHARD BOLLING,
Chairman, Committee on Rules,
House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: The Committee on Appropriations has reported the Department of the Interior and Related Agencies Appropriations Bill for the fiscal year ending September 30, 1983.

The bill includes appropriations for a number of programs in excess of authorizations or for which legislation has not yet been enacted for which a waiver of Clause 2, Rule XXI is requested. There are also several transfers of unexpended balances from one account to another which are reappropriations for which a waiver of Clause 6 of Rule XXI is requested. In addition, since the bill and report will not have been available for three days as required by Clause 7 of Rule XXI, a waiver of that rule is also requested.

1. *National Park Service, Operation of the National Park System.* The Committee has recommended an appropriation of $567,730,000, including $500,000 for the Volunteers in the Park program. Public law 91-357 as amended authorizes $250,000. In times of employment restrictions, volunteers provide a valuable service in the area of interpretative services. The volunteers receive no salaries. The funds will provide uniforms, training, and expenses.

2. *National Park Service, Construction.* The Committee has recommended an appropriation of $161,846,000, including $2,444,000 for restoration of the memorial column at Perry's Victory and International Peach Memorial, Ohio. Only $1,965,000 of that amount is authorized. Legislation (S. 2756) to increase the authorization has been introduced in the Senate, but no action has been taken on that proposal.

3. *Geological Survey, Surveys, Investigations, and Research.* The Committee recommendation of $365,525,000 includes $34,943,000 for the Earthquake Hazards Reduction program. Legislation authorizing this program (S. 2273) is awaiting Senate action on a house amendment to a Senate amendment. The pending legislation authorizes less than the amount included in this appropriation.

4. *Office of Water Policy.* The Committee recommends an appropriation of $7,768,000 for this Office, including $5,000,000 for programs authorized by 42 USC 7816. Legislation authorizing appropriations for this program for FY 1983 has not yet been enacted.

5. *U.S. Forest Service, Youth Conservation Corps.* The Committee recommends an appropriation of $20,000,000 for this program. Section 1407 of Public Law 97-35 (The Omnibus Budget Reconciliation Act of 1981" precludes making appropriations for this act.

6. *Department of Energy, SPR Petroleum Account.* The Committee recommends $2,074,060,000 for acquisition and transportation of petroleum for storage in the National Reserve as an off-budget item as proposed by the Department. The Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) provided that appropriations and outlays for this purpose should be off-budget for fiscal 1982 but was silent on subsequent years. the Budget Resolution and the President's budget assume its continuation off-budget.

7. *Navajo-Hopi Indian Relocation Commission.* The Committee recommends an appropriation of $9,359,000 which includes $2,603,000 for relocation operations not authorized by law. No action has been taken on HR 7183 which was introduced, at the request of the Administration, on September 23, 1982.

8. *Smithsonian Institution, Salaries and Expenses.* The Committee recommends an appropriation of $147,276,000 which includes $860,000 for the National Museum program. Legislation (S. 2390) authorizing appropriations for fiscal year 1983 passed the Senate on June 9, 1982 and was referred to the House Committee on the Administration which has not yet acted on the measure.

9. *National Foundation on the Arts and Humanities.* The Committee has recommended appropriations of $143,875,000 for the National Endowment for the Arts, $130,560,000 for the National Foundation for the Humanities, and $10,800,000 for the Institute of Museum Services—basically the 1982 program level. The Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) authorized the following amounts for those programs in fiscal year 1983:

National Endowment for the Arts (Sec. 523)	$119,300,000
National Endowment for the Humanities (Sec. 524)	113,700,000
Institute of Museum Services (Sec. 521)	9,600,000

For items 1 through 9, a waiver of Clause 2 of Rule XXI is requested.

The following accounts include amounts derived by transfer of unexpended balances from prior appropriations. This is held to be a reappropriation. Thus, a waiver of Clause 6 of Rule XXI is requested for these accounts.

10. *Geological Survey, Surveys, Investigations, and Research.* A transfer of $16,200,000 is made from "Exploration of National Petroleum Reserve in Alaska."

11. *U.S. Forest Service, State and Private Forestry.* A transfer of $100,000 from funds avaidabde to the Secretary gf Agricudture is prgposed to gffset the costs gf the Gifford Pifchgt Ifstitute.

12. *Department gf Energy, Energy Conservation.* A trafsfer of $64,000,000 from Fossil Energy Construcction is proposed. These funds had been provided for a Solvent Refined Coal facility. All Federal action in that project will be completed with the balance left in the account from which the transfer is proposed.

The Committee appreciates your continued cooperation.

Sincerely,

JAMIE WHITTEN,
Chairman.

Mr. Speaker, as always, the gentleman from Illinois has managed the bill with great fairness and I am aware of no controversy over the rule. I urge adoption of the resolution to enable the House to deal with this important legislation and I reserve the balance of my time.

□ 1010

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, House Resolution 616 is a rule to facilitate consideration of H.R. 7356, the Department of Interior and related agencies appropriations bill for fiscal 1983. The resolution waives points of order that would otherwise lie against specified provisions of the bill for failure to comply with both clause 2 and clause 6 of rule XXI.

In addition, the rule waives a point of order that would otherwise lie against consideration of the bill for failure to comply with clause 7 of rule XXI. This provision of the rules of the House requires printed committee hearings and a committee report to be available for 3 calendar days prior to consideration on the floor.

In this situation, the Committee on Appropriations met and reported this bill only yesterday, and the Committee on Rules met and reported this rule yesterday afternoon. This waiver is necessary because the committee report will not have been available for the required 3 days when it is expected to be called up today.

Clause 2 of rule XXI prohibits appropriations for any expenditure not previously authorized by law as well as prohibiting legislation in an appropriations bill. At the appropriate time, Mr. Speaker, I will ask permission to insert in the RECORD a list supplied by the Committee on Appropriations of the nine items for which this waiver is provided for by the Committee on Rules. These nine items are provisions of the bill which have not yet been authorized by law.

Clause 6 of rule XXI prohibits reappropriating unexpended balances of appropriations from one account to another, and the waiver provided by this rule is made necessary because three items in the bill transfer unexpended balances from prior appropriations. Here again, Mr. Speaker, at the appropriate time I will ask permission to insert this list in the RECORD.

Mr. Speaker, H.R. 7356 provides appropriations of $7.3 billion for fiscal 1983 to the Department of the Interior and its agencies, as well as other departments of the Government and related agencies.

This appropriation is some $801.4 million above the President's budget request for these agencies, and as such is opposed by the administration.

Mr. Speaker, in addition to the $7.3 billion in specific appropriations, the bill provides necessary sums as authorized in permanent law. These amounts total $1.4 billion from Federal funds and $671 million from trust funds, thereby raising the total amount appropriated in the bill to $9.4 billion.

This later figure of $9.4 billion is $113 million higher than the amount of budget authority provided for in 1982.

There was no controversy about this rule in the Committee on Rules, and both the chairman and ranking Republican member of the Interior Appropriations Subcommittee appeared before the committee to make the rule request. In this regard, I do want to compliment both the gentleman from Illinois (Mr. YATES) and the gentleman from Pennsylvania (Mr. MCDADE) for their action on this bill.

Mr. Speaker, there are many of our colleagues in this House who have reputations for being fair-minded in their dealings. We are indeed fortunate that so many fair-minded individuals serve on the Committee on Appropriations, especially the two gentlemen I have mentioned.

Mr. Speaker, I not only urge adoption of this rule, I would also urge the House to keep in mind the necessity for timely passage of the appropriations bill it makes in order.

Mr. Speaker, I include at this point in the RECORD a brief summary of the provisions of the bill for which the specific waivers contained in this resolution are made:

PROVISIONS OF H.R. 7356 FOR WHICH WAIVERS OF POINTS OF ORDER ARE PROVIDED FOR IN H. RES. 616

The bill includes appropriations for a number of programs in excess of authorizations or for which legislation has not yet been enacted for which a waiver of Clause 2, Rule XXI is provided. There are also several transfers of unexpended balances from one account to another which are reappropriations for which a waiver of Clause 6 of Rule XXI is provided. In addition, since the bill and report will not have been available for three days as required by Clause 7 of Rule XXI, a waiver of that rule is also provided.

1. *National Park Service, Operation of the National Park System.*—The Committee has recommended an appropriation of $567,730,000, including $500,000 for the Volunteers in the Park program. Public Law 91-357 as amended authorizes $250,000.

2. *National Park Service, Construction.* The Committee has recommended an appropriation of $161,846,000, including $2,444,000 for restoration of the memorial column at Perry's Victory and International Peach Memorial, Ohio. Only $1,965,000 of that amount is authorized. Legislation (S. 2756) to increase the authorization has been introduced in the Senate, but no action has been taken on that proposal.

3. *Geological Survey, Surveys, Investigations, and Research.*—The Committee recommendation of $365,525,000 includes $34,943,000 for the Earthquake Hazards Reduction program. Legislation authorizing this program (S. 2273) is awaiting Senate action on a House amendment to a Senate amendment. The pending legislation authorizes less than the amount included in this appropriation.

4. *Office of Water Policy.*—The Committee recommends an appropriation of $7,768,000 for this Office, including $5,000,000 for programs authorized by 42 USC 7816. Legislation authorizing appropriations for this program for FY 1983 has not yet been enacted.

5. *U.S. Forest Service, Youth Conservation Corps.*—The Committee recommends an appropriation of $20,000,000 for this program. Section 1407 of Public Law 97-35 (The Omnibus Budget Reconciliation Act of 1981) precludes making appropriations for this act.

6. *Department of Energy, SPR petroleum account.*—The Committee recommends $2,074,060,000 for acquisition and transportation of petroleum for storage in the National Reserve as an off-budget item as proposed by the Department. The Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) provided that appropriations and outlays for this purpose should be off-budget for fiscal 1982 but was silent on subsequent years. The Budget Resolution and the President's budget assume its continuation off-budget.

7. *Navajo-Hopi Indian Relocation Commission.*—The Committee recommends an appropriation of $9,359,000 which includes $2,603,000 for relocation operations not authorized by law. No action has been taken on HR 7183 which was introduced, at the request of the Administration, on September 23, 1982.

8. *Smithsonian Institution, salaries and expenses.*—The Committee recommends an appropriation of $147,276,000 which includes $860,000 for the National Museum program. Legislation (S. 2390) authorizing appropriations for fiscal year 1983 passed the Senate on June 9, 1982 and was referred to the House Committee on the Administration which has not yet acted on the eeasure.

9& *National Foundation on the Arts afd Humanities.*—The Committee has recommended appropriations of $143,875,000 for the National Endowment for the Arts, $130,560,000 for the National Foundation for the Humanities, and $10,800,000 for the Institute gf Museum Services—basically the 1982 program level. The Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) authorized the following amounts for those programs in fiscal year 1983:

National Endowment for the Arts (Sec. 523)	$119,300,000
National Endowment for the Humanities (Sec. 524)	113,700,000
Institute of Museum Services (Sec. 521)	9,600,000

For items 1 through 9, a waiver of Clause 2 gf Rule XXI is provided.

The followifg accounts include amounts derived by transfer of unexpended balances from prior appropriations. This is held to be a reappropriation. Thus, a waiver of Clause 6 of Rule XXI is provided for these accounts.

10. *Geologicl Survey, surveys, investigations, and research.*—A transfer of $16,200,000 is made from "Exploration of National Petroleum Reserve in Alaska."

11. *U.S. Forest Service, State and private forestry.*—A transfer of $100,000 from funds available to the Secretary of Agriculture is proposed to offset the costs of the Gifford Pinchot Institute.

12. *Department of Energy, energy conservation.*—A transfer of $64,000,000 from Fossil Energy Construction is proposed. These funds had been provided for a Solvent Refined Coal facility. All Federal action in that project will be completed with the balance left in the account from which the transfer is proposed.

Mr. Speaker, I yield 5 minutes to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding the time. I hope that I will not take the whole 5 minutes, but I do want to caution the Members about some of the waivers that exist in this rule and express my concern about those waivers, a concern that will cause me to have to vote against this particular rule.

The waivers in most instances allow appropriations for measures that have not been properly authorized. In most instances, these waivers cover either authorizations that are not in place or amounts of money which exceed authorizations now in place. For example, in the National Park Service, in the operation of the National Park Service program, there is $500,000 for the volunteers in the park program. The public law authorizing this program allows an expenditure of only $250,000.

In the National Park Service construction, there is $2,444,000 for restoration of a memorial. Of that amount, only about $1.965 million is appropriately authorized.

The committee recommends $365 million in the Geological Survey. The pending authorization authorizes less than that amount for an appropriation.

The Office of Water Policy recommends, there is a recommended appropriation of almost $8 million. The legislation authorizing those appropriations has not yet been enacted.

The U.S. Forest Service and the Youth Conservation Corps, we have a recommended appropriation of $20 million in this bill and yet the Omnibus Reconciliation Act of 1981 precludes—that is right, precludes making appropriations for that particular program. I will not go over all of the problems of a similar nature.

In nearly every instance, though, where there is a waiver in this rule, we have programs that have not been properly authorized or where the amounts of money in the bill exceed authorizations.

I raise this as a concern because I think it is important as we move into the last few days of this session when we may have a number of appropriation bills coming to this floor that we not go through an exercise of having the appropriations actions exceed all the work of the authorizing committees and having appropriations going forward that even violate the principles adopted in the budget reconciliation bills that we passed in this House.

I intend to vote against the rule for the reason that it sets some troubling precedents and I hope that some other people who are also concerned about the budget process may follow me in voting against the rule.

Mr. TAYLOR. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I would like to thank the minority floor manager, the distinguished gentleman from Missouri (Mr. TAYLOR), for his courtesy and assistance in handling this urgent matter.

Mr. Speaker, I also would like to briefly respond to the issues raised by the distinguished gentleman from Pennsylvania (Mr. WALKER) because I do not want to mislead anyone. As I indicated in my previous statement, most of the waivers are minor or technical but, as I also indicated, unquestionably there clearly are substantive waivers.

The Omnibus Reconciliation Act of 1981, for example, prohibited expenditures for the Youth Conservation Corps and the rule does permit the House to vote on whether to reverse that decision. That legislation also sets lower limits on the National Endowments and the rule will permit a slightly higher figure to be voted on.

However, Mr. Speaker, I wish to make clear that the rule simply permits these matters to be placed before the House. Nothing in the rule prevents or disadvantages amendments to reduce any funding in the bill to the authorized level or to strike funding which is not authorized. I would also note, Mr. Speaker, that no protection was sought or provided for any provision of a genuinely legislative character.

Mr. Speaker, I have no further requests for time and I move the previous question on the resolution.

Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 293, nays 29, not voting 111, as follows:

□ 1030

Mr. ROEMER, Mr. STUMP, and Mrs. ASHBROOK changed their votes from "yea" to "nay."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. YATES. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their re-

marks on the bill, H.R. 7356, and that I may be permitted to include tables, charts, and other material.

The SPEAKER pro tempore (Mr. RATCHFORD). Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. YATES. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 7356) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to not to exceed 1 hour, the time to be equally divided and controlled by the gentleman from Pennsylvania (Mr. MCDADE) and myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. YATES).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 7356, with Mr. FASCELL in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Under the unanimous-consent agreement, the gentleman from Illinois (Mr. YATES) will be recognized for 30 minutes, and the gentleman from Pennsylvania (Mr. MCDADE) will be recognized for 30 minutes.

The Chair recognized the gentleman from Illinois (Mr. YATES).

□ 1040

Mr. YATES. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, I am delighted again to bring the Interior and related agencies appropriation bill for fiscal year 1983 before the committee.

The bill reflects our continuing investment in America and Americans. It supports the national heritage of all Americans, the public lands, the national parks, the national forests, and the cultural and historical preservation of the heritage we want to pass along to our children, our grandchildren, and the generations to come.

It is a good bill, Mr. Chairman. It is a bill on which the committee has worked long and hard. We considered the President's budget originally, and we found the President's budget was woefully inadequate.

Mr. Chairman, we attempt to hold the line in this bill, and that is about all that the funding does. We should have more funds. We should be continuing the funding at levels that will better husband our resources for our children and the generations to come. It will not altogether stop the deterioriation that is taking place because the Government's resources make up a very large establishment. If this establishment were run by private companies, there is no question in my mind that much more would be spent to take care of these resources. The public lands are being overgrazed and being underfertilized, the national parks are aging and will require much increased funding for their rehabilitation, the refuges are in great need of rehabilitation, and pollution is affecting our forests, our streams, and our public lands. They are being bothered, particularly in the Northeast, by increasing acid rain, and I fear that our failure to place more money in this bill to take care of the resources may have a very harmful effect in the years to come.

We found that there was no more money for new acquisitions provided in the budget request for the land and water conservation fund. I cite that specifically at this point because so many Members of Congress asked the committee to place funds in the bill for the land and water conservation fund. The committee has done that. It has placed $260 million in the bill, of which $75 million will be made available to the States.

Indian problems are being underfunded. The education of Indian children has been cut. It was cut by $26 million. We have restored $15 million of that. The health treatment of the Indian people is still underfunded. Tribal resources are underdeveloped. These are some of the gaps where we should be spending more money, and the budget resolution just will not let us do it.

I should point out, too, that this is a bill that is good for the taxpayers of this country. As to the resources of the Federal Government, under the leasing arrangements by the Federal Government, it is estimated that approximately $20 billion will be made available for the Treasury. That will come from receipts from oil leases, from grazing, and from the forest cut. Most of the items will be discussed as the debate progresses.

Mr. Chairman, I want to extend my personal delight over having had the opportunity of working with my very good and able friend, the gentleman from Pennsylvania (Mr. MCDADE), the ranking minority of this committee, who has made enormous contributions to this bill. I also want to pay tribute to other members of the subcommittee, the gentleman from Pennsylvania (Mr. MURTHA), the gentleman from Oregon (Mr. AUCOIN), the gentleman from Washington (Mr. DICKS), and the gentleman from Connecticut (Mr. RATCHFORD) who joined us late in the session but nevertheless made a very excellent contribution. The gentleman from Ohio (Mr. REGULA) and the gentleman from Texas (Mr. LOEFFLER) also did much toward formulating this bill. I am pleased to present the bill to the House, and I have every confidence that the House will accept it.

The bill provides total appropriations of on-budget new budget authority of $7,386,522,000. The continuing resolution also provided annual appropriations of $278,808,000. These two amounts, when compared to the 302 B allocation of $7,714,000,000, leaves a 302 B balance remaining of $48,670,000. In addition the bill includes $2,074,060,000, the budget request, for off-budget scorekeeping for the acquisition and transportation of oil for storage in the national strategic petroleum reserve. Based on a CBO scorekeeping of the bill, we are $172 million under our 302 B allocation in outlays.

The bill includes $3,709,974,000 for programs of the Department of the Interior; $1,485,317,000 for the Forest Service; $926,760,000 for on-budget programs of the Department of Energy; and $1,264,471,000 for Indian health, Indian education, the Smithsonian Institution, the National Endowments for the Arts and Humanities, and the other related agencies of the bill, all of which are described in detail in the report accompanying the bill.

The programs within the jurisdiction of this committee in many ways represent an investment in America itself, and those investments provide significant returns. For example, programs funded in this bill will generate estimated revenues of $20.7 billion in fiscal year 1983. I would like to point out that this estimate includes the OMB's estimate of Outer Continental Shelf receipts of $15.7 billion. The CBO and the committee feel a more realistic estimate of OCS receipts is $11 billion, but even subtracting the $4.7 billion from OCS receipts which I do not believe will be realized, the bill is estimated to produce roughly $16 billion in income. This estimate also does not include the revenue that will accrue to the Nation if and when it becomes necessary to dispose of the oil stored in the strategic petroleum reserve, which has an estimated value at today's prices of about $9.4 billion.

The bill includes funds for several programs that were proposed for termination in the budget for fiscal year 1983. This includes the Youth Conservation Corps, for which $20 million is included in the bill; the historic preservation program, for which $26 million is included in the bill; the low-income weatherization program, for which $147,500,000 is included in the bill; the State assistance program of

the land and water conservation fund, for which $75 million is provided in the bill; and several other programs which your committee and many Members of Congress feel are too important to be terminated.

The committee has continued many programs at the 1982 level rather than at the reduced level as proposed by the administration. I do not want anyone to assume, however, that the committee has rejected every administration proposal to reduce or terminate programs. We have concurred in the proposals to terminate water resource research institutes and mineral research institutes. We have concurred in proposals to reduce the level of support below the 1982 levels for fossil energy research and development, energy regulation, energy information, acquisition of oil for the strategic petroleum reserve, operation of the national forests system, Indian programs, and territorial and international affairs. The committee has continued the payments in lieu of taxes and the National Foundation for the Arts and Humanities programs at the 1982 level. The committee has partially concurred in the administration proposal to close fish hatcheries. The administration proposed closing 31 fish hatcheries with projected ongoing annual savings of $3,676,000. This list reflected continuing hatcheries meeting administration priorities and closing hatcheries which produced fish largely for State and private land, and which had projected high rehabilitation costs. The committee did not object to the identification of specific fish hatcheries principally associated with salmon as being high priority. However, the committee over the years has taken the initiative from the administration in establishing as a priority the reintroduction of fish to the Great Lakes and the reintroduction of the Atlantic Salmon in New England States. Therefore, the committee prepared a list comparable to that proposed by the administration, but which also preserved the legislative priorities as well as administration priorities. The 19 fish hatcheries proposed for closure by the committee will have annual operating savings of $3,513,000. It will also have substantial cost avoidance in that this list too includes hatcheries which have high rehabilitation in future years.

The bill before the committee also includes language to continue the prohibition on development of minerals in wilderness areas that was included in the continuing resolution.

Mr. Chairman, this is a good bill. Although it is over the President's budget request, the President has on many occasions indicated that he will support any bill that is within the congressional budget allocation. This bill meets that test. In energy programs, the program level is $225,000,000 below the 1982 program level.

I want to commend the subcommittee members for their willingness to return the week of November 16 in order to have subcommittee markup so that the bill would be ready for presentation to the full committee today.

The report in considerable detail explains the committee actions represented in the bill.

The following table compares the fiscal year 1983 amounts recommended to the budget request and the fiscal year 1982 appropriation:

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY—INTERIOR APPROPRIATIONS BILL, FISCAL YEAR 1983

	Fiscal year—		Committee recommendation	Bill compared with enacted	Bill compared with estimates
	1982 enacted	1983 budget request			
TITLE I—DEPARTMENT OF THE INTERIOR					
LAND AND WATER RESOURCES					
Bureau of Land Management					
Management of lands and resources	423,638,000	373,527,000	322,963,000	−100,675,000	−50,564,000
Construction and access	2,627,000	2,711,000	2,243,000	−384,000	−468,000
Payments in lieu of taxes	95,520,000	45,000,000	95,520,000		+50,520,000
Land acquisition	3,712,000		468,000	−3,244,000	+468,000
Oregon and California grant lands (indefinite, appropriation of receipts)	52,788,000	52,883,000	46,883,000	−5,905,000	−6,000,000
Range improvements (indefinite, appropriation of receipts)	13,226,000	11,048,000	11,048,000	−2,178,000	
Service charges, deposits, and forfeitures (indefinite, special fund)	9,600,000	10,000,000	10,000,000	+400,000	
Miscellaneous trust funds (indefinite)	100,000	100,000	100,000

[1] Excludes accounts which were funded in PL 97-276, Continuing Appropriations, FY 1983, as follows: (1) Strategic Petroleum Reserve—$242,118,000; (2) Smithsonian Institution, Construction—$36,500,000; (3) Native Hawaiians Study Commission—$190,000.

Mr. Chairman, I reserve the balance of my time.

Mr. McDADE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 7356 making appropriations for the Department of Interior and related agencies for fiscal year 1983 and to urge its approval by the Members of this House.

I want to commend my chairman, the distinguished gentleman from Illinois (Mr. YATES), for the great courtesy and the great skill he has brought to the production of this bill. It is a consensus bill. It bears the imprimatur of all of the members of the subcommittee from both sides of the aisle. It does so because of the evenhanded approach of Chairman YATES.

This bill contains $7.386 billion in new budget authority which when coupled with the $278 million provided in the continuing resolution gives us a total budget recommendation of $7.665 billion. This amount is $49 million below our subcommittee section 302 allocation of $7.714 and $100 million below the Budget Committee's assumptions for these programs as contained in the Budget Act. I also hasten to add we are $156 million below those 302 outlay estimates.

The bill itself is $809 million above the administration's estimates submitted to our committee last January. It is important to note that this $7 billion in budget authority generates $20 billion in projected revenue from the minerals, grazing, timber, and other leasing activities funded in this bill. It is a self-liquidating bill almost three times over.

My friends, this bill is the major investment we will make this year in the Nation's mineral, natural, cultural, and human resources. It creates new jobs. It protects our natural resources. It provides recreational opportunities. It helps us exercise the trust responsibilities we have to Native Americans and to those residents in the trust territories. It makes a major contribution to our energy independence. It is a bill all of us can support with enthusiasm.

The largest items in this bill, nearly $2 billion, are directed to meeting our energy needs. Of this amount $1.2 billion funds the programs of the Department of Energy. Our committee was forced to rewrite the fossil and conservation budget. We did so because bipartisan consensus exists in committee and in Congress that we continue high-risk generic research on fossil energy and investment on effective energy conservative technologies necessary to protect our Nation's security.

The budget submitted to our committee was unable to accomplish that goal. Even administration witnesses conceded that we have saved far more money than we have spent on energy conservation. Testimony also rejected the notion that we can transfer this research effort over to the private sector and hope that it will go forward. In fact it will be abandoned.

The fossil energy budget is the heart of our effort to convert coal to clean burning liquids and gas. We provided $317 million, an increase of $211 million above the budget to advance technologies in surface coal gasification, MHD, fuel cells, and various combustion systems that burn coal directly and cleanly.

In the conservation program we provided a program level of $388.8 million, an increase of $295.9 million. Of this amount the committee had to add $147.5 million for weatherization plus bill language directing the Department not to proceed with regulations reducing the maximum grant to $600 from $950. This would cause great hardships especially to elderly in the North and Midwest.

We added $30 million in State conservation grants to be matched with State funds on a 80-percent Federal, 20-percent State basis. If we are going to have to handle emergency preparedness we are going to have to keep this program alive.

We added $60 million to the schools and hospitals retrofit program. With the Government constantly pressuring health-care agencies and hospitals to control their costs, this program is an effective way to help that effort.

If the Members will notice they will see across the board additions to conservation programs in building systems, industrial conservation, transportation, including funds to go forward with a strong alternative engine program. Testimony from Secretary Edwards before our committee conceded that 5 percent of the total energy savings we have achieved through these programs. If you do the math, and we did, this represents an annual savings to the taxpayers of $3.4 billion. This means that in 1 year alone total savings exceeded total investments since 1973 by over $700 million. Because these are hard, true numbers we have had to reject the budget that does away with these investments.

For the three energy related agencies in the Interior Department we provided $709 million.

We fully funded the States share of the abandoned mine reclamation fund —$78 million—and added additional funds $10 million for emergency Federal projects and $15 million for RAMP. This fund now has roughly $600 million in receipts from coal taxes accumulating, yet we are spending only one-fifth of that money for the purposes for which the tax was levied. The program is a good job creator because it puts the construction industry to work cleaning up abandoned lands.

In the Bureau of Mines we restored funding for health and safety research, research on subsidence prevention, and a new respirable dust initiative. And while we reduced funds for coal leasing programs we still intend that the processing of preferential right leases go forward.

In the Geological Survey we added funds for research on earthquake hazards along with energy and water assessments. We have also, for the first time, consolidated the Department's leasing activities in the new Minerals Management Service.

The Members will note that we provided $186 million for the land and water conservation program of which $75 million restores the State assistance program. All of your States are now without funds because of the 1-year moratorium we took last year. We had to make a decision about whether recreation was going to remain our responsibility or whether we were going to abandon these very successful programs. So we added $75 million. I caution you that this program is authorized at $900 million and once was funded as high as $600 million; $75 million represents the absolute minimum funding we could provide and still keep the program alive. The remaining funds for Federal acquisition are for projects that included hardship acquisitions, legislative takings, and which preserve lands and properties threatened with development for which there was no other alternative.

We have kept the historic preservation program providing funds to the States to help process tax forms and administer the existing program. The committee has kept this program at last year's $26 million level.

You will note that this year the committee was faced with a proposal to close 31 fish hatcheries across the Nation. We carefully reviewed this proposal and modified it to close hatcheries that produced fish for State and local waters and for which we would be faced with staggering rehab costs in the future. This is a difficult task in the best of years and the committee tried to be fair in making these judgments.

Indians and trust territories are budgeted at $1.9 billion. This bill also contains $1.7 of the roughly $2.7 billion which the Federal Government has budgeted to meet our responsibilities to the various Indian tribes. The committee also extensively reviewed the needs of the American citizens who live in the trust territories and met their highest priority needs in areas such as health care, power development, and penal facilities construction.

My colleagues, one additional area where our committee made extensive revisions is in the budget for the Forest Service, a total budget of $1.485 billion is recommended.

We provided $20 million for the YCC program. This is a job-creating initiative that brings in $1.25 worth of conservation work for every $1 invested. It will put about 12,000 young people to work next summer.

We added $8 million for research including $6 million for research to improve eastern hardwood timber stands and a small increase—$350,000—for the gypsy moth research program. We also suggested a reorganization of the entire dormant gypsy moth research effort.

We added $11 million in State and private forestry programs including $6.9 million for gypsy moth suppression to restore the Federal-State match to 53 percent Federal, 47 percent State.

We added $2 million for urban forestry and another $1 million for rural forestry assistance to aid reforestation activities in rural areas.

We added $10 million for our 10-year reforestation and timber stand improvement. These funds will provide us with a 160,000-acre program. This is still almost 100,000 acres below what we accomplished in 1981 and well below our capability.

Acquisitions are set for highest priority access at $20 million. We were able to reduce the construction account by $68 million, $40 million of which results from a reduced timber sales program.

The committee provided funding levels similar to those last year for the very successful programs of the National Endowments for the Arts, Humanities and the Institute for Museum Services. Again here the overwhelming weight of testimony from the private sector and public witnesses was conclusive that there was no basis for the notion that the private sector could assume full responsibility for our Nation's cultural heritage without Federal support.

Mr. Chairman, the report contains language prohibiting funding for the Federal Council for the Arts. I do not concur with that judgment. The recently established Council under the leadership of the First Lady has a vital mission to perform if the arts are to grow and flourish in America. It deserves the support of the Endowment, the Congress, and the American people. I know that will be the judgment of all Members as the Council's efforts proceed.

Mr. Chairman, we believe that our committee accomplished most of, not all, of the goals we set for ourselves when we set out to write this bill. We have been faithful to the guidelines laid down for us in exercising budgetary restraint. We have been faithful to those who look to us to husband the vast natural resources that have made us the envy of mankind. We have looked favorably on the continued need to secure energy independence. We have stimulated chances for new growth and new jobs without threatening the beauty of our Nation's resources.

A vote for this bill is a vote to endorse these goals. We urge your support.

Mr. Chairman, I reserve the balance of my time.

Mr. YATES. Mr. Chairman, I yield 3 minutes to the gentleman from Connecticut (Mr. RATCHFORD).

Mr. RATCHFORD. Mr. Chairman, I rise in support of this bill which represents a fiscally prudent and balanced product. As the newest member of the Interior Subcommittee, I was particularly impressed with the strong bipartisan effort that emerged under the strong leadership of Chairman YATES.

I would particularly like to commend my colleagues on the subcommittee for recognizing the critical need for a national commitment to energy conservation and the search for alternative energy sources. We in New England are acutely aware of this need and are grateful for the resolve of this bill in the face of overwhelming administration opposition.

Let us not forget that only a short time ago the administration submitted to the Congress a budget that virtually terminated every Federal initiative in energy conservation—this despite the results of a recent study conducted by its own Department of Energy that concluded that as much as 50 percent of the energy consumed in the residential sector, for example, could be cost effectively saved. Further, we know that that if Americans were to spend as much to save a Btu of energy as we do in consuming a Btu of energy, we could sustain a healthy rate of growth in our GNP and save literally millions and millions of barrels of petroleum each year.

The bill, Mr. Chairman, provides nearly $388.8 million for energy conservation efforts as compared with the administration's request of only $21.8 million. Importantly, this bill provides increased funding over last year's levels for the low-income weatherization that is so critical to those who could not otherwise afford the cost of improving the shell or heating systems in their homes. Without such a commitment to improving our Nation's energy efficiency, we risk not only a deepening recession but would also place our own security squarely in the hands of the OPEC cartel.

I am also pleased by the continuance of public-private efforts in innovative alternative energy source development provided for in this bill. Just as a strategy of increased energy prices would not lead to meaningful energy conservation, a strategy of leaving fossil energy research and development to industry would not relieve us of our long-term energy problems. In continuing the partnership between the Government and private industry in such areas as liquefaction and gasification of coal, development of a wide range of fuel cell technologies now underway, refinement of alternative power systems, and enhanced oil

recovery and oil shale efforts, we can insure for our children a world of accessible and ample energy supplies.

For years, the Federal Government and private industry both have been hard at work on developing a vast array of alternative energy technologies. While many of these technologies are at or near the point of practical application, most American homeowners, small businesses, community organizations, and local and State governments either lack sufficient information on the availability of these technologies or require technical assistance in selecting and installing an appropriate system.

Therefore, I am pleased that the subcommittee adopted my recommendation for the establishment of a National Appropriate Technology Assistance Service to disseminate information and extend individualized assistance to those wanting to apply small-scale energy technologies. While the Federal Government has invested over $50 million in the development of information on appropriate technologies such as solar power, alcohol fuels, and energy conservation, at present the public has only limited access to this information. Establishment of NATAS remedies this problem by providing individualized technical assistance, and extensive information that is presently only available at prohibitive prices.

Certainly the chairman and the subcommittee are to be praised for the development of this fine bill. However, let there be no doubt as to our sincerity and resolve in seeing to it that adequate personnel are utilized in operation of these programs, and that the full intent of Congress is satisfied. Again, I want to thank the chairman for his willingness to champion and safeguard the programs and objectives set forth in this bill, and call upon my colleagues to act swiftly in passing this measure. Thank you.

□ 1050

Mr. McDADE. Mr. Chairman, I yield such time as he may consume to the gentleman from Ohio (Mr. REGULA), a valued member of the subcommittee.

Mr. REGULA. Mr. Chairman, I rise in support of H.R. 7356, Department of the Interior and related agencies appropriations and urge its adoption by the House. I want to commend the work of our subcommittee's distinguished chairman, Mr. YATES, and the ranking member, Mr. MCDADE, for the excellent job they have done in bringing us a bill which can truly by endorsed by all of us. There is no one in this Nation who does not directly or indirectly benefit from the programs funded in this bill. I often remind school groups that, as U.S. citizens, their share of our great Nation and its natural resources amounts to about 3 acres per person. We all have a stake in this resource.

This bill represents one of the most constructive expenditures we make because we are investing in our Nation's natural resources which represent a major contribution to the wealth of America.

In today's modern world it is all too easy to forget how dependent our economy is on its forests, grasslands, and fisheries. We must not forget that these natural systems provide food, feed, fuel, and a broad array of industrial raw materials. These natural resources must be protected and enhanced to meet present and future needs.

We must invest in and wisely manage our natural resources. Our responsibility becomes even more critical in these years when increasing demands are being placed on our natural resources and funds are scarce. Both economic and political pressures could encourage a short-term focus. But pressures to wring too much out of the land in the short run, without putting enough back into it, can destroy it over the long run. It is critical that careful attention be given and sufficient funds allocated for resource management.

I can assure my colleagues that this bill falls within the 302(b) budget allocations. As it now stands the bill is $48.7 million under the 302(b) allocations.

There is another important budgetary aspect of this bill which is sometimes overlooked. The programs funded under this bill actually generate considerable revenues for the Federal Treasury. In fiscal year 1981, revenues generated through energy and mineral leasing, grazing fees, timber sales, and other revenue-producing activities of the Departments of the Interior and Energy, and the Forest Service totaled $14.4 billion. In fiscal year 1983, these receipts are estimated to rise to $20.7 billion, more than twice the total appropriations recommended in this bill.

Today you have an opportunity to vote for a bill to protect and preserve our natural resources, to continue efforts to develop new energy resources, to promote economic, social, and political development of the territorial areas, to improve education, health, and other social services to the Indian people. We can accomplish all of this and more for $7.7 billion and at the same time generate some $20 billion in revenues. This is a bargain we cannot refuse.

In addition, the committee has included provisions to insure that the funds get to the people, areas, or projects they are designed to serve and not wasted on administrative costs. For example, limitations on administrative expenses were added to several programs, including the State side of the land and water conservation fund and the abandoned mine reclamation fund. These provisions will improve program management and service.

Another example of our committee's efforts to promote savings involves the Youth Conservation Corps. The committee has urged the Agriculture and Interior Departments to focus the program on urban day programs wherever possible in order to reduce the costs associated with housing participants.

Such efforts are indicative of the committee's awareness of budgetary constraints and willingness to hold down costs.

The management of much of our great natural resource base is vested in this Congress. The Nation's land and resources are the basis of economic and national security. If properly managed they will continue to be the basis of our national wealth and strength for generations to come. I urge my colleagues to support this bill.

Mr. McDADE. Mr. Chairman, I yield such time as he may consume to the gentleman from Texas (Mr. LOEFFLER) a member of the subcommittee.

Mr. LOEFFLER. I thank the distinguished gentleman for yielding.

Mr. Chairman, I rise in very strong support of this very well balanced appropriation legislation.

In looking at the costs involved with respect to budget outlays and budget authority, we are one of the few committees and perhaps the only committee within the Committee on Appropriations that has come in not only under 203(b) but also clearly under 302(a) allocations as well.

I thank the distinguished chairman of the subcommittee and the ranking Republican for their courtesies and their fairhandedness as we have made some difficult choices consistent with appropriate and proper fiscal responsibility.

Mr. McDADE. Mr. Chairman, I yield 2 minutes to the distinguished gentlewoman from New Jersey (Mrs. ROUKEMA).

Mrs. ROUKEMA. Mr. Chairman, I rise to commend the committee for their enlightened and diligent work particularly demonstrated by their continuing support of the pressurized fluidized bed coal conversion pilot plant in Wood-Ridge, N.J.

This project is within months of completion and it represents the state of the art in the technology to safely, cleanly, and efficiently burn coal.

The Interior Subcommittee, ably led by my colleagues from Illinois and Pennsylvania, has recognized the importance of this technology and has provided the funding which was anticipated as needed to finish construction of the pilot plant.

Unfortunately, due to some delays in contract renegotiations which were conducted to enable the contractor, Curtiss-Wright, to take over, with private financing, the demonstration and

commercialization of the technology, there may be a shortfall in funding to complete this construction.

I want to ask my colleagues from Illinois and Pennsylvania if they will work with me to secure the necessary funds through reprograming within the Department of Energy to make up this probable shortfall and thus insure that the facility will remain on schedule and be completed this next year.

Mr. YATES. Will the gentlewoman yield?

Mrs. ROUKEMA. I yield to the gentleman.

Mr. YATES. Let me assure the gentlewoman at such time as the reprograming to which she refers comes before our committee I certainly will be glad to consider it, I really will.

Mrs. ROUKEMA. I thank the chairman.

Mr. McDADE. Mr. Chairman, will the gentlewoman yield?

Mrs. ROUKEMA. Yes, I yield to the gentleman.

Mr. McDADE. I want to commend my colleague for her interest in this program. She has been instrumental in getting it funded and I want to assure her that we will do our very best to accommodate her wishes and see that the project is fully funded.

Mrs. ROUKEMA. I thank the gentleman and appreciate his cooperation. This is a technology with great promise.

Mr. McDADE. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. SHUMWAY).

Mr. SHUMWAY. Mr. Chairman, I rise in opposition to H.R. 7356, the Department of the Interior and related agencies appropriations bill for fiscal year 1983. I have strong objections to this, and any other appropriations bills that would set excessively high Government spending levels in flagrant disregard of the need to reduce the budget deficit. At a time when we are faced with the prospect of annual budget deficits of over $150 billion, it seems ludicrous to make moneys available for various Government agencies far in excess of what they have determined their own needs to be. This bill is $801 million over the administration's request and should be scaled back accordingly.

In stating my opposition to the overall spending levels provided in this bill, I should like to make clear that I am not opposed to one program of particular importance to my district, the Lake Tahoe land acquisition project, Public Law 96-586. This program is designed to help preserve and protect the pristine beauty of Lake Tahoe and its environs. Last May, I appeared before the Appropriations Subcommittee on the Interior to testify in favor of continued funding for this project which is of vital interest to my constituents. I am very pleased that the committee has recommended that this program should continue to be financed.

However, in all fairness, I would support a percentage reduction in the spending levels for the Lake Tahoe project as long as similar reductions are made in all other areas of the appropriations bill. An across-the-board reduction of the committee's recommendations was made last year in order to bring the fiscal year 1982 Interior appropriations bill back in line with the administration's request, and I think it highly appropriate that we follow the same course this year.

Until we can bring the budget deficit under control, this country must continue to make the sacrifices necessary to revitalize our national economy. With this goal in mind, I urge you to oppose this bill in its present form and support lower overall spending levels.

□ 1100

Mr. McDADE. Mr. Chairman, I yield 3 minutes to the gentleman from Massachusetts (Mr. CONTE), the distinguished ranking minority member of the full committee.

Mr. CONTE. Mr. Chairman, I rise in support of H.R. 7356, a bill making appropriations for the Department of the Interior and related agencies for fiscal year 1983. The two greatest assets of any nation may be said to be its people and its natural resources. Earlier this week we considered and passed the people's bill—the bill making appropriations for the Departments of Labor and Health and Human Services. Today we are considering the bill which deals most directly with the management and preservation of this Nation's vast natural resources—our forests and parks, our fish and wildlife, and our mineral deposits.

We have a tremendous responsibility to ourselves, our children and their children to do our very best to protect, preserve, and to properly manage and develop for the continuing benefit of our own and future generations the resources with which this Nation has been blessed.

The bill before you includes funding for the Department of the Interior, the Forest Service, the fossil energy research and development and energy conservation programs of the Department of Energy as well as for the National Endowments for the Arts and Humanities and the Smithsonian. Total new budget authority recommended in this bill is $7.4 billion. This is $25 million more than the new budget authority enacted in fiscal year 1982 for comparable programs and some $809 million more than the administration's request.

But the amount the committee is recommending is within the section 302(b) allocation to the Interior Subcommittee established by the Appropriations Committee pursuant to the budget resolution adopted earlier this year by the Congress. Also to be considered is the fact that it is estimated that revenues to be generated to the Treasury as a result of activities undertaken through this bill including Forest Service timber receipts and OCS lease sales will total over $20 billion.

The management of our Federal lands involves a wide range of activities from determination of allowable grazing levels on our public lands to land purchases for park and recreation areas. I am pleased with the recommendations of the committee to continue park acquisition efforts in such developmentally threatened but diverse areas as the Appalachian Trail corridor, the Santa Monica Mountains, the Cuyahoga River National Recreation Area in Ohio, the Indiana Dunes, and Lake Tahoe. Additionally the committee has provided $75 million to allow the States to continue their participation in park and recreation efforts as authorized through the land and water conservation fund.

Of equal importance to continuing land acquisition efforts are the funds recommended by the committee for adequate operation, and maintenance, and development, and restoration of our existing parks. I am particularly pleased by the committee's recommendation to include $3.4 million for further development of the Lowell National Historical Park which because of its urban historical character is certainly one of the most unique parks in our national park system.

The committee has paid particular attention this year to the preservation of our wildlife resources and habitat which includes over 88 million acres of land involving 404 refuges, 89 hatcheries, 12 laboratories, and 25 field stations managed by the U.S. Fish and Wildlife Service. Among actions recommended by the committee in protection of our fishery and wildlife resources are restoration of $4.4 million for the cooperative wildlife and fishery research institutes program, $2 million for the migratory bird advance loan fund which together with an estimated $16 million in duck stamps receipts will allow for the purchase of some 33,000 acres of threatened wetlands which serve as irreplaceable migratory bird waterfowl breeding and wintering habitat; $5.5 million to complete acquisition of the Bird Cliffs in the Priboloffs, certainly one of the wildlife wonders of the world; restoration of funding for a number of hatcheries proposed for closing, and an increase of just over $5 million for the endangered species program including section 6 grants and special recovery programs involving the peregrine falcon, the California condor, and the whooping crane.

Just as important as the preservation of our national resources is the preservation and management of our cultural and historical resources. To this end the committee has included $26 million for the historic preservation fund, an additional $15 million for the reconstruction of Wolf Trap as authorized earlier this year by the Congress, and $159 million for the programs, activities, and operation of the Smithsonian. The committee is also recommending that funds for the National Endowments be continued at their fiscal year 1982 levels.

A final critical area of consideration for the committee are various fossil energy research and development programs and energy conservation programs. The committee has chosen to restore funds for a number of promising though as yet technically unproven energy technologies including $31 million for MHD and an additional $22 million for fuel cell development which includes $2.2 million for thermionics development. As submitted, the administration's fiscal year 1983 budget would have gutted our energy conservation programs reducing funding to a level of only $22 million. In view of the importance of energy conservation to our overall efforts to reduce dependence on foreign imports, such a level of funding was totally unacceptable. Therefore, the committee has chosen to restore funding using both new budget authority and funds transferred from the termination of the SRC I project for such programs as weatherization, $147.5 million; schools and hospitals, $60 million; energy extension service, $10 million; and the energy policy and conservation grants, $30 million.

Mr. Chairman, I think this is a good bill which meets the responsibility with which we have been entrusted to care for our wildlife and natural resources and to develop responsibly our oil, gas, and mineral resources for our own energy independence and I urge support for the bill.

In closing, I want to take this opportunity, Mr. Chairman, to commend my good friend, the gentleman from Illinois, SID YATES, and my good friend, the gentleman from Pennsylvania, JOE MCDADE for their leadership on the bill. I want to personally thank the gentleman from Illinois (Mr. YATES) for all he has done in so many areas including the arts and humanities and for cooperating with me in trying to bring back the Atlantic salmon to the Connecticut River, and for providing continued support for the Bethel and Hartsville hatcheries, and all of the hatcheries that we have. It has been through his goodness and kindness that all this has taken place.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Illinois.

Mr. YATES. I thank the gentleman for his acknowledgments and for his encomiums. But the goodness and the kindness that I and the committee expressed were in a great measure attributable to the tenacity, to the knowledge, to the experience and to the good will of the very distinguished gentleman from Massachusetts (Mr. CONTE) and the fact that there are Atlantic salmon swimming in the streams of New England today is the greatest tribute that one can give to the gentleman from Massachusetts.

Mr. CONTE. I thank the gentleman, and the striped bass people thank the gentleman for what he has done for them.

Mr. YATES. Mr. Chairman, I yield such time as she may consume to the gentlewoman from Tennessee (Mrs. BOUQUARD).

Mrs. BOUQUARD. Mr. Chairman, I want to congratulate the subcommittee chairman, Mr. YATES, and the ranking Republican, Mr. MCDADE, for their great efforts in bringing a reasonable fossil energy and conservation R&D appropriations bill to the floor. The administration shortsightedly presented the Congress with a going out of business budget for fossil energy and conservation R&D. Fortunately, these two gentlemen have drafted a bill that recognizes the need for a meaningful coal research program and the national security aspects of a synthetic fuels technology program. I also want to compliment my committee chairman, Mr. FUQUA, for his recommendations to the Appropriations Committee. He has keenly understood the need for the balanced energy R&D program which I feel must be the priority of this Congress.

My own efforts to enhance the levels of fossil energy and conservation R&D funding began in the last session and became very intense during the go-around on the fiscal year 1983 budget resolution. At that time, several of us with an interest in energy policy recognized that the Gramm-Latta level for fiscal year 1983 in the energy function 270 of the budget was much too low to accommodate even ongoing R&D programs no less provide the funds which I was interested in obtaining. I was pleased that most of the Senate and House conferees on the budget responded to our strong recommendations and raised the function 270 funding to the neighborhood of $5 billion in order to accommodate a truly balanced R&D program.

I firmly believe that the fossil energy and Conservation R&D funding provided in this bill is as close to my own recommendations which I made to the Interior Appropriations subcommittee as I could have hoped. In my letter of June 10 to Chairman YATES, and Mr. MCDADE, I outlined the critical need of the DOE to capture lessons learned in coal conversion so as to retain a Federal research and technical base for synthetic fuel development. I also pointed out the critical need to fund materials, component and instrumentation technology for fossil energy programs carried out in several of the national laboratories. I think that this bill represents a good start in those areas and also provides significant funding to support DOE's unique role in environmental technology, particularly in supporting the Synthetic Fuels Corporation. I am also very pleased that key liquefaction and gasification activities are funded as well as the MHD program. I would hope that certain programs such as combustion technology and university coal research can be enhanced even further by the time an Interior appropriations bill is signed into public law.

Mr. Chairman, I congratulate the gentleman from Illinois and the gentleman from Pennsylvania for their greatly constructive efforts in bringing this energy funding bill to the floor.

Mr. YATES. Mr. Chairman, I yield such time as he may consume to the gentleman from New York (Mr. DOWNEY).

Mr. DOWNEY. Mr. Chairman, I rise in strong support of this legislation.

As chairman of the Congressional Arts Caucus, I wish to applaud the work of the Appropriations Committee under the leadership of Chairman JAMIE L. WHITTEN and the Interior Subcommittee under the leadership of Chairman SIDNEY R. YATES.

I applaud their work in support of the arts and humanities. They have set and approved funding levels far above levels proposed by the administration.

The committee has approved funding levels for Federal Arts and Humanities programs at over $540 million—$119 million above administration levels.

The members of the Appropriations Committee have demonstrated their support of the arts in no uncertain terms. They have reaffirmed these valuable cultural programs with a strong, bipartisan voice. They have insured that artistic activity will continue to grow across America.

Let us continue that momentum. Let us approve the funding levels on the House floor. Let us keep the arts in America alive.

Mr. YATES. Mr. Chairman, I yield such time as he may consume to the gentleman from New York (Mr. WEISS).

Mr. WEISS. Mr. Chairman, I rise to support the fiscal year 1983 appropriations for arts programs in the Interior appropriations bill. I commend subcommittee Chairman SIDNEY YATES for his work in rejecting the serious cutbacks recommended by the administration. The Interior appropriations bill will generally preserve fiscal year

1982 funding levels, making minor increases in certain programs. The National Endowment for the Arts funding level, at $143.875 million shows a slight increase and the National Endowment for the Humanities funding is maintained at $130.56 million.

Budget reductions of any kind in arts and humanities would erode our objectives of creating a climate in which the arts and humanities can flourish and preserving the Nation's diverse cultural heritage. Cut of the magnitude that the President proposed would destroy the very core of Federal arts and humanities programs.

In my district groups dedicated to the arts and humanities have been stunned by the impact of the 1982 budget reductions. Escalating rents and difficulty in securing private sector donations have combined with Federal cuts to threaten the very existence of some theater and arts programs. They are being forced to raise admission prices, reduce staff and services, and sometimes, to rely on more traditional, less experimental productions so as to assure a full house. These efforts to survive tend to restrict the programs to an elite audience and to stifle creativity—the lifeblood of the arts.

Arts groups are meeting with very limited success in their efforts to find private funding to fill the gap created by Federal cuts. Corporations and foundations are reporting their requests for aid have doubled or tripled in the past year. They are unable to respond to the increasing pressures from the nonprofit world.

The administration's contention that the Federal Government plays only a minor role in the arts proves to be less than accurate upon closer examination. Federal grants comprise significant proportions of the budgets of many small nonprofit arts groups. They also represent the stamp of approval by which the private sector recognizes merit—a means to leverage private moneys.

Maintaining support for the arts and humanities makes economic sense, considering their power to produce jobs and revitalize neighborhoods. It makes political sense in view of the growing public interest in the arts. Finally, it makes sense from the viewpoint of national strength, for whatever happens to the arts and humanities affects the spirit of the American public. Approval of this appropriations levels for arts programs will indicate that we recognize the vital role of Federal support for the arts and humanities in the Nation's economic and cultural life.

Mr. McDADE. Mr. Chairman, I yield such time as she may consume to the gentlewoman from California (Ms. FIEDLER).

Ms. FIEDLER. Mr. Chairman, I rise today in support of the Interior appropriations bill that continues funding for land acquisition in the Santa Monica Mountains Park.

Again this year the park has received the highest level of funding of any park acquisition project in the Nation—$15 million. This is another important step in the continuing process of insuring that the Santa Monica mountains remain in their natural state.

The majority of this park is in my district and during the last year I have worked closely with homeowner's groups and interested citizens to help bring us to the point we have reached today.

In the future, I will be working with members of the committee to insure that full funding for this project is achieved. But, as for now, I think Congress should be proud that we have taken the steps to preserve a piece of wilderness in the sprawling metropolis of southern California.

I want to thank the members of the committee for helping preserve the natural beauty of the Santa Monica mountains.

Mr. YATES. Mr. Chairman, I yield such time as he may consume to the gentleman from North Dakota (Mr. DORGAN).

Mr. DORGAN of North Dakota. Mr. Chairman, I rise in support of H.R. 7356, the Interior appropriations bill for fiscal year 1983. In general, the bill strikes a reasonable balance between support for key Indian programs and budgetary restraint.

I commend the Interior Appropriations Subcommittee and, especially, Chairman YATES for supporting such vital Indian services at the Wahpeton Indian School, Indians into medicine (Inmed), community health representatives, social services, law enforcement, and roads maintenance.

The subcommittee and full committee deserve special praise for their continued support of the Wahpeton Indian School, an elementary boarding school in North Dakota. The subcommittee recognized the folly of the Bureau of Indian Affairs' premature plan to close this top-notch facility which provides quality residential education for Indian students with unique problems.

Specifically, the committee provided an additional $1.8 million over the administration's request for school operations in order to keep open the Wahpeton and Concho Indian Schools. In addition, the committee's report details tough standards that the BIA must meet before it can close any off-reservation boarding schools.

The committee directed the BIA to make a complete study of any proposed closures and to review the GAO report now in progress before presenting Congress with any closure plans. In addition, the committee prohibited any school closure unless:

First, the closure proposal was submitted to Congress 1 year in advance as part of the BIA budget; and

Second, both the House and Senate Appropriations Committees agree to the proposed closure as part of the regular appropriations process.

I have worked very closely with Indian tribal councils in North Dakota and with the Wahpeton Indian School Board to see that Indian children can continue to receive the kind of quality education that Wahpeton provides. This fight has taken us into Federal court to stop the BIA's closure plan.

So I take heart that the committee has joined with us in an effort to insure fair treatment and quality education for Indian children.

Similarly, I welcome the committee's prudent action in providing continued funding for Inmed at the University of North Dakota and the community health representatives. Inmed tackles the critical problem of insufficient Indian medical personnel. There are only 257 Indian doctors in the whole country out of an Indian population of 1.4 million—at a time when Indian life expectancy falls far below the national average.

Without adequate funding for Inmed and Indian health scholarships, we would fail in critical effort to train Indian medical personnel. So it pleases me to see that the committee kept Inmed administration funds at the fiscal year 1982 level and increased the overall budget for Indian health manpower by $2 million.

Further committee support for Indian health services came as it restored $23 million for the community health representative program, which the administration proposed to end. CHR's provide vital medical services to Indian people in isolated areas.

This tribal health program works well in preventing illnesses while saving tax dollars at the same time.

While I welcome the committee's support for these needed services, I also question decisions to deeply cut title IV Indian education, tribally controlled community colleges, and the United Tribes Educational Technical Center (UTETC) of Bismarck, N. Dak.

All three of these programs serve native Americans as well.

Title IV offers drug education and cultural studies to Indian students throughout the country, such as those at the Turtle Mountain, Standing Rock, Fort Totten, and Fort Berthold Reservations.

Indian community colleges provide affordable, quality education to Indian students who might not otherwise gain the tools needed for self-sufficiency in today's world. Most of these schools are well on the way toward accreditation, and funding cuts will jeopardize this progress.

UTETC offers a unique program of residential vocational education to Indian students from all over the Nation. UTETC also has a superior placement record for its graduates at a time when Indian unemployment runs as high as 90 percent.

Although the full committee wisely raised title IV funding to a level of $65 million, this still falls far below the fiscal year 1982 mark of $78 million.

I would urge the committee to reconsider these three cuts in conference and maintain the fiscal year 1982 levels for all three programs.

In closing, I repeat my appreciation for the committee's support of most key services to Indian people. Meeting our trust responsibilities to native Americans is not only just policy, it is a wise investment in American future.

Mr. YATES. Mr. Chairman, I yield 1 minute to the gentleman from California, Mr. JOHN L. BURTON.

Mr. JOHN L. BURTON. Mr. Chairman, I too, would like to compliment Chairman YATES and JOE MCDADE, the ranking minority member, for the tremendous insight they have had toward the situation in the district that I have been privileged to represent for 8½ years. They have done great work for the Golden Gate National Recreation Area and the Point Reyes Seashore.

Better than giving you a fair hearing, they always gave you something that would benefit the people of this Nation. I appreciate that, SID and JOE, very much, and the kindness that you have extended to me.

Mr. YATES. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to say that I appreciate very much the kind remarks of the gentleman from California (Mr. JOHN L. BURTON) and to tell him that I am sorry he is leaving the House. I wish him well in any activity which he undertakes in the future.

Thank you very much, JOHN.

● Mrs. SCHNEIDER. Mr. Chairman, as a member of the Congressional Arts Caucus, I am pleased by the Interior appropriation's strong show of support for important art and humanities programs.

I commend both the Interior Subcommittee and the full Appropriations Committee for recommending that adequate funds be allocated for valuable cultural programs. The recommended spending levels, which are well above the administration's request, are necessary to maintain this Nation's wealth of artistic tradition.

I ask that my colleagues join me in providing the necessary Federal commitment to the arts by approving the funding levels requested by the committee. The arts need your support.●

● Mr. FUQUA. Mr. Chairman, I want to extend my congratulations to Chairman YATES, to the ranking minority member, Mr. MCDADE, and their colleagues on the Interior Appropriations Subcommittee. Once again their ability to work together has produced a bill that makes sense. It is fiscally responsible, but more than that it represents the Congress continued commitment to certain energy and natural resource policies and programs. In this, it is a tribute to the subcommittee's courage.

Especially in it action on energy programs has courage and commitment been needed. In the budget request, the administration proposed to destroy virtually every energy program in this bill. For example, at $106.9 million, the fossil energy research and development program was 25 percent of its 1982 levels; at $15.8 million, the conservation R&D programs were 10 percent of their 1982 levels. The conservation grant and outreach programs had been totally eliminated. In sum, the nonnuclear energy technology R&D activities were being extinguished. Beyond that a philosphy was to be implemented, saying: A national policy for energy is not needed—energy is not a problem.

I have major problems with that point of view. First, energy clearly remains a problem for this country. Softening oil prices and the economic recession reduces the pressure but not the uncertainties with respect to our domestic energy production and especially with respect to the political and economic stability of OPEC and other oil exporting nations. Second, the nonnuclear energy R&D programs really only started in 1975; they were only beginning to produce marketable results when the budget reductions began in 1981. On the Science Committee we know that you have to support research for the long haul; the people and the work itself require commitment and time. Finally, the country needs to develop all of its energy resources. As much as I believe that nuclear power is critical to our energy future, I believe just as strongly that our strength will be in diversity. Conservation may be price-induced, but it has yet to be shown that there is any kind of price elasticity for energy R&D. On principle, the Federal Government ought to be in this business; because of our near-term national security, we have got to be in this business.

This appropriations bill maintains an R&D program in fossil energy and conservation technologies that will retain a core of people and technical expertise who can continue much needed work in these areas. The members of the Science Committee have worked closely with the Appropriations Committee on this bill and the bill reflects it. This kind of cooperation between appropriations and authorization committees is critical if the Congress is to make coherent policy when we must also reduce the Federal debt. I congratulate you and look forward to continued cooperation. Thank you, Mr. Chairman.●

● Mr. HOWARD. Mr. Chairman, I rise today to commend the Subcommittee on the Interior and the full Committee on Appropriations for approving $6 million in emergency funds to continue the vital beach renourishment plan at the Sandy Hook unit of the Gateway National Recreation Area. The second phase of this project is essential to effectively address the critical erosion problem facing Sandy Hook.

Just within the last month, the first placement of sand has begun at the critical erosion zone. Thus began a project determined by a committee of scientists as the most realistic and least expensive alternative to save access to a national park which attracts over 2 million visitors each year. There are vital installations at the tip of Sandy Hook, including a Coast Guard station, a Fish and Wildlife marine laboratory, an Army Reserve unit, the oldest lighthouse in the United States, as well as a marine science consortium that serves over 19 colleges and universities—and a host of activities by nongovernmental groups. All may be denied entrance if Sandy Hook is isolated by the sea.

I would also like to commend the Army Corps of Engineers for the cooperation and efficiency they have displayed in bringing about the first phase of the project. They have agreed to continue to make available the sand from their annual maintenance dredging of Ambrose and Sandy Hook Channels for placement on Sandy Hook. I therefore urge my colleagues to support this much-needed appropriation.●

● Mr. SCHEUER. Mr. Chairman, as a member of the executive board of the Congressional Arts Caucus, I would like to take this opportunity to express my appreciation to the members of the Appropriations Committee for their fine work in support of the arts and humanities.

Under the farsighted leadership of Chairman JAMIE L. WHITTEN and Subcommittee Chairman SIDNEY R. YATES, the committee has set and approved funding at substantially higher levels than those recommended by the administration. By approving more than $540 million for Federal arts and humanities programs, the committee has wisely provided $119 million above proposed administration levels.

This strong, bipartisan action by members of the committee has clearly indicated their concern that the growth of artistic and cultural activity throughout the Nation should be continued. This bill is richly deserving of our support.

I urge my colleagues to support funding for the arts at the levels approved by the Appropriations Committee. Only in this way will it be possible

for us to insure that the vitality of these programs will not be diminished and that these valuable cultural activities will continue to enhance our national heritage.●

● Mr. PARRIS. Mr. Chairman, I appreciate this opportunity to express my support for the recommendation of the committee to include $3 million for the acquisition of 355 acres of inholdings adjacent to Mason's Neck National Wildlife Refuge.

Mason's Neck in Fairfax County, home of George Washington and George Mason, is also, appropriately enough, the home of several bald eagles and one of the few nesting areas remaining in the east coast. This sanctuary for our national symbol is now threatened by development on the 355 acres, according to a 1981 assessment of the proposed acquisition by the Fish and Wildlife Service and recent correspondence I have received from the International Association of Fish and Wildlife Agencies.

The U.S. Fish and Wildlife Service began planning the acquisition of the acreage in question 15 years ago, when it first began acquiring the land which currently comprises Mason's Neck National Wildlife Refuge. Since that time, the current landowners have refrained from selling the land for development, in hopes of the eventual acquisition by the Fish and Wildlife Service and at considerable financial sacrifice.

I am extremely grateful to the distinguished chairman and ranking minority member of the subcommittee on Interior Appropriations and the distingushed chairman and ranking minority member of the Appropriations Committee for acting to preserve the rich legacy which Americans will have in Mason's Neck National Wildlife Refuge. Without their foresight, financial pressure on the landowners to sell would prevail after 15 years, and we would lose Mason's Neck as a sanctuary for the bald eagle within a year.

I also express my appreciation to the numerous individuals and groups of concerned citizens in my district who wrote to the subcommittee, worked with me on the project, and made known the overwhelming support in northern Virginia for the completion of this refuge. Their efforts were especially gratifying to me, because when Fairfax County first approved a cooperative effort between the Northern Virginia Regional Park Authority, the Virginia Department of Parks, and the U.S. Fish and Wildlife Service for the acquisition and management of Mason's Neck, I was on the board of supervisors working in support of the plan.●

Mr. YATES. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. The Clerk will read.

The Clerk proceeded to read the bill.

Mr. YATES (during the reading). Mr. Chairman, I ask unanimous consent that the bill be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The CHAIRMAN. Are there any points of order against the bill? The Chair hears none.

Are there any amendments?

AMENDMENT OFFERED BY MR. GUNDERSON

Mr. GUNDERSON. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

UNITED STATES FISH AND WILDLIFE SERVICE

RESOURCE MANAGEMENT

For expenses necessary for scientific and economic studies, conservation, management, investigations, protection, and utilization of sport fishery and wildlife resources, except whales, seals, and sea lions, and for the performance of other authorized functions related to such resources; for the general administration of the Fish and Wildlife Service; for maintenance of the herd of long-horned cattle on the Wichita Mountains Wildlife Refuge, $242,778,000; of which $4,000,000, to carry out the purposes of 16 U.S.C. 1535, shall remain available until expended.

The Clerk read as follows:

Amendment offered by Mr. GUNDERSON: On page 7, line 13, strike "$242,778,000" and insert in lieu thereof "$244,151,000".

On page 7, line 15, after the period add the following new sentence: "No funds appropriated by this Title shall be obligated or expended to close any of the following fish hatcheries prior to March 31, 1983 or the date on which the United States Fish and Wildlife Service determines that the benefit/cost ratio of that fish hatchery is among the eleven lowest benefit/cost ratios of fish hatcheries operated by the United States Fish and Wildlife Service, whichever date is later: Norfolk, Arkansas; Welaka, Florida; Chatahoochee Forest, Georgia; Ennis, Montana; Mescalero, New Mexico; Pisgah Forest, North Carolina; Orangeburg, South Carolina; Jones Hole, Utah; Paint Bank, Virginia, Genoa, Wisconsin, and Saratoga, Wyoming."

Mr. YATES (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. GUNDERSON. Mr. Chairman, first of all, I would like to commend the chairman of the subcommittee, the gentleman from Illinois (Mr. YATES), and the ranking member of the subcommittee, the gentleman from Pennsylvania (Mr. MCDADE), for the thorough and expeditious manner in which this legislation has been brought to the floor.

I am, however, concerned about that section of the bill and the corresponding language in the committee report that would close a number of fish hatcheries operated by the U.S. Fish and Wildlife Service around the country.

As many of us remember, in its budget message the administration requested closing 31 of these fish hatcheries as a means to reduce Federal spending by some $3.7 million.

Following that request, the Fish and Wildlife Service submitted a list of recommended hatchery closings based on two criteria: First, cost of maintenance and rehabilitation for normal output; and second, percentage of fish production that goes for private and State waters without Federal benefit.

After subcommittee review, this list was altered—some hatcheries on the Fish and Wildlife list were spared and 11 different hatcheries were scheduled for closing. One of those hatcheries added to the list by the subcommittee for closing is located in my district in Genoa, Wis.

Mr. Chairman, it would be very easy for every Member who has a fish hatchery in his district scheduled for closing to take the well and argue the importance of that hatchery to his district and the country. We could be here all day and into the weekend if we were to take that approach.

My amendment takes a far simpler and what I believe to be a far more sensible approach to this dilemma. It would provide funding for the 11 hatcheries added to the list of closings by the subcommittee through March 31, 1983.

During this time, the Fish and Wildlife Service is to examine the benefit/cost ratio for these 11 offices and compare it to the benefit/cost ratios of its other hatcheries throughout the country.

If one of these 11 hatcheries has a benefit/cost ratio that is among the 11 lowest in the country, the Fish and Wildlife Service may close the hatchery. If not, it must remain open.

It seems to me that this is the fairest way to proceed—we achieve a budget savings by closing the least cost-effective facilities and insure that the most efficient and effective hatcheries remain in operation for the benefit of our Nation.

I know that I am not alone in my concern about the closing of these hatcheries.

□ 1110

Mr. HENDON. Mr. Chairman, will the gentleman yield?

Mr. GUNDERSON. I yield to the gentleman from North Carolina.

Mr. HENDON. I thank the gentleman for yielding.

My friend has as always very adequately stated his case. It is a strong case, Mr. Chairman, for reconsideration of these critically important facilities.

I commend the importance of these hatcheries to the ranking member, to our distinguished chairman, and to the conferees.

Mr. SKEEN. Mr. Chairman, will the gentleman yield?

Mr. GUNDERSON. I yield to the gentleman from New Mexico.

Mr. SKEEN. I thank the gentleman for yielding.

I, too, want to support the gentleman from Wisconsin and to say even though I am not going to raise the question about the Mescalaro, I understand the intention of the committee, and I respect that very much, is to let the BIA take over the funding of this particular one.

But I do want to make this one point. In this particular case I think that the committee viewed the Mescalaro as one that served only that immediate area on the Indian reservation. This is not true. It does serve a very large resort area in the middle of my district. I would like to make that point. I will try to pursue this further. But I do support the thrust of the gentleman's amendment.

Mr. GUNDERSON. I thank the gentleman for his remarks.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. GUNDERSON. I yield to the gentleman from Illinois.

Mr. YATES. I thank the gentleman for yielding.

I think the gentleman makes a very valid point. The committee received a request from the administration to close a number of hatcheries. We did not comply with the full request of the administration because we know of the importance of the hatcheries.

The question of determining which hatcheries to close was a very difficult one. It troubled the committee in many respects.

I think the gentleman has made a valuable contribution by bringing this matter to the floor and expressing his feelings.

In the interests of time, we just cannot review each of the decisions. I would like to assure the gentleman, as I am sure my friend from Pennsylvania would, that we tried very conscientiously to come to the right conclusion on this. I want to assure him and all the Members who are interested in this that we do intend to review the criteria, the selection process, during the conference with the Senate. We will take advantage of the gentleman's suggestion.

Mr. GUNDERSON. I appreciate the gentleman's remarks.

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. GUNDERSON. I yield to the gentleman from Pennsylvania.

Mr. McDADE. I appreciate my colleague yielding.

I want to say to him I applaud him for raising this issue. It is a very important one. The subcommittee, as the chairman has said, has seriously considered the question of whether or not to close certain hatcheries or to give the States complete jurisdiction in that regard.

As such, our committee has reviewed the proposed closings recommended by the Fish and Wildlife Service and indeed we have made some alterations. Yet we realize that many Members, including the gentleman in the well, have concerns about the criteria used to reach these decisions. Other Members have concerns as well and would like further discussion of the selection process.

Thus on behalf of our side of the aisle, I want to pledge to my colleague and to the other Members who have expressed their concern that the list scheduled for closing and the priorities for evaluation will once again be reviewed as we take this bill to conference with the Senate.

The CHAIRMAN. The time of the gentleman from Wisconsin (Mr. GUNDERSON) has expired.

(By unanimous consent, Mr. GUNDERSON was allowed to proceed for 1 additional minute.)

Mr. GUNDERSON. Mr. Chairman, I would like to thank both the ranking member and the ranking subcommittee member for their remarks. Based on their assurances it will be reviewed in the conference committee, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

AMENDMENT OFFERED BY MR. WEAVER

Mr. WEAVER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WEAVER: Page 65, after line 23, title III, add a new section:

"Any interest earned by a political subdivision of a State on sums paid to such political subdivision by such State between October 1, 1979 and September 30, 1982, from amounts paid to such State under the provisions of the last paragraph under the head "Forest Service." of the Act of May 23, 1908 (16 U.S.C. 500), and of section 13 of the Act of March 1, 1911 (16 U.S.C. 500), may be expended for any public purpose as such political subdivision prescribed."

Mr. YATES (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. WEAVER. Mr. Chairman, historically, timber recipients have been deemed "grants-in-aid." This was established in a 1923 Supreme Court (U.S.) opinion.

Section 203 of the Intergovernmental Cooperation Act of 1968 provides that "States shall not be accountable for interest earned on grant-in-aid funds, pending their disbursement for program purposes."

In 1973, the Comptroller General of the United States held that this provision of law applies equally to counties as to subgrantees of States.

However, since the 1968 act was not express as to the ability of counties, as well as States, to utilize the interest earned on these payments, and since a Comptroller General's opinion is not binding on State courts, Federal law does not preempt contrary State law.

Last spring an Oregon court ruled that since congressional intent on the issue was not clear, counties in Oregon could not use the interest for their general operations.

The purpose of this amendment is to clarify congressional intent on the issue and to insure that counties and other political subdivisions of States are able to have these interest revenues available for use where they are most urgently needed in these tough economic times, as is consistent with the Comptroller General's interpretation of the 1968 law.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I yield to the gentleman from Illinois.

Mr. YATES. I thank the gentleman for yielding.

I have had an opportunity to review the amendment on this side, and I discussed it with the gentleman from Oregon (Mr. AUCOIN), who also has expressed an interest in this amendment.

Mr. AUCOIN. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I yield to the gentleman from Oregon.

Mr. AUCOIN. I appreciate the gentleman yielding.

I am delighted to hear that the chairman of the subcommittee understands the sensitivity of the problem that the gentleman, my colleague from Oregon, addresses in his amendment. I hope we can quickly dispense with it. It is worthy.

Mr. YATES. Mr. Chairman, I want to assure the gentleman, as far as this side is concerned, we are willing to accept the amendment and take it to conference.

Mr. WEAVER. I thank the chairman very much.

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. WEAVER. I yield to the gentleman from Pennsylvania.

Mr. McDADE. Mr. Chairman, I would say to my colleague he brought this to my attention a few moments ago. He is always diligent in looking after these matters.

I have no objection to putting it in the bill at this point.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oregon (Mr. WEAVER).

The amendment was agreed to.

Mr. FISH. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of the Interior appropriations bill for fiscal year 1983. In particular, I am in strong support of the portion of this legislation relating to the Department of Energy's fossil and conservation programs. These programs are extremely important in helping our Nation reduce its reliance on foreign oil and to insure our energy security in the future.

As my colleagues are fully aware, budgetary pressures have presented us with many difficult decisions this year. However, I believe that it is vital for our Nation to continue to press forward with the development of promising new energy technologies. Indeed we neglect them as our peril. Few priority programs measure up to the importance of energy research and development.

Against this background, I would like to commend the distinguished chairman of the subcommittee (Mr. YATES) and the gentleman from Pennsylvania (Mr. MCDADE) for the fine piece of legislation that is before us today. They have recommended a well balanced energy program that will help us take advantage of many of our promising energy options. This legislation is consistent with the recommendations of the Energy Development and Applications Subcommittee, on which I am the ranking minority member.

In the fossil area, they have recommended a strong program that will help our Nation development an adequate technology base for developing our coal, oil, and gas reserves. Many important activities stand out, but I would like to mention just a few. Funding is included for the 4.8 megawatt fuel cell demonstration in New York City. Fuel Cells offer a promising electric generator option, with multifuel capabilities and low air emissions. In addition, aggressive heat engine and combustion systems programs are recommended. The magnetohydrodynamics (MHD) program is also funded at a level that will allow us to continue to develop this technology.

In the conservation area, my subcommittee has heard a great deal of testimony indicating that conservation is the most immediate and cost-effective means to reduce our reliance on foreign oil supplies. Most compelling were the findings of a recent report from the prestigious Energy Research Advisory Board. In reviewing Federal energy R&D priorities, this panel concluded that funding for conservation was too low in view of its "potential for energy improvements and the inability of many important energy-consuming sectors to conduct R&D."

The legislation before us today will strongly support our conservation programs. I am especially pleased to see that it maintains our residential, commercial, industrial and transportation R&D programs. According to testimony before our Energy Subcommittee, the potential for new technologies in these areas is extremely promising. We can and should build upon the achievements in residential conservation of recent years. In addition, over $147 million is provided for weatherization.

One area of concern to me has been the urban waste program. This program has been aimed at developing technologies to convert our cities' garbage into useful energy. While I am pleased to see that $3 million is recommended for fiscal year 1983, I would hope that this funding could also be used for some commercial-scale R&D activities. This would help our cities in their efforts to tap the potential of this energy resource. I strongly encourage that we move this program in this direction and to help us utilize the great promise of our "garbage" energy in the near term.

Mr. Chairman, we cannot afford to be lulled into a false sense of security by our current energy situation. The economic impacts of another oil interruption would be staggering. We must continue to plan for our energy future. The legislation before us does just that.

Mr. Chairman, I would like to ask the distinguished chairman (Mr. YATES) about his recommendations on the urban waste program.

I understand that the proposed funding would be used to help solve the problems facing all urban waste processes, such as corrosion problems and emissions control. In this regard, I would like to ask the gentleman from Illinois as to whether it is his intention that this language would also cover conventional municipal waste-to-energy approaches, such as the direct burning techniques that are now in use. Many of these conventional approaches also face problems, whether it be institutional socioeconomic, or whatever. As the chairman may know, Dutchess County, N.Y., is planning to build a first generation urban waste-to-energy system. I would hope that his funding could be used to support innovative projects like the one in Dutchess County in helping them overcome the problems they may face down the line.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from Illinois.

Mr. YATES. I thank the gentleman for yielding.

First, let me commend the gentleman for his knowledge, his expertise, and the fine work that he has done in the general field of energy, and particularly in the field of making fuel from waste materials.

Responding to this specific question, let me say that the urban waste program does offer a potential for making fuel from waste, which would otherwise be discarded and is very important in terms of our future energy needs.

The legislation that we have includes $3 million to support that program.

We intend to support program activities to help solve all the problems which face urban waste energy technologies. We wish that the administration would provide more funding for programs of this kind. And we will include funds for technical institutional problems. But I would like to point out to the gentleman that we cannot assure direct financial support for purely commercial undertakings. I am sure he appreciates that.

□ 1120

Mr. FISH. I do, and I thank the distinguished chairman for his guidance on this program. I believe that the urban waste program shows great promise for helping our Nation reduce its reliance on foreign oil. The legislation before us today will allow us to move forward aggressively in this area.

Mr. ROSE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I want to bring to the attention of the House the matter of the Indian education funding in title IV of this legislation. The last year appropriation level, the 1982 appropriation level for this very important program was $77 million. The administration recommended that it be cut to $51 million. Through the good work and the efforts of the committee, this has been restored to some $65 million.

I want to thank the chairman and the members of the committee on both sides of the aisle for working out this compromise. While I had hoped that the cut could be totally restored to last year's appropriation level of $77 million, because of the importance of this Indian Education Act funding, I am realistic enough to realize that this is great progress in the face of the position of our administration.

Indian education funding in my congressional district funds some 25 separate projects. It is extremely important to the State of North Carolina and to the many thousands of young children who benefit from this program.

I would like to ask the chairman of the committee, the gentleman from Illinois, who has done such a good job in restoring this funding and to urge him to do all that he possibly can in conference to maintain the level that has been struck at this time.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. ROSE. I am happy to yield.

Mr. YATES. Well, first, I want to commend the gentleman for his outstanding work in the field of Indian education and for his support of this program.

Our committee does support the program. We recognize the great problems that the Indian community has in trying to overcome the lack of Federal funding for educating their young children in primary and secondary schools. These funds are very much needed.

I wish that our section 302 allocation had permitted us under the Budget Act to restore the full funding. We did provide an additional $14 million for that purpose.

I think the administration must believe that the States could take up the slack.

The gentleman from North Carolina and the gentleman from Minnesota (Mr. SABO) both called this matter to the attention of our subcommittee and when I discussed it with the gentleman from Minnesota and suggested the possibility of the State putting into the budget the additional funds that the program should have, he said that Minnesota finds itself with a $375 million deficit at the present time and it has so many needs that it just cannot put the necessary funds into this program.

We have tried to help as we can. I want to assure the gentleman that I will certainly do everything that I can to protect this level and if the Senate decides to put extra money in, we will consider the possibility of putting extra funds in as well.

Mr. ROSE. I thank the gentleman for his assurances.

I had an amendment that I had prepared that would restore the original $77 million level, but because of the chairman's assurances that he has just given to me, I will not offer that amendment. I thank the gentleman for what he has had to say.

Mr. AUCOIN. Mr. Chairman, will the gentleman yield to me?

Mr. ROSE. I yield to the gentleman.

Mr. AUCOIN. Mr. Chairman, I want to thank the gentleman in the well for his interest in this subject, too.

I have sat in on hearings on this matter as a member of the committee. I am struck by the fact that very few people outside the Indian communities themselves care to take the time to find out how very real and how very deep the problems are.

The gentleman in the well obviously does understand and this Member also does. I want him to know to what extent I can be helpful, I certainly intend to do so.

Mr. WILLIAMS of Montana. Mr. Chairman, will the gentleman yield?

Mr. ROSE. I yield to my friend, the gentleman from Montana.

Mr. WILLIAMS of Montana. Mr. Chairman, I, too, want to thank the gentleman for his concern and his leadership on this critical matter.

The American people should know, as we do, that American Indians have the lowest level of education of any people in this country. Everyone knows that 10.4 or 10.5 percent unemployment is an outrage, but the fact is that on many of our Indian reservations the unemployment rate is above 80 percent. We all know that unemployment, joblessness, lack of being able to secure a good job, is due to a lack of education.

The fact is that Indian education is finally beginning to work in this country.

The CHAIRMAN. The time of the gentleman from North Carolina has expired.

(At the request of Mr. WILLIAMS of Montana, and by unanimous consent, Mr. ROSE was allowed to proceed for 2 additional minutes.)

Mr. WILLIAMS of Montana. Mr. Chairman, if the gentleman will yield further, Indian student dropout rates are finally beginning to decrease. The number of Indian youth now attending college is increasing. The number of Indian teachers and Indian lawyers is on the increase. Much of that can be attributed to the genuinely successful focusing of proper education programs for Indians.

So the gentleman raises a matter that is absolutely vital to all the people of America, but particularly the first Americans.

I thank the gentleman for his leadership.

Mr. ROSE. Mr. Chairman, I thank all my colleagues for their comments.

I think the subcommittee does realize that we are very concerned about this program, just as they have expressed their concern.

With their assurance that they will hold the line as best they can on the level of funding that is provided and, if possible, go above that in conference, I will not offer my amendment for the full cut restoration.

AMENDMENT OFFERED BY MR. MARLENEE

Mr. MARLENEE. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

ADMINISTRATIVE PROVISIONS

Appropriations and funds available to the United States Fish and Wildlife Service shall be available for purchase of not to exceed 124 passenger motor vehicles of which 113 are for replacement only (including 46 for police-type use); purchase of 4 new aircraft as additions; not to exceed $200,000 for payment, at the discretion of the Secretary, for information, rewards, or evidence concerning violations of laws administered by the United States Fish and Wildlife Service and miscellaneous and emergency expenses of enforcement activities, authorized or approved by the Secretary and to be accounted for solely on his certificate; insurance on official motor vehicles, aircraft, and boats operated by the United States Fish and Wildlife Service in Mexico and Canada; repair of damage to public roads within and adjacent to reservation areas caused by operations of the United States Fish and Wildlife Service; options for the purchase of land at not to exceed $1 for each option; facilities incident to such public recreational uses on conservation areas as are not inconsistent with their primary purpose; and the maintenance and improvement of aquaria, buildings, and other facilities under the jurisdiction of the United States Fish and Wildlife Service and to which the United States has title, and which are utilized pursuant to law in connection with management and investigation of fish and wildlife resources: *Provided*, That all refuges within the National Wildlife Refuge System must be managed in accord with the provisions of the National Wildlife Refuge System Act (16 U.S.C. 668dd-668ee): *Provided further*, That no funds may be used to plan for, conduct or supervise hunting on the Bosque del Apache National Wildlife Refuge when whooping cranes are on the refuge: *Provided further*, That the national fish hatchery at Tupelo, Mississippi, shall hereafter be named the "Private John Allen National Fish Hatchery".

The Clerk read as follows:

Amendment offered by Mr. MARLENEE: On Page 9, line 12,

Strike "*Provided*," and all that follows through the colon on line 15.

Mr. MARLENEE. Mr. Chairman, under the title "Fish and Wildlife and Parks," I refer to the section "Administrative Provisions." On page 9, lines 12 through 15, I move to delete beginning with the word "*Provided*" on line 12 and proceeding through the colon on line 15.

I offer this amendment because it would enter and change an ongoing court case that is presently on appeal to the circuit court of appeals in San Francisco involving the Charles M. Russell National Wildlife Refuge in Montana.

I have discussed this amendment with Interior Subcommittee Chairman Mr. YATES and with the ranking minority member, Mr. MCDADE, and would hope they concur since the effect of the language in this bill as presently written would affect this court case. My amendment would remove this language and thus would not interfere in this ongoing litigation.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. MARLENEE. I am happy to yield to the distinguished chairman.

Mr. YATES. Mr. Chairman, this side has had the opportunity to examine the gentleman's amendment. We think it is a worthy amendment and we are willing to accept it.

Mr. McDADE. Mr. Chairman, will the gentleman yield to me?

Mr. MARLENEE. I am happy to yield to the gentleman.

Mr. McDADE. Mr. Chairman, I want to commend my colleague for his diligence in bringing this to our attention.

I agree with the chairman. This is a meritorious amendment. We are delighted to accept it and congratulate the gentleman for the work he has done.

Mr. MARLENEE. I appreciate that and I thank the chairman and the ranking minority Member.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Montana (Mr. MARLENEE).

The amendment was agreed to.

Mr. LAGOMARSINO. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to ask the chairman of the subcommittee a question, if I might.

I note that in the bill, there is no provisions for the Channel Islands National Park acquisition, nor is there any mention of it in the committee report.

I understand also that the administration did not make such a request for the fiscal year we are considering.

Am I correct in my understanding that under the bill, that the administration could use funds that are provided in the bill for acquisition of land in the Channel Islands if they decide to do so?

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. LAGOMARSINO. I will yield.

Mr. YATES. The committee of the Congress provided $3,600,000 in fiscal year 1982 and that money is still available.

In addition to that money, the funds that the committee has placed in this bill for acquisition could be used for the Channel Islands if the administration decided to do so.

Mr. LAGOMARSINO. Mr. Chairman, I thank the gentleman.

AMENDMENT OFFERED BY MR. COURTER

Mr. COURTER. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

SEC. 107. No funds provided in this title may be expended by the Department of the Interior for the procurement, leasing, bidding, exploration, or development of lands within the Department of the Interior Central and Northern California Planning Area which lie north of the line between the row of blocks numbered N808 and the row of blocks numbered N809 of the Universal Transverse Mercator Grid System.

The Clerk read as follows:

Amendment offered by Mr. COURTER: Page 33, after line 22, insert:

SEC. 108. No funds provided in this title may be expended by the Department of the Interior for the procurement, leasing, bidding, exploration, or development of the following tracts within the Block, Hudson, Toms, Carteret, Lindenkohl, Spencer, Wilmington, Baltimore, Washington, or Norfolk Canyons of Outer Continental Shelf Lease Sale Numbered 76: Block Canyon, NK 19-10: 945, 946, 989, 990; Hudson Canyon, NJ 18-3: 290, 291, 334, 335, 336, 379, 380, 423-427, 467-471, 513-515, 558, 559; Toms Canyon, NJ 18-3: 815, 859; Lindenkohl Canyon, NJ 18-6: 193-194; Wilmington Canyon, NJ 18-6: 491, 492, 535, 536, 579, 580, 624; Baltimore Canyon, NJ 18-6: 750, 751, 794, 838, 882, 883; Washington Canyon, NJ 18-8: 515, 516, 559, 560, 604; and Norfolk Canyon, NJ 18-8: 907, 908, 909, 951, 952, 953, 997.

And redesignate the following sections accordingly.

Mr. COURTER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. COURTER. Mr. Chairman, I would like to offer an amendment to the Interior appropriations bill which concerns 60 canyon head tracts to be offered for sale as a small part of the Outer Continental lease sale numbered 76 in April 1983. This mid-Atlantic region lease sale includes a total of 4,325 tracts and my amendment is specifically addressing 60 tracts of this sale, only 1.5 percent of the total amount of tracts being offered. Although these canyon head tracts are located within 10 different canyons, my amendment addresses only those tracts in these canyons which are located on canyon heads.

Canyon head tracts are known to be extremely sensitive areas. The New Jersey Department of Environmental Protection has determined that these canyon head tracts are vital to both the economy and the environment of New Jersey's resources. The Department of Interior has included in their draft environmental impact statement on this lease sale an alternative that recommends deletion of these tracts because of their biological importance. In addition, a study is currently being conducted to determine the oceanographic processes at canyon heads.

I prefer to err on the side of caution and conserve prudently offshore fisheries habitat and fishing grounds by taking steps to reduce the potential for adverse effects on these habitats and fishing grounds. My amendment will prohibit funds being expended for the lease, sale, or exploration of these 60 canyon head tracts which will clearly reduce the impacts on these biological resources.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. COURTER. I am happy to yield.

Mr. YATES. I have had an opportunity to examine the gentleman's amendment. I think it is a good amendment and our side is willing to accept it.

Mr. COURTER. I thank the gentleman very much.

Mr. McDADE. Mr. Chairman, will my colleague yield to me?

Mr. COURTER. I yield to the distinguished gentleman.

Mr. McDADE. Mr. Chairman, I congratulate my colleague for his efforts on this amendment. We are willing to accept it, too, and we urge its approval.

Mr. COURTER. I thank the gentleman very much. I appreciate that.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. COURTER).

The amendment was agreed to.

□ 1130

Mrs. BOGGS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to commend the committee for their very, very fine help to all of the national parks of this country and for their protection and promotion of them. I would like especially to commend them for their continued protection and promotion of the Jean LaFitte Park.

We have a situation that has arisen, Mr. Chairman, in the Jean LaFitte Park complex. At the heart of the Jean LaFitte Park is a Barataria unit which contains the only totally contained ecosystem in the whole coastal region of the delta. We have been very, very fortunate that this committee and this Congress has allowed us to have land acquisition and to go forward with the planning of the Barataria unit.

We now have a situation where we need some accelerated work done at the Barataria unit because Louisiana is hosting the 1984 World's Fair, which is dedicated to water as a source of life, and to the great rivers of the world. We feel that the Bartaria unit of the Jean LaFitte Park will have special interest to the fairgoers.

Unfortunately, the Delta Regional Commission, which is an advisory group, and the Park Service and the fair exposition group did not get the request in to us in time to be able to have the request answered in this particular bill that is before us now.

I would like to ask the chairman of the subcommittee, the gentleman from Illinois, Mr. YATES, if he would be agreeable, if there is an amendment which is offered in the Senate, if the amount is contained within the Senate bill for some construction moneys to be spent, where the plans are already finalized and approved, where the environmental impact statements are approved, the Delta Regional Commission has approved them, the National Park Service superintendent has approved them, if we would be able to use $2,100,000 in construction grant money to make the services available to the people who would be coming to the World's Fair in 1984 at the Barataria unit?

Mr. YATES. Mr. Chairman, will the gentlewoman yield?

Mrs. BOGGS. I am happy to yield to the gentleman from Illinois.

Mr. YATES. I thank the gentlewoman for yielding to me.

Mr. Chairman, first let me commend the gentlewoman for her encomiums addressed to this committee; rather, the praise should be accorded to her as one who always takes care of the best interests of Louisiana, and particularly the area surrounding New Orleans.

Let me say that we have not had an opportunity to look into the matter that the gentlewoman has brought to the attention of the committee, but from her summary of what has happened, it seems like a very good purpose and certainly if the money is inserted in the Senate we will give it every consideration.

Mrs. BOGGS. I thank the chairman.

Mr. McDADE. Mr. Chairman, will the gentlewoman yield to me?

Mrs. BOGGS. I yield to the gentleman from Pennsylvania.

Mr. McDADE. I thank the gentlewoman for yielding.

Mr. Chairman, I want to commend my colleague on the Appropriations Committee, the gentlewoman from Louisiana, for her usual attention to detail and assure her that she will receive every consideration from this side of the aisle as well. We are grateful for her input and for her guidance.

Mrs. BOGGS. I thank the gentlemen very much and I invite all of my collegues to come down to the Bartaria unit during the World's Fair.

Mr. Chairman, I move to strike the last word.

Mr. Chairman, I desire at this time to thank my friend, the chairman of the subcommittee, the gentleman from Illinois (Mr. YATES) and the members of this committee for providing funds for the Tupelo fish hatchery which they have named the Pvt. John Allen Fish Hatchery, to be hereby referred to by that name. This fish hatchery, located at Tupelo, Miss., in my district, has been in existence for a long time. It has gone down in history because of the speech "Private John" Allen made in the Congress to obtain funds for the hatchery.

Mr. Allen, perhaps the greatest humorist ever to serve in this body, after referring to Tupelo as the center of the universe, for "you can stand in the court house square and the horizon seems to be equidistant, any direction you look." Actually, he said the Civil War was fought over who would have possession of Tupelo; when Ponce De Leon, he said, in his search for the fountain of youth discovered Florida, he was seeking Tupelo.

Columbus, in persuading Ferdinand and Isabella of Spain to finance his expedition that led to the discovery of America, assured them that an all-wise Creator, creating a world like this, was bound to have made somewhere near its center such a place as Tupelo . . .

He concluded—

Why sir, fish will travel over land for miles to get to the water we have at Tupelo. Thousands and millions of unborn fish are clamoring to this Congress today for an opportunity to be hatched at the Tupelo hatchery.

You may be interested in how Pvt. John Allen got his name.

According to the historian, George Stimpson, "Private John" was the familiar name of John Mills Allen (1846–1917) of Tupelo, Miss., who served throughout the Civil War as a private in the Confederate Army, and who later became a successful lawyer. In 1884 Allen and a former Confederate general named Tucker both sought the Democratic nomination for the seat in Congress that had been occupied since 1877 by Col. Henry Lowndes Muldrow. On one occasion, when the candidates spoke from the same platform, General Tucker wound up his appeal to the voters in words substantially as follows:

Twenty years ago last night, my fellow citizens, after a hard fought battle on yonder hill, I bivouacked under yonder clump of trees. Those of you who remember, as I do, the time that tried men's souls will not, I trust, forget your humble servant on election day.

In reply Allen said:

What General Tucker says to you about having bivouacked in yonder clump of trees on that night is true. It is also true that I was vidette picket and stood guard over him while he slept. Now then, fellow citizens, all of you who were generals and had privates to stand guard over you while you slept, vote for General Tucker, and all of you who were privates and stood guard over the generals while they slept, vote for Private John Allen.

The voters chose Pvt. John Allen and continued to do so until he retired from Congress 16 years later.

Mr. Chairman, again I appreciate the committee's recognition of what this facility does mean to the people. Commercial food fish production has become a great industry in my State as in many others. Truly it is important to continue to support this and other hatcheries.

Mr. YATES. Mr. Chairman, I move to strike the last word.

Mr. LUNDINE. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from New York.

Mr. LUNDINE. I thank the gentleman for yielding.

Mr. Chairman, I would like to call the attention of the chairman to a situation which has arisen rather quickly with respect to the U.S. Forest Service.

They have issued a press release indicating an interest in disposing of what are categorized as surplus Federal land. They indicate that normal procedures and hearings will be followed for all of those lands except a tract in New York, and one in California.

The tract in New York is known as the Hector Grazing Lands and it is serving an important public purpose in the view of most of those people who have been in the area. This is in a region which has been represented by my colleague, the gentleman from New York, GARY LEE, and in the future will be represented by my colleague, FRANK HORTON, and by myself.

We feel that the normal procedures for the disposition of land should apply to the Hector lands, as well as to others, before they are taken out of public ownership and made a part of any such sale.

No formal hearings have been held on this. I would like to inquire of the chairman whether it is the intention of the committee that no funds in this appropriations bill should be spent on advertising and disposing of lands without following the usual procedure, particularly with regard to the Hector lands?

Mr. YATES. The gentleman has brought this problem to the attention of the committee and the committee does believe that the Forest Service should follow a uniform system of disposing and taking care of its units.

Certainly the problem raised by the gentleman from New York is one that will have the attention of the committee and this brings to the attention of the Forest Service that it should follow the uniform and prescribed procedures in that area and all areas.

Mr. HORTON. Mr. Chairman, will the gentleman yield to me?

Mr. YATES. I yield to the gentleman from New York.

Mr. HORTON. I thank the gentleman for yielding.

Mr. Chairman, the Hector land use that has been referred to is not in my present congressional district, but under reapportionment it will be in my new district, the 29th Congressional District of New York, portions of it.

I am meeting with the people in the area. I am deeply concerned also about the matter of the disposition of that land. It is my position that the land should not be disposed of.

The entire New York delegation, and I am the vice chairman of the New York delegation, the bipartisan delegation, has indicated its support for this position in the past, and I feel that it is important that there be some assurances given that this proposed transfer will not be done without the prescribed procedures.

□ 1140

I would also like to ask the ranking minority member on this side of the aisle, the gentleman from Pennsylvania (Mr. McDADE) what his view is with regard to this situation in addition to what has already been said by the chairman of the subcommittee.

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield.

Mr. McDADE. Mr. Chairman, I want to thank my colleagues for bringing this to our attention. I want to assure my colleagues that we are grateful for their interest. We were not aware of the fact that the Forest Service was not following the usual procedure with respect to disposition of public lands. I agree with the chairman completely, that we will exercise full oversight, and that we intend that no funds be spent to engage in practices that do not conform to proper procedures. We will look at it completely and try to bring the Forest Service up for a hearing.

Mr. HORTON. I thank the gentleman.

AMENDMENT OFFERED BY MR. SKEEN

Mr. SKEEN. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

ADMINSTRATIVE PROVISIONS

Appropriations and funds available to the United States Fish and Wildlife Service shall be available for purchase of not to exceed 124 passenger motor vehicles of which 113 are for replacement only (including 46 for police-type use); purchase of 4 new aircraft as additions; not to exceed $200,000 for payment, at the discretion of the Secretary, for information, rewards, or evidence concerning violations of laws administered by the United States Fish and Wildlife Service and miscellaneous and emergency expenses of enforcement activities, authorized or approved by the Secretary and to be accounted for solely on his certificate; insurance on official motor vehicles, aircraft, and boats operated by the United States Fish and Wildlife Service in Mexico and Canada; repair of damage to public roads within and adjacent to reservation areas caused by operations of the United States Fish and Wildlife Service; options for the purchase of land at not to exceed $1 for each option; facilities incident to such public recreational uses on conservation areas as are not inconsistent with their primary purpose; and the maintenance and improvement of aquaria, buildings, and other facilities under the jurisdiction of the United States Fish and Wildlife Service and to which the United States has title, and which are utilized pursuant to law in connection with management and investigation of fish and wildlife resources: *Provided,* That all refuges within the National Wildlife Refuge System must be managed in accord with the provisions of the National Wildlife Refuge System Act (16 U.S.C. 668dd-668ee): *Provided further,* That no funds may be used to plan for, conduct or supervise hunting on the Bosque del Apache National Wildlife Refuge when whooping cranes are on the refuge: *Provided further,* That the national fish hatchery at Tupelo, Mississippi, shall hereafter be named the "Private John Allen National Fish Hatchery".

The Clerk read as follows:

Amendment offered by Mr. SKEEN: Page 9, line 16, after "no funds may be used to plan for" strike out ", conduct or supervise".

● Mr. SKEEN. Mr. Chairman, New Mexico hunters have enjoyed an annual 16-day (eight weekends) snow goose hunt under a cooperative agreement between the U.S. Fish and Wildlife Service and the new Mexico Game and Fish Commission. The arrangement includes a careful monitoring of the whooping cranes so that all shooting is kept away from the crane's roost area and is ended whenever any crane takes flight. The fiscal year 1983 Interior appropriations bill would have provided that:

No funds may be used to plan for, conduct or supervise hunting on the Bosque del Apache National Wildlife Refuge when whooping cranes on the refuge.

This would have prohibited refuge employees from supervising the activities of hunters on the borders of the refuge and put the whooping crane flock in danger.

The fact is that there has never been a whooping crane goose hunt, but there is no way anyone could have guaranteed this would be the case without close supervision. As things now stand, New Mexican sportmen will be able to continue the orderly harvest of the geese and help protect the feeding grounds of the cranes.

My amendment will allow an annual snow goose hunt to continue at the Bosque del Apache Wildlife Refuge while at the same time protecting the endangered whooping cranes that winter at the refuge.

The original bill would not have ended the goose hunt but would have taken away the protection the whooping cranes now have. We are able to take care of both of those concerns with one amendment.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. SKEEN. I yield.

Mr. YATES. Mr. Chairman, the gentleman was kind enough to discuss the problem of the hunt on the Bosque del Apache National Wildlife Refuge, which is a winter breeding area for whooping cranes. It is a very complex problem, and I want to commend the gentleman for bringing it to our attention and for helping to work it out.

We think he has presented an amendment that will permit us to work it out, and we are willing to accept it on our side.

Mr. SKEEN. I thank the Chairman.

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. SKEEN. I yield to the gentleman.

Mr. McDADE. Mr. Chairman, I would like to join in commending my colleague for bringing this to the attention of our committee. He does so in a very constructive manner, and the amendment expresses to us, I think, his very appropriate and helpful manner. We are delighted on this side to join in recommending its adoption.

Mr. SKEEN. I thank the chairman and ranking minority member of the committee. It is a very delicate problem for us, and I do appreciate the consideration these gentlemen have given to me.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Mexico (Mr. SKEEN).

The amendment was agreed to.

Mrs. SCHROEDER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise to commend Chairman YATES for his excellent work on this bill. I want to discuss just one example. On pages 45 and 46 of the committee report, the Appropriations Committee expresses concern about the increased costs and decreased productivity of the Office of Surface Mining following Secretary Watt's politically motivated reorganization announced in May 1981. The committee asks the Department of the Interior for a report on the costs and savings from the reorganization.

I had similar concerns and wrote Secretary Watt on August 5, 1982, requesting information about the effect of the reorganization on the staff of OSM. The Department submitted its final answer on September 30, 1982. After analyzing this information, with the assistance of the Environmental Policy Center, I wrote to Secretary Watt on October 28, 1982. Since the text of my letter is relevant to the points raised in the Appropriations Committee report, I place it into the RECORD at this point. Incidentally, Secretary Watt never responded to this letter.

SUBCOMMITTEE ON CIVIL SERVICE,
Washington, D.C., October 28, 1982.

Hon. JAMES G. WATT,
Secretary of the Interior,
Department of the Interior,
Washington, D.C.

DEAR MR. SECRETARY: Last June, shortly following the announcement of the reorganization plan for the Office of Surface Mining (OSM), the House Subcommittee on Civil Service held a hearing in Denver. At that time, I expressed serious doubts about OSM's claims that this reorganization would save the Federal government millions of tax dollars while at the same time increasing OSM's efficiency and output. Rather, I feared that this ill-conceived plan would waste taxpayers money.

The Subcommittee on Civil Service is presently continuing its analysis of the OSM reorganization, now that the reorganization has been completed. The current information provided to my staff by OSM regarding various personnel levels, locations, and attrition rates have borne out the predictions I made back in June of 1981. The data shows this reorganization program has resulted in more than just a reorganization of personnel and offices. The goals of this program, and the manner in which it was executed, resulted in total agency chaos and employee panic which inevitably forced a majority of experienced OSM personnel to leave the coal field offices. The OSM field offices charged with responsibility of implementing the Surface Mining law were left inexperienced, understaffed, and demoralized.

The data provided by OSM on September 13, 1982, and on September 30, 1982, raises at least three areas of major concern regarding the reorganization.

1. There has been a tremendous reduction both in the number of OSM operating personnel and in the number of experienced personnel. OSM reports that in January, 1981, it had on board 959 employees. In September, 1982, that number had been reduced to 757 employees, or 21% less than 1981. In your June 19, 1981, letter to me, you stated that OSM's mission is changing, and it will take on different responsibilities. With OSM's change in mission, it undoubtedly requires a fully staffed team to implement it. Certainly it wasn't the time to initiate a reorganization program which left the agency 21% below the existing level.

Even more disturbing is the tremendous percentage of experienced personnel who have left OSM. In January, 1981, OSM had on board 948 Federal employees graded GS-1-15. As of June, 1982, 470 of these experienced staff members either were terminated, or chose to resign, retire, or transfer out of the agency. This exodus of employees constitutes a 49% loss of OSM's experience across-the-board. Out of the 470 who have left, only 272 replacements have been hired, 123 just in the last four months. It is the GS-7-13 level employees who constitute the true regulatory and technical heart of OSM. Graded in these levels are OSM's field inspectors, and technical and mine permitting experts. In January, 1981, OSM had on board 565 employees graded GS-7-13. By June, 1982, 228 of these employees were either terminated or chose to separate from the agency. This loss constitutes a 40% drop in OSM's most experienced, and most essential, personnel.

OSM admits in its State Program evaluation reports recently presented to Congress that in many cases OSM failed to meet its required levels of oversight inspections, due to lack of Federal inspectors. In addition, the reports also showed that very few states with primacy were able to meet the requirements to repermit mining operations under the permanent program. In connection with this point, I would like to remind you of your statement to me in a letter dated June 19, 1981, "Such is OSM's mission, and the agency's structure must be changed to reflect its role of assistance. . . This can only be done by working closely with and for the states." How is OSM better assisting the states in their permit review by conducting an agency "reorganization" which has forced 40% of the very people needed to assist the states to leave the service, and has failed to replace the personnel and experience which has been lost? In addition, I would like to remind you of the testimony which I received during the June 5, 1981, hearing in Denver, from David Shelton, Director of the Colorado Mine Land Reclamation Division; Brace Hayden, Administrator for the Reclamation Division of the Montana Department of State Lands; and Walter Ackerman, Administrator of the Land Quality Division of the Wyoming Department of Environmental Quality. These gentlemen testified on how their states have come to rely and depend on OSM's technical expertise. Furthermore, they all voiced their concern that the reorganization would cause many of OSM's most qualified and experienced people to leave. When reviewing the above statistics, it seems ridiculous to argue that these fears have not become reality.

The greatest loss in OSM's ability has come in the West, where there have been 149 separations since January, 1981, out of a total workforce of 170. This is a 88% attrition rate. While some of these employees have been replaced, the Western states have in the meanwhile lost the experienced staff they need to discharge their functions under the Act.

2. OSM's presence has been centralized in Washington at the cost of the coal fields. In January, 1981, the OSM Washington office employed 267 employees graded between GS-1-15. As of September, 1982, the Washington office level had actually grown 11% to a total of 302. However, at the same time, the field and regional offices (now field and tech centers) had shrunk from 681 to 448, a loss of 34%. Even more disturbing is the increase in the number of GS-7-13s in the Washington office. This level has grown from 116 to 142, between January, 1981, and September, 1982, an increase of 18%. Apparently, this increase was at the expense of the field offices which suffered a 28% reduction of GS-7-13s during the same time period (449 to 323). In January, 1981, there were 3.9 field employees in the GS-7-13 range for each one headquarters employee. Today, the ratio has dropped to 2.3 field employees for each one headquarters employee.

Last year, I voiced my concern that the reorganization would increase the Washington staff, at the expense of the field offices, where the work of mine plan review, implementation of cooperative agreements, and oversight of state programs actually takes place. Your reply of June 19, 1981, assured me that reduction "from 271 to 240 employees" would take place in the DC office, not an increase as I predicted. I would also like to remind you of your statement during the July 16, 1981, House Subcommittee on Energy and the Environment's oversight hearing on OSM reorganization, "We are going to put people where the coal is. We are going to put people where the action is, not in artificial locations around where people think the cultural advantages are better than other places, but that is our objective." Based upon those assurances to Congress, how do you explain an increase in the Washington staff? I am not aware of coal mines in the District of Columbia. Is this the true definition of the "new federalism"?

3. The reorganization, and the massive loss of experienced personnel which it caused, wasted taxpayers' money. It is hard to understand how a reorganization of a Federal agency which caused approximately half of its experienced employees to leave its service in just 18 months saved the taxpayer money and increased efficiency. Have you calculated the cost of training all the new employees needed to replace the multitudes of experienced staff members who have left? What was the cost of the unemployment benefits paid to terminated OSM employees? What was the costs of retirement benefits required for OSM employees who have chosen to retire due to the reorganization? How about refund of contributions? How many hours of planning and implementing did the reorganization program take? What about the costs of duplicate office space rental during the period that the Regional offices were being opened? What about the transportation costs required to implement the reorganization as well as the employee moving costs the government is required to spend in transferring Federal employees? Have you calculated the savings that the reorganization has produced in greater agency efficiency, in respect to its causing half of its employees to leave in one and one-half years? What were the costs and benefits of this plan, in dollars and cents?

I am personally appalled by the massive number of Federal employees who have left OSM and the great experience and expertise which has been lost. I cannot help but conclude that many of these non-political civil servants were pressured into leaving, when they could not be legally terminated. After speaking with some of these former employees, I am disturbed at the careless, and often cruel manner in which OSM staff were pressured into leaving. Furthermore, I am saddened that this happened to these civil servants despite the concerns that I voiced to you prior to the reorganization. The reorganization has made a mockery of the civil service system and its employee protection provisions granted by Congress. Could it be that you and the officials at OMS are employing such programs to change policies which you have been unable to alter in Congress or the courts? Whatever the reason for these actions, this misguided endeavor has been executed at a tremendous cost to the taxpayer, the civil servant, and the citizens who live in the coal areas.

I respectfully request your personal reply to the specific points raised in this letter.

Sincerely,

PATRICIA SCHROEDER,
Chairwoman.

Mr. WEAVER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I first would like to commend the diligence and conscienciousness and good will with which the distinguished chairman of the subcommittee, Mr. YATES, and the distinguished minority member, Mr. MCDADE, and all members of this committee have provided in bringing forth this bill. I of course, intend to support the bill.

I do want to call the committee's attention to two issues that we may bear them in mind as we progress in legislation next year. The first deals with the export of logs, and this occurs in the Northwest. We have two problems with the export of logs in the Northwest. One, we do not have that much timber any more and the export of a log is an export of a job. Also, the Chinese, the Peoples Republic of China, have now entered the log market in vast way and have purchased 25 percent of our log exports this year alone, coming from zero a year or so ago. The bidding up of prices of timber by these Japanese and Chinese and other people who buy our timber is such that it actually drives the price beyond the ability of our mills to pay and market their finished products.

I want to export to China; I want to export to Japan, but I want it to be in manufactured wood products. Therefore, this is an issue that I think we should go into next year.

Second, another jobs issue is the fact that presently the Forest Service and the Bureau of Land Management use phenoxy herbicides to clear brush off cutover lands. These herbicides are not only dangerous to the health of the people, but they also have the potential of really weakening the trees we are trying to grow. New studies

show that this could be a serious impediment to the growth of new crops, as well as a danger to human health, to use dioxin-contaminated phenoxy herbicides.

I find the use of these herbicides not only to be detrimental to health, but we could employ thousands of people, putting people to work in the desperately unemployed Northwest, to work clearing this brush manually. We have the people ready to do this, crews ready to do this, at a cheaper overall cost to the Federal Government.

So, Mr. Chairman, I ask the committee to bear in mind these two issues as we progress to next year's legislation. As chairman of the Forestry Subcommittee, I intend also to take up these issues and would like to work with them on it.

Mr. PANETTA. Mr. Chairman, I move to strike the last word.

I commend the chairman of the Interior Subcommittee, Mr. YATES, as well as the full committee chairman, Mr. WHITTEN, for the leadership they have shown in presenting this important legislation. The bill is an important step in the direction of promoting responsible stewardship and preserving our Nation's valuable natural areas, and represents a broad range of interest and support.

Among the numerous provisions of the bill is one which would seek to establish a sound offshore energy development policy along the Pacific coast by excluding the environmentally sensitive and resource-poor northern and central California section of that coast from offshore oil and gas drilling during the next fiscal year.

However, the provision would prevent actual leasing and prelease processes only, and would still permit scientific and seismic study to determine resources within the excluded area. Further, the provision would have no effect upon the significant development occurring offshore Point Arguello. In fact, the Arguello field lies over 37 miles south of the southernmost area affected by the AuCoin provision.

A similar provision in last year's bill prohibited leasing in the four northern basins of OCS lease sale 53. In addition, the southern Santa Maria basin tracts of that sale—tracts which will remain unaffected by the approval of the provision—were estimated by U.S.G.S. to hold roughly 80 percent of the recoverable resources in the basin.

California has supported offshore oil and gas drilling off its coast in the past. However, considering the high economic and environmental risk to the sensitive central and northern coasts, and taking into account the extremely low resource estimates for the northern tracts excluded by this year's provision, the State of California and the U.S. Ninth Circuit Court decided to suspend offshore leasing of the lease sale 53 tracts in that region. Numerous California counties, fishing organizations, Governor Atiyeh of Oregon, and the representatives of the five Western States sitting on the Pacific Marine Fisheries Commission all concur in this opposition to drilling on the resource-poor, environmentally sensitive northern and central coasts.

Again, I commend the chairmen for their foresight in preparing this important and complex legislation, which will seek to insure certain especially sensitive natural areas for the enjoyment and livelihood of all Americans.

Mr. CORCORAN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I will be very brief. I know the Committee of the Whole is anxious to complete action on this measure, but there is a factor here that is of some concern to me, and I know it is of great concern to the Secretary of Energy, Mr. Hodel.

As I understand it, Mr. Chairman, in this legislation before us, the appropriation bill, there is no involvement of the so-called personnel floors on the Department of Energy. However, Mr. Chairman, if you will recall, in the supplemental bill that we passed before the election recess, we did in a rather unique way impose some personnel floors below which the Secretary of Energy could not go. The problem with that, of course, is that continues on ad infinitum, and my concern is that other continuing resolutions coming up, that there might be some way in which to resolve that before we get to that point.

The senior Republican member of the Energy and Commerce Committee, our good friend Mr. BROYHILL of North Carolina, has written a letter which I would like to insert at this point:

HOUSE OF REPRESENTATIVES,
COMMITTEE ON ENERGY AND COMMERCE,
Washington, D.C., November 12, 1982.

Hon. SILVIO O. CONTE,
Ranking Minority Member, Committee on Appropriations, Rayburn House Office Building, Washington, D.C.

DEAR SILVIO: I just had a chance this morning to meet our excellent new Secretary of Energy, Don Hodel, and I am extremely impressed by his enthusiasm for taking over the management of the Department in a cost-effective, efficient way. I believe his management ability will not only provide the Administration with a strong voice in energy policy, but will also give the Department effective leadership in implementing that policy. I hope you will share my opinion of Don Hodel as we develop our working relationship with him up here on the Hill.

One immediate issue of concern to Secretary Hodel is the DOE personnel "floors" which were legislated into H.R. 6863, the FY 1982 General Supplemental Appropriations enacted by Congress before the recess. In particular, these "floors" may hamper Don Hodel's ability to manage the Department in a cost-effective way that will give energy programs a new direction and boost the morale of DOE employees charged with administering those programs.

However, because the language in the General Supplemental bill applies without fiscal year limitation, I understand these "floors" remain in effect unless affirmatively removed by new language in a future bill.

For this reason, I would appreciate a chance to sit down and discuss this issue with you and Joe McDade at your convenience when we return for the lame duck session. Please give me a call to set up a convenient time, or have your staff contact either Chris Warner or Mike Boland of my staff at Extension 5-3641.

Sincerely,

JAMES T. BROYHILL,
Ranking Minority Member.

Mr. BROYHILL would hope, in view of the fact that we have a new Secretary of Energy, a man who has had a considerable amount of management experience, particularly in public service, that before we get to the continuing resolution matter, which expires on December 17, as I recall, that he would be a position where that issue can be resolved, where we give the Secretary of Energy a little more flexibility with respect to that.

□ 1150

Mr. Chairman, at this point I would like to engage the distinguished subcommittee chairman, my good friend, the gentleman from Illinois (Mr. YATES), in a colloquy on that point.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. CORCORAN. I certainly yield to the gentleman at this point for that purpose.

Mr. YATES. Mr. Chairman, I am glad the gentleman from Illinois (Mr. CORCORAN) brought this matter to the attention of the committee.

The reason those levels exist is that the subcommittee was very concerned by the fact that programs which are considered to be very important were allowed to disintegrate because of the amount of personnel that OMB was making available to administer them. We consider them very important, and we had previously sought to persuade OMB of the necessity for maintaining certain levels to administer the programs by making appropriate references to the need in our report. OMB paid no attention to that at all, and that was the reason that we tried the "old mule" trick of hitting them with a 2 by 4.

I can understand why the gentleman is upset by that. We have not done that in this bill. I have had a chance to speak to Mr. Hodel. I have known him as a result of his work in the Department of the Interior. I wish him well as the new Secretary of Energy, and I hope and anticipate that he will do a much better job than his predecessor in that respect, and that the Department will bring itself up from the shambles in which it now finds itself. It really is in very bad condition.

Mr. Hodel has a background of being a good administrator, and we will give him that opportunity.

Mr. Chairman, I am glad that the gentleman brought this to our attention. I think it is a very valid point, and we will not resort to the same kind of limitations we have had in the past, pending Mr. Hodel's actions.

Mr. CORCORAN. Mr. Chairman, I will say to my good friend, the gentleman from Illinois (Mr. YATES), that the problem, of course, is that, with the passage of H.R. 6863, the fiscal year 1982 general supplemental appropriations bill, there is an extension of this restriction on the personnel matter which I would hope, before we get to the continuing resolution, could be resolved.

The reason I take the floor at this time is really twofold, first, to express my support for the management capability of the new Secretary of Energy, and, second, to inquire whether or not there will be an attempt by the committee and some final action on the continuing resolution to resolve this in a way which will not hamstring the new Secretary of Energy.

Mr. YATES. Mr. Chairman, will the gentleman yield further?

Mr. CORCORAN. I am pleased to yield to the gentleman from Illinois.

Mr. YATES. Mr. Chairman, may I assure the gentleman that we will try to work it out in the interim.

Mr. CORCORAN. Mr. Chairman, I thank the gentleman from Illinois (Mr. YATES) very much.

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. CORCORAN. I yield to the gentleman from Illinois.

Mr. HYDE. Mr. Chairman, I thank my friend, the gentleman from Illinois for yielding.

I just want to note in passing that we are funding the National Endowment for the Humanities and the Arts.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. CORCORAN) has expired.

(On request of Mr. HYDE, and by unanimous consent, Mr. CORCORAN was allowed to proceed for 2 minutes.)

Mr. HYDE. Mr. Chairman, will the gentleman yield further?

Mr. CORCORAN. I yield to the gentleman from Illinois.

Mr. HYDE. Mr. Chairman, we are funding the National Endowment for the Arts at a level of 42.6 percent over the President's request, and we are funding the Humanities at 36 percent over the President's request. So I think I have found a new jobs program here in this report.

I certainly am for dance, dance of all sorts, but this is $8,739,000. Then there is design arts and folk arts. I love folk arts, but this is $2,800,000. I like to subsidize budding opera stars.

But I just suggest that when we are searching with a microscope for places to cut spending, when we are cutting food stamps, when we are looking at entitlements and bleeding internally because we dare not cut them, to continue to fund these wonderful things, and they are wonderful—when there are other sources of funding—is not warranted. And if there are not other sources, there ought to be in this great opulent society. But we have taxpayers and retired people trying to find a home to buy, and we continue to subsidize all of these wonderful things at what I conceive to be excessive sums in the light of our present economic circumstances. In other circumstances they might be modest, but today they are excessive.

I think it is overreaching. I know that I am quickly being categorized as a cultural barbarian for saying this, and I accept the categorization because I just think this is overreaching.

Mr. Chairman, I hope this bill is defeated, if only to get the subsidies for the National Endowment for the Arts and the National Endowment for the Humanities back to a level that we can explain to our constituents and justify why we did this.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. CORCORAN) has again expired.

(By unanimous consent, Mr. CORCORAN was allowed to proceed for 1 additional minute.)

Mr. CORCORAN. Mr. Chairman, let me say that my good friend, the gentleman from Illinois (Mr. HYDE) is not alone in his concern.

Mr. Chairman, I wish to yield for a moment to our good friend, the gentleman from Pennsylvania (Mr. MCDADE) who has, I believe, an equal concern in mind about these equalization floors, and I would appreciate his response.

Mr. MCDADE. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, let me say that I know the Secretary of Energy, Mr. Hodel, and have worked with him on this committee and have great respect for him. I am very hopeful that we will be able to reach an accommodation and have the language withdrawn.

I think Secretary Hodel will be an efficient administrator of the Department. I recognize that it is a two-way street, that there are two ends to Capitol Hill, and that is what it is all about.

Mr. Chairman, I am sure, knowing Mr. Hodel and his background, that both the gentleman from Illinois and I would agree that he is a very able administrator, and I suspect that we will be able to work this problem out.

Mr. CORCORAN. Mr. Chairman, this gentleman from Illinois agrees also, and I thank the gentleman from Pennsylvania (Mr. MCDADE) for his response.

Mr. FRENZEL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, from the committee report one would expect that this appropriation is about $7.4 billion. However, I would like to invite the attention of the Members who may be interested, to the fact that there is about $280 million in budget authority which is not included in this bill and which was contained on a full-year basis in the continuing. That amount includes the strategic petroleum reserve, the Smithsonian construction, and the Native Hawaiian Study Commission.

But in addition to even that figure, there is another $211 million which, in my judgment, should be included in this bill, of which about $129 million comes from the redirection of receipts to finance the amount appropriated for the Minerals Management Service in one instance and, in the second instance, from matching appropriations by redirecting referrals.

So as one analyzes the bill, after trying to look under all the shells, the final result or the last shell under which we hope the pea is hiding comes out with a budget authority of about $167 billion in excess of the 302(b) authority and a little less than that over the budget assumptions.

Mr. Chairman, these are minor amounts. The committee has done a fine job in putting together its bill. Nevertheless, Mr. Chairman, if we are to have some kind of order and discipline in our operations around here, I think we really have to be sure that we dot the i's and cross the t's. As with most of our appropriation bills, there is always some of this sort of thing involved.

Mr. Chairman, until we can produce bills that are actually going to meet the letter and the spirit of budget resolution, which I consider to be a ceiling, not a floor—in fact, I would like to see us exceed the budget resolution in our reductions—I am going to be obliged to vote against this bill, and I hope others will join me.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. Are there further amendments?

If not, the Chair recognizes the gentleman from Illinois (Mr. YATES).

Mr. YATES. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. PANETTA) having assumed the chair, Mr. FASCELL, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 7356) making appropria-

tions for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

□ 1200

The SPEAKER pro tempore. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER pro tempore. Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. FRENZEL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 275, nays 73, not voting 85, as follows:

□ 1210

Messrs. LEWIS, LOTT, and TAUKE changed their votes from "yea" to "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON RULES TO FILE PRIVILEGED REPORT

Mr. MOAKLEY. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight tonight, December 3, 1982, to file a privileged report.

The SPEAKER pro tempore (Mr. KILDEE). Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. MOAKLEY. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

CARIBBEAN BASIN INITIATIVE SHOULD BE DEFEATED

(Mr. OBERSTAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. OBERSTAR. Mr. Speaker, the enactment of responsible legislation to stimulate employment in the United States must be our priority during these last few days of the 97th Congress.

With only a few legislative days remaining, the House must concentrate on the appropriations bills, and on a package of economic recovery legislation.

It would be unfortunate if the House were to spend precious legislative time

diverted from the critical domestic economic problems we face.

With unemployment at 10.8 percent—12 million people—a 42-year record, I find it extremely unfortunate that the House may be called upon to consider H.R. 5900, the Caribbean Basin Economic Recovery Act, instead of acting upon legislation to create jobs here at home. This legislation creates incentives for U.S. domestic manufacturers to abandon the United States and locate plants in the Caribbean countries with their cheap labor markets. This legislation would encourage further the export of jobs to areas where the workers are unprotected by health and safety laws, or by wage and hour standards. It offers official sanction for multinational corporations to take advantage of labor practices and worker oppression which we in the United States have long abjured.

I am particularly disturbed about the provision of this legislation which would allow multinational corporations to export products to the U.S. tariff free if only 25 percent of the product has originated in the Caribbean Basin. Seventy-five percent could originate anywhere in the world, including the Soviet Union.

Mr. Speaker, I had the opportunity of living in the Caribbean for nearly 4 years in Haiti. The average wage there now is $2.66—a day—let me emphasize: This is a daily, not an hourly wage. This legislation does not mandate minimum labor standards—and I am not talking about standards that we would accept in this country, but standards which might help set the Caribbean on a course of economic progress for all of the Caribbean peoples, not their handful of wealthy and our multinational corporations.

This legislation will not guarantee a higher standard of living for the Caribbean people. It will not insure increased training and education for these people.

It will insure the loss of American jobs. In the last decade, we have already lost 1 million jobs to this very kind of flight of jobs to the world's poorest nations. It is inconceivable to me that this House would consider, let alone pass, this legislation when, in the few days remaining to us in the 97th Congress, we should be considering and passing legislation to stimulate employment and economic recovery in the United States.

Earlier this week, the Members of this House received a persuasive and eloquent letter in opposition to H.R. 5900 from Mr. Ray Denison, director, Department of Legislation, American Federation of Labor and Congress of Industrial Organizations. I ask that Mr. Denison's excellent letter be included in the RECORD at this time.

I urge my colleagues to consider the views of American workers on this subject and, further, to consider just who will benefit from H.R. 5900—it will not be the working people of this country.

If the House passes this bill, it should not do so under the illusion that it will help stimulate economic recovery at home, or that it will relieve the economic and human rights misery of the peoples of the Caribbean basin.

AMERICAN FEDERATION OF LABOR AND CONGRESS OF INDUSTRIAL ORGANIZATIONS,
Washington, D.C., November 29, 1982.

DEAR REPRESENTATIVE: At a time when more than 11 million Americans are jobless and Congress is desperately seeking funds for job creating programs, the AFL-CIO is stunned to learn that the House may give consideration to the Administration's Caribbean Basin Initiative in the lame duck session. House passage of CBI at this time would not only cause the export of much-needed U.S. industry and jobs but would worsen this nation's economic plight and make us less able to help our friends in the Caribbean region. The AFL-CIO is totally opposed to this legislation and urges that it be set aside so that the lame duck session can be devoted to job-creation, not job destruction.

No one can challenge the commitment of the AFL-CIO to our brothers and sisters who live and work in the Caribbean Basin, tragically demonstrated by the January 1981 murder of two AFL-CIO advisors in San Salvador. The AFL-CIO is firmly in support of a strong economic aid program that will help this region meet its massive problems and develop itself domestically.

However, neither the workers in the Caribbean nor the workers in the United States want programs that cost one another jobs and lead to more unemployment. Yet that is the likelihood of H.R. 5900, the Administration's proposal.

During hearings in the House and the Senate earlier this year the AFL-CIO spelled out the failings of this proposal. The measure was unable to generate sufficient support at that time, when joblessness in the U.S. was lower than the present 10.4%. Time has only made the bill even more odorous.

Any economic initiative must consider and protect the existing jobs of workers of all involved nations—including the U.S.—and must consider also the need to create new job opportunities, both skilled and unskilled. This the Administration's proposal does not do.

The CBI proposal, in fact, provides an incentive to U.S. firms to develop tomorrow's industries and products elsewhere. At a time when the U.S. is faced with losing its basic industry, the export of its new and evolving industries is economic suicide.

This proposal creates windfall benefits for non-Caribbean exporting countries, from the Soviet Union to the Far East, who will be able to funnel products to the U.S. through the region, taking advantage of the provision for zero tariffs for 12 years on U.S. imports—a clear violation of the General Agreement on Tariffs and Trade (GATT). For a multinational corporation from any part of the world to receive the benefit of zero tariffs it need only provide that 25 percent of the product originate in the Caribbean Basin region, or in the U.S. insular possessions. This region is already well-provided for in special trade concessions. The Generalized System of Preferences gives thousands of products duty-free entry into the U.S. now. The 807:00 on the tariff code encourages foreign fabrication of U.S. products which this region utilizes. Both of these provisions have brought about a loss of U.S. jobs and industries. America simply cannot continue on this path. The first 9 months of 1982 have shown a huge swing from a trade surplus to a $7.7 billion deficit in imports over exports in manufactured products. Steel, autos and parts, electronics, shoes, textiles, apparel and other basic industries have been seriously hurt by the combined pressures of imports and recession. Also badly hurt are more sophisticated manufactured products, such as machine tools, roller bearings, semi-conductors, aircraft engines and spacecraft parts. Will American workers now be expected to accept a continuous loss of U.S. jobs in each of these products, or parts of products, as well as the more sophisticated manufactured products?

The tax provision of H.R. 5900—rumored to be dropped in order to expedite the zero tariff section of the bill—would extend the U.S. investment tax credit to the region. This and other tax breaks to U.S. companies in the bill would cause a loss to the U.S. Treasury of $800 million in five years. The purpose of the 1981 tax cut legislation was to encourage investment in U.S. industry, not offshore.

The AFL-CIO urges that the Caribbean Basin Initiative be sent back to the drawing board where a more thoughful plan of assistance to the Caribbean region can be drafted—not a blueprint to further pauperize America.

If the Administration's Caribbean Basin Initiative proposal is brought to the House floor in the lame duck session, the AFL-CIO urges that you vote against it. A major goal of the lame duck session of the Congress is to deal with the critical problems of a stricken America: unemployment, foreclosures, plant shutdowns, and human misery. Congress must not add to these problems by adopting their misguided proposal.

Sincerely,

RAY DENISON,
Director,
Department of Legislation.

LEGISLATION TO CORRECT DEFICIENCY IN FEDERAL CRIMINAL LAWS

(Mr. MCCLORY asked and was given permission to revise and extend his remarks.)

Mr. MCCLORY. Mr. Speaker, I am joining today in the introduction of legislation by the gentleman from New Jersey (Mr. HUGHES) and the gentleman from New Jersey (Mr. RODINO), the chairman of the Judiciary Committee, on which I serve as the ranking minority member. This legislation would correct an inadequacy in the Federal criminal law which we discovered following the tragic deaths of citizens of Illinois due to tampering with Extra-Strength Tylenol capsules.

Tampering with consumer products is nothing less than an act of terrorism which should be severely punished. Regrettably, recent events have generated a wave of "copycat" crimes

which can only be deterred by a forceful response from all levels of government. The bill which we are introducing today serves notice on these terrorists that product tampering is not a matter which will be treated lightly by the Federal Government.

Public sentiment in support of Federal legislation is overwhelming, as evidenced by a recent letter to the well-known columist, Ann Landers. A "Concerned Consumer in Chicago" correctly noted that the Tylenol killings have resulted in a loss of public confidence in the safety of consumer products. The reader advocated the adoption of strong Federal penalties to make it "abundantly clear to would-be poisoners that any attempt to perpetrate such terrorist activities would not be tolerated." That recommendation received Ann Landers' wholehearted endorsement and is being endorsed today by my many colleages on both sides of the aisle who have cosponsored this legislation.

This legislation would make it a Federal offense to tamper or attempt to tamper with products affecting interstate or foreign commerce which are produced for human consumption or use where the offender intends to cause bodily injury to, or the death of, an individual or has reason to know that either would be the result of his activity. The penalties for an offense under this section are 20 years imprisonment and/or $20,000. If death or injury results, the maximum term of imprisonment is life.

I believe that the bill which we are introducing today is an admirable first step in fashioning an appropriate Federal response to this unforgivable conduct. I strongly urge the leadership of the Judiciary Committee to facilitate prompt passage of this sorely needed legislation.
